Mr. MOSHER. Mr. Chairman, I hate to disagree with my friend, the gentleman from Michigan, but I do disagree with his interpretation of NOAA, and his characterization of the Department of Commerce.

Mr. Chairman, I urge the House to vote down House Resolution 1210.

I very definitely support the President's decision to establish the National Oceanic and Atmospheric Administration and to place it within the Department of Commerce, headed by an adminsitrator at the rank of Under Secretary, for strong leadership.

I enthusiastically salute and thank the House Committee on Government Operations for its strong position in favor of NOAA, and its opposition to the resolution now before us. I emphasize that the committee's decision had overwhelming bipartisan support.

I repeat, it is extremely important that we vote down this resolution, in order to take the positive step of approving NOAA.

For several years, we on the Oceanography Subcommittee of the Committee on Merchant Marine and Fisheries have been seeking an effective solution to the extreme fragmentation which has existed in our national activities in the oceans, including the Great Lakes. Until now, the Federal Government has failed to recognize our Nation's crucially important opportunities, and necessities, in the oceans.

Closely related is the manmade chaos that existed in coastal zones, that narrow belt of land bordering the seas, where the majority of the world's population is concentrated.

And, also, we have neglected to recognize fully the vital fact that the oceans and the atmosphere are essentially one system.

Obviously, there is great necessity for better coordination of effort in all these areas, and thus for reorganization of the Federal agencies involved, in order to administer a much more vigorous, effective, visible national oceanic policy and program.

The President's proposal for NOAA is a direct result of our Oceanographic Subcommittee efforts, an excellent example of bipartisan teamwork that began about 8 years ago. And I want to recognize our debt to the subcommittee chairman, Mr. LENNON of North Carolina, for his leadership in that effort.

Today, our entire subcommittee stands strongly in support of NOAA.

Our early efforts culminated in enactment of the Marine and Engineering Development Act of 1966. That landmark legislation for the first time declared it to be the policy of the United States to develop, encourage and maintain a coordinated, comprehensive and long-range national program in marine science. This legislation established the National Council on Marine Resources, chaired by the Vice President and including six Cabinet Secretaries. It directed the President to establish a Commission on Marine Science, Engineering, and Resources composed of 15 members drawn from Federal and State Government, industry, universities and other institutions engaged in marine scientific and technological pursuits. Congressman LENNON and I served on that Commission for 2 years as advisory members. The Commission was given a mandate to investigate all aspects of marine science in order to recommend an overall plan for an adequate national program.

The Commission under the chairmanship of Dr. Julius Stratton submitted its findings to the President and the Congress on January 9, 1969. The report of the Commission entitled, "Our Nation and the Sea," together with its supporting appendixes, is a truly comprehensive analysis of our existing programs and shortcomings and points the way to the future. Upon reading "Our Nation and the Sea," one must conclude that we are, with respect to the oceans, at about the same stage of development as our space programs were when the Wright brothers first flew.

The Stratton Commission report contains many excellent recommendations for this Nation's future role in the oceans and the closely related field of atmospheric research. We have only just begun to analyze and implement these recommendations. The most widely heralded suggestion of the Stratton Commission was the establishment of an independent Government agency to spearhead these programs during the next decade. This recommendation became the focal point of our subcommittee hearings during the past year and a half. This was logical since everyone concerned with the Federal Government's role recognized that it had become fragmented among many different agencies, and that the efforts of these agencies overlapped to a wasteful degree and lacked any fundamental coordination. In recommending the establishment of an independent agency, Dr. Stratton and the other members of the Commission made it abundantly clear, however, that they did not consider themselves to be experts in the field of Government organization and were primarily concerned with identifying program deficiencies and recommending a substantive course of action for the future.

At the beginning of our hearings in 1969, I pointed out that it might be preferable for the President, through his powers under the Reorganization Act, to implement the basic structural changes called for by the Stratton Commission. Our subcommittee proceeded to consider legislation to establish NOAA, recognizing, however, that a major realinement of existing agency responsibilities posed numerous difficulties.

Consequently, the subcommittee maintained a dialog with the administration and the President's Commission on Executive Reorganization. I believe that this dialog led to the President's submission of Reorganization Plan No. 4.

Mr. Chairman, the reorganization plan differs in several respects from the organizational recommendation of the Stratton Commission. It does not include within this new structure the Coast Guard, nor does the plan create an independent NOAA. But I believe these two deficiencies are more apparent than real.

The role of the Coast Guard in NOAA, as contemplated by the Stratton Commission, was essentially to round out the organization. It seemed illogical to the Stratton Commission to leave out of NOAA such a large organization of ships and men, and yet an analysis of the Coast Guard's missions clearly indicates that the Coast Guard now and for the foreseeable future must dedicate itself primarily to matters relating to maritime safety and environmental protection. I have no doubt that as in the past the Coast Guard will work very closely with those you are primarily concerned with expanding our knowledge of the oceans and the atmosphere. I do not believe, therefore, Mr. Chairman, that the absence of the Coast Guard from NOAA will impede the development of our knowledge of the seas.

With the Coast Guard remaining in

the Department of Transportation, the largest single component of NOAA is now the Environmental Science Services Administration, ESSA. ESSA has performed commendably since its organization in 1965 under the Department of Commerce.

As Secretary Stans has pointed out, the Department of Commerce already has a solid base of science and technology which will buttress the foundation of a vigorous NOAA. That is the type of strength that NOAA will need.

Mr. Chairman, the National Oceanic and Atmospheric Administration, as provided in Reorganization Plan No. 4, does fulfill our basic goal of creating a point of national focus for oceanic and atmospheric programs of the future. The Administrator of NOAA, to be appointed by the President at level 3, will have the same rank as Cabinet Under Secretaries.

Our chief deficiency, the lack of effective coordination between governmental, private, and institutional involvement in the seas, will be overcome by NOAA. Unlike our space programs, this Nation's involvement in the oceans is a partnership between these various elements of society. Each is contributing substantially and each has a rightful role to fulfill in the future.

Mr. Chairman, I urge my colleagues to support Reorganization Plan No. 4 and thus to disapprove House Resolution 1210.

Mr. HOLIFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I just want to say I too regret that I must disagree with my distinguished colleague, the gentleman from Michigan (Mr. DINGELL) about this reorganization proposal.

Our committee, as has been pointed out before, on oceanography held weeks and months of hearings on the problem of NOAA. I regret that the reorganization plan did not make the agency a separate and independent agency. I think that would have been the proper approach. I regret also that the Coast Guard was not included in the reorganization.

However, I believe this is a step forward and eventually probably will result in a separate independent organization with even more of the constituent agencies.

I have heard the argument that because sports fishing and commercial fishing would be transferred they would suffer at the hands of commerce. I do not share that feeling. I believe just the opposite will be the result.

People must realize that all of the current employees basically who are now administering those programs will be transferred almost in toto. They will not have new personnel come in who are against any of these programs. Rather, I believe this will be given new impetus and new force in the Department of Commerce, because this will be the major effort now of the Department of Commerce. It will be the largest part of its budget, and the major emphasis of the Department of Commerce will be now in this area, and I believe we are going to see added help for sports fishing and the whole fisheries environment.

I am encouraged that this will happen. I am sure our committee will do oversight on all the activities they may carry out, and I am sure this will be the result.

I also believe they will give this added budget strength. Certainly, when we look at what has been done in the past with respect to sports fisheries and commercial fisheries, it is nothing which any of us can wave the flag about. We are far down on commercial fishing. We have gone down compared to other nations. I know I am not satisfied with respect to the activities of sports fishing off the coast of Florida. We ought to be doing more to protect and conserve the sports fisheries.

This is what I anticipate will be done. I would urge rejection of this resolution and approval of this plan as a first step in eventually bringing about an independent organization for the development of the resources of the sea.

Mr. ANDERSON of Illinois. Mr. Chairman, I rise to urge the defeat of the resolution of disapproval to Reorganization plan No. 4 which would establish in the Department of Commerce a new National Oceanic and Atmospheric Administration. I enthusiastically endorse NOAA as an essential requisite in the formulation and implementation of a national policy for the oceans. And there is no doubt in my mind that there is a need for such a policy and such an organization as man turns increasingly to the sea for new solutions to the problem of survival. As former Maritime Administrator Andrew E. Gibson put it:

> It is the sea of which we must look . . . to feed a growing population. It is this sea from which we must harvest not only foodstuffs but its vast resources of minerals. It is the sea to which we must look by means of desalination for the very water necessary to sustain life in the future. . . . Put succinctly, as a nation and people . . . we will live or die by the sea.

Mr. Chairman, the Congress recognized this back in 1966 with the passage of the Marine Resources and Engineering Development Act. In that act we established a National Council on Marine Resources in the Executive Office of the President, and we authorized a 2-year study to be made by a newly created Commission on Marine Science, Engineering, and Resources under the able chairmanship of Dr. Julius A. Stratton. The results of that exhaustive study were released in January of last year in the report, "Our Nation and the Sea." One of the top priority recommendations of that Commission was the creation of a National Oceanic and Atmospheric Agency.

In the words of the Stratton Commission report:

> We believe that it will mobilize the resources of our Government in the most effective manner to lend strength and power to the Nation's marine commitment. The incremental cost in taking prompt action for consolidation will in itself be relatively small. The added effectiveness for the fulfillment of the national program should be enormous.

The Commission report went on to note that the proliferation of marine programs throughout some 23 departments and agencies of the Government made virtually impossible any unified national thrust in the oceans, and therefore, "a new, strong Federal focus for marine activity" was urgently needed.

Mr. Chairman, after reading the Stratton Commission report early last year, I concluded that this was a major area for national concern, and I testified before the Oceanography Subcommittee of this body in favor of a new organization for the oceans. All told, that subcommittee heard some 92 witnesses on the NOAA proposal, most of whom urged affirmative action on this proposal.

I think we owe a great debt of gratitude to the Stratton Commission, to the Oceanography Subcommittee, to the Ash Commission, and finally to the administration for bring this proposal to full fruition in this reorganization plan. While this NOAA differs in some respects from that originally proposed by the Stratton Commission, it still draws heavily from their recommendations both as to structure and role.

Under this reorganization plan, a number of Federal marine-related missions will be brought together under NOAA in the Department of Commerce for the purpose of fully and effectively exploring and developing our marine resources while avoiding the type of oceanic environmental degradation and depletion which might result from a haphazard approach. This plan recognizes the need and indeed the necessity for a coordinated and unified national ocean policy to avoid the perils of pollution and overpopulation and deliver on the promises and potential of this last great frontier on earth. If we do not organize effectively for the careful exploration and constructive exploitation of this last great frontier, we will soon be faced with a global resource problem of crisis proportions. It would be little consolation to know that this would be our last crisis on earth.

Mr. Speaker, I urge defeat of this resolution so that we can get on with the very exciting and urgent task of meeting the challenges and possibilities which lie waiting beyond our shores.

Mr. ERLENBORN. Mr. Chairman, I have no further requests for time.

Mr. HOLIFIELD. Mr. Chairman, I yield myself such time as I may consume.

I should just like to say this is an important plan, as we note when we study the number of employees, 13,250 positions, and the projection of 13,750.

Most of these functions that are to be transferred over to this one entity are related services and related functions in the field of national oceanic and atmospheric programs. We are proliferating these programs all over the map, and there has to be some concentration of them so that we will know where they are and can handle them as an entity rather than in fragmented areas.

The success of this agency will depend, in my opinion, more upon adequate funding and adequate programs than it will on the actual structure involved. It

can be good the way it is, or it can be just as good or perhaps better if it is put together into one agency, but in the last analysis it will depend upon how much financial support is given to these agencies and functions that are outlined under this consolidation of like functions.

I believe that the President under the reorganization plan procedure has set up a plan which is orderly and which in general comports with the purposes of the Reorganization Act. Therefore I am supporting the plan.

Again, because this is a resolution of disapproval, those who vote on this plan who are for the plan will vote "no" on the disapproving resolution and that automatically will be a vote for the plan.

Mr. Chairman, I have no further requests for time, and it has been stated on the other side that there are no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H. RES. 1210

*Resolved,* That the House of Representatives does not favor Reorganization Plan Numbered 4 transmitted to the Congress by the President on July 9, 1970.

Mr. HOLIFIELD. Mr. Chairman, I move that the Committee do now rise and report the resolution back to the House with the recommendation that the resolution be rejected.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ANDREWS of Alabama, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration House Resolution 1210, to disapprove Reorganization Plan Numbered 4, he reported the resolution back to the House with the recommendation that the resolution be rejected.

The SPEAKER. The question is on the resolution.

The question was taken.

The SPEAKER. In the opinion of the Chair, the resolution, not having the affirmative vote of a majority of the authorized membership of the House, is not agreed to.

So the resolution was rejected.

## GENERAL LEAVE TO EXTEND

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just passed and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## THE AMERICAN SECURITY COUNCIL AS VIEWED BY A MAN WHO NEVER THROWS ANYTHING AWAY

(Mr. VAN DEERLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VAN DEERLIN. Mr. Speaker, we were treated last week to another of those campaign-year reliables, the "rating" of Senators and Congressmen according to the ideological lights of a particular organization.

The new entry in this field calls itself the American Security Council, listing headquarters at 1101 17th Street NW., here in Washington.

The council's approach was essentially the same as other rating systems on behalf of business, or labor, or organized veterans. It was based, sponsors said, on a selected group of 10 votes touching on war policy and military preparedness.

Only difference between this and other vote rating systems was that the American Security Council based its own positions on the results from a mass computerized questionnaire which it sent out in mid-July.

Impartial observers might charge that the council's multiple-choice questions were loaded, or in the main so heavy handed as to be useless in determining foreign policy positions in the world of 1970.

But that would be a matter of opinion. I am more interested at the moment in pointing up a demonstrable fact concerning the American Security Council—for the discovery of which I am indebted to my own slovenly habit of rarely throwing anything away. It is this:

The American Security Council questionnaire which was sent to me—"an opinion leader in Washington"—on July 15 carried a mailing tab unmistakably identical to mailings which have arrived at my home from numerous other organizations—all of them legitimate, but all identified with the far, far right.

One of these groups utilizing the same mail list was the Conservative Victory Fund. In this one our colleague, the gentleman from Ohio (Mr. ASHBROOK) was urging me—also by computerized letter—to join in an effort to defeat such good friends as JOHN BRADEMAS, DON EDWARDS, and DICK FULTON—and to help boost the fortunes of Senator MURPHY and Phylis Schlafly, among others.

In another mailed message delivered to my door with the very same address tab, Senator BARRY GOLDWATER asked me to send $15 to Young Americans for Freedom—ostensibly to help counter a million-dollar kitty purportedly collected by the New Mobe for their moratorium rally last October.

Still another appeal came from the National Right To Work Legal Defense and Education Foundation, Inc.—again with the same, easily identified mailing tab. the thrust of this organization's message was that union officials alone had socked $60 million into Hubert Humphrey's campaign, and unless we right-thinking citizens took legal action to halt them, those same union officials would spend even more in this year's congressional elections. The range of suggested contributions: $5 to $500.

On and on runs the identically addressed torrent—appeals from every conceivable new creation of that far-out fringe of the right, usually with the right palm turned upward in a political campaign year.

I commend these organizations on their frugality in combining mail lists. And I suppose if I did not save them all, in desk space that surely could be put to better use, I might be fooled into supposing that each of these peas came from a different pod.

Mr. Speaker, I shall be glad to share the fruits of my easily assembled detective work with anyone interested in inspecting it. Meanwhile, any colleagues low rated by the American Security Council should be no more concerned than if their rating came from the liberty lobby.

Which it probably did.

## THE UNITED STATES MUST RESPOND PROMPTLY TO NEW SOVIET THREAT IN CUBA

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, the White House statement last Friday, September 25, that the United States would view with grave concern any attempt to establish a base in Cuba for the servicing of Soviet nuclear submarines, came none too early.

I fully support the President's statement.

This public warning to the Soviets appears to be based on intelligence developed by the Department of Defense, indicating that such a base is in the process of being established at Cienfuegos in the southern part of Cuba.

I am today calling the Subcommittee on Inter-American Affairs to meet in an urgent executive session with high Government officials, to review this situation.

I am also requesting the chairman of the Armed Services Committee to give every consideration to the requirements of strengthening our military and naval capability in the Caribbean region.

Nearly 3 months ago, in the course of my subcommittee's hearings reviewing the security situation in the Caribbean, I raised this very issue with high-ranking officials of the administration and the top U.S. military commanders responsible for the Caribbean region.

I had stressed that only a short time earlier, in May of this year, the second group of Soviet naval units visited the Caribbean and first stopped in Cuba at the port of Cienfuegos.

That Soviet naval force included an Echo II type submarine which had nuclear capability, eight firing tubes, and a range of approximately 400 miles.

I had pointed out to executive branch witnesses that the presence of Soviet nuclear naval units was drastically changing the security balance in the Caribbean and required the U.S. Government to take prompt steps to reverse the policy of curtailing our naval and shore facilities at Key West, at Boca Chica, at the Homestead Air Force Base, and at other installations in Southeastern United States.

Adm. E. P. Holmes, commander in chief of our Atlantic Command, agreed that it would be a "folly" to cut down U.S. military and naval capability in the face of this new Soviet threat.

On July 8, and during subsequent hearings, I repeatedly called to the ad-

ministration's attention the many reports which I received indicating that facilities for servicing Soviet nuclear submarines were being constructed in Cuba.

Information now available to the Department of Defense and the White House seems to confirm those reports.

I believe that it would be a drastic mistake for the administration to invite a repetition of the 1962 Cuba missile crisis by failure to act promptly and decisively to nip this new Soviet challenge in the bud.

The track record of Soviet policy has demonstrated that once they embark upon the course of trying to change the military balance in a given region, they will continue ahead until they are stopped.

This has almost happened once in Cuba. It has happened since in the Mediterranean, in the Indian Ocean and in other areas.

As the first step, I believe it is imperative that the United States move promptly to beef up our military capability in the Caribbean region. This means that our facilities at Key West, Boca Chica, and Homestead should be immediately restored to full strength.

The stakes involved in any potential conflict in the Caribbean, and particularly in any United States-Soviet confrontation in that region, are going up each day.

I warned about this months ago, and I am today repeating that warning.

I believe that to wait any further is to court disaster.

The United States should and must respond promptly and forcefully to this new Soviet challenge.

I am gratified that the White House is turning its attention to this urgent problem. I hope that this will result in actions along the lines I have suggested.

Mr. SIKES. Mr. Speaker, will my distinguished colleague yield?

Mr. FASCELL. I yield to my distinguished colleague from Florida.

Mr. SIKES. I wish to commend my distinguished colleague from Florida upon his statement. I endorse what he has said and join in his concern. I feel that the United States must move, and move vigorously, and that the committees of Congress should fully explore the threat to our security and to the hemisphere, which appears to be developing, in the area to which the gentleman referred.

Mr. RIVERS. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I yield to the distinguished chairman of the Committee on Armed Services.

Mr. RIVERS. I thank the gentleman. I assure him that we have known about the proposed base for some time, and I have been preparing to release some remarks on the subject. For 4 months I have been preparing remarks, which I intend to deliver today. In a conference report, consideration of which we concluded on Thursday, we have included $435 million for the Navy as a beginning effort to beef up our Navy to be able to meet the threat we know the Soviets are creating. The item is in the conference report which will be up tomorrow. But this afternoon I intend to speak on the subject.

I want to thank the gentleman. The time is now to do something about this.

Mr. FASCELL. I agree with the gentleman from South Carolina.

## MRS. JESSIE BALL DU PONT PASSES

(Mr. BENNETT asked and was given permisson to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BENNETT. Mr. Speaker, Mrs. Jessie Ball du Pont, of Jacksonville, Fla., and Wilmington, Del., passed away at Nemours, her estate near Wilmington, on this past Saturday, and will be buried there today. She was one of the most beautiful characters I have ever known, full of love for humanity and with a zest for life, and wholesomely dedicated to making life better for others. Yet, she never claimed credit for the vast amount of good she did; and most of it was done anonymously.

Since she was the widow of an extremely able and wealthy man, Mr. Alfred I. du Pont, and the sister of another outstanding business leader, Mr. Edward Ball, some who knew her only slightly assumed that her tremendous accumulation of wealth was the result solely of the work of these able men; but those who know anything of the actual facts know that she has been an extremely successful businesswoman in her own right for half a century.

She established the Alfred I. du Pont Foundation for Crippled Children, a dream of her late husband; and she otherwise carried on the philanthropic objectives of this sensitive and strong man, whom I also had the pleasure to know before his death 35 years ago. And she had a strong conviction of the need to keep vital the independent colleges of the country, particularly those which were church oriented. Her philanthropies in this field have been little published but they were tremendous.

Several weeks ago, Mr. Speaker, my family and I went to Nemours to pay our respects during a congressional recess, as she had repeatedly asked us to do. We learned sadly from her doctors that she would not be with us long. But regardless of how certain is the closing of life, it is always a shock and a personal tragedy to those who are left behind.

Few persons ever had the outstanding talents and opportunities of this great lady; and none ever used them better for mankind, I am sure. All thoughtful Americans join me in deepest sympathy to her brother, Ed Ball, her sisters and her daughter, Mrs. Carl Zapfee, and her other relatives and close friends.

Mr. Speaker, Ralph Waldo Emerson once observed that most of us fret ourselves into nameless graves while here and there some noble soul forgets himself into immortality. Such a person was my beloved friend, Jessie Ball du Pont.

This morning's edition of the Washington Post carried the following announcement of her death:

JESSIE BALL DU PONT

WILMINGTON, DEL., September 27.—Mrs. Jessie D. Ball du Pont, 86, third wife of industrialist Alfred I. du Pont, died Saturday at her family estate near here.

Her husband, who died in 1935, organized E. I. du Pont De Nemours and Co., and was one of the world's richest men. He was a grandson of the founder of the Du Pont industrial empire.

It was reported in 1964 that Mrs. du Pont received from the Alfred I. du Pont estate a total of $58.8 million from 1951 to 1962, $6.6 million in 1962 alone.

Mrs. du Pont was a native of Virginia and was married to the industrial magnate in Los Angeles in 1921. She was then 36. She was a descendant of Mary Ball Washington, mother of George Washington.

Mr. du Pont was divorced from his first wife, the former Bess Gardner of Philadelphia, in 1906. His second wife, Mrs. Alicia Bradford Maddox, of New York City, died in 1908.

Mrs. du Pont had lived in seclusion at Nemours, the family estate, for a number of years. Her secretary said she died of pneumonia.

Mrs. du Pont was a major benefactor of such institutions as Hollins College, Washington and Lee University, the Virginia Museum of Fine Arts, Mary Washington College of the University of Virginia, the University of the South and the Alfred I. du Pont Institute for crippled children.

In 1957, for example, Mrs. du Pont gave Hollins College a gift of $271,000, half of it to go toward a chapel and the other half for the Alfred I. and Jessie Ball du Pont scholarship fund.

She made two gifts in 1947 totaling $112,000 toward Washington and Lee University's bicentennial fund.

In 1956, Mrs. du Pont was selected by the Virginia Chamber of Commerce for a special award for "her service to Virginia and to education in the Old Dominion." She was the first woman to receive such an award.

Mrs. du Pont broke a 210-year tradition in 1959 when she became the first woman on the Board of Trustees of Washington and Lee University. She was appointed to succeed Sen. Harry F. Byrd (D-Va.) who had resigned.

Funeral arrangements were incomplete. However, burial was expected to be next to her husband at the estate.

She is survived by a daughter, Mrs. Carl Zapfee, of Baltimore, three stepchildren, eight grandchildren and two great-grandchildren.

## RUSSIAN SUBMARINE BASE IN CUBA

(Mr. ROGERS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS of Florida. Mr. Speaker, I think all the Members of the House are greatly concerned by the evidence of the showing that Russia is trying to build a submarine base in Cuba.

I have by wire contacted the distinguished chairman of the Armed Services Committee as well as the Foreign Affairs Committee urging that the committees call the Defense and State Departments before them and investigate this matter.

It is a serious development, and the people of this Nation are vitally concerned. I am sure, as he has in the past,

that the chairman of the Armed Services Committee will respond by looking into this matter which can vitally affect the defense of this Nation.

Mr. RIVERS. Mr. Speaker, will the gentleman yield?

Mr. ROGERS of Florida. I yield to the gentleman from South Carolina.

Mr. RIVERS. Mr. Speaker, I believe the gentleman understands I will approach this in a little different manner than the chairman of the Foreign Affairs Committee, but I will look into it.

Mr. ROGERS of Florida. Mr. Speaker, I thank the gentleman from South Carolina, and I would urge his close investigation into this matter.

## NATION'S HOUSING CRISIS

(Mr. WIDNALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WIDNALL. Mr. Speaker, the other day, one of my colleagues made a speech blaming the Nixon administration for the Nation's housing crisis. While I must admit that we are indeed in the midst of a housing crisis as severe as any this Nation has ever faced, I should point out several things:

First. President Nixon's administration did not cause the housing crisis. It was inherited from the Democrats. The Housing and Urban Development Act of 1968, the product of a Democrat administration and a Democrat-controlled Congress, documented the housing need at 26 million housing units over the next 10 years—1968–78. This goal was reaffirmed by President Johnson's National Commission on Urban Problems in its report to him in 1968.

Second. The reason why the housing crisis persists is because of inflation. And inflation is the unfortunate result of unwise guns-and-butter overspending of the Johnson administration. This inflation has hit the housing problem from several directions all at the same time. It has caused the cost of homebuilding, including land, labor, materials, management, and financing to increase 10 percent since 1968. It has made financing home purchase more difficult and costly. And it has increased the price of existing housing, often pricing it out of the market for which it was intended.

Third. Although the Nixon administration inherited a severe housing problem together with a war-induced inflation which has exacerbated the housing problem, a number of specific steps have been taken which are beginning to bring results.

The most important step to take in curing the housing crisis is to curb inflation. As Federal Reserve Board Chairman Arthur Burns said on February 7, 1970:

> There can be no doubt whatever that the single most important contribution toward improving housing market conditions would be success in the present struggle to check inflationary trends and expectations. Nonetheless, it must be recognized that it takes time to overcome an inflationary momentum that has gathered headway over a span of years dating all the way back to 1964.

The Nixon administration has instituted a number of fiscal and monetary changes designed to bring inflation under control. Just last week we heard the heartening news that the prime interest rate had dropped from 8 to 7½ percent and that the cost of living rose less in August than in any month since December 1968. Nixon's anti-inflationary policy, it appears, is paying off. This success should be reflected in an easing of the housing finance situation in the near future. The lower prime rate especially should mean that very soon home mortgages will be down to the point where the average family can begin to afford to buy a home. Unfortunately, the Democrat-controlled Congress did not see fit to adhere to Nixon's fiscal policy which called for a $1.3 billion surplus in fiscal year 1971. Such a surplus would also have had the effect of making more money available for investment and thereby forcing down interest rates. Rather than a surplus, however, the Democrats have passed legislation which so far has added $2.7 billions to the President's fiscal year 1971 budget.

The administration has also increased the flow of funds into mortgages by extending the Fannie Mae commitment and by adjusting interest rate ceilings on FHA and VA mortgages.

Attacking the housing problem from another direction, the President also took steps to stabilize the cost of building materials. The Department of Agriculture was directed to use a supplemental appropriation for fiscal year 1969 and an increased appropriation for 1970 to provide additional timber from national forests. The Department of Interior was directed to make available increased timber for sale. And the Interstate Commerce Commission issued orders to relieve the shortage of boxcars used to move lumber and plywood from the Northwest. As a result of these measures, the sharp increase in prices which had seriously affected the building costs for single family homes and small apartments was reversed. Lumber and plywood prices have declined from their high levels of a year ago.

Working to relieve the labor shortages that have helped push housing costs up, the Nixon administration has initiated special job training programs to make entrance into the labor market easier. At present, 250,000 students are enrolled in construction training; the Department of Labor is encouraging local surveys and reports on specific manpower needs; and the Department of Health, Education, and Welfare is helping States develop plans for vocational education in secondary schools, postsecondary schools, and cooperative education programs which emphasize preparation for the construction industry.

In addition to attacking inflation, materials costs, and labor shortages, the Nixon administration has launched an imaginative program, Operation Breakthrough, which aims at developing entirely new ways to go about meeting our housing needs. Operation Breakthrough seeks to apply the principles of mass production to homebuilding so that the discoveries of industrial research and technology can be used to move homebuilding out of the Middle Ages. As this succeeds, volume production and economy of scale will become possible, permitting greater efficiency in the design, production, transfer, financing, and management of our national housing effort. This will mean attractive, well-built homes at prices families can afford.

Because of these efforts by the Nixon administration, the housing outlook is a lot brighter than it was when Nixon took office in January 1969. His efforts to control the inflation which the Democrats bequeathed to the Nation in the 1960's, means that soon the housing problems that accompanied the inflation will begin to respond. The additional administration efforts to control materials costs and labor shortages and to develop new housing construction approaches will help us beat this housing shortage in the 1970's.

According to a Wall Street Journal article, appearing on September 24, there are already tangible signs that the housing situation is improving. The article follows:

> Home builders begin to sound a bit more optimistic.
>
> There's still plenty of gloom in the industry, which has been hit hard by tight money. But signs of improvement are easier to come by now. The Council of Housing Producers, whose 13 members are among the major home builders in the U.S., says members expect to build about 33% more units in 1970 than a year ago. Houston's Westchester Corp., which had anticipated selling 225 homes this year, now expects to build about 300. In Pittsburgh, Ryan Homes, a big builder of single-family units, says business is "up substantially."
>
> "We think it's quite obvious that the tight money situation is easing," says Eli Broad, chairman of Kaufman & Broad, a Los Angeles builder that expects housing starts in the last half to be up "at least 30%" from a year ago. This week's cut in the prime lending rate by major banks has added to optimism that more money will be available for housing.

## THE SOVIET THREAT

The SPEAKER. Under a previous order of the House the gentleman from South Carolina (Mr. RIVERS) is recognized for 60 minutes.

(Mr. RIVERS asked and was given permission to revise and extend his remarks and to include extraneous matter.)

Mr. RIVERS. Mr. Speaker, never before in the 30 years of my membership in this body have I stepped into the well of this House with greater concern for the future of this Nation.

The fears that I have are those that must be shared by every American regardless of his political or social philosophy or his economic status.

All Americans have been given the blessed and priceless heritage of freedom—a freedom which I am convinced is in terrible jeopardy.

My critics, who are legion, will attempt to dismiss what I say today by categorizing them as the shrill cries of a hawk who is suffering the agonies of reduced defense expenditures.

If this occurs, I will have failed my purpose since I believe that these critics, who love America no less than I, will, if they assess my words carefully, find that we not only have a common concern, but a common and frightening peril.

The Congress is now engaged in a great and protracted debate over foreign policy and the defense budget.

Unfortunately, the debate in the other body has again distinguished itself by its indecisiveness and, regrettably, its apparent sense of hopelessness. Thank God that this body, despite its uninhibited free swinging debate, continues to be capable of making clear-cut and courageous decisions when our Nation's security is at stake.

My words today are, therefore, intended as much for the Members of the other body as they are for you and, perhaps even more importantly, they are intended for the American people. For in the last analysis, it is the American people who stand to lose everything if we fail to discharge our awesome responsibilities in respect to our national defense.

Consideration of the defense budget, contrary to what some would have us believe, is not a question of assigning relative priorities between defense and domestic programs.

Decisions on the defense budget should be based on the simple question of national survival—and nothing more.

The issue should be "what is required to survive?"; and not "how should we allocate the national budget between defense and domestic programs?"

The final measure of our ability to survive as a nation in a hostile world will not be how well we have managed our domestic resources and domestic programs, but whether or not we have avoided and frustrated the forces of evil which would draw us into the crucible of war with the Soviet Union.

If we fail in that endeavor, we will have failed in everything.

It is this circumstance which demands that we maintain a level of strategic and conventional military capability that will insure against any misunderstanding by the leaders in the Kremlin of our intentions to survive.

Regrettably, the leaders in the Kremlin are now evidently unimpressed by both our military capability and our national determination to survive.

That our determination to survive is suspect requires no elaboration. The dissident voices in our Nation who would destroy the very fabric of our society are being interpreted by the leaders in the Kremlin as the voices of the American people. This fact together with our evident unwillingness to support a defense establishment geared to national survival has created a very dangerous atmosphere in which the Soviet Union may be tempted into actions which can only ultimately result in a nuclear holocaust.

Since the deterioration of our military capability vis-a-vis the Soviet Union is no secret to the Kremlin, I believe it is high time that we tell the American people the facts of life. I plan on doing that today.

First, since we all recognize the vital importance of being a maritime nation, and because of our dependence on the free use of the seas, let me tell you some sobering facts about Soviet naval strength.

The Soviet Union is now one of the world's two leading sea powers—and possibly the leading power. When Admiral Gorshkov assumed command of the navy in 1956, it was largely a water-borne adjunct of the ground forces. Today, it is a well balanced modern force which is equally at home on the high seas as it is in coastal waters.

Soviet naval units now frequent waters which only a few years ago were considered the private preserve of Western naval forces.

It was only in 1964 that the Soviet Navy began continuous deployments in the Mediterranean; now, since the Arab-Israel war of 1967, a flotilla of nuclear submarines and missile-armed surface ships have been continuously operating there.

This Mediterranean presence has at times attained a flotilla strength of 65 naval vessels, including submarines and support ships.

As a consequence, today Soviet naval forces constitute a major political and military presence in the Mediterranean.

This naval presence has also been extended into the Indian Ocean, and the farthest reaches of the Atlantic and Pacific Oceans.

Soviet submarines and warships equipped with missiles now operate off the coast of the United States, as well as the Caribbean and off the coast of Africa and Southeast Asia.

The worldwide Soviet naval operation "Ocean" which was conducted during April of this year involved more than 200 ships and submarines, and was their announcement to the world that they have developed and intend to flex their naval muscle simultaneously in the four corners of the world.

The Soviet surface fleet now includes two helicopter carriers, about 24 cruisers, 35 guided missile destroyers, 50 gun-armed destroyers, more than 100 destroyer escorts, and literally thousands of smaller ships, minesweepers, coastal escorts, support craft, and intelligence collectors.

The greatest Soviet naval strength is in its submarine force—the largest ever created in the history of the world. The fleet presently has approximately 350 submarines, 80 of which are nuclear powered.

The new Soviet Polaris-type submarine can fire 16 ballistic missiles to a range of at least 1,300 miles; at least 13 units of this class are already operational, and these units are being produced at the rate of 8 to 10 each year. They are testing a new submarine ballistic missile estimated to have a range of 3,000 miles. This missile will probably be back fitted into the existing Soviet submarine fleet.

At the present rate of construction, the Soviet fleet of these Y-class ballistic missile submarines will surpass the U.S. fleet of 41 Polaris submarines by 1973 or 1974.

In addition to the Y-class ballistic missile submarine, the Soviet Navy has approximately 40 older ballistic missile submarines which carry three launchers each. Nine of these submarines are nuclear powered, and are probably targeted against European or Asian targets, whereas the more modern Y-class missile submarines are, for the most part, targeted against the United States.

The Soviet Navy also has about 65 submarines, 35 of which are nuclear powered, equipped with supersonic cruise missiles, some having ranges up to 400 miles. These submarines are designed to attack both naval and merchant ships. In addition, the Soviet Union has about 240 other submarines which are designed for torpedo attack missions against surface ships or other submarines. Twenty-two of these are nuclear powered.

In evaluating the Soviet submarine fleet, it must be remembered that the German submarine fleet which almost won the battle of the Atlantic, included only 57 diesel submarines in the early months of World War II.

The Soviet nuclear submarine construction capability now is about 20 units a year based on working one work shift a day; by working three shifts a day they have the ability to produce 35 nuclear submarines a year. Today they are building at a rate of from 10 to 14 per year. One Soviet yard alone has several times the area and facilities of all the U.S. submarine yards combined.

The Soviet Union is expanding its production of Y-class nuclear-powered ballistic missile submarines, and I estimate that approximately 50 units of this new missile class will have been completed by as early as mid-1974.

By contrast to Soviet submarine strength, the United States today has only 147 operational submarines of which 88 are nuclear powered, and of which only 47 are configured as submarines primarily designed to combat the Soviet submarine threat. The other 41 nuclears are our Polaris missile firing submarines.

Despite the 47 U.S. nuclear attack submarines designed and available to combat the Soviet submarine threat, the latest Soviet nuclear submarines have a submerged speed which is significantly higher than anything we previously contemplated or expected.

It is this chilling fact that has compelled the Committee on Armed Services to insist that we go forward immediately on the construction of the new nuclear-powered 688-class submarine which we hope will be able to cope with this significant and deadly Soviet capability. However, regardless of how rapidly we proceed on the construction of this new class of submarines, it will be years before they become operational in significant numbers, and in the meantime Soviet technology will undoubtedly strive to maximize this almost unbridgeable gap in our defensive response to this Soviet submarine threat.

This existing and ever-widening gap in our defensive capability to meet the Soviet submarine threat is simply a current reflection of the past unwillingness of defense budgeteers to provide for a modern Navy.

Practically every surface ship in the Soviet fleet has the Styx missile. Now for you who do not know what the Styx missile is, let me tell you a few shocking

facts. This is a short-range naval missile which travels at approximately sonic speed and can be carried on almost the smallest type of naval craft. It has tremendous reliability and, most unfortunately, we have little in the way of a reliable defense against this type of missile attack

These surface-to-surface missiles enable small torpedo boats to duel with cruisers and large combatant surface vessels by outranging the conventional naval artillery on these ships.

Unfortunately, we again do not have a missile of this capability in our own operational inventory.

The surface naval vessels of the United States are, as compared to the Soviet Union, if anything, in worse condition than those of the undersea fleet. No purpose would be served in attempting to detail these deficiencies except to point out that the Comptroller General of the United States recently submitted a secret report to the President of the United States and the Congress on the impaired combat readiness of the Navy's Atlantic and 6th Fleets.

In that report, the Comptroller General in commenting on the readiness of these naval vessels stated, and I quote:

> Approximately 80% of the major ships in the Atlantic Fleet are over ten years old, and 50% are over 20 years. In April 1969, the average age of the ships of the Sixth Fleet was 18.3 years.

The Comptroller General, in commenting on the relationship of the age of our naval vessels and their inability to maintain combat readiness pointed out that "prior to 1964 engineering casualties" represented approximately one-quarter of the circumstances which required immobilizing a ship, but because of the advancing age of the vessels "in 1964 the engineering casualties began to increase, and by the end of 1968, they accounted for about 50 percent of the total casualties."

The Comptroller General went on to say that—

> This trend was evidence of the fact that the ship's platforms and associated propulsion systems were being affected by excessive age, plus a lack of parts for equipment, which in some instances, was no longer being manufactured.

The sum total of the General Accounting Office's secret report is that under current conditions fleet readiness for sustained wartime operations is:

> At best, marginal due to the lack of qualified personnel, poor logistical support, and the need for modern ships. The fleets are capable of handling a contingency but are only marginally capable of maintaining a high level of sustained operations.

Without revealing information which would give aid and comfort to the Soviet Union, I also feel compelled to tell this House that not very long ago I was told that the combat condition of our cruisers and destroyers in the Atlantic Fleet was so bad, both from a materiel breakdown and personnel shortage viewpoint, that more than half of them were in a condition that would have seriously affected their combat capability. As a matter of fact, some of these ships could not have engaged in any kind of naval confrontation.

I cannot overemphasize the seriousness of this situation. Yet, I know that there are people in the Congress of the United States who will say "so what?" I can only warn the Members of this House that we are on the brink of disaster and I have never before been so concerned in all the years I have served in the Congress of the United States.

We must, therefore, acknowledge the fact that our naval vessels are today simply not capable of discharging their wartime mission requirements if called upon to do so.

I believe these facts are as close to proof positive as I can make available to the American people that if we are not already a second-rate naval power, we are perilously close to becoming so.

I need not emphasize that in a war with the Soviet Union there will be little solace in being in second place.

As sure as I stand before this House, there will be a confrontation in the Mediterranean between the Soviets and ourselves. They will create the incident to suit their convenience. And how will we respond? At the rate we are going now, considering the condition of the 6th Fleet, in fact the entire Atlantic Fleet, and the tremendous strides made by the Soviet naval forces, we would be forced to back down. Why do I say this? What did we do recently when a Russian trawler came within 200 yards of the nuclear submarine *James Madison*, off Cape Kennedy? We postponed the test launching of a Poseidon missile—and this is in our own backyard. Moreover, when we finally made the test launch of the Poseidon missile, the Russians literally moved into the test area and attempted to preempt our recovery of important fragments of the missile launch.

For years the Navy, in particular, has been accused of reporting Soviet submarines off our coasts just about the time the defense appropriation bill is debated on the floor. While these sightings have invariably turned out to be accurate, nevertheless those who oppose appropriations for the Navy always found it convenient to ridicule these intelligence reports which coincided with the consideration of appropriations for the Navy.

So now I would like to say to the doubting Thomases, if there are any remaining in the House, that if you would care to see for yourself a Soviet task force in the Caribbean, all you have to do is fly around the Caribbean area and you will see a Kresta class guided missile light cruiser, with surface-to-surface and surface-to-air missiles; a Kanin class guided missile destroyer, with surface-to-air missiles; a Soviet tanker and a Soviet submarine tender. I need not tell you that a submarine tender tends submarines. There are three other Soviet surface vessels in the Caribbean area: an LST; a salvage ship and a rescue ocean tug.

For those of you who have scoffed at the constant warnings that have been issued by the House Committee on Armed Services with respect to the rise of Soviet seapower, let me remind you that the Soviets deployed combatant ships to the Caribbean area in July and August of 1969, and again in May of this year.

In 1969, the Soviet task force consisted of three guided missile ships—a cruiser, a frigate, and a destroyer—two attack submarines, one nuclear-powered attack submarine; a submarine tender, and two tankers.

In May of this year, the Soviets deployed a guided missile light cruiser, a guided missile destroyer, two attack submarines, a nuclear-powered cruise missile submarine, a submarine tender and a merchant tanker.

All of these ships have conducted operations in the Caribbean area.

The deliberate and calculated offensive plans of the Soviet Union are now becoming crystal clear with the release of information by the administration of evidence of new Soviet activity in Cuba. I have no doubt that the Soviets are now building a missile-launching nuclear submarine naval base in Cuba.

We, as a nation and a free people, cannot ignore or accept this latest military action of the Soviet Union.

On October 23, 1962, President Kennedy issued a proclamation which reasserted the principle of the Monroe Doctrine as it applied to the Western Hemisphere and the introduction of nuclear weapons by a foreign power.

At that time, President Kennedy delivered an ultimatum to the Soviet Union to remove their nuclear offensive weapons capability from Cuba, or in the alternative such weapons would be removed forcibly by our military forces.

Regrettably, we are once again confronted with a crisis of the same gravity despite the waffled rhetoric which we may hear on the subject.

We cannot live with this new Soviet threat at our very doorstep.

We cannot permit the cities of the eastern seaboard to become hostages of the Soviet Union.

We must take every diplomatic, and if necessary military, step to excise this cancer from the body of the Western Hemisphere.

We must do it quickly and decisively if we are to maintain some shred of credibility as a world power—and the American people are willing to accept any action to accomplish this end.

You are eyewitnesses to the rise of Soviet seapower which is inexorably pushing us out of the Mediterranean, is firmly entrenched in the Indian Ocean, and is now established in the Caribbean.

And yet there may still be some among you who would deny additional funds to rebuild our Navy, which is fast becoming a second-rate naval power. The Soviets learned their lesson from the blockade that we threw around Cuba. Why is it that they have learned their lesson so well while our memories remain so short?

Mark my words well—one of these fine mornings we are going to be told by the Russians, in the most unmistakable terms, to get out of the Mediterranean.

In 1962 we had the power and the Soviet Union knew it, to reject such a challenge—I can tell you that today we

do not have that superiority—the Soviets know it—and it is high time the American people know this bitter fact of life, and start worrying about its implications.

Do not be misled into believing we can make up for this frightening loss of naval superiority by relying upon a superior strategic nuclear capability, vis-a-vis the Soviet Union. Since 1965 the Soviet Union has engaged in a major effort to change the balance of power in this area of military capability. In that period it has more than tripled its inventory of strategic offensive nuclear weapon launchers from about 500 to 1,700, including some 200 nuclear heavy bombers in both.

In the same period, the United States has made no increase in its established level of 1,710 strategic nuclear missile launchers, and has reduced its heavy bomber strength from 780 to less than 600.

In 1965, the Soviets had none of the monster SS–9 missiles operational. Today, the U.S.S.R. has more than 200 SS–9's operational, with an ultimate total of approximately 300 when current construction effort is completed.

Although the 300 SS–9's will represent considerably less than half of the total inventory of the Soviet land-based ICBM's, this portion of the Soviet ICBM inventory will alone be capable of delivering a megatonnage in nuclear weaponry which exceeds the combined total nuclear weapon megatonnage delivery capability of all of our existing strategic delivery systems, including not only our ICBM force, but our Polaris force, as well as our heavy bomber force. Certainly this fact alone ought to raise serious questions concerning the alleged "defensive" posture of the Soviet Union.

We have no counterpart for this huge Soviet nuclear weapon delivery system.

A few weeks ago an article appeared in a prominent weekly news magazine in which the writer dismissed U.S. concern over the SS–9 missile by saying that "comparison of the Soviet SS–9 and the U.S. Minuteman is misleading; they are different weapons systems designed for different purposes." The clear inference which the writer attempted to establish was that the Soviet SS–9 would only be used by the Soviets as a defensive missile against our Minuteman strike capability; whereas our Minuteman is designed to attack cities, and consequently this tremendous difference in the megatonnage of the two weapons really was unimportant.

It is this type of wishful thinking with which some of our so-called "civilian military experts" in the news media confuse the American public. The fundamental fact remains that the Russian options on utilization of their nuclear capability has been immeasurably increased by the addition of the SS–9 to their operational inventory. The real and deadly threat to U.S. security, therefore, remains regardless of how we may temporize or sugar-coat this simple but unpalatable fact.

In 1965 neither the Soviet Union nor the United States had a depressed trajectory ICBM or a fractional orbital bombardment system—FOBS. Today, the Soviet Union has tested both, and could very well have operational versions of these weapons systems already deployed. Both of these developments have far-reaching implications on our defense capability.

Unfortunately, we have nothing like these, and to the best of my knowledge, none on our drawing boards.

Today the Soviets can launch over 200 ballistic missiles from their nuclear-powered submarines. Two years from now 400 to 500 of these Polaris-type missile launchers are expected to be operational, and by early 1974, this Soviet submarine-launched ballistic missile force will inevitably exceed the constant U.S. force we now have of 656 Polaris launchers. Further, most of our major cities are close to our coasts within short range of their potential submarine stations. Thus they can launch their attacks with little time for us to react before being hit.

Up to the present time, the Atlantic and Pacific Oceans have served to protect us from foreign attack. Today these very same oceans afford the Russians a ready means of surreptitiously bringing their missile launching submarines close to our cities from whence they can launch a deadly attack

Our tactical air capability, when compared to the Soviet capability, also raises serious questions as to our ability to cope with the Soviet Union in a conventional confrontation. For example, since 1954 the Soviets have designed and produced 18 new types of fighter planes—13 of these models we have actually photographed in flight. In the same time frame, the United States has not produced a single new air superiority fighter, and actually we have not had one on order until this year.

Now, after an unforgivable delay, we have two fighters underway—the F–14 and the F–15, but they will not be a part of our inventory for several years.

We have dilly-dallied for years until the Soviets now have an air superiority capability which we will be hard pressed to match. Yet, there are those in and out of Congress who would stop the production of our F–14's and F–15's.

The Soviet Union has at least three VSTOL fighter aircraft that have flown successfully. These are aircraft with a vertical and short takeoff capability. We are just now in the process of acquiring some Harriers which will give us this VSTOL capability. The Harrier is the only operational aircraft of its type in the free world.

Yet, there are those who would create roadblocks for the purchase of these aircraft, one group opposing their procurement on the theory that it is a British aircraft, and the other opposed on the grounds that it will be manufactured in the United States at a higher price than it could be purchased from the British. Obviously, we cannot please everyone.

And yet, procurement of this aircraft is essential if we are going to revolutionize naval air operations in the years ahead.

There are only two areas in our whole national security program in which we may have a superiority as yet unchallenged. We are the only nation that is building attack aircraft carriers. So the argument is made that since the Soviets do not have carriers we should not build any more or we should lay up those that we have.

To some, it is a crimp for the United States to be ahead of the Soviets in any area.

Then, there is the Multiple Independently Targeted Reentry Vehicle—MIRV. We are now deploying the MIRV and in this area we appear to be ahead of the Soviets. For this very reason, there are those who would eliminate any further deployment of MIRV's and even remove those already deployed. The rationale is that this would appease the Soviets and would lead them to the conclusion that we have no aggressive plans.

And while this type of specious reasoning is being propagandized throughout the United States, the Soviets continue to increase their deployment of the most powerful ICBM ever constructed, the SS–9.

I say to this House that the future of this Nation hangs by a thread.

We are in a far more serious situation than many would have you believe. Our way of life is not only being challenged from within, it is being very definitely threatened from without.

Yet sincere, conscientious people of good will will look you straight in the eye and say, "We must solve all of our domestic problems with the money we are using for national defense because we are really not threatened from without, or the threat from without is far less serious than the threat from within."

Scoff if you will; laugh if you wish, but it is your children and grandchildren who will pay the penalty for your timidity or your naivete.

You may well ask "Why, with a defense budget in recent years which has exceeded $70 billion do we find ourselves in this position with the Soviet Union?" The answer, very simply stated, is that the Soviet Union is spending relatively more on its military effort than we are.

Let me give you some of the facts:

In 1955 defense-related research and development effort in the United States was $3 billion; within the U.S.S.R. it was $2 billion.

In 1960, the United States spent $7 billion; the U.S.S.R. spent $5 billion.

In 1965, the United States spent $13 billion; the U.S.S.R. $10 billion.

In 1968, the United States spent $14 billion; the U.S.S.R. $14 billion.

In 1969, the United States spent $14 billion; the U.S.S.R. $15 billion.

In 1970, the United States will have spent $13 to $14 billion, while the U.S.S.R. will have spent $16 to $17 billion.

These figures in the R. & D. area alone reflect Soviet determination to match and pass the United States in the incorporation of advanced technology into military hardware.

Despite the increased effort expended by the Soviet Union in defense related R. & D., there has been no corresponding reduction in the resources the Soviet Union has allocated toward the R. & D. effort in the civil industrial base.

Thus, contrary to the effort in the

United States of reducing the Defense Department's R. & D. effort and allocating it to civilian agencies, the Soviet Union continues to fund both efforts at progressively increasing levels.

The significance of the greater R. & D. effort being made in the Soviet Union is that technological advances developed by this greater R. & D. effort will only be evident 4, 5, and 10 years from now, but at a time when we will be incapable of catching up to match these technological improvements and advancements.

Stated another way, if we permit the Soviet Union to create hardware which will negate our existing technological capability in offensive and defensive weapons, the Soviets will so extend us in power as to preempt any possible influence we may in the future hope to exert among the family of nations.

The determination in our military capability as contrasted to that of the Soviet Union has resulted from a combination of the Vietnam war, inflation, and the pressures of new and increased costs of our domestic programs.

In order to place this matter in better perspective, let me provide you with a few facts on this matter:

Since fiscal year 1968 the Department of Defense has attempted to combat inflationary forces with DOD reductions, totaling $17.3 billion in constant dollars.

In this same period, a reordering of national priorities has resulted in a reallocation of Federal resources from defense to other programs in amounts greater than the DOD reductions.

The fiscal year 1971 defense program in constant dollars is only $5 billion above the prewar fiscal year 1964 level. Yet, the incremental cost of the war in fiscal year 1971 is undoubtedly more than double the $5 billion budget increase. Thus, what has occurred is that the difference in funding of the Vietnam war has been accomplished by deferring weapons modernization, plant maintenance, and by reductions in operational readiness.

The impact on these factors is actually greater than these figures indicate since with inflation and a combination of pay and price increases, personnel costs have increased tremendously, wiping out even the most intensive economies achieved by the Defense Establishment.

For example, in 1965 with a military manpower level at 2.6 million, military pay cost $13.9 billion.

Under today's higher costs and with projected pay increases, if we had 2.6 million men in fiscal year 1971 and we now have in excess of 3 million, the personnel costs for fiscal year 1971 would be approximately $29 billion. Thus, personnel costs alone will have more than doubled since 1965, without regard to manpower levels. This gives one an idea of how severely manpower costs and the effort to reduce defense costs have detracted from our ability to maintain a modern technologically advanced military capability.

Let me hasten to add that these military pay increases which have been and will continue to be provided by the Congress are absolutely necessary. Moreover, additional compensation increases will, in the future, be necessary if we hope to reduce reliance on the draft, or keep any semblance of a career force which is absolutely essential as our weapons systems become more and more complex.

In terms of gross national product, our defense budget has gone from 9.7 percent in 1968 to 7 percent in 1971, while at the same time the domestic parts of our national budget have increased their share of the gross national product from 12.8 percent to well over 13.4 percent in the same time frame.

The 7 percent portion of the gross national product which is allocated to our national defense represents the smallest allocation of our gross national product to national defense purposes in 20 years. Surely no American would argue that we can put a price tag on the lives of our people. I would rather be alive at 10 percent than dead at 7.

Now let me summarize for a moment. I have outlined to you that our former 5-to-1 margin in nuclear strategic weapons has in a few short years vanished. The Soviet Union now has a nuclear strategic weapon capability in excess of ours, and this superiority will continue to increase if we do not take dramatic action to stem the tide. We can no longer look upon our threat of nuclear war as a satisfactory deterrent to aggression with conventional arms, as we could in the two decades past. From here on if we threaten nuclear war in response to aggression, we risk our own destruction.

Moreover, I pointed out that the Soviet Union has within a few short years negated our naval superiority. This same accomplishment is evident in other areas of conventional warfare, including our ground and air capabilities.

As a matter of fact, while Congress is still debating the necessity for building an advanced manned strategic bomber, the B–1, we now know that the Soviet Union has already built such an aircraft, and it should be coming into their operational inventory at least 3 to 4 years before we can hope to have our B–1 operational.

The circumstances of the B–1 bomber debate in this country illustrate the reasons why we seem hell-bent on national suicide. While we debate the question of maintaining our military capability, the Soviet Union quietly but openly forges ahead.

It may be that the gap which has now been created in our defense capability can never be bridged. The Soviets have the bit in their teeth, and make no mistake about it, are both capable and determined to maintain this newly developed superiority.

Perhaps I can best put into perspective the determined accelerated effort being made by the Soviet Union to eclipse the United States in strategic capability, both offensive and defensive, by giving you a concrete measure of this effort.

In calendar year 1969, the United States spent a total of $7.5 billion on strategic offensive and defensive weaponry. During that same period, the Soviet Union expended approximately $13 billion for the same effort. Thus, it is evident that the Soviet Union in a single calendar year has spent approximately $5.5 billion more for increased strategic capability than did the United States.

I recognize that a $5.5 billion added effort is somewhat difficult for laymen to comprehend. However, since the cost of a single Minuteman missile is approximately $4.8 million, the added Soviet effort is roughly equivalent to the procurement of a thousand Minuteman missiles. All of this in one calendar year.

Can anyone consider this anything but an obvious effort to give the Soviet Union an insurmountable advantage in strategic weaponry over the United States before the conclusion of the SALT talks?

As a matter of fact, this circumstance alone illustrates the cold and calculating master plan of the Soviet Union, who in entering the SALT negotiations hopes to freeze the United States in an inferior position in strategic weaponry.

I pray to God that the American people, and the Congress in particular, will soon awaken to these realities and recognize that the question confronting us is no longer one involving the relative allocation of priorities in spending between defense and domestic programs, but rather the fundamental question of national survival.

We cannot as a Nation afford to spend one penny less on national defense than that amount which is required to insure that you and I, and our children, can convince the Soviets they dare not pull the trigger when a Soviet gun is placed against our heads.

The issue, therefore, is very simply how much money must we spend to insure our survival—since if we fail to demonstrate to the Soviet Union our determination to survive—the amount of money we spend for domestic programs will become merely an academic exercise.

I plead, and I beg you, my colleagues who collectively have the responsibility of the security of our Nation in your hands, to ponder these facts which I have brought to you today. They are proof positive that we are in serious trouble. Unpleasant as these facts may be, you cannot ignore them, for if you do, you are failing not only your constituency but also all the peoples of the world who, in the final analysis, look upon the United States as the fountainhead and guardian of the highest aspiration of genuine freedom in this chaotic world.

These are the facts that confront our President, our Congress, and our defense planners.

These are the facts which reflect the prophetic wisdom of an observation once made by a gentleman by the name of Mr. Richard M. Nixon, when he said:

> If present trends continue, the United States, a very few years hence, will find itself clearly in second position—with the Soviet Union undisputably the greatest military power on earth.

I am afraid that that day has already arrived.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, the distinguished gentleman from South Carolina, the chairman of the Committee on Armed Services, had to do what he has done so eloquently today.

He having spoken, many lesser birds

would cease twittering lest they missed one lyrical note of what he says on high.

Mr. Speaker, I hasten to associate myself with your most urgent and perceptive remarks.

What you have said today can be construed as neither hawkish, or dovish, but eaglish, that gallant and magnificent creature that symbolizes the strength and honor of this great Nation. However, I fear that if the warning you have so eloquently set down today is permitted to go unheeded by the chosen and elected Representatives of the American people, these United States will run the risk of extinction, just like the eagle which has been unable to cope not only with the hunter, but also the relentless advance of the "ides" of technology and scientific progress.

You have been so forthright and strong in accentuating the positive, that I hesitate to add negatives in communications, ground armaments, and atomic testing, but my real fear is the degradation of will and moral determination of the U.S. people. This is the real McNamara "fallout."

I cannot help but recall today the farewell address of that soldier, educator, statesman, Dwight Eisenhower who said:

**In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex.**

These words have been flung about like so much nerve gas by those who would seek to downgrade the importance to this Nation of expenditures by the Department of Defense. However, let me now quote from that same address, the words that those who would toy with the survival of this Nation have chosen to ignore. I quote once again from General Eisenhower:

**A vital element in keeping the peace is** our Military Establishment. Our arms must **be mighty, ready for instant action, so that no potential aggressor may be tempted to risk his own destruction.**

**We face a hostile ideology, global in scope, atheistic in character, ruthless in purpose, and insidious in method. Unhappily the danger it poses promises to be of indefinite duration. To meet it successfully, there is called for, not so much the emotional and transitory sacrifices of crisis, but rather those which enable us to carry forward steadily,** surely, and without complaint the burdens of a prolonged and complex struggle, with liberty at stake.

Mr. Speaker, as I have asked so often from this position in the well: In the defense of freedom, if not us, who? If not now, when? If not there, where? I hear no answers.

The handwriting is on the wall, to be viewed by any and all who would balance out the strength, prestige, and ability of this Nation not only to lead others, but to mold the opinions of its own, into a cohesive national policy of peace through preparedness and strength.

Mr. Speaker, I have written the Commander in Chief and the Secretary of Defense that in view of the evaluated intelligence reports received almost daily, this Nation must not again be reduced to a second-rate defense power without first being certain that the people of these United States know what is going on, before the fact.

Of a certainty, we must concern ourselves with the constant threat of crime in the streets. We must do our utmost to stop inflation. We must develop means and methods to protect our environment, but I say this today, and repeat that which you said so well, for emphasis: That if we do not first concern ourselves with the survival of this Nation, all the rest will go for naught.

The choice I think, is simple—it is time we set about to accomplish the task.

Mr. RIVERS. Let me answer the gentleman from Missouri (Dr. HALL) in this way: 20 centuries ago a man stood on the Mount of Olives and said this:

O Jerusalem, Jerusalem, thou that killest the prophets, and stonest them which are sent unto thee, how often would I have gathered thy children together, even as a hen gathereth her chickens under her wing, and ye would not!

But you would not. I say that with great reverence.

We are one, the American people. The only way I know to do is to tell you now that tomorrow we will bring up the conference report we just concluded considering with the Senate conferees. We have raised it over $600 million. That is not enough, but we cannot do it all in 1 year. But at least it is a start. There is $435 million additional to be allocated to the Navy to start doing what I have talked about.

Please believe me. I have checked that speech with everybody. I have been writing that speech for at least 3 or 4 months, and it is accurate.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. HALL) is recognized for 30 minutes.

Mr. HALL. Mr. Speaker, I rise and take this time to renew what I have said, which is only that the pearls that flow so glibly from the distinguished gentleman from South Carolina's lips in the defense of freedom around the world, and this Nation in particular, point up indelibly the truth. It should be heralded to all of the people of the Nation by everyone from the Madison Avenue press down through the weekly county newspapers and all news media available how much we need to regenerate the will that will permit us to spend millions for defense but not one penny for tribute. I know that is what the gentleman from South Carolina had in mind. I am reminded of the statement by Emerson—

Not gold but only men can make a nation great and strong, men who for truth and honor's sake stand fast and suffer long, brave men who work while others sigh. They dig the nation's pillars deep and lift her to the sky.

I am delighted to yield to the chairman of the Committee on Armed Services.

Mr. RIVERS. I thank the gentleman.

Mr. ICHORD. Mr. Speaker, will the gentleman yield to me?

Mr. HALL. For the gentleman from South Carolina I yield to the gentleman from Missouri (Mr. ICHORD).

Mr. ICHORD. Mr. Speaker, I appreciate the gentleman yielding to me. I commend my chairman for the most courageous and timely speech which he has just delivered. The speech of the chairman of the House Committee on Armed Services conveys a terrifying message not only to the Congress but to the people of the United States. Unfortunately, the columnists whom the gentleman in the well has referred to do not have the habit of giving too much publicity to the remarks of the gentleman from South Carolina. At this time I want regrettably to concur in his assessment of the military capability of this Nation vis-a-vis the Soviet Union and challenge those columnists to dissect and question the speech in the well today. I think they will find that the gentleman from South Carolina speaks the truth. If there is any doubt that the gentleman from South Carolina speaks the truth, I would refer the House to an article in the September 21 issue of the U.S. News & World Report which reads as follows:

Any suggestion that President Nixon order troops into Jordan to rescue American citizens seized by Arab skyjackers was quickly put down by top advisers, one of whom cautioned: "We can no longer move freely in the Mideast, even to go after international brigands, without the explicit approval of Soviet Russia. And the Russians will not approve."

The remarks of the gentleman from South Carolina have been directed mainly to this Congress and to those who would degrade the military capability of the United States by eliminating entire weapons systems, but in his message there is also conveyed a similar frightening message to the executive. I just want to analyze briefly, if the gentleman will yield further, the portion of the statement made by the gentleman from South Carolina which reads as follows:

In 1955 defense-related research and development effort in the United States was $3 billion; within the U.S.S.R. it was $2 billion.

In 1960, the United States spent $7 billion; the U.S.S.R. spent $5 billion.

In 1965, the United States spent $13 billion; the U.S.S.R. $10 billion.

In 1968, the United States spent $14 billion; the U.S.S.R. $14 billion.

In 1969, the United States spent $14 billion; the U.S.S.R. $15 billion.

In 1970, the United States will have spent $13 to $14 billion, while the U.S.S.R. will have spent $16 to $17 billion.

In the meantime the U.S.S.R. has three VSTOL-type aircraft. We have only what we got from the British in the form of the Harrier.

Mr. Speaker, the U.S.S.R. has the depressed trajectory ICBM and the FOBS. We have nothing comparable.

The U.S.S.R. has developed 18 new fighter aircraft. We do not have a single new fighter aircraft in the operational inventory.

The United States has built nothing comparable to the B–1. The gentleman from South Carolina has said that it will be 3 or 4 years before we will have anything like the B–1 in the inventory and so on. This is true with reference to the STYX missile. We have nothing comparable.

Mr. Speaker, this is where I would ask the gentleman from South Carolina to

comment, if he will: Add up those billions in research and development while the Soviets have only spent $63 billion.

If one will look over some of those R. & D. projects one will find that we have been researching the sex life of bumblebees while the Russians have been fighting equipment and putting it into operation.

This is why it also conveys a terrifying challenge, a terrifying message to the Executive and to the Pentagon, and that is, we must have a very inefficient spending mechanism.

Mr. RIVERS. I thank the distinguished gentleman from Missouri for his contribution.

Mr. Speaker, I now yield to the gentleman from Arizona who is so knowledgeable on this subject and who is so interested in maintaining the defense security of this country.

The SPEAKER pro tempore (Mr. BENNETT). The Chair will state to the gentleman from South Carolina that the gentleman from Missouri (Mr. HALL) has the time.

Mr. HALL. Mr. Speaker, I have yielded the balance of my time to the distinguished gentleman from South Carolina. I am, however, staying on my feet under the rules of the House so I may yield to him.

Mr. RHODES. Mr. Speaker, I want to congratulate the great chairman of the Committee on Armed Services for the speech which he has made. It is a speech which had to be made and one on which I know he has been a long time in preparation.

Mr. Speaker, the distinguished gentleman from South Carolina is certainly the most knowledgeable man I know concerning the subject upon which he has spoken. He is also one of the finest patriots who has ever served in this great body. It is a privilege for me and other Members of the House to serve with the gentleman.

Mr. RIVERS. I thank the gentleman from Arizona but the gentleman had better be careful as to what he says.

Mr. RHODES. I will assure the gentleman from South Carolina that the words which I have uttered today will appear in the RECORD tomorrow.

The gentleman from South Carolina I am sure will agree with me when I query concerning the advisability of talks or negotiations with the U.S.S.R. under the present circumstances.

The situation in the last several years has been that the U.S.S.R. has been probing and pushing; whereas, we have been trying to negotiate.

The Middle East situation certainly could not possibly have arisen without the active participation of the Soviet Republic.

The situation in Cuba is just another example of that probing.

The situation in the Mediterranean which the gentleman from South Carolina has described so well is another perfect example of it, and there are many others throughout the world.

Mr. Speaker, it strikes me that it takes two to make peace as it does two to fight. I say that the only people in the world I know who are really trying to make peace are the citizens of the United States of America. I applaud this. I am for it. I hope we can succeed in bringing this fact to bear upon the rest of the people throughout the world. But I wonder if it is not time for the American people through their Government to say to the people of the U.S.S.R. that peace is the goal of the United States and we hope it is with you. But we need some indication other than your words that this is your goal. We need to have an understanding if we are to have peace. There must be a reduction of this probing, a reduction of trying to throw off balance and a reduction in trying to fish in troubled waters which should be stopped right away.

Mr. RIVERS. We must make a hard decision. We have had the disarmament talks going on in Geneva, and we have got the SALT talks going on, and all during this time the Soviet Union has been frantically exploiting every area which they could use, and putting its funds into appropriate research or in actual procurement. They have gotten a wealth of materiel and all new kinds of gadgets from that.

Only recently the Secretary of Defense has said that all during the SALT talks the Soviets increased their inventories of large megatonnage systems.

Mr. RHODES. The gentleman from South Carolina is correct.

Mr. RIVERS. We do not need to criticize the President. I talked to the President last week about it, and he is concerned—he is concerned.

Mr. RHODES. Let me hasten to tell the gentleman from South Carolina that I have no intention of criticizing the President or any other President, but I do feel the realities of the world situation, which were apparent back in 1960 when the Russians began to increase their atomic weapons capability unilaterally in violation of a solemn international agreement, and the situations which have occurred since then, have made many of us question whether the Russians really want peace or whether they do not. I think it is time that the importance of their intentions, as far as that is concerned, be made crystal clear by their own actions.

Mr. RIVERS. If you were to talk to somebody at the Atomic Energy Commission they could give you the answers as to why the Soviets are making these very large megatonnage warheads. That is to blackmail us into the fear of the destruction of our cities. They do not need all this. They have got more of a kill capability than a show dog has medals. What are they going to do with these megatonnage warheads? They have got the largest megatonnage warheads anybody has ever had, and the capability of delivering them. They are not needed just for defense.

Mr. ANDREWS of Alabama. Mr. Speaker, if the gentleman will yield, I want to commend the gentleman from South Carolina for the frightening speech that he has delivered to the House. I only wish we had more Members of the House present to hear it. I know this problem has worried the gentleman from South Carolina for years. I have discussed it with the gentleman at times, and the time has come, as the gentleman has said in his speech today, to either fish or cut bait.

For the past 10 years it has been an open secret that the Russians have built up their naval capability and their bombing capability and their missile capability while we have let ours go down. Our Navy today is in a pathetic condition, as was so ably described by the gentleman from South Carolina.

My opinion about what has happened, and I do not know whether the gentleman shares it or not, is that for the last 10 years we have been carrying on a war, and trying to have a program of guns and butter to the neglect of our military hardware, and our naval vessels which we so desperately need.

I have discussed with the gentleman from South Carolina what it might cost to bring us up to par with the Russian navy. The gentleman has stated that it cannot be done in 1 year, and it cannot be. But if I remember the figures correctly that the gentleman from South Carolina gave me a few weeks ago, the gentleman stated that it would take about 5 years and $25 billion.

Mr. RIVERS. As a minimum.

Mr. ANDREWS of Alabama. As a minimum, to bring our Navy up to what it should be in the light of what the Russians have got.

Mr. RIVERS. These are the minimum needs, at an expenditure of $5 billion a year, for 5 years.

Mr. ANDREWS of Alabama. I will say to the gentleman from South Carolina in conclusion that again I want to congratulate the gentleman on the frightening speech that he has made today.

Mr. RIVERS. I thank the gentleman.

Mr. ANDREWS of Alabama. As a member of the Subcommittee for the Defense of the Committee on Appropriations, I am going to certainly see if I cannot get some additional money in the bill this year.

Mr. RIVERS. The figures which I discussed with the gentleman from Alabama and the gentleman from Arizona are figures which Secretary Laird said he would approve and which the Navy asked for in the budget request. They are not my figures—I take no credit for anything. We provided what the Navy said they need as a minimum to begin.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman.

Mr. DON H. CLAUSEN. Mr. Speaker, I consider it an unusual privilege to be on the floor of the House today participating in this special order with the very distinguished chairman of our Armed Services Committee, Mr. L. MENDEL RIVERS, of South Carolina.

Mr. Chairman, it is your birthday and we congratulate you. However, I believe that instead of being the recipient of gifts which are traditional, you have, through the presentation of your speech here today, in fact, given the House of Representatives, the Congress, and the Nation a birthday present on the anniversary of your birth.

I am proud to associate myself with

these remarks because we know the contents are accurate.

I further believe this will prove to be one of the most timely historical documents of our time and the gentleman from South Carolina's great dedication to the defense and security for the people of our Nation will leave its mark and he, personally, will be remembered in future history books as one of the greatest of our patriots serving the cause of freedom.

Like many great Americans before him, he has received his share of criticism. Men like Jefferson, Lincoln, Teddy Roosevelt, and Patrick Henry have all been the recipients of similar criticism and attacks.

Knowing MENDEL RIVERS as well as I do, I can say that he is most undeserving of the vitriolic utterances of his critics. It could prove to be somewhat ironic that he is the leader—the one man who will be most responsible for saving the lives and the country of these very critics.

All historians, and certainly most Americans, will remember the famous ride of Paul Revere, where he rode his horse, in the middle of the night, to "wake the town and tell the people" of the dangers that were approaching.

In my humble judgment, this historical and well documented speech of Chairman RIVERS could well record him as the "jet, space, and nuclear age Paul Revere" of our time.

I am doubly concerned about the decline in our commitment to retain maximum superiority in our naval and our air power, in particular, during the 1960's. It will be my intent to speak further on this subject in the immediate future to record some strong feelings that I hold on this entire matter.

Again, I compliment the chairman and thank him for the privilege of participating in this historic day—a day that I hope will wake up all Americans to the realism of our times and the inevitable buildup toward a confrontation with the Soviet Union. They have not changed their goal of world domination and the recent submarine base in Cuba, the events in the Middle East and Chile are just a few of the visible examples of what I mean.

Mr. RIVERS. I thank the gentleman from California.

I want to say that the House Committee on Armed Services has not once been turned down here, so I am not complaining about the House. We have never had any appreciable vote against anything we proposed.

We have had the backing of the leadership from our great Speaker. If we ever miss a man when he leaves the House of Representatives, it will be JOHN W. MCCORMACK. His one criteria and the hallmark of his dedication has always been—if we err, let us err on the side of strength.

What I am telling you in this document is to the best of my ability. I wish I could have done better, but I have done the best I can, taking into consideration things which have compelled my attention elsewhere. If I could have given more time to it, I could have done better, but I have done the best I can.

But I want to say this—this country needs a lot and I am only giving you the minimum. We have had the backing of the leadership and I am talking about the leadership on both sides of the aisle. Our committee is not a partisan committee. It is a committee dedicated to the betterment of this country and to its salvation. I am bringing you this to let you know that these are things that are needed. These are things that nobody can controvert—and I mean nobody.

I want to thank our Speaker for the backing that he has given me and to thank the leadership on both sides. Our committee has been well defended and supported. We have never, ever lost a battle on this floor, as a result of the backing we have received from the leadership on both sides, our great leaders, and I want that known.

Mr. DORN. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the distinguished gentleman.

Mr. DORN. Mr. Speaker, first I want to congratulate my distinguished and beloved colleague, the gentleman from South Carolina, on his birthday. I know I speak for the people of South Carolina and, indeed, for the people of this Nation and of the free world when I tell my distinguished colleague that we are grateful for his devotion and dedication to those great principles and those great ideals that have made this Nation great.

I want to congratulate you today on this magnificent and timely address made in the well of the House of Representatives to your colleagues and to the Congress. The Congress cannot escape its responsibility—in the 1920's when we put our fleet in mothballs and we sat idly by and permitted Billy Mitchell to be court-martialed and almost run out of the military for saying that a bomb could sink a battleship. That was not many years before Pearl Harbor. We must not make that mistake again.

I remember June 25, 1950, when the Communists came across the 38th Parallel in Korea. Again we found our ships in mothballs. Many of our planes had been sold. My committee investigated as to where some of the airplane engines went, and we found that they had gone to the Soviet Union and some of our enemies, sold as surplus property. Again we were unprepared.

I would remind my colleagues and the people of this country that if this happens again, it will be too late. The gentleman so ably pointed out that we were saved before by the Atlantic and the Pacific Oceans. This time there will be no Atlantic and Pacific to save the American people from the holocaust which hit Paris and London in 1940 and which hit Poland in 1939. I want to congratulate and thank the gentleman again for his very timely address, and I hope this time the Congress, my colleagues, and the people of this Nation listen and do something about it before it is too late.

Mr. RIVERS. I only hope that someone, somewhere in the smoldering ruins, if it makes any difference, will say, "Old RIVERS did the best he could. They did not pay any attention to him. He did the best he could." I am doing the best I can. I want to thank you for remaining in the Chamber this late in the evening. I know it is not easy to stay here at this time of day. We have a million things to do. But the parliamentary situation does not make it possible to deliver an address like this when everyone is able to be present. I recognize all of this. This response is what makes me so grateful to you who have remained.

Our great Speaker has sat in the Chamber and listened, and his presence warms me and touches me. I conclude from your presence you feel we are doing what we think is right.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the distinguished gentleman from Oklahoma.

Mr. EDMONDSON. I thank the gentleman for yielding. I agree with the gentleman from California (Mr. CLAUSEN) who said a few minutes ago that this is a speech of historic importance. The gentleman from South Carolina, who is as well informed as any man in Government about our Armed Forces and the armed forces of other countries, has pointed, I think, very dramatically and very effectively, to a changing world picture in terms of what might be called the balance of power across the seven seas. Many of us have known and been concerned for a long time about the growing Soviet submarine strength. When the gentleman from South Carolina tells us that today the Soviet submarine force is the largest ever created in the history of the world, and documents it, he points to a matter of very grave concern and even of ominous import.

But he has gone further than that and he has shown that not only has the Soviet Union developed this unprecedented submarine striking power, far exceeding anything Nazi Germany ever dreamed of having in World War II, but he has also pointed up the buildup in cruiser strength, guided-missile destroyers, and destroyer escorts. This growing, balanced naval service strength poses a direct threat to free nations in many parts of the world previously considered safe from any kind of Red threat.

I think the gentleman has performed a great service to his country today, and I want to congratulate him upon it. I assure the gentleman that I will be present when the conference report is brought in tomorrow to back him in every way in my power in seeing that the additional funds that have been provided are voted by the House of Representatives.

Mr. RIVERS. I thank the gentleman very much.

Mr. McCLOSKEY. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from California.

Mr. McCLOSKEY. I thank the gentleman. I wish to commend the distinguished chairman on what he has said today. It is one of the most impressive speeches I have heard in the 3 years that I have sat in the Congress. I want to thank the chairman for calling to our attention that our primary duty is to preserve a strategic balance with the Soviet capability. I think the comment

that we ought to maintain a level of strategic capability that will assure against any misunderstanding by the leaders in the Kremlin of our intention to survive is perhaps the key challenge that faces our country today.

But I want to ask the distinguished chairman also if, in the recent light of the deterioration of our military capability as contrasted with that of the Soviet Union, since it has resulted as the chairman has said from a combination of the Vietnam war and inflation and pressures of new and increased domestic causes, does that not face us in this body with the very serious question whether we can continue to afford the massive expenditures in Vietnam which have permitted this comparative deterioration? I think it is clear that in the last 5 years we spent over $100 billion in Vietnam while the Soviet Union has spent less than $10 billion, and it is that comparative difference in expenditure which we have authorized in this body that has led to the condition which the gentleman so aptly describes today.

Mr. RIVERS. Mr. Speaker, I think it is one of the factors. This country is tired of war. We have spent all kinds of money in waging the Vietnam conflict. I can understand very easily the feelings of the gentleman and so many other people. The people of this country have been saddled with great and terrific burdens. Along with that, there have been millions of dollars and billions of dollars spent in that part of the world. There are all sorts of factors.

What I am saying today is, we need a deterrent. If we have it, they will not hurt us. Moreover, when our allies find out how weak we are, they will start leaving us. They will be leaving us as leader of the free world—because we will not be any such thing. These things point out that a weak nation cannot lead anybody anywhere.

This is a deterrent. We do not have any offensive desires. What the gentleman has said is a factor.

I want to say this. I acknowledged the great and fine war record the gentleman has as a U.S. marine. He knows something about combat. I respect the gentleman's position. I have nothing but the greatest respect for him.

Mr. McCLOSKEY. Mr. Speaker, I thank the distinguished chairman of the committee. I just wanted to say I thought the timing of the gentleman's speech, coming as it does, almost requires that we give an overwhelming vote tomorrow on this bill as an indication of our resolve in this confrontation, in this psychological warfare we conduct.

Mr. RIVERS. Mr. Speaker, I thank the gentleman. The Marines always rise to the occasion. The gentleman knows that once a marine, always a marine.

I am not surprised to hear the gentleman's words. I thank him very much because I have a great respect for him.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I will be brief, but I want to join my colleagues in thanking the chairman of the great Committee on Armed Services for this hardhitting, factual talk he has given us.

There is so much information in this report that it would be good if all Members would go back and take a good hard look at what the gentleman has told us today.

I think one point should be mentioned again which he brought up, and that is beside the fact we are getting behind the Russians, we are also using this equipment every day in fighting a war. This will put us even further behind the Soviets, who are not actively participating in war as we are.

Mr. Speaker, again I thank the gentleman for his splendid remarks.

Mr. RIVERS. Mr. Speaker, I thank the gentleman from Mississippi.

I yield to my distinguished Speaker.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to my distinquished Speaker.

Mr. McCORMACK. Mr. Speaker, I join my other colleagues in congratulating my dear and valued friend, the gentleman from South Carolina, the distinguished chairman of the Armed Services Committee, for the historic speech he has made on this occasion.

There is no one in a better position in the Congress of the United States to know the strength and the weakness of our military posture or the strength and the weakness of the military posture of a potential enemy than the gentleman from South Carolina (Mr. RIVERS). The gentleman has made a marked contribution for the consideration not only of Members of Congress, but also for the people of our country.

I have constantly stated to audiences I have addressed, in talking with groups—or to individuals, where the subject matter came up—that international communism is still bent on world domination.

As I understand it, one of the real messages my friend is conveying is that fact, that behind the Soviet threat is the indisputable evidence existing, if one only wants to see it, that communism has not changed its intent. It might from time to time change its tactics, but the Soviet Union and international communism are just as much bent on world domination today as ever has been the case during the past 60 years.

It is well for the people of our country to waken to that fact. In the 1930's, there were a few of us who took the well to try to warn the people of our country against Nazism under Hitler and of its meaning and significance in terms of history and in terms of the national interests of our own country.

The gentleman from South Carolina (Mr. RIVERS), has taken the well of the House today to advise the Member of Congress as to the military situation, and to advise the people of our country that the intent and purpose of communism has not abated one iota, but that its military strength is so powerful as to constitute a serious threat to our very existence.

It might be well for us to keep in mind an observation the gentleman from South Carolina (Mr. DORN) made a few minutes ago, and which I have made on the floor of the House and outside the House. Well do I remember it, because the day after Pearl Harbor I took the well of the House and introduced the resolution declaring war. It was that the Atlantic Ocean is no longer our first line of defense. Fortunately for us, after Pearl Harbor it was—the Atlantic and the Pacific; but I am referring to the Atlantic.

During the entire history of our country the Atlantic was our first line of defense, and it was after Pearl Harbor. It enabled us to marshal our great resources as a great Nation, which were very weak at the time, and to build up our strength—our industrial, our military, and our manpower strength. After 3 years we were enabled to take the painful road both in Europe and in the Far East to victory.

But no longer is the Atlantic our first line of defense. What that means in plain language, whether we like it or not—I do not like it, but I have to face it, as do all other Americans in and out of Congress—is that we have to be prepared before the fact. We will never have another opportunity of preparing ourselves after the fact.

The preservation of our country is a matter of concern to all of us.

The gentleman from South Carolina in his speech referred to another observation I have made, and again I repeat it: If I am going to err in judgment I prefer to err on the side of strength rather than on the side of weakness, where the national defense of my country is concerned. It is much more so now than ever, because we could take a chance on an error of judgment before World War II but we cannot take a chance now.

Three months before Pearl Harbor a vote took place in this Chamber, and by a vote of 203, as I remember, to 202 the Selective Service Act was extended.

What would have been the condition if it had not been extended? I have asked myself that question many times. Yet every Member of this body who voted against its extension was just as good an American as I and the others who voted for its extension. However, we then had the Atlantic Ocean. That meant Hitler had to defeat the American fleet and the British fleet before any immediate danger could take place to our own country. We no longer have the Atlantic Ocean. The message that should be sent to the American people is we have to be prepared before the fact; we will never have another opportunity after the fact.

I congratulate my friend who, in my opinion, is one of the great Americans of all time where the national defense and the national interests of our country are concerned.

The SPEAKER pro tempore. The time of the gentleman has expired.

GENERAL LEAVE TO EXTEND

Mr. HALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks concerning the

speech of the distinguished gentleman from South Carolina (Mr. RIVERS).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. RANDALL), is recognized for 15 minutes.

Mr. RANDALL. Mr. Speaker, I certainly want to commend our distinguished chairman and wish him a happy birthday as we did earlier today. He has done a great service for all of us by his speech today.

You hear so much about the reordering of priorities. Everyone seems to applaud reductions in defense expenditures. But what has happened up to now, as he has shown us, is that we have not simply cut away the fat but have cut away the muscle of this country. The chairman of the committee is sounding a warning not only for those Members who are here but those who are out of Congress. This is a message which we should ponder and heed. I do not know how best to describe this warning, but it has been factual and hard hitting. Let us hope it will be provocative. I will certainly be present tomorrow to support our distinguished chairman.

Now, Mr. Speaker, I am glad to yield to the gentleman from California (Mr. HOSMER).

Mr. HOSMER. Mr. Speaker, I thank the gentleman for yielding.

I, too, wish to join in the congratulations to the gentleman from South Carolina on the occasion of this his birthday and express my appreciation to him for bringing so clearly to this House and to all of the American people the realities of the strategic relationships that exist between the United States and the Soviet Union.

He has quite properly pointed out that only in July of this year the world passed its first quarter of a century in the new nuclear age. During this 25 years the United States always retained the superior strength on its side in the nuclear equation. Because of this and because of the U.S. strength and its knowledge in utilizing that superior strength there has been no nuclear war on this planet. Should we lose that strength, I think that the gentleman from South Carolina has well indicated what could happen. It could be the oubreak of a nuclear war. Therefore it is incumbent upon us to follow his advice and maintain that strength. If we do so, we much realize that under this umbrella of nuclear deterrence there will constantly be contests which will either be fought or better can be deterred of a conventional nature around this planet.

And, therefore, as the gentleman from South Carolina points out, we must give these conventional forces of ours the attention and the support that they need. I say this most of all because this world is wide and troubled and in view of our national priorities, we must give attention to the defense and security of this country.

Mr. Speaker, I yield the remainder of my time to the gentleman from South Carolina.

Mr. RIVERS. I thank the distinguished gentleman from California because I know of his great dedication to the defense of this country and his attainments as a distinguished naval flag officer, as a member of the Joint Committee on Atomic Energy, and his many other manifold responsibilities. He knows of my high regard and respect for him.

Mr. DANIEL of Virginia. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from Virginia (Mr DANIEL), a former great leader of the American Legion.

Mr. DANIEL of Virginia. I thank the distinguished chairman for yielding.

Mr. Speaker, I desire to express my continued appreciation to the distinguished chairman of the Armed Services Committee for the contribution he has made today to world peace. His remarks are not only good for our own country but I think they should be adhered to among the free nations of the world.

Mr. Speaker, while I am new in Congress, I am not new to the field of national defense. It is my judgment, Mr. Speaker, that the best guarantee for peace is to keep our country economically sound, morally and spiritually right, and militarily effective.

I also believe that the best approach to the goal of world security is through the security of the United States of America.

The gentleman from Arizona a moment ago had something to say about international agreements.

Mr. Speaker, since 1945, we have used millions of words negotiating treaties with the Soviet Union. We can count today on one hand those treaties which have been of benefit to the free people of the world. After our sad experience at Yalta, Potsdam, Cairo, and Geneva, I regret to have to say that I have come to have little faith in the processes of international bargaining.

It is my opinion that one of the great problems we have today is the difference in the meaning of words as they are related to the Soviet Union, vis-a-vis the United States. Peace to the Communists means an era in which all the people of the world have succumbed either to internal or external forces. To you and me, as well as other Members of the Congress, it means something entirely different.

Mr. Speaker, I wish to congratulate our distinguished chairman today and express to him my genuine appreciation for the great contribution he has made.

Mr. RIVERS. I thank the distinguished gentleman from Virginia for his remarks.

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from Alabama.

Mr. DICKINSON. Mr. Speaker, I would like to take this opportunity to join in the accolades of the other Members that are so well deserved by the chairman for the message he has brought to us today with reference to some of the ills that beset us.

I think that two most significant things have been said today which have been kept secret from the American people too long. One has to do with the STYX missiles, against which we have no defense and which pose a severe threat, a threat which is not thoroughly appreciated by the average layman. The other is the threat which is certainly posed by the deepwater submarine pens being built by the Soviet Union to house and tend nuclear submarines of the Soviet fleet.

Mr. Speaker, if my memory serves me correctly, at the time of the Cuban-Russian missile crisis one of the ground rules that was laid down by President Kennedy in one of the statements that he issued was that we would protect the integrity of the Western Hemisphere. We have made some serious concessions. However, one of the things which was not debatable was that Cuba could not be used as a military base against the United States and the free world for the exportation of communism.

Well, today we have seen that once again Russia has violated that understanding. I would certainly hope that the American people and the world realize that the enemy of this country is now and has always been the Soviet Union.

There would be no Berlin wall, no Vietcong, no threat from Cuba, if it were not for the Soviet Union; no Red Chinese, nor any other brand of communism that you can name.

So, Mr. Speaker, I think the distinguished gentleman has done a tremendous service for the country today. I can think of no more fitting way to cap off his "39th" birthday than by the tremendous service the gentleman has performed today.

I take this opportunity to join with my colleagues in saying "Well done."

Mr. RIVERS. I thank the gentleman very much.

About my birthday: as one who has reached my age, I can say that I dearly wish I see the next one. When you get my age, you have lived a lot of life. I thank the gentleman.

Of course, I do not look it—do not misunderstood, I do not look like any 45-year-old that I know of, and you know it.

Mr. NICHOLS. Will the gentleman yield?

Mr. RIVERS. I yield to the gentleman from Alabama.

Mr. NICHOLS. Mr. Speaker, I rise to associate myself with the remarks of the distinguished chairman of the House Committee on Armed Services, and to say to the Congress that back in January, through the generosity of the chairman, several junior members of that committee were permitted to go to the Mediterranean. There we saw firsthand, Mr. Speaker, exactly what the chairman has talked about today. Everywhere we went, from country to country, we got the same identical stories that we have just heard here. What the gentleman says is true.

We need to hear him and hear him well.

I know of no member on either side

of this Congress who is better equipped and has more knowledge to speak on this subject today than the chairman of the Committee on Armed Services.

I also know of no Member of Congress, no Member of either body of the Congress, who loves his country any more than the distinguished gentleman from South Carolina. Again I congratulate him. I will be pleased to be with him tomorrow, Mr. Speaker, to support his position on the conference report.

Mr. RIVERS. Mr. Speaker, I thank the gentleman.

I want to say to the gentleman from Alabama that it is no generosity on my part for the members of our committee to travel. I follow the example set by Mr. Vinson, and by other chairmen, and so long as I am chairman of the Committee on Armed Services the members of that committee are going to travel and gather information. I am sure we are the best-informed committee in the House. And when I say that, I think of the report that the gentleman from New York (Mr. STRATTON) made for that subcommittee.

I do not see how it was possible to hold the number of meetings that subcommittee held. I think their report is a magnificent document. All of our committees, when they travel, are required to render a report. The columnists delight in belittling the trips made by Members of the Congress. Our committee does not abuse any right that they have. And I want to tell the gentleman that our committee will continue to travel, and the gentleman from Alabama will also. I have not forgotten what the gentleman did in Europe for his country. We are lucky to have the gentleman from Alabama on the committee, and the Congress itself is lucky to have the gentleman, too.

I might add that I come from a section of America that lost a war, and I for one do not want to lose another one—I do not want to lose another one—because losing a war is no fun, and the next one will be terrible—there will be nothing left.

Again I thank the gentleman.

Mr. RANDALL. Mr. Speaker, I would just like to add this one further comment before concluding.

As a member of the Committee on Armed Services, headed by the distinguished chairman, the gentleman from South Carolina (Mr. RIVERS) I regard membership on that committee as one of the finest things it has been my pleasure to do since coming to the Congress. I know—and the gentleman knows—that sometimes we receive mail that is a little rough to read. I know and the chairman knows that some uncomplimentary things have been said about him. Of course, we in the committee on occasion have spirited discussions, and we do not always agree, but we always come out with a good result. But just as a final word on the gentleman's birthday, I know that the great majority of the American people and the majority of this House regard the gentleman from South Carolina as a man's man, and a patriotic American.

Mr. RIVERS. Mr. Speaker, I thank the gentleman.

I do want to say this. We have very little dissent in our committee. There is no committee in the House with such a small percentage of disagreement. We have 40 members and there are seldom more than five who disagree; sometimes maybe six or seven.

We have the best average of any committee in the history of the Congress. We have the best committee. Just think of the things that come out of our committee unanimously. It happens every day. I would not take a million dollars for the great privilege I have had of being chairman of this committee, and for the great honor of being a part of and a member of this committee.

As long as I am a member of this committee, I am going to try to run it in the interest of America and with the backing of the members of this dedicated group who compose this great committee.

Mr. SCHMITZ. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I yield to the gentleman.

Mr. SCHMITZ. Mr. Speaker, as a new Member of this body I rise in response to the great but sobering speech by the esteemed chairman of the House Armed Services Committee, Hon. MENDEL RIVERS. When a man who has spent 30 years in the Congress intimately connected with the security of our country tells us that "the future of the Nation hangs by a thread" we had best listen.

Since coming to the Congress I have noticed that there are relatively few in Washington who seem overly concerned with the ability of the United States to defend itself. Many either take our military position for granted or feel that in some new type of changing world national defense is an outmoded concept. The world unfortunately has not changed to the point where the richest Nation in the world can sit happily bemused by its own delusions and expect that the Soviet Union, the most vicious aggressor ever to inflict itself upon long suffering humanity, will allow our misconceptions to dispel its desire for world empire. Strength taken for granted has not renewed itself.

In the midst of the century shrouded in more bloody wars than any other in recorded history it takes an appalling amount of ignorance and wishful thinking to come to the conclusion that since we would rather not fight a war others will conveniently decide to forego the pleasure of wrapping our wishes around the throats of ourselves and our families. In the light of 50 years of Soviet perfidy, barbarism, and conquest there are those who have come to the strange conclusion that there is just some slight misunderstanding which can be straightened out if we will just stop building the weaponry necessary to defend ourselves. If we continue to delay in taking the necessary defensive measures the misunderstanding is not going to be straightened out. We are simply going to get ourselves flattened.

Many centuries ago Demosthenes admonished the Athenians as they wavered between uncertainty and supineness:

It follows as the inevitable and perhaps reasonable consequence, that you are each more successful in that to which your time and your interest is given—Phillip in action, yourselves in words.

When the chairman of the House Armed Services Committee tells us that we are now clearly in second position to the Soviet Union in military strength I suggest that it is time that we stopped dialoging and started fulfilling our sworn duty to protect the Nation from foreign enemies.

As a Representative of several hundreds of thousands of people I for one would like to thank Chairman RIVERS for the remarkable clarity he has shed on the defense situation and the contribution toward peace he has made thereby. Peace not in the sense in which it is used in the twisted semantics which have come to dominate the pseudo-intellectual journals and media discussions but peace in the true sense of the word as defined by the father of our Nation, George Washington:

To be prepared for war is one of the most effectual means of preserving peace.

No truer words were ever spoken.

Mr. RIVERS. Mr. Speaker, I thank the distinguished gentleman from California very much.

I thank all of my colleagues for their kind attention.

Mr. BENNETT. Mr. Speaker, I congratulate the gentleman from South Carolina in bringing these facts to the attention of the country. These facts need to be known and understood; and we in Congress absolutely must take the needed steps, and make the needed corrections; not in some distant time, but right now.

## ILLEGAL PRICE DISCRIMINATION IN THE HEAVY POWER TRANSMISSION EQUIPMENT INDUSTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. CONTE) is recognized for 10 minutes.

Mr. CONTE. Mr. Speaker, with all of the controversy raging today about the need to protect certain of our domestic industries from unrestricted imports, there is at least one industry which is faced with unlawful price discrimination about which there should be no dispute. The practice of dumping foreign products in U.S. markets at prices lower than those sold in their country of origin is clearly unlawful and cannot be tolerated.

The situation is most critical in the field of heavy power transformers which are essential to development of the extra high voltage—or EHV—power systems of the future. These products are manufactured in a number of plants throughout the Nation, including General Electric's Power Transformer Department in Pittsfield, Mass., in my district which employs over 3,000 people.

As you know, Mr. Speaker, Westinghouse Electric Corp. has initiated antidumping actions against foreign transformer manufacturers from six foreign countries. If the investigations conclude that dumping has occurred, as I believe they will, then our Government will impose tariffs as penalties to equalize the prices of these foreign goods with the

higher prices charged in their country of origin.

But this case is not expected to be completed for 2 to 3 more years. In the meantime irreparable damage may be done unless other steps are taken to alleviate the problem.

In the next few days I will be seeking the assistance of my colleagues from other States where such plants are located in support of a series of interim measures to reduce the adverse impact of this price discrimination.

For their information and that of all my colleagues I request unanimous consent to include at the close of these remarks a portion of my testimony on this subject, before the Ways and Means Committee on June 19, 1970, and a brief study, "Foreign Competition in Power Transmission Equipment," done by the General Electric Co.'s Power Transmission Division.

As I said at the outset, Mr. Speaker, the need to end these dumping practices is in no way related to the hue and cry about increased imports in general. These imports of heavy power equipment are clearly illegal. In fact, as my good friend, Assistant Treasury Secretary Eugene T. Rossides said recently:

What we are doing [in enforcing the anti-dumping statute] is the very opposite of protectionism. The anti-dumping statute is pro-free trade. The proper application of this statute can alleviate pressures for protectionism by making markets function fairly.

I am pleased that Secretary Rossides and the administration are beginning to police this area vigorously, and hope that my colleagues will join me in support of this effort.

The materials referred to follow:

EXHIBIT No. 1

THE CRISIS IN THE POWER TRANSFORMER INDUSTRY

(Excerpt from the testimony of Representative SILVIO O. CONTE before the Ways and Means Committee)

There is another important subject I wish to discuss today, Mr. Chairman. I refer to the epidemic of dumping that now afflicts our large power transformer industry. Unlike the matters I have discussed so far which involve a complex series of causes, the situation in this industry is a simple matter of price discrimination and unfair competition.

Many industries in the United States today find themselves in an economic struggle with manufacturers around the world. If this competition were free and untrammeled, it would be a healthy and vigorous indication of the international trade climate. Fair, open trade on a reciprocal basis can produce more and better products for Americans as well as for all other peoples. Free, fair trade is one of the fundamental concepts of our American system.

The Congress has demonstrated, through tariff reductions, its belief in liberal international trade during the Kennedy Round of Tariff Negotiations. Our laws have made the American market the most open in the world.

Today, however, the foreign competition that many of our industries are facing is far from free and untrammeled. In fact, the trade policies of most of the industrialized foreign nations are such that they keep their markets for many products effectively closed to American manufacturers while increasing their exports to our open market.

A good example of this worsening situation is found in the electrical equipment industry and particularly in the power transformer field.

Power transformers are major elements in all electrical transmission systems. Without them, long-distance transmission of electricity would be impossible. As the demand for electrical power and the amount of power transmitted increase, the system voltage must also increase; the size of generating stations grows and the ratings of power transformers get bigger.

For the past 80 years, American manufacturers have conducted the research, developed the technology and acquired the skills necessary to build these transformers. They are recognized as leaders in technical fitness and productive capability. One of the most prominent of these manufacturers is located in my district.

But imports of foreign-made power transformers into the United States are posing a serious threat to our domestic industry. As I have stated, this is not because of superior efficiency. Nor is it because of lower cost of foreign manufacturing. Lower labor costs abroad have been found to be offset, in large part, by more efficient production methods and facilities in the United States. It is because many foreign governments provide export subsidies to their heavy electrical equipment manufacturers and, at the same time, protect their home market at high price levels against American entry. It's a one-sided, unfair, losing battle. Recently, one manufacturer—Westinghouse—filed an antidumping action with the Bureau of Customs. It deserves a thorough hearing and complete support. Only this week an important first step in this case was taken when the Bureau of Customs made a preliminary finding that dumping was probably taking place, and launched a full investigation.

A look at the cause and effect of unfair foreign competition in this area can perhaps point to solutions.

American requirements for large power transformers are increasingly being filled from foreign sources. It is abundantly clear that unless some constructive legislative action is taken to arrest or reverse this trend, foreign manufacturers will be providing one-third of the total power transformers purchased by American utilities in four or five years. That is the situation in summary.

How did it happen?

After World War II the demand in the United Kingdom, Europe and Japan for electric power and, therefore, for large power transformers, was great. The capability of the electrical manufacturing industry in those countries was fully utilized, often with the aid of considerable American technical expertise, in keeping with our national purpose to assist the economy of these war-torn countries. When the extraordinary demands of these countries were met, their electrical equipment manufacturers found that their normal national requirements were insufficent to utilize their capacity. It was natural, therefore, that since the early 1950's they started looking to the American market. They are encouraged to do so, not just to be able to operate their facilities to capacity, but also because their governments seek American dollars.

Mergers, acquisitions and general restructuring of the heavy electrical equipment manufacturing industry in many countries, notably England, Italy, West Germany, Switzerland, France, Sweden and Japan, point to their effort to support the research and production facilities necessary to manufacturing the largest types of power transformers, for which America is the world's largest market. Their effort is paying off for them. In 1969 foreign manufacturers captured 22 percent of the dollar volume of power transformers purchased by electric utilities in the United States. Only one of the seven or eight highly competent American power transformer manufacturers secured more business than this.

One of the most disturbing factors in this gloomy picture is the action of our own government-owned utilities, primarily the Tennessee Valley Authority, and the Bureau of Reclamation. Their purchases of transformers from overseas suppliers has steadily increased to a point where they exceed 95 percent of the electrical capacity purchased, for the past three consecutive years. The reason is low price—but artificially low price.

Privately owned utilities, customarily measured for efficient procurement against government-owned utilities, are forsaking their previous preference for domestic equipment and shopping overseas for these artificially low prices. Several of them are now purchasing 20 percent or more of their requirements abroad.

In the past six years, nearly $100 million worth of power transformers have been purchased from foreign suppliers. Even at a conservative estimate, this represents at least six months' work for all of the employees in the entire United States power transformer industry. That work is lost forever to them and to the countless other American workers who supply materials and services to the power transformer industry. It also means lost tax revenue.

But that's not all. Our nation is running the risk of losing its technology in this vital area.

Electricity revolutionized American industry. We led the world in development and use of this energy form. Experts tell us that our electric utility industry must continue to double in size every ten years to keep pace with future demands for electricity. Knowledgeable people, including Secretary of the Interior Hickel, believe that a national power grid will have to be installed within a few years. Already, many areas of the country are interconnected by high-voltage transmission systems, and more inter-connections are effected each year. Such systems operate at very high voltages: 345,000 and 500,000-volt systems are quite common. Recently, one utility—The American Electric Power Company—energized a 765,000-volt system, probably the highest voltage system in the world. But even higher voltage systems may be needed in the future.

In all these systems, power transformers are essential equipment. These are the very items being purchased increasingly from foreign sources. Of the 765,000-volt transformers purchased, 21 percent have been foreign made. Overseas supplies have secured 20 percent of overall American purchases of 500,000-volt transformers, but have supplied 75 percent of TVA's requirement in this rating. These are not simple pieces of equipment. They are huge and require skillful engineering. Some of them weigh three-quarters of a million pounds and cost about as many dollars. Decades of research and experience back up the technology necessary to design and build them.

I have personally seen many of these large power transformers. I have watched them being build and tested. I know many of the engineers who design them and the skilled craftsmen who put them together. There is no doubt in my mind that the technology required for the future can be developed by American manufacturers. But why should they bother? If the current trend continues and more and more of these high-voltage units are purchased overseas, there seems little incentive for any American manufacturer to invest the time, money and manpower needed to keep up the technological pace. Power transformer technology is in danger of being transferred overseas.

But this is not the only risk. America's national well-being is involved. Great power systems in this country, dependent on foreign suppliers, might be unable to secure service or parts in time of emergency, or in periods when these foreign suppliers had to give priority to their home market demands. Besides, it is unlikely that present "cut-rate" foreign prices would long prevail, if American power transformer manufacturers were no longer considered meaningful competitors.

Nevertheless, "cut-rate" prices are the reason for the alarming upsurge in purchases of foreign-made power transformers. A hard-headed utility executive or prudent purchasing agent cannot be blamed for taking advantage of a bargain. Some foreign bids have been 25 to 30 percent lower than domestic manufacturers' prices. They have also been well below the prices at which these same foreign suppliers have sold similar equipment in their own domestic markets.

Foreign suppliers can consistently underbid their American competition in the American market because their governments subsidize them for all exports to the United States. Different countries have different forms of subsidy—tax rebates or abatements, adjustments to corporate income tax, in some instances tax forgiveness, guaranteed financing and event direct payments for power transformer exports to the United States.

These are powerful incentives, but there are still more. In many industrialized countries, the electric utility industry is either government-owned or government-controlled. Investigation has shown that these utilities purchase equipment from their domestic suppliers at prices sufficiently high to offset the low prices these same suppliers charge in the United States. At the same time, because their home markets are protected, foreign manufacturers have no fear of American competition, and frequently sell in their own domestic markets at prices higher than those charged by United States manufacturers for similar equipment.

Earlier, I mentioned that American utilities had purchased $100 million worth of power transformers from foreign suppliers during the past six years. It is noteworthy that, in the same period, the extremely few transformers sold by American manufacturers in the home markets of these foreign suppliers were special types they could not build themselves.

There is nothing reciprocal about this kind of trade. It is unfair competition. It is a one-way street.

The American electrical equipment manufacturing industry has publicly declared its support for free, fair, reciprocal international trade. I know our American producers of large power transformers have the technological, engineering and manufacturing skill, and the research and production facilities and capability to be worthy competitors in their field. But only the Congress and the Government can remove discriminatory obstacles to their export trade. Unless or until this is accomplished, this major industry, on which so much of our internal economy has depended, will remain in jeopardy.

Mr. Chairman, I referred earlier to the major Antidumping Act case filed by Westinghouse. As we watch its progress, we will have a better idea of whether legislative changes are needed to make this relief more effective.

Already there have been major criticisms of the antidumping law. It has been pointed out that the recent tendency to accept written assurances that dumping would end without an actual finding of dumping, constitutes, in effect, a license to continue dumping until a finding is about to be made.

In a thoughtful presentation before a conference on the crisis in international trade sponsored by the Industrial Union Department, AFL–CIO on March 19, 1970 U.S. Tariff Commissioner Bruce E. Clubb recommended three changes in the present law: an end to the undue delays that now occur in such cases, an end to the two-stage proceeding involving both the Treasury Department and the Tariff Commission, and provisions for a right of appeal when dumping is not found.

I urge this Committee to keep these proposals in mind and to exercise strong legislative oversight of the effectiveness of the present act and its implementation. As I said before, there is simply no justification for continuing this price discrimination.

---

EXHIBIT NO. 2

FOREIGN COMPETITION IN POWER TRANSMISSION EQUIPMENT

(This study is edited slightly to omit references to charts and photographs not reproducible in the RECORD)

The General Electric Company is deeply concerned with the nature and the effect of competition from foreign producers in the heavy electrical apparatus industry. We are particularly concerned with the success of foreign producers in that sector of the domesic market represented by the Federal Power Agencies. These government agencies are major purchasers of heavy electrical apparatus and their buying practices have a significant influence on the private electric utilities throughout the United States.

We would like to explore the background of this domestic market situation and some possible solutions which are within the scope of the national interest in a free, fair trade program.

At the outset it should be emphatically understood that the General Electric Company does not advocate "protectionism". On the contrary, we support the concept of free, fair trade. We feel strongly that our product offerings, costs and effectiveness permit us to compete in all open markets where the condtions for competition are fair.

The problem, as we see it, is that in the domestic market for heavy electrical apparatus trade is not fair at the present time. We plan to document this unfair trade situation in the course of our comments.

The partcular heavy electrical apparatus to which we are referring includes equipment used for transmission and distribution of electric power throughout the United States, which produces and uses 35% of the world's electric energy.

Extensive transmission lines link the utilities together throughout the nation. The most important of these transmission links are in areas of the new high voltage technology—345, 500 and 765 kilo-volts (KV)—termed Extra High Voltage or EHV. The highest voltage commercially in operation at this time is 500 KV.

Over the past few years, there has been a very rapid growth in the number and length of EHV lines designed to link the utilities together in large power pools. This linkage results in both the economical transmission of bulk power and greater reliability by providing for the interdependence of contiguous utility systems. The extent to which the United States depends on the reliability of this power system is brought sharply into focus when we consider the disastrous results which could be associated with massive blackouts in peace time, and the possible loss of our power system under conditions of war.

The Federal Power Commission report of July, 1967 commented on these points as follows:

"Economy and reliability are closely associated objectives in the supply of electric bulk power, but reliability must have priority if any conflict occurs."

"Progress toward stronger transmission systems must be accelerated if all utilities in the United States are to be able both to provide and receive strong emergency support."

"Transmission must be recognized as the principal medium for achieving reliability, both within a system and through coordination among systems. It is the cohesive force which ties together power systems."

This power grid has developed because the electric utilities have been willing to invest in the system and because the U.S. electric manufacturing industry has committed its resources to provide the needed equipment.

An example of the capacity of this equipment is the fact that one 500 KV transformer/breaker is capable of carrying sufficient power for two cities the size of Boston.

These highly sophisticated and massive equipments require unique resources in the form of technical skills, manufacturing facilities and laboratories.

General Electric has over 1700 professional personnel committed to the design, development, manufacture and application of these equipments. Over 1100 of these people are scientists, engineers or technicians.

The required investment in facilities is substantial. An example is General Electric's new $37 million transformer manufacturing facility now in production in Pittsfield, Mass.

The manufacture of large circuit breakers also requires manufacturing facilities with high head room and ability to move massive equipment.

In our Laboratories new designs and new technologies are exhaustively tested, often to destruction. The Laboratories are the most complete and modern facilities in the world for the high energy testing required to prove out this equipment.

Such laboratories and facilities are committed to providing the technology and equipment to help build the United States electrical system of today and also for tomorrow. By the year 2000, the nation must multiply the capabilities of today's electric power system seven times, while providing systems and equipment that will meet increasingly stringent reliability requirements.

The magnitude of system change, the implications for national security and the need for a strong, healthy and dynamic electrical manufacturing industry dictate that the potential for growth in electrical technology and manufacturing capacity should be maintained in the United States.

Yet in the face of this need foreign manufacturers are realizing increasing success in placing foreign EHV equipment on U.S. lines.

The pattern of success is most pronounced in the Federal Power Agencies, the Tennessee Valley Authority, the Bonneville Power Authority, and the Bureau of Reclamation. We emphasize that the EHV equipment involved represents the most advanced technological frontiers of high power transmission and it therefore is of significant importance to both the manufacturers and all electric utilities in the United States.

As we have stated, General Electric believes in free, fair trade and desires to compete world-wide on that basis. If we cannot effectively in an open market under fair competitive conditions, as business men, we believe that we should question seriously the economics of continuing in the business.

The issue we want to consider first is why are foreign producers enjoying this success in the U.S. market.

We as manufacturers feel completely capable of competing on the merits of our EHV power transmission equipment. We believe our product offerings to be technologically equal or superior to foreign manufacturers and competitive in cost. The efficiency of our direct labor and manufacturing methods fully compensate for our substantially higher per-hour labor costs, and material costs are on balance competitive.

We believe that the foothold in the U.S. market established by off-shore producers has been gained principally as the result of trade inequities intended to stimulate export sales especially into the United States, which is the largest open national market for heavy electrical apparatus in the world.

Dual pricing structures and nationalistic procurement policies practiced or supported by key foreign governments are the major instruments used for this purpose. These practices are supplemented in various countries by such additional devices as tax incentives, low cost credit, research and development subsidies, and export subsidies.

Using dual pricing, French and English manufacturers, for example, sell at high prices to the nationalized utilities in their captive home markets. The high domestic prices liquidate their total expenses, and permit offshore sales based on variable costs only. These protected home markets tolerate dual pricing as a matter of policy.

We cite three instances of this:

The first example is in the French market for power circuit breakers. Mr. R. E. Bednarek, Manager-Marketing for our Power Circuit Breaker Department, called on Electricité de France, the French National Utility, in June, 1967. We quote the following from his affidavit on the results of that meeting:

"Upon completion of my product descriptions, Mr. Michaca (directeur de Etudes de Recherche, E.D.F.) stated that there was no problem in applying our equipment to the EDF system . . . At this point I gave them prices for five ratings of power circuit breakers. The prices were essentially at the same price levels quoted to domestic U.S.A. utilities. To these prices we then added 17.6% tariff and then an additional 25% use tax. Mr. J. A. Duverny (Chief du Service Material Direction de le Equipment du Riseau de Transport) then said that all the prices with the exception of the 115 KV were competitive and 'in the same range as domestic prices.' At 115 KV, they buy a 2500 MVA unit which has a rather low price because it can be made as a single break device. . . . I then asked 'can I be allowed to tender quotations for his breaker requests?' He replied: 'at this time I am not in the market for any breakers, however, if I was I could not buy from you because it is our policy to buy only domestic products.' "

The second example is in the British market for power transformers. We quote from a letter from Sir Stanley Brown, Chairman of the Central Electric Generating Board (CEGB) of the United Kingdom on January 18th, 1968 in response to an attempt by our Canadian subsidiary to sell transformers in England.

"You also ask for 'advice as to our policy.' You are no doubt aware of the current situation in which the very low rate of growth of demand in this country coinciding with approaching completing of the main 400 KV grid is resulting in a very abrupt reduction in our requirements for large transformers. Under these circumstances, I think it is unlikely that we should need to seek tender from a wider circle than our home manufacturers."

The third and perhaps most startling example is an agreement entered into in March, 1967 between CEGB and four British switchgear manufacturers. We have copies of that document, which is quite lengthy. The agreement covers 400, 275 & 132 KV switchgear and "will run for an initial period of five years from 1st January, 1966." It provides for an "agreed Schedule of Prices," which is intended to yield the manufacturers an "agreed profit margin at 16½%" on sales, and a similar rate of return on capital employed, on the average over the five year period. It also includes a "uniform method of ascertaining costs."

These three examples illustrate the effective closing of these markets to U.S. manufacturers while the American market remains open for low price exploitation.

Tax and credit incentives such as specific insurance policies against cost escalation, and research and development subsidies—such as those available to French manufacturers—also contribute significantly to the ability of various foreign manufacturers to quote low prices in the United States.

The avenues of the support and subsidization foreign manufacturers enjoy are numerous. In 1967 the Department of Commerce issued a comprehensive report listing over sixty different ways that the French ". . . stimulate and assist the export of French products."

With regard to one such avenue, the subsidy of research and development effort, we quote from a speech given at the National Academy of Engineering in Washington in April, 1968 by Pierre Aigrain, Director General of the Recherche Scientifique et Technique of Paris:

"For the last three years, for example, we have had a scheme which is operated by the agency I am responsible for in which the government will pay fifty percent of development costs on a new product after a group of experts have felt that the product or process was interesting, fifty per cent of the development cost in the form of a loan which will be repayable with a small premium if the product is successful commercially. If it is industrially successful, if a few years later the company really makes money on this new product, then it will repay the loan by a small percentage of cost. If, on the contrary, the product is not a success, then we write off the loss.

"I will take a simple case. This scheme made it possible to develop a 765 kilovolt circuit breaker for high voltage transmission lines by a company in Grenoble. It turns out there is no market for a 765 kilovolt circuit breaker in France, and even in Western Europe at the present time, because of the general size of transmission lines, and because of the very concentrated nature of Europe, we don't have yet to resort to these extremely high voltages for high power transmission. So all sales of that circuit breaker have been to Canada, the United States, and the USSR. Not a single one has ever been sold in France, and probably none will be sold in France for some time to come."

Nor is subsidizing research and development for export products peculiar to the French. Quoting from the CEGB–Switchgear Agreement mentioned earlier: "All research and development expenses referred to in this paragraph should be charged to the home trade business only."

Our economic studies show that as one result our principal overseas competitors are pricing on the basis of labor and materials cost, with little or no allowance for overhead costs. In the case of France, and some other European countries, foreign manufacturers, through tax allowances, are spared the level of tax costs which attach to American-made products. It follows that any profit factor adopted by the foreign producer can be related to the base material and labor costs only.

The resulting disparity in export and domestic pricing is reported in a study of the British Power Transformer industry by Dr. Horace J. De Podwin. Page 91 of his report states: "This analysis shows that British manufacturers bid for U.S. contracts in 1965–66 at 25–45% below prices at which they sold comparable transformers to CEGB."

If it is considered that in connection with circuit breakers, for example, our research and engineering costs, year after year, are a substantial portion of our costs, and that our corporate and personal income taxes are not subject to rebate—if we combine these elements with the evident intent of foreign governments to actively support and encourage exports to U.S. markets through the various practices described earlier, it becomes understandable how price differentials of one-third or more can exist between U.S.-made products and foreign-produced equipment.

It is true that American manufacturers are given some advantage through the evaluations permitted under such acts as the Buy American Act. As presently administered, this grants a 6% favorable evaluation to domestic products. This is insignificant compared to the incentive provided by many foreign governments to their respective manufacturers.

On the basis of these factors, and the inviting size of the U.S. market, it is not surprising to find a wide diversity of foreign competitors in the market. Substantial U.S. domestic transformer orders have gone to manufacturers from Sweden, England, Japan, Italy and Austria. Many circuit breaker contracts have been awarded to the French who have taken an especially strong position in this product. Other breaker contracts have also gone to Swiss and Japanese manufacturers.

Foreign producers have obtained a significant share of the American market for 500 KV breakers and transformers in the last six years. Since 1963 the penetration is so great that 75% of the 500 KV circuit breakers and 73% of the 500 KV transformers on Federal systems are now foreign.

The impact of Federal Power Agency purchases cannot be minimized. They represent approximately one-third of the total U.S. market for extra high voltage transmission equipment and, by their example, place tremendous leverage on the private utilities to follow a similar buying pattern.

The foreign marketing strategy is obvious.

First, penetration of the market started at the higher voltages, which are the frontiers of the transmission technologies. It is proceeding to work down into the lower voltages.

Second, market penetration started in the Federal Power Agencies and presently dominates their purchases. It is now swinging to the private utility sector as well.

We are competing in a finite market determined by the load growth of the power systems. Once an order is lost by an American manufacturer it cannot be made up—nor can the American manufacturer secure a compensating order from a foreign industrialized nation whose purchases are limited to internal suppliers. A transaction lost to an off-shore supplier means lost hours of work for American labor, lost opportunities to hire and train people in hard core unemployment areas, and lost tax revenue for federal, state and local governments. A transaction lost adds to the growing balance of payment problems in the United States and has the effect of exporting dollars that would have been reinvested in research and development for the next generation of transmission equipment.

But the consequence is not merely the fact of lost sales and the resulting economic impact.

The capability to develop, design and build heavy electrical apparatus for the United States domestic power industry is a critical national resource.

The Report to the President on Underground Power Transmission made by the Department of the Interior in 1966 confirms this point.

"Recognizing that the technology necessary to accomplish the objectives of the program (Underground Transmission) will truly be a national resource, the research work and any necessary procurement required to develop this resource will be done with the objective and in a manner to advance *domestic* technology."

We concur wholeheartedly with this statement. We believe that the technology associated with the generation and transmission of power should be advanced from within the United States.

We would accept the threatened loss of leadership only if we were satisfied that the foreign producers are outperforming American manufacturers—namely, *better equipment at less cost*. The best that can be said for them is that they are offering good equipment at less *price*—a price which does not have to provide for the same or similar cost elements which American manufacturers must confront.

We do not want to create the impression that American electrical manufacturers are passively submitting to these forces.

In the period from 1961 to 1968, American industry, through technology and productivity, has continuously lowered the cost of the equipment in terms of its capability ($/KVA and/or $/MVA), in turn enabling the utilities to add more and more capacity with less investment. Both transformers and circuit breakers are capable of handling more power per dollar of investment than ever before.

Notwithstanding this demonstrated progress, it is not economically feasible for the American producer to contest on all fronts simultaneously: to produce reliable equipment; to maintain the lead in technology; and to meet foreign price levels which are subsidized by mechanisms such as dual pricing and nationalistic procurement practices.

We fell that the only immediate solution to our problem will come about through specific action by the Federal Government and especially, through the Executive branch.

During the previous administration, this situation was brought to the attention of many government representatives: the Federal Power Agencies, Department of Commerce, the Department of the Interior, the Department of the Treasury, Bureau of Budgets, the Federal Power Commission, Ambassador Roth—Special Representative for Trade Negotiations—as well as many private utilities. This situation is recognized by Ambassador Roth's Report to the President, dated January 14, 1969, page 25:

"3. *Government Procurement*

"Government procurement, including direct purchases and those by state-owned companies and quasi-autonomous entities, has a substantial impact on international trade. As the scope and volume of these purchases have increased in recent years, the disparities in practice among the major trading nations have created an increasingly serious distortion of trade.

"In the United States, government procurement for use in the United States is governed by the Buy American Act and implementing regulations. The margin of preference is a clearly stated percentage difference between foreign and domestic bids. Except for certain contracts involving goods and services essential to the national security, foreign suppliers are regularly afforded a clear opportunity to bid on government projects and are awarded contracts on the basis of their bids.

"In most other countries, by contrast, government procurement is usually carried out under a very high degree of administrative discretion, unquestionably favoring domestic suppliers even where there are published standards and procedures. As a result, U.S. and other foreign suppliers frequently have no established means of competing for contracts or sometimes even of learning of the existence of a government project. Moreover, some foreign governments consistently invite bids only from domestic firms and thus exclude foreign suppliers entirely. This is especially true in the field of heavy electrical equipment."

No solutions have resulted from these efforts or from recognition of the problem, and the situation continues to deteriorate.

Under these circumstances, we believe that U.S. trade and procurement officials should make a determination—now and for as long as present non-tariff barriers and other inequities with respect to trade in EHV power transmission equipment are practiced by foreign countries and foreign suppliers—that

1. Domestic capabilities in the high technology areas of EHV power transmission equipment are a national resource and should be actively encouraged by the Federal power agencies in the national interest, and

2. Strong U.S. commitment to expanded *reciprocal* international trade can be demonstrated effectively only by affirmative action against the present *one-way* street in the international trade of power transmission equipment.

This affirmative action would be accomplished by having the various Federal Power Agencies adopt a course of action which would be in effect a moratorium on the purchase of EHV power transmission equipment until such time as present nontariff barriers and other trade inequities are removed and a free, fair international trade climate does in fact exist. Specifically, we suggest that the Federal Power Agencies be requested to adopt an effective Buy American differential—such as 50%—for foreign-made EHV power transmission equipment. We believe that there is ample existing authority for them to take such action based on the broad discretionary authority vested in them by the TVA Act and the BPA Act to observe procurement practices which best serve the public interest.

Not only would the foregoing have a significantly favorable effect on the U.S. balance of payments, it would also help to induce foreign governments to abandon their nationalistic procurement practices, promote bona fide worldwide competition for this equipment, and provide U.S. negotiators with an additional position of strength in the ongoing negotiations in OECD and GATT to remove existing non-tariff barriers.

*Philadelphia, Pa.*

## FUEL OIL CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 10 minutes.

Mrs. HECKLER of Massachusetts. Mr. Speaker, there must now be fast and effective action taken to relieve New England's growing emergency fuel oil crisis. With the approach of winter, which can be especially severe in New England, we have passed the point where further delay is tolerable.

Sometime this week we expect to learn the recommendations of the Energy Subcommittee of the President's Domestic Council for dealing with the national energy crisis. Obviously I trust that it will supply the answers we are looking for; however, it is my strong belief that any plan to meet the national energy crisis must spell out extraordinary action to meet New England's special needs. The energy crisis is nationwide, indeed worldwide, but New England's needs are unique because she is far more heavily dependent on fuel oil imports and a greater consumer of all fuel oils than other sections of the Nation.

For example, Massachusetts, with only 2.8 percent of the Nation's population, consumes 11.1 percent of all home heating oil and 10.3 percent of all residual oil in the Nation.

Nearly 70 percent of the fuel requirements of Massachusetts industry and electric powerplants is met by residual fuel oil. Nationwide, residual oil represents less than 10 percent of industrial and thermal electric fuel consumption. In Massachusetts, 90 percent of all schools are heated by oil. It is especially significant to note that 70 percent of all homes are heated by oil. The homeowner, already staggering under steadily rising home-heating oil bills, is going to be hit far harder if no relief is provided and if schools, powerplants and municipalities must suddenly convert to other types of fuel and fuel-burning equipment this winter. The high costs of conversion will inevitably be passed along in increased taxes.

In my district, the 10th Congressional District of Massachusetts, we have confronted crisis after crisis in recent weeks —the asphalt shortage, which seriously delayed essential road repairs; the fact that the public schools of Sharon, Wrentham, and Dover-Sherborn have found they can get no bids whatsoever to supply heating oil for the schools, Mr. Speaker, we cannot simply close our schools, barricade roads, or shut down powerplants. Our latest crisis involves the city of Taunton which has declared a state of emergency because its electric powerplant has only a few weeks' supply of residual fuel oil remaining and cannot obtain commitments for more when the supply is exhausted. City officials have considered the possibility of closing down factories for certain periods in order to conserve power for residential use. Mr. Speaker, factory shutdowns mean unemployment for workers. I deplore the possibility that any factories should have to close, sending their workers home.

My district is a microcosm, reflecting problems that are prevalent throughout New England. There will be other Tauntons unless effective relief is forthcoming rapidly. I am still working at the Federal level to insure that Taunton is guaranteed an adequate fuel oil supply. I believe that emergency sources of oil supply must be located at once, and directed to New England, if we are to meet our various crucial needs.

When I testified on fuel oil problems last week before the Small Business Subcommittee of the Senate Banking and Currency Committee, I also discussed a study just completed by the Associated Industries of Massachusetts in conjunction with Arthur D. Little, Inc., of Cambridge, of industry's increasing problems in procuring fuel oil. I was disturbed to read that small businesses are increasingly mixing No. 2 fuel oil—which is the lighter home heating oil—with heavier fuel oils, in order to reduce the sulfur content of the oil to conform with new air pollution control standards. Since I am a member of the Small Business Subcommittee of our House Banking and Currency Committee, I am deeply concerned with the difficulties facing small businesses because of oil shortages.

I strongly support Massachusetts' new air pollution control standards, which take effect October 1. However, this increasing industrial use of No. 2 fuel oil

threatens to drive up the price of home heating oil for consumers. This must be prevented by procuring sufficient No. 2 fuel oil so that prices are not further inflated, while high air quality is assured.

I believe this argues strongly for AIM's recommendation that import quotas on No. 2 fuel oil, which is already scarce, should be temporarily increased until the needs of all East Coast users are met. Personally I would prefer to see mandatory oil import quotas entirely abolished.

Mr. Speaker, this summer I attempted to prevail upon the President and his Director of Emergency Preparedness to order an immediate crash study of New England's unique fuel oil problems to develop specific plans for both immediate and long-range relief, with the study to be undertaken by either the Domestic Council or the Oil Policy Committee. I shall look for specific recommendations of this kind in the Domestic Council's energy crisis report. The President, in June, took a step to provide some relief for New England by ordering small, short-term increases in imports of No. 2 fuel oil and asphalt. The administration has indicated it will review the effects of this action in January; however, in view of New England's steadily worsening problems, I think that review is needed at once.

I hope the Domestic Council proposes incentives or other means to encourage domestic industry to increase its production of residual oil and build additional refining capacity. But, to meet the present emergency, I think that we must secure whatever additional oil is obtainable from sources in Puerto Rico and Canada, although I understand the quantities available are small. I think consideration must be given to taking U.S. Navy tankers out of mothballs to help carry additional oil to New England. The flow of available oil, and the means of transporting it, must be redirected toward the Northeast, with consideration of other national needs, of course. These actions are needed at once to insure sufficient supply for the remaining winter months, and to allow the various oil companies, suppliers, and independent terminal operators to plan ahead for the procurement and transportation of oil.

In addition, I think much can be gained if the administration begins a national effort to secure voluntary conservation of fuel oil.

The crisis is here, and the consequences can only be disastrous if there are further delays in achieving a realistic response.

---

## RHODESIA—RICHARD COTTEN'S REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. RARICK) is recognized for 10 minutes.

Mr. RARICK. Mr. Speaker, since the UNO sanctions a declaration of economic war against Rhodesia many Americans, weary of their slanted and discredited press, have visited that country to see conditions for themselves firsthand.

Without exception, all have returned reporting Rhodesia is no threat to international peace. To the contrary, they report finding a friendly people, an atmosphere of peace under law and order, and a small nation which prospers despite malignment by the UNO at the insistence of the Government of England and rubberstamped by the party in power in the United States.

One recent such American visitor to Rhodesia was Richard B. Cotten, nationally known writer, publisher, and radio commentator of Conservative Viewpoint (Box 17194, Dulles Airport, Washington, D.C. 20041). Upon his return, Mr. Cotton published his interviews with the various government leaders in a booklet entitled "Rhodesia." His booklet, dedicated to Rhodesia, a nation where the "men of the West" have not lost the will to live, contains several interviews which I feel will be of interest to our colleagues. I include a portion of the interviews from Mr. Cotton's publication:

RHODESIA

(By Richard B. Cotten)

(Dedicated to Rhodesia, a nation where the "men of the West" have not lost the will to live.)

PRIME MINISTER IAN SMITH

Mr. COTTEN. This is Richard Cotten speaking, and I speak to you today from Salisbury, Rhodesia. Many of you have listened to my radio broadcasts, Richard Cotten's Conservative Viewpoint, and are aware of our interest in the situation in Rhodesia. Prime Minister Ian Smith has very kindly consented to an interview which we trust we will have an opportunity to share with Americans from coast to coast, with a view to correcting this incredible situation wherein we fight our friends and trade with our enemies.

Mr. Smith, it is very, very kind of you to consent to this interview. I believe that Colonel Dall of Friends of Rhodesia Independence came here just some time last year and you greeted him wonderfully well, and because of that effort, we have now Friends of Rhodesian Independence, bringing another tour group. I am acting in the capacity of host to that group, and the dual capacity of getting interviews for Conservative Viewpoint.

PRIME MINISTER. Well, I would like to wish you all good luck as we did to Colonel Curtis Dall. We found both he and his accompanists were wonderful people and I am sure we will find you the same.

Mr. COTTEN. We have been here the better part of two weeks now. We have had an opportunity first to be greeted by your officials in the capital of Salisbury, and I imagine many of us expected to merely find tracks in a desert. Insted of that, we found a very modern and bustling city. We then traveled to your Eastern Highlands and were greeted by such dignitaries as the Mayor of Umtali, who is a very impressive person, and who would love to see us bring immigrants to work in the many industries. We traveled to the beautiful Victoria Falls.

I think the message that is essential to bring to Americans is the unity of your people, Europeans and Africans alike, fighting together very much what I would term shoulder to shoulder in the interests of Rhodesia. Could you comment on that, please?

PRIME MINISTER. I think we can honestly and sincerely claim that we are standing together. Our policy is one where merit is the criterion, and we honestly believe that a man is entitled to progress, to prosper and to ascend the ladder of promotion according to his ability. And we try to make this and only this the criterion and never the color of a man's skin. I think that it is because we have been successful in this direction that we have this great racial harmony in Rhodesia today. Where although the White man is outnumbered, and considerably outnumbered by the Black man, I believe there is greater racial harmony in Rhodesia than any other country I can think of, where there is a problem of different races living together. And this is what we are striving to maintain.

Mr. COTTEN. I am watching the very careful manner in which you are working with the tribal areas where there were Africans who wish to maintain that way of life and are being encouraged to do so. Yet I see they are not barred in any manner from entering the life of your cities. Is that a fair analysis?

PRIME MINISTER. This is correct. They, as you know, only came into touch with civilization about 70 or 80 years ago, when our forefathers came here as the Pioneers of Rhodesia. So it is not surprising that they still have a long way to go up the ladder of civilization. I believe that you rush this civilizing process at your peril, I think it is something which cannot be turned into a revolution, but must remain as it has always been—an evolutionary process. So that is the basis on which I start, I would also say this to you that as far as the indigenous African is concerned, he is one of the happiest people in the world, with a wonderful way of life in their tribal areas. In fact the more one sees of this in many ways, the more disenchanted one becomes with modern civilization. But we are trying to blend the two together—realizing that they cannot forever stay in that state. But we think it must be an evolutionary process. We must be sure of our road and our way. We mustn't make mistakes.

Mr. COTTEN. This is exactly what I have seen evidenced. I have found their housing, as an example, quite adequate in and around Salisbury. One community I believe has 65,000 people in it. And, unlike our public housing, they must be employed to live there, and they must pay rent. I didn't see any evidence of a Police State maintaining law and order in it. It's really a blessing after our own capital.

PRIME MINISTER. We are sometimes accused of being a Police State, but many things about Rhodesia have been distorted overseas, and I think this more than anything. I can assure you that we meet many people here, not only from America, but from all countries on the Continent of Europe. And this is one of the first things they laugh at—the story of a Police State. Because inevitably they say: "We see less policemen here than in our own country. It seems to be more peaceful here than in our own country", and indeed whenever they see a policeman, the policeman isn't armed. This is a regular story that we hear.

Mr. COTTEN. I have had the opportunity to hear the stories of the cases where the terrorists penetrate from across the Zambezi and are turned in, in one case by one of your African schoolteachers while working with his pupils. I understand they are all rounded up in this fashion constantly. Is this correct?

PRIME MINISTER. This is quite correct. There have been many cases I can assure you. And one of a very old African Chief who had, I think, an old shotgun that he used to keep wild game out of his crop lands. And on one occasion he, personally, with one of his assistants arrested one of these terrorists, who was hiding in a hut. Here was a terrorist who was armed to the teeth with modern automatic weapons, but it did not deter this fine old Chief. He brought him in and handed him over.

Mr. COTTEN. I have had the opportunity of meeting those Chiefs who are also your Senators—eight is it?

PRIME MINISTER. Ten.

Mr. COTTEN. Ten, excuse me, and they very kindly consented to an interview and I am endeavoring to bring a message from them to our nation. I find that they are the very epitomy of representative government, right

from the kraal, or whatever it is termed, right up to these Chiefs who in turn were elected by a Council of Chiefs. Is this the way that works?

PRIME MINISTER. Yes, this is correct. It is a very fine democratic system which actually goes right back to the grass roots. They have each little kraal, as it is called, which elect their kraal head, and then a number of kraals go together into a group and they elect their headman, and then a number of those groups go together and they elect a Chief for the whole of the district. And that Chief has representation right down from the lowest part of the community, the kraal. And in many ways I think it is a far more effective system than our own democratic system.

Mr. COTTEN. It's certainly more effective than the mobocracy that we have created as a democratic process in the United States. I noticed even as we asked the Chiefs to make a statement on behalf of the other Chiefs they were very hesitant. They wanted to be very sure that there was a consensus, which I understand usually ends up unanimous, before they resolve a case. I did have the opportunity to ask them if any of them would, to their knowledge, delight in seeing Whitey, meaning the European, leave, and instantly and emphatically they didn't want any part of that. They know that you are working as a team to their mutual advantage.

I have read a little of your history now. The two tribes are still a bit of a mystery to me. Could you tell a bit about that?

PRIME MINISTER. Yes. The two main tribes are the Mashona and the Matabele. Now the Matabele were the people who came from south of us, and they were orignally the Zulu that came from Zululand. That is near Natal in South Africa. A very strong and indeed a warlike tribe. They had a great history of fighting wars against the South Africans. And eventually a fraction of their tribe broke away, because the son, Mzilikazi, had a conflict with his father. And according to their tradition, even if it was his son, when he came back with his warriors they would have all put to death. So they broke away and came north. They crossed the Limpopo and settled in Rhodesia, and this is the Matabele.

And here, in the eastern part of Rhodesia, is the Mashona, from Mashonaland, and I think they traditionally came from the north.

And these are basically the two main tribes that lived in Rhodesia at the time when the white man came. And in those days they used to fight one another and massacre one another and it was mainly the Matabele, the more warlike tribe, that used to come off best. They used to go away taking the cattle and the young girls from the Mashona.

And, of course, since we've been here this has come to an end and they have now learned to live peacefully side by side, and they work together as they do with the European. So there aren't really just two main groups—the white and the black. There are three main groups—the Mashona, the Matabele and then the white group, the Europeans as we call ourselves. And we are working in great harmony today. Our major problem is that the rest of the world seems unwilling to leave us working quietly in harmony, they want to interfere to ensure that they can break that harmony.

Mr. COTTEN. Prime Minister, I was very impressed with the information accorded my group by your Ministry of Information, and that, of course, included The Ministry of Immigration. Many Americans, as they watch what we term "big brother government" grow by leaps and bounds, are thinking in terms of migration. I am finding that your country is in the middle of, what I have to term, a business boom, and, of course, sanctions appear to have hurt the African more than the European. Were it not for the sanctions, business would boom more and the European would hire the African roughly at the rate of 20 to 1, as I have seen it. Would you comment, please, on the immigration policies of your country and the availability of opportunities?

PRIME MINISTER. Well, we are a young growing country and we have lots of open spaces. I also believe we are a very rich country. I think we have some of the greatest agricultural potential that I have heard of, and minerally even today there are some wonderful deposits here which have been exploited, amongst some of the best in the world, and indeed American capital is involved here. But I believe that in this field we have hardly scratched the surface. So the possibilities are tremendous. I would say that this is one of the few opportunities left in this world for people to buy land at a reasonable price, indeed very cheap according to world standards. So we are looking for good emmigrants with know-how and capital. I think they will assist us. But I repeat I believe that they will find that there are glorious opportunities for investment in this country, where we do try to maintain high standards in keeping with the high standards of western civilization that we inherited. I wish I had a little more ready cash and I would be happy to invest it in land in Rhodesia.

Mr. COTTEN. I find the opportunities endless in your secondary industry, I guess you would term it. You manufacture your own pencils now. You have your own—oh, you name it. Every item I pick up now has a "Made in Rhodesia". You must have literally hundreds upon hundreds of new businesses springing up.

PRIME MINISTER. Well, this is so, and indeed I love to go every year to the big national Trade Fair that we hold to see what Rhodesian industrialists are doing. And I must confess that every year I am absolutely amazed at what we are producing. But this is, of course, where sanctions have assisted us. You did make the point earlier, correctly so, that sanctions effected the black Rhodesian more than the white Rhodesian. This is what makes them so hypocritical, because they are supposed to affect the white Rhodesian and help the black Rhodesian. Whereas in fact it is the reverse. I would like to say this to you that sanctions have been a boom to industry in Rhodesia. We have had sanctions for just over four years now and I believe that our industrial development has gone ahead at a pace which would have taken us twelve normal years and we have done this in four years. So this is what sanctions have done for us. It has been a great asset to industry.

Mr. COTTEN. Mr. Minister, I am sure you must wonder, and quite properly, why Americans act as they do. For example, in the matter of chrome which we are perfectly well aware we are refusing to buy even from American companies in Rhodesia, and yet we pay twice the price for it to buy it from the Soviet Union, whom we know is furnishing the weapons of war to kill our soldier sons in the Vietnamese situation. The only explanation, and I am sure you have reached the same conclusions, is in terms of international subversion—let's call it international Communism. It must be somewhat frightening to realize the inference of this—the degree of penetration of the western world—when you find all of these nations agreeing to sanctions. Your comment if you would, please—relative to the international conspiracy, this control mechanism.

PRIME MINISTER. Well, we don't understand it in Rhodesia. I find it very difficut to make any intelligent comment because the whole thing seems to me to be quite unintelligible why it is that we, who have always been part of the free world, the western world, we've stood by them, we've fought with them in two world wars and we've never asked for anything in return. We have been able to finance ourselves. We've given men and money. We are still in the western world, and yet today it seems as though the western world is attacking us even more than the traditional enemy. As far as we are concerned we believe that international Communism is the enemy of the free world. The world is divided into two camps, and we are proud to claim that we are holding one of the major parts of the line on the African continent against the advancement of international Communism.

And we say to our friends in the free world: We don't want you to give us men. We don't want you to give us machines or money. We'll hold the line. Will you sell us some of your equipment, which, of course, we are unable to make yet in a young growing country like Rhodesia. And they say no, we won't even sell you any equipment. Well, how one can comprehend this sort of thing, get any sanity out of this state of affairs, is beyond my comprehension. Maybe my intelligence is lacking. I don't understand it.

Mr. COTTEN. Prime Minister, you certainly are not lacking in intelligence. Its our deep involvement with the international bodies such as the United Nations. Those who conspire to have one world government, one world court, one world bank, will never rest. You are indeed a threat to the peace they envision, wherein they will have a one world Police State. And I thank God, most seriously, that Rhodesia does stand and I feel, even as I watch my own nation falter through its loose fiscal policies, and its now relatively pure mobocracy where our government must be elected by the mobs, I pray that you will stand tall and be that beacon light of sanity in the days ahead. Could you comment on the United Nations if you please, recognizing, as we do that the African vote there, each emergent nation cancels out our vote as a western civilized nation.

PRIME MINISTER. Well, I don't want to be too offensive and critical, but the United Nations makes even less sense to me than what is happening in the rest of the free world. They are supposed to be a body dedicated to maintaining peace in the world. Fair play. A body which would take the side of the under dog against the big chap. But it seems to be quite the reverse, when one sees for example what happened in countries like Czechoslovakia, and before that, Austria, when the great Russian war machine went into there. They hardly raised a finger, hardly one breath of protest came from the United Nations. And yet in return when we see what has happened to a small country like Rhodesia, simply because we want to be left alone to solve our own affairs. And there are many other examples. Look at the question of the conflict in the Middle East, with Israel on the one side and Arab nations on the other. The Communists go in there. They make no bones about it and I think this is why they are winning today, because they are positive and decisive. Whereas the free world seems to wish to sit on the fence in between hoping that they may in the end land in the right place, but inevitably they land in the wrong place.

I can assure you we've made up our minds. We may be wrong and we may go down, but if we go down we'll go down fighting. We are not going to go down on our knees. This is a free country, where we have decided to maintain standards. We don't like the welfare state. We believe in private enterprise and there are opportunities here for people who come here, who believe in the initiative of the individual and private enterprise. Every person who comes here can potentially one day become a great man. He has the same chance as anyone else, and we don't want the welfare state to handicap the initiative of the individual. This is Rhodesia.

Mr. COTTEN. The individual American, the silent majority we speak of, would more than

agree. Prime Minister I believe we have run out of time. I thank you for this courtesy. I do believe you are going to stand tall, endure, and be it God's will, one day I'll be part of your community. Thank you again.

PRIME MINISTER. Thank you very much.

MR. P. K. VAN DER BYL, MINISTER OF INFORMATION, IMMIGRATION, AND TOURISM

Mr. COTTEN. Today I am speaking to you from the offices of the Minister of Information who also serves in the capacity as Minister from the offices of the Minister of Immigration and Minister of Tourism. We have a very important gentleman, Mr. P. K. van der Byl, who has very kindly offered to share these few minutes with you so you would have some understanding of his Ministry.

Mr. van der Byl, before I start, I would like to compliment you on the manner in which you greeted the Friends of Rhodesian Independence, and the fact that you have had your Mr. Douglas Garner from the American desk to accompany us on our travels, and your excellent staff, including your Mr. Williams whom I've met. I'm certainly impressed. If this is the caliber of your Ministry, I know that we're in very good hands and certainly knowledgeable in affairs of America.

Mr. VAN DER BYL. Well, thank you very much. We have, I think, got very good people, and one of them is very well up to date in American affairs. I'm afraid, personally I'm rather behind in that I haven't been in America since 1948 when I was there and did a course at the Harvard Business School.

Mr. COTTEN. Mr. van der Byl, how can we draw upon your Ministry to help tell your story in our country?

Mr. VAN DER BYL. Well, we'd be very grateful if you would. We produce a large number of books and pamphlets and brochures, magazines, and films, etc., which give the background to mostly anything, but if there is ever any specific question which you would like to know about and publish the answer to, then of course, we'll always go into this in depth and in detail and give you the answer. Of course, as you probably know, we've also got an office in Washington, where one of my men, Mr. Hooper, is stationed and he can supply a good deal of this because he keeps supplies of our latest productions in his office.

Mr. COTTEN. He has done a splendid job. I have had the pleasure of meeting him on more than one occasion, and using one such film. I have seen the wonderful material you have. One brochure just issued today deals with the Chiefs in the Senate. That is one that I'm certainly hoping to share with my people in America. The African Chiefs were so obviously gentlemen, well representing their people in your Senate. A specific question, if I may? How is it possible that despite sanctions, there is every evidence in your country of prosperity and plenty?

Mr. VAN DER BYL. Well, we've got a large number of friends in the world of which I flatter myself, you are one. These people support us and would hate to see Rhodesia fall to the Communists or to encourage or foster Communism in this country. And this is a very real danger. You know the Chinese are moving into Africa to the north of us and are a threat toward us. We are extremely rich from a mineral and agricultural point of view and we have been able, because of the tremendous amount of energy and enterprise and initiative which our assumption of independence release here, which frankly, is at a level which no one ever expected really existed, that we've been able to switch to manufacturing a large number of things ourselves which formerly were imported. The number of new manufacturing corporations which have been instituted since our assumption of independence five years ago is probably in the region of four or five hundred.

Mr. COTTEN. I have been very impressed with this. You can't pick up a candy bar or any article without seeing "manufactured in Rhodesia". I have found paper mills as I traveled about your country, and so on. Surely, the sanctions have resulted in your becoming a very very independent and self-contained people, and obviously, as I drive down the streets and see the cars, you know, in America, we picture you not having gasoline, for instance, you virtually have traffic jams going outside of your key cities. The cars—I think you even manufacture or assemble some of the cars here, do you not?

Mr. VAN DER BYL. Yes, yes. We assemble them quite extensively—and as you can hear from the traffic at the moment, there really isn't any shortage of petrol.

Mr. COTTEN. We have to laugh at the sanctions, and must realize they have strengthened you. At the same time we are embarrassed by your government's role in this matter. Could you tell me, are there any specific steps that we should take to help Rhodesia? You are well aware of the steps our government has taken and well aware that they are answerable in measure to world opinion manifest in the United Nations. What as deeply concerned individuals, do you feel we can do?

Mr. VAN DER BYL. I think if every citizen of America realized that we in this country are the natural allies of America, that here in the southern part of Africa we're fighting, on a smaller scale, exactly the same type of war that you are fighting in Vietnam, and we would give you every support possible, if you were prepared to accept it. Now, of course, the initiators of the war in Vietnam, which of course are the Chinese Communists, are the very people who cause us to have terrorist incursions into this country from time to time. We put them down without much difficulty because they are far from their bases.

You, of course, in America have a much greater difficulty because you are fighting close to their bases and the task is very much harder. It seems to me the most absurd situation that where you've got a naturally friendly country and a friendly people such as we are, and where American interests own some of the best chrome mines in the world, that instead of buying your own chrome from Rhodesia at a reasonable price, America, or rather the policy of the American government, is that chrome should be bought instead from Russia because of the sanctions that are being levelled against Rhodesia. Russia is obviously not a friendly country to the United States of America, and chrome is an essential strategic material. Surely it is unwise, to say the least, to put yourselves in a position where you are reliant for a strategic and essential material which you now get from a country inimical to the American interest as opposed to America's own production in a country which is entirely friendly and well disposed towards America and asks nothing more than the banning of sanctions.

Mr. COTTEN. You express that wonderfully, Mr. Minister. Our people generally are now aware of this chrome situation. We did concentrate on it—Senator Strom Thurmond, Congressman John Rarick, Congressman Utt, many of the men in our government deeply concerned about this specific matter of "building bridges," so-called, to the Soviet at the very time that we deliberately turned our backs on our own industry within your nation. It is incomprehensible—the man in the street understands this, but of course, we may change administrations, but the policies seem to continue endlessly. We will make this point when we return, and we can strengthen our position by making it abundantly clear that you are in no manner an illegal regime nor a police state. Of course, those are the liberal phrases for you people in our controlled press.

Mr. VAN DER BYL. Well, I'd like to answer that because you are entirely correct in everything you say. I mean we are no more an illegal government than that of the United States of America. Our recent history is a repetition of what your country did two hundred years ago under George Washington and there really is substantially no difference whatsoever. With regard to the other point of being a police state, and this is of course the most absurd allegation that is made against us, in the whole of Rhodesia, there are 1,450 white policemen and 3,000 black policemen. In other words, 4,500 is the total police force of the entire country including those in entirely administrative positions dealing with the paper work and filing in the offices. To suggest that this is a police state frankly amuses us and we find very funny, if it wasn't so absurd.

Mr. COTTEN. I've had the opportunity today in an interview with your Minister of Law and Order to point out that that we now have a murder in our nation's capital—every 30 hours according to recent statistics. He pointed out that in the entire nation of Rhodesia and for the entire year the figure was substantially under 200. You are simply not a lawless people. I don't believe I've seen any evidence of arms on the police. I do see your people stopped by the traffic and the Africans handle it. I see no racial tensions—absolutely no evidence of it.

Mr. VAN DER BYL. You are entirely right. Our police are not armed except when they are actually engaged in fighting the terrorist bandits who come over from the north after they have been trained in Russia or China.

Mr. COTTEN. Mr. Minister, having seen this much of your country, I'm wonderfully impressed. I've seen your eastern highlands, and just came from the wonderful Victoria Falls, which I assure you could not be overacted. It is simply stupendous. How has tourism been affected? I know this is under your ministry, and I'm interested in helping to whatever degree I can.

Mr. VAN DER BYL. Well, this is a difficult question to answer. You can answer it both yes and no, because the fact of the matter is that our tourist inflow is rising at the rate of 10 to 11% per annum, which is extremely good, I think you will agree, and the position is that we are pushing on as hard as we can with development of amenities and things of that sort simply because at the moment we are tending to get as many tourists as we can cope with, but we want it to increase. I'm glad to say that a lot of visitors come from America and we're always delighted to see them, and the impression I have as I met a large number of them is that they get on very well here. They find no difficulty in getting on with the local population and they, generally speaking, enjoy themselves and get real value for their money. It is not our policy here, in fact, I'm entirely against any suggestion that the tourist industry should follow a policy which unfortunately is the case in some countries of trying to fleece American tourists. We want our American visitors to get the best value for their money in the world, and I think, by and large, this is what happens. Of course, tourism has been helped by the fact that we've been in the news, and I think particularly among American people, they see the point of view that by coming here they can in a way see their own history being repeated again in microcosm, and this naturally has an attraction apart from our normal tourist amenities.

But in other ways, of course, sanctions and all the rest of it has had an effect on slowing down this rate of increase which might well have been much higher. As you know, only two international air lines fly in here as a result of the United Nations sanctions. Incidentally, it is worthwhile knowing,

particularly for people in America, that we have in Salisbury the longest runway in the Southern Hemisphere. In other words we can take the jumbo jets and have masses of room to spare. There would be no difficulty at all if Pan American or TWA, or any other line, were to fly in here with the new jumbo jets, we can cope with it and we would be delighted to see them and we would be delighted to see hundreds—thousands—more Americans come here, because we find them the most agreeable and delightful visitors to entertain.

Mr. COTTEN. Mr. Minister, many Americans speak broadly, as they find big brother government closing in on them, of migrating to Rhodesia. Could you suggest a specific step that is necesasry to take were they to entertain this concept.

Mr. VAN DER BYL. Well, there are a number of steps. One of the best is to come out and have a look, and if having had a look and liked what you've seen, then there is nothing whatsoever to prevent you coming out and living here. Now where people have particular skills which we need in the national interest, in industry, or in scientific fields, and things of that sort, and many of the professions as well, we do have a scheme by which we assist in the cost of the passages from the country of origin to here. Now were it to be someone that is urgently needed in a particular type of job, then we bring him out and his family straight away. But when that's not the case, and the man, shall we say, comes out in his own, settles down, finds a job, and we of course, do everything we can to help him in conjunction with other ministries and with the private enterprise; and let us say he has found a job and settled down and decided he wants to bring his family out to join him, then we assist in the passages of the family as well.

But every sort of information as regards job opportunities, investment opportunities, and that sort of thing, can be obtained directly from the office in Washington, or by direct communication with the Ministry here where any query is dealt with as expeditiously and promptly as possible, and if again, there is some particular, complicated question we will answer it both in detail and in depth, as I said earlier on. We will do all we can to assist American people coming out and living here. We're delighted to welcome them.

Mr. COTTEN. With the broad development that goes on in Rhodesia, the fact that you are both agricultural and mining and goodness knows what, and rapidly expanding, there is virtually no field but what a man could relate. Is that correct?

Mr. VAN DER BYL. Yes, I'd say, by and large, that's absolutely correct. But of course, there could be certain highly technical people, such as nuclear physicists, for instance, or people who are experts such as in the space age, and say traveling to the moon, well, we have not quite got to that stage yet, but sir, anything short of that, there is certainly opportunity here.

Mr. COTTEN. Now might I ask as to the professional fields, are there many instances or any instances, where they are barred by virtue of qualifications, acceptance, and that type of thing?

Mr. VAN DER BYL. No, and what is accepted as proper qualifications in America would be accepted without question here—university degrees or trades union apprenticeship diplomas, or whatever thy are, are absolutely acceptable here. There would be no difficulty whatsoever. As you know, we speak the same language, which makes it easier still. In fact, it would be a little easier than it is for some of our other immigrants from other countries who have initially a certain amount of difficulty well known to America because so much of your population has come from Central Europe in the past. But they pick it up quite easily and in time the difficulties disappear, but from the point of view of the American, he has no difficulty whatsoever.

Mr. COTTEN. I think an important point we might make at this point, Mr. Minister, and it was news to me to recognize the extent, I interviewed a Carlo Gardini, an Italian immigrant in the building trades here whose family now builds many of your beautiful buildings. For every European employee, they hire approximately 19 Africans. In other words, it is because they came here that there is work for the Africans, instead of any concept of putting them out of business.

Mr. VAN DER BYL. That's absolutely correct. The greater number of European immigrants who come here, the more job opportunities immediately become available for the Africans. Now this, of course, is not simply in the realm of servants, and cooks, and things of that sort, but in the skilled and semi-skilled jobs as well, which is desperately necessary to build up the opportunity of economic advancement for the African population. This is one of the reasons why the European or white immigration is absolutely essential. We need the skills, professional and technical, to enable us to expand the economy so as to bring the African into the realm of proper economic opportunity.

Mr. COTTEN. Well, you're doing a splendid job in it. I was thrilled as an exjourneyman carpenter to see these men building a building. Your building standards are very high. Where we would have partitioned walls, you have solid walls of brick, your plumbing fixtures are good, your doors of hardwood, even solid, as opposed to our hollow core, and so on, really putting up a splendid building, and I would have to hunt to find a single European. Could you say that sanctions have really proven a blessing in disguise for your country?

Mr. VAN DER BYL. I would say yes. You see what we've had here is a position created deliberately by sanctions where we had to live entirely within our means. In other words, everything we buy has to be paid for by cash which we have to earn in terms of foreign currency by export. Now obviously, with sanctions being brought to bear on us, exports of certain commodities have been inhibited, and therefore there has been a certain shortage of foreign currency, with the result that we have been in the same situation as other countries which have created artificial tariff barriers in order to encourage the development of secondary industry. Now this has happened, and several hundred new manufacturing corporations making everything from the assembly of motor cars, right down to things such as pencils, jam, marmalade, and literally anything that you like to think of. It has given a most tremendous boost and boom to manufacturing, and as a result, the employment which has been generated in this way, has caused ripple effects into things such as housing, which we mentioned, and every kind of service. We have certain difficulties, and this is without the slightest doubt whatsoever, but by and large, it has, as I said before, released the most fantastic energy and enterprise—more so that we ever realized existed here, and more than anything, this has welded the country into a solid unified nation.

Mr. COTTEN. Mr. Minister, you made that point, made it well, and I think we should amplify it to this extent. It not only made Rhodesia one people, but that does not mean one European people and separately, one African people. You are truly one people, and it's quite remarkable to watch it operate. Your comments, if you would, on the unity of Rhodesians, black and white alike.

Mr. VAN DER BYL. Yes, but I'm often asked this question. You appreciate that it's very long and a very complicated one, but I'll try and answer it as quickly and succintly as possible. The fact is that there are two separate cultural peoples here—the African with his own culture, his custom, and his way of life which we do not attempt to destroy. We respect it and regard it in the friendliest possible way, and he has the similar regard for our own European way of life and custom which is very similar to that of yours in the United States of America; but there is also a common feeling of unity and loyalty to this country, Rhodesia, which shows itself in tremendous racial cooperation and friendship between the two races inside, and united and aggressive hostility to the enemy from without. Now this is very easily proven by the fact that we've had these terrorist incursions inspired and organized by the communists, and almost every single time that this has happened, it has been the local, rural African population who have warned the security forces, which incidentally are both black and white too, that incursion was taking place, and within the matter of hours, we're on to it and our troops go in and clean it up. It would have been impossible to do this unless we had a total unity and feeling of solidarity between both the races as regards any external threat. It has always been the local African population who have not only warned us, but very often actually take part in the fight themselves. One or two, unfortunately have lost their lives. But the most interesting thing of all was recently one lone terrorist left from an incursion of a long time ago was captured and brought to the proper local authorities by a schoolmaster—an African schoolmaster—and a large group of his African school children overpowered this terrorist and brought him to justice. Well, if that doesn't prove my point, nothing does.

Mr. COTTEN. Mr. Minister, it certainly should. In my own viewpoint, as I've watched subversive forces bring the world to the brink of destruction, seemingly bent upon a concept of one race, which of course, would be to me, in my terms, a mongrelized race, one nation which would be anti-God in its thinking, and one bank which seems to be the financial matter behind the thing, I see my own nation taking what to me are very serious steps toward a collectivist society. I've come here and I've found you turning more and more responsibilities back to the township. I compare the housing I found for the Africans in the townships, and find that's a local matter and they do pay for it. This is not simply public housing as we would have in the United States. Truly, I see you embarked on a program that I think makes sense, and shows your common sense, your dedication. Do you, indeed feel that you are at a crossroads in history, and if you do, and I'm speaking globally now—can you envision the future for Rhodesia, with all these mighty matters at stake?

Mr. VAN DER BYL. Yes, I think you're absolutely right. We're at the crossroads, and in a way it's a watershed, because I believe that though there may be certain modifications that we will have struck the correct answer to the problems of a dual racial society in one country. Nobody is victimized, nobody is treated as inferior to anybody else, but differences are recognized and respected on both sides. Now, of course, at the most primitive end in the tribal areas, there is a sort of communal attitude to life, and this is inherent in the African village life, and that sort of thing, but when he evolves out of that, which he does as he wants, at his own pace, (he's not forced to do anything), it is into a millieu of free enterprise that he moves, cause we are a country though we have social services in that no one is allowed to starve, or die, or suffer, because they can't afford medical attention; this is provided, when it's necessary: Nonetheless, we're a free enterprise economy and initiative and energy and enterprise are rewarded by the success which is inherent in a free enterprise economy, which is precisely what you've had in America, in the past, at any rate.

Mr. COTTEN. We did have it at one time. I have seen the evidence of this when the people from the tribal areas come to the city, they must find employment, and they must be able to pay rent. I went to one community last night with 65,000 in residence. I saw no evidence of police, no evidence of breakage, I saw well-tended places, I saw a beer garden where I believe 3,000 drink beer at one time, and no evidence or any mishandling, mistreatment, hatred, etc. But these people, in turn, had to take their place in terms of the economic structure of the community. Is that correct?

Mr. VAN DER BYL. Oh yes, they have. You see it's a tremendously rich country. There is an enormous potential and an enormous future. We haven't really, in spite of the evidence you see of prosperity and buildings and mining production and agricultural production, all the rest, we haven't yet really scratched the potential of this country. We're in the position here that America was in the 1870's, a hundred years ago, is probably analagous to what we're in now, and I don't need to tell you what's happened since then in the way of the tremendous expansion and opportunity in the United States of America. This is the position that we're in, so if anyone wants to get in on the ground floor, and they wished that they lived in the 1870's because of the opportunities that existed in America then, why I can't tell them is in existence here in Rhodesia right now.

Mr. COTTEN. Mr. Minister, I thank you for this interview and hope I can be instrumental in interesting Americans in migrating to your country. I do believe one of my sons is going to come to your country very soon with a view to making it his home. I would like to have grandchildren born in your nation.

Mr. VAN DER BYL. Well, we'll be delighted to have them.

MR. J. H. HOWMAN, MINISTER OF DEFENSE AND FOREIGN AFFAIRS

Mr. COTTEN. Today's interview is with the Minister of Foreign Affairs and Defense, a mightly impressive responsibility. It would be equivalent in our country to both the Secretary of Defense, and the Secretary of State. This is a Mr. John Howman who quite obviously would rather be called Jack. Am I correct?

Mr. HOWMAN. Commonly called Jack Howman.

Mr. COTTEN. All right. Well, thank you. Could you tell us something of your own background as a Rhodesian?

Mr. HOWMAN. Well, I was born and bred here, Mr. Cotten. My father came up in the days of the pioneers. You know, this country was opened up much like the Western side of the United States—the great booming, clearing out of the buffalo, the spreading waves to the west. This country was occupied in much the same form. This was in 1890. He came up in 1896, and we have lived here ever since. I've been born and bred here, my wife has, and my children, they have too.

Mr. COTTEN. Well, that's a wonderful background of history. I guess some people from the great trek are still living. Is that correct?

Mr. HOWMAN. They're mostly dying out now. There are still a few—still a few old timers that knew the very beginnings, but they were small children then, of course.

Mr. COTTEN. Yes, they would have been.

Mr. HOWMAN. When you think of it, that it's only about 80 years ago now that the first white man really began to settle in and occupy Rhodesia, and this is why we're rather proud of what we've done in a little over 80 years.

Mr. COTTEN. You've done a miracle, and the fact that you even exist now, with world opinion fighting you as it is, and I might say so unfairly. As the Minister of Defense, I'm particularly interested, and I think our people would be, I don't mean military secrets, but I've seen your army, you have both the Africans and the Europeans, and would you tell us a bit of what you do in terms of subversive forces, the size of the encounter, and that sort of thing.

Mr. HOWMAN. I don't think I had better mention sizes of forces. Otherwise, I would be in serious trouble. But we have a very compact, very effective defense forces. We talk of defense, because we have no extra-territorial ambitions. We are not a threat to anybody at all. Our forces are balanced purely to defend Rhodesia. They consist of an army and an air force, small in size, compact in size, very effective for the operations that they have to face, which of course, are in support of the civil power, that is to say the police are the first order of law, and maintenance of law and order throughout the country, and we operate in support of the police. You are thinking, of course, of the terrorist incursions that we've had in the last few years. These have come across our borders. We've effectively met and overcome every incursion that has entered into Rhodesia, and I've no doubt of our capacity to meet any similar threat in the future. We have built up an army that is, I think I can say—I hope I'm not sounding boastful—second to none in how to meet, and how to operate in bush country, that is to say, in really unoccupied hard terrain, second to none in the capacity to live in the bush, to fight in the bush, and to survive in the bush. And our air force, of course, plays a tremendously important part, too, in cooperation with the army. There is a great sense of camaraderie and a sense of mission amongst all our forces, and of course, this is the strength of Rhodesia. Then allied and behind the regular forces, which I say are small, but efficient, is the whole of the defense, the territorial defense forces of all Rhodesia. That's to say all the young men, anybody over the age of 18 is liable to serve, called up for service, and he does nine months training initially. He does three months of that in learning the very basis of military training. He then does the remainder of his service patrolling, protecting the borders with army. So that every young man in Rhodesia plays a full part in the defense of Rhodesia. And of course, we have enormous advantage from this. There's no problems with the young people of Rhodesia. There is a sense of purpose, a sense of association with what we are, the whole country a sense of unity, a sense of purpose, a sense of mission. And this runs right through our young people in these days when the world seems to be in a state of anarchy and a state of confusion where the young folks in many parts of the world don't know where they are or what they are doing, or what they belong to. This we don't have.

Mr. COTTEN. Now, I've noticed that you have both the Africans and the European forces working in perfect harmony with one another, and I believe you have some great traditions in Rhodesia of that harmony and effectiveness. I believe you fought some of our battles for us in World War II, if I'm correct.

Mr. HOWMAN. Yes, indeed. In fact, it's a strange anomaly that Rhodesians played not an insignificant part in putting Emperor Haile Selassie back as Emperor of Ethiopia. We were there at the time, and we were greatly welcomed and nowadays, it seems a little bit unfortunate that we should be condemned from those sources. I personally was up at Abyssinia, as it used to be called, and we were in Burma, too, and I had quite a close association with some of your American forces there. You remember General Vinegar Joe?

Mr. COTTEN. Very well.

Mr. HOWMAN. Well, he came down the Irrawaddy and I was amongst the African forces from here. A lot of our people served in East Africa. A lot of Rhodesians like myself helped to officer the King's African Rifles, the African regiments up there, and I served in Burma at the time, and it was there when eventually we crossed into Burma which led to the defeat of Japan.

Mr. COTTEN. What an incredible situation we find ourselves in. May I pose a question, and your comments, you are not only Minister of Defense, but also Minister of Foreign affairs. You do find terrorists coming in, they do have weapons which are communist weapons, clearly.

Mr. HOWMAN. Yes. All Communist weapons.

Mr. COTTEN. The same weapons we are finding in the terrorists of the Viet Cong.

Mr. HOWMAN. Yes.

Mr. COTTEN. Our boys die at the hands of the same force that your boys would die at if your terrorists were successful, and yet, in the matter of trade, we cut off trade with you, will not buy your chrome, which we need, incidentally, which is owned by American firms, as I understand, and yet we will trade with the Soviets. Now this to me is insanity. I assume it is to you, but your comments, if you would please.

Mr. HOWMAN. To me it is tremendously tragic situation that this should be. You are quite right in saying the arms of Viet Cong—these arms the very latest that we find are the same ones that your lads meet in Vietnam, and incidentally, a number of Rhodesians have died with these weapons. We haven't escaped unscathed in any of these operations, but this is the price we pay for the defense of our country. But it is to me a tragic situation that we, as we believe firmly a Western Christian civilization, should find ourselves at odds with your great country. We have much more to contribute to the world than bickering between your country and my country. We have a great civilizing mission to perform in Africa as a whole, and the thought that we are fighting people with the same weapons that your own lads are fighting, and yet we're at odds behind their backs, is a tragic one that I think is most unfortunate.

Mr. COTTEN. Mr. Minister, the grass roots people in America who have looked into this at all of course share that feeling. Unfortunately, thus far we have been a silent so-called majority, although because of these interviews and their outreach we'll hope to correct that situation. A lot of this is news to me. I expected to find you people rationed, as we were in war time. After all, you have sanctions, the civilized world has cut you off from trade, etc., etc. Now, you as Minister of Foreign Affairs, I assume it is part of your responsibility to endeavor to maintain relationships with other governments. I see nothing but a land of plenty. I see streets full of cars, shops full of merchandise, and I can't help but think that sanctions have strengthened you as a nation.

Mr. HOWMAN. This is perfectly true. Of course, it mustn't be forgotten that Rhodesia has run herself as an independent country really from the time of our very creation, way back 80 years ago. We started, as you probably know, under a commercial company rather like the Hudson Bay Company that was the predecessor of the Dominion of Canada. We started in the same fashion, and we've been self-governing since 1923, so we've run our affairs, run our own business, as it were, without hindrance from any other country. So there is no question about capacity to continue to govern and to have a lively and happy country. You are quite right in saying that you see no shortages. We have our problems, of course. There's obviously these impediments in our trade and the antagonism shown towards us from the many countries in the world. All these don't help, but the fact remains that we have a great

many more friends in the world, even nations, than they like to admit. There are a great number of countries in the world, that have the utmost good will for us, not merely the plain man that you referred to a moment ago, but governments, too. And we maintain links. We're not alone. We're not without friends, and these I think are building all the time. We're getting stronger and better as we go.

Mr. COTTEN. Mr. Minister, I see every evidence of a building boom—high rise buildings, beautifully done, and I point with pride to the fact that for one European you appear to hire approximately 19 Africans in the building of the buildings. Could you comment—I believe it's obvious, but we might repeat it—that the sanctions designed to hurt the European have actually acted to hurt the African because you can't employ him if you don't have the materials to expand your economy.

Mr. HOWMAN. This is so, I think perhaps the greatest single example of how the African is hurt in the imposition of sanction was in our tobacco industry. As you know, we produce some of the finest tobacco in the world and the most competent industry. Of course, a great amount of that tobacco is bought by Britain. Now that, of course, was cut off by the British, and has never been replaced. Now a tremendous amount of the labor counted in the production of tobacco is of the African people, and naturally with this cutback in the growing of tobacco is directly affecting the employment of those African people, and they have suffered. Again the limitations of our growth, and it hasn't been as spectacular as we would like it to be. It still has been spectacular, but still not its full potential. This has not created the job potential—the job opportunities that it should and, of course, the African people form a tremendous part of the labor, so they suffer where there is not the job opportunity. So really it is true to say that it is the African who has suffered more than the European. That's no cause for satisfaction to us, I may say, because of course the greater the employment opportunities that you have for our Africans, the greater their happiness as well. They resent sanctions as much as anybody.

Mr. COTTEN. Would you care to send any personal message to the American people?

Mr. HOWMAN. Well, I simply hope that you will continue to extend the same good will towards us as the ordinary American people have done in the past, and I hope we will be able to continue to supply you with the things that you want. You mentioned chrome. We've got it, you want it. I don't see why anybody should try to impede it.

Mr. COTTEN. Maybe we can make this a major point in the platform of the men who run for election this fall, because surely, who would want to elect a Congressman who couldn't understand a situation as simple as this. Thank you again, Mr. Minister.

MR. D. W. LARDNER-BURKE, MINISTER OF LAW AND ORDER

Mr. COTTEN. Today I have the opportunity to interview the Minister of Law and Order, Mr. Lardner-Burke. Many of you did share in many of the findings of Congressman John Rarick, when he was here in Rhodesia. This is the same gentleman who has some relationship to the terrorists. He will speak on that in just a minute. I should think that we might start the interview, Mr. Lardner-Burke, by commenting that in my capital in the United States of America, where police are armed, although frequently not permitted to use their arms intelligently, we are now at the point where we have a murder every 30 hours. Our crime rate, of course, is greatly accelerating. Here I have not even seen the evidence of arms among the police. Would you speak for a few minutes, if you would please, on crime conditions in Rhodesia, where I believe you are outnumbered 16 to one African to European.

Mr. LARDNER-BURKE. That is perfectly true, but the relationship between the Europeans and the Africans is good. You were talking about murder, well last year, we had for the whole of Rhodesia, that is for over five million population, a total number of murders of 176 during the whole year. As far as the crime is concerned, I can assure you that over the last three years, there has been a drop in crime of an average of 15%. As far as assaults are concerned, that has gone down 28%, and the amount of cases that were reported last year as compared with 1968, has dropped, I think, by 15%, indicating that the population are perfectly happy with the way we are living, and are pleased with government that has been able to bring back tranquility into their lives and to allow them to sleep well at night, which they couldn't do during the initial start of the terrorism when we had the local upsets as far as the nationalists were concerned.

Mr. COTTEN. Mr. Burke, yesterday I had the opportunity to visit some of your townships in and around Salisbury. I saw one community, I believe, with as many as 65,000 Africans. I also saw the beer garden and gather that is a very important function in their activities, and yet I saw no evidence of police, no evidence of breakage, or disorder. I saw a gentle people, seemingly completely in harmony with the European community. This is so obviously inconsistent with what we have in America, where the hatred between races has been generated. Could you comment upon how this has come about, please.

Mr. LARDNER-BURKE. Yes, Mr. Cotten. If I go back to around about 1963–64, when we had quite a lot of internal trouble here when the national factions were arguing amongst themselves, one never saw a sporting fixture because the nationalists used to intimidate these Africans and make them go to a nearby field, for instance, to have a political meeting, and this would end up in riots, etc. Today, with having established law and order in the country, by firm but just means, we now find that we have international soccer teams. For instance, Clyde and another Scottish team have visited Rhodesia. They have played soccer right through the country, and in Salisbury, we have an enormous stadium, which holds about 20 to 30 thousand people, and again there we will see it packed and 90% of them will be Africans, 10% will be European. The team is a combination of Africans and Europeans, and we have a wonderful spirit of sportsmanship. We don't have any police around. They are completely happy, and after the game, we don't even have any fighting. They go home quietly. We also found that by being able to control these terrorists, people were frightened to go home at night because of being assaulted. They were also frightened to leave their homes because their families would be assaulted. Today they go home every night, enjoy their home life, they can go to the beer gardens, they can go to entertainment, and they have no fear whatsoever of being intimidated, or of being assaulted. And this has come about as a result of government's action, but in my opinion, because of the cooperation of the African population of this country who wish to live in peace. They have nothing against the European, the average African, and know they must live with the European to have a happy country. This is what has been brought about by the actions taken by the Rhodesian government.

Mr. COTTEN. Mr. Lardner-Burke, I would like to point out that in our nation's capital now, where rape is rampant, the situation exists as this. The victim would still be on the way to the hospital, when and if the culprit were apprehended by the police, he would be released under the Bail Reform Act. This is the principle that says you are innocent until proven guilty. He does not have money for his own bail or a lawyer, so by Act of Congress, if you please, he is immediately released. He is free on bail until tried, and his trial, because of the crowded conditions in the court, might well be two or three years away. This means he returns to rape and pillage. We naturally, as citizens, don't like it. We think in terms of constitutional processes. We realize somehow we are victims. Now I do know that your government has come under criticism relative to detention. I wonder if you would share with us your concept of why detention, and how it does relate to keeping the peace.

Mr. LARDNER-BURKE. Well, I think I had better start first of all on your question of the bail. We originally had exactly the same concept as you, and we still have that concept of an individual is innocent until he is proven guilty, but we found that, like you have mentioned here, when he is given bail, the individual was perpetrating similar criminal acts after he had been let out. So it is now entirely to the discretion of the magistrate or the high court as to whether bail is given, and a certificate by our attorney general, can influence the position. If we feel that there is a likelihood of again perpetrating such a criminal action, we oppose bail, and the courts will agree with us, but this doesn't mean that they are put into prison. They are what they call remand prisoners who have privileges. They are not prisoners, and they are just held there for the benefit or for the security of the other population. Now, this is on the ordinary crime, but as far as the detention is concerned, that is an entirely different point of view. Detention is being put away, to take out of circulation these agitators, these intimidators, these subversionists which we have been putting up, who cause the riots and cause the murders and the rapes, and the arsons, and where given example of what action we take in this nature. I can give you a case of two who were accused of petrol bombing, and other bombing of certain premises. They had admitted that they had done it to the police, but when they were brought to court, and we always try to bring cases to court as soon as possible, because there was a technicality, a legal technicality, the courts found them not guilty. But they had admitted having done it, so therefore I, as the Minister of Law and Order, felt that I could not allow these people to be free on the public because the same things would have happened, and if anybody had been killed, I personally would be morally responsible for his death, and as a result I detained them. And this other one where we have people who are helping the terrorists who are coming out here, backed by Communist countries, by the OAU, and by the Chinese, where they come over fully armed with communists weapons, very sophisticated weapons, we do find that some of the tribesmen help them, harbor them, and that sort of thing. Well, in that case, we do detain them because of the threat to the law-abiding people, and I feel that this is not against justice. They are only there for a temporary manner. I can give you an example at one stage when the trouble was really rough, I think we had 600-odd people in detention. Today, the count is, I think 102, and I can assure you that within the next two or three months, I have papers before me to release another 60, so that by the end of the year, I should say that we would only have 40 or 50 in detention in respect of these actions.

Mr. COTTEN. I have just returned from the area around Victoria Falls, and I find, of course, that is patrolled because of the likelihood of the terrorists coming in from adjoining—what is it, Zambia?

Mr. LARDNER-BURKE. Zambia.

Mr. COTTEN. And I do find that your mili-

tary is composed in large measure of Africans, enormously loyal to Rhodesia, just a beautiful thing to see, disciplined and proud, and could you speak on that just a little bit, the composition of the forces that do maintain your borders.

Mr. LARDNER-BURKE. Well, you realize that this is not my portfolio. That is the Minister of Defense's but I know the position. We have police who are doing the patrolling there, supported by the army, which consists of Europeans and Africans, most loyal individuals and most highly trained individuals. The Africans themselves are magnificent soldiers, and they have been in action against these terrorists on various occasions, and they have equipped themselves very well indeed, and have shown exactly what good soldiers they are, and how loyal they are to the country. We support the African troops. They are called the Rhodesian African Rifles, and these people are well trained and actually now unless you are a relation, it is difficult to get into the army. They are so keen to get in there, but we are able to pick and choose to the numbers we are able to keep in uniform.

Mr. COTTEN. You make an excellent point, Will you help my people picture your nation which is relatively large and you have three large cities, I believe, and under that various townships, and so on. How does your force of law and order relate to the town, the city, and the nation as a whole?

Mr. LARDNER-BURKE. Well, we have only one police force. That is a Rhodesian Police Force. It's called the British South Africa Police from the traditional days when the Charter Company took over Rhodesia before the turn of the century, and this name has stuck. Now these are composed of Africans and Europeans, and these people work as one force. They go into the areas. They are allowed in either area—there is no question of the African only going into the African areas and the European into the European. They are allowed in both and they maintain the law and order. I'd love your people to see on every week day when going to work, motor cars are stopped by African policemen to allow school children to pass across the road, so that they can get from the one side to their schools. Everybody obeys them, they take our African policeman as the instrument of maintaining law and order, and they obey their instructions, and I think if your people could see this, I'm for certain they would be so pleasantly surprised and would have nothing against Rhodesia. They would support us to the hilt in our fight against the British.

Mr. COTTEN. I'm sure you know, Mr. Burke, that the average American—the so-called silent majority—given the facts, would conclude as you so obviously do. I have been enormously impressed with everything I have seen in Rhodesia, traveling as I am with the Friends of Rhodesian Independence, a group of some 30. We have been feted beyond our wildest dreams, and I keep looking for any evidence of repression. I think we haven't seen it. Yesterday I had the opportunity to interview two of your African senators who were so impressed with some of the thoughts I shared with them—this is a vanity on my part—today they want me to meet all the African senators with a view of getting a message to our President. I asked them one question quite pointedly. Is there anyone among your people who would like the Europeans to leave, and they were most emphatic. There was no such thought at all. Is this the correct impression?

Mr. LARDNER-BURKE. This is completely correct. You will also see this from the point of view of the government's attitude, that when we as a government came in at the end of 1962, there had been an endeavor on the part of the previous government to play down the importance of the chiefs. But we realized that they are the traditional leaders of their people, and that they should have the backing of the government to the full of everything that they do, and this we have set about to do, and that is the reason that we felt that when we communicated with the chiefs that they should be a portion of the government, and that is why our new constitution provides that in the Senate we have 10 chiefs who are appointed by the council of chiefs. In other words, they appoint themselves at no government direction, and these people sit with the 13 European members, and as far as I'm concerned, the experiment is going extremely well. We have only just started this under the new constitution, you realize. I had the honor to be able to appear before the Senate the day before yesterday to reply to certain debates that had taken place, and I was most impressed with the dignity of the Senate, and the capabilities of the Senator chiefs who have been appointed, and they realize that they are the leaders, and they lead in a most democratic manner. We being here, we have heard so many times as far as the British and their constitution for Rhodesia was concerned, of this one man one vote, because that is the only way you can have democracy, but the tribal people work in a much better type of democracy. They all come around the chiefs and talk, the elders, the heads, and when they have come to the conclusion, the majority vote carries, sway. Whether a man objects or not, if the majority accepts that, then that is the wish, and the chief will implement it. So this I think is democracy working much better than any of our Western alleged democracies of one man one vote.

Mr. COTTEN. Well, it certainly is a representative government which ours purportedly would be. We fight the word "democracy" a bit to distinguish from "republic" which we think of in terms of representative government. But surely here what you have done instead of having a mob action with everybody shouting and pressuring the President, as we are getting in America, you truly have representation which in turn is theirs to select. Is that correct?

Mr. LARDNER-BURKE. That is correct. But we have only been merely talking about the Senate for a moment, but in our House of Assembly, we have made provision for the African, that is the one who is on the voter's roll to return his eight members by ordinary democratic matters by voting on a voting paper, but as far as the tribal trust people are concerned we feel that they are not educated enough to appreciate this. So we have made it into an electoral college basis, whereby the districts are divided and the chiefs, the headmen, and the members of the African councils which operate in the district, then a citizen electoral college and send to the House of Assembly their representative for that African tribal district. so that we have in the House now eight Africans representing more or less the urban areas and we have eight representing the rural areas which are the tribal trust, which have far the biggest number of Africans in the country. They far outweigh the urban Africans, and as a result, we are not getting the African point of view put over in the assembly from the people who live in those conditions and know exactly what is wanted, and I think that this is a magnificent step forward, because otherwise the African was being represented by the people who could talk most and who could bluff the people most.

Mr. COTTEN. I believe it's working beautifully. I trust that the American people will realize the implication of this, recognizing that we have been told falsely about conditions in Rhodesia, and we in turn, will bring a little pressure on our representatives to try to get the sanctions lifted. It was very kind of you to grant the interview. I assure you that America, in our hearts, know that you are right, and the day will come when these sanctions will be lifted, and we'll be restored to normal relationship with your wonderful government. Thank you again, Mr. Lardner-Burke.

MR. RICHARD PLOWDEN, UNDER SECRETARY—MINISTER OF INTERNAL AFFAIRS

Mr. COTTEN. Today I have the opportunity of bringing a very important gentleman to you, Mr. Richard Plowden, rather a long title but it also describes a very important mission; he is the Under Secretary in charge of the Department responsible for the information from the Government of the African people and vice versa. On his shoulders rests an enormous responsibility.

Mr. Plowden, may I introduce you to the Conservative Viewpoint audience.

Mr. PLOWDEN. Thank you Richard Cotten, it's a great pleasure for me to have you here and like all Americans, we welcome you and in particular for yourself, and we know what you are doing for our country in America.

Mr. COTTEN. Thank you Mr. Plowden. I think we had better get right to it, time is going to go all too short. I have learned so much from you. I thought I knew something about your country before I got here and I learned that I was absolutely a babe in woods. The early administration of the African tribes and their land and all I am sure would interest our people greatly.

Mr. PLOWDEN. Well, as you know the country was occupied by the Pioneer Column which operated under the B.S.A. Company, the British South Africa Company, and the first administrators appointed by this Company were given a very few simple instructions, principally these were, to go out into what was then known as Rhodesia, explore it, discover where the African people were living, study their language and their customs and above all, protect them from being exploited by the worse type of White man that may come in later on into the country.

Now, this was the foundation of the whole administration of this country from that day to this, in that, once the people were located their territory and their land as well as their customs was protected and this has resulted in the fact that, the African living under his own system in his own areas has been protected under every Constitution under which we have lived in Rhodesia since those early days. The European or White man in this country has always come here to live and to stay and to raise his children and to develop the country, he has had to do this with his own resources knowing that his fellow Black Rhodesian has been protected in these customs and his way of life.

Now, the African in Rhodesia has always lived under a social system based on very strong family ties with the head of the family being the oldest male person living in it, normally speaking this would be the grandfather, but each of his sons are the heads of their own families.

Now, they live in villages large and small some consisting of many hundreds of people and others consisting of only a handful of people, but each village has its own freely elected village head to whom the families living in that village take their problems, if he is unable to solve these problems for them, he can then take the parties up to the next step of the ladder which is a Headman.

On April 28, 1970, the 26-man Council of Chiefs met in Seke Tribal Trust Land outside Salisbury to elect 10 of their number—five from Mashonaland and five from Matabeleland—to the Rhodesian Senate.

The 10 Chiefs chosen to go forward as Senators are all men of wide experience and ability, and several of them have travelled extensively overseas. They will undoubtedly make a valuable contribution to the affairs of state.

Chief Kayisa (54) is from Ntabazinduna Tribal Trust Land in the Bubi District. He

was made a chief in 1941 and appointed to the Council in 1960. He was a member of the Constitutional Council since 1961 and is chairman of Ntabazinduna African Council. He holds the Queen's Medal for Chiefs. Chief Kayisa has 11 children.

Chief Seke (49) is from Seke Tribal Trust Land in the Goromonzi District. He was appointed a chief in 1965 and appointed to the Council in 1968. He is Vice President of Seke African Council and has 10 children.

Chief Mafala (42) is from Runde Tribal Trust Land in the Shabani District. He was made a chief in 1959 and appointed to the Council in 1960. He went on the 1964 chiefs' tour to India, Pakistan and Britain. He has nine children.

Chief Sogwala (60) is from Lower Gwelo Tribal Trust Land in the Gwelo District. He was made a chief in 1956 and appointed to the Council in 1960. He was awarded the Queen's Medal during the Queen Mother's visit to Rhodesia in 1953. He has 12 children.

Chief Chirau (47) is from Zwimba Tribal Trust Land in the Sinoia District. He was made a chief in 1961 and appointed to the Council in 1968. He has 10 children.

Chief Mugabe (39), the youngest chief in the Senate, is from Victoria Tribal Trust Land in the Victoria District. He succeeded to the chieftainship in 1965 and was appointed to the Council in 1968. He was a member of the Tribal Trust Land Board until 1968 and was a member of the 1965 chiefs' tour in Europe and Britain. He has nine children.

Chief Mzimuni (60) is from Matshetshe Tribal Trust Land in the Gwanda District. He was made a chief in 1934 and appointed to the Council of Chiefs on its inception in 1960. He holds the Queens' Medal for Chiefs, the Coronation Medal, the Queen's Medal and the Bledisloe Medal for Land Husbandry. He is chairman of Matshetshe African Council.

Chief Mzimuni went on both the overseas tours by Rhodesian chiefs in 1964 and 1965. During the second World War his people raised money to contribute toward the cost of a Spitfire fighter aircraft for the Royal air force. In 1958 they gave 600 head of cattle to the new University College of Rhodesia and Nyasaland. He has four children.

Chief Mazungunye (53) is from Bikita Tribal Trust Land in the Bikita District. He was made a chief in 1965 and appointed to the Council in 1968. He has eleven children.

Chief Ngorima (43) is from Ngorima Tribal Trust Land in the Melsetter District. He succeeded to the chieftainship in 1956 and was appointed to the Council in 1960. He was a member of both chiefs' overseas tours. He has 15 children.

Chief Sigola (64) is from Umzingwane Tribal Trust Land in the Essexvale District. He was made a chief in 1945 and appointed to the Council in 1960. He was awarded the MBE in 1961 and also holds the Queen's Medal for Chiefs and the Bledisloe Medal.

Chief Spigola was a member of the Monckton Commission in 1960, the Whaley Commission in 1967–68 and is a former member of the Tribal Trust Land Board and the Natural Resources Board.

In 1965 he accompanied the Prime Minister, Mr. Ian Smith, to Britain to attend the funeral of Sir Winston Churchill. He has ten children.

It was through the efforts of the two Chiefs, Chief Sigola, and Chief Chirau, that your Editor had the opportunity to meet with these men, not once but on several occasions. As with one voice—and realize that they are truly "representative" of their people—they would ask why our nation would align itself with the evil forces that send the terrorists among them. They ask that our people come see for themselves, visit in the Tribal Trust Lands and see that they are a happy people, these African Rhodesians, and that African and European alike, they believe in Rhodesia. They full well know that the sanctions have made it very difficult for the country to grow as it would have grown without the sanctions.

Your editor had an opportunity to tell these chiefs something of conditions in Washington, D.C. They cannot imagine rampant illegitimacy and lack of basic morality. They quite properly ask, in effect, "Is this the nation that would tell us how to run our country?"

Now, a Headman is a man whom we tended to ignore in this country until his existence was confirmed by a very wise and expert American gentleman who came here to carry out a survey at the request of our Government in the late 50's and early 60's, this was Doctor Jimmy Green who was a member of A.I.D. and he was asked to come out here and look into the social system of the administration of the African people. Going on beyond the Headman we have a system of Chiefs.

Now, the Chiefs in Rhodesia are selected by their people on a hereditary basis it is quite true, but also on a semi-democratic basis in that, the majority of the Chiefs stem from a system of Houses. These Houses are the royal families being the descendants on the male side of the original Chief of the tribe and as a Chief dies so the inheritant passes to the next House down the line. Sometimes it takes many years before the people themselves decide on who their next Chief should be. Normally speaking it is the oldest surviving member of that particular House who is appointed the Chief by the people. Once of course the people have appointed their chief all we do from the Government and the administration side, is to recognize the wishes of the people and we then deal with them through their own appointed leader who they have chosen. This, of course, is different to the British Colonial system of which I am quite conversant having come from Britain, and I have been over there on courses at Universities with British Colonial officials in the past. There the tendency was to select a good man particularly if he was an ex-Government official, make him Chief and put him in charge or over people who may not belong to his own family group or even his own tribe and this tended for very bad administration. Secondly, in Rhodesia we have always worked with the Chiefs and through the Chiefs we have not tried to set them up as a separate Government nor have we made them part of the Governmental democratic party political machine. The situation now is that the Chiefs in Rhodesia who number well over 250 are the true representatives of all the Rhodesian Black people of this country, even those living in the townships and urban complexes surrounding our cities, all acknowledge the Chief to be the head of their particular family and clan.

Now, these Chiefs themselves elect on a regional basis, members who form the 26 man Chief's Council which it is the body the Government advises and negotiates with on any change in the Constitution. Our recent Republican Constitution has entrenched the position of the Chiefs even further by acceding to their wishes and permitting the Chiefs' Council to elect 10 of their members to sit in the Senate, the Upper House of the new Republican Constitution which is a 23 person House. The present Senate which is the first in Rhodesia, consists of these 10 African Chiefs and 13 White people of which 10 have been elected, 2 of them are women, 8 men therefore and 2 women and 3 are appointed by the President of the country. So we now have the system where the Chiefs can take part as their proper truly democratically recognized leaders of the people in any deliberations concerning our country.

Now, I mentioned earlier Doctor Jimmy Green. When he came to Rhodesia we asked him to look into our system of administration which at that time consisted in the Tribal Trust Lands, that part of the country I have already explained which was already occupied by the African people when we first came here and which have been enshrined in the Constitutions. We asked him to find out if we were going wrong in our human relations side in dealing with these people and he pinpointed various weaknesses in our system, the main weakness he discovered was that as a Government operating on a strict rigid central Government system working from the top downwards we were doing far too much for these people in the development spheres of their life, in other words, we tended to take upon ourselves everything that we could do for them and he proposed a purely voluntary system of community development and he first of all instituted a research programme which took two or three years to complete to find out what constituted a community and after that the Government has continued with its programme of encouraging these people within the community to do things for themselves. Of course side by side with this development people living in the European rural areas have also carried out a system of community development leading up to a local government and in the African Tribal Trust Lands there is provision for them to form their own local governments as well when they reach that stage. I can not emphasize too strongly that this has not been forced on the people, but in the meanwhile whilst they are deciding whether they wish to do these things for themselves or not, of course we maintain all the essential services already provided in these areas for them.

Mr. COTTEN. Mr. Plowden, time necessitates my interrupting this interview but if you would be kind enough we will certainly continue in similar vein another broadcast tomorrow. I know your message is getting through to our people in America and I am deeply appreciative of you sharing this time with our audience.

Mr. COTTEN. Yesterday and continued today, we share an interview with Mr. Richard Plowden, a very unique person with an enormous responsibility. He is, and there is no way to make the title shorter and be properly descriptive, the Under Secretary in charge of the Department responsible for the information from the Government to the African people and back from the African people to the Government, an enormous responsibility. Obviously he is a linguist of immense patience and talent and from the evidence of my own eyes I know he is highly respected by the African Chiefs.

Mr. Plowden, I wonder if you would share with our audience the background of these Chiefs, are they a one people, two people, when did they come to the land, how do they get along with each other, and the things of that nature.

Mr. PLOWDEN. Thank you, Richard, it is very nice to be with you again this evening. The Chiefs and the African people of Rhodesia are really three separate ethnic groups, there are two large ones and one small one. The small one are the Batonka who live along the northern part of Rhodesia but the two larger ones are known as the Shona and the Matabele. The former were known to come to Rhodesia when it was unoccupied, except by a few Bushmen and of course all the wild animals that were here in those days in the last 3 or 4 hundred years.

They moved in here slowly and settled by family groups all over the country. The Matabele passed through Rhodesia at the same time and were part of the Zulu nation of South Africa, from which nation they broke away in the last century, prior to the Pioneers coming into Rhodesia and having broken away from the Zulu nation under

their leader, one Mzilikazi. They came into the southwest corner of Rhodesia and conquered the Shona people who were living there. The Matabele speak a totally different language to the Shona, the latter's language is actually connected grammatically with the language of the people of Africa stretching from Rhodesia as far north as Kenya along the East Coast.

The Matabele organized themselves as a warlike nation and actually terrorized the more peaceful Shona people. However, with the arrival of the Pioneer Column here law and order between these two language speaking groups was maintained by the Pioneers and today both groups remain very friendly. As a matter of fact, you will remember you entertained to lunch a Matabele Chief and a Shona Chief.

Mr. COTTEN. Yes, I did and I well recall asking them if there were any of the Chiefs who would like to see the Europeans leave and I got a very emphatic reply there were none according to these Chiefs, who would not even entertain the idea, that's the last thing they were wanting, is that correct?

Mr. PLOWDEN. That you are quite correct there, Richard, in fact, the existence of these two main language speaking groups is recognized not only by themselves but by the Government of this country, and you may recall that in an earlier interview, I spoke about the ten Chiefs in the Senate, well, five of those come from Mashonaland that part of the country in which the majority of the Shona speaking people live, and five are elected by the Matabele Chiefs from what we call Matabeleland. They worked extremely harmoniously together in their trips overseas to different countries in 1964 and 1965, both lots of Chiefs went together and learned and worked and were very good ambassadors for this country together.

We find that although there are differences in their language and background and some cases in their customs, they are very appreciative of the technological achievements of the White Rhodesians in this country and encourage their people to learn as much as they can, but when working with our own African people in industry and so on, we find they prefer to work in groups under their own leader rather than individually at a sort of particular assembly line job. This is all part of their custom because in their own Tribal Trust Lands if a man's fields are ready to be reaped he calls all his neighbors together, he throws a big beer party for them, they brew their own beer and everybody comes along and gives a hand, so this is the way they like to work as well.

We find particularly since the terrorists have attempted to invade our country, that this has helped to unite both the White Rhodesians and the Black Rhodesians and also to unite the Matabele and the Shona people together, anybody would do this when it comes to defending their own country and this, all people of Rhodesia are determined to do whatever the cost.

Mr. COTTEN. You spoke of their beer drinking which I know is quite central in their culture and I know some of the sanitary measures and so on; in fact, I went through a very stainless steel beer garden up near Victoria Falls which impressed me no end. I also know from your experience you have lived among these people where you were outnumbered some astronomical figure with virtually no crime in existence, would you stress this peacefulness of these people if you would please. Also the morality of the family unit which is very seriously misunderstood in America.

Mr. PLOWDEN. Well, for three years my wife and I lived as a party of community of Government officials of which there were 18 adults and we were surrounded by over 90,000 Africans who lived under the tribal system, that I have already described. Towards the end of our stay in this particular station, the crime figures dropped considerably, so much so that the strength of the Police which were 3 White men for these whole vast number of people, in fact, it was 4 but they reduced to 3 and the number of African Police who numbered 15 were dropped to 12 because this was all that was required to Police this particular area. As regards the morals of the African people, and I agree with you, Richard, it is not very well understood, but they have a very high moral code particularly regarding their women folk and one of the most serious crimes an African can commit is to comit adultery with another man's wife. Very heavy penalties are imposed by their own legal code, not ours, on seduction of young girls who eventually do not get married to the man who may have made her pregnant. Damages to the extent of 5 or 6 head of cattle which amount to up to 80 or 100 Rhodesian dollars in value can easily be paid for cases like this. Similar damages are paid to the husband if a man commits adultery with his wife. Of course, committing adultery with the wife of a Chief can cause you to be ostracized and banished from the area, that is the biggest crime of all.

So, the sanctity of women is well looked after and so is the upbringing of their children. This largely depends on the mother until the child is age 8 or 9 and it is during this period that the child is taught by example rather than by harsh disciplinary methods, to respect his parents.

The respect to parents by African children continues throughout his life and is bound up with his spiritual beliefs which would be necessary for me to spend a long time telling you about them.

Mr. COTTEN. Mr. Plowden has barely started to tell you many of his startling things, to me, I thought I knew something of Rhodesia, had some concept of your being very paternalistic in your Government. I knew you weren't abusing the African, but I had no real concept of how you were truly bringing him into your Government and he had every opportunity to express himself as he wished in his own tribal territories. These two interviews together I should think would help the average American to make it abundantly clear to his neighbor what the real conditions are in this wonderful area of Africa.

Mr. Plowden, just a closing question. Less than a minute remaining in the interview, I am beginning to gather that Rhodesia is a completely unique thing in the African continent, it is not merely another African state, your relationship to the African here has no parallel, is this correct?

Mr. PLOWDEN. Yes, this is quite correct particularly if you take it in the context of the colonial territorities whether they were British, Belgium or French, to the north of us. Here it must never be forgotten that the Government official who works his way up through the Civil Service goes home every night he doesn't go home every two years for a six month furlough. Here we sincerely try and study the people that we work with whoever they may be, we respect their customs and we try to work with them in this context. We have a system which has been denigrated I know, throughout the world of the African people and their Chiefs. We ourselves in the past have not recognized the power of these Chiefs particularly in the spiritual and judicial sphere of their traditional functions, but we have found that we cannot destroy this and they and the people are very much happier for this system and I see no reason why we should try and change whilst the people want it.

Mr. COTTEN. Thank you, Mr. Plowden, again for sharing this information and if we have the opportunity, Mr. Plowden, I am hoping that we can develop a lengthy tape of one or two hours duration that our audience could write to Conservative Viewpoint to obtain and call on their neighbors and friends and share with them the realities of the actual relationship between the African and the European Rhodesians, certainly one people in their many wonderful ways.

[*To Radio Audience*] This series can be very important if you will do your part and every other listener will do the same. Send in for the material that we share with you in this series on Rhodesia and become effective in writing your letters to your Senators and your Congressmen, and your letter to your Editors. We could very well be instrumental in seeing sanctions lifted. The very fact that we don't recognize this Government is beyond our comprehension, we cut off our friends and do business with our enemies.

## FOREIGN TRADE LEGISLATION SHOULD NOT BE POSTPONED

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous material.)

Mr. SIKES. Mr. Speaker, I note with concern that consideration of foreign trade legislation is being postponed until after the November election. This is a very disappointing development and I sincerely hope that it does not reflect a lack of interest by the leadership of the House and Senate in obtaining action on this bill.

Those of us who are genuinely concerned about the increasing severity of the competition of foreign goods with those of American manufacturers have long urged the enactment of legislation which gives some measure of protection. We have seen American industries forced to the wall and American workmen thrown out of jobs as more and more foreign producers flood the American market each year with their products. We are not impressed by the argument that we should adhere to the free trade policies which have long been advocated by the State Department. In the main, they are free trade policies only insofar as the United States is concerned. Many foreign nations have for a long time blocked free entry for most U.S. goods by special taxes. It is time for the United States to protect its own interests.

An effective bill has been reported by the House Ways and Means Committee to establish quotas on textile and shoe imports and to provide for quotas on other goods, to create new export-spurring tax incentives, and to wipe out a special tariff wall now provided for some chemical products. Those of us who recognize the need for this legislation must now redouble our efforts. Legislation on this subject should without fail be considered and enacted this year. We cannot afford to wait another year for another Congress to take action which is becoming more and more essential to the survival of important segments of American industry.

## JOINT ECONOMIC COMMITTEE SCHEDULES ENERGY HEARINGS

(Mr. PATMAN asked and was given permission to extend his remarks at this

point in the RECORD, and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, on August 13, I spoke in the House of my concern for the health of the entire energy producing sector of the economy. I indicated the intention of the Joint Economic Committee to undertake a thorough examination of energy prices and supplies.

Today I want to announce the schedule for our first 4 days of hearings on this vital subject. These hearings are scheduled to begin on Monday, October 5, and to continue on October 6, 9, and 10. A number of outstanding private experts have agreed to appear as witnesses, and we will also hear testimony from administration officials with responsibility in this area. I shall include the list of witnesses in the RECORD at the conclusion of my remarks.

My concern for the health of the energy sector has, if anything, grown larger since I last spoke about this. Throughout this summer we have again seen dramatic evidence of what our failure to plan ahead and to provide for adequate growth of energy supplies means to our local communities. Just last week the east coast has again experienced power shortages and "brownouts." Furthermore, we are told that this winter we may be in for severe shortages of basic fuels, not only for electric power production, but for home heating as well.

I do not believe these shortages can be entirely blamed on happenstance or on unfortunate coincidences. If the basic structure of our industry were sound, temporary interruptions in the supply of imported oil or occasional breakdowns of an electric generator would not be causes for alarm or serious inconvenience.

In our hearings, we intend to get behind the temporary and transitional factors which are getting so much publicity and examine the basic health of the entire energy sector of the economy. Our first week of hearings will focus on fuel prices and supplies. We want to know how severe the fuel shortage really is and how Government policies affect prices and supplies. Do we have too much regulation or too little? Do the various regulatory agencies cooperate with each other as they should? Are our import policies in the public interest? Does the Government do enough research aimed at developing efficient and environmentally sound methods of fuel production? Do Government policies encourage the industry to do enough research and exploration? Should the Government permit a growth of monopoly in the fuels sector? What is this apparent increase in monopoly power doing to fuel prices?

All these questions, and many others, require good, honest answers, because the answers to these questions can affect every consumer and every business in the country.

The material referred to follows:

HEARINGS ON THE ENERGY OUTLOOK: AN OVERVIEW OF PRICE AND SUPPLY

All sessions will be held in House Banking and Currency Hearing Room, 2129 Rayburn House Office Building, beginning at 10:00 a.m.

MONDAY, OCTOBER 5, 1970

Senator Lee Metcalf, Democrat, of Montana.

Walter S. Mead, University of California.

Willard Mueller, University of Wisconsin.

TUESDAY, OCTOBER 6, 1970

Paul W. McCracken, Chairman, Council of Economic Advisers.

James R. Nelson, Professor of Economics, Amherst College.

FRIDAY, OCTOBER 9, 1970

Senator Philip A. Hart, Democrat, of Michigan.

Irving Dawes, Chairman of the Executive Committee, Clark Oil & Refining Corp., Milwaukee.

Lee C. White, Semer, White & Jacobsen, Washington, D.C.

John N. Nassikas, Chairman, Federal Power Commission.

SATURDAY, OCTOBER 10, 1970

Russell J. Cameron, Cameron Engineers, Denver, Colo.

James T. Ramey, Commissioner, Atomic Energy Commission.

## BANKERS SHOULD FORGET POLITICS AND LOWER PRIME INTEREST RATES TO 6 PERCENT

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, it is time the big banks stopped kidding the American people and came up with a meaningful reduction in interest rates—a reduction that will actually benefit the consumer.

As predicted, last week's prime rate reduction was accompanied by great excitement and public relations activity, all designed to indicate that the big banks were at long last condescending to give the public lower interest rates. Big front-page headlines ran in most of the Nation's dailies and the television commentators rushed forward with the glad tidings.

All of us want lower interest rates, but it ill serves the American people to indicate that a paltry one-half of 1 percent reduction in the lending rate to prime borrowers will actually bring about lower interest rates for low- and moderate-income families. The bank press releases were notably silent about the rate structure for automobile, consumer, farm, and housing loans.

The big bankers, of course, realize that a one-half of 1 percent reduction will not send a shock wave through the banking community—a shock wave of sufficient force to bring about a dramatic lowering of the cost of money. The big banks can well afford to lower interest rates to 6 percent. Their profit figures—combined with other favorable conditions in the banking community—will allow a reduction to at least 6 percent.

Under present banking conditions, it is fraud on the American people to announce a token one-half of 1 percent reduction from 8 to 7½ percent. In any other industry, the advertisements and announcements accompanying the reduction would have been subject to immediate scrutiny by the Federal Trade Commission for deceptive advertising.

I challenge the big banks to open their books—let the press take a look—and let the public decide whether they got a square deal—a fair deal—with that one-half of 1 percent lowering of the prime rate. I challenge the big banks to show a one-half of 1 percent reduction in automobile loans, home loans, or consumer loans.

Why should this one-half of 1 percent reduction be solely for the prime customers—the big corporations and the friendly speculators? Why should the American consumer—who in the end foots all the interest rate bill—depend on the reduction trickling down?

Mr. Speaker, I hope the American press will pursue this issue with vigor and not stop at the glorious announcement put forward by Morgan Guaranty Trust and others last week. I hope the press will make inquiries on behalf of the American consumer to find out who is getting the interest rate reduction.

Some of the press immediately caught the import of the public relations gimmickry involved in last week's announcement. Last Wednesday, the Washington Evening Star ran an excellent editorial cartoon, depicting an overweight banker dropping a tiny morsel of food in a dog dish with the American consumer kneeling in a pleading demeanor. The tiny morsel of food was labeled "one-half percent lending rate cut."

Mr. Speaker, it is incumbent on this Congress and the Nixon administration to see that full justice is done and interest rates rolled back to the 6 percent level existing the day President Nixon was elected. Both economic and banking conditions call for such a cut.

Bank profits are swollen, and I am convinced that the third quarter figures which will be published soon will reflect this fact fully. In addition, the banks are paying less today for their funds than they have for many months. Their holdings of high-priced Eurodollars are being reduced rapidly. Never have conditions been more favorable for greater earnings on the part of the banks. And as I have reminded the leaders of the banking community many times, the banks receive almost half of their funds in the form of demand deposits—checking accounts—on which they pay not one dime of interest. So this talk about the banks paying a high price for their money is so much hogwash.

To their great credit, there are some bankers who have been quite candid about the situation and have not attempted to delude the public about their earnings. John R. Bunting, president of the First Pennsylvania Banking & Trust Co. of Philadelphia—the first major bank to push for lower interest rates—has been quite honest in his appraisal of the banks' profit picture. I quote this significant paragraph from an article on Mr. Bunting which appeared in the September 28 issue of Time magazine:

At the same time, the profits of major banks in the New York and Chicago money centers have been rising. Bunting says, for example, that in July and August the earnings of First Pennsylvania ran 25% ahead of

the preceding year. Meanwhile, the profits of many corporate customers, who must borrow at 8% or more, are falling.

Mr. Bunting, unfortunately, is a distinct minority in the big banking community. In fact, the latest maneuvering on the prime rate once again calls attention to the misleading nature of the statements which are issued to the press and the public by so many of the Nation's big banks.

Three weeks ago, I wrote David Rockefeller, chairman of the board of the Chase Manhattan National Bank, urging him to lower the prime rate. Mr. Rockefeller replied, in a letter dated September 15, and the sum total of that letter was a resounding "no" to my request.

Mr. Rockefeller immediately followed up with full-page advertisements in many of the Nation's major daily newspapers. The advertisements were in the form of an open letter to Congressman WRIGHT PATMAN telling the Congress and the American public that Chase Manhattan was not lowering the prime rate.

These advertisements ran in newspapers on Friday, September 18. By the time the Morgan Guaranty opened its doors on Monday morning, September 21, the signals had been changed and the decision made to lower interest rates by that one-half of 1 percent.

Suddenly the action that Chase Manhattan said was impossible on Friday became a reality on Monday. Before the day was out, Chase had joined the parade of other big banks and lowered its prime rate, the national advertising and the letters to WRIGHT PATMAN notwithstanding. Many people might be embarrassed by such an absurd about-face, but when you are sitting on top of nearly $20 billion worth of assets, such embarrassments are easily overlooked.

It takes no great imagination to realize why the banks are blossoming forth with full-page advertisements and high-sounding statements about the economy and interest rates. On November 3, the American voters will be going to the polls and Mr. Rockefeller and many of his compatriots in the big banks would like to see the Nixon administration do well.

Mr. Rockefeller's advertisement carried some phrases which appear startlingly similar to material flowing from the Republican National Committee. In all fairness, his ad should have been marked "paid political advertisement."

In his open letter to me, Mr. Rockefeller was quick to deny any political implications. He wrote:

> You also imply that bankers allow election-year considerations to affect their banking decisions. This certainly is not the case at Chase Manhattan, and I cannot imagine that such thinking would have a part in the management of any reputable bank.

Mr. Rockefeller's denial of interest in politics is not very convincing even in his own financial circles. For example, the Wall Street Journal of September 22, in a story on the prime rate decrease, quoted a foreign banker as stating:

> The silly asses. I can only say it is too bad you people have an election coming up.

Quoting a London banker, the Wall Street Journal went on to say:

> To be charitable about it we must call it an internal affair of the U.S. intended to show that the recession is officially over and that the monetary policy is to expand the economy again to help Republican candidates.

Once again, I ask Mr. Rockefeller and his cohorts in the banking community to lay aside political considerations and move for a substantial and lasting interest rate reduction. A reduction to 6 percent—which is easily possible—can prove the sincerity of the big banks' intentions.

## SLOWDOWN DOOMS AIR AND WATER POLLUTION LEGISLATION

(Mr. KING asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. KING. Mr. Speaker, the Democratic Party over the weekend showed that it is meeting itself coming around the corner on the issue of the environment. While a group of Democrats was meeting downtown, and casting aspersions on the Nixon administration for alleged deficiencies in meeting the pollution crisis, Democrats here in Congress were announcing a slowdown that virtually dooms the Nixon administration air and water pollution legislation.

Let us set the record straight. The clean air bill came to Congress on February 18 of this year, along with a bill to create the Environmental Financing Authority, a parklands bill, and a waste treatment facilities bill. None of these has become law simply because the Democrats have been too busy attending antipollution meetings and creating talk pollution to tend to the public's business. They are now trying to create a two-way stretch to cover up their poor record on environment legislation.

The Nixon administration is the first to declare war on environmental decay. It has taken decisive steps. Suits have been filed against oil companies, steel firms, and other industries. It has moved to halt DDT and mercury poisoning. None of this was even feebly attempted under the Johnson administration.

The Nixon administration has moved while the Democrats have sat on their hands. That is why they are meeting themselves coming around the corner—and apparently their left hand does not know that their right hand in Congress is in a sling.

## PERFECT CREDIBILITY RECORD OF PRESIDENT NIXON

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. GERALD R. FORD. Mr. Speaker, the release of the statistics on the American casualty rate in Vietnam for the week ending September 19, which at 52 is again the lowest weekly rate in almost 4 years, points once again to the perfect credibility record of President Nixon. When the President announced that he was sending allied troops into Cambodia to clean out the enemy sanctuaries there, he predicted that the action would save American lives.

The sharp decline in the American casualty rate since the Cambodian operation has borne out that prediction. In the past 3 months the casualty rate has been less than 90 each week and on two occasions has matched a 4-year low.

Mr. Speaker, President Nixon has been candid and honest with the American people about Vietnam. Each time he has announced that troops would be withdrawn from Vietnam they have been withdrawn. He promised that the Cambodian operation would save American lives and it has saved American lives.

President Nixon has kept every promise he has made about the war in Vietnam. It is all the more reason that he should receive the support of Congress in his effort to achieve an honorable peace.

## ANOTHER CUBAN CRISIS

(Mr. DORN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DORN. Mr. Speaker, once again we hear ominous reports of Russian military activity in Communist Cuba, this time the reported construction of a Russian nuclear submarine base. This would be an extremely dangerous development that would have to be met squarely by this country.

The Cuban missile crisis of 1962 was considered by some to be a victory for the United States. But many of us said at the time, and have contended ever since, Mr. Speaker, that this episode was a defeat for this country. The Russians may have withdrawn their missiles but apparently they exacted from the U.S. Government an understanding that the Communist Castro regime would be shielded by the United States from Cuban refugee groups operating from our shores. More importantly for Castro, we agreed not to invade Cuba. We further agreed to withdraw our missiles from Turkey.

Mr. Speaker, I commend to my colleagues' attention the following outstanding editorial from the Greenville, S.C., News which clearly makes the point that this time there must be no concessions:

[From the Greenville, (S.C.) News, Sept. 28, 1970]

THIS TIME, NO CONCESSIONS

Strong indications that the Soviet Union is building a nuclear submarine base on Cuba show again that President Kennedy mishandled the Cuban missile crisis of 1962, a mistake President Nixon must not repeat in 1970.

Having flopped badly on the disastrous Bay of Pigs expedition by failing to provide air cover for landing forces, President Kennedy made a big show of "standing up" to Russia when offensive missiles were found on Cuba in October 1962. He drew applause by getting Khruschev to withdraw the missiles, but paid too big a price for the "victory."

The Kennedy commitment to protect the Castro Communist government of Cuba from overthrow by Cuban refugees has resulted in nothing but trouble ever since. The retired Khrushchev regards the results of the 1962 crisis as the greatest accomplishment of his regime because, as he said, it guaranteed the permanence of a Communist government and a Soviet base on Cuba.

Ever since that time Cuba has been a training ground and base of operations for subversives and terrorists in most Latin American countries and for Marxist organizations fomenting trouble in the United States. Much of the unrest, including campus violence, bombings and murders, in this country is linked to the infamous Tri-Continental Congress organizations based in Havana and sponsored by the Castro government.

The current Russian military activity on Cuba is the latest threat to stem from the Kennedy guarantee of protection for Castro.

As the White House said, a permanent submarine base on Cuba would be an offensive military installation. It would allow nuclear-powered Soviet subs, carrying atomic missiles to roam freely throughout the Caribbean Sea and along the Atlantic Coast. The mobile missile threat would be greater than the fixed-base threat of 1962.

It has to be stopped.

White House reaction to the Pentagon's report was surprisingly mild. Perhaps the administration hopes that viewing a sub base "with utmost seriousness" will cause the Russians to cease the offensive military activity.

Chances are this won't be enough. The Russians are not noted for backing away from offensive activity just because somebody views it with "seriousness." It probably will take a stronger prod than that, and the Russians can be expected to seek concessions, even if they do call off the base, just as they did in 1962.

If the Russians are building a sub-base on Cuba, the Nixon administration and the American people are in for a tough test of strength and determination. This time the American position should be clear and unmistakable.

President Nixon should tell the Russians that, come what may, there will be no Soviet sub-base on Cuba and no concessions made in order to prevent it.

## TAKE PRIDE IN AMERICA

(Mr. MILLER of Ohio asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MILLER of Ohio. Mr. Speaker, today we should take note of America's great accomplishments and in so doing renew our faith and confidence in ourselves as individuals and as a nation. Inventions in the United States are coming at a faster and faster rate. During the period from 1946–1950, 144,076 patents for inventions were issued compared to 259,971 from 1961–1965. In 1968 alone there were nearly 60,000 patented inventions. This points up America's ever-increasing technological achievements.

## CONFERENCE REPORT ON H.R. 17123

Mr. RIVERS submitted the following conference report and statement on the bill (H.R. 17123) authorizing appropriations for fiscal year 1971 for military procurement, research and development, and for anti-ballistic-missile construction, and prescribing Reserve strength:

CONFERENCE REPORT (H. REPT. No. 91–1473)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

TITLE I—PROCUREMENT

SEC. 101. Funds are hereby authorized to be appropriated during the fiscal year 1971 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, as authorized by law, in amounts as follows:

AIRCRAFT

For aircraft: for the Army, $292,100,000; for the Navy and the Marine Corps, $2,416,700,000; for the Air Force, $3,255,500,000.

MISSILES

For missiles: for the Army, $1,059,700,000; for the Navy, $932,400,000; for the Marine Corps, $12,800,000; for the Air Force, $1,485,400,000.

NAVAL VESSELS

For naval vessels: for the Navy, $2,711,900,000.

TRACKED COMBAT VEHICLES

For tracked combat vehicles: for the Army, $205,200,000; for the Marine Corps, $47,400,000.

OTHER WEAPONS

For other weapons: for the Army, $67,200,000; *Provided*, That none of the funds authorized for appropriation by this Act shall be obligated for the procurement of M–16 rifles until the Secretary of the Army has certified to the Congress that at least three active production sources for supplying such weapons will continue to be available within the United States during fiscal year 1971; for the Navy, $2,789,000; for the Marine Corps, $4,400,000.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

SEC. 201. Funds are hereby authorized to be appropriated during the fiscal year 1971 for the use of the Armed Forces of the United States for research, development, test, and evaluation, as authorized by law, in amounts as follows:

For the Army, $1,635,600,000;

For the Navy (including the Marine Corps), $2,156,300,000;

For the Air Force, $2,806,900,000; and

For the Defense Agencies, $452,800,000.

SEC. 202. There is hereby authorized to be appropriated to the Department of Defense during fiscal year 1971 for use as an emergency fund for research, development, test, and evaluation or procurement or production related thereto, $50,000,000.

SEC. 203. (a) Funds authorized for appropriation to the Department of Defense under the provisions of this or any other Act shall not be available after December 31, 1970, for payment of independent research and development or bid and proposal costs unless the work for which payment is made has, in the opinion of the Secretary of Defense, a potential relationship to a military function or operation and unless the following conditions are met—

(1) the Secretary of Defense, prior to or during each fiscal year, negotiates advance agreements establishing a dollar ceiling on such costs with all companies which during their last preceding fiscal year received more than $2,000,000 of independent research and development or bid and proposal payments from the Department of Defense, the advance agreements thus negotiated (A) to cover the first fiscal year of each such contractor beginning on or after the beginning of each fiscal year of the Federal Government, and (B) to be concluded either directly with each such company or with those product divisions of each such company which contract directly with the Department of Defense and themselves received more than $250,000 of such payments during their company's last preceding fiscal year;

(2) the independent research and development portions of the advance agreements thus negotiated are based on company submitted plans on each of which a technical evaluation is performed by the Department of Defense prior to or during the fiscal year covered by such advance agreement; and

(3) no payments for independent research and development or bid and proposal costs are made by the Department of Defense to any company or product division with which an advance agreement is required by subsection (a)(1) of this section, except pursuant to the terms of that agreement.

(b) In the event negotiations are held with any company or product division with which they are required under subsection (a)(1) of this section, but no agreement is reached with any such company or product division, no payments for independent research and development or bid and proposal costs shall be made to any such company or product division during the fiscal year for which agreement was not reached, except in an amount substantially less than the amount which, in the opinion of the Department of Defense, such company or product division would otherwise have been entitled to receive, subject to appeal by such company or product division under regulations to be prescribed by the Secretary of Defense.

(c) The Secretary of Defense shall submit an annual report to the Congress on or before March 15, 1971, and on or before March 15 of each succeeding year, setting forth—

(1) those companies with which negotiations were held pursuant to subsection (a)(1) of this section prior to or during the preceding fiscal year of the Federal Government, together with the results of those negotiations;

(2) the latest available Defense Contract Audit Agency statistics, estimated to the extent necessary, on the independent research and development or bid and proposal payments made to major defense contractors, whether or not covered by subsection (a)(1) of this section during the preceding calendar year; and

(3) the manner of his compliance with the provisions of this section, and any major policy changes proposed to be made by the Department of Defense in the administration of its contractors' independent research and development and bid and proposal programs.

(d) The provisions of this section shall apply only to contracts for which the submission and certification of cost or pricing data are required in accordance with section 2306(f) of title 10, United States Code.

(e) Section 403 of Public Law 91–121 (80 Stat. 204) is hereby repealed.

SEC. 204. None of the funds authorized to be appropriated to the Department of Defense by this or any other Act may be used to finance any research project or study unless such project or study has, in the opinion of the Secretary of Defense, a potential relationship to a military function or operation.

SEC. 205. It is the sense of the Congress that—

(1) an increase in Government support of basic scientific research is necessary to preserve and strengthen the sound technological base essential both to protection of the

national security and the solution of unmet domestic needs; and

(2) a larger share of such support should be provided hereafter through the National Science Foundation.

TITLE III—RESERVE FORCES

SEC. 301. For the fiscal year beginning July 1, 1970, and ending June 30, 1971, the Selected Reserve of each Reserve component of the Armed Forces will be programed to attain an average strength of not less than the following:

(1) The Army National Guard of the United States, 400,000.

(2) The Army Reserve, 260,000.

(3) The Naval Reserve, 129,000.

(4) The Marine Corps Reserve, 47,715.

(5) The Air National Guard of the United States, 87,878.

(6) The Air Force Reserve, 47,921.

(7) The Coast Guard Reserve, 15,000.

SEC. 302. The average strength prescribed by section 301 of this title for the Selected Reserve of any Reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever any such units or such individual members are released from active duty during any fiscal year, the average strength for such fiscal year for the Selected Reserve of such Reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

TITLE IV—ANTI-BALLISTIC-MISSILE CONSTRUCTION AUTHORIZATION; LIMITATIONS ON DEPLOYMENT

SEC. 401. (a) Military construction for the Safeguard anti-ballistic missile system is authorized for the Department of the Army as follows:

(1) Technical and supporting facilities and acquisition of real estate inside the United States, $322,000,000.

(2) Research, development, test and evaluation facilities at the Kwajalein Missile Range, $3,200,000.

(3) Military Family Housing, four hundred units, $8,800,000: Malmstrom Safeguard site, Montana, two hundred units, Grand Forks Safeguard site, North Dakota, two hundred units.

(b) There are authorized to be appropriated for the purposes of this section not to exceed $334,000,000.

(c) Authorization contained in this section (except subsection (b)) shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1971, in the same manner as if such authorizations had been included in that Act.

(d) Within the amounts of the authorizations of military construction for Safeguard, the Secretary of the Army or his designee is authorized to provide for under such terms and conditions as he may determine, two hundred and twenty-five units of temporary family housing for occupancy on a rental basis by military and civilian personnel of the Department of Defense and their dependents at each Safeguard site in connection with any military construction and installation and checkout of system equipment which is or may hereafter be authorized at a Safeguard site, if the Secretary of the Army or his designee determines that such temporary housing is necessary in order to perform the construction and installation and checkout of system equipment, and that temporary housing is not otherwise available under reasonable terms and conditions.

SEC. 402. None of the funds authorized by this or any other Act may be obligated or expended for the purpose of initiating deployment of an anti-ballistic missile system at any site other than Whiteman Air Force Base, Knobnoster, Missouri; except that funds may be obligated or expended for the purpose of initiating advanced preparation (site selection, land acquisition, site survey, and the procurement of long lead-time items) for an anti-ballistic missile system site at Francis E. Warren Air Force Base, Cheyenne, Wyoming. Nothing in the foregoing sentence shall be construed as a limitation on the obligation or expenditure of funds in connection with the deployment of an anti-ballistic missile system at Grand Forks Air Force Base, Grand Forks, North Dakota, or Malmstrom Air Force Base, Great Falls, Montana.

TITLE V—GENERAL PROVISIONS

SEC. 501. The Congress views with grave concern the deepening involvement of the Soviet Union in the Middle East and the clear and present danger to world peace resulting from such involvement which cannot be ignored by the United States. In order to restore and maintain the military balance in the Middle East, by furnishing to Israel the means of providing for its own security, the President is authorized to transfer to Israel, by sale, credit sale, or guaranty, such aircraft, and equipment appropriate to use, maintain, and protect such aircraft, as may be necessary to counteract any past, present, or future increased military assistance provided to other countries of the Middle East. Any such sale, credit sale, or guaranty shall be made on terms and conditions not less favorable than those extended to other countries which receive the same or similar types of aircraft and equipment. The authority contained in the second sentence of this section shall expire September 30, 1972.

SEC. 502. Subsection (a) of section 401 of Public Law 89-367, approved March 15, 1966 (80 Stat. 37), as amended, is hereby amended to read as follows:

"(a) (1) Not to exceed $2,800,000,000 of the funds authorized for appropriation for the use of the Armed Forces of the United States under this or any other Act are authorized to be made available for their stated purposes to support: (A) Vietnamese and other free world forces in support of Vietnamese forces, (B) local forces in Laos and Thailand; and for related costs, during the fiscal year 1971 on such terms and conditions as the Secretary of Defense may determine. None of the funds appropriated to or for the use of the Armed Forces of the United States may be used for the purpose of paying any overseas allowance, per diem allowance, or any other addition to the regular base pay of any person serving with the free world forces in South Vietnam if the amount of such payment would be greater than the amount of special pay authorized to be paid, for an equivalent period of service, to members of the Armed Forces of the United States (under section 310 of title 37, United States Code) serving in Vietnam or in any other hostile fire area, except for continuation of payments of such additions to regular base pay provided in agreements executed prior to July 1, 1970. Nothing in clause (A) of the first sentence of this paragraph shall be construed as authorizing the use of any such funds to support Vietnamese or other free world forces in actions designed to provide military support and assistance to the Government of Cambodia or Laos.

"(2) No defense article may be furnished to the South Vietnamese forces, other free world forces in Vietnam, or to local forces in Laos or Thailand with funds authorized for the use of the Armed Forces of the United States under this or any other Act unless the government of the forces to which the defense article is to be furnished shall have agreed that—

"(A) it will not, without the consent of the President—

"(i) permit any use of such article by anyone not an officer, employee, or agent of that government,

"(ii) transfer, or permit any officer, employee, or agent of that government to transfer such article by gift, sale, or otherwise, or

"(iii) use or permit the use of such article for purposes other than those for which furnished;

"(B) it will maintain the security of such article, and will provide substantially the same degree of security protection afforded to such article by the United States Government;

"(C) it will, as the President may require, permit continuous observation and review by, and furnish necessary information to, representatives of the United States Government with regard to the use of such article; and

"(D) unless the President consents to other disposition, it will return to the United States Government for such use or disposition as the President considers in the best interests of the United States, any such article which is no longer needed for the purposes for which it was furnished.

The President shall promptly submit a report to the Speaker of the House of Representatives and the President of the Senate on the implementation of each agreement entered into in compliance with this paragraph. The President may not give his consent under clause (A) or (D) of this paragraph with respect to any defense article until the expiration of fifteen days after written notice has been given to the Speaker of the House of Representatives and the President of the Senate regarding the proposed action of the President with respect to such article. As used in this paragraph the term 'defense article' shall have the same meaning prescribed for such term in section 644 (d) of the Foreign Assistance Act of 1961. In order to allow a reasonable period of time for the Department of Defense to comply with the requirements of this paragraph, the provisions of such paragraph shall become effective sixty days after the date of enactment of this paragraph."

SEC. 503. Of the total amount authorized to be appropriated by this Act for the procurement of the F-111 aircraft, $283,000,000 of such amount may not be obligated or expended for the procurement of such aircraft until and unless the Secretary of Defense has (1) determined that the F-111 aircraft has been subjected to and successfully completed a comprehensive structural integrity test program, (2) approved a program for the procurement of such aircraft, and (3) certified in a written report to the Committees on Armed Services of the Senate and the House of Representatives that he has made such a determination and approved such a program, and has included in such written report the basis for making such determination and approving such program.

SEC. 504. (a) Of the total amount authorized to be appropriated by this Act for the procurement of the C-5A aircraft, $200,000,000 of such amount may not be obligated or expended until after the expiration of thirty days from the date upon which the Secretary of Defense submits to the Committee on Armed Services of the Senate and the House of Representatives a plan for the expenditure of such $200,000,000. In no event may all or any part of such $200,000,000 be obligated or expended except in accordance with such plan.

(b) The $200,000,000 referred to in subsection (a) of this section, following the submission of a plan pursuant to such subsection, may be expended only for the reason-

able and allocable direct and indirect costs incurred by the prime contractor under a contract entered into with the United States to carry out the C–5A aircraft program. No part of such amount may be used for—

(1) direct cost of any other contract or activity of the prime contractor:

(2) profit on any materials, supplies, or services which are sold or transferred between any division, subsidiary, or affiliate of the prime contractor under the common control of the prime contractor and such division, subsidiary, or affiliate;

(3) bid and proposal costs, independent research and development costs, and the cost of other similar unsponsored technical effort; or

(4) depreciation and amortization costs on property, plant, or equipment.

Any of the costs referred to in the preceding sentence which would otherwise be allocable to any work funded by such $200,000,000 may not be allocated to other portions of the C–5A aircraft contract or to any other contract with the United States, but payments to C–5A aircraft subcontractors shall not be subject to the restrictions referred to in such sentence.

(c) Any payment from such $200,000,000 shall be made to the prime contractor through a special bank account from which such contractor may withdraw funds only after a request containing a detailed justification of the amount requested has been submitted to and approved by the contracting officer for the United States. All payments made from such special bank account shall be audited by the Defense Contract Audit Agency of the Department of Defense and, on a quarterly basis, by the General Accounting Office. The Comptroller General shall submit to the Congress not more than thirty days after the close of each quarter a report on the audit for such quarter performed by the General Accounting Office pursuant to this subsection.

(d) The restrictions and controls provided for in this section with respect to the $200,000,000 referred to in subsections (a) and (b) of this section shall be in addition to such other restrictions and controls as may be prescribed by the Secretary of Defense or the Secretary of the Air Force.

SEC. 505. Section 412(b) of Public Law 86–149, as amended, is amended by inserting immediately before the word "unless" the following: ", or after December 31, 1970, to or for the use of the Navy for the procurement of torpedoes and related support equipment".

SEC. 506. (a) None of the funds authorized to be appropriated by this Act shall be used for the procurement of delivery systems specifically designed to disseminate lethal chemical or any biological warfare agents, or for the procurement of delivery system parts or components specifically designed for such purpose, unless the President shall certify to the Congress that such procurement is essential to the safety and security of the United States.

(b)(1) Section 409(b) of Public Law 91–121, approved November 19, 1969 (83 Stat. 209), is amended—

(A) by striking out "or the open air testing of any such agent within the United States" in the material immediately preceding paragraph (1) and inserting in lieu thereof the following: "the open air testing of any such agent within the United States, or the disposal of any such agent within the United States";

(B) by striking out "transportation or testing" each time it appears in paragraphs (2), (3), and (4) and inserting in lieu thereof "transportation, testing, or disposal"; and

(C) by inserting "or disposal" immediately after "such testing" in paragraph (4)(A).

(2) Section 409(c)(1) of such public law is amended—

(A) by striking out "deployment, or storage, or both," and inserting in lieu thereof "deployment, storage, or disposal"; and

(B) by striking out "deployment or storage" immediately after "unless prior notice of" and inserting in lieu thereof "deployment, storage, or disposal".

(3) The first sentence of section 409(c)(2) of such public law is amended by inserting ", or for the disposal of any munitions in international waters," immediately after "outside the United States".

(4) Section 409 of such public law is further amended by adding at the end thereof a new subsection as follows:

"(g) Nothing contained in this section shall be deemed to restrict the transportation or disposal of research quantities of any lethal chemical or any biological warfare agent, or to delay or prevent, in emergency situations either within or outside the United States, the immediate disposal together with any necessary associated transportation, of any lethal chemical or any biological warfare agent when compliance with the procedures and requirements of this section would clearly endanger the health or safety of any person."

(c)(1) The Secretary of Defense shall undertake to enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation to determine (A) the ecological and physiological dangers inherent in the use of herbicides, and (B) the ecological and physiological effects of the defoliation program carried out by the Department of Defense in South Vietnam.

(2) Of the funds authorized by this Act for research, development, testing, and evaluation of chemical warfare agents and for defense against biological warfare agents, such amounts as are required shall be available to carry out the study and investigation authorized by paragraph (1) of this subsection.

(3) In entering into any arrangement with the National Academy of Sciences for conducting the study and investigation authorized by paragraph (1) of this subsection, the Secretary of Defense shall request that the National Academy of Sciences submit a final report containing the results of its study and investigation to the Secretary not later than January 31, 1972. The Secretary shall transmit copies of such report to the President and the Congress, together with such comments and recommendations as he deems appropriate, not later than March 1, 1972.

(d) On and after the date of enactment of this Act, no chemical or biological warfare agent shall be disposed of within or outside the United States unless such agent has been detoxified or made harmless to man and his environment unless immediate disposal is clearly necessary in an emergency, to safeguard human life. An immediate report should be made to Congress in the event of such disposal.

SEC. 507. (a) No information concerning the identity or location of the person, company, or corporation to whom any contract has been awarded by the Department of Defense shall be given to any individual, including any Member of Congress, in advance of a public announcement by the Secretary of Defense of the identity of the person, company, or corporation to whom such contract has been awarded.

(b) On and after the date of enactment of this Act, whenever the identity of the person, company, or corporation to whom any defense contract has been awarded is to be made public, the Secretary of Defense shall publicly announce that such contract has been awarded and to whom it was awarded.

SEC. 508. In order to reduce annual expenditures in connection with permanent change of station assignments of military personnel and in order to help further stabilize the lives of members of the Armed Forces and their dependents, the Secretary of Defense is directed to initiate promptly new procedures with respect to domestic and foreign permanent change of station assignments for military personnel under which the length of permanent change of station assignments will, whenever practicable and consistent with national security, be made for longer periods of time.

SEC. 509. Section 412 of Public Law 86–149, as amended, is amended by adding at the end thereof a new subsection as follows:

"(d)(1) Beginning with the fiscal year which begins July 1, 1971, and for each fiscal year thereafter, the Congress shall authorize the average annual active duty personnel strength for each component of the Armed Forces; and no funds may be appropriated for any fiscal year beginning on or after such date to or for the use of the active duty personnel of any component of the Armed Forces unless the active duty personnel strength of such component for such fiscal year has been authorized by law.

"(2) Beginning with the fiscal year ending June 30, 1971, the President shall submit to the Congress a written report not later than January 31 of each fiscal year recommending the average annual active duty strength level for each component of the Armed Forces for the next fiscal year and shall include in such report justification for the strength levels recommended and an explanation of the relationship between the personnel strength levels recommended for such fiscal year and the national security policies of the United States in effect at the time."

SEC. 510. No part of the funds appropriated pursuant to this Act may be used at any institution of higher learning if the Secretary of Defense or his designee determines that at the time of the expenditure of funds to such institution recruiting personnel of any of the Armed Forces of the United States are being barred by the policy of such institution from the premises of the institution except that this section shall not apply if the Secretary of Defense or his designee determines that the expenditure is a continuation or a renewal of a previous grant to such institution which is likely to make a significant contribution to the defense effort. The Secretaries of the military departments shall furnish to the Secretary of Defense or his designee within 60 days after the date of enactment of this Act and each January 31st and June 30th thereafter the names of any institutions of higher learning which the Secretaries determine on such dates are barring such recruiting personnel from the campus of the institution.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

TITLE I—PROCUREMENT

*Prior-year funds*

Included in the Department of Defense fiscal year 1971 authorization request were items identified as "Prior Programs to be Justified" involving both procurement and R.D.T. & E. accounts for each of the several Services and Defense Agencies.

The bill as passed by the House of Representatives deleted the $334,800,000 of new authorization requested by the Departments for these various older programs. The Senate concurred in the House action in denying the Department's request for new authorization in the amount of $334,800,000. However, in addition to concurring with the House action, the Senate was of the view that the Department of Defense had failed to identify or rejustify these various prior year programs for which these amounts had previously been made available but not yet obligated. Further, it was established that these unobligated funds would not be used until some time after Fiscal Year 1971.

In view of these circumstances, the Senate in addition to agreeing with the House reduction, also reduced the requested new obligational authority by the same amount in view of the availability of these prior year funds for use during fiscal year 1971.

Although the Department of Defense objected to this Senate action as representing a departure from the "full funding" concept to the "incremental funding" concept, it was unable to persuade the conferees that this action would adversely affect procurement or research and development of the Department. Therefore, the House accepted the Senate action.

The various reductions in affected programs had previously been outlined in the Senate Report, No. 91-1016, and result in a reduction in the authorizations provided for departmental programs throughout titles I and II of the bill as agreed to by the conferees.

AIRCRAFT

*Navy and Marine Corps*

For the Navy, the House authorized $79 million for the procurement of the S-3A ASW aircraft. The Senate deleted all procurement funds for the S-3A but provided a corresponding amount, $79 million, for research and development on the aircraft.

The conferees agreed to restore the $79 million to the procurement account. This matter is discussed further below in the review of the conferees' action on Navy Research and Development programs.

The Senate recedes.

*Air Force*

The House bill had provided a $30,000,000 authorization for appropriations for Fiscal Year 1971 for an international fighter aircraft. The Senate denied this request. However, after considerable discussion, the Senate receded from its position and the conferees restored the $30,000,000 authorization.

The Congress, in the fiscal year 1970 weapons authorization law (Public Law 91-121) authorized to be appropriated $28,000,000 to initiate procurement of a Free World fighter aircraft. The intention of the Congress was to make available a fighter aircraft to meet the needs of the Free World Forces in Southeast Asia, and to accelerate the withdrawal of United States Forces from South Vietnam and Thailand.

The statutory language authorizing the initiation of this procurement stipulated that the Air Force shall "prior to the obligation of any funds appropriated pursuant to this authorization, conduct a competition for the aircraft which shall be selected on the basis of the threat as evaluated and determined by the Secretary of Defense."

The conferees, in taking this action last year, emphasized their support of the request of the Deputy Secretary of Defense that "necessary adjustments" be made in "the military procurement authorization bill in order to permit the Department of Defense to proceed expeditiously with the development of a new Free World fighter aircraft by the Air Force."

The Secretary of Defense, at that time, also emphasized his conviction that this type of aircraft should be made available as quickly as possible to Free World Forces when he said:

"For some time the Department of Defense has been studying the issues incident to the development of an improved International Fighter Aircraft. Such an aircraft should (*a*) have adequate capabilities to handle the existing threat, (*b*) be as inexpensive as feasible, and (*c*) be simple to maintain and operate. When the military budget was presented to Congress earlier this year, the Department of Defense consideration of the issues involved had not proceeded sufficiently to justify making a request for resources to meet the objectives cited.

"Our continuing review over the past few months, however, has validated the objectives, and a draft concept for an International Fighter Aircraft has been completed. The concept highlights, inter alia, the utility our allies, particularly in the Asian theater, might find for a new fighter aircraft and alternative programs which might be undertaken to make such an aircraft available.

"In particular, we now believe it is desirable to consider an appropriate aircraft the South Vietnamese might use, as part of the Vietnamization process, defending against the potential North Vietnamese Mig threat."

In view of these circumstances, the Congress endorsed the action requested by the Department of Defense and provided the necessary authority for the initiation of this vital program in fiscal year 1970. However, despite the fact that the need for this type of aircraft has grown more acute, no final action has yet been taken by the Department of Defense to go forward with this procurement action.

The conferees neither appreciate nor understand the "foot dragging" that is evidently taking place in both the Department of Defense and the Air Force on this vital program.

It should not be necessary to point out that the Nixon Doctrine for providing independent nations with the equipment and weapons necessary to guarantee their independence, requires that we have available a simple and relatively inexpensive fighter aircraft. Such an air weapons system must be made available at the earliest practicable date if we are to safely withdraw United States Forces now operating and maintaining our own fighter aircraft in Southeast Asia. The availability of this type of aircraft is, in the view of the conferees a matter of the greatest urgency and should, in our national interest, be accomplished as expeditiously as possible.

The conferees, therefore, in authorizing an additional $30 million for this program, suggest and urge the Secretary of Defense to personally resolve whatever remaining problems may have heretofore prevented the Air Force from going forward with this procurement action so that these aircraft can be made available to our Free World allies as soon as humanly possible.

The conferees are unaware of any legal or procedural problem that would prevent the Secretary of Defense from reaching a final decision on this procurement action. Therefore, it is expected that such a decision will be forthcoming from the Secretary without further delay.

MISSILES

*Army*

The House bill in its authorization of funds for procurement of missiles for the Army provided $660.4 million for the Safeguard antiballistic missile system. The House authorization included $25 million for the advance preparation of five sites for the Modified Phase II deployment. The Senate bill provided $650.4 million for procurement for Safeguard and added language which prohibits the expenditure of funds for initiating deployment of an antiballistic missile system at any site other than Whiteman Air Force Base, Knobnoster, Mo., except that funds could be authorized for initiating advance preparation for an antiballistic missile system site at Francis E. Warren Air Force Base, Cheyenne, Wyo. The Senate provision specified that it was not to be construed as a limitation on further obligation or expenditure of funds in connection with the continued deployment of the ABM system at Grand Forks Air Force Base, N. Dak., or Malmstrom Air Force Base, Great Falls, Mont., the two sites where deployment was commenced under the authority of the fiscal 1970 authorization and will be continued under the authorization in the present bill. The Senate language in effect prohibits the advance preparation for four sites as authorized by the House bill and limits the deployment of the Safeguard system to the protection of strategic missile deterrent. The Senate conferees were adamant in their position.

In accepting the Senate amendment, the House conferees want to make very clear and to emphasize their belief that adequate protection of the national command and control function is essential to our security, and the House conferees interpret the conference action as not prohibiting follow-on studies of present and future programs to assure the survivability of this vital element of our national defense.

Section 401 of the Senate bill included authorization for military construction in connection with the Safeguard system in the amount of $334 million, of which $8.8 million is for 400 units of family housing (200 at Malmstrom and 200 at Grand Forks), $322 million for Safeguard-related construction at the approved Safeguard sites and other installations, and $3.2 million for construction at Kwajalein. The House bill contained no such construction authorization. However, the House has already approved identical dollar amounts for military construction in connection with Safeguard in its passage of the military construction authorization bill, H.R. 17604. Therefore, the House recedes.

The House bill authorized $90.3 million for procurement of the Improved Hawk missile. The Senate bill reduced the authorization for the Improved Hawk to $53.3 million, a reduction of $37 million. The conferees agreed to an authorization of $81.4 million, a restoration of $28.1 million of the proposed Senate reduction.

The Senate reduction would have deleted all of the funds for procurement of missiles during fiscal 1971, leaving only the funds for continued modification of ground-support equipment and separate engineering services.

Such action might well have resulted in a 6-month break in production, with added program costs. At the urging of the House

conferees, therefore, the Senate agreed to the restoration of the $28.1 million, which is consistent with the Army's requirements under a revised procurement plan which calls for a stretchout of the initial production rate to reduce concurrency to the minimum.

In agreeing to the restoration of these funds, it is the intention of the conferees that the procurement for the fiscal 1971 buy not be consummated until the successful completion of a testing program to ensure the operational readiness of the missile subject to the approval of the Secretary of Defense.

In its request for missile funding the Army included an amount of $106 million for the Tow which which is one of the Army's heavy antitank weapons. The Army has in its inventory another heavy antitank (the Shillelagh missile) which, in range and lethality, is equal to or superior to the Tow and is presently in production at a price less than the Tow. Although the Shillelagh was developed to be fired from tanks, it can be adapted to a ground mode for the use of infantry troops or to a heliborne mode.

The House Committee felt that if this adaptation could be accomplished within a reasonable timeframe and at an acceptable cost, it would result in an eventual significant savings in present and future procurement of such a weapon. Therefore, the committee approved an amount of $106 million, not specifically for the Tow, but for a *heavy antitank weapon*, provided the Army (1) conducted tests to determine the adaptability of the Shillelagh to the infantry and heliborne modes, and (2) if affirmative results were obtained, awarded a contract for the Army's total requirement for such missiles to the low bidder in a competition between the producers of the Tow and the producers of the Shillelagh.

Although the Army did not perform the aforesaid tests, they advised the Committee that they had conducted a special and intensive reevaluation of the Tow and Shillelagh systems for the infantry and helicopter roles. The results of this review established to the satisfaction of the Army that each of these weapons should be continued in their presently developed modes. Therefore, at the request of the Senate conferees, the House recedes from its provisional approval of the $106 million for a *heavy antitank weapon* and agrees to authorize that amount for Tow funding.

*Navy and Marine Corps*

The House bill authorized $52.7 million for the procurement of the Sparow missile for the Navy. The Senate bill authorized $46 million, a reduction of $6.7 million.

The House recedes.

The House bill authorized $25.6 million for the procurement of the Improved Hawk missile for the Marine Corps. The Senate bill authorized $10.8 million, a reduction of $14.8 million. The missile is procured for the Marine Corps by the Army. In view of the recently revised procurement program under which the Army is proceeding, procurement of the Improved Hawk missiles for the Marine Corps could not be reasonably expected to commerce until well into FY 1972. Therefore, since it appeared that money would not actually be required until 1972 for the Marine Corps the House conferees agreed to the Senate position.

The House recedes.

*Air Force*

The House bill eliminated all procurement funds for the Maverick missile and called for extending the development phase for another year to allow further development prior to procurement. The Senate restored $3.1 million of the House reduction. The $3.1 million will allow retaining present contract options and the production price advantages of the current contract while additional testing is performed.

The House recedes.

The House bill authorized $15 million in procurement funds for modification of the Falcon missile. The Senate bill had denied the $15 million. The conferees agreed to a restoration of $6 million.

*Naval vessels*

The House included $152 million for the advance procurement of the third *Nimitz*-class nuclear-powered aircraft carrier (CVAN–70). The Senate bill deleted these funds because the President in submitting the budget indicated that funds would not be obligated until completion of a study in process to assess future requirements for attack carriers. The Conference Committee reaffirmed the findings of a Joint House-Senate Subcommittee on CVAN–70 that this new carrier is needed. However, because of the singular treatment of this carrier in the President's budget message by making a condition of the building of the carrier dependent upon the outcome of a study being undertaken by the National Security Council and because the Administration, despite many pleas, has failed to make a final decision on the carrier, the Conference decided not to include the advance procurement for the CVAN–70 in this year's authorization bill. This is without prejudice to any action in future years.

The House recedes.

The House added on to the Naval vessel construction request of the President an additional $435 million for new construction for the Navy. These additional funds will provide: one fast submarine (SSN–688 class), $166 million; long lead time procurement for an additional such submarine, $22.5 million; one submarine tender, $102 million; one destroyer tender, $103 million; two oceanographic research ships, $7.5 million; and land craft, $10 million and service craft, $24 million. The Senate bill contained no such additions but approved a Naval construction program as requested by the President with the exception of the aforementioned CVAN–70 funds which were deleted by the Senate.

The additional ship construction items authorized by the House bill were designated by the Secretary of Defense as the first priority should additional funds be made available by the Congress for the Department of Defense.

The House conferees were able to convince the Senate conferees of the necessity for this additional ship construction program in view of the critical state of the Navy, and this additional $435 million was therefore retained in the bill.

The Senate recedes.

The House bill included language which would have required that $600 million of the funds authorized for Naval vessels would be authorized to be appropriated only for expenditure in Naval shipyards. The Senate bill contained no such provision. In view of the fact that the Department of Defense and the Navy strongly objected that the limitation was unworkable, the Conference Committee agreed to eliminate this provision.

The House recedes.

The House bill included a provision that no funds should be spent for shipbuilding until the National Security Council has made its report to the President with respect to the nuclear attack aircraft carrier CVAN–70. The Senate bill had no such provision. In view of the elimination of the funds for the advance procurement for the CVAN–70, there is no further necessity for this provision.

The House recedes.

The House bill included a provision that would require the construction of the new DD–963 class destroyer at the facilities of at least two different United States shipbuilders. The Senate bill had no such provision. The addition of this language was designed to make the Navy aware of the Congressional intent that the private shipbuilding industry be encouraged on the Atlantic Coast, the Gulf Coast and the Pacific Coast. The Senate conferees were adamant in their opposition to this provision.

The House recedes.

*Tracked combat vehicles*

The M60A1E2 tank is a modification of the M60A1. This modification consists primarily of a new turret and barrel which permits the firing of the Shillelagh missile and the 152mm caseless round. This is the same basic firepower to be incorporated in the Main Battle Tank presently being developed.

The Army has invested more than a quarter of a billion dollars in the M60A1E2 development and the program has been plagued with problems of stability and maintainability for the past five years. However, recent test results suggest that fixes for these problems have been found, and that this can be finally determined by the Engineering and Service Testing which the Army has scheduled for the near future.

The Senate deleted the $12.1 million which the Army requested this year to continue the testing of the M60A1E2. This action would have ended the program just when there is reason to believe that it may prove successful. The House conferees felt that such action would result in the loss of almost a quarter of a billion dollars plus five years of effort and might deny the Army an interim missile firing tank which it states it urgently needs pending the deployment of the new Main Battle Tank during the late seventies and early eighties. Therefore, at the request of the House conferees the Senate conferees receded from their position and the $12.1 million was restored. However, it was the decision of the conferees that there should be no further funding of the M60-A1E2 unless the Engineering and Service Testing to be completed in 1971 establishes that the fixes proposed for this tank meet the needs of the Army.

The Army requested $67.6 million for fiscal 1971 for M60A1 procurement. The Senate reduced that amount by $10.9 million which represents the cost of 150 tank chassis which was expected to be recoverable from the M60A1E2 program which would have been terminated by the Senate action discussed above.

With the restoration of the M60A1E2 program by the conferees, the 150 tank chassis were no longer available for the M60A1 program. Therefore, at the request of the House conferees, the $10.9 million was restored.

The Senate recedes.

The House approved a Marine Corps request in the amount of $1.3 million for a training device to be used in connection with a new amphibious vehicle under development. Subsequently, the Marine Corps recommended deferral of this $1.3 million because development of the training device has not been completed. Therefore, the Senate deleted this amount and the House conferees agreed to such deletion for the above-stated reason.

*Other weapons*

The House bill contained a provision that none of the funds authorized shall be obligated for the procurement of M–16 rifles until the Secretary of the Army has certified to the Congress that at least three active production sources will continue to be available in the United States during fiscal year 1971. The Senate bill contained no such provision.

The Senate conferees agreed to the position of the House with the understanding that in the coming year, both Houses will give attention to developing permanent policy looking beyond fiscal year 1971 on the question of having an adequate industrial capacity for meeting procurement requirements of this kind, taking into account contingencies that might arise.

TITLE II—RESEARCH AND DEVELOPMENT

General

Both the Senate and House modified the Research and Development budget request submitted by the Department of Defense. The original request of the Department of Defense totaled $7,401,600,000. The conferees agreed upon $7,101,600,000, or a reduction of $300 million below the amount requested by the Department of Defense. The amount agreed upon is $164 million less than that previously approved by the House and is $164.1 million above the amount recommended by the Senate.

*Army*

For the Army, the conferees agreed upon a total of $1,635,600,000. This reflects a reduction of $100,300,000 below the departmental request and is $10 million less than was authorized by the Congress last year.

In its initial consideration, the House reduced the Army Research and Development authorization by $88 million, leaving flexibility with the Department of Defense to apply the reductions on the basis of military priorities.

The Senate, in its review, reduced the Army authorization by $126.7 million, specifying reductions to be taken in some sixteen projects. The specific program reductions are spelled out in the Senate Report (No. 91-1016). The conferees agreed to accept the Senate reductions on all of these projects except the Cheyenne helicopter and the SAM-D missile.

In the case of the Cheyenne, the Senate receded from its position and restored the full $17.6 million requested by the Department.

For the SAM-D, the Senate receded on $8.8 million of the $15 million in disagreement. The conferees authorized appropriations totaling $83.1 million for the SAM-D program.

Close air support—roles and missions

During the conference it was brought to the attention of the conferees that a roles and missions question has arisen concerning close air support for the Army. The allegation has been made that there is competition for this mission between the Harrier aircraft, the Cheyenne helicopter and the proposed AX aircraft. The House conferees want to make their position perfectly clear and state unequivocally that they see no competition among these aircraft. The House conferees agree with the decision of the Deputy Secretary of Defense that these weapon systems are complementary and not competitive.

Main battle tank (MBT-70)

While not an item in disagreement, the House conferees are concerned about the austere support proposed by the Army for the gas turbine engine development for the Main Battle Tank (MBT-70/XM803). The proposed engine program for this tank of the future supports a "derated" diesel engine. Diesel engines of the type being developed for this important weapon system are based on technologies of the 1950's, or early 1960's, rather than the technology of this decade.

The House conferees question the wisdom of relying on past technology for weapons systems of the future rather than capitalizing on the latest technology available and that which offers greater growth potential in the future. For this reason, the House conferees strongly urge the Army to proceed with the development of the gas turbine engine for the Main Battle Tank on a basis at least equal to that of the derated diesel engine development program.

*Navy and Marine Corps*

The conferees agreed on $2,156,300,000. This amount is $56 million below the Departmental request and is $41 million below the amount previously recommended by the House.

In its report, the Senate identified some thirteen programs for adjustment. In the case of the S-3A aircraft, $79 million submitted in the Procurement authorization request was transferred to Research and Development because the two aircraft which the funds would buy are required initially for development and test. The Senate expressed concern that ". . . concurrency of research and development and procurement is to be avoided, and that a more orderly progression is to be achieved to insure that technical problems have been minimized by the time production is started."

The conferees agreed to leave the $79 million in the Procurement authorization with the clear understanding that these two aircraft were to be treated as Research and Development test aircraft and the action is not to be interpreted as approval for release to production of the S-3A aircraft.

The conferees urge that the Secretary of Defense consider the use of the transfer authority to transfer $79 million for the S-3A from Procurement to the R.D.T. & E. appropriation consistent with the use of these funds.

Of the remaining 12 programs adjusted by the Senate, the conferees agreed to restore the following amounts to the programs indicated:

| | *Millions* |
|---|---|
| Defense research sciences | +$2.3 |
| Destroyer helicopter system | +5.0 |
| F-14 B/C | +5.2 |
| Air launched/surface launched anti-ship missile (Harpoon) | +14.0 |
| Point defense system development | +3.8 |
| Advanced surface ship sonar development | +.7 |
| Surface effect ships | +10.0 |

The funds restored for the F-14 aircraft program are to support the development of the advanced technology engine and are not to be used for the development of the avionics package for the F-14C aircraft.

*Air Force*

For the Air Force, the conferees agreed on an authorization totaling $2,806,900,000. This reflects a reduction of $120,800,000 from the amount requested by the Department of Defense. The amount agreed upon by the conferees is $102.8 million below that previously authorized by the House.

The Senate, in its report, identified 16 programs for reduction in authorization amounts. The conferees agreed to restore all or portions of the reductions on ten programs as follows:

| | *Millions* |
|---|---|
| Innovations in education and training | +$0.2 |
| Advanced fire control/missile technology | +2.8 |
| Subsonic cruise armed decoy (SCAD) | +10.0 |
| Advanced tanker | +.5 |
| B-1 | +25.0 |
| F-111 squadrons | +6.4 |
| Short range air-to-air missile | +5.0 |
| Minuteman rebasing | +27.0 |
| Armament/ordnance development | +7.0 |
| Truck interdiction | +5.0 |

During the past year, there has been widespread criticism, discussion and debate concerning the schedule slippages and cost overruns of military hardware contracts. While some of the criticism has been justified, it is important for everyone to obtain a better understanding of some of the reasons why cost overruns sometimes occur by reasons beyond the control of the parties immediately concerned.

The contract that best serves both the public and contractor interest is that one which is funded at a rate which produces the maximum return for each dollar spent. When a contract is funded at either a greater or lesser level than the optimum, waste inevitably results and that waste is accompanied by schedule slippage. That is the beginning of the cost overrun.

Thus, in the case of the B-1, the House supported a Defense Department recommended funding level of $100 million for fiscal year 1971. That sum was reduced to $50 million by the Senate. In spite of urging by the House conferees, the Senate conferees did not agree to the restoration of the full sum. Thus the seeds of cost overrun have now been sown in this weapons system and the House conferees, therefore, give fair warning of this unfortunate fact.

The $6.4 million for the F-111 had been deleted by the Senate because these funds had been identified for use on the AIM-7G missile, which was later determined not to be required in fiscal year 1971. The Senate agreed to restore these funds to support development of the F-111 Aircraft.

In the case of the Short Range Air-to-Air Missile, a total of $13 million was agreed upon by the conferees to be authorized. This amount will enable the Air Force to pursue three alternatives to meet their requirement resulting from the recent Air Force cancellation of the AIM-82 program.

The Senate Conferees agreed to the full restoration of $27 million for Minuteman rebasing with the understanding that the reoriented program would exclude efforts previously planned for hard rock development.

In the case of Armament/Ordnance Development, the Secretary of Defense advised that technical difficulty has precluded development of the Hard Structure Munition in Fiscal Year 1971 but that the funds would be applied to other munitions development. The Senate conferees agreed to restore these funds based upon the redirection of this program.

*Defense agencies*

For Defense Agencies, the conferees agreed on an authorization totaling $452,800,000. This amount is $22.9 million less than that requested by the Department of Defense and is $7.9 million below the amount previously recommended by the House.

In its earlier report, the Senate identified several program areas for reduction. The conferees agreed to restore $7.8 million of these reductions to the Advanced Research Projects Agency (ARPA). This restoration of authorization would be applied to the Defense Research Sciences program in the amount of $4.8 million and to the Advanced Engineering Program in the amount of $3.0 million.

Independent research and development

The Senate adopted language in Section 203 which provided for the following:

(*a*) Restricted payments to contractors for independent research and development (IR&D), bidding and proposal (B&P) and other technical effort (OTE) work which is relevant to Defense functions and operations.

(*b*) Required negotiation of advance agreements with all contractors who received more than $2 million in IR&D, B&P, or OTE in their last preceding year.

(*c*) Required that negotiations of advance agreements be based on submitted plans and a technical evaluation of the IR&D portion of those agreements.

(*d*) In the event negotiations are held with any company required to enter into an advance agreement, but no agreement is reached, reimbursement would be made in an amount substantially less than the contractor otherwise would have been entitled to receive.

(*e*) The Department of Defense was required to report to Congress with regard to IR&D, B&P and OTE expenditures.

(*f*) Established a ceiling of $325 million on payments to be made pursuant to advance agreements negotiated under the act, and

(*g*) Repeal of Section 403 of the fiscal year 1970 act which limited payments for IR&D,

B&P and OTE to 93 percent of the total cost contemplated by the Department.

The House version of the bill contained no comparable language.

Early this year a House Armed Services Subcommittee held hearings and issued a report on IR&D. The Subcommittee concluded that the control of defense expenditures for IR&D, B&P and OTE could be achieved through improved administration, coupled with adequate oversight, rather than through legislation. The recommendations of the Subcommittee were similar to the Senate language with the exception of the establishment of a ceiling and the section regarding relevancy.

The Senate conferees maintained that greater congressional oversight was necessary to assure adequate controls over governmental payments for IR&D, B&P and OTE to defense contractors. The House conferees acceded to the Senate where the language coincided with its subcommittee recommendations. However, in the opinion of the House conferees, specific ceilings on the total DOD reimbursement and the language with respect to relevancy were not acceptable.

Control through restrictive congressional ceilings

The provisions of the Senate language established a ceiling of $625 million for the DOD reimbursement of IR&D, B&P and OTE costs to approximately 50 major contractors and was applicable to payments under cost type contracts only. The House conferees considered this provision as a line item in the authorizing procedure. During its hearings, it was established that such a line item provision was administratively impractical. Moreover, upon examination of the computation of the Senate ceiling amount, in the view of House conferees, it was found that it was, at best, an arbitrary amount, and there were questions as to the relationship of the ceiling with costs incurred by the affected contractors and contracts. The Senate conferees conceded to the House position and the language related to the establishment of a ceiling was deleted.

Relevancy

The House conferees agreed with the basic aim of the Senate language which required that payments should be made only for IR&D, B&P and OTE that was related to department functions or operations. However, with respect to basic research conducted as IR&D it cannot always be directly related to a DOD operation or function. Basic research is that type of research which is directed toward increase of knowledge in science rather than an application to a specific product. The development of such fundamental achievements in science is vital to military research and national interests. The House conferees were of the opinion that the relevancy phrase in the Senate language would unduly inhibit the conduct of needed basic research. The conferees agreed to delete the reference to relevancy and substitute the words "in the opinion of the Secretary of Defense, a potential relationship to a military function or operation" to assure a broad interpretation of the relationship of basic research to military requirements.

Other technical effort—OTE

The conferees agreed to eliminate legislative references to OTE because of the lack of specific definition of this category of cost. The Department in its testimony before the House Subcommittee on IR&D stated that OTE as a category of cost would no longer be used and that greater efforts would be made to correctly classify "OTE" costs as IR&D or B&P, or otherwise in the negotiation of agreements and contracts.

Relevancy of research to DOD activities

Section 204 of the Senate bill provided language identical to that contained in the fiscal year 1970 procurement act. It required that research would be conducted only on work having a direct and apparent relationship to a specific military function or operation.

The House version of the bill contained no comparable provision this year. After considering the findings in the House Subcommittee Report on R. & D., it was unanimously concluded that a comparable section should not be included because of the adverse impact of narrow interpretations of relevancy in the conduct of basic research. Accordingly, House conferees maintained that the criteria of "direct and apparent relationships" should not be used as a determining factor in the support of basic research efforts of contractors, universities, or non-profit institutions. However, the conferees agreed that applied research should have a demonstrable relevance to a military requirement.

The Senate agreed to delete the phrase "direct and apparent relationship" and substitute "in the opinion of the Secretary of Defense, a potential relationship" to offer greater assurance that *basic* research activities may be conducted to provide the broadest body of scientific knowledge to support future military needs.

Interagency Council on Domestic Applications of Defense Research

The Senate amendment contained a provision in Section 205 which, if enacted, would have established an interagency advisory council to be known as the Interagency Advisory Council on Domestic Applications of Defense Research. The Council was to be composed of eight members of various governmental departments, which would have the objective to encourage and support cooperative Department of Defense-domestic research projects.

The House bill contained no comparable provision.

The House conferees pointed out that there appears to be no need for a statutory council of this type in view of the existence of the research coordinating mechanisms of the existing Federal Council for Science and Technology and, in particular, the Department of Defense-domestic agency study group formed under the Federal Council to accomplish this particular objective. The House conferees also pointed out that no hearings had been conducted by the House Committee on Armed Services on this particular provision and therefore were unwilling to accept the Senate language without a more persuasive justification of a requirement for the creation of this new statutory body.

The Senate therefore reluctantly receded from its position and agreed to delete Section 205.

Permissive authority for research on single reentry system for Minuteman III and Poseidon

Section 206 of the Senate bill provided permissive authority for the Secretary of Defense to initiate a program of research on a single reentry vehicle system for Minuteman III and Poseidon. The section provided no additional funds but stipulated the funds would be transferred from other projects. The House bill contained no such provision.

The Senate recedes.

Increase in the level of domestic research effort

The Senate amendment included a provision as section 207 expressing the sense of Congress that an increase in government support of basic scientific research is necessary to preserve and strengthen the Nation's technology base, which in turn is essential both to the protection of the national security and the solution of unmet domestic requirements.

The resolution further provided that a larger share of the increased support that should be forthcoming should be provided through the National Science Foundation.

The language of the Senate provision also stipulated that the National Science Foundation should be provided with a 20% increase in the amount of research funds made available to it for the fiscal year beginning July 1, 1971.

The House bill contained no comparable provision.

The House conferees were generally sympathetic to the objectives reflected in the sense of Congress provision on domestic research effort. However, the House conferees pointed out that this matter had not been the subject of House Committee hearings, and therefore was not a matter on which the House members were prepared to act. The House conferees, however, were sympathetic to the objectives of this provision, and therefore agreed to accept the Senate language with an amendment reflecting the House position.

Reports to be submitted on request to Senate and House committees

Section 208 of the Senate bill contained language requiring agencies of the Federal Government to submit to the House and Senate Committees on Armed Services and the House Committee on Foreign Affairs and the Senate Committee on Foreign Relations, a copy of any report, study, or investigation requested by such committee if the report, study, or investigation was financed in whole or in part with Federal funds and was prepared by a person outside the Federal Government. The only exception provided by the language of the Senate section would be with respect to the exercise of Executive Privilege by the President. The House bill contained no such provision.

While conferees of both houses agreed that a greater effort was advisable in the surveillance of reports prepared by outside persons or agencies financed by the Department of Defense, it was agreed that the language of the section is unnecessary as a means of obtaining compliance with requests for copies of reports and studies.

The Senate recedes.

TITLE III—RESERVE FORCES

The House bill provided that for the fiscal year ending June 30, 1971, the Selected Reserve of the Coast Guard Reserve would be programmed to attain an average strength of not less than 16,590. The corresponding section of the Senate bill provided for an average strength of the Coast Guard Reserve of 15,000.

The minimum Coast Guard Selected Reserve strength required to carry out early response wartime missions is 16,590, as determined by the Coast Guard's "Force Analysis Study" and discussed in detail in House Report No. 91–1022. Budgetary limitations have forced a reduction in the actual Selected Reserve strength from approximately 17,000 to a current level of about 15,000. The budget request of $25.9 million for fiscal year 1971, and recruiting and training capabilities, will not permit the Coast Guard to reach a Selected Reserve strength of 16,590 during fiscal year 1971. In view of this situation, the conferees have agreed on an authorized strength of 15,000 for fiscal year 1971.

However, it is the belief of the House conferees that Coast Guard Selected Reserve strength should be adjusted upward next year to the 16,590 minimum required for wartime missions, and every effort should be

made by the Coast Guard to plan and fund for the attainment of that level at the earliest possible date.

The House recedes.

TITLE IV—ANTI-BALLISTIC MISSILE CONSTRUCTION AUTHORIZATION: LIMITS ON DEPLOYMENT

The Senate bill contained a separate title IV which authorized military construction in connection with the SAFEGUARD anti-ballistic missile system and included language limiting the deployment of the SAFEGUARD to specified sites in connection with the defense of our strategic missile deterrent. The House bill contained no such separate title. For reasons indicated earlier, the House agreed to the Senate provisions of construction authority in the present bill and the inclusion of Senate language on the limitation of deployment. Therefore, the House recedes on the inclusion of a separate title in regard to the ABM.

TITLE V—GENERAL PROVISIONS

Authority for the transfer of military equipment to the State of Israel

The Senate amendment to H.R. 17123 included a new Section 501 providing the President with authority to transfer military equipment to the State of Israel. There was no comparable position in the House passed bill.

The Senate Committee on Armed Services, in recommending this provision of law, explained its action in its Committee report as follows:

"The Committee action arises out of a recognition of the deteriorating military balance and the threat to world peace resulting from the deepening involvement of the Soviet Union in the Middle East, particularly their support of a war of attrition against Israel.

"The Committee believes that the sale to Israel of aircraft, and equipment necessary to use, maintain and protect such aircraft, should be authorized at once to facilitate action by the administration consistent with our policy of support for the security of Israel. The rapidity with which the military balance in the Middle East is being adversely affected by direct Soviet intervention calls for an authority in law that would make possible the sale of arms necessary to offset any past, present or future increased military assistance to other countries of the Middle East.

"In Section 501 the Committee affirms its view that the restoration and subsequent maintenance of the military balance in the Middle East is essential to the security of Israel and to world peace. In recognition of the severe economic burden presently borne by Israel in providing for its own defense, the Committee further provides that the credit terms upon which the authorized arms should be transferred be not less favorable than the terms extended to other countries receiving the same or similar armaments."

The managers on the part of the House fully concur in the urgent need for Presidential authority of this kind. However, notwithstanding the Senate action, it is the feeling of the Conferees that an expiration date should be provided in this authorization in order that the customary periodic authorization surveillance by Congress will be maintained as in other authorizations.

In order to effect this intention of the Conferees, language was added to the original Senate language which now provides that "the authority contained in the second sentence of this section shall expire September 30, 1972."

The Congress and the Committees responsible for the granting of this authority will be required to review the need for possible extension of this authority beyond September 30, 1972.

It is further understood that the Executive Branch will provide the Congress and the Committees responsible for this authorization with a semi-annual report on the implementation and utilization of the authority provided by this new section of law.

In order to insure that there is no doubt as to the interpretation of the Senate language, the Managers on the part of the House, the Senate Conferees concurring, reiterate their understanding that the language of the Senate amendment covers ground weapons, such as missiles, tanks, howitzers, armored personnel carriers, ordnance, etc., as well as aircraft. Further, it is intended that the words "equipment appropriate to * * * protect such aircraft" in the original Senate amendment be construed broadly and that they not be narrowly interpreted by the Executive Branch as imposing a requirement that only those ground weapons which are to be deployed by Israel in the physical proximity to airfields may be acquired by Israel under the authority of this section.

Support of Southeast Asia forces

The House bill contains a provision, Section 401, providing that funds authorized under this or any other act may be used in support of Vietnamese and other Free World forces in Vietnam and local forces in Laos and Thailand and for related costs on such terms and conditions as the Secretary of Defense may determine.

The corresponding section of the Senate bill, Section 502, provides a ceiling of $2,500,000,000 on such funds and provides amendments to:

1. Provide support to Vietnamese and other Free World forces "in support of Vietnamese forces." This amendment removed the geographical limits imposed by the phrase "in Vietnam" for the purpose of border sanctuaries and related operations.

2. Provide that no funds may be used in the form of additional pay for other Free World forces in Vietnam if the amount of such payment was greater than the amount of special pay authorized to be paid, for an equivalent period of service, to members of the United States armed forces. The purpose of this amendment was to insure that funds provided by the section would not provide additional pay for other Free World forces in excess of the $65 per month hostile fire pay provided for U.S. forces.

3. Prohibit the use of funds authorized in this section to support Vietnamese or other Free World forces "in actions designed to provide military support or assistance to the governments of Cambodia or Laos."

4. Provide that no defense article be furnished to the South Vietnamese or other Free World forces in Vietnam or local forces in Laos or Thailand with funds authorized pursuant to this section unless the government of those forces has agreed that such defense articles will not be transferred to a third country without notification to and the consent of the President of the United States.

The House receded from its position and accepted the amendments of the Senate, with further amendments to provide a dollar limitation of $2,800,000,000 for fiscal year 1971 and to provide that the restriction on use of funds for additional pay for other Free World forces shall not apply "to the continuation of payments of such additions to regular base pay provided for in agreements executed prior to July 1, 1970."

The conferees would like it understood that the change in the dollar limitation to $2,800,000,000,000 from the Senate ceiling is solely for the purpose of supplying flexibility to the Department of Defense should it be determined that additional money, if, made available, would have the effect of speeding up Vietnamization with the resulting possibility of more rapid withdrawal of U.S. troops.

The exception provided under the limitation of additional pay to other Free World forces is to assure that the U.S. will not renege on agreements already signed with the governments of such forces.

Requirement of certification by the Department of Defense on the structural integrity of the F–111 as a prior consideration for the obligation of funds

Section 503 of the Senate bill provides that of the funds authorized for the procurement of the F–111 aircraft, $283 million may not be obligated until the Secretary of Defense has determined that the F–111 has been subjected to and successfully completed a comprehensive structural integrity test program and has approved a program for the procurement of the aircraft and has certified the approved programs and findings to the Committees on Armed Services. The House conferees were satisfied that this provision would in no way delay the further procurement of this vitally needed aircraft; and, in fact, the Department of Defense has advised the conferees that it has no objection to this requirement and was prepared to provide the needed certification as to the readiness of the aircraft. Therefore, the House recedes.

The House conferees wish to reiterate that the agreement upon language in the bill in no way reflects agreement with the position stated in the Senate report to the effect that the procurement authorized in the present bill represents the final increment of the F–111 procurement.

It is pointed out that the funds available for the F–111 for fiscal year 1971 will not even complete the fourth wing. The House conferees are unswerving in their belief that four full wings of F–111's should be procured; and it is clear, as the earlier House report indicates, that the Air Force believes six wings are required but such have been precluded for budgetary reasons. The House conferees believe that future decisions should be made in the future, and *not* made now on an arbitrary basis. A present decision on all future requirements for the F–111 is both unnecessary and unwise.

As the report of the Senate Committee makes clear, "no other aircraft in the Air Force inventory can compete with the F–111." The House conferees, therefore, will not accept the imposition of constraint on future procurement of this aircraft and shall insist that the Department of Defense consider further procurement for fiscal year 1972 if necessary for defense requirements and that no prohibition should be placed on the Air Force in planning studies for a fifth or sixth wing.

*Limitations and controls on the C–5A program*

Section 504 of the Senate amendment contained language which would prohibit the obligation or expenditure of $200 million authorized to be appropriated for the procurement of the C–5A aircraft unless the Secretary of Defense submitted a plan for its expenditures to the Committees on Armed Services of the Senate and House of Representatives and such Committees approved the plan.

The House bill contained no comparable restriction or prohibition.

The conferees on the part of the House pointed out that they share the concern of the Senate in this matter. However, the action recommended by the Senate raises serious Constitutional questions in requiring that the Executive Branch come into agreement with the respective Committees on Armed Services before going forward with a discretionary action of this kind. Moreover, the Senate provision would, if enacted, have the effect of putting the Armed Services Committees in a position of acting as joint program managers on a matter which in the view of the House conferees should more

properly be the final responsibility of the Department of Defense.

In view of these House reservations, the conferees agreed to amend the Senate language to require the submission of a proposed plan of expenditure to the Committees on Armed Services of the Senate and House of Representatives with the further requirement that none of the $200 million could be obligated or expended until after the expiration of 30 days from the date upon which the plan had been submitted to the Congress.

The balance of the Senate language containing the various prohibitions and restrictions remained unchanged. The House, therefore, recedes from its position and accepts the Senate amendment with an amendment.

Requirement of authorization legislation on naval torpedoes beginning in fiscal year 1972

Section 505 of the Senate bill would provide that after December 31, 1970, no funds will be appropriated for use by the Navy for the procurement of torpedoes and related support equipment unless the appropriations of such funds has been authorized by legislation enacted after such date. The House bill contained no such provision.

The Senate amendment is consistent with language adopted by the House last year but stricken from the conference report at the insistence of Senate conferees.

The House recedes.

Chemical and biological warfare

The Senate amendment included in Section 506, language which reaffirmed the prohibition on the procurement of CBW delivery systems contained in P.L. 91–121. However, the Senate amendment contained three additional provisions not previously appearing in the language relating to CBW last year.

Briefly, these three additions are as follows:

I. Subsection 506(b) amended last year's permanent provisions on CBW activities by making more rigid the provisions on disposal of any biological or lethal chemical agent.

II. Subsection 506(c) of the Senate language provided that the Secretary of Defense shall enter into appropriate arrangements with the National Academy of Sciences to conduct a study of the danger inherent in the use of herbicides and the ecological and physiological effects of the defoliation program in South Vietnam, and

III. Section 506(d) barred future disposition of chemical and biological agents unless they have been detoxified or made harmless.

There was no comparable House provision.

The Department of Defense advised the Conferees that it had no objection to the language of the Senate amendment but was concerned over the possibility that situations could arise where immediate disposal of quantities of CBW agents or munitions would be required to assure safety to individuals. Thus, it was pointed out that the delays in disposal actions caused by the notification requirements in Section 506 could in such cases jeopardize the safety of individuals. Additionally, the disposal of small laboratory quantities of lethal agents is a daily recurring action in research and development and in such instances notification for each action through the Department of Defense to HEW and the Congress would not be feasible.

The Conferees concurred in this reservation of the Department of Defense, and, therefore, agreed to amend the Senate language to overcome these problems. The amended language appears as a new paragraph (g) and is self-explanatory.

The language is as follows:

"(g) Nothing contained in this section shall be deemed to restrict the transportation or disposal of research quantities of any lethal chemical or any biological warfare agent, or to delay or prevent, in emergency situations either within or outside the United States, the immediate disposal together with any necessary associated transportation, of any lethal chemical or any biological warfare agent when compliance with the procedures and requirements of this section would clearly endanger the health or safety of any person."

The House, therefore, recedes from its position and accepts the Senate language with an amendment.

Premature disclosure of defense contract awards

Section 507 of the Senate bill precludes the Secretary of Defense from furnishing information in advance of any public announcement to any individual concerning the identity or location of a person or corporation receiving a Defense contract. The House bill contained no such provision.

The House recedes.

Employment priority for persons affected by reductions-in-force

Section 508 of the Senate bill provides a sense of the Congress Resolution that the various executive departments will give priority in filling vacant positions with career Civil Service employees who are being displaced in the Department of Defense or other departments through reductions-in-force.

The House conferees were in agreement that this amendment had no place in the Military Procurement bill and insisted that regulations or legislation regarding Civil Service employees was properly the jurisdiction of the Post Office and Civil Service Committee. Furthermore, it should be noted that the Executive Branch is already implementing the policy proposed by the provision.

The Senate recedes.

Limitation on permanent change of station assignments

Included in the Senate language as Section 509 was a Senate floor amendment which directed the Secretary of Defense to initiate new procedures aimed at reducing the expenditures in connection with permanent change of station for military personnel.

The language of the Senate amendment also directed that there be effected "not less than a 25-percent reduction" in expenditures for permanent changes of station assignments beginning July 1, 1971, "and in each fiscal year thereafter."

The Department of Defense, in commenting on this Senate action, maintained that the enactment of this provision would "present extreme administrative and budgetary problems, as well as problems in manpower programs, especially considering the short time allowed for compliance and the turbulent situation with respect to military manpower."

The Navy advised the conferees that enactment of this provision would have a devastating impact on its already austere ship to shore rotation policy. Among other things, the Navy pointed out that—

"The Navy is a sea duty oriented force and must provide a relatively equitable opportunity for shore assignments because of the privations associated with duty at sea. There are approximately 335,000 enlisted and 37,000 officer sea billets compared to 151,000 enlisted and 41,000 officer shore billets. Increasing tour lengths of duty ashore would require disproportionate extensions at sea. There are 36 "deprived" enlisted ratings, comprising 46% of the enlisted population. Men in these ratings now spend 12 to 16 years at sea during a normal 20-year career."

The House conferees fully concur in the general objectives of the Senate language. The conferees were unanimous in their view that the Armed Services frequently require military members to change duty assignments without any genuine military requirement for such transfer. These frequently unnecessary permanent changes of assignment are essentially due to either outmoded service policy or poor management, and simply result in unnecessary expenditures of millions of dollars while at the same time causing great inconvenience and hardship to service families.

On the other hand, the House conferees concede that lack of stability in the size of the Military Establishment and the personnel movements required by our commitments in Southeast Asia and other parts of the world make acceptance of the Senate language impractical at this time. Therefore, that portion of the Senate language requiring specified reductions in expenditures was deleted by the conferees.

The House therefore recedes from its objection to the Senate amendment, with an amendment that reflects the sense of Congress that the Department of Defense must initiate promptly new procedures with respect to domestic and foreign permanent change of station assignments for military personnel.

Requirement for the annual authorization for the number of active duty personnel

Section 510 of the Senate bill provides that beginning on July 1, 1971, an authorization for the average annual active duty strength of the Armed Forces would be required as a condition precedent to the appropriation of funds for this purpose.

There was no comparable House provision.

The House conferees had no objection to the Senate language, and therefore accepted the Senate amendment.

Encouragement of contractors to use closed military facilities

Section 511 of the Senate bill requires the Secretary of Defense to encourage recipients of defense contracts to use military installations being closed and to offer employment to former employees of military installations who are unemployed as a result of such closures. House conferees believed that such a proposed policy would introduce serious complications to the Department of Defense procurement program. Most defense installations are constructed for specialized purposes and would require substantial rearrangement for production purposes. House conferees insisted on a deletion of this section.

The Senate recedes.

No change in the command structure of U.S. Armed Forces

Section 512 of the Senate bill provides that no modification or change in the command structure of the United States armed forces shall be made until the Senate and House Committees on Armed Services of the 92d Congress shall have had 60 days to examine the document known as the Fitzhugh Report. The House bill contained no such provision.

The House conferees opposed the language as unnecessary and subject to misinterpretation.

The Senate recedes.

*Military Recruiting At Colleges*

The bill as recommended by the Armed Services Committee and passed by the House contained language in Section 402 which would have prohibited the use of funds authorized for appropriation, to be used for grants to any institution of higher learning when the Secretary of Defense or his designee determines that recruiting personnel of the armed forces were being barred from the premises or property of such institution.

The language provided that the prohibition would not apply under circumstances in which the Secretary of Defense or his designee determines the expenditure is a continuation or renewal of a previous grant to

such institution which is likely to make a significant contribution to the defense effort.

The language of the section also provided that the Secretaries of the military services are required to furnish to the Secretary of Defense the names of any institutions of higher learning which the Secretary determines are barring military recruiters from the campus of the institution.

The Senate amendment contained no similar provision.

The Senate conferees expressed support of the objectives of the House language but expressed concern that the language of the provision might, under certain circumstances, result in a denial of federal funds to a college or university despite the fact that neither the student nor the faculty were responsible for denying military recruiters the opportunity to be located on campus.

In view of these reservations, the House conferees agreed to modify the House language to provide that this prohibition would apply when military recruitment was "barred by the policy of the institution."

The Senate therefore recedes and accepts the House position with an amendment.

*Summary*

The bill as presented to the Congress by the President totaled $20,605,489,000. The bill as passed the House totaled $20,571,489,000. The bill as passed the Senate totaled $19,242,889,000.

The bill as agreed to in conference totals $19,929,089,000.

The figure arrived at by the conferees is $642,400,000 less than the bill as it passed the House, $686,200,000 more than the bill as it passed the Senate, and is $676,400,000 less than the bill as it was presented to the Congress by the President.

The House recedes from its disagreement to the amendment of the Senate to the title of the bill and agrees to the same.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PEPPER (at the request of Mr. ALBERT), for today, an account of official business.

Mr. MCCLORY (at the request of Mr. GERALD R. FORD), through October 12, on account of official business.

Mr. PIRNIE (at the request of Mr. GERALD R. FORD), for September 28 through October 9, on account of official business.

Mrs. CHISHOLM (at the request of Mr. KOCH), for the week of September 28, on account of official business.

Mr. HAGAN (at the request of Mr. ALBERT), for today, on account of official business.

Mr. OLSEN (at the request of Mr. ALBERT), for today and the remainder of the week, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. RIVERS, for 1 hour, today; and to revise and extend his remarks and include extraneous matter.

Mr. RARICK (at the request of Mr. PREYER of North Carolina), for 10 minutes, today; to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. SCHMITZ) and to revise and extend their remarks and include extraneous matter:)

Mr. CUNNINGHAM, for 60 minutes, on October 1.

Mr. CONTE, for 10 minutes, today.

Mrs. HECKLER of Massachusetts, for 10 minutes, today.

Mr. HALL, for 30 minutes, today, and to revise and extend his remarks and include extraneous matter.

Mr. RANDALL, for 15 minutes, today.

Mr. BOLAND (at the request of Mr. DANIEL of Virginia), for 10 minutes, today; and to revise and extend his remarks and include extraneous matter.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. O'NEILL of Massachusetts and to include extraneous matter in five instances.

Mr. HOLIFIELD.

Mr. HOLIFIELD asked and was given permission to revise and extend his remarks made in Committee of the Whole today and to include extraneous matter.

Mrs. HANSEN of Washington (at the request of Mr. HOLIFIELD) and to include extraneous matter following his remarks on Reorganization Plan No. 4.

Mr. SCHMITZ to extend his remarks during discussion of S. 3558.

(The following Members (at the request of Mr. MCCLOSKEY) and to include extraneous matter:)

Mr. HARSHA.

Mr. DERWINSKI.

Mr. KEITH.

(The following Members (at the request of Mr. DANIEL of Virginia) and to include extraneous matter:)

Mr. ABBITT.

Mrs. SULLIVAN in three instances.

(The following Members (at the request of Mr. SCHMITZ) and to include extraneous matter:)

Mr. WOLD in two instances.
Mr. PRICE of Texas in three instances.
Mr. BURTON of Utah in two instances.
Mr. SCHERLE in 10 instances.
Mr. CONTE.
Mr. GUDE.
Mr. DICKINSON.
Mr. WYMAN in two instances.
Mr. ESHLEMAN.
Mr. HOSMER in two instances.
Mr. HORTON in three instances.
Mr. CRAMER.
Mr. DON H. CLAUSEN.
Mr. HASTINGS.
Mr. SCHMITZ.
Mr. FINDLEY in seven instances.
Mr. THOMSON of Wisconsin.
Mr. ASHBROOK.
Mr. HORTON in three instances
Mr. DERWINSKI in two instances.

(The following Members (at the request of Mr. PREYER of North Carolina:)

Mr. EDWARDS of California.
Mr. DINGELL in three instances.
Mr. SCHEUER.
Mrs. GRIFFITHS in two instances.
Mr. KASTENMEIER.
Mr. OLSEN in two instances.
Mr. VANIK in two instances.
Mr. WOLFF.
Mr. RARICK in five instances
Mr. THOMPSON of New Jersey.
Mr. FARBSTEIN in four instances.
Mr. VAN DEERLIN in three instances.

## SENATE BILLS, JOINT RESOLUTIONS, AND CONCURRENT RESOLUTIONS REFERRED

Bills, joint resolutions and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 708. An act for the relief of Lawrence J. Nunes; to the Committee on the Judiciary.

S. 3657. An act to amend chapters 31, 34, 35, and 36 of title 38, United States Code, in order to make improvements in the vocational rehabilitation and educational programs under such chapters; to authorize an advance initial payment and prepayment of the educational assistance allowance to eligible veterans and persons pursuing a program of education under chapters 34 and 35 of such title; to establish a work-study program and work-study additional educational assistance allowance for certain eligible veterans; and for other purposes; to the Committee on Veterans' Affairs.

S. 3785. An act to amend title 38, United States Code, to authorize educational assistance to wives and children, and home loan benefits to wives, of members of the Armed Forces who are missing in action, captured by a hostile force, or interned by a foreign government or power; to the Committee on Veterans' Affairs.

S. 4368. An act to extend and amend laws relating to housing and urban development, and for other purposes; to the Committee on Banking and Currency.

S.J. Res. 236. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, of decennial revised editions thereof, and of biennial cumulative supplements to such revised editions; to the Committee on House Administration.

S. Con. Res. 81. Concurrent resolution authorizing the printing of additional copies of Senate hearings on Copyright Law Revision (S. 597, Ninetieth Congress); to the Committee on House Administration.

## ENROLLED JOINT RESOLUTION SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 1366. Joint resolution to provide for the temporary extension of the Federal Housing Administration's insurance authority.

## ADJOURNMENT

Mr. DANIEL of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 53 minutes p.m.), the House adjourned until tomorrow, Tuesday, September 29, 1970, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2404. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a Presidential determination authorizing an increase in military grant assistance to a country in Asia, pursuant to section 614(a) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

2405. A letter from the Chairman, Equal Employment Opportunity Commission, transmitting the fourth annual report of the Commission, covering fiscal year 1969, pursuant to section 705(d) of the Civil Rights Act of 1964 (H. Doc. 91–378); to the Committee on Education and Labor and ordered to be printed.

2406. A letter from the Director of Civil Defense, Department of the Army, transmitting a report of Federal contributions—personnel and administration—for fiscal year 1970, pursuant to subsection 205 of the Federal Civil Defense Act of 1950, as amended; to the Committee on Armed Services.

2407. A letter from the Director of Civil Defense, Department of the Army, transmitting a report of Federal contributions program equipment and facilities for the quarter ended June 30, 1970, pursuant to subsection 201(i) of the Federal Civil Defense Act of 1950, as amended; to the Committee on Armed Services.

2408. A letter from the Chairman, Indian Claims Commission, transmitting a report that proceedings have been finally concluded with respect to docket No. 178, *The Confederated Tribes of the Colville Reservation, Plaintiff,* v. *The United States of America, Defendant,* pursuant to 60 Stat. 1055, 25 U.S.C. 70t, section 21; to the Committee on Interior and Insular Affairs.

2409. A letter from the Secretary of Commerce, transmitting the seventh annual report of activities for the promotion of foreign commerce through the use of mobile trade fairs, covering fiscal year 1970, pursuant to section 212(d) of Public Law 87–839; to the Committee on Merchant Marine and Fisheries.

2410. A letter from the Comptroller General of the United States, transmitting a report on management of federally financed research by the University of Michigan—a case study; to the Committee on Government Operations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to an order of the House on Sept. 24, 1970, the following report was filed on Sept. 25, 1970*]

Mr. MILLS: Committee on Ways and Means. H.R. 19444. A bill to authorize for a temporary period the expenditure from the airport and airway trust fund of amounts for the training and salary and expenses of guards to accompany aircraft operated by U.S. air carriers, to raise revenue for such purpose, and to amend section 7275 of the Internal Revenue Code of 1954 with respect to airline tickets and advertising (Rept. No. 91–1471). Referred to the Committee of the Whole House on the State of the Union.

[*Pursuant to an order of the House on Sept. 24, 1970, the following report was filed on Sept. 26, 1970*]

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 19318. A bill to amend the Public Health Service Act to expand, improve, and better coordinate the family planning services and population research activities of the Federal Government, and for other purposes; with an amendment (Rept. No. 91–1472). Referred to the Committee of the Whole House on the State of the Union.

[*Pursuant to an order of the House on Sept. 24, 1970, the following conference report was filed*]

Mr. RIVERS: Committee of conference. Conference report on H.R. 17123. An act to authorize appropriations during the fiscal year 1971 of procurement of aircraft missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes (Rept. No. 91–1473). Ordered to be printed.

[*Submitted Sept. 28, 1970*]

Mr. O'NEILL of Massachusetts: Committee on Rules. House Resolution 1223. Resolution for consideration of H.R. 17538, a bill to extend for 1 year the act of September 30, 1965, relating to high-speed ground transportation, and for other purposes. (Rept No. 91–1474). Referred to the House Calendar.

Mr. O'NEILL of Massachusetts: Committee on Rules. House Resolution 1224. Resolution for consideration of H.R. 18185, a bill to provide long-term financing for expanded urban mass transportation programs, and for other purposes (Rept. No. 91–1475). Referred to the House Calendar.

Mr. YOUNG: Committee on Rules. House Resolution 1225. Resolution for consideration of H.R. 18970, a bill to amend the tariff and trade laws of the United States, and for other purposes (Rept. No. 91–1476). Referred to the House Calendar.

Mr. FASCELL: Committee on Foreign Affairs. House Joint Resolution 1077. Joint Resolution to amend the joint resolution authorizing appropriations for the payment by the United States of its share of the expenses of the Pan American Railways Congress Association (Rept. No. 91–1477). Referred to the Committee of the Whole House on the State of the Union.

Mr. FASCELL: Committee on Foreign Affairs. H.R. 6240. A bill to amend the act entitled "An Act authorizing the village of Baudette, State of Minnesota, its public successors or public assigns, to construct, maintain, and operate a toll bridge across the Rainy River at or near Baudette, Minnesota", approved December 21, 1950 (Rept. No. 91–1478). Referred to the Committee of the Whole House on the State of the Union.

Mr. FASCELL: Committee on Foreign Affairs. H.R. 15069. A bill to authorize the Thousand Islands Bridge Authority to construct, maintain, and operate an additional toll bridge across the St. Lawrence River at or near Cape Vincent, N.Y. (Rept. No. 91–1479). Referred to the Committee of the Whole House on the State of the Union.

Mr. POAGE: Committee on Agriculture. H.R. 18884. A bill to amend section 8c(6)(I) of the Agricultural Marketing Agreement Act of 1937, as amended, to permit projects for paid advertising under marketing orders, to provide for a potato research and promotion program, and to amend section 8e of the Agricultural Marketing Agreement Act of 1937, as amended, to provide for the extension of restrictions on imported commodities imposed by such section to imported raisins, olives, and prunes; with amendments (Rept. No. 91–1480). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BURLESON of Texas (for himself and Mr. BUSH):

H.R. 19470. A bill to amend title XVIII of the Social Security Act to modify the nursing service requirement and certain other requirements which an institution must meet in order to qualify as a hospital thereunder so as to make such requirements more realistic insofar as they apply to smaller institutions; to the Committee on Ways and Means.

By Mr. COWGER:

H.R. 19471. A bill to amend the Fair Labor Standards Act of 1938, to exempt certain high wage earners; to the Committee on Education and Labor.

H.R. 19472. A bill to amend the Fair Labor Standards Act of 1938 to maintain at $500,000 the annual dollar volume test for coverage by that act of the employees of certain enterprises engaged in commerce; to the Committee on Education and Labor.

By Mr. DADDARIO:

H.R. 19473. A bill to authorize the National Science Foundation to conduct research and educational programs to prepare the country for conversion from defense to civilian, socially oriented research and development activities, and for other purposes; to the Committee on Science and Astronautics.

By Mr. DINGELL:

H.R. 19474. A bill to promote the greater availability of motor vehicle insurance in interstate commerce under more efficient and beneficial marketing conditions; to the Committee on Interstate and Foreign Commerce.

H.R. 19475. A bill to regulate interstate commerce by requiring certain insurance as a condition precedent to using the public streets, roads, and highways, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 19476. A bill to amend the Internal Revenue Code of 1954, and for other purposes; to the Committee on Ways and Means.

By Mr. FULTON of Pennsylvania:

H.R. 19477. A bill to provide insurance for member accounts in State and federally chartered credit unions, and for other purposes; to the Committee on Banking and Currency.

H.R. 19478. A bill to provide a comprehensive Federal program for the prevention and treatment of alcohol abuse and alcoholism; to the Committee on Interstate and Foreign Commerce.

By Mr. MINISH:

H.R. 19479. A bill to protect a person's right of privacy by providing for the designation of sexually oriented advertisements and for the return of any such unrequested advertisements at the expense of the sender; to the Committee on Post Office and Civil Service.

By Mr. SNYDER:

H.R. 19480. A bill to provide a penalty for unlawful assault upon policemen, firemen, and other law enforcement personnel, and for other purposes; to the Committee on the Judiciary.

By Mr. HATHAWAY:

H.R. 19481. A bill to strengthen equal educational opportunities for all children by providing grants to State and local educational agencies to support model school programs designed to reduce and eliminate racial isolation and to provide other improvements in the quality of education in the public schools; to the Committee on Education and Labor.

By Mr. PICKLE:

H.R. 19482. A bill to amend the Public Health Service Act to provide for the making of grants to medical schools and hospitals to assist them in establishing special departments and programs in the field of family practice, and otherwise to encourage and

promote the training of medical and paramedical personnel in the field of family medicine; to the Committee on Interstate and Foreign Commerce.

By Mr. VANIK:

H.R. 19483. A bill to amend title XI of the Federal Aviation Act of 1958 to provide that the Civil Aeronautics Board shall require the boycotting of certain movement by aircraft in cases of international aircraft hijacking, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GUBSER:

H.J. Res. 1385. Joint resolution authorizing the President to proclaim the 28th day of September of each year as "Teacher's Day"; to the Committee on the Judiciary.

By Mr. LANGEN (for himself, Mr. FISHER, Mr. FLYNT, Mr. MCDONALD of Michigan, Mr. BUCHANAN, Mr. SNYDER, and Mr. DICKINSON):

H. Con. Res. 754. Concurrent resolution expressing the sense of the Congress with respect to sanctions against Rhodesia; to the Committee on Foreign Affairs.

By Mr. BROOMFIELD:

H. Res. 1226. Resolution designating January 22 of each year as Ukrainian Independence Day; to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DADDARIO:

H.R. 19484. A bill for the relief of Mrs. Ellis Medlock; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 19485. A bill for the relief of Eleanor Bacon-Peck; to the Committee on the Judiciary.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

603. By the SPEAKER: Petition of the general president, Laundry, Dry Cleaning and Dye House Workers' International Union, Chicago, Ill., relative to minimum wage legislation; to the Committee on Education and Labor.

604. Also, petition of the President of the Republic of Peru, expressing his appreciation for the aid of the American people to the people of Peru; to the Committee on Foreign Affairs.

605. Also, petition of Mercedes G. Vda. de Calimbas, Sulucan, Bocaue, Bulacan, Philippines, relative to increased disability compensation payments for disabled veterans; to the Committee on Veterans' Affairs.

# SENATE—*Monday, September 28, 1970*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. RUSSELL).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Lord of the morning hour, of the afternoon, the evening, and the night, "under the shadow of Thy wing" we have dwelt secure and come once more to serve Thee in this place. For journeying mercies, for renewed strength, and a rekindled faith, we give Thee thanks. Free us this day from all that obstructs our doing Thy will. Command all our talents of mind and heart and will in service to the whole Nation.

Eternal God, we thank Thee for the measure of peace achieved and the promise of peace yet to come. We beseech Thee, by Thy grace, to put down the pride, greed, and anger that turn man against man and nation against nation, so that wars may be ended, the peace of Thy kingdom established, and all men call Thee Father.

In Thy holy name we pray. Amen.

## MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS AND A JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Geisler, one of his secretaries, and he announced that on September 25, 1970, the President had approved and signed the following acts and joint resolution:

S. 58. An act providing for the addition of the Freeman School to the Homestead National Monument of America in the State of Nebraska, and for other purposes;

S. 203. An act to amend the act of June 13, 1962 (76 Stat. 96), with respect to the Navajo Indian irrigation project;

S. 434. An act to reauthorize the Riverton extension unit, Missouri River Basin project, to include therein the entire Riverton Federal reclamation project, and for other purposes.

S. 1087. An act for the relief of Vernon Louis Hoberg.

S. 1170. An act to authorize the Department of Commerce to make special studies, to provide services, and to engage in joint projects, and for other purposes;

S. 2808. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Minot extension of the Garrison diversion unit of the Missouri River Basin project in North Dakota, and for other purposes;

S. 2882. An act to amend Public Law 394, 84th Congress, to authorize the construction of supplemental irrigation facilities for the Yuma Mesa Irrigation District, Arizona;

S. 2976. An act for the relief of Margarita Anne Marie Baden (Nguyen Tan Nga);

S. 3337. An act to provide for the disposition of funds appropriated to pay judgments in favor of the Yakima Tribes in Indian Claims Commission dockets numbered 47–A, 162, and consolidated 47 and 164, and for other purposes;

S. 3617. An act to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development;

S. 3838. An act to prevent the unauthorized manufacture and use of the character "Johnny Horizon," and for other purposes;

S. 3997. An act to provide for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in Court of Claims case 47567, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in Indian Claims Commission docket numbered 349, and for other purposes;

S. 4033. An act to provide for the disposition of funds appropriated to pay a judgment in favor of the Chemehuevi Tribe of Indians; and

S.J. Res. 67. Joint resolution granting the consent of Congress to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, as signatory bodies, for certain amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin.

## REPORT ON SALARIES OF OFFICERS AND EMPLOYEES OF ORGANIZATIONS FUNDED UNDER THE ECONOMIC OPPORTUNITY ACT—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which, with the accompanying report, was referred to the Committee on Labor and Public Welfare:

*To the Congress of the United States:*

I hereby submit the report on salaries of officers and employees of organizations funded under the Economic Opportunity Act that is required by Section 610–1(b) of the Economic Opportunity Act as amended in 1966. The report was prepared by the Office of Economic Opportunity and covers the fiscal year that ended on June 30, 1970.

RICHARD NIXON.

THE WHITE HOUSE, *September 28, 1970.*

## EXECUTIVE MESSAGES REFERRED

As in executive session, the President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received today, see the end of Senate proceedings.)

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed a bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law-enforcement authority in the field of drug abuse, in which it requested the concurrence of the Senate.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, September 25, 1970, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of measures on the calendar to which there is no objection, beginning with Calendar No. 1252.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## RANDOLPH-SHEPPARD ACT FOR THE BLIND AMENDMENTS OF 1970

The Senate proceeded to consider the bill (S. 2461) to amend the Randolph-Sheppard Act for the blind so as to make certain improvements therein, and for other purposes which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Randolph-Sheppard Act for the Blind Amendments of 1970."

PREFERENCE FOR VENDING FACILITIES ON FEDERAL PROPERTY

SEC. 2. Section 1 of the Act entitled "An Act to authorize the operations of stands in Federal buildings by blind persons, to enlarge the economic opportunities of the blind, and for other purposes," approved June 20, 1936 (20 U.S.C. 107), is amended to read as follows:

"SECTION 1. For the purposes of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and stimulating the blind to greater efforts in striving to make themselves self-supporting, blind persons licensed under the provisions of this Act shall be authorized to operate vending facilities on any Federal or other property. In authorizing the operating of vending facilities on Federal property, preference shall be given, so far as feasible, to blind persons licensed by a State agency as provided in this Act; and the head of each department of agency in control of the maintenance, operation, and protection of Federal property shall, after consultation with the Secretary and with the approval of the President, prescribe regulations designed to assure such preference (including exclusive assignment of vending machine income to achieve and protect such preference) for such licensed blind persons without adversely affecting the interests of the United States."

CONCESSION VENDING SURVEYS

SEC. 3. Section 2(a)(1) of such Act of June 20, 1936 (20 U.S.C. 107a), is amended to read as follows:

"(1) Make surveys of concession vending opportunities for blind persons on Federal and other property in the United States;"

VENDING FACILITY

SEC. 4. Such Act of June 20, 1936, is further amended by striking out "vending stand" and "stand" wherever they appear and inserting in lieu thereof "vending facility" and by striking out "vending stands" and "stands" wherever they appear and inserting in lieu thereof "vending facilities".

ELIMINATION OF AGE REQUIREMENT AND VENDING OF FOOD AND BEVERAGES

SEC. 5. Section 2(a)(4) of such Act of June 20, 1936, is amended by (1) striking out "and at least twenty-one years of age", (2) striking out "articles dispensed automatically or in containers or wrapping in which they are placed before receipt by the vending stand, and such other articles as may be approved for each property by the department or agency in control of the maintenance, operation, and protection thereof and the State licensing agency in accordance with the regulations prescribed pursuant to the first section:" and inserting in lieu thereof the following: "foods, beverages, and other such articles or services dispensed automatically or manually and prepared on or off the premises in accordance with all applicable health laws, as determined by the State licensing agency:".

DELETION OF CERTAIN LIMITATIONS IN LICENSING BLIND OPERATORS OF VENDING FACILITIES

SEC. 6. Section 2(b) of such Act of June 20, 1936, is amended by (1) striking out "and have resided for at least one year in the State in which such stand is located", and (2) striking out "but are able, in spite of such infirmity, to operate such stands."

PROVISION OF VENDING FACILITY LOCATIONS

SEC. 7. Section 2 of such Act is further amended by adding a new subsection (d) at the end thereof:

"(d) In the design, construction, or substantial alteration or renovation of each public building after January 1, 1971, for use by any department, agency, or instrumentality of the United States, there shall be included, after consultation with the State licensing agency, a satisfactory site or sites with space and electrical and plumbing outlets and other necessary requirements suitable for the location and operation of a vending facility or facilities by a blind person or persons. No space shall be rented, leased or otherwise acquired for use by any department, agency, or instrumentality of the United States after January 1, 1971, unless such space includes, after consultation with the State licensing agency, a satisfactory site or sites with space and electrical and plumbing outlets and other necessary requirements suitable for the location and operation of a vending facility or facilities by a blind person or persons. All departments, agencies, and instrumentalities of the United States shall consult with the Secretary (or his designee) and the State licensing agency in the design, construction, or substantial alteration or renovation of each public building used by them, and in the renting, leasing, or otherwise acquiring of space for their use, to insure that the requirements set forth in this subsection are satisfied. This subsection shall not apply (1) when the Secretary (or his designee) and the State licensing agency determine that the number of people using the property is insufficient to support a vending facility or (2) to the rental of space by the Government in a building wherein the lessor retains space for a restaurant or other establishment which would be in competition with a blind operator of a vending facility purveying food and other articles."

ARBITRATION BETWEEN OPERATORS AND LICENSING AGENCIES

SEC. 8. Section 3(6) of such Act (20 U.S.C. 107b) is amended by substituting a comma for the period at the end thereof and adding the following new wording: "including binding arbitration by three persons consisting of one person designated by the head of the State licensing agency, one person designated by the licensed blind operator, and a third person selected by the two, who shall serve as chairman."

DEFINITIONS

SEC. 9.(a) Section 6(b) of such Act (20 U.S.C. 107e) is amended to read as follows:

"(b) The term 'blind person' means a person whose central visual acuity does not exceed 20/200, in the better eye with correcting lenses or whose visual acuity, if better than 20/200, is accompanied by a limit to the field of vision in the better eye to such a degree that its widest diameter subtends an angle of no greater than 20 degrees. In determining whether an individual is blind, there shall be an examination by a physician skilled in diseases of the eye or by an optometrist, whichever the individual shall select."

(6) Section 6 of such Act is further amended by adding at the end thereof the following new subsection:

"(f) The term 'vending facility' includes, but is not limited to, automatic vending machines, snackbars, cart service, shelters, counters, and such other appropriate auxiliary equipment (as the Secretary may by regulations prescribe) as are necessary for the sale of the articles or services referred to in section 2(a)(4), which are, or may be operated by blind licensees, and such term also includes cafeterias, but only upon a demonstration by the State licensing agency if the feasibility of the inclusion of such facilities, as evidenced by a program of training and supervision of blind licensees commensurate with the proposed operation."

ARBITRATION BETWEEN AGENCIES

SEC. 10. Such Act is further amended by redesignating section 8 (20 U.S.C. 107f) as section 9 and by inserting the following new section after section 7:

"SEC. 8. (a) An arbitration board of three persons consisting of one person designated by the Secretary who shall serve as chairman, one person designated by the head of the Federal department or agency controlling Federal property over which a dispute arises, and a third person selected by the two who is not an employee of the departments concerned shall hear appeals as provided in subsection (b) of this section.

"(b) If, in the opinion of a State licensing agency designated by the Secretary under this Act, any department or agency in control of the maintenance, operation, and protection of Federal property is failing to comply with the provisions of this Act, or any regulations issued thereunder, it may appeal to the board. The board shall, after notice and hearing, render its decision which shall be binding. If the board finds and determines that the acts or practices of any such department or agency are in violation of this Act, or the regulations issued thereunder, the head of the affected department or agency shall promptly cause such acts or practices to be terminated, and shall take such other action as may be necessary to carry out the decision of the board. All decisions of the board shall be published."

JUDICIAL REVIEW

SEC. 11. Such Act is further amended by adding the following new section:

"SEC. 10. Notwithstanding other provisions of this Act, any blind person or State licensing agency suffering legal wrong because of any agency action, or adversely affected or aggrieved by such action within the meaning of this Act or other relevant statutes, shall be entitled to and shall have standing for judicial review thereof."

APPLICABILITY

SEC. 12. Such Act is further amended by adding the following new section:

"SEC. 11. Notwithstanding any other provision of law, the provisions of this Act are applicable to any agency, establishment, or other entity created within the Government of any department or agency of the United States."

EFFECTIVE DATE

SEC. 13. The amendments made by this Act shall become effective January 1, 1971.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-1235), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The principal objective of this bill is to enlarge the employment opportunities of qualified blind persons through the operation of vending facilities on federally controlled property. It provides that in authorizing the operation of vending facilities on

Federal property blind persons licensed by a State agency as provided in the act shall be given, so far as feasible, preference and requires that Government agencies in control of such properties shall prescribe regulations designed to assure such preference, including exclusive assignment of vending machine income to achieve and protect such preference. This bill also would include vending machines in the definition of a vending facility and require that, after January 1, 1971, provisions for vending facilities shall be included in the design, construction, or substantial alteration or renovation of each public building controlled by a Federal agency, insofar as is judged feasible by the Secretary of Health, Education, and Welfare in consultation with the State licensing agency.

BACKGROUND OF THE LEGISLATION

The Randolph-Sheppard Act originally was enacted by the Congress in June 1936, to establish the program granting preference to blind persons in the operation of vending stands in Federal buildings. Since 1936, the vending stand program has grown until there are approximately 3,400 blind persons in the overall effort. Thousands of critically handicapped persons have thus been given the opportunity to become self-supporting entrepreneurs over the past 34 years, and their performance has served as an inspiration to countless others who are handicapped by blindness.

At the end of fiscal year 1969, there were 836 stands on Federal properties employing 972 blind persons. In addition, following the Federal lead, the State agencies for the blind and the States vocational rehabilitation agencies which license blind operators have opened employment opportunities for concessionaires in State and municipal buildings, as well as nongovernmental buildings. There were 2,084 stands employing 2,287 blind persons on non-Federal installations last fiscal year. During the fiscal year 1968, these concessions operated by blind persons recorded a gross business of $78.9 million. The average income of the blind operators was $5,580.

Since its enactment 34 years ago in 1936, the Randolph-Sheppard vending stand act has been amended only once—in 1954—when improvements to it were included in the Vocational Rehabilitation Amendments of 1954.

Further improvements to meet changing conditions over the years, such as the rapid proliferation of automatic vending machines, have been suggested by representatives of national organizations for the blind and handicapped, as well as State agencies authorized to administer the program. These changes have been incorporated in S. 2461, together with modifications suggested by Federal authorities, for the purpose of expanding the opportunities for vending facilities operations.

S. 2461 was introduced on June 30, 1969, by Senator Randolph, and referred to the Committee on Labor and Public Welfare. The bill has 51 cosponsors. A special Subcommittee on Handicapped Workers, under the chairmanship of Senator Randolph, was appointed. Two days of hearings were held July 9 and 10, 1970, at which time testimony was submitted on the bill by 19 witnesses.

Rehabilitation Services Administration Commissioner Edward Newman testified before the committee that the bill "would extend and expand this program in its efforts to provide employment opportunities for a much greater number of blind persons."

Further information provided at the hearings indicated that: Revenues from vending stands are being jeopardized by a growing trend toward the exclusive use of automatic vending machines in some Federal buildings; Federal employee recreation and welfare groups are receiving this vending machine income for their own uses, including organized family outings; extension of the program to new and renovated federally controlled installations after January 1, 1971, could expand the present 3,400 blind vending work force to an estimated 7,500 within the next 7 years; and there is a higher incidence of blindness coming out of the Vietnam conflict than was the case in either World War II or the Korean conflict.

Although the congressional intent of the Randolph-Sheppard Act was to provide to the maximum extent possible new job opportunities for the blind, the present law does not provide for exclusive assignment of vending machine income to the vending stand operations which are competing with the machines, or to the State licensing agencies which administer the programs at the local level. The Comptroller General of the United States has, on two occasions, said that these funds from vending machines are to be regarded as commissions. Blind organizations strongly contend that such funds should be devoted to the purposes of the Randolph-Sheppard Act, or otherwise they must be miscellaneously received in the U.S. Treasury.

Because the major impetus for this legislation stems from the need to update the existing law, S. 2461 is made consistent with other Federal legislation with respect to the definition of blindness.

Support for S. 2461 was indicated during the hearings by representatives of the four Federal agencies concerned: the General Services Administration, the Rehabilitation Services Administration of the Department of Health, Education, and Welfare; the Committee on Blind-made Products; and the President's Committee on Employment of the Handicapped.

Among the organizations submitting testimony in support of S. 2461 were: The American Association of Workers for the Blind; the American Council for the Blind, the American Foundation for the Blind, General Council of Workships for the Blind; Goodwill Industries of America; International Association of Rehabilitation Facilities; National Rehabilitation Association; National Council of State Agencies for the Blind; Texas State Commission for the Blind; the President's Committee on Employment of the Handicapped; National Federation of the Blind; National Industries for the Blind; International Association of Rehabilitation Facilities; National Rehabilitation Association; National Center for Deaf-Blind Youths and Adults; and American Optometric Association.

No additional cost to the Federal Government is authorized by S. 2461.

## AMENDMENT OF THE WAGNER-O'DAY ACT

The Senate proceeded to consider the bill (S. 3425) to amend the Wagner-O'Day Act to extend the provisions thereof to severely handicapped individuals who are not blind, and for other purposes which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That the Act entitled "An Act to create a Committee on Purchase of Blind-Made Products, and for other purposes", approved June 25, 1938 (52 Stat. 1196; 41 U.S.C. 46–48), is amended by striking out all after the enacting clause and inserting in lieu of the matter stricken the following: "That there is hereby created a committee to be known as the Committee for Purchase of Products and Services of the Blind and Other Severely Handicapped (hereinafter referred to as the 'Committee') to be composed of two private citizens conversant with the problems incident to the employment of blind and other severely handicapped individuals and a representative of each of the following Government departments or agencies: The Department of Agriculture, the Department of Defense, the Department of the Army, the Department of the Navy, the Department of the Air Force, the Department of Health, Education, and Welfare, the Department of Commerce, the Department of the Interior, the Department of Justice, the Department of Labor, and the General Services Administration. The members of the Committee shall be appointed by the President, shall serve without additional compensation, and shall designate one of their number to be Chairman. The private citizen members of the Committee shall each be appointed for a term of five years; and such members shall be eligible for reappointment.

"SEC. 2. (a) It shall be the duty of the Committee to determine the fair market price of all suitable commodities produced and offered for sale by, and suitable services offered by, blind or other severely handicapped individuals to the Federal Government from time to time by any qualified nonprofit agency for the blind or other severely handicapped, organized under the laws of the United States or of any State, to revise such prices from time to time in accordance with changing market conditions, and to make such rules and regulations regarding specifications, time of delivery, authorization of a central nonprofit agency or agencies to facilitate the distribution of orders (by direct allocation, subcontract, or other means) among the qualified agencies for the blind and other severely handicapped, and other relevant matters as shall be necessary to carry out the purposes of this Act.

"(b) Rules and regulations of the Committee shall provide that, in the purchase by the Government of commodities produced and offered for sale by nonprofit agencies for the blind or other severely handicapped, priority shall be accorded to such commodities produced and offered for sale by nonprofit agencies for the blind, and that, in the purchase by the Government of services offered by nonprofit agencies for the blind or other severely handicapped, priority shall, until the close of June 30, 1976, be accorded to services offered by the blind.

"SEC. 3. All suitable commodities and suitable services hereafter procured in accordance with applicable specifications by or for any Federal department or agency shall be procured from such qualified nonprofit agencies for the blind or other severely handicapped in all cases where such commodities or services are available within the period specified at the price determined by the Committee to be the fair market price for the commodity or commodities or services so procured: *Provided*, That this Act shall not apply in any cases where suitable commodities or suitable services are available for procurement from any Federal department or agency and procurement therefrom is required under the provisions of any law in effect on the date of enactment of this Act.

"SEC. 4. For purposes of this Act—

"(a) the term 'severely handicapped' means an individual or class of individuals who is under a physical or mental disability which (according to criteria established by the Committee after consulting with appropriate agencies of the Government and taking into account the views of non-Federal agencies representing the handicapped) constitutes a substantial handicap to employment and is of such a nature as to prevent the individual under such disability from currently engaging in normal competitive employment;

"(b) the term 'qualified', when used in reference to any nonprofit agency for the blind or other severely handicapped, means such an agency which complies with such occu-

pational health and safety standards as are specified by the Secretary of Labor;

"(c) a commodity offered for sale by any nonprofit agency for the blind or the severely handicapped shall be considered to be produced by the blind or severely handicapped only if not less than 75 per centum of the man-hours of direct labor required for the production of such commodity was performed by blind or other severely handicapped individuals; and a service offered by any such agency shall be considered to be a service provided by the blind or severely handicapped only if not less than 75 per centum of the man-hours of direct labor entailed in the provision of such service is performed by blind or other severely handicapped individuals; and

"(d) the term 'State' includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

"SEC. 5. (a) There is hereby authorized to be appropriated to the Committee $200,000 for each fiscal year commencing with the fiscal year ending June 30, 1971, to carry out the provisions of this Act.

"(b) The General Services Administration shall provide administrative services for the Committee on a reimbursable basis."

SEC. 2. The amendments made by the first section of this Act shall take effect on the first day of the ninth month following the month in which this Act is enacted.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-1236), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

This bill has two principal objectives: First, to extend the special priority in the selling of certain products to the Federal Government now reserved for the blind to the other severely handicapped, assuring, however, that the blind will have first preference; and, second, to expand the category of contracts under which the blind and severely handicapped would have priority to include services as well as products, reserving to the blind first preference for 5 years after the enactment of the bill.

BACKGROUND OF THE LEGISLATION

The Wagner-O'Day Act was originally enacted by the Congress in June of 1938 to provide employment opportunities for the blind in the manufacture of products to be sold to the Federal Government. In the 32 years since its enactment, it has been of inestimable value in providing workshops for the blind with contracts for blind-made products at a fair market price.

As enacted in 1938, the Wagner-O'Day Act created a presidentially appointed Committee on Purchases of Blind-made Products composed of one public member and representatives of six Federal agencies concerned with utilization of blind-made products. The committee determined the fair market price of all "brooms and mops and other suitable commodities manufactured by the blind and offered for sale to the Federal Government by any non-profitmaking agency for the blind," procurement of which shall be mandatory and authorized a central non-profitmaking agency (the National Industries for the Blind) to facilitate the distribution of orders and other relevant matters of procedure.

The act has been administered by personnel from the several Federal agencies purchasing blind-made products and members of the Committee on Purchases of Blind-made Products, all of whom have had their salaries paid from funds appropriated to their individual agencies.

In the past year, fiscal year 1969, 78 workshops for the blind in 35 States sold approximately $23 million worth of goods to the Federal Government, providing employment to some 5,000 blind individuals. These products, 435 in number, covered a wide range including mops, brooms, pillow cases, military neckties, barrack bags, and signal flags. While the $23 million purchased from workshops for the blind represents less than five one-hundredths of 1 percent of the total of $49.28 billion of Federal purchases, for the blind workers assisted it represents the difference between some modicum of self-sufficiency and dependency, the difference between being a taxpayer and a tax burden.

During the past 32 years the Wagner-O'Day Act has stood without amendment. In the intervening years, techniques for utilizing the innate talents of the blind and other severely handicapped have continually improved and the realization has grown that these persons can pursue useful, productive lives rather than being institutionalized or becoming burdens upon their families.

In response to the changes of the past three decades, S. 3425 was introduced on February 10, 1970, and referred to the Committee on Commerce. On March 31, 1970, the Committee on Commerce was discharged from consideration of the bill and the measure was referred to the Committee on Labor and Public Welfare. A Special Subcommittee on Handicapped Workers, under the chairmanship of Senator Jennings Randolph of West Virginia was appointed. Two days of hearings were held on July 9 and 10, 1970, at which time testimony was submitted on the bill by 14 witnesses.

As Rehabilitation Services Administration Commissioner Edward Newman testified before the Committee, "the research clearly indicates that the expansion of the Wagner-O'Day Act will benefit many severely disabled persons other than the blind and will create thousands of new job opportunities without detracting from the original intent of the program."

Further information brought forth at the hearings included the following: Through the addition of services, workshops could further diversify the number of training programs and the types of persons served; one of the most important problems facing workshops engaged in contract work is that of obtaining sufficient work to keep their handicapped clients employed; in Japan nearly a third of that country's blind and partially blind are employed but in the United States no more than one-fifth of the blind are employed; many of the more than 120,000 Vietnam veterans now drawing compensation for service-connected disabilities would be eligible for employment in workshops having contracts under the expanded Wagner-O'Day Act; last year 6,591 disabled persons moved from sheltered workshop employment to outside work in the general economy; and Government contracts would make it possible to establish workshops in rural communities where it heretofore has not been feasible to provide such services for the blind and other severely handicapped.

The Department of Health, Education, and Welfare estimates that there are some 10,000 adult blind and some 77,000 other adult severely handicapped who form the potential work force for nonprofit agency workshops which could receive contracts under the Wagner-O'Day Act, as contemplated to be changed by S. 3425.

Support for S. 3425 was indicated during the hearings by representatives of the three Federal agencies concerned; namely, the Commitee on Blind-made Products, the Rehabilitation Services Administration of the Department of Health, Education, and Welfare, and the President's Committee on Employment of the Handicapped. Among the organizations submitting testimony in support of S. 3425 were the American Association of Workers for the Blind, the American Foundation for the Blind, the General Council of Workshops for the Blind, the Goodwill Industries of America, the International Association of Rehabilitation Facilities (formerly the National Association of Sheltered Workshops and Homebound programs and the Association of Rehabilitation Centers), the National Association for Retarded Children, the National Easter Seal Society for Crippled Children and Adults, the National Industries for the Blind, the National Rehabilitation Association, and the United Cerebral Palsy Association of America.

SUMMARY OF THE BILL

Section 1 of the bill amends the Wagner-O'Day Act as follows:

(a) Section 1 of the Wagner-O'Day Act is amended to—

(1) Change the name of the Committee on Purchases of Blind-made Products to the Committee for Purchase of Products and Services of the Blind and Other Handicapped (hereinafter in this report referred to as the Products Committee).

(2) Increase from one to two the number of private citizens who are members of the Products Committee, providing that they be conversant with problems incident to employment of the other severely handciapped as well as the blind. Provision is also made that these two private individuals shall serve for a term of 5 years instead of indefinitely as is the case presently.

(3) Add to the Products Committee representatives of the Department of Defense, Department of the Army, Department of the Navy, Department of the Air Force, the Department of Health, Education, and Welfare, the Department of Justice, the Department of Labor, and the General Services Administration, and removing from membership representatives of the War Department, the Navy Department, and the Treasury Department.

(b) Section 2 of the Wagner-O'Day Act is amended to—

(1) Add services to suitable commodities as subject to the Products Committee's jurisdiction in determining eligibility for Government contract.

(2) Include other severely handicapped as being eligible along with the blind, with the proviso that the blind will have first preference in the sale of suitable commodities and that in the sale of suitable services the blind shall have first preference until June 30, 1976.

(3) Provide that a nonprofit agency for the blind or the severely handicapped must be qualified, as defined in section 4 of the act.

(4) Permit the distribution of orders by direct allocation, subcontract, or otherwise.

(5) Make it clear that the Products Committee is responsible for rules and regulations regarding not only procedures, but all matters relevant to administration of the act.

(6) Make other changes of a minor and technical nature.

(c) Section 3 of the Wagner-O'Day Act is amended to conform with the changes made in section 2 of the act relative to the inclusion of the other severely handicapped and services, as well as changes of a minor and technical nature.

(d) Section 4 of the Wagner-O'Day Act is amended to—

(1) Add definition of (i) "severely handicapped" of (ii) "qualified" when used in reference to any nonprofit agency for the

blind or other severely handicapped, and (iii) of a State.

(2) Provide that a commodity offered for sale by any nonprofit agency for the blind or other severely handicapped under the act must have at least 75 percent of the man-hours of direct labor required for the production of such commodity performed by the blind or other severely handicapped. This conforms with present practice. A similar requirement is stipulated with respect to services.

(e) A new section 5 is added to the Wagner-O'Day Act to—

(1) Authorize an appropriation of $200,000 annually to carry out the provisions of the act. Presently funds for the administration of the act are derived from the funds appropriated to the various Federal agencies purchasing blind-made products.

It has been indicated that the projected budget for the first full year of operation, should this bill be enacted, is less than $125,000. This committee provided for an authorization of $200,000 as a permanent authorization to allow for normal increased costs over a period of years and expresses the expectation that in the near future the appropriation requested will remain below that figure and in line with the present budget of some $125,000.

(2) Stipulate that the General Services Administration shall provide administrative services for the Products Committee on a reimbursable basis.

Section 2 of the bill provides that the amendments to the Wagner-O'Day Act made by section 1 of the bill shall take effect on the first day of the ninth month following enactment of this measure.

## BILL PASSED OVER

The bill (H.R. 17604), to authorize certain construction at military installations and for other purposes, was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The PRESIDENT pro tempore. The bill will be passed over.

## CONVEYANCE OF RIGHT, TITLE AND INTEREST RESERVED OR RETAINED IN CERTAIN LANDS CONVEYED TO THE STATE OF MAINE

The bill (S. 752) to authorize the conveyance of all right, title, and interest of the United States reserved or retained in certain lands heretofore conveyed to the State of Maine was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Army is authorized and directed to convey to the State of Maine, without consideration, all of the right, title, and interest of the United States reserved or retained by it in the tract of land which was conveyed to the State of Maine pursuant to the Act entitled "An Act authorizing the Secretary of War to convey the Kennebec Arsenal property, situated in Augusta, Maine, to the State of Maine for public purposes", approved March 3, 1905 (33 Stat. 1270) by a deed from the United States dated April 2, 1905.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–237), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to authorize and direct the Secretary of the Army to convey to the State of Maine, without consideration, all of the right, title, and interest of the United States, retained by it, in the tract of land conveyed to the State of Maine pursuant the act of March 3, 1905 (33 Stat. 1270).

EXPLANATION OF THE BILL

The Kennebec Arsenal was originally established by the War Department in 1836 comprising 40 acres of land located on the east side of the Kennebec River in Augusta, Maine. The arsenal was abolished by order of the Secretary of War, May 1, 1901. Subsequently, under an act of Congress approved March 3, 1905, the Secretary of War, by deed dated April 12, 1905, conveyed the entire property to the State of Maine for use in connection with the Maine Insane Hospital. Both the act and the deed contained provisions which (1) restricted the property to be used only in connection with the insane hospital; and (2) authorized the President of the United States, in his discretion, to repossess the property if needed for uses of the United States.

The property has been used continuously since 1905 as part of the Maine Insane Hospital. The State has indicated that it now desires to use a portion of this property for a fire department and other public purposes, but is precluded from such use by the conditions of the conveyance. S. 752 would, in effect, authorize and direct the Secretary of the Army to release these conditions.

The Department of the Army no longer has any direct interest in this property, and there are no foreseeable future defense requirements for its use.

FISCAL DATA

The enactment of this bill will have no effect on the budgetary requirements of the Department of Defense.

## CONVEYANCE OF CERTAIN LANDS AT FORT RUGER MILITARY RESERVATION, HAWAII

The bill (S. 4187) to authorize the Secretary of the Army to convey certain lands at Fort Ruger Military Reservation, Hawaii, to the State of Hawaii in exchange for certain other lands was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 4187

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That notwithstanding any other provision of law, the Secretary of the Army, or his designee, is hereby authorized to convey to the State of Hawaii, subject to the terms and conditions hereafter stated, and to such other terms and conditions as the Secretary of the Army, or his designee, shall deem to be in the public interest, all right, title, and interest of the United States in and to certain lands, with the improvements thereon, within the Fort Ruger Military Reservation, Hawaii, as described in section 3 of this Act.

SEC. 2. In consideration for the conveyance by the United States of the aforesaid property, the State of Hawaii shall convey, or provide for the conveyance, to the United States of certain lands, described in section 3 of this Act, acceptable to the Secretary of the Army, or his designee, as replacement land for use as military family housing sites or other purposes in connection with the Fort Shafter-Tripler Army Hospital area, Oahu, Hawaii, and shall, at its sole expense, perform on this replacement land certain site preparations which will, in the opinion of the Secretary of the Army, or his designee, equal in cost the dollar value difference between the appraised fair market value of the property being conveyed to the State and the appraised fair market value of the land being conveyed to the United States. The site preparation shall be in accordance with plans and specifications to be approved by the Secretary of the Army, or his designee.

SEC. 3. The lands authorized to be exchanged and referred to in sections 1 and 2 of this Act are located on the island of Oahu, Hawaii, and are as generally depicted on maps on file in the Office of the Pacific Ocean Division Engineer, Honolulu, Hawaii. The lands to be conveyed by the United States comprise approximately fifty-seven acres with the improvements thereon; the replacement lands to be acquired by the United States comprise a minimum of approximately two hundred and fifty-nine acres situated adjacent to the Tripler Army Hospital Reservation. The exact description and acreages are to be determined by accurate surveys as mutually agreed upon between the State of Hawaii and the Secretary of the Army, or his designee.

SEC. 4. The lands conveyed to the United States, as described in section 3 of this Act, shall become a part of the Tripler Army Hospital Reservation and be administered by the Department of the Army.

SEC. 5. Notwithstanding any other provision of law, the cost of the lands to be acquired by the United States, as described in section 3 of this Act, and the cost of the site preparation and installation of utilities borne by the State of Hawaii, as provided herein, shall not be considered in arriving at the average cost of any family housing units or the cost of any single family housing unit to be constructed on the property.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1238), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

This bill would authorize the Secretary of the Army to convey to the State of Hawaii all right, title, and interest of the United States in and to approximately 57 acres of land with improvements thereon located within the Fort Ruger Military Reservation, Hawaii, upon the following conditions: (1) the State shall convey or provide for the conveyance to the United States of approximately 259 acres of land located adjacent to the Tripler Army Hospital Reservation; (2) such lands are to be acceptable to the Secretary as replacement family housing sites for Fort Shafter—Tripler Army Hospital area; (3) the State shall at its sole expense provide site preparation on the replacement lands which, as determined by the Secretary, shall equal in cost the difference in value between the land conveyed to the State and that conveyed to the United States; (4) plans and specifications for site preparation are to be approved by the Secretary; (5) exact acreages and descriptions to be determined by accurate surveys as mutually agreed upon; and (6) the Secretary may include such other terms he deems in the public interest. The bill further provides that the lands conveyed to the United States shall become a part of the Tripler Army Hospital Reservation; and also that the cost of site preparation by the State shall not be considered in arriving at the average cost of family housing units which may later be constructed thereon.

EXPLANATION OF THE BILL

The Fort Ruger Military Reservation is located in the east sector of Honolulu on the north outer slopes of Diamond Head Crater. It was originally established in 1906 on 705.47 acres of ceded lands and 49.73 acres of land acquired in fee. Over the years the acreage has been reduced and the boundaries readjusted. The reservation currently consists of six noncontiguous parcels of land aggregating a total of 80.02 acres, of which three parcels totaling 27.98 acres are ceded lands and three parcels totaling 52.04 acres were acquired at a cost of $71,599. In addition there are lesser interests in a total of 7.64 acres of land acquired without cost for utility line rights-of-way. The improvements on the reservation include administration, storage, housing and recreational facilities, and miscellaneous appurtenances and utilities, constructed at a total cost of $1,325,600. Prior to and throughout World War II, the reservation was intensively developed and utilized for various military purposes. Thereafter, Army activities were greatly reduced and the installation is now used primarily for military housing. Prior to receipt of subject legislative proposal, this Department planned to construct 234 units of military housing at Fort Ruger as tentatively authorized for fiscal year 1971.

The State of Hawaii desires to acquire a portion of Fort Ruger lands for the establishment of an integrated medical center, a university medical school and the expansion of facilities of the State-operated Leahi Hospital which occupy lands adjacent to Fort Ruger. In order to offset the continuing military requirements of Fort Ruger for family housing, the State has offered to provide substitute lands comparable in value and utility in exchange for approximately 57 acres of Fort Ruger lands, on terms generally set forth in the bill.

The Fort Ruger lands to be conveyed to the State comprise two separate parcels, one of which contains 51.63 acres of acquired lands and one containing approximately 2.94 acres of ceded lands. Improvements consist of administrative buildings, warehouses, 39 sets of family quarters and supporting facilities. The housing quarters, by reason of age and condition, are planned for demolition upon authorization of the family housing construction program. Preliminary estimates place a current value on the lands and improvements at between $4,500,000 and $5 million.

The 259-acre tract of land to be conveyed to the Government is situated on the Koolau Mountain ridge contiguous to the northeast boundary of the Tripler Army Hospital. It is owned by the S. M. Damon Trust Estate which tentatively has agreed to sell the same to the State for reconveyance to the Government. This tract is raw undeveloped land of uneven terrain with a value estimate in the range of $1 million. By reason of the topography only about 180 acres appear economically feasible of development. To render the replacement lands comparable to the Fort Ruger lands as to utility for housing, the State proposes to perform at its sole expense necessary site preparation, such as clearing, grading, access roads, and utilities under specifications approved by the Army. The cost to be expanded for site preparation is to reflect the difference in value between the property to be conveyed to the Government and the property to be conveyed to the State Final determination will be based on detailed fair market value appraisals of both properties as mutually agreed upon.

Detailed terms and conditions relating to surveys, descriptions, acreage, possession and use of structures, and related matters will be developed by an agreement between the Army and the State. In this connection, it is understood that State legislation has been enacted authorizing the proposed exchange and necessary funds.

ADDITIONAL FACTORS

While the Fort Ruger lands are essential to current programs, it is considered that the States proposal would afford far greater benefits with respect to the overall military housing program in the Fort Shafter-Tripler area, that is (1) the Army would gain 125 acres more of potential housing sites providing support for 900 housing units; (2) the location adjacent to Tripler Hospital allows for more efficient and economic maintenance and support service; and (3) it provides better future consolidation of future housing requirements. Based on these benefits and on the premise that this exchange will be accomplished at no cost to the Government, the Department of the Army can make available 54.57 acres for conveyance to the State.

FISCAL DATA

Enactment of this legislation will have no material effect on the budgetary requirements of the Department of Defense.

## CONVEYANCE OF CERTAIN LANDS AT CRAWFORD URBAN RENEWAL PROJECT, PORTSMOUTH, VA.

The bill (H.R. 14373) to authorize the Secretary of the Navy to convey to the city of Portsmouth, State of Virginia, certain lands situated within the Crawford urban renewal project (Va–53) in the city of Portsmouth, in exchange for certain lands situated within the proposed Southside neighborhood development project was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1239), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of this bill is to authorize the Secretary of the Navy to effect an exchange of lands with the city of Portsmouth, Va. Under such exchange the Secretary of the Navy, or his designee, would convey to the city the improved 0.918 acre parcel of Navy land particularly described in section 1 of the bill. In consideration of such conveyance, the city of Portsmouth would be required to convey to the Government lands presently unidentified and described only as "situated within the proposed southside neighborhood development project located in the city," together with improvements thereon or to be constructed thereon, all of which shall be acceptable to the Secretary of the Navy, in addition to such interests in other lands as might be necessary to protect the Government's interests in connection with the exchange.

Senator Spong of Virginia introduced a similar bill in the Senate.

BACKGROUND OF THE BILL

Crawford Street in Portsmouth, Va., presently dead ends at an old USO building located on the Government-owned property proposed to be conveyed by the Navy to the city. The city of Portsmouth desires to extend Crawford Street through the Navy tract to provide improved access to the urban renewal project (Va–53) referred to in the bill. It is contemplated that the city, in exchange for the Government-owned property, would convey certain land in the area to the United States together with such buildings thereon or to be constructed thereon as are acceptable to the Secretary of the Navy. While certain real property exchanges may be accomplished under the authority of section 203(c) of the Federal Property and Administrative Services Act, as amended (40 U.S.C. 484(c)), this statutory authority is not utilized to effect exchanges for buildings to be constructed for Government use. In this instance, it appears that buildings may be constructed on the land by the city for conveyance to the United States as a part of the exchange transaction. Such an exchange would not be appropriate under existing statutory authority.

The bill specifically provides the property conveyed to the United States shall be of no less value, as determined by the Secretary of the Navy or his designee, than the property conveyed to the city of Portsmouth.

FISCAL DATA

Enactment of this measure will not involve the expenditure of any Federal funds.

## AMENDMENT OF THE SOLDIERS' AND SAILORS' CIVIL RELIEF ACT

The Senate proceeded to consider the bill (S. 3795) to amend the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, in order to extend under certain circumstances the expiration date specified in a power of attorney executed by a member of the Armed Forces who is missing in action or held as a prisoner of war which had been reported from the Committee on Armed Services with an amendment on page 2, line 17, after the word "wife," insert a comma and "or any other person,"; so as to make the bill read:

S. 3795

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 101(1) of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended (50 App. U.S.C. 511), is amended by striking out "The term 'persons in military service'" and inserting in lieu thereof "The term 'person in the military service', the term 'persons in military service',".

SEC. 2. The Soldiers' and Sailors' Civil Relief Act of 1940, as amended, is further amended by adding at the end thereof a new section as follows:

"SEC. 701. (a) Notwithstanding any other provision of the law, any power of attorney which—

"(1) was duly executed by a person in the military service who is listed as missing in action or as a prisoner of war by the Secretary of the military service of which such person is a member,

"(2) designates such person's wife, or any other person, as his attorney in fact for certain specified purposes or for any and all purposes, and

"(3) contains an expiration date which occurs subsequent to such person being listed as missing in action or a prisoner of war by the Secretary of the military service of which such person is a member, and which occurred prior to the date of enactment of this section or one which occurs subsequent to the date of enactment of this section,

shall be automatically extended for the entire period of time that such person is listed as missing in action or a prisoner of war by the Secretary of the military service of which such person is a member. Any power of attorney extended by the provisions of this section shall have the same validity and legality for all purposes in the same manner and to the same extent as if the expiration date specified therein had not occurred.

"(b) No power of attorney executed subsequent to the date of enactment of this section by any person in the military service shall be extended by virtue of the provisions of subsection (a) if the terms of such document, on its face, clearly indicate that the power granted by such document is to expire

on the date specified therein regardless of whether such person, subsequent to the date of execution of such document, is reported missing in action or a prisoner of war.

"(c) The provisions of this section shall apply only in the case of persons in military service who executed powers of attorney during the Vietnam era (as defined in section 101(29) of title 38, United States Code).

"(d) As used in this section, the term 'prisoner of war' includes being forcibly detained or interned by a foreign government or power."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to as follows:

Whereas it is declared to be a policy of the United States Government to assist those members of the military service, and their families, who are listed as missing in action or prisoners of war as a result of the Vietnam conflict; and

Whereas the indeterminable status concerning the ultimate fate of those men so listed as missing in action or prisoners of war has created problems concerning their legal status in management of their personal affairs: Now, therefore,

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1240), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

As stated in the title, the purpose of the bill as amended seeks to amend existing law to extend under certain circumstances the expiration date in a power of attorney which had been executed by a member of the armed services who is either missing in action or is held as a prisoner of war. The bill is designed to enable the wife or any other person designated as attorney in fact for the serviceman in a missing status, to continue to manage the private affairs for the family or for the services.

EXPLANATION OF AMENDMENT

The bill as proposed would limit the extension of the applicability of the proposal to powers of attorney granted to the wife of the service member who is in a missing status. Since such members may have granted powers of attorney to other than a wife, both the Department of Defense and the committee believe it should be applicable to any person who is a designee on the power of attorney. This would permit that person to continue to act on behalf of the missing member, within the limits of the authority prescribed in the power of attorney.

EXPLANATION OF BILL

As stated in the whereas clauses, it is the policy of the U.S. Government to assist the families of military service personnel who are either listed as missing in action or prisoners of war as a result of the Vietnam conflict. The bill seeks to alleviate the problems created by long absences and indeterminable status of those members in the management of their personal affairs.

Many of these service members sign powers of attorney authorizing designees to act for them in the management of property and other business maters during their absences. In many instances these powers of attorney have expired during the period of time these servicemen have been listed in a missing status. Because of this, wives, relatives, and others have been unable to conduct routine personal business transactions.

The bill seeks to extend those powers of attorney that have expired or would expire during the period that a service man is in a missing status.

Mr. MANSFIELD. Mr. President, that completes the call of the calendar.

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business, with a time limitation of 3 minutes therein.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## WAIVER OF THE CALL OF THE CALENDAR UNDER RULE VIII

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the legislative calendar, under rule VIII, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, in accordance with the usual request which has been granted, I ask unanimous consent that the committees may be permitted to sit during the morning hour for the conduct of business.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SPONG). Without objection, it is so ordered.

## COMMITTEE MEETING DURING SENATE SESSION—OBJECTION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on the District of Columbia, the Subcommittee on Public Lands of the Committee on Interior and Insular Affairs, and the Committee on Government Operations be authorized to sit during the session of the Senate today.

Mr. BAYH. Mr. President, the Senator from Indiana has made his position very clear. He is very reluctant to object because of the resulting inconvenience to his colleagues. But he is most anxious to show what is actually going on.

Thus, the Senator from Indiana feels that he has no alternative, despite his admiration for his majority leader, and must object.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## REPORT OF THE PRESIDENT'S COMMISSION ON CAMPUS UNREST

Mr. BYRD of West Virginia. Mr. President, the President's Commission on Campus Unrest, like the mountain in the fable, has labored and brought forth a mouse.

The broad generalizations in the recommendation made by the Commission are little more than recapitulations of every ultraliberal cliche that has grown up around the subject, and the proposition that the President of the United States bears the primary responsibility for restoring peace in our colleges and universities is preposterous.

The report's condemnation of campus violence is perfunctory, a pro forma nod in the direction of reality. It is little more than the kind of lipservice to law and order that suddenly seems to have become fashionable on the part of many who up to now have sought to explain and excuse the campus disorders.

There is, of course, some sound material in the recommendations; for example, "When criminal violence occurs on the campus, university officials should promptly call for the assistance of law enforcement agencies." I could not agree more.

But the central thrust of the recommendations that it is up to the White House to "bring us together before more lives are lost and more property destroyed and more universities disrupted" by "taking the lead in explaining to the American people the underlying causes of campus unrest," and by such things as calling a "series of national meetings designed to foster understanding among those who are now divided" is unfair and an over-simplification of a very complex problem.

That is not to say that the President cannot help in the situation that has developed. But to attempt to make him the central figure in a situation he did not create, and which was allowed to get out of hand long before he even took office, is to take the problem out of its proper context.

To attempt to make the President responsible for straightening out the mess in our colleges and universities seems to me incredibly naive.

This is a disappointing report. What should have been a strong statement on the side of a lawful and orderly society is a namby-pamby document, indeed. In my judgment, the Commission failed miserably in what should have been a major part of its task: to come to grips with the problem of what to do about Marxist-oriented professors and the hard-core subversive leaders of campus disorders. Something more than a polite slap on the wrist is urgently needed to deal with those who have instigated and fomented the revolutionary upheaval.

Mr. GRIFFIN. Mr. President, I ask

unanimous consent that, following the remarks by the distinguished Senator from West Virginia, a letter dated September 21, 1970, entitled "An Open Letter to College Students," from John Edgar Hoover, Director of the Federal Bureau of Investigation of the U.S. Department of Justice be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
FEDERAL BUREAU OF INVESTIGATION,
*Washington, D.C., September 21, 1970.*

AN OPEN LETTER TO COLLEGE STUDENTS FROM JOHN EDGAR HOOVER

As a 1970 college student, you belong to the best educated, most sophisticated, most poised generation in our history.

The vast majority of you, I am convinced, sincerely love America and want to make it a better country.

You do have ideas of your own—and that's good. You see things wrong in our society which we adults perhaps have minimized or overlooked. You are outspoken and frank and hate hypocrisy. That is good too.

There's nothing wrong with student dissent or student demands for changes in society or the display of student unhappiness over aspects of our national policy. Student opinion is a legitimate aspect of public opinion in our society.

(This open letter to college students from Director Hoover pinpoints eight ploys used by radical extremists in their efforts to steer justifiable campus protest into violent and destructive channels. It was furnished to United Press International on 9–21–70 and is reprinted with permission.)

But there is real ground for concern about the extremism which led to violence, lawlessness, and disrespect for the rights of others on many college campuses during the past year.

The extremists are a small minority of students and faculty members who have lost faith in America. They ridicule the flag, poke fun at American institutions, seek to destroy our society. They are not interested in genuine reform. They take advantage of the tensions, strife, and often legitimate frustrations of students to promote campus chaos. They have no rational, intelligent plan of the future either for the university or the Nation.

The extremists are of wide variety: adherents of the Students for a Democratic Society (SDS) including the Weatherman; members of the Young Socialist Alliance (YSA), the Trotskyist youth group; the Communist Party's Young Workers Liberation League (YWLL). Or they may be associated with the Student Mobilization Committee to End the War in Vietnam (SMC), a Trotskyist-dominated antiwar group.

Many are not associated with any national group. The key point is not so much the identification of extremists but learning to recognize and understand the mentality of extremism which believes in violence and destruction.

Based on our experience in the FBI, here are some of the ways in which extremists will try to lure you into their activities:

1. They'll encourage you to lose respect for your parents and the older generation. This will be one of their first attacks, trying to cut you off from home. You'll hear much about the "failures" and "hypocrisy" of your parents and their friends. The older generation has made mistakes but your parents and millions of other adults worked hard, built, sacrificed, and suffered to make America what it is today. It is their country too. You may disagree with them, but don't discredit their contributions.

2. They'll try to convert you to the idea that your college is "irrelevant" and a "tool of the Establishment." The attack against the college administration often is bitter, arrogant and unreasoning. SDSers, for example, have sought to disrupt the colleges by demanding the right to select professors, determine the curriculum, and set grading standards.

3. They'll ask you to abandon your basic common sense. Campus extremism thrives on specious generalizations, wild accusations, and unverified allegations. Complex isssues of state are wrapped in slogans and cliches. Dogmatic statements are issued as if they were the final truth. You should carefully examine the facts. Don't blindly follow courses of action suggested by extremists. Don't get involved in a cause just because it seems "fashionable" or the "thing to do." Rational discussion and rational analysis are needed more than ever before.

4. They'll try to envelop you in a mood of negativism, pessimism, and alienation toward yourself, your school, your Nation. This is one of the most insidious of New Left poisons. SDS and its allies judge America exclusively from its flaws. They see nothing good, positive, and constructive. This leads to a philosophy of bitterness, defeatism, and rancor. I would like you to know your country more intimately. I would want you to look for the deeper unifying forces in America, the moods of national character, determination, and sacrifice which are working to correct these flaws. The real strength of our Nation is the power of morality, decency, and conscience which rights the wrong, corrects error, and works for equal opportunity under the law.

5. They'll encourage you to disrespect the law and hate the law enforcement officer. Most college students have good friends who are police officers. You know that when extremists call the police "pigs" they are wrong. The officer protects your rights, lives, and property. He is your friend and he needs your support.

6. They'll tell you that any action is honorable and right if it's "sincere" or "idealistic" in motivation. Here is one of the most seductive of New Left appeals—that if an arsonist's or anarchist's heart is in the right place, if he feels he is doing something for "humanity" or a "higher cause," then his act, even if illegal, is justifiable. Remember that acts have consequences. The alleged sincerity of the perpetrator does not absolve him from responsibility. His acts may affect the rights, lives, and property of others. Just being a student or being on campus does not automatically confer immunity or grant license to violate the law. Just because you don't like a law doesn't mean you can violate it with impunity.

7. They'll ask you to believe that you, as a student and citizen, are powerless by democratic means to effect change in our society. Remember the books on American history you have read. They tell the story of the creative self-renewal of this Nation through change. Public opinion time after time has brought new policies, goals, and methods. The individual is not helpless or caught in "bureaucracy" as these extremists claim.

8. They'll encourage you to hurl bricks and stones instead of logical argument at those who disagree with your views. I remember an old saying: "He who strikes the first blow has run out of ideas." Violence is as ancient as the cave man; as up-to-date as the Weatherman. Death and injury, fear, distrust, animosity, polarization, counter-violence—these arise from violence. The very use of violence shows the paucity of rational thought in the SDS, its inability to come up with any intelligent critique of our society.

Personally, I don't think the outlook for campus unrest this year is as bleak as some prophets of pessimism proclaim. The situation at some colleges is serious, but certainly not hopeless.

Along with millions of other adults, I'm betting on the vast majority of students who remain fair-minded, tolerant, inquisitive, but also firm about certain basic principles of human dignity, respect for the rights of others, and a willingness to learn. I am confident our faith has not been misplaced.

## ORDER OF BUSINESS

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CONDITIONS IN GREECE

Mr. FULBRIGHT. Mr. President, on August 10, I brought to the attention of the Senate a most perceptive account of present conditions in Greece written by Sir Hugh Greene, the former director of the British Broadcasting Co. The article reported an exclusive interview which Sir Hugh had conducted with the head of the Greek junta, Mr. George Papadopoulos. As I told the Senate at the time, I found Sir Hugh's interpretation of Mr. Papadopoulos' remarks and his additional observations of conditions in Greece most illuminating but profoundly disturbing.

On August 24, I received a letter from Mr. P. Chrissicopoulos, "Acting Director of the Press Office" on the letterhead of the "Royal Greek Embassy." The purpose of Mr. Chrissicopoulos' letter was to transmit the "full text" of Prime Minister Papadopoulos' interview with Sir Hugh Greene and to request that, "in the interest of factual reporting," it be inserted in the RECORD.

I am most pleased to comply with this request and I ask unanimous consent that both the letter and the official version of the interview be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. FULBRIGHT. Mr. President, a reading of the official text supplied by the "Royal Greek Embassy," confirms the accuracy of Sir Hugh's reporting. In those instances where direct quotations appeared in the article they correspond quite closely to the official text, making allowances, of course, for the usual variations in translation. There are no discrepencies in substantive content.

The accuracy of Sir Hugh's reporting having thus been confirmed, there remains the question of the interpretations which should be placed upon Mr. Papadopoulos' remarks. As Sir Hugh noted, there was indeed a certain lack of clarity in the language used by Mr. Papadopoulos. Having now had the benefit of reading the official text, however, I fully agree with Sir Hugh's interpretations and with his conclusion that the interview revealed a dictator "dropping the mask."

EXHIBIT 1

ROYAL GREEK EMBASSY,
*Washington, D.C., August 20, 1970.*

Hon. J. WILLIAM FULBRIGHT,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR FULBRIGHT: The Congressional Record for August 10, 1970, contained Sir Hugh Greene's account of an interview granted by Prime Minister Papadopoulos, the account being published in the London Sunday Telegraph of August 2, 1970.

In the interest of factual reporting, I would be grateful to you if you would insert into the Congressional Record the enclosed *full* text of the Prime Minister's interview.

Very truly yours,

P. CHRISSICOPOULOS,
*Acting Director of the Press Office.*

---

FULL TEXT OF PRIME MINISTER'S INTERVIEW WITH SIR HUGH GREENE

The General Direction of Press and Information announced on Saturday that because the special correspondent of the SUNDAY TELEGRAPH Sir Hugh Greene, who was granted an interview by Prime Minister Mr. George Papadopoulos, had interposed his own comments, subjective critiques and arbitrary conclusions, changing the meaning of the Prime Minister's replies, the full text of the interview was being released by publication.

Opening the interview Sir Greene thanked the Prime Minister for his kindness in granting the interview. "I realise," he said "how valuable your time is, especially now that you have assumed the Foreign Ministry. On the occasion, I express my sympathy on the death of Mr. P. Pipinelis. Mr. Pipinelis was known in England as the man whose efforts during the 1967 Cyprus crisis led to by passing the tension and helped to improve relations between Turkey, Greece and the Cypriot people."

"Therefore it is natural that interest has been demonstrated in whether there will be any change of policy on the Cyprus issue."

Answer. In both speeches which I made on assuming my new duties as Minister of Foreign Affairs, I clarified absolutely that not only would there be no change whatsoever in the foreign policy of the Government, both in its general lines and in matters of special interest, but that I shall consider the continuation, as close as possible, of the policy followed by the memorable Mr. Pipinelis as a success. And, after all, that is one of the reasons why I considered it necessary to assume the responsibilities of that Ministry personally.

Question. I would like to submit certain questions on the internal affairs of the country, which are provoking special interest abroad. For example, the Prime Minister, in one of his past statements, characterised the Government as temporary. My question is whether he continues to consider it temporary today.

Answer. The final purpose of the Government is to secure for the Nation the prerequisites which are necessary for the functioning of the State in accordance with the Constitution of 1968. Under this meaning, the present special form of Government is temporary.

Question. Is the aim to lead the country to a parliamentary form of democracy?

Answer. Undoubtedly, that is the aim.

Question. Are you following a steady plan towards a parliamentary form of government?

Answer. Actually such a plan is being followed concerning the gradually developing stages of the course. However, concerning the time duration of each stage, the government, perhaps, could not stick to a predesignated scheduled or pre-dated course, because those factors creating the prerequisites which are necessary for the functioning of the 1968 Constitution are many and varied; consequently, the duration of each stage will depend on events.

Question. Which are those factors?

Answer. I have reported them in detail many times in the past. I realize, however, the wish of Mr. Greene for a new, brief enumeration of them so that he can have a full picture of the situation and the problems being confronted. Thanks to his long and distinguished career as a journalist and specialist in public affairs, Mr. Greene knows surely already that, during the pre-revolutionary years, democracy in Greece was in danger, not from immediate action by communists, but from the existence of weak areas in society which made it easy prey for communist subversion.

These weak areas were:

(1) The retarded economic development of the country.

(2) The unacceptable delay of social services and their inability to give the citizens the necessary assistance or to contribute to the improvement of living conditions.

(3) The lack of the necessary infrastructure for rapid economic and social development.

(4) The bad conditions of education which, as is known, greatly influences all other sectors of the life of a nation and,

(5) The inadequacy of administration and of the state machinery in general.

These are the sectors on which the government now concentrates all its efforts so that it can create the basic prerequisites which would allow the country the luxury of a representative form of government without undergoing the dangers which existed in 1967. Only then could the nation have a fully democratic system of government without being the target of party conquest.

Question. Under these conditions, how does the Prime Minister view the appearance of new men and new political parties in the electoral struggle which shall lead the country to a parliamentary government?

Answer. It is certainly self-understood that when the necessary conditions have been created the field will be left free to all those who consider themselves suitable to devote their energies to public life and to offer their abilities to the country. They shall have the opportunity to measure their strength in elections as members of the political opposition or of the governmental party, and to assume their places in the legislative or executive authority.

Question. I would like to ask if the Prime Minister would present himself as head of a political party. Also if he considers the lack of support from any party machine as a weakness of his government.

Answer. To the first part of the question, the reply is that I have devoted myself to the struggle for the achievement of basic targets, that is, the acquisition of the possibility for the nation to proceed to elections in safety, tranquility and peace. I am working so that it will be possible for others to govern the country, without the threat which was created previously by the existence of the aforementioned weaknesses. The only thing I can hope for is that I will offer satisfactorily the services which are required to cure the nation's needs and to guide it to a point where the functioning of a democratic system, as described in the 1968 constitution, will be possible. I hope that it will not be necessary for me to continue to govern the country in the new role of a political Prime Minister. I hope that, at that time, I shall be in a position to leave, the governing of the land to others, with the conviction that they shall believe in the same basic truths of democracy. With one word I can say the following:

My future activity in the political sector will depend on the strength which will be left in me to continue and on the needs of the nation. Personally, despite all this I believe that there shall be no need for such continuation.

Concerning the second part of the question, indeed, the lack of a political party machine behind the present government constitutes a weakness from one side. But, if one takes into consideration the fact that one of the basic efforts of the government aims at bypassing those political passions which had arrived at a frenzy during the 20-year pre-revolutionary period, then it shall become absolutely clear that the loss suffered from the lack of a political party machine is much smaller than the damage which would have followed if the country had been left to the prey of political passions.

Question. Does the Prime Minister consider the indefinite maintenance of martial law during the duration of this transitionary period necessary?

Answer. I believe that martial law or, more correctly, the shadow of it which has remained will not be maintained much longer. My intention is to lift it at the soonest possible date. I will be the happiest man on earth on that day, which I hope will be soon.

Question. I would like to note that, since there is only a shadow of martial law, its lifting would not bring about any essential change in the task of the government.

Answer. Indeed, that is how things stand, and there is a possibility for one to wonder why is this shadow still necessary and preserved. Its necessity is due to purely pschological reasons. The spirit of anarchy that has created the political tensions was so strong, that its control, by this shadow of martial law, was necessary. This shadow is more effective than an entire system of laws.

Question. On the subject of the political detainees in Greece: The recent leniency towards Theodorakis impressed public opinion greatly. Is there hope for such a leniency by the Prime Minister to other political detainees?

Answer. Time will tell. Personally, I wish to be freed from this matter of political detainees as soon as possible.

Question. I heard, Mr. Prime Minister, that you study Greek philosophy and that your political beliefs are based on the theories of Polybius and Plato's Criton. According to the theories of Polybius, political life moves within a circle which begins with autocratic regimes and, through successive stages, ends in anarchy, to return again to autocracy and a new circle begins.

Answer. Firstly, I believe that the classical Greek philosophers, and the study of history, exercise indeed a great influence on the formation of a man's ideals, independently of the sector of his interests. My concepts are not based on these two classical Greek intellectuals only. Undoubtedly, both Polybius and Plato exercised a significant influence on the formation of my personal concepts and beliefs. The views of Polybius on political matters are indeed excellent. The inquisitive mind of Plato, on the other hand, examined social and philosophical subjects in such a way as to render an invaluable contribution to the development of the human mind. However, their ideas are not the only basis for the formation of many personal concepts and beliefs. The study of the history of humanity from the days of Polybius and Plato through today, my personal experiences, the truths concluded from the study of history and the observation of current events also contributed.

Question. Would it be possible for you, Mr. Prime Minister, to say a few more words on your political ideals and especially if you believe that the democratic system is more preferable than the autocratic one?

Answer. I, indeed, believe that the democratic system is the safest, when it offers the

people the most satisfactory conditions of justice, freedom, security and human dignity. However, those who are elected by the majority of the people and whose mission is to carry out, to the letter, the mandate of the people and rule in accordance with democratic principles, should be imbued by a deep sense of responsibility and also be inspired by the ideals with which they are identified. Only then is the democratic system applied. Otherwise, it is not applied, when the only motive of the representatives of the people is their re-election.

Question. Perhaps the Prime Minister has an explanation for the non-satisfactory character of those who exercised power according the Greek History.

Answer. This subject could keep us talking for hours, and because I am pressed for time I will try to give a brief résumé of my views, even if it is not satisfactory for either of us.

The phenomenon is, in part, due to an organic weakness of the mentality the Greek people acquired, as a result of the long duration of tortures during foreign occupations.

It is also due to a weakness of organisation, caused by an attempt to imitate democratic slogans as they are applied in other countries under entirely different conditions not adapted to our own conditions. For example, Greece today is able to apply a Constitution similar to the British one, but this was impossible for her before fifty, thirty or even twenty years.

Question. The final question is whether the suspension of the delivery of arms raises difficulties in any way for the Greek Government, or weakens its position, and whether the lifting of the subject suspension is expected soon.

Answer. I always try to see things in the most realistic manner. The present situation may be compared with that of a man who tries to safeguard his area from an enemy. If he considers it clever to supply the guard with one weapon so that he may better guard his own home, as well as the entire area, then he should give the guard a strong weapon. If the guard has no weapon, he will try to defend both the house and the area in the best possible way, but, of course, in this case the chances for the success of his mission have decreased. Certain of our allies think that they can exercise pressure on us by refusing to supply us with the necessary arms. We will find as many arms as we can to defend our small house.

We will probably fall fighting because of lack of the necessary weapons. If our allies consider supplying us with weapons as clever, so that we may be able to face the common enemy more effectively and make our small house the vanguard of the free world, then they strengthen their own defence as well. If not, then they themselves will suffer from the consequences. But what really is of interest is the following: Military aid is not an essential factor in the continuation and fulfillment of the task the Revolution undertook. Consequently, the suspension of arms supplies does not exercise pressure on the Government nor hinders its work and progress.

It is interesting to mention that, during World War II, when Greece was Britain's only active ally and fought against the enemy armies, giving England time to breathe and be strengthened, she did it with arms she had received from Germany before the war began. This, of course, does not mean that Greece will now be supplied with Russian arms, because presently she can receive all kinds of arms if she pays for them, from any ally, and it is certain that Britain will be the first to accept the exchange.

Sir Greene then thanked the Prime Minister for his kindness in giving him so much of his time.

## THE SIMPLE PLEASURES

Mr. FULBRIGHT. Mr. President, with wars, hijackings, protests, riots, forest fires, and the antics of prominent public figures occupying so much of the press and television, it is a relief to find that there is someone who has not lost his perspective.

John Park Cravens is a valued constituent of mine who lives in Russellville, Ark. His wisdom is attested to by a recent letter he wrote to the editor of the Northwest Arkansas Times. I ask unanimous consent that his letter to the editor may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SIMPLE PLEASURES

*To the Editor:*

I care not for the roar of the traffic, the blare of horns and screech of brakes; the sound of sirens, whistles, engines, jackhammers, and the smells of pollutions of the city.

Give me the average countryside home where I can sit by the side of the road and under a tree, and rest and relax as gentle breezes bring inspiring sounds to my ears like the calls of field larks, doves, raincrows, and especially the mocking bird. I breathe pure air, and the fragrance of wild flowers, and fresh plowed ground.

And how dear to me to hear church bells ringing in the valleys; the ripple of a brook; the sounds of a gentle waterfall; the flouncing of a fish in a pond; the low of cattle; the barking of a pack of dogs chasing a fox a mile away. It is wonderful. These things are so soothing to my heart, mind and soul, and they are true and Godly heritages. Such are the true heritages of millions that need to be protected by laws of our Great Land.

JOHN PARK CRAVENS.

RUSSELVILLE.

## THE WEST AS VIEWED BY THE EAST

Mr. FULBRIGHT. Mr. President, an article entitled "The East Thinks West Is Filthy," written by Dennis Bloodworth, was published in the Washington Post on September 20.

The article is an excellent analysis of some of the most significant characteristics of the Asian people with whom we are so deeply and tragically involved at the present time. The article, incidentally, presents some very cogent reasons why our efforts to assist Asians, as we have done and are doing, is not likely to be very rewarding. I believe that this article is worthy of the attention of Members of the Senate and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE EAST THINKS WEST IS FILTHY

(By Dennis Bloodworth)

"You cannot possibly understand us," Asians have told me woundingly, "but with us it is different. We know you Europeans only too well." This is frequently a ludicrously unjustified boast.

Asia is an insanitary continent, reeking of ineradicable dirt and poverty but famous for its laundering and inhabited by different peoples who wash thoroughly before getting into a hot bath, or who bathe in running streams, dance under a shower (if in public, fully clothed) or throw bucketfuls of water over themselves from great vats or jars.

To them, the white man is disgusting, for he sits in a tub of water and rinses himself in his own filth. As to left-handed cleansing operations, the Chinese used paper before the West but preferred goosefeathers in the heyday of the hedonists, and many Orientals claim that water, sand or even stones are more hygienic.

MISUNDERSTOOD MORALS

If the Westerner is unclean, he is also ugly, and his customs sometimes take much explaning away. American soldiers are no more brutal or licentious than others, but when they are unleashed in Taipei or Bangkok or Tokyo for five days of leave from the Vietcong, they are quite naturally less concerned with national manners than country matters, and since the evil that men do lives after them, by 1968 they had fathered more than 2,000 "red-haired" Thais alone.

It is useless to protest that while the Americans were increasing the mixed population of Thailand, the Thai "Queen Cobra" regiment was doing the same in Vietnam at the average rate of one baby for every 13 men, or that in a given year, seven unlucky Americans out of 10 in some outfits had caught the "Vietnam rose" (which, by any other name, may be identified as a particularly stubborn form of gonorrhea).

Asian prejudices have been hardened by scenes of public necking and drunkeness and brawling, and by the insults offered to their wives by white men for whom every pretty girl is a prostitute. Even the best-behaved American serviceman, walking sedately down a Bangkok street arm in arm with some charming little piece, is a shameless *farang* who fans hidden fires of cultural indignation. For, strictly speaking, it is impermissible there for boy to touch girl in public.

The vices of the inventive white, yesterday damned for poisoning the wells of wise living in the Orient, are adopted by Asian governments today—provided they show a profit. The anticolonial urge to fulminate against the foreigner as if he were the sole originator of all pot, sex, booze and gambling is giving way gently to a tacit admission that he is not the only man who is vile, after all. But there is still much room for misunderstanding.

Like most of his Asian neighbors, the Lao lacks the Christian's sense of guilt. In his philosophy, man did not first come on stage against the setting of the Garden of Eden to perform Act One, Sin One, for to him good and evil are inseparable. In consequence, as long as man's actions are not motivated by a possessive urge, he may accept all opposites—the pleasure that is defined by pain as well as the pain that is defined by pleasure.

This is the middle way between the guru and the gourmand. The Lord Buddha himself condemned excessive ascetism. The enlightment which eluded him for six long years of self-denial and meditation embraced him finally after he had disgusted five fellow sages by eating a square meal and taking a bath. That inspired the outlook which gives millions of Asians their sense of perspective today.

But, as at least one devout Lao commentator has plaintively remarked, Buddhism can easily become the doctrine of lethargy and self-indulgence. If to reason is to destroy the true vision of the cosmos, don't think. If to strive is to bind yourself to this deplorable world of illusion, then don't strive. Moreover, as all Buddhists wish to "gain merit" by performing charitable acts, and so edge nearer to Nirvana, it may be kinder to take than to give.

The Buddhist bonze (monk) who holds out his begging bowl to the Thai housewife and lets her fill it with food is doing her a favor, for she is gaining merit. The pagodas bless the community by allowing themselves to be showered with candles and flowers and fruit and children. How many times Western-

ers have embarrassed or bewildered Asians by thrusting things upon them and expecting gratitude in return it is hideous to contemplate.

Asian leaders who have taken the dollar aid and damned Washington afterward have also assumed that in the unsentimental commerce of international relations, the donor in any case gives because he needs the recipient. The recipient, therefore, renders service twice over.

TOO OLD TO SIN

The Orient produces its own fine strain of hypocrisy, however, and while the Moslems and Buddhists of Southeast Asia may remain strictly loyal to their faiths, they will argue that to cut corners is to take the straightest path.

"Fish?" an old peasant in Thailand echoed, grinning toothlessly. "No, I don't fish. I am old and will die soon. Why should I risk losing merit by killing living creatures? I leave fishing to my son. He's still young."

In Malaya, Chinese Buddhists will happily eat the bird that has been decapitated out of sight by some other unfortunate. In Burma, the rule that monks may not touch money was sidestepped long ago when the people began giving the bonzes cylinders of silver coins contained in long nets. The Theravada Buddhist usually wears his hair shirt open at the neck, as it were.

The legend of laziness in Southeast Asia must be examined, like all its legends, for its inner meaning. It is quite unjust to imagine that Oriental idleness is the same as that of the Western worker who slacks on the job while the foreman has his back turned. The white man is a thief who steals paid time, but the indolent Asian would rather have the time than the money. Slowness and the siesta are his secrets of survival in the steamy tropics, and his philosophy leaves him with simple demands.

Buddhism has taught the Lao that he must cast off ambition, that nothing fails like success, and this suits him down to the ground. When provided by solicitous Americans with new strains of seeds that would double his rice crop, he remarks with pleasure that now he need sow only half his usual acreage.

"What would I do if I worked harder and earned more money?" said a Cambodian farmer when told that he, too, could double his yield. "I don't know. I already have a bicycle and a radio. Get another wife, perhaps?" He is not lazy; he simply declines to lead the life of Reilly or Richard Nixon.

It is not surprising if many Laos look askance at modernization and miracle rice, for instinct tells them correctly what will next come to pass: The bumper crops will demand more fertilizer and insecticides, then more roads and carts and trucks, then more mills and silos, more credits, more consumers at home and buyers abroad, more human involvement. Man should not meddle.

Most Moslems believe that all is decreed in advance, and the Buddhist sees the world of illusion rolling blindly forward beyond his control. Man's illness is terminal from birth, and the patient must accept with mild resignation all the funny and unfunny things that happen to him on his way to the cemetery.

It escapes the attention of self-righteous Asians that racists—whether white, black, brown or yellow—are the same trash under the skin. The prism of color prejudice east of Suez refracts tints more subtle than the black-and-white contrasts of the West, however. For where the white man is resented for his race, he may be envied for his whiteness, and where the black man earns sympathy as the victim of white oppression, he may be despised for his blackness.

The Negro in Asia can find a landlady's door slammed in his face as surely as if he were in Little Rock, and in 1968 a Committee of the Concerned for Equal Housing was set up to fight discrimination—in Bangkok. The Asians sympathize with the black man's struggle for civil rights in the United States, as long as it stays there.

An Asian country is a land of many hues in which the basic principle of prestige is, the lighter the better. Dark Indians, dark Cambodians, dark Indonesians suffer silently the disdain of their paler compatriots. In Singapore and Malaysia, Eurasians come in all shades from ivory to ebony and yet will make cruel distinctions among themselves, off-white denying his mixed-blood brotherhood with dark-oak.

Many struggle purposefully up the color chart toward an alabaster Nirvana, deliberately seeking wives fairer than themselves so that their children—the next incarnation—will be a shade closer to the ultimate bliss. Moreover, in a multicolored subcontinent, difference of pigmentation sharpens the sense of racial superiority, and as the tide of Western colonialism ebbed in Asia, it left exposed the Herrenvolk instincts of those who had been quickest to complain of oppression by their former European masters. And none felt this more promptly than the minority hill tribes.

Shans, Kachins, Karens, Mois, Thais, Meos, Nagas, Sakkais, Papuans, Dyaks, Dusuns, Muruts, Igorots—the minorities straddle the neat national boundaries that others have drawn and ignore the borders that ignore them. And in most cases they have until recently been cheated, bullied and sometimes enslaved by new Asian masters for whom "freedom" is a war cry when used against the West but a dirty word when directed against their own brown or yellow power.

THE LEAST TRUSTED

During the war against the Communist terrorists in Malaya, it was the New Zealanders who were filtered into deep jungle to win over the Sakais, the aborigines whom the Communists recruited as farmers, guides and spies, for it had been found that the Kiwis had the knack of winning their confidence and friendship. The Australians were trusted next, then the British, then the Gurkhas. The last on the list were the Malays, the new Asian overlords of the land. But the Malays have been models of magnanimity compared with the Burmese.

Most Burmese live in the lower reaches of the Irrawaddy Valley and its delta; the great uplands in the north and the coastal areas to the south are the domains of big minorities. But when in 1947 the country stood on the threshold of independence from British colonial rule, nearly all of these peoples agreed to join a sovereign Union of Burma governed from Rangoon, provided they enjoyed certain autonomous rights.

Separate Shan, Kachin and Karen states were duly created, each with a minister in the central government and representation in the two houses. The senior Shan ruler, Sao Shwe Taik, became first president of Burma.

Almost in a matter of months, however, the Burmese were showing that they were determined to dominate the entire country—by force if necessary—and militants among the minorities took to the hills in armed rebellion. The Burmese then tossed out the constitutional right of the Shans and Karens to secede, and their trigger-happy troops moved into the mountains, sacking villages and brutally shooting or manhandling the hill people in their homes.

In Thailand, where 300,000 restive Meos live astride the northern border, the government reacted to the depredations of fewer than 200 armed tribesmen in 1968 by ordering air strikes on "suspect" villages and by treating all who did not subsequently come out of the hills to be resettled in the plains as Communists.

The western half of the vast tropical island of New Guinea became the Indonesian province of West Irian in 1963. There were muffled reports of sudden armed uprisings by discontented Papuan natives in this territory which Sukarno had "liberated" from the Dutch. I remember how Lt. Gen. Djatikusomo—Javanese soldier, diplomat, prince—spoke of Indonesia's compassionate task of freeing the oppressed Papuans from their colonial fetters as civilizing the dirty natives "if necessary at the point of the bayonet."

ORIENTAL CUISINE

It might be thought that the last citadel of Oriental culture must be the stomach. The Chinese can prepare anything delectably from bird's nest to fish lips. The Laos like chicken stuffed with peanuts and cooked in coconut milk, ants' eggs and placenta from the mother cow. The Thais work wonders with redhot peppers and lemongrass. The Burmese make cocktail snacks out of deep-fried buffalo skin.

The poorer Vietnamese survives on rice and nuoc mam, a vivid sauce made by packing salted fish in a jar and leaving them to rot, and the Korean loves kimchi, three-month-buried pickled vegetables which can give him a breath that takes everyone elses' away.

A six-month-long publicity campaign in Singapore to persuade families to change from rice to cheaper wheat converted fewer than one in 50, and for breakfast or tea. But even these tumcoats ate bread, only this stubborn defense of rice is essentially a rear-guard action.

Switch on the television, and Dr. Kildare with Malay subtitles is interrupted by clattering Cantonese voices urging hitherto happy islanders to buy American fruit juice and British baby foods, bottled essence of chicken and extracts of beef, deep-frozen fish fingers and tinned Scotch broth. Children brimming with black currant juice are shown diving into sparkling pools; tired husbands sip their reconstituted mushroom soup and assume slow, lecherous smiles.

The Asian audience is impressed, and eating habits begin to alter. The supermarkets of Singapore, originally opened for white men raised on bottles and cans, paper packets and similar unrewarding fodder, are full of eager yellow and brown faces and hands. As the edibility gap closes, people who thought that one of the most sinister aspects of the Westerner was the way he went on drinking milk long after he should have been weaned now have cream and butter in their own refrigerators at home.

Japan, farthest of all to the East, leads the way toward the West in all things. Japanese are forgetting tea and taking to coffee, and there are about 100,000 coffee houses today in their narrow islands.

The are also forgetting rice and taking to noodles and meat and milk and even cheese. By early 1969, more than 500 rice dealers in Tokyo alone had put up their shutters. The Japanese are beginning to import great quantities of mutton and lamb and beef because the steaks from their own magnificent ale-fed herds can no longer meet domestic demand. But in order to eat gross Western foods, it is necessary to use gross Western methods, and among the white-collar workers of Tokyo, chopsticks are going out and the knife and fork are coming in.

As hallowed by history as corruption, the diligent practice of piracy and smuggling on a grand scale is also part of the pattern of policies in Southeast Asia. Prime Minister Lee Kuan Yew told a slightly surprised reporter in Singapore that perhaps the most useful role the U.S. Seventh Fleet could play after British forces had withdrawn from the area would be to check the growing piracy in the Straits of Malacca.

This occupation, regarded as reprehensible in the squeamish West, had respectable origins in Malayan waters as a form of system-

atic taxation. Henchmen of the local rajahs boarded ships when they sailed into the river estuaries bound for markets upstream and exacted a toll from them. Malacca itself—one-time powerful Venice in fee by forcing ships to put in and pay in coin or cargo for the right to proceed farther, while great war fleets of Moslem rovers, proud of their profession and sanctified by their persecution of the infidel, hovered in wait for them in the South China Sea.

Things are not what they were, and the modern Malay, Thai or Chinese pirates make do with modest enough little squadrons. But they operate in fast launches armed with machine guns or junks fitted with a row of powerful outboard motors, and hijacking smugglers or terrorizing and robbing fishing fleets are routine activities.

In the uneasy waters that lie between Borneo and the Philippines, cut-throat raids on coastal towns are one of the hazards of living. In mid-1968, four boatloads of pirates with high-powered weapons assaulted Basilian City in the southern Phillipines and fought a pitched battle with troops and police until helicopters flew in army reinforcements.

Filipino "cigarette boats" skim over the razor-edged coral at 35 to 40 knots, leaving any revenue cutter or armed hijacker to feel its way gingerly around the hazard. Slipping into the small, sun-baked ports of Sabah, the Malaysian state in North Borneo, Filipinos can cram 350 cases each contaniing 10,000 "blue seal" American cigarettes into one of these, and return safely across the 800 miles of sea to Manila. Their purchases are not illegal in Sabah, and their re-entry into the Philippines is made as smooth as a well-oiled palm.

UNLISTED EXPORT

In southeast Asia, impoverished governments resort to many unorthodox ways of raising cash. The principal Laotian export of the past decade is not officially listed.

From the springlike climate of the northern uplands, the Meo tribeswomen trudge down to the markets in the plans to barter their agricultural produce for gold, cloth and salt. And their main cash crop comes from waving fields of *papaver smoniferum*, which may yield 16 pounds of crude opium per acre.

The "smoking saloons" of Southeast Asia range from utility accommodations with wooden benches for trishaw drivers and coolies to plush tourist traps, but ask in any of these where the opium came from and the reply will be, "Yunnan." Yunnan is the mountainous southwestern province of China, but "Yunnan," like "Cognac," has become a loose generic term. It applies to the opium not only of China but of the other countries whose high frontiers converge in the same remote region of tossed hills and lush valleys—the Shan States of Burma, the northern borderlands of Thailand, the western limits of Laos—where the absurdly named "garden poppy" flourishes.

The mule trains and caravans of porters that trek southwest from Yunnan into Burma bring out between 300 and 400 tons of raw opium a year, joining the general trail of poison leading to the Thai frontier region where, in crude "kitchens" in the mountain villages, practiced hands refine much of it into powder with a morphine content of up to 80 per cent.

In northern Thailand, the commerce is organized by remnants of the Nationalist Chinese army which were forced out of Yunnan when Mao's men overran the province in 1950. While Peking and Taipei indulge in mutual mudslinging, the growers of Communist Yunnan and the former diehards of President Chiang Kai-shek cooperate—if at arm's length—in a profitable business venture.

The narcotics seep down in Bangkok and from there out into the world—in the ties of cars, in sacks of fertilizer, even embedded in the flesh of specially branded cattle. For a long time, an enterprising group of French pilots ran a transport service affectionately known as Air Opium, dropping their cargo at selected points outside Saigon or parachuting it into the Gulf of Thailand to be picked up by waiting ships.

In most countries, the traffic is officially illegal but may nevertheless have powerful protectors. In Laos, military aircraft authorized by the top brass have flown the drug, and in Thailand, marketing is invariably in the hands of men of distinction. Bribes buy blind eyes, and in some parts of the Far East, the arm of the law is more golden than long.

THE VERSATILE BOMOH

But if minds and movements in Southeast Asia must be seen through filters that bring out the threads of gold and graft, piracy and *papaver somniferum*, they must also be observed through other influences that color them, from philosophy to superstition. In an ignorant subcontinent, opium is not the only religion of the people.

The Chinese Communists have admitted repeatedly that the supernatural has been among their most stubborn ideological foes. Most people in the East are ignorant, and therefore cling to the habits and superstitions of their venerated ancestors.

Poverty is not the only criterion. A smartly turned-out Lao, sipping his scotch in the bar of the Georges Cinq in Paris, may be wearing several frayed and rather soiled threads of cotton around his wrist in place of the platinum watch one might expect. They keep his 32 souls inside his body and out of mischief.

It was not until 1960 that the first Dyak from the longhouses of Sarawak began to study modern medicine. He had been introduced to this strange science when a visiting English missionary had given him a dose of castor oil seven years before. His regular family doctor had been a bomoh, whose stock remedy was to paint his face and chant ferocious incantations.

The Malay bomoh is a versatile fellow who will undertake to locate missing corpses, drive off ghosts, heal the sick, supply love potions, put spells on a customer's enemy and much else besides. Bomohs have been involved in crimes from confidence tricks to robbing the Treasury, but their real specialty is rape.

In 1969, the Malaysian Education Minister advocated sex lessons in school to protect pupils, because "we have all heard of those bomohs and religious teachers who have been brought to court for molesting girls." One Malaysian medium took away and violated a 15-year-old after telling her mother that he was going to perform a ritual which would remove eight lethal needles hidden in her body, and an 18-year-old wife was ravished on a beach by a bomoh who assured her that this treatment would "cure her husband's stomach ache."

Not all bomohs are bad, however. The magical healers of Indonesia and Malaysia are often careful herbalists who charge no fee for their services. They were, incidentally, the first to use quinine as a cure for malaria. Today, bomohs in the backwoods of central Malaya are being given a smattering of Western medicine and many of them are turning toward antibiotics rather than arrowroot plucked by the light of a gibbous moon.

A POTENTIAL WEAPON

Among educated Malaysians to whom Oxford, Cambridge or the Middle Temple are intellectual homes, and whose tastes run to Jaguar cars, the stock market and golf, far more than would care to admit call in the family witch doctor to cure suffering—or sometimes to inflict it on others. Politicians hire bomohs as they hire bodyguards—to protect them against the bomohs of their opponents.

An attempt to liquidate President Suharto of Indonesia in mid-1968 was ascribed to a witch in the pay of the equivocal ex-Foreign Minister, Dr. Subandrio. Sihanouk consults soothsayers, and so did Sukarno.

Numerology and astrology wield an incalculate influence over public events throughout Southeast Asia, where even house numbers may be chosen for luck rather than location and do not always follow each other consecutively. When Sukarno set 270 experts the task of drawing up a national overall development plan, he was not so much concerned with the content of its 5,000 pages as with its form: it had to be divided into 17 volumes, eight parts and 1,945 clauses, because Indonesia had declared independence from the Dutch on Aug. 17, 1945.

It is now possible to graduate in astrology in Thailand after a four-year course, and it is certainly desirable that this occupation should be confided to the hands of properly qualified experts. Many believe that Mrs. Sirimavo Bandarandaike lost the general elections in Ceylon in 1965 because her astrologers goofed over the choice of polling day.

Mysticism makes its own history. The wife of the Vietnamese warlord, Gen. Khanh, commissions a geomancer to relocate her kitchen so that it will be more in harmony with the universe. But word gets out; other generals at once suspect that Khanh is unsure of his ground in more senses than one, and that the moment has arrived to mount a coup against him. Within a few weeks, Khanh is out and his rivals are in.

Does Prince Boun Oum promise democracy as the antidote for communism? No one cares. For a Lao villager who knows that there are 16 hours in the day and the world is flat, the most powerful antidote for communism is not democracy but Boun Oum's magical amulet, which enables the prince to become invisible at will in spite of his aristocratic corpulence. The ease with which magic can beat Marx in the myth-laden lands of Southeast Asia must never be underestimated.

THE MALLEABLE TRUTH

Since Asians do not regard life as a theorem of Euclid, there is no QED, and in consequence their reasoning and their objectives are sometimes mysterious.

"*Will* you get off this phone!" yelled an infuriated woman who had mistakenly called our number in Singapore three times in succession under the impression that it was that of a friend.

The minister of information in Vientiane, importuned by correspondents who complained that they were receiving conflicting reports of what was happening in the Laotian war, remarked with asperity: "If you *will* talk to different officials, naturally you get different answers."

Another minister, asked if it was really true that seven North Vietnamese battalions were attacking Phou Khoun as officially announced, replied readily enough, "Well, it's only *partly* propaganda."

The Vietcong have twisted the malleable truth of Asia into their own form of folk art. I learned in Saigon that Vietcong units were being encouraged to file false returns by instructions from above which laid down minimal killing quotas: "In February, the division will eliminate 1000 of the enemy, shoot down 50 American helicopters . . ." Back came the same figures from below at the end of the month, proving that all quotas had been fulfilled.

It is Asian to tell a man what he wants to hear, or to refrain from telling him what he does not want to hear. The courteous Malay who does not want to answer your inconvenient request with a brusque and final negative replies "Belum," and it is understood that this vague and elastic euphenism spans all future time, from "not just yet" to "never."

The white man who accuses the Asian of double-talk is simply failing to understand what he is being told in plain, straightfor-

ward innuendo. Southeast Asia is a polite subcontinent in which you say a man has short legs by calling him tall in the saddle.

"How many members do you have?" I asked the leader of a moderate political party in Brunei as we sat barefoot in his bungalow.

"About 20,000," he replied.

"All staunch supporters?" I pressed on, in my brutal Caucasian fashion.

"Let me put it this way," he answered with a plump smile. "About 800 of them would probably have the sense not to join the extremists if there were another insurrection."

"And how many pay party dues?"

"We do not levy dues," he said loftily. "We rely on well-wishers for our funds."

It was a painless way of saying that the party was being bribed from behind, and that if it came to the crunch, about 95 per cent of its members would desert it.

THE UNSUBTLE WEST

In the East, words are often uttered only because, without them, it would be difficult to read between them, whereas in the West one is actually expected to take them at their face value. What is a subtle guide at one end of the world, therefore, may become an unsubtle disguise at the other.

Unlike the Asians, the Americans do not spell out their fantasies in words of four letters but pad out their truths with the polysyllabic falsies in which their national language is so rich. At their distorted 5 o'clock shadow of the Vietnam war known in Saigon as the daily press briefing, a helicopter attack becomes a "vertical envelopment," failure to catch the enemy is a "pursuit operation terminated with negative results" and raining 500-pound bombs and napalm on Vietnamese peasants by mistake is an "accidental delivery of ordnance which impacted on an inhabited area."

A communique dated March 16, 1968, reads: "In an action today, American divisional forces have killed 128 enemy near Quangngai City." That's the massacre at My-lai, that was.

## THE RECENT PRESIDENTIAL ELECTION IN CHILE

Mr. FULBRIGHT. Mr. President, former Ambassador to Chile Ralph Dungan has provided some well reasoned and perceptive comments on the recent presidential election in Chile. I ask unanimous consent that his article, "Chile: Test of American Maturity," which was published in the Washington Post September 23 may be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. FULBRIGHT. Mr. President, because no candidate received a majority of the votes cost, the final choice rests with the Chilean Congress. The Chilean Congress should be left alone, free from outside influence, to make this choice.

Over many years, the people of Chile have demonstrated their capacity to make a free political system work. I am sure they are capable of doing so again.

EXHIBIT 1

CHILE: TEST OF AMERICAN MATURITY

(By Ralph A. Dungan)

Whatever else follows, the recent Chilean election—in which a socialist, Salvador Allende, with some Communist Party support was the victor—provides an opportunity for the United States government to demonstrate a maturity in the conduct of its foreign relations which would be as refreshing as the Chilean situation is novel.

Several characteristics of the election can be acknowledged by almost any objective observer. As has been true historically in Chile, the elections were as honest as elections are anywhere—perhaps more so. Participation was high, as usual, and proportionately higher than in most Western countries.

Demagoguery, last minute incidents or external events do not seem to have distorted the results. To the extent that there were seriously disturbing factors present, the urban terrorism attributed to and sometimes claimed by the MIR (Revolutionary Left Movement) was more likely to have benefited center-right candidate Sr. Allesandri. The election by almost every standard was honest, orderly and in the best Chilean and Western tradition.

Therefore, there is every reason for us to adhere fully to our principle of self-determination and maintain strictly neutral posture as the Chilean people move to complete the constitutionally prescribed process on Oct. 24. On that date a joint session of the Chilean Congress will decide in a runoff ballot which of the three candidates will be president. If it adheres to tradition, Sr. Allende having the largest plurality, will be named.

It can be predicted safely that the period preceding the runoff will be marked by political jockeying as the Christian Democrats seek to gain whatever advantage their large number of seats in the Congress will yield after the poor third-place showing of their candidate, Sr. Tomic.

One can also expect some panic reaction on the part of the wealthy and the relatively large petty bourgoisie. It will be difficult indeed to stem the flow of currency into foreign banks, the relatively unimportant capital market, like similar institutions in other countries, will no doubt be chaotic. These and other manifestations of unrest and anxiety are to be expected given Sr. Allende's rhetoric during this and previous campaigns.

And the reaction may be more than the fragile social and economic structure of Chile can stand. Some elements of the military might make a move, as they have promised, to prevent Allende's taking power. Or the MIR, taking advantage of the confusion, might make a desperate move. Or, less likely, one of Chile's neighbors might threaten.

But the democratic process does not guarantee stability; it only guarantees people free choice in the selection of their government. A majority (more than 60 per cent) of the Chilean people, quite predictably, have indicated their desire for a government of the left and apparently at least a third of the electorate is not concerned with a Marxist label.

It is hoped that Chileans and Chile's friends outside the country will view the recent election in some perspective and will speak and act with restraint. Foreigners especially should recognize that despite the very substantial progress brought about under the Frei government, continued rising expectations, unsolved problems like inflation, and the desire for a change were important factors in the election.

Chile, like other modern democracies, has a large swing vote not clearly committed to party or ideology. This swing vote is young and left-leaning and looking for solutions. The choice of aging, rigid Jorge Allesandri as the candidate of the Conservatives was poorly calculated to attract center-left elements which could have made the difference in this close race.

Then there is Sr. Allende himself. A man historically in opposition, he has had no recent governmental experience. He is intelligent and committed. Above all he is a Chilean and can be expected to look for, as he has suggested, solutions which will suit the Chilean character and spirit. He will inherit large problems including a huge external debt, a probable decline in copper prices, and endemic inflation. Taking nothing away from his ideological convictions, he is too intelligent and sophisticated an observer not to realize that doctrinaire solutions usually don't work.

In any event, the central fact is that the Chilean people have chosen and are in the process of completing a constitutional and free election. It would be most unfortunate if anything interrupted the process which will determine Chile's destiny.

## JEROME HOLLAND: A GREAT DIPLOMAT

Mr. GRIFFIN. Mr. President, I know of no more exacting and difficult diplomatic post than that of U.S. Ambassador to Sweden.

Pacifist, antiwar sentiment has been cleverly fanned into a widespread campaign against the United States. Some Swedish officials have proclaimed a curious "neutrality" policy which appears to be specifically in favor of our enemies.

It remained for Dr. Jerome Holland, the Nixon administration's appointee as Ambassador, to test the depth of this sentiment, and to present the case for his country.

He has done an absolutely magnificent job.

In spite of the harassment, the shrill, irrational tactics so similar to what we are encountering in this country, Jerome Holland has made a deep impression on the people of Sweden. He has given new luster to the image of America.

Just how he had done this is set forth in a very interesting article in a recent issue of the Baltimore Sun. It is a fascinating chronicle of a man in complete possession of himself, acting with a quiet self-confidence, undeterred by personal insults, unafraid of competition.

The article describes him attending a service and then delivering a lecture in the ancient Cathedral of Vasteras on "the Negro church as a social force in America." Five hundred listened attentively and respectfully, ignoring the racket outside created by the rabblerousers.

This was part of a 2-day trip during which he "met all the dignitaries in two towns, toured a mechanized farm, a family farm, a museum, and Sweden's oldest provincial newspaper."

Ambassador Holland and his wife make such tours about twice a month. The results are best summed up by one of the young harassers who trail him wherever he goes:

This is unusual activity for a diplomat. Mr. Holland is fast becoming the best known Ambassador who ever came here. He is very effective.

We in America can be very proud of Ambassador Holland. But we should not be surprised. Here is a man who has achieved excellence in all his endeavors: as the famous "Brud" Holland, all-American football player at Cornell, as an undergraduate and graduate student earning his doctorate, as an educator who became president of Delaware State College and then Hampton Institute.

He is imbued with the same qualities which were remarked on in the recent

eulogies in tribute to the late Vince Lombardi.

Mr. President, I ask unanimous consent that the article referred to be inserted in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SWEDES HARASS U.S. ENVOY—200 CIRCLED CATHEDRAL WHERE HOLLAND WAS SET TO LECTURE

(By Daniel Berger)

VASTERAS, SWEDEN, Sept. 17—Two hundred young people surrounded the great red-brick brick Lutheran cathedral in this provincial town.

They belonged to FNL, the boisterous Swedish pro-Viet Cong group. Their posters said "Holland Go Home."

The leaflet they handed to everyone bore a cartoon that was intended to be abusive. The drawing showed President Nixon on the sidelines of an American football field, cheering on a big Negro player who carries a ball labeled "Sweden."

RAY TEAM

The car arrived. The crowd rushed. Dozens of police ran interference. The big man was out and into the cathedral before anyone could throw an egg at him.

The crowd chanted, "Holland Go Home" and other slogans in Swedish that somehow sounded like "T-E-A-M Ray Team."

Five hundred solid citizens of Vosteras waited in the gothic interior. The choir sang Swedish Lutheran hymns.

The cathedral dean briefly introduce the Negro as the United States ambassador, Jerome H. Holland. As the dean translated, he gave a 45-minute lecture on "the Negro church as a social force in the United States."

NOT SELLING AMERICA

Mr. Holland was not selling America. He was describing the separated Negro church as a responsible and effective protest movement for the past 200 years and, he predicted, for some time to come.

He sounded like a sociologist which he is giving an introductory lecture to freshmen. At the end there was no applause, only respectful silence as befitted a service. There were no interruptions. The choir sang beautifully, "Nobody Knows the Trouble I've Seen," in English.

Mr. Holland was gone; he left the police scuffling with a student at the door. It was was not much. The two big Stockholm evening tabloids each gave it a page, with pictures.

ANOTHER SCORE

That FNL cartoon was right. Brud Holland, the former twice All American Cornell end, scored again. He pierces the FNL line every time, and roams Sweden like it was the Harvard backfield.

On this two-day trip, he met all the dignitaries in two towns, toured a mechanized farm, a family farm, a museum and Sweden's oldest provincial newspaper.

Mr. Holland does this about twice a month. Thanks to FNL, he is a celebrity. Crowds gather, less to see the action than to see him. The FNL intelligence network is impressive. He is never without this troublesome escort.

UNUSUAL ACTIVITY

"This is unusual activity for a diplomat," says a Swedish member of the breed. "Mr. Holland is fast becoming the best-known ambassador who ever came here. He is very effective."

For the 15 months before Mr. Holland arrived, the United States had no ambassador here.

In 1967 and 1968, Prime Minister Olof Ualme and other politicans were contending with a fervent anti-war, anti-American sentiment in public opinion. Ambassador William W. Heath, a Texas crony of President Johnson, was ill-equipped to deal with it.

The embassy withdrew into itself and waited for the storm to subside. Communication lines to Swedes were blocked.

In perfect trim at 54, Mr. Holland would still be a terrifying spectacle on the other side of a line of scrimmage.

Entertaining Swedes and Americans at his official residence in Stockholm the other evening, nursing a martini with two olives, he was gregarious, relaxed and plain-spoken.

VISITED ALL OF SWEDEN

Since arriving in April, he has visited every part of Sweden and intently traded views on social questions with every kind of Swede.

He is often asked to discuss Negro life. "I have a certain credibility," drily suggests the author of "Black Opportunities" and former president of Hampton Institute in Virginia and Delaware State College in Dover.

But he deos not stick to that subject. Recently he addressed industrialists in Gothenburg on "Challenges to Management." While he did so, his wife was on the other side of town discussing the women's liberation movement.

ADMINISTRATION WAR LINE

An energetic woman with two young teenage children in Stockholm schools, Laura M. Holland is a lively complement to her husband's meet-the-Swedes campaign and an acute observer of Swedish politics.

Mr. Holland never brings up the war but always answers the inevitable questions about it. On this subject, and this subject alone, he restricts himself to the straight administration line.

He may not have converted a single Swede to a proadministration opinion on Vietnam but what he has done in five months is isolate the war as the obstacle to understanding, and reopen the Swedish-American dialogue on other subjects.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## BILL ORDERED TO BE PLACED ON THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 18583.

The PRESIDING OFFICER (Mr. SPONG). The Chair lays before the Senate H.R. 18583, a bill to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse, which was read twice by its title.

Mr. MANSFIELD. Mr. President, discussions have been had with the interested parties. I believe the request I am about to make is agreeable to all concerned.

Mr. President, I ask unanimous consent that the bill be placed on the calendar.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

## ORDER OF BUSINESS

Mr. GRIFFIN. Mr. President, I ask unanimous consent that I may proceed for an additional 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## NATIONAL EMERGENCY DISPUTES

Mr. GRIFFIN. Mr. President, I had a reservation to travel last Thursday morning from Washington to New York aboard the Penn Central Metroliner. But I was not sure whether I would be able to get to New York by train until I awoke that morning and learned from news reports that railroad unions and management had finally agreed in the middle of the night to a 2-week extension of a strike deadline related to a work rules dispute that has been going on for about 11 years.

Mr. President, it is very disturbing, as this dispute continues and the real likelihood of a nationwide rail strike hangs over the head of the Nation, that the committees of the Congress with jurisdiction over labor-management legislation are apparently too busy with other matters to give this important subject their attention.

I wish to focus today, as the President did over the weekend, upon the fact that since February of this year there has been pending before the Congress a bill which I introduced in the Senate on behalf of the administration, S. 3526, entitled the Emergency Public Interest Protection Act of 1970. This legislation would place railroads and airlines under the emergency disputes provisions of the Taft-Hartley Act and would add to the present emergency provisions of Taft-Hartley three new options which would be available to the President of the United States if a dispute in certain transportation industries continued beyond the expiration of the 80-day cooling-off period.

Since the Taft-Hartley Act has generally worked well in most emergency dispute situations, it seems reasonable that the airlines and railroads should be brought under its emergency dispute provisions so as to eliminate the confusion which has existed because of parallel but differing procedures now provided by the Railway Labor Act and Taft-Hartley.

However, the key feature of the administration bill is the options which it would make available to the President, subject to congressional veto, to deal with continuing emergency disputes in the transportation industries. The options to be made available are built around the core principle that the best way to settle a labor dispute is to keep governmental intervention required for protection of the public interest to the minimum necessary while at the same time maximizing the opportunity for private settlement of the dispute. The bill goes on the

theory that if governmental intervention is unpredictable, both in terms of occurrence and form, there would be more inducement for the parties to resolve the dispute themselves, If neither party can count on government intervention, genuine bargaining in earnest is likely to begin much earlier.

The three options to be made available to the President of the United States under the bill are as follows: One, he could extend the cooling off period for an additional period of time; or, two, he could set in motion a procedure which would enable partial operation of the enterprise; or, three, and the most important option available, he could appoint a panel which would select and give effect to one of the final offers made the parties engaged in collective bargaining.

The options mentioned would apply only to the following industries: the railroads, airlines, maritime, longshore, and trucking industries. The President of the United States, under the bill, could invoke any one of the three options, but only one.

Mr. President, I can understand that there may be differences of viewpoint concerning the merits of some provisions in this legislative proposal. But I cannot understand or justify the fact that the Congress has ignored this proposal altogether. No hearings have been scheduled by the responsible committees of either House of Congress, and we are now less than 10 days from another deadline which could be the beginning of a nationwide railroad strike.

Perhaps the deadline will be extended again, and perhaps the Congress will meet its objectives and be able to adjourn around the middle of October. It would be unfortunate, if not irresponsible, I would suggest, if Congress were to adjourn without taking any action in this field. Indeed, I can foresee the necessity, after the election, for the President to call the Congress back into special session for the purpose of dealing with a nationwide railroad strike if we do not take action now to provide him with the necessary tools to deal with the serious situation now confronting the railroad industry and the Nation.

Mr. President, I hope that the responsible committees of the Congress will take note of the seriousness of the situation and will go to work on this problem. I believe this legislation must be assigned as high a priority—as indeed, a higher priority than some of the bills that have been coming out of the Committee on Labor and Public Welfare.

In that connection, Mr. President, I ask that the text of a letter dated September 25, 1970, from the President of the United States, addressed to the leadership of the House and the Senate, be printed in full in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TEXT OF A LETTER FROM THE PRESIDENT TO SENATOR MIKE MANSFIELD, SENATOR HUGH SCOTT, SPEAKER JOHN MCCORMACK AND REPRESENTATIVE GERALD FORD

On February 27, 1970, I proposed to the Congress enactment of the Emergency Public Interest Protection Act of 1970 to protect the public against the damaging effects of strikes in the transportation industry. Despite the high priority assigned to this proposal, there has been no action by the Congress to create an effective alternative to work stoppages in this vital industry.

Since I offered my proposal, two disputes involving the nation's railroads and labor unions have reached a crisis point. In the first of these, all mechanisms of the Railway Labor Act have been exhausted, and the nation this week barely averted a shutdown of the rail transportation system. If negotiations in the next two weeks prove to be fruitless and a strike occurs, the only remedy at hand will be special legislation by the Congress addressed to the specific issues involved in this case. In the second dispute I exercised last week the authority conferred upon me by the Railway Labor Act to delay work stoppages when essential transportation services are in jeopardy. I appointed an emergency board to investigate, thus achieving an automatic stay of action of parties to the dispute for a period of 60 days.

When that period ends, it is likely that the Congress will no longer be in session, and the nation's rail transportation might be totally halted. Once again events have revealed the deficiencies of existing legislation for handling labor disputes in the transportation industry. This is precisely the kind of situation I sought to prevent when I proposed emergency legislation seven months ago.

Now, I urgently ask the Congress to give immediate priority to my proposed Emergency Public Interest Protection Act so that in the future transportation services essential to the well-being of the American people will not be subject to the threats and strains of recurring crises.

Sincerely,

RICHARD NIXON.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## EXTENSION OF TIME FOR COMMITTEE ON THE JUDICIARY TO REPORT S. 3201, THE CONSUMER PROTECTION ACT OF 1969

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Judiciary Committee be permitted an additional extension of 7 days to report back to the Senate S. 3201 to amend the Federal Trade Commission Act to provide increased protection for consumers, and for other purposes. The original agreement between the chairman of the Judiciary Committee and the chairman of the Commerce Committee provided for a reporting date of September 14, which was extended by order of the Senate until today, September 28. This additional extension is requested because of the desire of the Judiciary Committee to meet on this measure this week. It is understood by the terms of this consent agreement that this bill will be reported back to the Senate automatically next Monday, October 5, without further action by the Senate or by the committee.

The PRESIDING OFFICER (Mr. SPONG). Is there objection? The Chair hears none, and it is so ordered.

## THE PUEBLO DE TAOS INDIANS—60 YEARS OF INJUSTICE

Mr. GRIFFIN. Mr. President, considerable national attention has been focused recently on the problems and plight of the American Indians, and with justification. As President Nixon said in his recent Message to Congress on Indians on July 8:

> This condition is the heritage of centuries of injustice. From the time of their first contact with European settlers, the American Indians have been oppressed and brutalized, deprived of their ancestral lands and denied the opportunity to control their own destiny.

Because of my concern for the welfare of Indians generally, and because of my special concern for some 18,000 Indians in the State of Michigan who have achieved varying degrees of progress, I am interested in seeing that sound, progressive legislation of real meaning for Indians is advanced in Congress.

For that reason I wish to indicate my support for H.R. 471.

The purpose of this legislation is to convey trust title to the Pueblo de Taos Indians in New Mexico of approximately 48,000 acres of land which the United States took from the Indians in 1906 without the payment of any compensation.

Of course, I am well aware of the desire to expedite the business of the Senate in the closing days of the session. I am conscious of the fact that there have been occasions in past sessions when bills with great merit were lost in the rush to adjournment. It would be very unfortunate if such a fate should befall this measure.

H.R. 471 was passed by the House of Representatives on September 9, 1969, more than a year ago. Similar proposed legislation was also passed by the House during the 90th Congress.

During consideration by the House in the 90th Congress, and again in this Congress, extensive committee hearings and long executive sessions were held.

The Indian Subcommittee of the Senate Interior and Insular Affairs Committee held hearings in July on the bill, and I understand that the bill may be taken up by the full committee this week.

I believe that this is a unique and singularly justifiable piece of Indian legislation since the Indians involved have used the lands concerned since the 14th century for religious and tribal purposes. Moreover, its enactment would be an important symbol of this Government's responsivenss to the just grievances of American Indians. President Nixon specifically cited the Taos claim as one such just grievance in his Indian message.

According to the Indian Claims Commission in a decision of September 8, 1965, the Indians had clearly established Indian title to an estimated 130,000 acres of aboriginal use since the 14th century, and the U.S. Government had extinguished Indian title to the land without payment by adding the land to the Taos—later Carson—National Forest in 1906. The Commission directed that the Indians be paid the value of the 130,000 acres at that time. The value has not yet been determined. The judgment

will be reduced accordingly if the Indians receive trust title to the 48,000 acres within the tract.

The religious significance of this particular land to the Taos Indians is best described in the Indian Claims Commission findings of fact:

One of the precepts of Pueblo philosophy and religion is that a way of life was established in the beginning by Mother Nature and the Pueblo's forefathers, and that things should be done as they were in the past.

The native religion of the Taos Indians is to this day very much involved with the daily life of the people. This religion does now and has for centuries tied them closely to the land. The land and the people "are so closely tied together that it is what might be technically called a symbiotic relationship—the people, by their prayers and their religious functions, keep the land producing; and the land keeps the people."

* * * * *

Starting with the northernmost part of the eastern claim area, the most important site identified on petitioner's Exhibit No. 84(a) is Blue Lake. This is the most sacred shrine of the Taos Indians. It is claimed to be their church. In August every year the entire adult population of Taos Pueblo goes to Blue Lake for ancient religious ceremonies which have continued uninterrupted for centuries. On the first day a ceremony is held in the Canyon of the Taos River, east of the peublo. Then on the second day, the Indians go to the Blue Lake and there hold ceremonies during the day and night.

Since the Taos lost title to the area in 1906, some commercial timber harvesting has occurred. A sacred lake was dynamited. A cabin was constructed a few hundred yards from their most sacred shrine. These acts had the same meaning to the Indians as vandalizing a church would have in a Christian community.

Of course, none of these acts were permitted with the knowledge that they violated the religion of the Taos people.

Although the Taos Indians have had use of some 32,000 acres of this land since 1940 under a 50-year permit with provisions for subsequent renewals, and subject to certain control by the Forest Service, they have never been satisfied with the arrangement, and it has been a source of continuous controversy and conflict.

The Taos are apprehensive that Congress could at some future time repeal the act which allows the permit arrangement and take the land. They feel that if they had trust title, they would have a more secure right to the land than they have under the present permit, and more adequate protection of their religious interests in the area. H.R. 471 would grant them trust title to the 32,450 acres for which they have use under the present permit, plus an additional 15,550 acres.

Normally, legislation involving Indian land claims in other States does not generate mail from my constituents. However, in this case, I have received communications from the Michigan Commission on Indian Affairs and Indian constituents endorsing and urging favorable action on H.R. 471.

Because of the uniqueness of this particular Indian land claim; because the Taos Indians without question had established Indian title to a much larger area; because of the singular close religious significance which this land has to the daily lives of the Taos people; and because enactment of this legislation would go far toward restoring Indian trust and confidence in the Federal Government at a time when many new and far-reaching proposals are before them, I strongly urge the passage of the Taos-Blue Lake legislation.

## ORDER OF BUSINESS

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORTS OF OFFICE OF CIVIL DEFENSE

A letter from the Director of Civil Defense, transmitting, pursuant to law, a report of Federal Contributions Program Equipment and Facilities, for the quarter ended June 30, 1970 (with an accompanying report); to the Committee on Armed Services.

A letter from the Director of Civil Defense, transmitting, pursuant to law, a report of Federal Contributions—Personnel and Administration, for the fiscal year ended June 30, 1970 (with an accompanying report); to the Committee on Armed Services.

REPORT OF THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

A letter from the Chairman, U.S. Equal Employment Opportunity Commission, transmitting, pursuant to law, a report of the Commission for the fiscal year ended June 30, 1969 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF THE SUPREME COURT OF THE UNITED STATES

A letter from the Chief Justice, Supreme Court of the United States, reporting, pursuant to law, the Court will open the October 1970 term on October 5, 1970, at 10 a.m., and will continue until June 7, 1971, or until all matters before the Court are disposed of; which was ordered to lie on the table.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Government Operations, unfavorably:

S. Res. 433. Resolution to disapprove Reorganization Plan Numbered 4 of 1970 (Rept. No. 91–1242).

By Mr. McCLELLAN, from the Committee on Government Operations, without amendment:

H.R. 4599. An act to extend for 2 years the period for which payments in lieu of taxes may be made with respect to certain real property transferred by the Reconstruction Finance Corporation and its subsidiaries to other Government departments (Rept. No. 91–1243).

By Mr. HUGHES, from the Committee on Labor and Public Welfare, with an amendment:

H.R. 14252. An act to authorize the Secretary of Health, Education, and Welfare to make grants to conduct special educational programs and activities concerning the use of drugs and for other related educational purposes (Rept. No. 91–1244).

## PRINTING OF REVIEW OF REPORT ON SAN LUIS REY RIVER, SAN DIEGO COUNTY, CALIF. (S. DOC. NO. 91–106)

Mr. BYRD of West Virginia. Mr. President, on behalf of my colleague, the senior Senator from West Virginia (Mr. RANDOLPH), I present a letter from the Secretary of the Army, transmitting a report dated April 3, 1970, from the Chief of Engineers, Department of the Army, together with accompanying papers and illustrations, on San Luis Rey River, San Diego County, Calif., requested by a resolution of the Committee on Public Works, U.S. Senate.

I ask unanimous consent that the resolution be printed as a Senate Document, with illustrations, and referred to the Committee on Public Works.

The PRESIDING OFFICER (Mr. HUGHES). Without objection, it is so ordered.

## BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SCHWEIKER:

S. 4400. A bill for the relief of Nemattolah Hajasgarkhan; to the Committee on the Judiciary.

By Mr. BAKER (for Mr. MURPHY):

S. 4401. A bill to amend the Federal Aviation Act of 1958, as amended, to authorize air carriers to engage in bulk air transportation of persons and property; to the Committee on Commerce.

By Mr. PROXMIRE:

S. 4402. A bill for the relief of Sang Yol Hwang; to the Committee on the Judiciary.

## IMPROVEMENT OF OPERATION OF THE LEGISLATIVE BRANCH—AMENDMENTS

AMENDMENT NO. 951

Mr. METCALF submitted amendments, intended to be proposed by him, to the bill (S. 844) to improve the operation of the legislative branch of the Federal Government, and for other purposes, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 952

Mr. METCALF submitted amendments, intended to be proposed by him, to the bill (H.R. 17654) to improve the operation of the legislative branch of the Federal Government, and for other purposes, which were ordered to lie on the table and to be printed.

## AMENDMENT OF THE CONSTITUTION RELATIVE TO EQUAL RIGHTS FOR MEN AND WOMEN—AMENDMENT

AMENDMENT NO. 953

Mr. ERVIN submitted an amendment, in the nature of a substitute, intended to be proposed by him, to the joint resolution (H.J. Res. 264) proposing an amend-

ment to the Constitution of the United States relative to equal rights for men and women, which was ordered to lie on the table and to be printed.

## ANNOUNCEMENT OF HEARINGS ON TAX CONVENTIONS

Mr. ALLEN. Mr. President, on behalf of the Senator from Arkansas (Mr. FULBRIGHT), I wish to announce that the Committee on Foreign Relations has scheduled a public hearing on Monday, October 5, 1970, to receive testimony on the following income tax conventions:

First, tax convention with Belgium, signed at Brussels on July 9, 1970 (Ex. I, 91–2);

Second, tax convention with Finland, signed at Washington on March 6, 1970 (Ex. E, 91–2);

Third, tax convention with Trinidad and Tobago, signed at Port of Spain on January 9, 1970 (Ex. D, 91–2); and

Fourth, estate tax convention with the Netherlands, signed at Washington on July 15, 1969 (Ex. G, 91–1).

The hearings on these conventions will be held in room 4221 of the New Senate Office Building beginning at 10 a.m. Any person interested in testifying should communicate with the chief clerk of the committee without delay.

## ADDITIONAL STATEMENTS OF SENATORS

### A BOLD NEW INDIAN POLICY

Mr. PERCY. Mr. President, it has become fashionable to bemoan the plight of the American Indian. Books have been written, magazine and newspaper articles published, and television and radio programs aired to document the shameful harvest of centuries of oppression and injustice.

Clearly the time has come for action—not just words—for dramatic new initiatives which will allow the Indian people to take their rightful place in American society.

In his historic message to the Congress on July 8, 1970, President Nixon announced a bold new Indian policy that would assure Indians self-determination while reducing Federal paternalism. Under the President's proposals Indian tribes would still remain the subject of Federal concern and Federal support but would be authorized to assume control of Federal programs and services provided for them. Seven separate proposed bills have been sent to Congress by the Department of the Interior in order to implement the President's proposals and it is heartening that this week, hearings are being held on some of these bills by the Indian Affairs Subcommittee of the Senate Committee on Interior and Insular Affairs.

Because of the complexity of the President's proposals, both the Senate and House will need to give these measures extended study and, of course, some time will be required to ascertain the views of Indian leaders.

The President has made it clear that he wants Indian people to participate in policy development to the greatest possible degree. He has asked Vice President AGNEW in his capacity as Chairman of the National Council on Indian Opportunity to hold regional hearings throughout the country with Indian leaders. Five such meetings have been held this month and three more will be completed within the next several days before the second round of the meetings takes place in early November. The purpose of these meetings is to allow Indian leaders to examine in detail the message of the President and the legislation which has been introduced to implement it. The reactions, suggestions, and the recommendations which will result from this dialog between the Federal Government and the Indian people will play an important part in modifying the legislation before it is reintroduced in the 92d Congress.

There is one item of legislative business which need not await further deliberation and study before action. In his message to the Congress, President Nixon urged enactment of H.R. 471, a bill—already passed by the House—that would restore sacred Blue Lake lands to the Indians of the Taos Pueblo in New Mexico.

These lands were taken from the Pueblo without the payment of compensation in 1906. They are a natural cathedral containing the holy places and altars of the ancient Taos faith and their preservation as a wilderness—as H.R. 471 would assure—is essential to the sustenance of the Taos culture and religion.

The struggle of the Taos Pueblo, for over 60 years, to regain their sacred lands has captured the imagination of Indians throughout the country and people throughout the Nation and the world. The injustice done to these Indians has become a symbol of the injustices done to all Indians. As President Nixon stated in his message, the passage of H.R. 471 "would stand as an important symbol of this Government's responsiveness to the just grievances of the American Indians."

I am proud that leaders of both political parties have expressed strong support for the bold initiatives announced in President Nixon's message to the Congress which has kindled renewed hope among our Indian citizens that better days lie ahead. As a gesture of good faith Congress should swiftly pass H.R. 471 into law as requested by the President.

### THE ADA AND LAWLESSNESS

Mr. BENNETT. Mr. President, I note from the radio and newspaper accounts this morning that Americans for Democratic Action have called for a congressional inquiry into what they term official lawlessness. The ADA is rightfully concerned with the shooting of students at Kent State and Jackson State. All Americans are concerned with those tragic affairs.

However, in its presentation the ADA once again demonstrated, by the position it took and the manner in which it was done, that it is an organization bordering on the extremist.

In describing the tragedy at Kent State as official lawlessness, the ADA carefully avoided the question of why the National Guard had been called to the campus. The shooting of four students was not an isolated incident but rather the culmination of several days of lawlessness and criminal and violent action on the part of some students on that campus. The Guard was called into a situation that was already supercharged with violence.

The ADA ignores the events preceding the tragedy and thus places the total blame for all of what happened at Kent State on the shoulders of a group of young Guardsmen.

There was, for instance, no mention in the press accounts of the bombing at Wisconsin University which killed an innocent graduate student working in his laboratory.

The ADA took no particular stand, according to news accounts, against the systematic bombing of Federal buildings and other public places in Minneapolis by left-wing extremists.

The ADA, according to news accounts, appears to have taken no strong stand against the wanton assassination of policemen in New York, Philadelphia, Omaha, San Francisco, Berkeley, and a dozen other cities across the country.

If the ADA is to have its voice heard as a constructive instrument in American policy rather than as a shrill and strident cacaphony on the left, it would do well to consider the whole problem of violence.

It would seem to be advisable also for responsible Americans to disavow this kind of one-sided approach to a problem of so serious a nature as that of domestic violence.

### IT IS THE RIGHT OF ALL MEN TO TRAVEL FREELY THROUGHOUT THE WORLD

Mr. PROXMIRE. Mr. President, in recent weeks, all of us have been greatly concerned over the obvious mental anguish and physical discomfort suffered by the people being held hostage in Jordan, and their families. I believe that the leaders of all nations must take quick and affirmative action to see that future acts of air piracy be prevented.

Recently, the Committee for World Human Rights issued a statement, in which I concur, saying in part that it—

> Is the right of all men to travel freely throughout the world.

The committee's statement goes on to say that—

> We unconditionally condemn any and all barbarous acts of air piracy.

This committee, which has done such outstanding work in the area of human rights in the past, also called upon all governments to prevent a repetition of the events of the past weeks, which inflicted suffering upon innocent people.

Mr. President, I ask unanimous consent that the statement issued by the Executive Committee of the Committee for World Human Rights condemning air piracy and calling for unified action by all governments to forestall future acts of air piracy be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD:

STATEMENT

The infamous crime of piracy has been revived in this day and age in the form of malicious hijacking and destruction of airplanes operating in national and international commerce with consequent hazard to the life and health of innocent passengers, crews and bystanders. As members of the Committee for World Human Rights, a nonpartisan and non-political group of dedicated businessmen and many concerned individuals from the United States and other countries devoted to perpetuating and fostering the ideals of World Human Rights—included in which is the right of all men to travel freely throughout the world—we unconditionally condemn any and all barbarous acts of air piracy.

The failure of demonstrable and vigorous leadership by Chief Executives undermines and vitiates public confidence in their intention and disposition to firmly and unequivocally discharge their humanitarian responsibilities in safeguarding against such bestial acts.

We call upon the Chief Executives of every nation to not only condemn such monstrous actions but to insure prompt punishment for their perpetrators; and to forestall, by unified action on the part of all governments, a repetition of the suffering inflicted upon innocent people.

## THE CONDUCT OF THE WAR IN VIETNAM

Mr. DOLE. Mr. President, in the aftermath of the recent vote on the McGovern-Hatfield amendment to end the war, there have been claims by some supporters of that amendment that the doves have won the debate on the conduct of the war in Vietnam.

If one looks at the size of the vote against the McGovern-Hatfield amendment, there are some instant credibility problems with that claim. However, I would be inclined to agree in one sense. That is, both hawks and doves have won because the cause of freedom itself has won.

President Nixon has now been left unhampered to bring this war to an honorable conclusion and he is doing so. Ever since Cambodia the American weekly casualty rate has been well under 100, troop withdrawals are proceeding on schedule, and American commanders in Vietnam report increasing success with the Vietnamization program.

In addition, the fact that an overwhelming majority of Senators and Representatives refused to place any limitations on the President of the United States is a lesson that certainly is not being lost on Hanoi. The hope for peace through negotiation was never strong when Hanoi's leaders thought they could count on American public opinion to bring about a unilateral surrender. With this hope removed, we may have some significant response from the other side at Paris.

So, in one sense, I will say to the supporters of the McGovern-Hatfield amendment—yes, you have won. You will now share with all Americans in the fruits of a just and honorable peace in Vietnam.

## THE FITZGERALD CASE: 309 DAYS OF WAITING

Mr. PROXMIRE. Mr. President, it is now more than 300 days since I wrote to Attorney General Mitchell asking the Justice Department to investigate the Air Force's treatment of Ernest Fitzgerald. Fitzgerald was fired by the Air Force because he told the truth to Congress about the enormous overruns occurring on the C5–A project.

No investigation should take this long, Mr. President. We ought at least to have some indication whether the Justice Department plans to prosecute by this time. For there is little doubt that the Federal statute which makes it a crime to injure anyone on account of his testimony before Congress has been violated. The only question is—who is the guilty party? It should not take 10 months to find out.

Mr. President, I call on the Justice Department to dispose of this case. Further delay is totally unwarranted.

## PRESIDENT NIXON TO DISCUSS POW PROBLEMS WITH EUROPEAN LEADERS

Mr. BENNETT. Mr. President, while in Europe, President Nixon will have several opportunities to discuss with European leaders the problem of American prisoners of war being held by the North Vietnamese Communist Government.

He will again urge Pope Paul to use the great weight of his office in behalf of obtaining humane and decent treatment for the American prisoners. It is expected he may also bring up the matter when visiting with President Tito of Yugoslavia.

It is obvious that the paramount problem facing the President in his discussions with top European officials is still the critical situation in the Middle East. However, the President has indicated he will also devote time to the problem of American prisoners. His efforts will be aimed at enlarging the role of these prominent men in building the massive world opinion against the manner in which the North Vietnamese have treated Americans held prisoner.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the unfinished business.

The PRESIDING OFFICER (Mr. ALLEN). The bill will be stated by title for the information of the Senate.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, an editorial in the Washington Post this morning has this title: "Senate Joint Resolution 1—There Is Still Room for Improvement."

Mr. President, if we are asked to change our federal system, if we are asked to deprive some 34 States from having any voting power, certainly the proponents of such a proposal should tell us what those improvements are.

Senate Joint Resolution 1 involves more than one issue. There is the issue as to whether we should abandon the federal system and no longer elect our President by counting the votes by States and go to what has been described as direct popular election. That is one issue.

It is contended that many people and organizations have spoken out on it. However, we are asked to buy the package. We are asked to buy a proposal that would, for the first time, allow the election of a President by a minority. It is written right in the amendment, intended to become a part of the Constitution, that 40 percent of the people can elect the President. That is one basic change.

It is also suggested as a part of the package that we have a runoff election. Most people think that presidential elections are long and costly now. It is suggested that we have two elections when necessary, two campaigns. It is also suggested, as a part of the package, that we have the votes tallied like one big adding machine slip, to determine how many people vote on each side, but that the States determine the qualifications of the voters, at least in many respects.

So, Mr. President, no one could disagree with the Washington Post in its statement in reference to Senate Joint Resolution 1 that there is still room for improvement in it. But, Senate Joint Resolution 1 has been the pending business for a long time. It has been the pending business since September 2. Up to this very hour, the distinguished Senator from Indiana (Mr. BAYH) has not offered any improvements. We have not heard him speak of any. I have inquired at the desk and it is my understanding that he is not offering any amendments.

Thus, so far as the country is concerned and so far as the Senate is concerned, the chief spokesman for Senate Joint Resolution 1 is still trying to get the whole package adopted.

Mr. President, I want to be candid and fair. I am opposed to abolishing our Federal system. I am opposed to depriving 34 States of the voting power that they now have. But I respect those who disagree with me. If the proponents want to change the Constitution, they should bring in the very best proposal they can, and avoid some of the confusion and chaos that will surely ensue.

Mr. President, I want to read the first part of the editorial. It states:

> As the Senate approaches another test on the direct elections amendment, some undecided Members may well find comfort in the fact that the Bayh resolution will be wide open to amendment.

Mr. President, I do not believe that the proponents are going to amend it. The Senator from Indiana (Mr. BAYH) has not offered any amendments. What reason do we have to believe that if we allow this proposal to be adopted or to proceed to adoption, that there will be any amendment?

The editorial goes on:

> Majority Leader Mansfield has called for another vote on Tuesday for limitation of debate on the measure. If he wins, it does not necessarily mean that Senate Joint Resolution 1 will be approved in its present form.

Mr. President, why did the editorial writer say that? He said it because Senate Joint Resolution 1 is not in acceptable form. It is not in a form that can be defended. It has not been defended, Mr. President.

The editorial goes on:

> Several of its supporters would prefer a different means for selecting the President if no candidate should receive at least 40 percent of the vote.

There, Mr. President, the editorial writer is referring to the runoff. How many people and how many organizations in the United States are asking that we go to a system where 40 percent of the people can choose its President, with all the responsibility that is falling upon the President in the trying times in which we live?

Certainly, we should have a President that speaks at least for the majority of the people. Yet, this proposal and the proponents have offered no changes, but invite the uncertainty and the unwisdom of having a 40 percent President, and, if that fails, of having a runoff.

The editorial goes on to say:

> The runoff provision of this resolution is widely acknowledged to be its weakest point.

Mr. President, why should we insert into the Constitution of the United States a point that is acknowledged to be weak? The Constitution has elements of permanence. It is true that we can change it, but we hope that it goes on through all time.

Why do we have to amend the Constitution this fall?

Why do we have to adopt an amendment that is a runoff provision, that is acknowledged as being a weak point?

Mr. President, I want to point out that if there had not been a delay here, if there had not been discussion on the part of the opponents of the proposal, Senate Joint Resolution 1 would have been adopted a long time ago. Senate Joint Resolution 1 happens to be in the same form now as it was before the House of Representatives, and then it is gone. Maybe the States would have refused to ratify it. I hope they would. They should. On the other hand, the argument would then be made, "Well, it must be good because Congress passed it, therefore, we should ratify it." That is like the argument made here: that this must be a good proposal because it passed the House of Representatives.

One of the reasons for having two Houses of Congress is to guard against unwise or imprudent acts on the part of one House. So the fact that it was passed by the first body is really not an argument that should sway the second body. If the legislative body which acted last always followed what the first body did, then the whole system of having two legislative houses would be destroyed.

Mr. President, I want to say something else about the runoff election. The proposal is silent as to when the runoff would be held. All those who have been willing to give an estimate of the time it would take for a runoff have said several months. The distinguished chairman of the Judiciary Committee indicated that it would probably be the next July before we found out who was the President.

Can one imagine a situation in this space age of having uncertainty from the campaign in the fall until the next July as to who would be the President of the United States? Is it any wonder that those who argue for the amendment would admit that "The runoff provision is widely acknowledged as its weakest point"?

Mr. President, on September 8 I raised the question of the runoff with the chief author of the resolution and discussed his amendment on the floor of the Senate. I want to read to the Senator his response.

I quote the distinguished Senator from Indiana (Mr. BAYH), speaking to the junior Senator from Nebraska. The Senator from Indiana said:

> I salute the Senator for bringing up this point about the runoff. As I suggested earlier, it has been a point that has bothered me.

If that bothers the distinguished Senator from Indiana, who pleads so eloquently and long to have the Nation adopt this system—if he says that one of the major parts of the provision bothers him—should we take some more time to look it over? The answer is "Yes." If we had not taken time, if questions had not been asked, it would now have been too late. The proposal would have been adopted, and only the States could save us then.

In connection with the distinguished Senator's statement that the runoff is something that has bothered him, it occurs to me that his subcommittee that advanced the resolution might resolve the distinguished Senator's doubts by holding some hearings and thrashing out the problem of a runoff election: Should one be held, and if so, how?

I do not think that very much thought has been given to the question. As I have pointed out, the distinguished Senator from Indiana said to the junior Senator from Nebraska:

> I salute the Senator for bringing up this point about the runoff. As I suggested earlier, it has been a point that has bothered me.

Also, on the same date, the junior Senator from Indiana said:

> I would suggest that if the people of France are sophisticated enough to have an electoral system in which they can have a runoff election, the people of the United States, and Congress in particular, should be sophisticated enough and intelligent enough to pick a date that would work. I would, however, like to point out that if the 40 percent provision contained in S.J. Res. 1 had been operative in France, that country would not have had to have a runoff.

Mr. President, no one has advanced any good reason why we should have a minority President. Can anyone suggest that if the President is called upon to act in a crisis at home or in a crisis abroad, this country would be in a better position because he has been elected by only 42 percent or by 40 percent? The present requirement in the Constitution is that he shall receive a majority vote.

The only possible argument that has been advanced in support of a runoff that has come to my attention is the reference to the Republic of France by the distinguished Senator from Indiana.

Mr. President, during a colloquy on the pending legislation before the Senate, the distinguished Senator of Indiana mentioned the sophistication of the people of France and the current method of runoff elections now prevailing in that country. I refer to the remarks appearing in the CONGRESSIONAL RECORD for September 8 on page 30818.

In view of the fact that the distinguished Senator of Indiana has raised the French Republic as an example of where a runoff is provided where one presidential candidate gets less than a majority of the vote, I believe it is in order to review constitutional stability of the French since 1789.

In view of the disastrous French defeat in 1940, and taking into account that the French have had to write new constitutions five times since 1789, a critique of French constitutional stability is entirely germane to our debate.

The current French Republic which the distinguished Senator of Indiana mentioned has only been in existence for a very short time. To be specific, it was created by the referendum of September 1958 which means an experience of about 12 years.

Let us review the French experience.

The first Republic was brought about by the convention of 1792 to 1795.

The Republic was proclaimed on September 21, 1792, by a radical national convention, which had been elected under the influence of the fall of the king, the prison massacres, and the Prussian invasion on the northeastern borders. The Constitution elaborated by the national convention and adopted in 1793 provided for the establishment of one legislative assembly, elected for 1 year by universal suffrage. All important legislative texts were to be submitted to popular referendum. Executive power was given to an executive council composed of 24

members, elected by the assembly. But the Constitution, barely voted upon, was suspended until peace had been restored, and in fact, was never applied.

The convention was divided between two parties, the Girondins—moderates—and the Jacobins—radicals—who were also called Montagnards. Their differences became irreconcilable after the execution of the king. The Jacobins soon took over and set up a committee of public safety which led to the dictatorship of Robespierre and the reign of terror.

THE DIRECTORY, 1795–99

The new Constitution of the year III, which set up the Directory, named after the five "directeurs" who made up the executive, sought to find a balance between the excesses of the rule by the legislative assembly and the dictatorship of the Committee of Public Safety. It reinforced the powers of the executive by making it more independent of the legislature, but not sufficiently: the executive had no powers over the legislature and no powers over the treasury and the judiciary. The separation of powers was too absolute to provide for efficient conduct of government, especially in time of war. The coup d'etat of the 18th of Brumaire (November 9, 1799), got rid of the Directory and the Constitution of the year III, and saw the advent of the Consulate headed by Napoleon Bonaparte.

THE SECOND REPUBLIC, 1848–52

The Revolution of 1848 brought about the downfall of the July monarchy. After the firing on crowds in February 1948, King Louis-Philippe abdicated in favor of his grandson in the wake of the insurrectionary mood of the Parisians. On February 24, the Republic was proclaimed and a provisional government was set up with the task of elaborating a new constitution. By November 4, 1848, the National Assembly, which had been elected in April, had completed a new constitution, providing for a single chamber and a strong president, elected directly by universal suffrage. The presidential elections of December 10, 1848, brought Louis-Napoleon Bonaparte to power. On December 2, 1851, however, Louis-Napoleon staged a coup d'etat and announced the dissolution of the assembly. On November 2, 1852, the empire was reestablished by decree.

THE THIRD REPUBLIC, 1870–1939

With the capitulation of Napoleon III at Sedan, in September 1870—during the Franco-Prussian war—the Republic was proclaimed on September 4, and a provisional government of national defense was set up to pursue the conduct of the war. In February 1871, elections for a national assembly were held, with the task of setting up a new Constitution. The Constitution finally agreed upon in 1875 was a compromise between those who hoped to leave the way open for a restoration of the monarchy and those who wished for a republican form of government. Consequently it was very vague and not very comprehensive. The President was to be elected by an absolute majority of the votes of the senate and the chamber of deputies sitting together as the national assembly. The senate was elected by a complicated system of indirect election and the chamber of deputies by direct universal suffrage. Ministers were responsible to the national assembly. The first confrontation between the President and the national assembly resulted in a victory for the latter, and the Third Republic was characterized by the preponderance of the legislative branch over the executive. World War II brought about the fall of the Third Republic. After the defeat of the French Armies in May and June of 1940, the national assembly endorsed the establishment of Marshal Petain as Prime Minister. On July 10, 1940, the national assembly granted Petain the authority to promulgate a new Constitution, which replaced the term "French Republic with that of "French State."

Mr. President, the instability of the Third French Republic is well illustrated by two lists. The first is a list of the Presidents of France from February 1871 to July 1940. The second, and the more important list, is of the French Governments from September 1870 to July 1940. I ask unanimous consent that the two lists may be printed in the RECORD.

There being no objection, the lists were ordered to be printed in the RECORD, as follows:

PRESIDENTS OF THE THIRD REPUBLIC

1. Adolphe Thiers, provisional, Feb. 1871–May 1873.
2. Patrice de MacMahon, May 1873–Jan. 1879.
3. Jules Grevy, Jan. 1879–Dec. 1887.
4. Sadi Carnot, Dec. 1887–June 1894.
5. Jean Casimir-Périer, June 1894–Jan. 1895.
6. Félix Faure, Jan. 1895–Feb. 1899.
7. Emile Loubet, Feb. 1899–Feb. 1906.
8. Armand Fellieres, Feb. 1906–Feb. 1913.
9. Raymond Poincaré, Feb. 1913–Feb. 1920.
10. Paul Deschanel, Feb.–Sept. 1920.
11. Alexandre Millerand, Sept. 1920–June 1924.
12. Gaston Doumergue, June 1924–June 1931
13. Paul Doumer, June 1931–May 1932.
14. Albert Lebrun, May 1932–July 1940.

GOVERNMENTS OF THE THIRD REPUBLIC

1. Louis Jules Trochu, Sept. 1870–Feb. 1871.
2. Eugéne Chevandier de Valdrome, "the Bordeaux government," Sept. 1870–Feb. 1871.
3. Adolphe Thiers, Feb. 1871–May 1873.
4. Adolphe Thiers, May 1873–Feb. 1875.
5. Louis Buffet, March 1875–Feb. 1876.
6. Jules Dufaure, Feb.–March 1876.
7. Jules Dufaure, March–Dec. 1876.
8. Jules Simon, Dec. 1876–May 1877.
9. Albert de Broglie, May–Nov. 1877.
10. Gaëtan de Grimaudet de Rochebouet, Nov.–Dec. 1877 (10 days).
11. Jules Dufaure, Dec. 1877–Jan. 1879.
12. William H. Waddington, Feb.–Dec. 1879.
13. Charles de Freycinet, Dec. 1879–Sept. 1880.
14. Jules Ferny, Sept. 1880–Nov. 1881.
15. Léon Gambetta, Nov. 1881–Jan. 1882.
16. Charles de Freycinet, Jan.–July 1882.
17. Charles Duclerc, Aug. 1832–Jan. 1883.
18. Armand Falliéres, Jan.–Feb. 1883.
19. Jules Ferry, Feb. 1883–March 1885.
20. Henri Brisson, March–Dec. 1885.
21. Charles de Freycinet, Jan.–Dec. 1886.
22. René Goblet, Dec. 1886–May 1887.
23. Maurice Rouvier, May–Nov. 1887.
24. Pierre Tirard, Dec. 1887–March 1888.
25. Charles Floquet, April 1888–Feb. 1889.
26. Pierre Tirard, Feb. 1889–March 1890.
27. Charles de Freycinet, March 1890–Feb. 1892.
28. Émile Loubet, Feb.–Nov. 1892.
29. Alexandre Ribot, Dec. 1892–Jan. 1893.
30. Alexandre Ribot, Jan.–April 1893.
31. Charles Dupuy, April–Nov. 1893.
32. Jean Casimir-Périer, Dec. 1893—May 1894.
33. Charles Dupuy, May 1894–Jan. 1895.
34. Alexandre Ribot, Jan.–Oct. 1895.
35. Léon Bourgeais, April 1896–June 1898.
36. Jules Méline, April 1896–June 1898.
37. Henri Brisson, June–Oct. 1898.
38. Charles Dupuy, Oct. 1898–June 1899.
39. René Waldeck-Rousseau, June 1899–May 1902.
40. Émile Combes, June 1902–Jan. 1905.
41. Maurice Rouvier, Jan. 1905–March 1906.
42. Ferdinand Sarrien, March–Oct. 1906.
43. Georges Clemenceau, Oct. 1906–July 1909.
44. Aristide Briand, July 1909–Nov. 1910.
45. Aristide Briand, Nov. 1910–Feb. 1911.
46. Ernest Monis, March–June 1911.
47. Joseph Caillaux, June 1911–Jan. 1912.
48. Raymond Poincaré, Jan. 1912–Jan. 1913.
49. Aristide Briand, Jan.–March 1913.
50. Louis Barthou, March–Dec. 1913.
51. Gaston Doumergue, Dec. 1913–June 1914.

98. Paul Reynaud, March–June 1940.
99. Philippe Pétain, June–July 1940.

Mr. CURTIS. Mr. President, I call attention to the fact that during this period of only 70 years from February 1871 to July 1940 there were 99 governments of France and 14 Presidents.

THE FOURTH REPUBLIC

The constitution of 1946 perpetuated the faults of the Third Republic. The center of gravity of political power resided in the lower chamber, which was itself now called the National Assembly. The President of the Republic was elected by the two chambers, and Ministers were responsible to the National Assembly, which was able to bring down a government at will, by a vote of no confidence. Before the threat of civil war raised by the rebellious army leaders and European population in Algeria, the National Assembly voted over its powers to Charles de Gaulle by granting him the right to draft a new constitution, on June 1, 1958.

Mr. President, while the Third Republic changed governments almost as often as a person changes his shirt, the Fourth Republic was scarcely better.

Mr. President, I ask unanimous consent to have printed in the RECORD a list of the governments of the Fourth Republic.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

GOVERNMENTS OF THE FOURTH REPUBLIC

PRESIDENTS

Vincent Auriol, 1947–53.
René Coty, 1953–58.

HEADS OF GOVERNMENT

1. Charles de Gaulle, provisional, Sept. 1944–Jan. 1946.
2. Félix Gouin, provisional, Jan.–June 1946.
3. Georges Bidault, provisional, June–Nov. 1946.
4. Léon Blum, Dec. 1946–Jan. 1947.
5. Paul Ramadier, Jan.–April 1947.
6. Paul Ramadier, May–Nov. 1947.
7. Robert Schuman, Nov. 1947–July 1948.
8. André Marie, July–Aug. 1948.
9. Robert Shuman, Aug.–Sept. 1948 (7 days).
10. Henri Queuille, Sept. 1948–Oct. 1949.
11. George Bidault, Oct. 1949–June 1950.
12. Henri Queuille, June–July 1950 (4 days).
13. René Pleven, July 1950–Feb. 1951.
14. Henri Queuille, March–July 1951.
15. René Pleven, Aug. 1951–Jan. 1952.
16. Edgar Faure, Jan.–Feb. 1952.
17. Antoine Pinay, March–Dec. 1952.
18. René Mayer, Jan.–May 1953.
19. Joseph Laniel, June 1953–June 1954.
20. Pierre Mendès-France, June 1954–Feb. 1955.
21. Edgar Faure, Feb. 1955–Jan. 1956.
22. Guy Mollet, Jan. 1956–May 1957.
23. Maurice Bourgès-Maunoury, June–Sept. 1957 (followed by a vacancy of 36 days).
24 Félix Gaillard, Nov. 1957–April 1958.
25. Pierre Pflimlin, May 1958 (15 days).

Mr. CURTIS. Mr. President, there were 25 governments of the Fourth Republic between 1946 and 1958.

THE FIFTH REPUBLIC

The constitution of the Fifth Republic, approved by referendum in September 1958, strengthened the powers of the executive branch and curtailed those of the National Assembly. A constitutional amendment of 1962 further strengthened the position of the President by providing for his election by direct universal suffrage. The Prime Minister is responsible to both the President and the National Assembly. However, a test between the executive and the legislative under the Fifth Republic has never occurred. For the first time in the history of the French Republics, the executive branch has enjoyed a parliamentary majority, thus insuring the passage of its legislation and the endorsement of its policies.

Mr. President, the Fifth French Republic has shown some improvement over its predecessors. Only two Presidents have been at the helm since 1958. We certainly wish the French success in their quest for constitutional stability, however the record, to date, has not been one to inspire great confidence in this matter.

Mr. President, it is rather significant that so far in this debate, to my knowledge, no argument has been presented that the idea of a runoff election would be a good thing. Many people in and out of the Congress have pointed out the evils of a runoff—its delay, its expense, plus the whole change, the way of campaigning, and the whole departure from our federal system.

I do not want the record to stand and imply that I am suggesting the distinguished Senator from Indiana is advocating that we adopt something out of the French system—not at all. I pointed it out for one purpose, and one purpose only, and that was that the only argument that he has advanced in support of a runoff election was the fact that France had it. Again, I would like to read his words:

> I would suggest that if the people of France are sophisticated enough to have an electoral system in which they have a runoff election, the people of the United States, and the Congress in particular, should be sophisticated enough and intelligent enough to pick a date that would work. I would, however, like to point out that if the 40 percent contained in Senate Joint Resolution 1 had been operating in France, that country would not have had to have a runoff.

Mr. President, why have the proponents of this measure inserted a provision that a President, to be elected, had to have only 40 percent of the vote? Did they do it because there is some impelling reason that makes a minority President better than a majority President? Could it be possible that they feared the chaos that would follow if we were thrown into a runoff and that, in order to make sure that that would be unlikely to happen, the principle of having the President of a majority was abandoned and there was written into Senate Joint Resolution 1 another provision that a candidate needed to have only 40 percent?

Mr. President, I am opposed to Senate Joint Resolution 1 for many reasons. I oppose it in the first instance because, in my opinion, it abandons our federal system. I frankly admit that one of the reasons why I oppose it is that it will take away about 20 percent of the voting strength that my State now has in choosing the President. But, in addition to all of that, there are all of these provisions written into the joint resolution which no one defends and which invite chaos.

Mr. President, I think the distinguished Senator from Michigan (Mr. GRIFFIN) should be commended for the remarks he made in the Senate on September 10. Here the distinguished Senator points out another glaring, and I think dangerous, defect in Senate Joint Resolution 1. Here is what he said. His remarks are directed to the chairman of the Committee on the Judiciary, the distinguished Senator from Mississippi (Mr. EASTLAND). Mr. GRIFFIN said:

> Mr. GRIFFIN. Mr. President, the distinguished chairman of the Committee on the Judiciary made reference to individual views of the junior Senator from Michigan, as set forth in the committee report. Although the distinguished chairman and I do not reach the same conclusions concerning the merits of the pending resolution, I must say that I share his view that it will be necessary and logical if we are to elect the President by direct popular vote, for Congress to establish uniform voter qualifications and procedures for conducting such elections. Indeed, I believe Congress would be derelict in its duty if it did not establish such uniform standards in connection with, or directly following, adoption of a constitutional amendment to elect the President by popular vote.
>
> We may, and we do, differ in our conclusions as to whether such a development would be good for the country—but the logic is unassailable. Furthermore, I can agree that the people of the several States should realize, as we consider this popular vote amendment, that uniform voter qualifications and election procedures will be a necessary and logical result. No one should be fooled on that point.
>
> Mr. EASTLAND. Of course that is the logical result. It is what will happen. I think it is bad for for the country. My friend disagrees with me.
>
> Mr. GRIFFIN. I am glad to reaffirm the position and the reasoning set forth in my individual views contained in the committee report.
>
> And, I might say that I believe the amendment referred to in those views, and rejected by the committee, should be presented for the Senate's consideration. I do not know what the Senate will do. But I believe it would be consistent with adoption of the direct election amendment to the Constitution to include a provision requiring such uniform standards.

Mr. President, there are so many parts of this proposal that, in truth and in fact, do invite chaos. This one referred to by the distinguished Senator from Michigan is one of them. As Senate Joint Resolution 1 now stands, the selection of the President would be determined by national totals, but 50 different States would have a major part in saying who is entitled to vote.

The other day I likened this to a situation in a State, and I think it bears repeating. If a State were to elect a Governor or a Senator or any other officer elected statewide, it would not think then of writing into its constitution that the counties or the cities shall determine the qualifications of voters. We have such a situation in Senate Joint Resolution 1.

Is it any wonder that the Washington Post says, in reference to Senate Joint Resolution 1, "There is still room for improvement?" Mr. President, there is lots of room.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. CURTIS. I am happy to yield.

Mr. BAYH. The Senator from Indiana, as I think the record will show, has spoken about the runoff more than the one time that the Senator from Nebraska suggested. He feels that the runoff is not really as bad as his friend from Nebraska believes.

But, since some disagreement and concern has been expressed on this issue, the Senator from Indiana is willing to accept another alternative.

If I did so, would the Senator from Nebraska join in the support of Senate Joint Resolution 1, as amended?

Mr. CURTIS. Well, in the first place, I think the Senator from Indiana ought to offer the amendment. If he wants to improve Senate Joint Resolution 1, he should offer an amendment. He has argued here that it should be adopted because there are polls that favor it, and that it should be adopted because the House of Representatives favored it.

I can only conclude that he believes in this amendment. Now, if he is changing his position, I think he ought to offer an amendment.

Mr. BAYH. Will the Senator yield further?

Mr. CURTIS. Let me finish my answer to the Senator's question.

I oppose this proposal for many reasons. One of them is that it is an abandonment of the federal system, in my opinion, whereby we vote by States, giving every State the number of votes that it has Members of Congress.

As a part of that, if that change were made, it would reduce the voting power of my State. That is another reason why I oppose the amendment.

But I say that if the States are to be thus overrun, and this amendment is to be passed, which the Senator has a right to seek to do, he owes it to the country to have a workable and nonconfusing alternative, and Senate Joint Resolution 1 is not that.

Now I yield for a further question.

The PRESIDING OFFICER. The Senator from Nebraska yields to the Senator from Indiana.

Mr. BAYH. I thank my colleague from Nebraska for his courtesy. I do not wish to continue to interrupt him, but I feel it necessary to say a few words, inasmuch as he has spoken at some length and has been particularly critical of the runoff. As I have pointed out to this body before, I have said in conversations with the distinguished Senator from Michigan, who is one of the sponsors of an alternative proposal, that I would be glad to support that proposal, or a reasonable variation thereof that might be acceptable to other Members of this body. I do not think it is necessary for the Senator from Indiana to offer an amendment to that effect himself. I am sure that the Senator from Nebraska would take me at my word if I say I am in favor of accepting that type of thing, and would not suggest that I would be dishonest with the Senate unless I offered the amendment myself.

Frankly, I am trying to get as many people involved in this effort as I can. I have been one of the leading proponents. I do not apologize for that, but I am certainly not going to be arbitrary in saying that if there are places we can change this proposal and make it more acceptable to our colleagues, I am not willing to accept such changes, even if I do not feel that the change might be an improvement as some others suggest.

I have stated before that the runoff, which is used in a number of our States successfully and is not foreign to the American political system, has appealed to me. But if I cannot force the necessary two-thirds of this body to pass it, if it is necessary to get some other Senator's opinion adopted as a part of this amendment, I would be more than willing to accept an alternate proposal.

Mr. CURTIS. I thank the Senator for his explanation. The junior Senator from Nebraska raises no question whatever about the intellectual honesty of the Senator from Indiana. We do disagree as to our conclusions here, but certainly he has proceeded in good faith, motivated by his desire to serve his country in the best way possible.

Mr. STENNIS. Mr. President, if the Senator from Indiana has finished——

Mr. BAYH. Oh, yes.

Mr. STENNIS. Will the Senator from Nebraska yield for a question?

Mr. CURTIS. I am happy to yield.

Mr. STENNIS. Mr. President, first I wish to say that I have thoroughly enjoyed hearing the very fine contribution the Senator from Nebraska has made to this subject—and it is highly involved, and a perplexing subject to a degree. I have never seen anything that brought more earnest attention from virtually all the Members of this body than this entire subject matter of the electoral college, not just this year but in prior years as well.

The Senator from Nebraska always makes a contribution. His address shows a fine knowledge, and more than that, a learning concerning the constitutional processes and the problems we have to try to cover.

I wish to ask the Senator one or two more questions about this runoff matter. As I recall it, the Senator indicated that even among that group in the Senate who favor in a general way the proposal for the election of President and Vice President by a popular vote, he has found a very strong and deep concern about the question of the runoff and the inadequacy of the resolution now before us. Is that not true?

Mr. CURTIS. That is very true, on the part of those who have either criticized or expressed doubts about the wisdom of it. And I know of no one who comes forth and defends it.

Mr. STENNIS. I noticed that the Senator had made that point, and I have had exactly the same experience. Among the Members of this body at this time there are those who favor popular election of the President, but they shake their heads and back off from this provision, as now written, with reference to merely providing that there be a runoff, and more or less a period at that point, leaving everything else to surmise, including what may be done about it in the future.

Mr. CURTIS. Mr. President, I might point out at that point that our Constitution, both in its original drafting and in the 12th amendment, very specifically tells how we elect a President. It provides, after the votes are cast by the States, for the joint session of Congress, how the votes shall be opened, and how they shall be counted; and then it provides, if no one has a majority, the exact way in which the contest shall be decided. It says:

> The House of Representataives shall choose immediately, by a ballot, a President.

It is spelled out exactly how they do it.

Mr. STENNIS. Yes.

Mr. CURTIS. All this proposal says is that there will be a runoff. When its proponents are questioned about that they say, "Well, Congress can implement it by law."

I raise the question, When will Congress do that? Will they change the law in November, after the election? They would have a right to do that; after it appeared that there would be a runoff, the Congress then sitting, if it is left to be done by statute, could enact a statute.

At best, the proposal is hazy and inconclusive, and leaves doubt in people's minds; and it has no defenders.

Mr. STENNIS. If the Senator will yield further, we would be writing up in stone, you might say, a provision of the Constitution that would cover half of the presidential election, carrying it half way, and leave it to them to consider, perhaps under great pressure of partisan consideration, and to supply the other half of the machinery—that is, the runoff machinery for the election of the President. As the Senator has said, Congress could have the power, under this provision, to modify or change the law or change the system even after the first election, so-called, had been held.

Mr. CURTIS. That is correct. Assuming that Congress acted in the best possible manner, the proposal still lacks permanence with respect to writing rules of the game as to how the President is to be elected.

Mr. STENNIS. And it would be subject to change at the will of any Congress.

Mr. CURTIS. That is correct.

Mr. STENNIS. If the Senator will yield further, may I ask his opinion about another matter about which I have been concerned? What is the Senator's opinion with respect to splinter parties being encouraged under the popular election system? Does the Senator think it would encourage them or discourage them? What is the Senator's idea as to the impact of the new system? That is one of our great problems. It is a problem under our present system.

Mr. CURTIS. I think it would encourage and increase the likelihood of splinter parties, because, by its very nature, that would happen.

Also, I might cite the fact that a great many of the leading scholars—I am referring now to those who are opposed to this measure—have pointed out that it would increase the chances of splinter parties.

Mr. STENNIS. I believe that the Senator is correct. Frankly, to me, it is something not to be encouraged.

The Senator was a Member of the House of Representatives in 1948, when the Lodge-Gossett plan was proposed, a plan that I would heartily support as a new Member of the Senate. The same

plaguing question was present in that plan as is present in these plans, and that is the question of the splinter parties.

I have listened with satisfaction to what the Senator has said about the undermining of the Federal system, the undermining of the system of States, and the complete removal of them from the electoral process. Are we not fooling ourselves to think if we think there is anything of substance left for the States to do or that they will have to do in connection with these Federal elections for the President and the Vice President if we adopt this plan? It is a total abolition and a taking away of their responsibility, their power, and their prerogative; is it not?

Mr. CURTIS. I think that is very true.

Mr. STENNIS. Without any substitute or safeguard of any kind being supplied in their place.

Mr. CURTIS. I agree with the distinguished Senator.

I might invite the Senator's attention to the testimony of Mr. Theodore H. White, the author and political analyst. Mr. White has given a great deal of attention to the presidential elections and presidential campaigns. He says this:

> I would submit that this Senate will consider no more important question in this decade than the matter of how we elect a President. This is the essence of the game. This is a question of leadership in a modern society. This is where I think politics and history join. In modern times, other nations have tried direct election of a president. Germany did. They tried it by direct unitary vote of the nation, and they got Hitler.

Then he cites something else:

> I spend time covering Presidential elections. The election of 1960 was carried by one-tenth of one percent of the popular vote. It may amuse you to know that in these years since then, I have never been able to get an official count of the John F. Kennedy margin over Richard Nixon. One count says it is 113,000. The Clerk of the House says it is 119,450. And there is another count of 112,000 and another count of 122,000. There is no way now of collecting a direct official vote in the United States.

When a premium is put on that national total, that it is the determining factor, there will be no end to recounts and lawsuits and contests in many of the 180,000 precincts throughout the United States.

Mr. STENNIS. I think the Senator has answered well.

With all the ferment and dissent and protests and marching we have had in the last few years—which we pray will not continue—there certainly is a possibility of it being stirred up in a nationwide election with a popular ballot. I would think that if we were going to change this plan and make it a popular election, the only sound way to do it would be to put it in on an experimental basis and say that it would automatically be repealed after having been used one time, and then let Congress and the State legislatures decide whether or not they want to renew the system. I believe it is fraught with great danger and could be something that, for the first time, would get our constitutional processes out of kilter.

I thank the Senator.

Mr. CURTIS. I thank the distinguished Senator for his contribution.

Certainly, we do not need to apologize for the success under our existing Constitution. For almost 200 years, things have gone along, and able and good men have been elected President. Should we change this for a method that leaves us in doubt?

I would think that the proponents of Senate Joint Resolution 1 themselves would want to withdraw this proposal, not on the basis of the arguments that other people have made, but on the basis of their own doubts which have been expressed here. We should not make a major change in our Federal system if there is any doubt about how it would work out. We face no deadline. If we are to amend the Constitution, it is better that we have a good amendment in March than an ill-conceived one in September. There is no hurry. For the present, we should continue our discussion of this matter until such time as the proponents correct their amendment and confine their basic changes to a system that can be workable, that is free from confusion, and free from the danger of this country's suffering from a lack of government during the long months it would take for a runoff.

Mr. President, I yield the floor.

Mr. HOLLAND. Mr. President, I have spoken during this debate before in opposition to Senate Joint Resolution 1. I think the RECORD clearly shows that I am opposed to it for various reasons which I think are, at least to me, so impressive that I am not disposed in any way to yield upon them.

First, I think that the resolution downgrades the States terribly. Although I come from a State which is well above average in size—in fact, ninth—I think that the States still have considerable interest in who is elected President or Vice President and that they are interested as States and as individual sovereigns because the relations between those individual sovereign and the Federal sovereign are such that it requires them to have that continuing interest.

Second, I am very sure that this resolution would produce splinter parties and make us weaker, just as has happened in other democratic nations of the world where splinter parties exist and where the other danger exists, which is noteworthy, that of lack of stability in government.

I particularly appreciated that portion of the speech of the distinguished Senator from Nebraska (Mr. CURTIS), who has just preceded me, which showed how clearly the government of our beloved sister republic, France, has suffered from want of stability which results, in the first instance, from the existence of many splinter parties in that country.

I am also strongly opposed to Senate Joint Resolution 1 because of the provision for a second election, and because of the possibility and I think the probability of long and exhaustive contests and recounts and difficulties produced by nonfunctioning election machines and other things of that kind. It is upon that point I first shall dwell in my remarks today.

Mr. President, I was greatly impressed on Friday afternoon by the speech of the distinguished Senator from North Carolina (Mr. ERVIN) opposing Senate Joint Resolution 1. In particular I appreciated his bringing out the dangers that would flow from the placing of said resolution in our Constitution relative to the possibility of nationwide contests and suits affecting any fraud that might be alleged, any miscounting of ballots, and any breakdown of voting machines.

I was particularly impressed by the fact that the distinguished Senator from North Carolina called attention to the fact that this Nation, great as it is now, has 184,000 voting precincts and that the possibilities of error are present in every one of those voting precincts.

It is very evident that the Senator from North Carolina was exactly right in stating that in the event of a direct vote for President and Vice President on a national basis, the possibilities of appeals for recount and contests of results exist in each of the 50 States and the District of Columbia and in every county in each of the 50 States. And these contests might well occur in each and every State or county, but we must remember they would not be an effective weapon as now, that is which is confined only in its application to the vote of the majority party in each State. Under Senate Joint Resolution 1, these contests would be applicable as well to the minority vote, also, since the alleged fraud, miscounting, or malfunctioning of the voting machines would be just as applicable to the minority vote as it would to the majority vote. In other words, the minority vote in any State or county would contribute to the national total and the contest or demand for recount of the minority vote in any State or county would become just as available a weapon as it is now to the majority vote in that State or county.

The net result of this possibility in the event of a close national election is almost impossible to calculate since it might tie up the election of the President and Vice President for indefinite periods of time, much beyond the date of January 20 when the term of the sitting President would come to an end and the term of the new President would begin.

The distinguished Senator from North Carolina quoted the provision of the Constitution which makes it very clear that the term of the outgoing President does end at midday on January 20 and the term of the new President does begin at midday on January 20. I think that the probabilities of a tieup after the first Tuesday after the first Monday in November, which is the date of the general election, that would last beyond January 20, the following year, are so frightening that this point alone should dissuade us from undertaking any such plan or system. Certainly it is made very clear that in the event of a close election, such as the two we had in recent years, the demands for recounts and suits, and all the contests, would make it completely impossible to hold a second election between the November general election and the January 20 following.

I do not know why that thought has not occurred to the sponsors of the joint

resolution, but it seems to me that is one of the things which stands out like a sore thumb, because it calls attention to something which cannot be expected to work in the event of a close national election.

My thoughts immediately turned to what happened after the 1876 election when the Hayes-Tilden controversy raged throughout the Nation and when the final result of the election depended on the electoral votes of three States: Florida, Louisiana, and South Carolina.

As a boy, I was raised on the discussions of what happened in the case of the contest in Florida. A great many good people in our State still have great doubt as to whether that contest was properly decided.

So confused was the situation in each of these States and so variant were the actions of the canvassing officials and courts in these States that the whole contest assumed such proportions as to require finally, in the judgment of Congress, the setting up of a presidential electoral commission, an agency not authorized by the Constitution, to go into the jumbled facts for the Congress and decide these three contests for the guidance of Congress.

Let us remember that the date of inauguration of the new President at that time was March 4 and not January 20 as it now is. On checking with the Library of Congress I find that the presidential electoral commission, after going into all the facts that were available to it, decided by a vote of 9 to 8 the three cases which I have mentioned on the following dates: A decision was made in the Florida contest on February 9 assigning the electoral vote of Florida to Rutherford B. Hayes. In the case of Louisiana, its electoral vote was assigned by the same presidential election commission to Mr. Hayes on February 16. The date of the inauguration was getting very close. In the case of South Carolina, the electoral vote of that State was assigned by the presidential electoral commission to Mr. Hayes on February 28, 1877, or just 4 days before the inauguration. These three decisions decided the election in favor of Mr. Hayes over Mr. Tilden by a majority of one—that is a single electoral vote. The Library of Congress furnished me with these dates and also with the fact that Congress took action on March 2, receiving and accepting the reports of the presidential electoral commission, and counting the electoral votes of the States of Florida, Louisiana, and South Carolina for Rutherford B. Hayes, thus deciding the election on March 2, or just 2 days before the inauguration, and deciding it by a margin of only one electoral vote.

It is obvious from a review of all of the dates above named that no second election of the President could possibly have been held after the first of the decisions, February 9, in the Florida case, just 23 days before the inauguration. And I call attention to the fact that all of these contests related to States of small population and to relatively small units of government within those States. In the State of Florida the contest related only to the votes cast in two counties: Alachua and Jackson.

With the court's decision conflicting and with two canvasing returns that varied being sent to Congress, I think that every Senator can realize the problem presented in such a case and how difficult it is to decide how the electoral vote shall be counted.

Mr. President, I shall not go into any great discussion of what happened during that recount except that I think it is interesting to note the following fact about it.

At the time the commission was selected by Congress, it was thought that it leaned in the Democratic direction. But between that time and the time that the recounts were decided, one member of the commission, Mr. Justice Davis, of Illinois, resigned in order to be elected to the Senate of the United States from the State of Illinois by action of the State legislature, receiving the votes of the Democrats and the Independents. He was succeeded by the next senior member of the Supreme Court, who happened to be of the opposing political faith.

So, Mr. President, I think it is rather clear that here is a demonstration of what happens when we have serious contests following a close election, even with the time that existed then for those contests to be decided being different, because then we had the time from the first Tuesday after the first Monday in November until March 4. Now we have the time from the same time in November up to January 20.

I think it is rather absurd. In the event of a close election and the occurrence of many contests, there is no way whatever in which the proposed resolution could or would work.

It is terrible to contemplate the confusion that might result if Senate Joint Resolution 1 were adopted and became a part of our Constitution through contests and recounts in any number of States and the District of Columbia, and the complete impossibility of deciding all of these contests finally either by court action or otherwise in time to have a second national election of the President before January 20, the date the presidential inauguration takes place under the present Constitution.

Mr. President, I shall not dwell longer on that point. However, I hope that Senators reexamine the able statement made by the Senator from North Carolina last Friday which embraced a much longer treatment of this particular point than I have given here today, although not taking up the same details with which I have dealt.

I think that a Senator looking at the facts and the law, as amassed and presented by the Senator from North Carolina, will come without question to the conclusion that Senate Joint Resolution 1 simply cannot work in a close election.

Mr. President, on a previous occasion when I appeared in this debate, I stated that if one would study the unusual weather phenomena occurring during the period of the month of November when presidential elections occur, it would be readily seen how adverse weather conditions could play a part on the fairness of direct elections, and incidentally, if the proposals of the pending amendment were adopted, we should have a second election coming, let us say, in December, in which the chance of disturbance of the weight of the many States would be even more adversely affected as the weather conditions in December are generally worse than they are in November.

In order to show the effect weather conditions could have on the fairness of direct elections nationwide under the pending proposal, 2 years ago when I appeared before the committee so ably headed by the Senator from Indiana (Mr. BAYH), I procured information from the Weather Bureau regarding storm data and unusual weather phenomena occurring during the period November 2 to 8, the period of the month that presidential elections occur.

In researching the 10-year period, 1959–68, we found that during the period November 2 to 8, 1959, all of our State, Florida, most of another State, and certain areas of 16 other States had unusual weather conditions which would have hindered voters from getting to the polls. In 1960, certain areas of three States had such conditions; in 1961, nine States had such conditions; in 1962, all of one State and certain areas of five other States had such conditions; in 1963, all of two States and certain areas of eight States had such conditions; in 1964, certain areas of four States had such conditions; in 1965, all of four States and certain areas of three States had such conditions; in 1966, all of two States and certain areas of 10 States had such conditions; in 1967, all of one State and certain areas of four States had such conditions; and in 1968, all of three States and certain areas of five States had such conditions.

Mr. President, the figures I have given are based on reports to me by the U.S. Weather Bureau, made after a careful check of conditions during each of the 10 years which I have covered in this statement.

It is completely clear that in the event nationwide direct election of President and Vice President had occurred in any of the 10 years covered by the weather statistical material furnished me, the people of one or more States would not have been able to vote their full weight in comparison with other States of the Nation due to no fault of their own. Of course, adverse weather affects voting in each State, singly, and always has, but the State will still have its full electoral strength and the votes actually cast should be fairly representative of the attitude of the people of that State as a whole.

Mr. President, I have repeatedly stated that the electoral college as now set up is by no means an ideal system and have long opposed it. I have supported another method of selection of the President and Vice President, one of which passed the Senate by the very large vote required for submission to the States, but failed of such passage in the House of Representatives. The program at that

time, the fractional method of deciding the vote of each State, was known as the Lodge-Gossett plan.

I am completely out of accord, however, with the adoption of the amendment discussed by the Senator from Indiana for it would simply mean that the Federal Government would take ultimately and necessarily, complete control of our election machinery and processes and would simply strike out any independence on the part of the States as sovereign entities, intended by the Constitution. It would, in the final analysis, call for federalization of our election laws.

I appreciate the fact that the distinguished Senator from Nebraska in his speech just preceding mine quoted rather extensively from the able and distinguished Senator from Michigan (Mr. GRIFFIN) in his statement of a few days ago in which he made it very clear that the only thing that would possibly allow any part of Senate Joint Resolution 1 to work would be the adoption of uniform Federal standards affecting elections; that is, for the registration of electors, for the casting of absentee ballots, for the period of residence and age of voters, and all the other details necessary for the uniform system.

I do not favor that kind of action. I think we already have too big a Federal Government which is not functioning as well as we would like it to function and this would be just another step in stealing from the States something given them by the original Constitution in a compromise settlement which was basic and necessary to the framing of the Constitution. I do not want to see that original compromise interfered with.

That compromise made provision for small States. The first State, now so ably represented by the distinguished Senator now presiding (Mr. BOGGS), has always been a small State but a great and fine State. It was one of those States so insistent on the compromise under which each State had two Senators in the Senate, and under which the electoral college consisted of representation, for each State of two electors representing the Senators and one elector for each Congressman from that State representing the population of that particular State.

Mr. President, we would not have had a Constitution if it had not been for that compromise. I hate to think of anybody now seriously discussing a program which would go back to the beginning and disregard the fact that we have lived for 181 years under that Constitution and under which we have become the oldest continuous government of any size on earth. This measure would change that program which was found so necessary to the very existence of the Constitution and the setting up of the Federal Government. I hope we shall not consider doing anything so unwise as that.

And I state, most emphatically, that I do not care to have the long and controlling arm of the Federal Government extended insofar as our election process is concerned, resulting in further centralization of Government and the taking away from the States the independence our Founding Fathers intended them to retain.

Mr. President, those who are qualified as electors do not vote simply in presidential elections. They vote for Governors of their States. The Senator now serving as Presiding Officer served as Governor of his great State, the State of Delaware. They vote for the legislature which makes the laws—a bicameral legislature in every State but one and a unicameral legislature there—and I glory in the fact that States can be independent in the way they set up what they think is the best form of a representative government to serve the people of their State. They elect State executive officials. In my State all the cabinet members are elected by the people of the State. They elect the county officials. If there is any part of the government close to the people it is the courthouse officials in every county in this country. In many States they elect their judicial servants. That is true in my State, but not in every State. I am grateful again that our form of government is so flexible as to allow our States some freedom of action as to what they think will best serve their ideas of the exercise of freedom and independence.

So, Mr. President, I do not want to see the Federal Government taking over so great a responsibility and taking over the setting up of uniform standards of participation in elections.

I think to do so would be a significant and great departure from our system of government. Do not Senators remember that in section 2 of article I of the Constitution it was provided not that the Federal Government should set up qualifications of electors, but that which would prevail in the election of congressmen would be the system which applied to the most numerous branch of the legislature, showing how fully the constitutional framers were willing to rely on State standards.

Mr. President, one of our colleagues, Senator MUNDT, the author of the so-called district plan for electoral college reform, introduced in the 90th Congress as Senate Joint Resolution 12, made a statement on the floor of the Senate on February 6, 1967, in respect to meritorious and significant criticism of our present electoral college system by the Commission on Electoral College Reform of the American Bar Association. Knowing that the American Good Government Society, for many years had been in the vanguard of those advocating electoral college reform, Senator MUNDT asked Mr. J. Harvie Williams of its Committee on Electoral College Reform to prepare a statement in depth discussing the pros and cons of various proposals to correct the present situation. Senator MUNDT inserted into the RECORD of February 6, 1967, comments made by the Committee on Electoral College Reform of the American Good Government Society on the statement of the Commission on Electoral College Reform of the American Bar Association. Mr. President, while these comments appeared in the RECORD of February 6, 1967, I believe it well that they now appear as a part of the present debate and I ask unanimous consent that they be printed in the RECORD as a part of my remarks at this point.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

OBJECTIONS TO PROPOSED DIRECT VOTE FOR PRESIDENT

Mr. MUNDT. Mr. President, as a recent statement by the Commission on Electoral College Reform, of the American Bar Association, presents some highly meritorious and significant criticisms of our present electoral college system. It demonstrates once again the basic necessity for correcting some of the perils and problems presently embedded in the manner in which we now elect our Presidents through the machinery of the electoral college.

Unfortunately, to some of us who have been crusading for electoral college reform for more than a decade, the answer or the cure proposed by the American Bar's Commission on Electoral College Reform creates many more problems than it solves and has some highly undesirable features which argue against its adoption. This is especially true when there are available at least two and possibly more reform procedures which would avoid the unfortunate repercussions and consequences which the direct vote for President proposal would set in motion.

Inasmuch as the American Good Government Society has for many years been in the vanguard of those advocating electoral college reform, I have asked the executive director, Mr. J. Harvie Williams, of its Committee on Electoral College Reform to prepare a statement in depth discussing the pros and cons of various proposals to correct the present situation.

While I happen to be the author and sponsor of the so-called District Plan for Electoral College Reform, now before the Senate as Senate Joint Resolution 12, and while I am gratified that the American Good Government Society along with many other knowledgeable groups are supporters of the district plan for reforming the electoral college, I am submitting this statement not as an argument for the approval of our amendment but as a public service to call attention to some of the pitfalls and the perils involved in departing completely from our traditions by providing for the direct popular vote for President and by discarding our great American concept of majority rule.

Too many foreign governments have already demonstrated the dangers of governments selected by a minority to give me any feeling of confidence, for example, in a proposal advocating that we now adopt a proposal openly recommending that a vote of 40 percent be considered adequate to elect our National Presidents with the inevitable concomitant that a plethora of minority parties would develop to grind away the traditional advantages which our adherence to a two-party system has uniquely provided for the United States.

The Commission on Electoral College Reform of the American Bar Association, in its report to the association, recommends that the President of the United States be elected by 40 percent of the direct nationwide popular vote; that when no candidate receives the required 40 percent of the vote a runoff election be held between the two top candidates; and that Congress have ultimate power over presidential elections, including age and residence requirements of voters.

These recommendations go far beyond what is necessary to achieve a much-needed, long overdue, and proper reform of the electoral college system by which we elect the President and Vice President. They would reshape the foundations on which the Constitution rests. Are we ready to do this?

By giving Congress control of the Presi-

dent's election the commission's recommendations would abolish the doctrine of separation of powers.

By abandoning the majority requirement in the President's election, the commission's recommendations would cut asunder the taproot of the two-party system. As much as the two-party system is revered we should understand clearly that it is imposed on us by the constitutional requirement of a majority vote to elect the President, by the electoral college or by the House of Representatives.

By abolishing the electoral college—that is, the office and person of elector of the President—the commission's recommendations would wipe out both the Federal element and the national element from the President's constituency which is now a representation of States and people—not voters—just as the Senate and House are a representation of both States and people. In their place this proposal, in the words of the eminent Prof. Edward S. Corwin, would "substitute a mathematical constituency, with the evils already cited, for the present geographic constituency. It would also pose a difficult problem of policing."

Heretofore, the direct, nationwide election of the President has been regarded as impossible of accomplishment. It was widely believed that the legislatures of the smaller States would not ratify such a change in the Constitution, and that Senators from these States would oppose submission of any amendment that so changed their constitutional status. I still believe this to be true, for there are 15 States having three or four members of the electoral college. Only 13 States are necessary to defeat a constitutional amendment.

Every worthy charge the commission makes against "the electoral college method of electing a President of the United States can be pinpointed as a charge against the statewide election of those members of the electoral college who exist by virtue of Members of the House of Representatives. Senate Joint Resolution 12, of which I am the sponsor, along with Senators COTTON, CURTIS, DOMINICK, FONG, HRUSKA, JORDAN of Idaho, MORTON, STENNIS, THURMOND, and TOWER, would do all that needs to be done. It would make the President's constituency equivalent to that of the Senate and House of Representatives in joint session, which is exactly what the constitution provides. That provision was distorted erroneously by the State legislators a long time ago. Its correction now does not require a reshaping of our federal system.

Mr. HOLLAND. Mr. President, because the direct election of the President has not heretofore been taken seriously its true character and the problems it would create have not been closely examined. It was to remedy this, in part, that Senator MUNDT asked the Committee on Electoral College Reform, of the American Good Government Society, to examine the report of the bar association's commission and offer any comment that seemed necessary. I ask unanimous consent that this position paper be printed in the body of the RECORD.

The material follows:

ELECTORAL COLLEGE REFORM

The American Bar Association published this month *Electing the President*. A report of its Commission on Electoral College Reform.

What follows is an objective commentary on the Report. Where necessary, the comment is critical.

My comment follows a quotation from the Report which is identified by page number.

*Page 1*

"Three of the four basic proposals would retain the system of allocating to each State a number of electoral votes equal to the number of Senators and Representatives to which the State is entitled in Congress."

Comment

This language smacks of the language of the Rules of Democratic National Conventions, and of the Southern Wing of the Party. In that convention "votes" are "allocated" t States. In Republican Conventions "delegates" are allocated to the States and Congressional Districts, as the Constitution allocates Electors to the States.

*Page 1*

The "unit vote" proposal would write into the Constitution the present practice of awarding all of a State's electoral votes to the candidate who wins the greatest number of popular votes in the State.

Comment

There is no present practice of awarding votes. There is the election of a party slate of Electors who, when they meet vote by ballot. Being party men and having been elected as a party slate in each State, each Elector marks his ballot for his party's ticket. The term "unit vote" derives from Democratic conventions which permit voting under the "unit rule" whereby the majority of a State delegation.

*Pages 1 and 2*

The "district vote" proposal would divide each State into districts comparable to congressional districts; the winner of the popular plurality within the district would receive that district's electoral votes and the two additional electoral votes would go to the candidate receiving a plurality of the popular vote in the State.

Comment

Under this proposal the Electors to which a State is entitled by virtue of its Representatives would be elected in districts.

THE COMMISSION'S RECOMMENDATIONS

*Page 3*

The Constitutional Amendment should: "provide for the election of a President and Vice President by direct nationwide popular vote."

Comment

*This proposal* would:

(a) Eliminate the federal element from the constituency of the President of the United States of America by eliminating 100 Electors who exist by virtue of 100 United States Senators.

(b) Eliminate representation of people according to numbers by eliminating 435 Electors who exist by virtue of Representatives in Congress.

(c) Substitute a mathematical constituency of voters, which could and would vary from election to election according to weather, counter attractions, ideological issues, "ballet voters," etc., for the geographic-population constituency. Such an Amendment should also change the title of the office to "President of the Voters in America" to square it with the proposed change in the Constitutional foundation of the Executive Power.

(d) Convert the present *intra*state election of Electors to an *inter*state election of Presidential tickets which have been nominated by national party conventions unknown to the Constitution. As no Constitution, not even that of a Ladies Aid Society, is complete without imperative provisions for filling its offices, the entire apparatus of the party system would have to be brought under Federal regulation.

(e) Set the States into competition to expand their electorates by lowering age limits and franchise qualifications.

*Page 3*

"Require a candidate to obtain at least 40% of the popular vote in order to be elected President or Vice President."

Comment

*This proposal* would:

(a) Abandon the majority principle which is the taproot of the two party system. The majority requirement leaves no room for a continuing third party.

(b) Bless Constitutionally a President opposed by three-fifths of the voters.

*Page 3*

"Provide for a national runoff between two top candidates in the event no candidate receives at least 40% of the popular vote."

Comment

*This proposal* would imbed in the Constitution for use in general elections a device developed for use in primary elections of the Democratic party in the one-party States of the South. Experience with it is limited to ten Southern States, and only in primary elections of the Democratic party.

*Page 3*

"Provide that the places and manner of holding the presidential election and the inclusion of the names of candidates on the ballot shall be prescribed in each State by the legislature thereof, with the proviso that Congress may at any time by law make or alter such regulations:"

Comment

*This proposal* would:

(a) Violate the principle of separation of powers in that Congress now has no authority in the premises.

(b) Open the way for Congressional regulation of party conventions, and Presidential elections.

*Page 3*

"Require that the voters for President and Vice President in each State shall have the qualifications requisite for persons voting therein for Members of Congress, with the proviso that each State may adopt a less restrictive residence requirement for voting for President and Vice President provided that Congress may adopt uniform age and residence requirement."

Comment

*This proposal* would extend the Authority of Congress to election questions hertofore exclusively in the jurisdiction of the States, further denaturing the federal system.

*Pages 3 and 4*

"The electorial college method of electing the President of the United States is archaic, undemocratic, complex, ambiguous, indirect and dangerous.

"Among other things, the present system allows a person to become President with fewer popular votes than his major opponent."

Comment

There are no popular votes for President. The popular vote is for a slate of Electors in a State and the number of popular votes is the number of votes received by the Elector candidates. This is determined by multiplying the number of voters by the number of Elector offices to be filled. This interchanging of "voters" and "ballots" and "votes" confuses the whole subject.

*Page 4*

"Grants all of a state's electoral votes to the winner of the most popular votes in the State, thereby cancelling all minority votes cast in the State;"

Comment

What happens is that party slates of Electors run on a statewide general ticket mostly under the names of the party's national ticket. Each Elector candidate is a statewide

candidate and receives a vote from each voter who marks a ballot for his slate. The minority merely loses, as all minorities do. This is not to say that the general ticket is a fair representative system. It isn't. It is everything else.

*Page 4*

"Makes it impossible for presidential electors to vote against national candidates of their party;"

Comment

Of more than 15,000 men and women who have been appointed Elector of the President only 8 are alleged to have voted contrary to the intentions of their supporters.

Only three of these instances have occurred since 1824, one each in 1948, 1956 and 1960. Under close examination these allegations do not stand up. If an issue at all, this is a spurious one, sheer nonsense, unworthy of serious consideration.

*Page 4*

"Awards all of a State's electoral votes to the popular winner of the State regardless of voter turnout in the States;"

Comment

The number of Electors in a State is established by the Constitution—two for the State as an organized political society, and one or more according to its population. The "voter turnout" is irrelevant. In voting, enfranchised Citizens represent those ineligible to vote—minors, aliens, etc.

*Page 4*

"Assigns to each State at least three electoral votes regardless of its size;"

Comment

This is the federal system. Each State has two U.S. Senators and at least one Representative in Congress, therefore three Electors—two *federal* or "Senatorial" Electors and at least one *national* or "Representative" Elector. This is the Federal Union of States in Congress which has the legislative power; and in the Electoral College which elects the President to wield the executive power. Both powers rest on the same base in the electorate. The only distortion—and it is a big one—is the State Legislatures' use of the statewide general ticket for the election of the *national* or "Representative" Electors.

*Page 4*

"Fails to take into account population changes in a State between censuses;"

Comment

No proposed amendment even tries to do this. This idea is indicative of the shallowness and thoughtless character of the Report. Direct popular election would substitute an eccentric fluctuating mathematical constituency of voters for a geographic constituency of people, of voters and nonvoters alike represented by voters. Stormy weather in some parts of the country could wreak havoc in the final outcome.

*Page 4*

"Allows for the possibility of a President and a Vice President from different political parties;"

Comment

This is correctable in the contingent election, by putting it in a joint session of Congress, without upsetting the federal system; in fact this suggestion would be a vast improvement.

*Page 4*

"Employs an unrepresentative system of voting for President in the House of Representatives."

Comment

This, as above, is correctable in the contingent election without upsetting the federal system.

*Page 4*

"Direct, nationwide popular vote is best of all possible methods. It offers the most direct and democratic way of electing a President and would more accurately reflect the will of the people than any other system;"

Comment

The people have a dual citizenship, in their States and in the United States. Direct popular election of the President would eliminate the State or federal part of this duality, leaving only the national citizenship. This is where the federal element is to be taken out.

*Page 4*

"Direct popular vote would eliminate the principal defects of the present system;"

Comment

It would also eliminate the federal element from the President's constituency and destroy dual citizenship in Presidential elections, but leave them intact for the election of Congress. The footing of the two elective powers, Legislative and Executive, in the electorate would be utterly unlike in the Constitution itself. The principal defect is, of course, the statewide election of "Representative" Electors. This is charged not against the Constitution *per se* but against the State Legislatures.

*Pages 4 and 5*

"It would eliminate the unit vote rule . . . which totally suppresses at an intermediate stage all minority votes cast in a State.

Comment

The Statewide general ticket for "Representative" Electors is wholly unrepresentative. As to suppressing minority votes, which is not the real question here, it is unimportant at what stage they are the losers if the system of representation is fair and just.

*Page 5*

"It would do away with the ever-present possibility of a person being elected with fewer popular votes than his major opponent;"

Comment

"Popular vote" as used in the Report, is not a standard of measurement for anything in our political system except the number of voters. It is no measure of the number of votes they cast.

*Page 5*

"It would abolish the office of presidential elector which is an anachronism and a threat to the smooth functioning of the elective process;"

Comment

The presidential elector is no more out of date than the Constitution itself. No such threat has been demonstrated. How can the constituencies of the President and of Congress be brought close to exactness without the "Senatorial" and "Representative" Electors, properly elected? This is the central question, yet the Commission ignored it.

The national parties and their conventions are extralegal. They are, in national committees and conventions, simply federations of State parties which are legal entities under State laws.

Although the Elector exists because of the Constitution, the courts have held him to be a State officer performing a federal function. He is the connecting link between the States and the United States in the election of the President and Vice President. It is the office of Elector which keeps Presidential elections intra-state, under State election laws, and free from Congressional control.

Although national conventions today make party nominations for President and Vice President, it is the party Elector, by his vote in the Electoral College of his State, who gives that nomination Constitutional status. Removal of the Elector could invite control of Presidential nominations and elections by Congress, taking this control from the States. If the Elector is removed from the Constitution, something will have to replace him. Some specific provision must be made for the performance of the Elector's separate Constitutional functions of nominating someone for President, and of electing a President when someone has an electoral majority.

*Page 5*

"It would minimize the effects of accident and fraud in controlling the outcome of an entire election;"

Comment

The exact opposite is true. The present system places an undue premium on fraud because of the statewide general ticket. Fraud in Chicago affects the outcome throughout the State of Illinois; fraud in St. Louis or Kansas City affects the entire State of Missouri; fraud in Philadelphia and Pittsburgh is imbedded in the final count in Pennsylvania. None of these frauds would affect the election results in any other State.

The same frauds in a direct, nationwide popular election would all be added into the final results. The premium on fraud would be greatly increased.

As to accidents: A great storm in the Northwestern States could materially reduce the turnout of voters in that part of the Country. The result would shift the center of political gravity of the entire country.

It is always easier for metropolitan voters to attend the polls, a short distance from their homes, than it is for people in more sparsely settled regions where the polling places may be several miles away.

*Page 5*

"It would put a premium on voter turnout;"

Comment

Voter turnout is the business of the political parties. The Constitution should be neutral, neither abetting nor blocking.

*Page 5*

"Perhaps the most important objection that has been voiced to direct election is that it would lead to a proliferation of parties and weaken the American two party system;"

Comment

The two party system is rooted in the majority requirement in the Electoral College; in the contingent election in the House; in the organization of the House, and in the organization of the Senate. The threat to the two party system is in the proposed 40% plurality for the President's election. It is not in the direct election proposal *per se.*

The statewide general ticket for "Representative" Electors is more conducive to third parties as "spoilers" since they can effectively shift a large pivotal state from one party to another; or on rare occasions win the electoral vote of a State. In 1948 Henry Wallace's candidacy shunted Michigan, Maryland and New York into Dewey's electoral column. That same year the regular Democratic party in four Southern States supported Thurmond instead of Truman.

*Page 5*

"We recommend that a candidate should receive at least 40% of the popular vote in order to be elected President;"

Comment

By abandoning the majority principle this proposal would weaken and ultimately destroy the two party system, as it would concede the Presidency to a man opposed by three-fifths of the voters.

*Page 6*

"We further recommend that there be a national runoff popular election between the two top candidates in the event no candidate received at least 40 percent of the popular vote;"

Comment

The "runoff" is a device used in Democratic primaries in ten one-party States in the South. It is unsuitable for nationwide general elections, as it would double the cost and most often topple the leading candidate in a three-way race. It would weaken the major parties. Wouldn't an ultimate choice by a joint session of Congress be preferable as the contingent election?

*Page 6*

"The president is our highest nationally elected official . . . It is only fitting that he be elected directly by the people;"

Comment

He is "President of the United States of America". The United States is a *federal union* of States with a limited Constitution of Government, or dual sovereignty. For the *legislative Power* the Senate rests on the federal principle of coequal political societies; and the House of Representatives rests on the people of the States. For the Executive Power the Electoral College rests on similar foundations by combining into one voting body the "Senatorial" or *federal* Electors (100) and the "Representative" or national Electors (435). This body is the exact counterpart of a joint session of Congress.

Dual sovereignty of the federal union gives each citizen dual citizenship. He is a citizen of the United States when he votes for a Representative in Congress and the corresponding "Representative" or national Elector. He is a citizen of his State when he votes for two United States Senators and for two "Senatorial" or *federal* Electors.

To pull the federal element out of the President's constituency would be to deprive the States as such of a part in his election, and reduce the quality of State citizenship by half.

To do this by substituting a mathematical constituency of voters for the fixed geography of the States in the President's constituency would make him "President of the Voters of America".

*Page 6*

"Under direct election as embodied in our recommendations, states would continue to play a vital role in the elective process. They would continue to have primary responsibility for regulating the places and manner of holding presidential elections for establishing qualifications for voting in such elections and for controlling political activities within their state boundaries;"

Comment

"Primary responsibility" is not *ultimate* responsibility. This ultimate responsibility is proposed to be given to Congress in violation of the principle of Separation of Powers.

*Page 7*

"In summary, direct election of the President would be in harmony with the prevailing philosophy of one person, one vote. 'The conception of political equality from the Declaration of Independence, to Lincoln's Gettysburg Address, to the Fifteenth and Nineteenth Amendments can mean only one thing—one person, one vote.' This equality in voting should extend above all to the Presidency."

Comment

This unquestioning acceptance of undemonstrable assertions is the major weakness of the Commissions Report. For example, under the Nineteenth Amendment the vote of a New Yorker for United States Senators cannot be equated with the vote of an Alaskan for United States Senator. Under the federal principle of State representation in the Senate the comparison is irrelevant.

Nor is there any evidence that there is a "prevailing philosophy of one person, one vote".

In conclusion, every relevant and valid charge against "the electoral college method of electing a President of the United States" is, in fact, a charge against the statewide election of those members of the Electoral College who exist by virtue of members of the House of Representatives. The question is not one of voter equality but of *representation*, of the shape of the President's constituency.

When in 1842, in order to prevent use of the general ticket for Representatives, Congress first enacted a law requiring that House members be elected in single member Districts, John Quincy Adams (who had been President and Senator) had this to say, as Chairman of a Select Committee of the House of Representatives:

"The representation of the people by single districts is undoubtedly the *only* mode by which the principle of representation, in proportion to numbers, can be carried into execution.

"A more unequal mode of assembling a representation of the people in a deliberative body could not easily be contrived than that of one portion chosen by general ticket throughout the State, another portion by single districts, and a third portion by single and partly by double, treble and quadruple districts.

"This forms, in the mass, a representation not of one representative for the common standard number throughout the whole Union, but of States, and cities, and sectional divisions, in knots and clusters of population, of different dimensions and proportions . . .

"Should the general ticket system universally prevail, it is obvious that the representation of this House will entirely change its character, from a representation of the people to a representation of States, and transform the constitutional government of the United States into a mere confederation like that which, fifty-four years ago, fell to pieces for the want of ligatures to hold it together."

Should it be necessary to do violence to the structure of our Constitutional system in order to correct partisan political errors of the State Legislatures?

J. HARVIE WILLIAMS,
*Director, Committee on Electoral College Reform, American Good Government Society.*
JANUARY 26, 1967.

Mr. HOLLAND. Mr. President, I think at this time, since we all know that the Senator from South Dakota (Mr. MUNDT) is absent on account of prolonged illness. we should recognize he has been one of the great students of electoral reform and that he has participated most actively, and I hope none of us will ever forget his very great opposition to popular election of the President and Vice President.

Mr. President, I also ask unanimous consent to have an article appearing in the Christian Science Monitor dated September 11, 1970, entitled "Electoral Reform: Now" printed in the RECORD as a part of my remarks at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ELECTORAL REFORM: NOW

Are the people of the United States prepared to reform the way they choose their president? Time and again, Congress has marched up the hill toward revamping—or abolishing—the anachronistic Electoral College. And then the troops have drifted away.

Now a new Senate debate has begun, in desultory fashion. The time for enacting a constitutional amendment, before the presidential election of 1972, is so short that only a Herculean effort could obtain the necessary approval of three-fourths of the states by that date. But this is no reason for abandoning the reformist effort, 1976 follows 1972.

Most everyone agrees that reform is needed. The Alabama primary victory of George C. Wallace has revived the worry that a third-party candidate could stalemate the Electoral College throwing the election into the House of Representatives and generating a rudderless confusion. And there is always the possibility in a narrow contest, that a candidate will receive an Electoral College majority but a minority of the popular vote, which is hardly democracy in action.

Beyond lethargy, the main hurdle to speedy action is an understandable uncertainty as to what proposal is best for the nation. The main push is behind an amendment to abolish the Electoral College and choose as president the candidate receiving the largest popular vote. This is simple. It is direct democracy. The president, standing for all the people, would be chosen by all the people. This amendment passed the House last year. Two-thirds of the Senate must now approve. Months ago Sen. Birch Bayh, chief sponsor, could count up to 60 supporters. He needs 67.

But there are substitute proposals, also up for consideration. These should be tackled with equal urgency. One would retain the Electoral College and apportion its vote among candidates, in any given state, on the basis of the state's popular vote. (No winner-take-all, as at present). Another would apportion the electoral vote according to the state's congressional districts. Both proposals retain some element of "states' rights," but eliminate the chance that a minority-vote candidate might become president.

These are somewhat more complicated propositions than the simple direct-vote proposal. But they could be less upsetting. And they are less likely to encourage the upspringing of a multiplicity of splinter parties which, in a simple-majority-wins arrangement, could keep any candidate from amassing a winning total.

We say that now is the time to vote election reform. The nation needs it. America's young people will narrowly eye postponement and apathy. Any of these reforms is better than no reform. The Senate should get on with it.

Mr. HOLLAND. Mr. President, I shall quote only two paragraphs of this article, which calls attention to the pending proposal.

But there are substitute proposals—

And I digress to say substitute proposals for Senate Joint Resolution 1—

also up for consideration. These should be tackled with equal urgency. One would retain the Electoral College and apportion its vote among candidates, in any given state, on the basis of the state's popular vote. (No winner-take-all, as at present). Another would apportion the electoral vote according to the state's congressional districts. Both proposals retain some elements of "states' rights," but eliminate the chance that a minority-vote candidate might become president.

These are somewhat more complicated propositions than the simple direct-vote proposal. *But they could be less upsetting. And they are less likely to encourage the upspringing of a multiplicity of splinter parties which, in a simple-majority-wins arrangement, could keep any candidate from amassing a winning total."* (Italics added.)

Mr. President, I have always been accustomed to giving a good deal of prominence to and having a good deal

of confidence in the editorial opinion by the editorial staff of the Christian Science Monitor, and here is a direct expression from them referring to both the proportional system as a substitute and the district system, and I quote again this part from that able editorial:

But they could be less upsetting. And they are less likely to encourage the upspringing of a multiplicity of splinter parties which, in a simple-majority-wins arrangement, could keep any candidate from amassing a winning total.

Mr. President, I should like now to quote from an article appearing in the September 19, 1970, issue of Human Events, entitled "Election Reform Near Decisive Vote:"

While Baker and Bayh—

This means our distinguished colleagues, Senator BAKER and Senator BAYH—

were singing the praises of scrapping the electoral college, columnist James Jackson Kilpatrick provided a horrifying view of what would happen with adoption of the Bayh plan:

Consider for a moment, the changes that would occur in the whole business of nomination and qualification for the ballot. Under existing law, political parties hold national conventions and nominate their presidential and vice presidential candidates. Then state parties, acting under state law, undertake to get those tickets listed on state ballots.

It is at this point that the machinery of federalism begins its delicate braking action. . . .

The machinery of state-by-state qualification, coupled with electoral voting by states, has worked to inhibit the power of third parties. Only four times in this country has a minority party won electoral votes. The Socialists, Progressives, Prohibitionists, Constitutionalists and others—

Many others could also be mentioned—

have sputtered ineffectively within their state compartments. And because each of the two major parties has been compelled to make a broad appeal, the United States has benefited from political stability and prudent compromise.

Under the pending resolution, this machinery would be junked. No matter what its sponsors say, the direct election amendment would require (and its language so permits) that ballots be uniform throughout the United States.

Nothing else would make sense. An entire new system would have to be created by which any group calling itself a political party filed the names of its candidates with a federal board of elections. We could reasonably expect a Black People's party, a Peace party, a Revolutionary party, a Young Americans party. I am myself a Whig, and might run. In a nation so large and so passionately diverse, a dozen "parties" surely would bid for a footnote in history.

Then what? State lines no longer would matter. We are now thinking of cumulative votes, across the nation as a whole. It requires no great work of the imagination to conceive that such an aggregation of States Righters, New Leftists, Anti-Fluoridationists, and Ban-the-Bombers could drain enough votes to prevent either of the major parties from winning 40 per cent of the total . . .

Is this what we want? Is this prospect of chaos truly better than the (obsolete) but functioning system that now exists? The questions are squarely before the Senate now.

Mr. President, an editorial appeared in the Florida Times Union, under date of September 11, 1970, entitled "A Simple Idea—Too Simple," that I believe is well worth reading for the benefit of the Senate:

The proposal to abolish, rather than reform, the Electoral College, and substitute a direct popular vote for President, is a simple idea which seems, at first glance, both logical and fair, and as American as mom's apple pie.

But when one pauses and probes below the surface—as it is to be hoped the Senate will do—there becomes apparent both alarming defects and potential threats to the stability of the republic.

It doubtlessly was, indeed, the very simplistic nature of the idea which explains the quick lopsided vote in the House and the polls showing support in large and small states alike. It truly is a noble and pure theory—like Prohibition—but it also is as unworkable as that earlier oversimplification of a complex problem.

The main reason most people want the direct vote is simply to prevent one candidate getting the most popular votes but the other man winning the election. Assuredly this would be undesirable—but wouldn't it be just as undesirable for some candidate to lose 80 percent of the states but, by sweeping the big cities, win? Could such a victor truly be considered "President of all the people"?

The basic Electoral College system achieves a highly desirable balance (thoughtfully and deliberately put there by our Founding Fathers) between the large and small states, the metropolitan and rural states, the various areas of this diverse nation with their differing outlooks and philosophies.

May I say that, different as our original 13 States were one from the other, that difference has been greatly increased now that we have 50 States, including Alaska and Hawaii, and extending, of course, from Maine to California and from Washington to Florida, containing our contiguous 48 States.

The editorial continues:

To abolish this would strike a possibly fatal blow to the basic concept of a "federation of states" and further reduce the nation to a massive centralized monolithic bureaucracy.

Another very real danger is that the direct vote would encourage splinter parties and weaken the two party system—which has accounted historically for the stability of our government in contrast to those nations where many weak parties make strong, coordinated government impossible.

Extremist candidates on both fringes could easily deny any candidate a 40 percent majority (and cause a runoff) without these small parties carrying a single state. The possibility of a "divided country" would be much greater than at present.

Another very real danger, as warned by Theodore White, the highly-informed author of the "Making of a President" series, is the increased danger of a stolen election through vote fraud. For with the electoral system gone, the danger will no longer be confined within state lines, or, so to speak, compartmentalized.

In areas of the nation, White warns from first-hand knowledge, "votes are bought, paid for and, in all too many cases, manipulated and miscounted by thieves" . . .

Imagine a national recount in a close election (in '60 just one miscounted vote in every other precinct could have reversed election results) in which ballot boxes had mysteriously "disappeared" in some precincts and were proven stuffed in others.

Could the aggrieved candidate sue, if so, whom, and indeed in what court would such a matter be justifiable and how long could appeals drag on? Any decision would be bitterly disputed and as the election outcome dragged on, for weeks or months, national chaos could well result.

Aside from these quite valid reasons, there is the practical consideration that a direct vote amendment may well never be ratified by the necessary 38 states—for seldom in history has power been relinquished voluntarily and this is exactly what the small states (the most numerous kind) would be doing.

Accordingly, the sole result would be nothing actually accomplished—and more years—

Seven of them, Mr. President—

without the single glaring flaw, the "winner take all" aspect which does indeed distort the popular vote, being removed from the Electoral College.

The obvious solution is to reform the present, proven, sound system—either a proportional vote or a congressional district system would accomplish this—and do it without further wild goose chases.

Mr. President, another article entitled "The Politics of Electoral College Reform" written by Mr. Kevin P. Phillips datelined Washington and appearing in the Florida Times Union of September 11, 1970, is, I believe, also worthy of being included in the RECORD:

On Tuesday the Senate began debate on an amendment to the U.S. Constitution that would abolish the Electoral College (state-by-state) method of choosing a President in favor of direct, nationwide popular election.

Two-thirds support will be necessary to push this change through the Senate, and a close fight is expected. The balance of power is generally thought to rest with an undecided bloc of Farm Belt Republicans (Dole, Pearson, Young, and Miller), small-state Northeastern Republicans (Prouty, Cotton, Boggs and Williams), Southern Democrats (Spong, Byrd, Fulbright, Hollings and Long) and Rocky Mountain Democrats (Cannon, McGee, Moss and Anderson).

Such indecision is surprising because the amendment in question, pushed by the Senate's leading liberals, would operate to reduce the national political muscle of the more conservative South, Farm Belt, Rocky Mountains and other lightly populated states. The detriment to these areas can be measured in three ways: (1) diminished local power in presidential elections; (2) reduced representation and influence in both parties; and (3) decreased local orientation of national party platforms and administration.

To illustrate the Southern and Western loss of power, consider that in 1968 (per the 1960 census), Connecticut, Oklahoma and South Carolina each enjoyed eight electoral votes, but in terms of popular vote, Connecticut sent 1.26 million to the polls in 1968, Oklahoma 943,000 and South Carolina only 667,000. Changeover to direct election would favor high turnout areas in the industrial North and the Pacific at the expense of the poorer, low-turnout areas of the South and West. Rural America would also lose the extra weighting that the Electoral College gives sparsely populated states.

Secondly, the change to direct election would greatly affect the regional distribution of power within the two parties, especially at presidential conventions. Delegates are now apportioned to states on the basis of Electoral College strength, with bonuses for partisan performance. Abolition of the Electoral College would presumably shift delegate apportionment to a system based either on total vote cast in the prior election or total vote cast for the party's nominee.

In the Democratic party, such a change, which may come regardless as "reform," would greatly weaken moderate-to-conservative influence.

A delegate reapportionment of this magnitude would put the Democratic party in the hands of left-liberals whose stance would injure party candidates in the South, Border, Plains and Rocky Mountains.

Under present ideological circumstances, now that American politics is no longer divided by the Civil War, the Electoral College favors a Republican coalition based in the South, Midwest, West and small states. GOP Senators from these areas would be foolish to abandon a system that has a built-in bias toward such a coalition in favor of one which, at best, sacrifices these regional advantages.

For these reasons, Southern, Farm Belt, Rocky Mountain and other small states have good reason to oppose abolition of the Electoral College, and if such a constitutional amendment passes the Senate, it will probably not be ratified by the states.

Mr. President, I ask unanimous consent to have printed in the RECORD an article written by Mr. Richard Wilson, entitled "Direct Election: A Clear and Present Danger," appearing in the Washington Star under date of September 11, 1970, as a part of my remarks at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DIRECT ELECTION: A CLEAR AND PRESENT DANGER

Some people have assumed the conclusion that the Senate's refusal to approve an amendment for the direct election of presidents is a stubborn, illiberal act of an old establishment trying to protect itself.

And that, save for illiberality, is quite true. The reason the Senate's action is good is that it affords an opportunity for people who have blindly accepted direct election as an expression of pure democracy to study the matter further and find out what the American system of government is all about.

It is not a pure democracy, never was intended to be and probably never will be. If people wish to change the form of government to go in that direction they at least should know what they are doing. It is a fair guess that not one person out of ten has the slightest conception of what the amendment would finally mean.

There is a far greater chance that the American system would end up—literally end—in riotous confusion if this amendment is ever adopted than that the time-honored electoral system would foist on the country a president who had not won election by popular vote.

This amendment is far worse than the women's rights amendment so cavalierly adopted by the House in the sense that its effect would be more damaging than the condition it is intended to correct.

Women will lose rights under the women's rights amendment and the American electoral system will lose its representative character if the direct election amendment ever goes into the Constitution.

Instead of polarizing (that's a good word) opposing views of political leadership into a reasonably clear choice between two candidates, the direct election amendment would fragment the process of election of a president, inflict a runoff, ultimately destroy the present method of composing the U.S. Senate, and doom a two-party system which is the political wonder of the world.

A multiplicity of presidential candidates and parties and the sure necessity of a runoff between the top two is enough in itself, without all the other complications, to show that direct election is a poor way to select a leader for four or eight years.

The leadership selection process has, in fact, worked remarkably well under the electoral system and this was never better illustrated than in 1968. The two major political parties, after great travail, picked the two men best fitted by training and experience—Humphrey and Nixon—and despite the third party candidate, Wallace, made a clear choice between Humphrey and Nixon.

Make no mistake about Wallace's bid for the presidency. If an election is ever to be thrown into the House of Representatives, in modern times it would certainly be under the conditions of Wallace's candidacy.

And, for that matter, what is so bad about picking a president through the House of Representatives? All of its members are subject to direct election; they sit in the House in proportion to the population of the country. There would be deals. But who says there wouldn't be deals among a dozen parties offering candidates for president in a direct election, much as there are deals now in New York State, which has four parties so fragmenting the vote that this year there is grave doubt a majority candidate can be elected?

The worst that could happen under the electoral system would be the House of Representatives choice of a president. But the worst that could happen under direct election would be the choice of a president who really did not represent anybody or anything, without political discipline and coherent conviction, but the creature solely of his ability to use and pay for exposure in the mass media.

Why do you suppose it is that we are lately getting so many United States senators who have little natural aptitude for their jobs?

This is not a case of opposing change for the usual conservative reason that change itself is to be shunned. This is a case of clear and present dangers of "the most deeply radical amendment which has ever entered the Constitution of the United States."

Merely as an afterthought, there would be no reason in constitutional logic for a Senate made up of two members per state if the direct election amendment is ever adopted. Under that theory the biggest state, California, ought to have 15 or 20 senators, or whatever figure represented its proportion of the nation's population.

Mr. HOLLAND. I wish to quote one or two paragraphs of this article:

Some people have formed the conclusion that the Senate's refusal to approve an amendment for the direct election of presidents is a stubborn, illiberal act of an old establishment trying to protect itself.

And that, save for illiberality, is quite true. The reason the Senate's action is good is that it affords an opportunity for people who have blindly accepted direct election as an expression of pure democracy to study the matter further and find out what the American system of government is all about.

This amendment is far worse than the women's rights amendment so cavalierly adopted by the House in the sense that its effect would be more damaging than the condition it is intended to correct.

Mr. President, a column by Mr. John Chamberlain, entitled "Electoral College Advantages Shown," appeared in the Melbourne (Fla.) Times of September 21, 1070. Since the column shows most clearly the adverse reaction that will take place in the event of passage and ultimate ratification of the proposal now before the Senate, I ask unanimous consent that the entire column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ELECTORAL COLLEGE ADVANTAGES SHOWN

Sen. Birch Bayh of Indiana, author of the proposed Constitutional amendment that would abolish the Electoral College and establish direct popular choice of the U.S. President, claims he represents the "will of the people" in putting forth the bill now under consideration by the Senate. He quotes Gallup and Harris, the pollsters, as saying that "80 per cent" of the electorate are in his corner.

The question, however, is whether the "80 per cent" have ever had the opportunity to understand the issue. Up to now only a few intellectuals have explored the ramifications of the proposed extension of "one man, one vote" to the problem of Presidential selection. How many people know that the most imposing case for retaining the Electoral College has been made by certified liberals who are for "one man, one vote" in almost every other instance?

Theodore White, the author of "the making of the President" books, has, for example, weighed in with the argument that if a Chief Executive is to be chosen by "raw vote" instead of by vote of the Electoral College in accordance with a local "winner-take-all" unit rule inside each state, it would inevitably mean that the venal big city machines of the Northeast would dominate our politics from here on in.

Richard Goodwin, an old Kennedy man, echoes the White diagnosis and adds his own variation to the analysis: he says that direct election of the President by a 40 percent popular plurality, as provided for by the Bayh amendment, would saddle the whole U.S. with something analogous to the four-party politics of New York State, where the Liberal Party and the Conservative Party practice a politics of blackmail, offering endorsements and making deals that end by distorting the will of the majority.

Another liberal who condemns the Bayh proposal is Prof. Alexander Bickel of the Yale Law School, who defends the present method of choosing the President because it incorporates "the federal principle within the Presidency itself" by "requiring a sectional distribution of the vote" that makes possible "combinations that . . . give advantage to the smaller states."

Relying on the "liberals" of the Northeast for support, the conservative minority on the U.S. Senate Judiciary Committee makes several important if not incontestable points. Direct popular election of the President would "destroy the party system and encourage splinter parties; undermine the federal system; alter the delicate balance underlying separation of the powers; radicalize public opinion and endanger minorities; encourage electoral fraud; lead to interminable recounts and challenges; and necessitate national control of every aspect of the electoral process."

Candidates would cease to make appearances in small, underpopulated states such as Nevada, New Mexico, Colorado, Wyoming, Montana; instead, they would conduct "bull's eye" campaigns designed to win in Chicago, New York City, Philadelphia, Cleveland and Boston. They would no longer be any reason for a candidate to present a broadly based platform within each separate state.

To quote Theodore White, "our Presidential campaigns right now are balanced in each party to bring a compromise, to eliminate the extremes of both sides, and create a man who has at least the gift of unifying his party and thereafter the nation.

"Once you go to the plebiscite form of vote you get the more romantic, the more eloquent and the more extreme politicians, plus their hacks and TV agents polarizing the nation rather than bringing it together.

"It is that fundamental erosion of the U.S.A. that horrified me. . . . If states are

abolished as voting units, TV becomes absolutely dominant. Campaign strategy changes from delicately assembling a winning coalition of states and becomes a media effort to capture the larger share of the 'vote market.'

"Instead of courting regional party leaders by compromise, candidates will rely on media masters . . . the heaviest swat will go to the candidate who raises the most money to buy the best time and most 'creative' TV talent."

Mr. HOLLAND. Mr. President, there is one further point I wish to make by way of contrasting what goes on now with what is proposed.

Do the numerous small population States, particularly in the West, want to be overwhelmed by the Eastern big States and big cities?

The four Northwest Central States of North Dakota, South Dakota, Nebraska, and Kansas, together with the eight Mountain States of Montana, Wyoming, Colorado, New Mexico, Idaho, Utah, Arizona, and Nevada represent over one-third of the geographical area of the contiguous United States, and have a total of 53 electoral votes. But the total population of these 12 States is only some 13 million people, by 1960 figures, Mr. President; and therefore, under Senate Joint Resolution 1, they could be outvoted by just one State—the State of New York—or by the five eastern cities of Boston, New York, Philadelphia, Baltimore, and Washington.

I cannot conceive that the 12 rural States would want to have their voices in selecting a President completely overshadowed by the group of eastern cities which I have mentioned, or by the one great State of New York, or, for the same reason, by the one great State of California.

I have attended, in years past, a meeting between the Western Governors' Conference and the Southern Governors' Conference. Mr. President, I found that the most active subject existing in the minds of the western Governors was the question of what States would get the water, and how much.

I can assure Senators, if they do not know it already, that those eight Mountain States will not want to be overshadowed by the one city of Los Angeles in California, much less by the State of California as a whole, because that is where the battle exists, and that is where the battlelines are drawn.

Mr. President, I shall not further prolong this colloquy, but the fact is that this amendment is drawn so as to allow great concentrations of population to completely control sovereign States, which, under our Constitution, still have to handle a large part of the legislation and a large part of the Government which affects the daily lives of our citizens.

To say that the States, as such, no longer have any interests or no longer have any recognizable concern over the right to be participant in the selection of the President and Vice President is an absurd statement. The distinguished Presiding Officer (Mr. BOGGS), who has been Governor of his own State, knows how many times there are joint matters between the States and the Federal Government that have to be settled on a give-and-take basis. He knows how many times there are matters in which the Federal Government calls upon the States for assistance; and, having had some experience in that field myself, I know that this frequently happens. To say that the States as such—with their tremendous responsibility to handle so many fields of law, life, and Government that affect the daily living of every person in the United States and every family in every hamlet, every town, every city, and every school district—would have no interest to continue, as they always have, in having a part in the selection of the President and Vice President by having assigned to them two votes in that electoral weight that gives the State weight as such, is simply ridiculous, because it just does not happen to be the case.

The States have an enormous interest in having a say, as such, in the selection of our President and Vice President, and I do hope the Senate does not lose sight of that, because I think if it does, we will find it will be a troublemaker back in the States for every Senator who supports any such idea by supporting Senate Joint Resolution 1.

Mr. ALLEN. Mr. President, will the distinguished Senator yield?

Mr. HOLLAND. I yield.

Mr. ALLEN. I have been greatly impressed by the eloquent and persuasive address of the distinguished Senator from Florida; and I do not wonder that no Senator who advocates the passage of Senate Joint Resolution 1 rises to take issue with the logic of the Senator's argument.

The distinguished Senator from Nebraska, earlier today, called attention to an editorial published this morning in the Washington Post, in which it was suggested that there would be, in the event debate on this issue is cut off, an opportunity to perfect Senate Joint Resolution 1, indicating that it needs perfecting.

But the editorial went on to quote eminent authorities—whose names were not disclosed—to the effect that the runoff provision of Senate Joint Resolution 1 would probably never have to be used in 100 years, or in 100 presidential elections.

I would like to ask the distinguished Senator from Florida if he agrees with the assessment, that the application of the runoff would be a rarity rather than the rule.

Mr. HOLLAND. Mr. President, of course, it is impossible to answer categorically, but my own feeling is that this amendment encourages the formation of splinter parties, encourages the formation of pressure groups to do some trading in a runoff no matter how that runoff is held, and that this resolution greatly increases the opportunity to deprive any candidate of getting as much as 40 percent of the vote in the first election.

It is my own view that there will be many occasions for the use of the runoff, or the second choice provision, however that could be worked out; and I think that anyone looking at what has happened would come to that conclusion.

I recall that one of our most noted liberals came to exactly that conclusion, and I quote now from that liberal, Mr. Alexander M. Bickel, as follows:

Popular election—again, whether under the original House-passed proposal, or under the Tydings-Griffin amendment—is capable also of producing in a close race horrors of vote counting and recounting, and of charges and counter-charges of fraud, with consequent litigation and endless delay. The electoral college system counts by states focuses the closeness of the race on one or a few states—the result in most is plainly beyond doubt, however narrow the national margin of victory—and insulates recounts and other difficulties within those states. That is why our national elections, even the closest ones, have always been almost instantly decisive. Those of us who sat anxiously before our TV sets through the night of November 5 in 1968 should try to imagine what it would feel like to sit there on and off for weeks.

The direct election proposal may well be called a political tower of babel.

I think that answers the Senator's question.

Another liberal, Mr. Goodwin, is quoted by Senator ERVIN in his speech of Friday in this paragraph:

These lessons of history must have been particularly persuasive in the presidential election of 1968. Richard N. Goodwin described the impact of the electoral college on the temptations of many antiwar critics in 1968 to mount a fourth party drive for the White House. In an article appearing in the Washington Post, of October 6, 1969, Goodwin stated that recognition of the extreme difficulty in winning any electoral votes despite the prospect of a large popular vote was the primary reason that he and others at similar political views did not challenge the major party presidential candidates. The effect of a "peace candidacy" would most likely have been, in Goodwin's judgment, a further enhancement of the election prospects of the Republican candidate. As Goodwin himself suggests, the encouragement that direct election would give to minor party candidates could not come at a worse time than now, "when the tendency to political fragmentation and ideological division is reaching new heights."

Mr. President, a short reply to the Senator from Alabama would be that, in the opinion of the Senator from Florida, there would be times—and probably a good many times—when the second election, by whatever process determined, would have to be resorted to, because this is an open invitation to splinter parties and splinter ideological groups to have candidates and mount races so that they will be in a position to trade when the runoff time comes.

Mr. ALLEN. I thank the distinguished Senator from Florida. If the Senator from Florida would be kind enough to yield further, I should like to ask him this question. I believe he read a moment ago from one authority, Mr. Goodwin, that the present electoral college system has a built-in safeguard or protection against splinter parties, in that in order for any party, be it large or small, to register in the electoral college, it must, at least from a practical point of view, carry the votes of at least one State.

Mr. HOLLAND. The Senator is correct, of course. Mr. Goodwin made the point and so did the other authority, Professor Bickel, that the electoral college insulates the contest, insulates the problem, insulates the administration of the election and the fixing of the election machinery State by State; so that when there is trouble, as there was in 1876 and 1877, it boils down to just a few States, in that case three very small States—Florida, the State which I represent in part, Louisiana, and South Carolina. I stated earlier in my remarks today what happened at that memorable time. It was enough to cure any of us, all of us, of the idea of bringing on direct elections nationwide, which does away with the insulation of the States and instead pools us all together in one precinct, as the Senator from North Carolina stated so colorfully Friday, where all our votes are thrown together; and if there is any contest, Lord save us.

Mr. ALLEN. If the distinguished Senator would allow me to pursue the subject further with him. I should like to inquire whether under the direct system it would not be possible for a candidate for the nomination of one of the major parties, on being dissatisfied with the outcome at the convention and on losing the nomination, to start himself a splinter party which would have the possibility of gaining several million votes throughout the country, and still not carry the electoral votes of a single State. Would that not be a possibility?

Mr. HOLLAND. Not only would that be a possibility, but also, it has happened, even under the electoral college system, and it would be easier to happen under the system proposed in Senate Joint Resolution 1.

Mr. ALLEN. I should like to ask the Senator a further question, not on the matter of proliferation of splinter parties necessarily, but on the success that might attend the efforts of a splinter party in a presidential election. Would it not be possible for a voter who might have some geographical or ideological affinity with the candidate of a splinter party to vote for that splinter party candidate in the first election, knowing full well that, because of the proliferation of splinter parties, he would have an opportunity to vote in the runoff for the real candidate of his choice?

Mr. HOLLAND. Of course, that would be possible; and, in my judgment, it would occur in many, many instances. Human nature is such that many, many people would want to vote for their first choice, if he did not happen to be in accord with their own party choice, knowing that they would have another chance later on if they failed in the first instance.

Mr. ALLEN. The junior Senator from Alabama recalls quite vividly the 1968 presidential election. He recalls some of the public opinion polls that were held prior to that election. As he recalls, about a month before the election in November, the third-party candidate, Governor Wallace of Alabama, was shown to have some 21 percent of the popular vote throughout the country. Yet during the last 4 or 5 weeks of that campaign, there was a steady erosion of his strength, indicating to the mind of the junior Senator from Alabama that the electorate felt he had no chance to be elected and they wished to vote, knowing that they had only one opportunity to vote, for one of the candidates who in their opinion had a chance. Would it not have been possible for the adherents of the cause of Governor Wallace to have voted for him the first time, knowing that they would then have an opportunity to vote later on for Mr. Nixon or Mr. Humphrey.

Mr. HOLLAND. Certainly, it would have been possible and much more difficult weening away the nearly 8 percent of the vote that was weened away in that short period of time from Governor Wallace, which the Senator has adverted to.

The Senator from North Carolina, in his eloquent and excellent address on Friday last, called attention to this situation in this paragraph, if I may read it:

Similarly, the appeals to Wallace supporters not to waste their vote—by Republicans in the South and by Democrats in the North—significantly lowered the popular vote for Wallace in 1968. His appeal was running consistently at about 20 percent of the vote in September of 1968. But his final vote percentage was 13.6 percent. The decrease is generally attributed to the drives by both major parties to persuade voters that a vote for Governor Wallace was a wasted vote since the Governor could not gain sufficient electoral votes to affect the results of the election.

Mr. President, this illustrates completely the point so ably made by the Senator from Alabama.

Mr. ALLEN. Would this not seem to indicate that a third or splinter party candidate like Governor Wallace, really would benefit by the direct election plan, insofar as getting votes would be concerned?

Mr. HOLLAND. Well, I think he would. Let us leave Governor Wallace. I think that there have been other attempts to form splinter parties where the results would have been even more favorable to them. I am thinking about Henry Wallace's party, back a few years earlier, and other occasions which the Senator will recall. There is not a doubt of it, that the electoral college system, meaning the kind giving the electoral weight, as under the original Constitution, to the States, but not necessarily a continuance of the electoral college system as such, which I do not favor, but giving the electoral weight portion to the State on the basis of its total representation in Congress, insulates that State from the rest of the Nation and makes it difficult for a third party to come into any State, except on a tight regional basis, where the candidate is particularly well known and admired, as was Governor Wallace, in a small part of the Nation, and make any real headway, to make it difficult for such a candidate to make headway nationwide, as the Senator has suggested. I thoroughly approve of that suggestion. That is what I think about it also.

Mr. ALLEN. I should like to ask the distinguished Senator from Florida a further question. If we assume one of the major candidates is a conservative and the candidate of the other major party is a liberal, would it not be possible, throughout the 50 States, for the conservatives in one State to encourage a splinter liberal ticket in that State, in order to draw away from the liberal candidate certain of his liberal strength in that State, which might be repeated in 50 States, thereby drawing from the liberal candidate many millions of votes, and thereby helping assure the necessity of a runoff?

Mr. HOLLAND. The Senator is so right. Exactly the opposite of that is true.

Mr. ALLEN. Yes.

Mr. HOLLAND. The liberal group would be inclined to have a conservative whom they felt they could control, or felt would be appealing to a large part of the conservative voting strength in their State to come out in the hope of breaking down the general conservative group. The thing works both ways. Both are against stability.

Mr. ALLEN. That is exactly correct. I should like to call to the attention of the distinguished Senator from Florida a quotation from the report of the Commerce Committee on the Pastore bill limiting expenditures by candidates for radio and television. In that report, it is pointed out that in the 1960 presidential election there were at least 14 other presidential candidates in addition to the candidates of the two major parties.

They list them here as: The Conservative Party; the Constitution Party; the Tax Cut Party; the Prohibition Party; the Socialist Workers Party; the Farmers Labor Party; the Socialist Workers and Farmers Party of Utah; the National States Rights Party; the American Vegetarian Party; the Socialist Labor Party; and the Industrial Government Party, and others.

Would it not be correct that no matter how many parties we might have in a presidential election—and it is easy to see that they might soon pass 100 very easily—any party that got even 100 votes would have a direct bearing on the outcome of the election, because that 100 votes might make the difference between the leading candidate getting 40 percent and 39.999 percent? Would not the votes of these other candidates have a direct and definite bearing on the outcome of the election?

Mr. HOLLAND. The Senator is exactly right. I would go further and say that the results of every splinter party lead toward no substantial, no stable government. The fact that we have not had any great success by splinter parties, the Senator from Florida attributes entirely to the system under which we operate, where the electoral weight is distributed among the States and distributed on a basis which recognizes both State sovereignty and State populations.

Splinter parties have not thrived in this country. We have as many different ideologies as France, Italy, or other countries. The difference is that under our system they have not been able to thrive. They have not been able to deal

any adverse blow to our stable governmental system. I attribute that entirely to the provisions in our Constitution dividing the presidential weight among the various States. I want us to keep on with that division, although I much prefer its being in such a way as to allow every voter's vote to be recorded in the final analysis.

Mr. ALLEN. Speaking of the one man, one vote, do we not really have an application of the one-man, one-vote principle under the electoral college system, in that each person in each State has the same weight to his vote as any other voter in that State, as to how the electoral vote of that State shall be determined and cast?

Mr. HOLLAND. The Senator is correct as far as he has gone, but if he gets to the winner-take-all conclusion now followed under the present Constitution, it seems to me that the votes of those who constitute a minority in any particular State, in any particular presidential election, would be excluded in the final tabulation, whereas under the fractional system, they would all be counted in the final result.

Mr. ALLEN. I thank the distinguished Senator. I would like to suggest the following comment with respect to splinter parties and the weight splinter parties would have under the direct election system as compared with the electoral college system. Is it not correct that, under the present electoral college system, a splinter party would have influence or the possibility of gaining votes only in those States where it qualified as a party and went through the necessary motions to get its candidate on the ballot in that particular State. On the other hand, under the direct system, even though a splinter party was on the ballot in only one State, they would have to count those votes in adding up the overall total of all votes cast throughout the Nation for a candidate for President.

Mr. HOLLAND. The Senator is correct. The Senator from Florida is inclined to agree with the Senator from Michigan. As surely as night follows day, if this amendment were submitted and then adopted, uniform standards would have to be set up for qualification for voting on a Federal basis. And that is one of the reasons, because the Senator from Florida fears such a system, that he is implacably opposed to the amendment.

Mr. ALLEN. This has not been spelled out. It is left for the distant future and the uncertainty of the future as to what plan is going to be provided by Congress. Is that correct?

Mr. HOLLAND. The Senator is correct. That is one of the things that disturbs the Senator from Florida, because if the imagination of Congress this time is viable and it goes for this particular amendment, and if it then be ratified and adopted, there is no telling what the next step would be. The Senator from Florida wants to avoid the first big step if he can do so.

Mr. ALLEN. Mr. President, I call the attention of the distinguished Senator from Florida to a bumper sticker that I received in the mail just Saturday. It is entitled, "Long John—the Whig." This is a bumper sticker of a candidate for Governor of the Whig Party in the State of Alabama in the November election.

The Whig Party has been reactivated in Alabama for the purpose of the gubernatorial election. This party was formed at a convention in the State attended by nine persons. They set up the Whig Party. The name of that party goes on every ballot in the State of Alabama.

Under a direct system, it would go on the ballot in Alabama and I assume—but we do not know under the plan that they may have—that if splinter parties qualify in any States, it might automatically go on the ballot of all States. We do not know what Congress will provide.

Mr. HOLLAND. Mr. President, we do not know what Congress will provide, although the Senator from Florida thinks it will provide uniform standards. Until and unless uniform standards were adopted, the Senator from Alabama is so right. There would be a splinter party in every State of the Union. They might go into several States or they might be confined to one State.

I do not think the Senator from Alabama is perhaps of an age that reaches back to the existence of the Populous Party in our part of the country. The Senator from Florida can remember a little of that. It was quite an active organization while it lasted. It got on the ticket in a good many States, as the Senator from Alabama knows.

Mr. ALLEN. Yes, indeed. It came very close to carrying several elections. Its influence and appeal is still very much felt in the State.

Mr. President, the junior Senator from Alabama would gather from this colloquy that the distinguished Senator from Florida is of the opinion that the direct election method of choosing the President would endanger the very existence of our party system of national politics by the creation of numerous third parties.

Mr. HOLLAND. Mr. President, the Senator from Alabama is exactly right.

The Senator from Florida feels that it would endanger the two-party system and, what is more important, it would endanger and in part destroy the federal system as we know it.

On both counts, the Senator from Florida does not like the resolution.

Mr. ALLEN. Mr. President, I thank the Senator from Florida for his answers to the questions of the junior Senator from Alabama.

Mr. HOLLAND. Mr. President, I thank the Senator from Alabama. He has contributed very greatly to the debate.

Mr. President, I yield the floor.

Mr. MILLER. Mr. President, in 1937 the late President Roosevelt sent to Congress a proposal that Congress adopt a statute to authorize the President to appoint one additional Supreme Court Justice for every incumbent Justice over the age of 70. At that time five of the nine Justices were over 70.

The purpose of this measure, which was called the Supreme Court packing proposal, was, of course, to give the President a majority of Justices who believed in his philosophy. Of course, those additional Justices would be very carefully selected for that purpose.

The Supreme Court packing proposal had been discussed on several occasions on the Senate floor, beginning in February 1937, when President Roosevelt sent over the proposal. However, it was not until July 6 that it was called up for formal consideration. On that date, Senator Robinson of Arkansas, one of the proponents, said:

> I am prompted to make reference to the subject of a threatened filibuster. It would not seem to me appropriate to do so at this time if it were not for the fact that some of my dear friends who are in the opposition have been quoted in the press as saying that they are determined that the Senate shall never be permitted to register its conclusion on this legislation. . . . I do not believe that a filibuster will find justification in the conscience and judgment of those who believe in democratic institutions.

Senator O'Mahoney, a Democrat and one of the opponents, remarked the same day as follows:

> I objected a moment ago merely that I might have the opportunity of pointing out the conditions under which we are operating, to call attention to the fact that Democratic leadership of this body is endeavoring to throttle debate upon one of the most fundamental issues that has been presented to the Senate of the United States in two generations; and the effort is being made to lead the country to believe that all the business of the Senate is being stopped, that all of the business of the country is being held up by these vicious filibusterers who are opposed to the Court bill, whereas the fact is that the majority leadership is itself responsible for the condition that exists.

Senator Robinson's remarks echoed from the past when the junior Senator from Indiana said on September 23—last Wednesday—"It is the filibusterers who are bringing this country's business to a standstill, selfishly denying the Senate the opportunity to take an up or down vote" on the constitutional amendment abolishing the electoral college.

Well, Mr. President, in the first place this is not a measure to abolish the electoral college. If that is all there were to it, we would have passed it a long time ago, because most of us feel that the electoral college is as obsolete as the Model T Ford.

Doing away with the electoral votes for each State is another matter, and that is what the Senator from Indiana seeks to do. If he had his way, the 1968 presidential election would have seen the State of Massachusetts, which cast 2,360,000 votes offset 16 other States which cast a combined total of 7,600,000 votes. The reason is that Massachusetts gave Hubert Humphrey a plurality of 702,000 votes, whereas the 16 other States gave Dick Nixon a plurality of 691,000 votes. I must say I do not understand the fascination the State of Massachusetts holds for the Senator from Indiana, but, while I appreciate the historical importance of the State of Massachusetts, I cannot bring myself to vote for a proposition which would give one State such tremendous power in the selection of a President.

Of course, this business about "selfishness" is a two-way street. One could just as well talk about the selfishness of the proponents of this unsound proposal who have taken up so much time of the Senate in advancing it. It would have saved all of us a great amount of time and divisiveness if they had, instead, concentrated their proposal on doing away with the abuses of the present system—doing away with the electoral college and doing away with the terribly unfair "winner take all" system of counting the electoral votes. But, oh, no, it is this or nothing. And this is worse than nothing.

I ask unanimous consent that an article by the distinguished columnist, Richard Wilson, entitled "Direct Election: A Clear and Present Danger" and an article by the distinguished columnist, James J. Kilpatrick, entitled "The Most Deeply Radical Amendment" be placed in the RECORD in further support of my position on the pending proposal.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

DIRECT ELECTION: A CLEAR AND PRESENT DANGER

(By Richard Wilson)

Some people have formed the conclusion that the Senate's refusal to approve an amendment for the direct election of presidents is a stubborn, illiberal act of an old establishment trying to protect itself.

And that, save for illiberality, is quite true. The reason the Senate's action is good is that it affords an opportunity for people who have blindly accepted direct election as an expression of pure democracy to study the matter further and find out what the American system of government is all about.

It is not a pure democracy, never was intended to be and probably never will be. If people wish to change the form of government to go in that direction they at least should know what they are doing. It is a fair guess that not one person out of ten has the slightest conception of what the amendment would finally mean.

There is a far greater chance that the American system would end up—literally end—in riotous confusion if this amendment is ever adopted than that the time-honored electoral system would foist on the country a president who had not won election by popular vote.

This amendment is far worse than the women's rights amendment so cavalierly adopted by the House in the sense that its effect would be more damaging than the condition it is intended to correct.

Women will lose rights under the women's rights amendment and the American electoral system will lose its representative character if the direct election amendment ever goes into the Constitution.

Instead of polarizing (that's a good word) opposing views of political leadership into a reasonably clear choice between two candidates, the direct election amendment would fragment the process of election of a president, inflict a runoff, ultimately destroy the present method of composing the U.S. Senate, and doom a two-party system which is the political wonder of the world.

A multiplicity of presidential candidates and parties and the sure necessity of a runoff between the top two is enough in itself, without all the other complications, to show that direct election is a poor way to select a leader for four or eight years.

The leadership selection process has, in fact, worked remarkably well under the electoral system and this was never better illustrated than in 1968. The two major political parties, after great travail, picked the two men best fitted by training and experience—Humphrey and Nixon—and despite the third party candidate, Wallace, made a clear choice between Humphrey and Nixon.

Make no mistake about Wallace's bid for the presidency. If an election is ever to be thrown into the House of Representatives, in modern times it would certainly be under the conditions of Wallace's candidacy.

And, for that matter, what is so bad about picking a president through the House of Representatives? All of its members are subject to direct election; they sit in the House in proportion to the population of the country. There would be deals. But who says there wouldn't be deals among a dozen parties offering candidates for president in a direct election, much as there are deals now in New York State, which has four parties so fragmenting the vote that this year there is grave doubt a majority candidate can be elected?

The worst that could happen under the electoral system would be the House of Representatives choice of a president. But the worst that could happen under direct election would be the choice of a president who really did not represent anybody or anything, without political discipline and coherent conviction, but the creature solely of his ability to use and pay for exposure in the mass media.

Why do you suppose it is that we are lately getting so many United States senators who have little natural aptitude for their jobs?

This is not a case of opposing change for the usual conservative reason that change itself is to be shunned. This is a case of clear and present dangers of "the most deeply radical amendment which has ever entered the Constitution of the United States."

Merely as an afterthought, there would be no reason in constitutional logic for a Senate made up of two members per state if the direct election amendment is ever adopted. Under that theory the biggest state, California, ought to have 15 or 20 senators, or whatever figure represented its proportion of the nation's population.

---

THE MOST DEEPLY RADICAL AMENDMENT

(By James J. Kilpatrick)

The United States Senate launches itself this week into one of the most fateful debates in American constitutional history. By the end of this month—by early October at the latest—the Senate will have voted up or down a resolution proposing the direct national election of Presidents.

"I think a case can be made," Yale's Prof. Charles Black has said, "for the proposition that direct election, if it passes, will be the most deeply radical amendment which has ever entered the Constitution of the United States."

That assessment is shared by many others, both lawyers and non-lawyers, who see in the direct election proposal a fundamental alteration in the structure of American federalism. Yet the resolution has passed the House already; it reportedly commands strong popular support; and the action to be taken by the Senate has this unrecognized meaning: If the Senate approves, and the resolution goes out to the States for ratification, any further effort at electoral reform would be effectively blocked for seven years. That is the period allowed by the resolution in which three-fourths of the states must ratify or fail to ratify.

Consider, for a moment, the changes that would occur in the whole business of nomination and qualification for the ballot. Under existing law, political parties hold national conventions and nominate their presidential and vice presidential candidates. Then state parties, acting under state law, undertake to get those tickets listed on state ballots.

It is at this point that the machinery of federalism begins its delicate braking action. Major parties ordinarily have no trouble in getting their candidates on the ballot in every state. The petition process makes it more difficult for third parties. George Wallace, it will be recalled, had a terrible time in 1968 before he could get his American Independent Party qualified. When Strom Thurmond ran in 1948, he made it to the ballot in 15 states only.

The machinery of state-by-state qualification, coupled with electoral voting by states, has worked to inhibit the power of third parties. Only four times in this century has a minority party won electoral votes. The Socialists, Progressives, Prohibitionists, Constitutionalists and others have sputtered ineffectively within their state compartments. And because each of the two major parties has been compelled to make a broad appeal, the United States has benefited from political stability and prudent compromise.

Under the pending resolution, this machinery would be junked. No matter what its sponsors say, the direct election amendment would require (and its language so permits) that ballots be uniform throughout the United States. Nothing else would make sense. An entire new system would have to be created by which any group calling itself a political party filed the names of its candidates with a Federal Board of Elections. We could reasonably expect a Black Peoples party, a Peace party, a Revolutionary party, a Young Americans party. I am myself a Whig, and might run. In a nation so large and so passionately diverse, a dozen "parties" surely would bid for a footnote in history.

Then what? State lines no longer would matter. We are now thinking of cumulative votes, across the nation as a whole. It requires no great work of the imagination to conceive that such an aggregation of States Righters, New Leftists, Anti-Fluoridationists, and Banthe-Bombers could drain enough votes to prevent either of the major parties from winning 40 percent of the total.

In 1968, even with the machinery of federalism working, it was Nixon 43.5 percent; Humphrey 42.8; and Wallace 13.5, with two-tenths split among Gene McCarthy, Eldridge Cleaver, a Communist named Mitchell, the Prohibitionist Munn, and others. Given a similar situation, under the pending amendment, a run-off would be held between the top two—probably the first week in December—amidst wild cries of "deal" and "sell-out."

Is this what we want? Is this prospect of chaos truly better than the "obsolete" but functioning system that now exists? The questions are squarely before the Senate now.

ORDER OF BUSINESS

Mr. MILLER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HANSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, a number of Senators have expressed their grave concern that, under direct election, the Nation will be subjected to a series of disastrous recounts and challenges.

The distinguished senior Senator from Florida spoke at length earlier this afternoon on this very point. He went into considerable detail to document valid reasons for his concern. He called attention to what would follow in the wake of recounts and challenges, how it would disrupt confidence in our system of gov-

ernment. I hope Senators will take occasion to read and study carefully what he has said.

This concern has been pooh-poohed by the proponents of direct election, and they have made no attempt to reply to the merits of the charge. Their failure to come to grips with this issue underscores what the minority report of the Judiciary Committee had to say about the proponents of direct election—namely, that they were notable more for what they did not say than for what they did.

But this Senator does not see how this matter of challenges and recounts can possibly be ignored. I do not see how any Member of this body can refuse to acknowledge what the Senator from North Carolina pointed out so well last Friday—namely, that if the votes from 184,000 polling places are all pooled together without regard to State jurisdiction, we are virtually guaranteeing that we will have national political paralysis.

This is no mere idle speculation, Mr. President. It is a prediction based upon everyone's commonsense familiarity with the technical problems which necessarily attend the casting of ballots. These problems may arise from out-and-out fraud or attempts to rig elections; or they may arise from plain old human error or ordinary negligence. But whatever their cause, their effects in a national presidential plesbiscite could produce an electoral crisis the likes of which this Nation has never seen.

Under the present system, the Nation as a whole is insulated against charges of irregularity arising in local precincts, for they can be dealt with at the State or local level without threatening to affect the national outcome. Under direct election, however, any irregularities anywhere could affect the entire Nation. A challenge anywhere would become a challenge everywhere; a recount anywhere would become a recount everywhere.

Challenges and recounts, Mr. President, are frequent and common occurrence in American politics. Fortunately, we have seldom if ever had to deal with them at the national level. But our imaginations need not work very hard to conjure up the nightmare that would take place if we did have to deal with charges of irregularity at the national level.

Just in the last week, Mr. President, major charges of irregularities came to light in no less than 10 States, local, or congressional primary elections. And I might add that these 10 instances are only those that have come to my attention in the pages of the Washington Post and the New York Times. They are therefore almost exclusively concerned with races in the greater Washington or New York areas. As to others which may have arisen elsewhere in the past few weeks, I have no actual knowledge; but if the Washington and New York examples are any indication, I think it fair to assume that similar charges and counter-charges have been aired elsewhere. But the total number of such cases is, in a sense, irrelevant, because under direct election of the President, any one of them would be sufficient to set off a chain reaction elsewhere; any one of them could spell the difference between victory and defeat; any one of them could cast doubt upon the outcome of a presidential election; any one of them could precipitate a crisis in presidential succession.

Of the 10 instances I have mentioned, four of them have arisen in New York, four in Maryland, and one each in Colorado and Wisconsin. They involved:

First. The primary in Maryland for State Comptroller;

Second. The primary in Maryland for Commissioner of Prince George's County;

Third. The primary in Maryland for the Seventh Congressional District;

Fourth. The primary in Maryland for the Fourth Congressional District;

Fifth. The primary in Colorado for the First Congressional Distrist;

Sixth. The primary in Wisconsin for the First Congressional District;

Seventh. The primary in New York for the 44th Assembly District;

Eighth. The primary in New York for the 51st Assembly District;

Ninth. The primary in New York for the 78th Assembly District; and

Tenth. The primary in New York for the 21st Congressional District.

Comment on each of these cases is in order, Mr. President, because the difficulties that arose in each are but a small and random sample of what we might have to cope with under a system of direct election of the President.

In the Republican primary for Maryland State Comptroller, it turns out that the man who had been declared the unofficial winner on September 15 actually lost the election. According to the chief clerk of the Baltimore County election board, the wrong figure had been transmitted by the news media on election night. What had originally been reported as a 2,203-vote victory for one man became a 208-vote victory for the other. But even these returns are still in doubt, for they are based upon a reexamination of the canvass in only one county. The State administrator of election laws cautioned against taking these revised figures as final, because a subsequent canvass of the other 22 Maryland counties and the city of Baltimore could turn up other discrepancies. As to how the wrong figures were obtained by the news media in the first place, no one seems to know. You can imagine, Mr. President, what might happen under direct election if CBS, or NBC, or ABC were to make a similar error in a presidential race.

In the Prince Georges County Commissioner race, a candidate who finished 21st in a field of 25 in the Democratic primary filed suit on September 23—more than a week after the election—charging that massive voting machine malfunctioning had fouled the election. According to the Washington Post for September 24:

> Voting hours had to be extended two hours at eight polling places in the county's Second Election District for Republican voters who had been turned away earlier in the day due to erroneously prepared and thus inoperative voting machines.

The article adds:

> Election officials also reported that at least 25 percent—

Consider that, Mr. President, 25 percent—

> of the county's 614 machines had failed in one way or another during the September 15 primary.

The cause of this breakdown was ascribed to human error. Human error, however, comes in many different sizes and shapes and forms. Whether the human error in this case was the result of neglect, misfeasance, or malfeasance, no one yet has any idea; nor are we likely to find out for a long, long time—if, indeed, we ever do. A new election would seem to be called for, since, as the candidate who filed suit stated, there is no way "to determine what the actual outcome of the primary election would have been had the voting machines been properly prepared."

In the Democratic primary for the Seventh Congressional District of Maryland, we behold a classic case of charge and counter-charge, the kind that involves party officials and candidates on all sides up and down the line. According to unofficial returns last week, the incumbent, Congressman SAMUEL FRIEDEL won by a 132-vote margin. The supporters of his chief opponent, Mr. Parren Mitchell, however, reported scores of alleged irregularities which they claim came about because of a conspiracy to defraud Mitchell of election victory. Among the irregularities charged, according to the Washington Post, were voting machines not delivered, or delivered to the wrong address; certain machines with Mitchell levers that would not work; polling places opening 3½ to 4½ hours late; and last-minute changes of location of polling places. In the aftermath of these allegations, one of the candidates for Governor has called for a Baltimore grand jury investigation, and the president of the Baltimore board of election supervisors has resigned.

Moreover, the Maryland advisory committee to the U.S. Civil Rights Commission has called for a new primary in at least 10 of the district's 125 precincts, and has requested an investigation by the Justice Department. In the meantime, on the basis of a canvass by an official auditor, Mr. Mitchell is now claiming victory. The primary election, in short, is enveloped in a cloud of dispute, and it may be weeks or months before the dust settles.

In yet another Maryland incident, a candidate for the Fourth Congressional District Republican nomination has charged that his name was left off the ballot in eight precincts. This irregularity could be crucial because he apparently lost the overall count by only eight votes.

In the First Congressional District of Wisconsin, it at first appeared that Douglas LaFollette had won the Democratic primary on September 8. A recount was called for by his chief opponent, however, and 2 weeks later, it turns out that LaFollette had actually been defeated.

In the First Congressional District of

Colorado, the incumbent Congressman, BYRON G. ROGERS, contested the 30-vote plurality of his chief opponent and petitioned the courts of his State for relief. The petition, apparently, has been turned down, on the grounds that Congress alone has jurisdiction in such matters. It is not clear from the newspaper report what the basis of Congressman ROGERS' charges was, but for my purpose here, it makes no difference. What matters is that there was a dispute, a dispute which—if it had taken place in a presidential election—might well tie up the election results for weeks on end.

Mr. President, turning now to the 44th Assembly District race in New York, it appears that the winner in the June primary polled considerably more votes than his opponent, but, owing to a number of irregularities, the courts have ordered a rerun. In the 51st Assembly District of New York, according to the New York Times:

> Joseph Ferris, a Reform Democrat, and Marvin Kessler, an insurgent from the regular Democratic organization, both piled up more votes than did the organization candidate. Unofficial returns showed Mr. Ferris the winner by a narrow margin; the official canvass gave victory to Mr. Kessler by an even narrower margin, only nine votes.

As a consequence, a rerun has been ordered. On the other hand, in a disputed primary election in the 78th Assembly District of New York—where no less than 263 balloting irregularities were found—the New York Court of Appeals has ruled that a new primary was not called for.

I should point out in passing, Mr. President that the primary in each of these cases was held in June, and that the disputes are only now—better than 3 months later—being determined by the courts. And these cases are but small potatoes compared to what might arise under a presidential plebiscite. We could not afford the luxury of a 3-month delay in settling a presidential election; but as to whether a dispute could be resolved in less time under direct election, I have my doubts. Election challenges, charges, and countercharges, pose knotty problems to the courts. Witnesses must be called and evidence presented. The courts must weigh the evidence as best they can, and they must come forth with a reasonable opinion on the dispute. All these things take time—much more time than we are likely to have available in a presidential race, where the country is anxious to rally behind an undisputed winner.

Last, but by no means least, Mr. President, I would refer to the disputed primary in the 21st Congressional District of New York. An intermediate court in that State has ordered a new primary to be held, with all six candidates originally in the field once again appearing on the ballot; but this ruling is yet subject to appeal, and it may turn out that the dispute—involving some 800 votes out of some 25,000 that were cast—will be resolved in a different way. Meanwhile, the Democratic voters in the 21st Congressional District will simply have to bide their time.

I mention these examples, Mr. President, because they are typical of what happens in many areas of the country at election time. I have no idea as to whether any of these charges or allegations is meritorious, and I trust that the courts or electoral commissions will in time sort them out in a just manner. What matters here and now is not whether any of these charges is meritorious, but the simple fact that charges were brought. For once charges are brought, the entire outcome must be held in limbo until the dispute can be resolved one way or another. Any of the charges I mentioned—any one of them—if it occurred in a presidential race under direct election could spell disaster for the Nation. Charges of electoral fraud, mismanagement, or impropriety are as American as apple pie in many sections of the country, and I am appalled that the proponents of direct election dismiss that fact in such a cavalier way. The problem is real; the problem is ever present. And it ought to be dealt with by something more than dreamy assurances. There is not one thing in Senate Joint Resolution 1, or in any of the other direct election proposals, to protect us against such incidents on the national level. Not a single argument has been made by the proponents of direct election, either in their report or on this floor, as to how they propose to deal with this problem.

There are over 184,000 polling places in the United States, Mr. President. Irregularities in only a few of them under a system of direct election could thrust the entire Nation into a massive electoral squabble, with charges and counter charges being hurled back and forth in a dizzying display of rhetorical fireworks. Every candidate would accuse every other of misdeeds and foul designs. And the country would be ripe for assault on the part of those who oppose her, either at home or abroad.

Any one of the examples I have cited here—a mistake by the news media in reporting the returns, the intentional or accidental malfunctioning of voting machines, the closing or relocation of polling places, and the infinite variety of what one election official so blithely called human error—any of these things under direct election could reduce this country to a shambles. It would be, in the words of Theodore H. White, nothing short of a nightmare.

Mr. President, I ask unanimous consent that newspaper reports referred to in my remarks be inserted at this point in the RECORD.

There being no objection, the newspaper reports were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 25, 1970]

CROSS TAKES LEAD FOR COMPTROLLER

(By John Hanrahan)

Harold E. Cross of Bethesda, a retired Bethesda Navy captain who waged a Warren Harding-style campaign by staying mainly at home, apparently has won the Republican nomination for Maryland comptroller.

The official canvass in Baltimore County yesterday showed that Cross, 63, had picked up 2,400 votes to move ahead of Howard F. Wiedey, 54, the GOP organization-backed candidate who earlier had been declared the unofficial winner in the Sept. 15 primary.

Nathan Goldstein, chief clerk of the Baltimore County election board, said yesterday that the error had not been made by his office.

Apparently, he said, the wrong figure had been transmitted by the news media on election night.

Originally, Baltimore County reports showed only 464 votes for Cross and 9,808 for Wiedey. The canvass yesterday showed 2,028 for Cross and 8,961 for Wiedey. Statewide, the original figures reported were 43,440 for Cross and 45,643 for Wiedey. Now, these unofficial figures read 45,004 for Cross and 33,796 for Wiedey.

Willard A. Morris, state administrator of election laws, cautioned yesterday against declaring Cross as the winner. He noted that the canvass in the other 22 counties and Baltimore City, due next week, could turn up other discrepancies that would affect Cross's apparent 208-vote lead.

Wiedey could not be reached for comment yesterday. Cross was ecstatic, but said he had figured all along that the canvass would prove him the winner. He said he knew he had been short changed on the vote in Baltimore County on the original report.

"If I was blind, stupid tied up and in the gutter . . . I'd have to get more than 464 votes out of Baltimore County, since my name was up there on the top line of the ballot right between Blair and Beall," Cross said.

Wiedey was running on the official Republican organization slate that included C. Stanley Blair for governor, Herbert J. Miller Jr. for Lieutenant Governor, Thomas M. Anderson Jr. for attorney general and Rep. J. Glenn Beall Jr. for U.S. Senator. Anderson and Miller had no primary opposition, Blair and Beall won easily and Wiedey was expected to win easily since he was campaigning with the ticket and Cross was sticking close to home.

Cross acknowledged yesterday that he had ventured out of Bethesda for only three primary campaign appearances. If he wins the primary, he said he expects to be more active in the General election campaign against Democratic incumbent Louis L. Goldstein.

The Blair ticket was caught by surprise by yesterday's disclosure, but said that it would be a simple matter to replace Wiedey's name with Cross's name on future campaign brochures—if Cross is declared the winner. Members of the Blair ticket said they have met Cross, but scarcely know him.

BALLOTING MACHINES CITED IN COUNTY SUIT

(By Stephen Neary)

A Prince Georges County Commission candidate who finished 21st in a field of 25 in last week's Democratic primary yesterday filed suit asking for a new primary contest. Flora Daun Fowler charged that massive voting machine malfunctioning had fouled the election.

"Lord knows what will come out of it, probably nothing," commented Mrs. Fowler, who, acting as her own attorney although she is not a lawyer, filed the suit in the county's Circuit Court.

Mrs. Fowler said she had "waited all week" for someone else to take legal action against the election before deciding to file her own suit.

Voting hours had to be extended two hours at eight polling places in the county's Second Election District for Republican voters who had been turned away earlier in the day due to erroneously prepared and thus inoperative voting machines.

"HUMAN ERROR"

Election officials also reported that at least 25 percent of the county's 614 machines had failed one way or another during the Sept. 15 primary because of what they called "human error" in setting up the machines.

In addition to asking the court to order another primary election, Mrs. Fowler's suit asks for an injunction forbidding elections officials from "tampering" with the presently impounded machines in any way until "the irregularities have been thoroughly explained to the voters."

"Tampering," Mrs. Fowler's suit said, "includes either the formal count of the primary election, which is currently being carried out, or beginning to prepare the machines for the Nov. 3 General Election.

"NO SURE WAY"

"There is apparently no sure way of determining the extent of damage done to the candidates and to the voters by this deprivation of the constitutional right to vote: nor is there any way in which to determine what the actual outcome of the primary election would have been had the voting machines been properly prepared . . ." Mrs. Fowler's suit said.

Mrs. Fowler's suit, for which no court dates for arguments have been set, also said that "the massive failures of the voting machines may be a clear indication of neglect—misfeasance and/or malfeasance—on the part of the board of supervisors of elections who supervised, or of the custodians who programmed, the machines."

BLAIR BLAMES MANDEL FOR BALLOT FLAWS

C. Stanley Blair, the Republican candidate for governor of Maryland, said yesterday that Gov. Marvin Mandel is partly responsible for irregularities reported in mainly black precincts in Baltimore during last Tuesday's primary election.

Blair called for immediate investigation of the election-day problems by the Baltimore grand jury.

He said it was "more than coincidental" that most of the election troubles were made in the precincts "where Mandel's running mate, Sam Friedel, was expecting his strongest opposition from Parren Mitchell. His reference was to Rep. Samuel N. Friedel, veteran Baltimore congressman.

Mitchell, seeking to become Maryland's first black congressman, has claimed victory in the Seventh Congressional District Democratic primary, despite an unofficial count giving Friedel a 182-vote edge. The official count is to be completed this week.

Mitchell's supporters reported scores of irregularities, which they claim came about because of a conspiracy to defraud Mitchell of election victory. The Mitchell camp has not accused any specific individual.

IRREGULARITIES CLAIMED

Among the irregularities, they claim, were voting machines not delivered or being delivered to wrong addresses, certain machines with Mitchell levers that would not work, polling places opening 3½ to 4½ hours late and last-minute changes of sites of polling places. All of this, they said, either prevented or discouraged many Mitchell supporters from voting.

In a statement yesterday, Blair said he has sent a telegram to the Baltimore grand jury asking for an investigation of "the apparent malfeasance, misfeasance and nonfeasance of the Baltimore city election board" in the handling of the primary.

"The election board," Blair said in the telegram, "either intentionally or unintentionally, deprived some voters of their right to cast their ballots in the election."

In the telegram, Blair expressed concern "that some action or lack of action by the election board will jeopardize Republican and Democratic reform candidates' chances for election" in November.

PREPARED STATEMENT

In a prepared statement Blair castigated the "highly political" election board as being "directly responsible for the chaos" last Tuesday. And, focusing again on Mandel, he said:

"I think it is more than coincidental that Gov. Mandel installed the present system when he seized control of the election process immediately after he took office."

This was a reference to a Mandel-backed bill that gave control of the board, an appointive body, to the Democrats. With Spiro T. Agnew as governor, the Republicans were authorized by law to control the board.

At a press conference Friday, Mandel would not place specific blame on the board for the problems and said there is no evidence of any conspiracy to defraud Mitchell and his supporters. Friedel was the only opposed Democratic congressional candidate that Mandel openly endorsed in the primary.

NEW BALTIMORE VOTE ASKED IN SEVERAL BLACK PRECINCTS

(By Lawrence Meyer)

Maryland's advisory committee to the U.S. Civil Rights Commission called yesterday for a new primary in several predominantly black precincts in Baltimore where it charged that irregularities effectively deprived more than 200 persons of their right to vote.

The irregularities, according to the committee's report, were concentrated in at least 10 of the 125 precincts in the Seventh Congressional District where Parren J. Mitchell, a Negro candidate, lost to Rep. Samuel N. Friedel by 182 votes, according to an unofficial count.

In order for a new primary to be held in those precincts, a court would have to order the election. No suit has been filed yet seeking a new primary.

In a sweeping condemnation of the conduct of the primary election Sept. 15, the committee recommended that the "present board of supervisors of elections of Baltimore City be relieved of further responsibility for the November general elections."

The committee also asked the commission to request an investigation by the U.S. Justice Department to see if any federal laws were violated.

Discussing the committee findings yesterday, chairman Herbert L. Fedder said, "The limited information gathered did not disclose any indications of fraud or a conspiracy, but it did show a shocking pattern of neglect—and in any event, the result was just as damaging as if there had been deliberate efforts to circumvent established procedures.

"The black community was short-changed. There is no getting around this fact," Fedder said. "Through its ineffectiveness in the primary, the board has forfeited any confidence it once might have enjoyed in the community and in its present form is virtually worthless."

Betty Silbert, president of the board, resigned Thursday, defending the board's conduct of the primary. Gov. Marvin Mandel said yesterday that Baltimore civic leader Charles P. Crane has accepted an appointment as board president through the Nov. 3 general election.

The committee report includes several excerpts from the testimony of 37 persons who complained of being delayed, harassed or deprived of their right to vote.

Mitchell has retained two lawyers—William L. Marbury of the Baltimore firm of Piper and Marbury and Larry S. Gibson—to represent him.

He said he had been counselled to make no comment on possible litigation pending the results of the official canvas, which is expected to be completed Monday. Mitchell said he thought the committee's recommendations were "very good."

In addition to Mitchell, Samuel N. Culotta, a candidate for the Republican nomination in the Fourth Congressional District, has claimed that his name was left off the ballot in eight precincts. Culotta lost by 118 votes to David Fentress. The board's acting chief clerk, Stanley Weiner, has verified Culotta's claim.

Willard Morris, administrator of state election laws, said he knew of no precedent in Maryland in which a new primary had been ordered by a court.

In addition to the testimony of the 37 persons testifying about irregularities, the report said that, "Police estimates in approximately 11 to 14 precincts located in the western part of the city indicated that more than 200 people were not able to vote on election day morning."

Deputy Maryland attorney general Robert F. Sweeney said that his investigations, which are not yet complete, found "delays in 11 of those precincts and that 10 of those 11 precincts appeared to me to be in predominantly black residential areas."

Sweeney, who testified before the committee during its 13-hour, one-day hearing last Friday, declined to comment on the report.

The committee also noted "that voting machine delivery went very smoothly in the (Baltimore) County and that black people are aware how much better municipal services seem to be in all-white areas."

According to the report, "The committee was told that the black community was deeply disturbed by what they felt was a 'systematic, deliberate conspiracy,' and a coalition of community organizations charged that there was a 'blatant manipulation of the vote in Northwest Baltimore.'"

In addition to asking for a Justice Department investigation, the committee also requested that the commission seek federal observers to oversee the conduct of the general election in Baltimore.

Other recommendations included: determining polling place locations at least 30 days prior to an election; notifying registered voters by mail at least one week before an election of the location of their polling places, and publication of the location of polling places in local newspapers at least twice within the week preceding the election.

MITCHELL SAYS FRIEDEL LOST IN OFFICIAL COUNT

(By Lawrence Meyer)

Parren J. Mitchell claimed victory by 466 votes over Rep. Samuel N. Friedel in Maryland's Seventh Congressional District Democratic primary after an official auditor released his canvass of the Baltimore City vote yesterday.

An unofficial tally of the Sept. 15 primary had shown Friedel the winner by 182 votes. The canvass of the Baltimore City vote, combined with the Baltimore County votes for the district and absentee ballots, provided an apparent reversal of 648 votes for Mitchell, who is seeking to become Maryland's first black congressman.

The canvass results will not be official until certified by the Baltimore City board of elections supervisors, which is expected to take action Tuesday.

The announcement of the apparent reversal came from Mitchell himself who was present while the official auditor, Able Temporaries, a tabulating firm, counted the votes. Mitchell took ward results, added them to the final returns from Baltimore County and asserted that the canvass showed him the winner.

Herman Goldberg, a principal auditor of the official canvass, said he could not confirm Mitchell's figures without checking them against his tally sheets and that he had no time to do so. "I'm sure that they're right, give or take one or two one way or the other," Goldberg said. "These professional politicians go over the figures themselves and they're so close it's not even funny. I'm sure that it's not an idle boast."

Mitchell's figures, combining Baltimore city

and county, give him 23,942 and Friedel 23,476.

Mitchell's victory claim came one day after the U.S. Civil Rights Commission's Maryland Advisory Committee condemned the handling of the primary by the board of elections supervisors because of numerous irregularities, especially in black wards. One of the committee's recommendations was that a new primary be held in precincts where voters were disenfranchised."

Herbert L. Fedder, chairman of the committee, said yesterday he doubted any action would be taken on a new primary since a court suit would have to be brought and Mitchell would not be expected to bring suit under the circumstances.

George Minor, Mitchell's campaign manager, said, court action to challenge the primary is now a moot point."

Fedder said the committee would stand by the rest of its recommendations, including a federal investigation of the primary, federal observers for the general election and relieving the board of its responsibility for the Nov. 3 balloting.

The Republican candidate in the Seventh Congressional District is Peter Parker, former people's counsel before the Maryland Public Service Commission.

The district is in the midst of a profound racial transition. Once overwhelmingly white and heavily Jewish, the area—in Northwest Baltimore and the adjoining sections of the county—now is 40 per cent black and 40 per cent Jewish. Friedel, chairman of the House Administration Committee, had represented the district since 1954.

Some Baltimore Democrats are apprehensive that a Mitchell victory will drive many white voters who vote Democratic to support Parker and other Republicans Nov. 3. Mitchell, who ran his primary with the support of several white liberals, said, I don't think there will be any major defections to the Republican Party. I think there will be some, but I don't expect any substantial numbers."

Mitchell said he had been unable to reach Friedel but I certainly would welcome his support." Friedel could not be reached for comment.

If Mitchell's victory claim is certified by the board, it will be the second primary in which an entrenched Baltimore congressman was beaten in the 1970 primary. Paul S. Sarbanes, a 37-year-old state delegate, defeated Rep. George H. Fallon, chairman of the House Public Works Committee and the Fourth District Congressman since 1945.

In both the Sarbanes and the Mitchell race, support was given by the antiwar Movement for a New Congress which also supported Royal Hart in his victory over former Rep. Hervey G. Machen in the Fifth Congressional District Democratic primary.

Mitchell said that the help of the Movement for a New Congress was tremendously impactual in terms of volunteers. No question about it."

[From the Washington Post, Sept. 25, 1970]

BALTIMORE ELECTIONS CHIEF QUITS

(By Lawrence Meyer)

The president of Baltimore's board of election supervisors, which has been criticized strongly for its handling of the Sept. 15 primary, resigned yesterday while defending the board's conduct.

Gov. Marvin Mandel accepted the resignation of Betty M. Silbert and announced that he had asked Charles P. Crane, a Baltimore businessman and civic leader, to serve as board president through the November elections. Crane said he would consider the request.

Herbert L. Fedder, the chairman of the U.S. Civil Rights Commission's Maryland advisory committee, which conducted an investigation of the primary, said he was not aware of Mrs. Silbert's resignation, "but I welcome that. It should have happened long ago."

The principal criticism of the board's conduct of the primary concerned more than 60 alleged irregularities that occurred in the black areas of the Seventh Congressional District. Parren J. Mitchell, who apparently lost his bid to become Maryland's first black congressman, has charged that the incidents were "not accidental."

Mitchell opposed Rep. Samuel N. Friedel, a close friend and political ally of Mandel's, who won the primary by 182 votes, according to an unofficial tally. The official canvass of the election still was being conducted yesterday afternoon.

Mrs. Silbert, whose resignation takes effect next Tuesday, said that "no member or employee of the board . . . acted in any manner that would in any way bring discredit upon the board."

She said that the problems Sept. 15 resulted from inexperienced low bidders winning contracts to prepare for the primary. She said the bidding process had been insisted upon by the city's board of estimates.

Fedder has called a press conference for this afternoon to release a report of his committee's inquiry.

Although Fedder declined to discuss the report, he said that the number of incidents in the black areas—including last-minute changes of polling places with no posted notice, machines delivered late or not at all and jammed machines—"leads one to speculate on the care or concern about the black citizens' right to participate."

He said that his committee's inquiry did not find evidence of any fraud or conspiracy, adding that intent must be shown to establish fraud and "the investigation didn't have enough depth to establish intent."

Fedder said the board was guilty of "maladministration" and that the report recommends "punitive action." Asked if the report filed with the U.S. commission, recommends criminal action against the board, Fedder said it does not, "but we don't preclude it."

In a separate incident, Samuel N. Culotta, candidate for the Fourth Congressional District Republican nomination, charged that his name was left off the ballot in eight precincts. Culotta lost by 18 votes to David Fentress.

Stanley Weiner, acting chief clerk of the board, said Culotta's charges were correct. Asked how many machines were used in the Fourth District, another board employee said he did not know and was too busy to find out.

COLO. PLEA LOST BY REP. ROGERS

DENVER.—The Colorado Supreme Court today turned down a petition by 70-year-old, 10-term Congressman Byron G. Rogers (D-Colo.) contesting the 30-vote plurality of 34-year-old peace candidate Craig S. Barnes for nomination by Democrats for the Denver congressional seat.

The 7–0 Supreme Court ruling, stating that Congress alone has jurisdiction in such matters, apparently ended Rogers' long political career, which included years in the State Legislature and the attorney generalship of Colorado.

[From the Washington Post, Sept. 24, 1970]

WISCONSIN RECOUNT

KENOSHA.—A ballot recount requested by Leslie Aspin indicated that he won the Sept. 8 Democratic nomination to oppose Republican Rep. Henry C. Schadeberg.

Douglas La Follette had been declared the unofficial victor in the First District primary by 26 votes.

The recount gave a 20-vote margin to Aspin, who was a member of President John F. Kennedy's Council of Economic Advisers, later served as a Defense Department economic adviser, and is currently an instructor at Marquette University in Milwaukee.

[From the New York Times, Sept. 22, 1970]

ELECTORAL RE-RUNS

Botched electoral procedures and inordinate judicial delays have combined to produce several re-run primary elections today in the Bronx, Brooklyn and Queens. Some of these races concern only party leadership posts. Two, however, involve Democratic nominations for State Assemblyman and have an importance that transcends their district lines.

In Brooklyn's 44th Assembly District, Melvin Miller polled considerably more votes in the June primary balloting than did his opponent. Mr. Miller, a Reform Democrat, beat the regular organization designee by a margin that would normally preclude a re-run. The courts have nonetheless ordered one. The difficulty is that few people will even be aware the polls are open.

In Brooklyn's 51st Assembly District, Joseph Ferris, a Reform Democrat, and Marvin Kessler, an insurgent from the regular Democratic organization, both piled up more votes than did the organization candidate. Unofficial returns showed Mr. Ferris the winner by a narrow margin; the official canvass gave victory to Mr. Kessler by an even narrower margin, only nine votes. This result justifies a general re-run in the absence of procedures confining a run-off to the two leaders.

The risk in a re-run, however, is that organization candidates will almost always emerge triumphant for the simple reason that while many voters don't even know there is an election, the organization can be counted on to get its supporters to the polls. In today's balloting both Mr. Miller and Mr. Ferris deserve preference as reform elements are needed to bring a breath of fresh air into the musty Democratic councils of Brooklyn that are run by backroom leaders who have shown little regard for the public welfare.

Beyond today's balloting, electoral procedures require reform. Election inspectors must be selected on the basis of merit rather than party fealty as at present. In weighing election disputes, fast courtroom action is needed. A challenge to Herman Badillo's Congressional primary victory still unconscionably languishes in the courts. It is also essential that judges, many of whom owe their designations to the organization, maintain scrupulous nonpartisanship.

It must not be necessary for reform candidates to beat regulars twice, once on Election Day and again either in the courts or on a second Election Day.

---

[From the New York Times, Sept. 24, 1970]

RERUN IN THE 21ST

After an inexcusable delay, the Supreme Court in Queens has handed down an inexplicable opinion. Yesterday, three months after the June party primaries and one day after rerun races in several boroughs, the court ruled that former President of the Borough of the Bronx Herman Badillo would have to undergo a rerun contest in his quest for the Democratic Congressional nomination in the city's new triborough 21st Congressional District.

The rerun election has been scheduled for Thursday, Oct. 8. It will be held then, with all six candidates originally in the field once more appearing on the ballot, unless the appellate division of the Supreme Court reverses yesterday's ruling. Mr. Badillo's margin of primary victory in this ethnically diverse district was only about 600 votes out of 25,000 cast—but it was large enough in a crowded field to have precluded the need for a rerun contest. For a polling inspector to have failed to initial a voter's card, as was alleged, is the sort of technical flaw that

courts normally overlook. There was never even any charge that these "flawed" votes went to Mr. Badillo. In fact, the inspectors owe their jobs to the regular party organization, while Mr. Badillo is a Reform Democrat.

The problem of a rerun is that many voters may not even know it is taking place. The advantage always goes to the candidate supported by the regular organization. In another rerun contest held this week, the organization candidate who had finished last in a field of three in June finished first, as expected. The voters in the 21st owe it to themselves to see that this typical result is not duplicated in their district.

Mr. Badillo stands head and shoulders above his challengers. A vigorous and experienced public servant, he deserves support. Reform politicians and students interested in seeking peaceful change through the political process would do well to flock now to his cause.

---

[From the New York Times, Sept. 22, 1970]

BRONX ELECTION APPEAL LOST

ALBANY.—The State Court of Appeals held today that there was no reason to conduct a new Democratic primary in the 78th Assembly District, in the Bronx. The appeal to state's highest court was filed by Assemblyman Edward A. Stevenson, who finished second in a three-way primary for the Democratic Assembly nomination. The winner of the primary was Louise Nine, who received 715 votes, Mr. Stevenson 642, and Albert Brooks 502, but 263 balloting irregularities were found.

---

[From the New York Times, Sept. 25, 1970]

BADILLO SAYS JUDGE BARRED TESTIMONY

Herman Badillo said yesterday there was only a "one-in-a-billion" chance that irregular votes could have affected his victory in the June 23 primary in the 21st Congressional District, but that a Queens Supreme Court justice prevented introduction of testimony to this effect before voiding Mr. Badillo's nomination.

The justice, John J. Leahy, could not be reached for comment on Mr. Badillo's charge.

Justice Leahy held on Wednesday that 798 votes in the six-man race had been irregular or void. This was 211 more than the plurality of 587 credited to Mr. Badillo, a former Bronx Borough President, in the official recount. The justice ruled that the void votes, "within a reasonable degree of probability, could have affected this election."

Mr. Badillo said at a news conference yesterday at the Overseas Press Club, 54 West 40th Street, that Justice Leahy had "directed" his lawyer to rest his case before he could introduce testimony on the odds of the voided votes affecting the outcome of the race. He called the judge's action "fascism."

The suit against the primary count was brought by the runner-up, Peter F. Vallone of Astoria. The district takes in East Harlem, South Bronx and Astoria and Corona in Queens.

---

[From the New York Times, Sept. 24, 1970]

QUEENS COURT VOIDS VICTORY BY BADILLO

(By Peter Kihss)

Former Bronx Borough President Herman Badillo's Democratic nomination for Congress in the new three-borough 21st District was voided yesterday on the ground of irregular votes. A Queens Supreme Court justice ordered a new primary to be held Oct. 8.

The successful challenge had been made by the runner-up in the six-man June 23 primary, Peter F. Vallone, of Astoria.

Justice John J. Leahy held that 798 votes had been irregular or void. This was 211 more than the plurality of 587 credited to Mr. Badillo in the official recount.

"Considering all the evidence," Justice Leahy ruled, "it appears that the void votes here, within a reasonable degree of probability, could have affected this election, making it impossible for the court to determine who was the successful candidate."

Mr. Badillo immediately announced an appeal to the Appellate Division. Branding the decision "outrageous," he asserted: "It is absurd to claim that I was responsible for irregularities committed by election inspectors supporting my opposition."

SCHEUER ASKS INQUIRY

Bronx Representative James H. Scheuer, Democrat-Liberal candidate from the 22d District and a Badillo ally, telegraphed the State Judicial Conference to ask for an investigation of the decision, made three months after the primary.

"This decision seems calculated only to serve the interests of the Queens regular Democratic organization and is inimical to the democratic electoral process," Mr. Scheuer charged.

Mr. Vallone, a lawyer and civic leader, said:

"I know that I won the June primary, and I'm confident that the special election will conclusively show that I am the people's choice throughout the triborough district."

He said he had submitted evidence that registered Republicans and Liberals had voted in the primary, which he said the decision had sustained, as well as other challenges based on alleged forgeries in voter signatures and lack of inspector signatures. The latter challenges did not enter into the final count of irregularities, he said.

The new district has about 45,000 enrolled Democrats in its Bronx portion, 20,000 in Queens and 10,000 in Manhattan, Mr. Vallone estimated. He said the ethnic breakdown was about 30 per cent each Puerto Rican and Italian, but he declared:

"The big issue is that people should vote for a man for Congress because they think he will represent them best in that capacity and not because he wants to run for Mayor and not because he is Puerto Rican or Jewish or Irish or Italian or Greek."

RESULTS OF RECOUNT

The recount had reported the primary vote as totaling 25,552—Mr. Badillo, 7,732; Mr. Vallone, 7,145; the Rev. Louis R. Gigante, a Bronx Roman Catholic priest, 5,621; Ramon S. Velez, director of the Hunts Point Multi-Service Corporation, 2,644; former State Senator Dennis R. Coleman, 1,508, and Joseph A. Loubriel, a Correction Department driver, 902. All would be involved in the rerun.

Mr. Badillo said, "it is not enough to prove irregularities, for they happen in every election." He contended the 798 allegedly irregular votes would have all have had to go to him to affect the result—"which is logically impossible."

The decision, he said, "would set a dangerous precedent that every insurgent who seeks election will have to win twice to be elected—first at the polls and then in the courts."

Mr. Badillo's counsel is Remo J. Acito, who is also law chairman of the Bronx Democratic organization. Mr. Vallone's counsel is Fabian Palomino, professor at Brooklyn Law School.

(The following colloquy, which occurred during the delivery of the address by Senator HANSEN, is printed in the RECORD at this point by unanimous consent.)

Mr. BAYH. Mr. President, I should like to reiterate what I mentioned a while ago in a colloquy with our distinguished colleague from Nebraska. I am willing—in fact, I am committed—to work with the Senator from Michigan, the Senator from Maryland, perhaps the Senator from Kansas, and anyone else who might be concerned about the runoff provision. I do not want to suggest that anyone needs to be dissuaded by my concern, but I think it is important for us to have some basic electoral reform. I have said repeatedly that, in my judgment, despite its shortcomings, the runoff is superior to the other contingencies. I am prepared not just to lend perfunctory support to such a change of the contingency, manner, but rather to support enthusiastically another contingency plan. I am not wed to any specific contingency. I would like to see us get the best one we possibly can, perhaps a combination of the electoral college and a joint session of Congress; or perhaps simply a joint session of Congress.

Mr. President, I interrupt my good friend, the distinguished Senator from Wyoming, in this manner just to point out that, although the Senator from Indiana is the principal sponsor of Senate Joint Resolution 1, he has no particular pride of authorship. He wants as many Members of this body as possible to become involved in this matter, to make it better, and he is willing to lend what little influence he may have in this body to that end, so that we will have some basic, necessary electoral reform before the end of this session.

I appreciate the courtesy of the Senator from Wyoming.

Mr. HANSEN. Let me say that I find encouragement in the fact that this debate is focusing attention on some of the facts that we should consider in discussing such a tremendous change in our constitutional processes as would be contemplated by the adoption of Senate Joint Resolution 1. I can only conclude that the distinguished Senator from Indiana recognizes some of the things that are wrong, some of the flaws that would exist in the direct election process. His willingness now to say that if we have to have a runoff, we will not use that system, or at least to imply that, suggests to me that this debate has indeed been a very helpful exercise.

I take encouragement in believing that every Member of this body is dedicated, is sincere, is earnest, and wants to improve things. But, as oftentimes is the case, what may first catch our attention as being a step in the right direction, upon closer examination does not always represent forward motion at all.

So it is with some satisfaction and truly great admiration and respect for the distinguished Senator from Indiana that I find that he, too, recognizes some of the things that could go wrong with direct election. His statement that he would be willing to talk with others about ways in which we could improve upon the very system he has proposed, indicates to me that he is indeed a man of good will, who has the best interests of this country at heart—and I think the same about the other 99 Members of the Senate—and I welcome his observations.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. HANSEN. I am happy to yield.

Mr. BAYH. Mr. President, I appreciate the kind remarks of the Senator from

Wyoming. I think it is possible for each of us to feel very strongly that a certain position is right. The Senator from Indiana recognizes the need to take into consideration the points of view of other Members of this body who are equally sincere, and he realizes that although legislation is a certain art in and to itself, the final success or failure of such pieces of legislation relies very heavily on the mathematics of the vote. The Senator from Indiana is always willing to work with others, to give and take a bit, so long as we are moving forward, in order to get enough votes. I would be glad to work with the Senator from Wyoming, and, hopefully, he will come up with a contingency plan that will be agreeable to others, and thus he can lend his support to the direct election proposal. I know that he has not closed his mind to this possibility from now until the end of time.

Mr. HANSEN. Mr. President, as all of us must be, the junior Senator from Wyoming, too, is concerned with votes. I would hope that my constituents may find merit in my position from time to time, at least sufficient merit 2 years from now, to give me an extension of my services to the State of Wyoming and to the Nation, in this great body. I would hope, though, that all of us, as we vote tomorrow on the vitally important issue of cloture, would be motivated more by what we believe to be in the long-range best interests of this country than by any other consideration.

I certainly agree with my distinguished friend, the Senator from Indiana, that votes are important; and I know that in this matter he is hoping that his side of the argument may be able to muster the necessary two-thirds. I hope that he shall be denied that victory.

I must say that long ago I found that we are short-sighted, indeed, if we do not recognize always the possibility of right in others. I do not mean to imply any omniscience, any ability to read the future and to know what is best for our country. Rather, I have had to restrict myself to an inspection of the past, an inspection of the greatness of this country, an examination of how well the processes by which we are governed and by which we choose electors has served us; and I can only say that such an examination confirms for me the judgment that our system, despite its defects, despite the occasional flaps it brings about in our body politics, has served us well.

Without being able to see in the future but, rather, trying to peer into the past and particularly into the more recent past, I would hope that we do not fall prey to the argument of some that simply because an institution or a system is old, it is wrong or outmoded. We have many old things that we respect and admire and revere, and quite properly so, in this country as the distinguished Senator from North Carolina pointed out the other day, old constitutions are the best constitutions, for they have withheld the test of time.

I do not think we have to look very far back to realize that we are much better off in America than are many other countries, because we have not incorporated into our system of choosing leaders those processes which have characterized all too many foreign countries and brought their constitutional systems to ruin.

Thus, I say, Mr. President, there is great virtue in some of the old things in this country. There is great virtue in our Constitution. I say there is great merit and virtue in the electoral vote system. While I would be the first to agree that we can make some changes in it, I must say that only minor changes would be required.

The principle that there shall be represented in the choosing of a President the expression of the States as political entities, undergirds the whole federal system of this country. Were we to reject this significant characteristic of the electoral college, we would be taking a major step down the road which would eventually abolish the Senate itself. It would provide those who would destroy our system, which has served us to well, with a reason for asking "Why should there be a Senate? Why should each State have two persons equal in this body with every other State?"

I do not think it is necessary to illustrate how good our Government and our legislative system have been. It seems quite obvious to me that such an exercise would be completely useless, because there is not a single one among us today who could not call attention to more reasons than I would have time to enumerate this afternoon that ours is, indeed, a workable and worthwhile system of government.

Accordingly, I say, Mr. President, I do not think I need attempt to explain, that merely because things are old they are outworn, outmoded, or no longer serviceable.

I am sure that every Member of this body has taken time regularly and frequently to read the Bible. I do not believe that the words of Moses are any less relevant today than they were when he brought the message down. I do not believe that the admonitions contained in the Ten Commandments are any less applicable to an ordered kind of life today than they were when they were first given to us.

I am not impressed at all with those who assert that our system of Government was designed and brought into being when things were different, when we did not have the ready communication we now have, when we had no television set to turn on, no radios, or even newspapers on a nationwide scale. Whereas today all we have to do is flick a button and we can see pictures of the war in Vietnam that were taken this morning. It is true, of course, that we could not do that when the Constitution was being framed, but I hope that we will not escape the realization that ours is, indeed, a long heritage, that our success is no accident, and that our constitutional system—far from being outmoded—has been responsive to our needs. It has proven itself fully capable of the flexibility that has been demanded by changing times, by increasing population, by instant communication, by the emergence of strong powers throughout the world, and by the necessity of being able to deal effectively and quickly with other nations.

Despite all of these changes which have come about, we find the Constitution fully as capable today as it was when it was first adopted to meet these changes.

So I cannot buy the argument that we must now discard it simply because it is old. Rather, I would hope that out of this debate, out of the excellent presentations that have been made, might come a greater appreciation and a greater awareness of how great this document is—and of how its unique principles are incorporated into the electoral vote system.

While there are those who say that the times must change and that we need to elect our leaders by a direct vote, I do not think that makes sense. Rather, I think a case has been made for continuing to choose a President by reflecting the presence of a federal system in our Government.

(This marks the end of the colloquy which occurred during the delivery of the address by Senator HANSEN and which by unanimous consent was ordered to be printed in the RECORD at the conclusion of the address.)

Mr. STENNIS. Mr. President, I wish to commend the Senator from Wyoming. Except for a few moments when I had a pressing matter outside the Chamber I listened to his entire speech. I enjoyed the extra philosophy he provided with reference to the men who wrote our Constitution.

The Senator has made a fine contribution to this debate. I especially call attention to some of his points of logic on constitutional law. I appreciate the fact that the Senator has worked so diligently on this subject, as he does on every subject, as his time permits. I thank him for being here today before this crucial vote which will be taken tomorrow.

The Senator has proven that he is a good rough-and-tumble debater and that he is good at deliberate debate. I appreciate the Senator's participation in this matter.

Mr. HANSEN. Mr. President, I appreciate the very kind remarks made by the distinguished Senator from Mississippi (Mr. STENNIS). He has been a great leader in this battle. I have been an admirer of his for a long time.

For those who may not know, he has a great following in the State of Wyoming. He is the recipient of the highest award the board of trustees of the University of Wyoming can bestow. He was given an honorary doctorate by that institution. I was a member of the board at that time.

We find great merit in the actions, leadership, and quality of statesmanship that are the hallmark of the Senator from Mississippi. I am most humbly appreciative for his kind observation.

Mr. STENNIS. Mr. President, there is nothing I could appreciate more than the Senator's great institution, what he has said, and the fine friendship, fellowship, and support I have had from the Senator from Wyoming since he has been here.

Mr. FONG. Mr. President, will the Senator yield?

Mr. HANSEN. I am happy to yield to the Senator from Hawaii.

Mr. FONG. Mr. President, I regret exceedingly that I was not here to listen to all the remarks made by the Senator from Wyoming. I was in attendance during the last few minutes of his speech and I heard the conclusion of his speech.

I come from a small State, as does the Senator from Wyoming. We know what direct election would do to the voting power of the small States. How it would cut down tremendously the voting power of all these small States, in some instances by as much as 80 percent to 90 percent.

I was very interested also in the observation of the distinguished Senator from Wyoming that there are approximately 184,000 voting precincts. There may be fraud in any number of these 184,000 precincts. If there were fraud, under direct elections those votes would be sealed off within the particular State in which the fraud occurred. If we did not have the electoral college system they would not be sealed—the fraudulent votes in any one of the 184,000 precincts would affect the total national vote and the vote of each candidate. The effect of voting fraud under direct election is horrendous to contemplate. It would result in chaos.

I wish to commend the Senator for his very fine address on this point.

Mr. HANSEN. Mr. President, I again express my appreciation to the distinguished Senator from Hawaii. I can think of no more appropriate time to call attention to one of the great strengths of our electoral college system than by what is brought to my memory now by his presence and by what he has just said.

Under the electoral college process it has been my contention that minorities find the greatest opportunity for effective presentation of their particular beliefs, interests, and feelings. When I think of the contributions that some of the ethnic minorities in the great State of Hawaii have made, I will do all I can to assure that this great Nation of ours shall never be denied the contribution that the Japanese people and the Chinese people have made. Those of us who serve in this Chamber are proud and appreciative that this is a great Nation composed of minorities. I am a member of a minority. I am a Dane and they tell me I am one of the few Danes who has ever slipped in here. I am glad the word did not get around before I was elected.

Mr. President, we must bear in mind that if we did not have the electoral college system, those people of many places, such as the great State of Hawaii, would not be able to cast the two extra electoral votes they now have the privilege to cast to assure that their ideas will be represented not only in the halls of Congress, but as well, in the Chief Executive of the United States. I know that not only President Nixon but other Presidents have been deeply conscious of the contribution made by the distinguished Senator from Hawaii and they want to do their best to see that we maximize the contribution these people can make, and that we understand their concerns. I think we are best assured of the important contribution they can make and have made through the electoral college.

I am grateful to my wonderful friend from Hawaii. I recognize him as a great scholar and a very well-educated man. He holds several degrees, one from the most prestigious of our law schools in the United States, and I am certain Harvard University proudly claims him as its own.

Mr. FONG. Mr. President, I thank the Senator for his very fine remarks concerning my State and me. With reference to his remarks about the place of minorities in the scheme of the electoral process, the speech which I intend to make this afternoon deals directly on this problem of how the electoral college system affects the minorities in the States. If we had a direct election of the President the minority's power, whether it is ethnic, religious, educational, social, or any other kind, would be fragmented and diluted so that presidential candidates would not look at the needs of these minorities. The minorities even by joining with other minorities would not have the influence on candidates and their parties that they now have.

I thank the Senator again for his fine remarks. I consider him one of the most able men in this body.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1933) to provide for Federal railroad safety, hazardous materials control, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2264) to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 6778) to amend the Bank Holding Company Act of 1956, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. PATMAN, Mr. BARRETT, Mrs. SULLIVAN, Mr. REUSS, Mr. WIDNALL, Mr. JOHNSON of Pennsylvania, and Mr. STANTON, were appointed managers on the part of the House at the conference.

## ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (H.J. Res. 1366) to provide for the temporary extension of the Federal Housing Administration's insurance authority.

## HEARINGS ON SOVIET ACTIVITIES IN CUBA

Mr. CHURCH. Mr. President, as chairman of the Senate's Subcommittee on Western Hemisphere Affairs, I have called for a special briefing, to which all members of the full Committee on Foreign Relations will be invited, as soon as arrangements are made, the purpose of which will be to obtain all available facts concerning the reported construction of a possible Soviet submarine base at Cienfuengos Bay on Cuba's southern coast.

Because of mounting concern that shipping and construction work in this area may have a military purpose involving the Russians, a special hearing with the best informed members of the executive branch should be held without delay, in order that Senators may receive a full and detailed exposition of all particulars.

In October 1962, the American public learned, after the fact, of Soviet missile bases being installed on Cuban soil. The resultant crisis brought the world closer than it has ever been, before or since, to a nuclear holocaust. That is why I am asking the State Department, Pentagon, and CIA to testify in executive session with the request that a full disclosure be made of all intelligence information now in possession of the Government on what could be a potentially serious development. If necessary, we must act in timely fashion, if we are to avoid the kind of nuclear showdown that occurred 8 years ago.

In this connection, I ask unanimous consent to have printed in the RECORD an article entitled "Cuban Missile-Crisis Hint Looms," written by Mr. James Nelson Goodsell, Latin-American correspondent of the Christian Science Monitor, and published in today's edition of the Monitor.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CUBAN MISSILE-CRISIS HINT LOOMS

(By James Nelson Goodsell)

The specter of a possible new Cuban missile crisis is haunting the Nixon administration.

Washington sources speculate it could develop over the reported construction of a Soviet naval facility at Cienfuegos on the south coast of Cuba.

As if to underline its concern and to warn both Soviet Leaders and Cuban Premier Fidel Castro of Washington's attitude, the White House Friday recalled the 1962 understanding between President Kennedy and Soviet Premier Nikita S. Khrushchev that ended the original Cuban missile crisis.

The White House also pointedly drew attention to a statement by President Kennedy Nov. 20, 1962, when he said: ". . . if all offensive weapons are removed from Cuba and kept out of the hemisphere in the future under adequate verification and safeguards, and if Cuba is not used for the export of aggressive Communist purposes, there will be peace in the Caribbean."

ACTIVITY REPORTED

Actually, Washington is not clear on just what is being set up at Cienfuegos. Unusual construction activity is reportedly under way and Soviet vessels have been making much more use of the port in the past few months than they had previously. In fact, four Soviet Naval vessels are there now.

But Soviet naval presence in the Caribbean, and particularly in and around Cuba,

is nothing new. For more than 15 months, Soviet vessels, including nuclear submarines, have been freely plying Caribbean waters.

"It would be logical for the Soviet Union to seek some sort of deep-water anchorage in Cuba for its fleet," a United States diplomatic source said in Washington.

REFUELING FACILITY

The Nixon administration, of course, would prefer it otherwise, but the growing Soviet naval presence in the Caribbean is reluctantly accepted as a tit-for-tat arrangement in view of the United States naval activity in and around waters adjacent to the Soviet Union.

Moreover, the mere construction of a naval facility for refueling and refitting does not cause too much concern in Washington.

But construction of a strategic submarine base, perhaps for the use of missile firing Polaris-type craft, would markedly alter the picture, and this is what concerns Washington.

CONSTRUCTION CONTINUES

The White House statement Friday, given reporters in the course of a background briefing arranged to discuss President Nixon's upcoming European trip, was clearly intended to discourage Moscow from carrying out any strategic construction.

At this point, it is obvious that the Soviet activity in Cienfuegos is not of the magnitude as that eight years ago when the Soviet Union placed offensive missiles on the island.

At that time, the Soviet Union had no Polaris-type submarines. Today it has at least 13 such submarines, armed with 16 missiles each. More are under construction. A base in Cuba would enable the Soviets to keep more submarines on station for longer periods without returning to home ports for servicing and resupply.

The United States, for example, maintains such facilities at Holy Loch, Scotland; Rota, Spain; and on Guam in the Pacific.

Information on the Soviet activity is understood to have come from United States U–2 reconnaissance planes, the same aircraft that furnished the first concrete proof of Soviet missiles in Cuba in October, 1962.

Washington says there are no submarines in Cienfuegos now, but a submarine tender is there along with three other vessels, all of them part of a Soviet naval task force including nuclear submarines that arrived in the Caribbean last month.

---

## THE DOVES ARE WINNING

Mr. CHURCH. Mr. President, on Saturday, September 26, I delivered the opening address at the Colorado National Politics Institute, held at Colorado State University. The forum of students faculty, and administrators was mannerly, alert, and concerned. They were of real credit to the growing university community at Fort Collins.

I ask unanimous consent that the full text of my remarks, entitled "The Doves Are Winning—Don't Despair," be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE DOVES ARE WINNING—DON'T DESPAIR

During the momentous summer months in Washington, it was my pleasure to work with many college students who came to the Capitol with the mission of bringing an end to the war in Vietnam. As the Summer passed without a single dramatic break-through in Congress, I watched too many of these students leave Washington, disillusioned and embittered. They returned home convinced that the military-industrial complex dominated American politics, and that the "system" had placed insurmountable roadblocks across the road to peace.

Not only do I understand, but to a certain degree I share the dismay of these young people. I have opposed our war policy in Indochina for a long, long time. It was seven years ago, in September of 1963, when I first spoke up for changing that policy. If anyone is entitled to feel frustrated, I should qualify.

There are, moreover, legitimate reasons of fresh vintage to deepen the discouragement of those who have worked so hard for peace, the most poignant of which, no doubt, was the recent defeat in the Senate of the McGovern-Hatfield amendment to end the war.

As for those students who have volunteered their help in election campaigns, the results have been inconclusive, at best. Roberty Kennedy's drive for the Presidency in 1968, was shot to death, while the aspirations of Eugene McCarthy were trampled to shreds on the streets of Chicago. Lately, however, particularly at the Congressional level, some light flickers at the end of the electoral tunnel, as indicated by the showing of Craig Barnes in Colorado, by Joe Duffy's race for the Senate in Connecticut, by Father Drinan's victory in Boston, and by Paul Sarbanes' upset in Maryland. These primary races signify something more hopeful than the accidents of age and reapportionment.

It is for the purpose of sounding a more hopeful note that I come to speak this afternoon. Even though the fighting continues in Vietnam, the truth is that our efforts have not been in vain. The government is not as immovable as it sometimes seems. The campus protest against the war has neither gone unheard nor unheeded in the nation's capital. Admittedly, the official response has been both sluggish and reluctant, but profound changes have taken place, nonetheless. Let me illustrate by asking a few rhetorical questions.

Whatever happened to all those ferocious hawks? They used to darken our political skies, poised to plunge down on any dove reckless enough to take wing.

How long has it been since we've heard their shrill battle cries: "Bomb Hanoi!" "Blockade Haiphong!" "Win the War in Vietnam!" Where has all that bravado gone?

Look closely.

The hawks are still about but quite subdued. They perch on strange new standards which proclaim: "No *Precipitous* Withdrawal." "No *Humiliating* Defeat." "Peace *With* Honor."

These are cynical standards, contrived for political effect. No responsible war critic has ever urged *precipitious* withdrawal, or called for *humiliating* defeat, or advocated peace *without* honor. These slogans are crafted for one purpose only: to give protective cover to the hawks; to conceal from public view the fact that they have largely lost the argument over Vietnam. The doves may not yet realize it, but they are winning.

No longer are we being told that our presence in Vietnam is required to "contain" communism. Six years of American warfare in Southeast Asia has succeeded only in extending communist penetration outward from Vietnam into the rest of Indochina.

Seldom, anymore, are we reminded that we went to Vietnam to prop up the "dominoes," for, even though we still remain in massive occupation of South Vietnam, the "dominoes" are falling next door. The larger parts of Laos and Cambodia have passed into communist hands.

If our purpose was to prove, as we were once solemnly told, that communist-induced "wars of national liberation" would not be tolerated by the United States, then we have managed only to prove the opposite namely that Asian civil wars, whatever their coloration, cannot be successfully suppressed by foreign intervention.

Mercifully, nowadays, we are spared the embarrassment of hearing that the SEATO treaty obligated the United States to go to the rescue of Saigon. Forgotten is the improbable argument of Dean Rusk that we were unilaterally bound by our SEATO commitment to fight for South Vietnam, despite the fact that such other major signatories as France, Pakistan and the United Kingdom disagreed. They construed the treaty according to its terms. As submitted to the United States Senate for ratification, the SEATO treaty provided only that we would "consult" in cases of communist subversion—where those could be defined.

In like manner, the other reasons once offered to justify our original intervention in Vietnam have faded away. Where can one find a reputable general to argue, with a straight face, that the defense of the United States is rooted in the jungles of Indochina? Who still pretends that Saigon stands guard over Seattle? Who honestly accepts the corrupt and repressive Thieu-Ky regime as a champion of freedom in Southeast Asia?

The truth is that even the hawks have lost their fervor for this senseless war. How often these days one hears the remark, "Of course, I think we should have stayed out of Vietnam in the first place, but now that we are there. . ."

*Now that we are there,* these are the code words that mark the chastened hawk, the formula words for shifting the discussion away from the perplexing *why* to the pressing *how.* "The urgent question," President Nixon counsels us, is "not whether we should have entered on this course, but what is required of us today." Never mind about why we entered the war, what matters now is how we end it.

Let it not be forgotten that it was the very question of how to end the war that originally prompted the lengthy debate between the doves and hawks. The issue was sharply drawn and well understood in the country. The hawks espoused the popular, if simplistic, view that the only way to end the war was to win it, while the doves favored a negotiated peace. At the beginning of the debate, the country, accustomed to imposing unconditional surrender on its enemies, turned a deaf ear on all talk of settlement, an attitude which accounted, doubtlessly, for the paucity of doves.

I remember it well. When Senator George McGovern and I took the floor of the Senate on February 17, 1965, to call for a political settlement of the war, *negotiation* was an unspeakable word in Washington. The liberal press was shocked; the conservative, scornful. "There is nothing to negotiate about," snorted the Secretary of State. And no less a figure than the late Everett Dirksen, President Johnson's favorite spear-carrier in the Senate, took charge of the rebuttal. With a grand display of trembling indignation, he repudiated negotiations as "simply a proposal to run up the white flag before the world and start running away from communism."

Just a few weeks later, however, it was President Johnson himself, speaking at Johns Hopkins University, who proposed "unconditional discussions" as evidence of his desire for peace, and offered a billion dollar aid program for Southeast Asia when a negotiated settlement was obtained. "We would hope," said Mr. Johnson, "that North Vietnam would take its place in the common effort just as soon as peaceful cooperation is possible." As it was now the President's proposal, no one breathed a word about "running up the white flag" or "running away from communism."

The Johnson offer, to be sure, was no more

than a ploy at the start. Our "unconditional" negotiating position turned out to be "we'll quit, if you quit." Victory in the field was still the real goal of the hawks.

As this became clear, the doves more and more protested that the war—essentially political in character—could not be "won" by conventional military methods. We argued that the great buildup of American men and materiel in the South could not be decisive in an area where Vietnamese enemy could scarcely be distinguished from Vietnamese friend—but where the American soldier, the foreigner, was an easy target on every count. Only the Vietnamese, themselves, we said, could win a guerrilla war.

As for the massive bombing of North Vietnam, we contended that experience and common sense showed it wouldn't batter the North Vietnamese into submission. Rather, it would weld them together and give new fire to a revolutionary movement which had already been fighting for more than two decades. The only way to settle such a war, therefore, was not on the impossible terms the hawks had offered, but on terms that related to what the war was all about—the political composition of the government in Saigon.

In this connection, it was the late Robert Kennedy who, in February of 1966, had the perception to realize and the courage to proclaim that a political settlement between the two Vietnamese sides would have to be based on a sharing of power: in short, something in the nature of a coalition government. This suggestion was at once denounced by then Vice-President Hubert Humphery as a proposal for "putting the goat in charge of the cabbage patch." The Saigon government's reaction was less picturesque, and much more savage; Vietnamese citizens landed in prison for even uttering the forbidden word, coalition.

Although lip service was paid, from time to time, to various heavily hedged formulas for peaceful initiatives before March of 1968, the lines in fact remained clearly drawn between doves and hawks. No matter how the hawks dressed up their true feelings, one constantly found their goal unchanged: they were still pursuing the will-o-the-wisp of "military victory."

But what has happened over the past two years? Nothing less than a complete reversal of position on the part of the hawks. It has finally been borne in on them that the Vietnam war cannot be "won" after all.

Who would have thought in the Fall of 1967 that a year later the bombing of North Vietnam would have ended and that representatives of all four parties to the conflict — including the unrecognized Vietcong—would be arguing about the shape of a negotiating table in Paris? President Nixon put his seal of approval on this reversal by acknowledging that we seek "no military solution" on the battlefield. Here, again, it is obvious that the doves have won their point about the essentially political, rather than military, character of the war.

And what of the course of the negotiations? Once more we find that the hawks have moved steadily toward the position of the doves. Lyndon Johnson's original "We'll-quit-if-you-quit" has given way to Nixon's "Anything-is-negotiable-except-the - right-of - self - determination - for - the - people-of-South Vietnam - even - if - they - choose-communism." What a far cry from the hawks' initial explanation for entering the war—the "containment" of communism within the perimeters of the then-existing "communist world."

Actually, President Nixon has gone even further: during a televised news conference on May 8, 1970, he said that if the people of South Vietnam choose other leaders, or a coalition government, it will be acceptable to the United States so long as that government is not forced upon them.

It is almost as if the President were reading from the late Senator Robert Kennedy's floor speech of 1966—a thought which should set hawk feathers to fluttering!

Meanwhile, actions as well as statements seem to indicate possible movement toward breaking the negotiating stalemate at Paris. It is inconceivable to me that a statesman of the caliber of Ambassador David Bruce would have agreed to represent us at the talks if he had not been given greater latitude than his predecessors to find the subtle formula necessary to produce a compromise settlement. The return to Paris of North Vietnam's chief delegate, Xuan Thuy, together with the new proposal offered by the Vietcong's Madame Binh, at least sustains a somewhat more optimistic view of the negotiating sessions than has been possible since the overthrow of Sihanouk. Despite the continuing deadlock at the conference table, it looks very much as if the dovish position on negotiations is in the process of being adopted by our government.

And yet all observers have always recognized that North Vietnam, after 20 years of bitter warware, might very well refuse any settlement we could accept. Confronting that possibility some years ago, the doves began to argue for a planned but deliberate policy of American disengagement. Apart from our basic objections to the character of the war, by its very nature bound to be inconclusive, we urged disengagement for two major reasons. In the first place, we felt a phased withdrawal of American troops would force the Saigon government to take negotiations seriously, knowing it could no longer rely indefinitely on U.S. forces to keep it in power. Secondly, it was clear to us that conditions here at home would not permit a war without end in Southeast Asia. There are, after all, limits to what one government can do for another. At fantastic cost in men and money, the United States had waged the longest war in its history just to furnish the Saigon government with an American shield, behind which to build its own military strength and political stability. At our sole expense, the United States had trained and equipped a South Vietnamese army five times larger than the combined forces of the Vietcong and North Vietnamese arrayed against it, and one with far greater fire power. Saigon had been placed in a position to take back its war. If the army wouldn't fight, we couldn't save the government anyway; if its army would fight, the government could save itself.

At first, any mention of withdrawal was anathema to the hawks. Nothing stirred up their bile so. They abused the doves for being "cop-outs." LBJ fumed "We're not going to tuck tail and run." Red-blooded Americans were appealed to on grounds of hyper-patriotism; veterans' organizations were rallied figuratively to the bugle call for yet another charge up Hamburger Hill.

Doves were castigated as "giving aid and comfort to the enemy." Efforts were even mounted in some cases (mine being one) to recall dovish Members of the Congress for "treason." And U.S. forces in South Vietnam continued to increase to a level above a half-million men, until that memorable March day in 1968 when Lyndon Johnson announced his abdication, ended the futile bombing of the North, and followed up by sending Averell Harriman to Paris to get peace talks underway. Still, the American military buildup continued, reaching a peak figure of 542,500 in February, 1969.

And what did Richard Nixon, once the most baleful and assertive of hawks, now Republican nominee for President, have to say about all this? He said he had "a secret plan to end the war." Once he was installed in office imagine what the Nixon secret plan turned out to be? *Withdrawal!*

A hundred-fifty-thousand American troops have already been withdrawn. Another hundred-thousand more are scheduled to be pulled out by next May.

President Nixon has an artful, if cumbersome, name for his no-longer-secret plan; he calls it "Vietnamization." Its purpose, he explains is to turn the war back to the Vietnamese—the very objective the doves stood for all along!

As the position of the hawks has converged on that of the doves, the Administration's rhetoric keeps escalating to conceal this reality behind a clever word-screen. Mr. Nixon takes great pains to separate himself from his critics by stressing his steadfast opposition to "precipitous" withdrawal (which nobody in authority ever urged upon him in the first place). He thus has succeeded in shifting the argument from *Whether* to *when*. Suddenly, withdrawal is no longer the issue; instead, it is the timeframe for withdrawal that the President dangles out as bait.

The doves, I must confess, have risen to the bait. We fell at once to criticizing the President for unduly prolonging the process of disengagement; dozens of bills were introduced in Congress setting deadlines which Mr. Nixon could repudiate as "revealing our hand." Meanwhile, Vice President Agnew has had a field day, brandishing the proposed timetables as proof that their sponsors are "architects of surrender," "appeasers," and "defeatists."

Of course, such charges represent the politics of bombast and baloney. Any sensible examination of the bills introduced in Congress will reveal that the deadlines proposed—far from being "precipitate"—differ only slightly from the pace of withdrawal which the Nixon Administration has already placed in effect.

And as for timetables, it is also clear that the Administration has long since adopted one of its own. More than a year ago, Army Secretary Resor said that "Vietnamization" of the war was ahead of schedule, thus revealing there is a timetable in existence about which Saigon would have to know. Since anything Saigon knows is quickly grapevined to Hanoi, only Congress and the American people have been left in the dark.

The diversionary tactic of turning serious discussion of the war into a squabble over timetables underscores the baffling refusal of President Nixon to reach for the very prize which now lies within his grasp, the forging of a new American consensus on coming out of the war. He seems to have forsaken his campaign theme of "togetherness" in favor of dispatching his Vice President on a deliberate mission of keeping the dispute inflamed and the truth obscured.

As Mr. James Reston pointed out in the *New York Times* on August 19, the Administration ". . . didn't concede that there was something to the argument for a deadline on American involvement in Vietnam, which some of its own supporters had recommended. It attacked McGovern and Hatfield as if they were traitors to the Republic . . . According to the Vice President, the McGovern amendment was 'irresponsible' action which would assure a 'humiliating defeat.' Mr. Agnew gave no indication that the idea of a withdrawal deadline had been seriously debated within the private counsels of the Administration itself."

Apparently the President has decided that the care and feeding of the restive hawks obliges him to keep flailing away at the doves, even as he occupies their premises. If so, the time is long overdue for the doves to stop playing Mr. Nixon's game, to point out that we have been proven right about Vietnam, and that our pleadings have actually been

adopted, albeit covertly, as official policy. Above all, let us avoid the pitfall of being pushed by Administration strategists into the error of adopting extreme and untenable prescriptions for instant peace.

Having achieved our basic objective of serious negotiations tied to an orderly withdrawal, what tasks remain for the doves to perform? There are two major undertakings left. First, we must keep up the pressure so that President Nixon's withdrawal from Southeast Asia will remain as "irreversible" as Secretary of State Rogers says it is. Secondly, in the absence of a political settlement in Indochina, we must work to prevent a Korean-type prolongation of our Vietnamese misadventure.

On the first count, the sudden aberration of the Cambodian invasion illustrates the danger that Mr. Nixon might yet be tempted to reverse gears and re-escalate the war, if the Vietcong and the North Vietnamese fail to lie low. Already the Administration is having to eat most of its words of reassurance to the American public, as it keeps getting edged into further involvement in Cambodia. An entire speech would scarcely do justice to that subject. Suffice it to say now that the current situation makes it overwhelmingly clear why the Cooper-Church amendment, passed by the Senate on June 30, needs to be enacted into law. It would prohibit any full-scale return to Cambodia without Congressional consent.

On the second count, it should be painfully evident that we must avoid the trap of keeping a vestigial military presence in South Vietnam for the indefinite future. An American military foothold there is unnecessary to our security, unduly expensive, and disruptive to a final resolution of the Vietnam—or Indochina—problem. Moreover, it would militate against any improvement in relations with China over the long term, which should be the central objective of American foreign policy in Asia.

The Korean example should be proof and warning enough of this thesis. Eighteen years after the end of the fighting, we are still locked into Korea. At great expense, we have kept a sizeable army there all these years. Now, as fiscal pressures compel a reduction in this force, an indignant Korean government demands another $3-billion in military assistance as severance pay.

Nevertheless, the pressures mount for making the same mistake all over again in Vietnam. Writing from Saigon, *Washington Post* correspondent Lawrence Stern recently warned in an article datelined August 26, 1970, that: "President Nguyen Van Thieu will press the case for maintaing a 50,000 man 'residual' American military presence in South Vietnam during his talks with Vice President Spiro T. Agnew.

"This, as far as Thieu is concerned, will be 'Topic A' in the conversations at Independence Palace, according to qualified official sources here.

"So far there has been no official communication between Presidents Thieu and Nixon on the size of the American troop commitment to South Vietnam in what the presidential palace has begun to call the "post-war' period.

"In a recent dinner with a few Western correspondents on July 30, Thieu first floated his proposal for a 50,000-man American military force in South Vietnam to 'guarantee the peace' after 1973—what might be described as the post-Vietnamization period . . .

" 'We still have many things to ask of you,' Thieu said to American correspondents during the July 30 dinner.

"U.S. Ambassador Ellsworth Bunker is known to feel that Thieu's position is a reasonable one and has, in private conversation, cited the precedent of South Korea where the United States maintained a 'peace-keeping' force of about 60,000 troops for 18 years."

In my view, the adoption of the McGovern-Hatfield amendment—as it had been refined—would have demonstrated that we had learned something from past experience, and that we were determined to sever the military umbilical cord which fastens us so tightly to the Saigon government. It would have removed the gnawing suspicion that Vietnamization might be intended to promote a lingering, though lessened, American military presence in South Vietnam for the indefinite future. It would have guaranteed the withdrawal of all remaining American troops by setting a deadline beyond which they could not be retained without Congressional approval. It would thus have made certain that we would neither re-escalate our involvement in Vietnam, nor permit our engagement there to be transformed into another Korean-type garrison for American troops on the mainland of Asia.

Even though the amendment failed, it may point the way toward the finding of an acceptable legislative device that could lead, at last, to a reconciliation on the war. If we could find the formula for a political accommodation, joining the Congress and the Presidency together, in a common declaration of national purpose to achieve a full and complete military disengagement from Vietnam, then we could come out of this war on the basis of a broad, bipartisan consensus. The risk of dissension and recrimination at home in the aftermath of our withdrawal, concerning which President Nixon has rightly warned, would be reduced to a minimum.

Last, but not least, the few remaining feathers would be pulled off the well-plucked hawks, and the long, acrimonious debate over the misbegotten war could be drawn to a close.

## DEATH OF PRESIDENT NASSER OF EGYPT

Mr. STENNIS. Mr. President, I have just been advised, and I know Senators and their friends in the galleries will be interested to hear that the AP and UPI are carrying dispatches to the effect that Mr. Nasser of Egypt has just died. I hope that is not true. I hope it is not true for several reasons. A personal reason is for him, but as a whole I think as a leader of the Arab world since 1952 or 1953, his leadership has been superior to anyone who would have been in power. I never had more than one contact with him and that was when he came to power. He was thought to be a comer as a leader in the Arab world, which he certainly has proved to be. I hope that it does not mean upheaval and turmoil among those countries. I have reason to believe it will not. Certainly, it is a critical time, and I hope the people of Egypt will take time to select a leader.

I recall that our President is in that area of the world. Certainly, the situation over there is volatile and highly uncertain. I am sure that time will serve the people there in finding a way, and I hope those people will find a way for the proper kind of leadership.

Mr. GRIFFIN. I thank the Senator from Mississippi for bringing this matter to the attention of the Senate. Certainly, Mr. Nasser's death comes at a most unfortunate time—a time of crisis in the Middle East—a time when there is already too much instability in that area of the world. It is a most unfortunate turn of events. I trust and hope that calm will prevail, and that this event will not compound the difficulties which are so serious and so complex.

## STAR PRINT OF H.R. 17604, AN ACT AUTHORIZING CONSTRUCTION AT MILITARY INSTALLATIONS

Mr. STENNIS. Mr. President, H.R. 17604, an act authorizing construction at military installations, and for other purposes, was inadvertently reported from the Committee on Armed Services with numerous committee amendments rather than as a complete strikeout and substitute. It was the intention as reflected in the committee report, that the bill be reported as a complete strikeout.

I therefore ask unanimous consent that a star print be made of H.R. 17604 and that such print reflect a complete strikeout and an amendment in the nature of a substitute for the stricken material.

This is purely a matter of procedure and to meet a parliamentary situation.

The PRESIDING OFFICER. Is there objection to the request. The Chair hears none, and it is so ordered.

Mr. STENNIS. I thank the Chair.

## WARM RECEPTION GIVEN PRESIDENT NIXON IN ITALY

Mr. GRIFFIN. Mr. President, in the swirl of international events which move so rapidly these days. I believe one event that took place today should not go unnoticed.

As the President left the Vatican today after visiting with the Pope, he ordered his driver to take an unplanned, unscheduled tour into the city of Rome. Earlier today I received a report from the White House concerning this trip by the President—a report which was most encouraging. Despite earlier concerns about the kind of reception the President might have in Italy, it is noteworthy that the people of Rome greeted him in a way that was all but unprecedented. The UPI reports that it was the warmest reception given any American President since Dwight D. Eisenhower visited Rome in 1959.

I am told that thousands and thousands of people suddenly appeared on the streets, shouting words of greeting and affection to the President. He stopped the car at several points and got out and shook hands with people; and there was no hostility whatsoever. This is a very encouraging and heartening development—one that will not go unnoticed in the rest of the world.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. ALLEN. Mr. President, the distinguished Senator from Mississippi has called attention to the untimely death of Mr. Nasser and the upheaval that this may cause in the Arab world. As we in the Senate consider the advisability of amending a tried and true provision of our Constitution, I wonder if the distinguished Senator from Mississippi would

agree with the junior Senator from Alabama that one of the great strengths of the American system of government is the fact that the same Constitution which provides for our electoral college system of choosing our President and Vice President also provides for the orderly succession to the Presidency in the event of a vacancy in the office of President which is different from almost any other country in the world. For example, take Russia. If there were a vacancy in the highest office there, it might cause a revolution, whereas in America, under our Constitution, the change takes place instantly.

Is not that one of the great strengths of our Government and one of the great strengths of our Constitution?

Mr. STENNIS. Undoubtedly it is, and especially for the times in which we live. During events that have most unfortunately happened here in the last few years, we have seen that transfer of tremendous power occur automatically, and the verdict that had already been made accepted unanimously, one might say. Things moved without any interruption. I think it is one of the greatest possible tributes—and it impressed me at the time—to our system of government and its practical operation.

Mr. ALLEN. Just as we should take a long time to consider whether we should change the constitutional provision for a definite and orderly succession to the Presidency, should we not also take a long time to consider whether we should change the method of the election of the President and Vice President as it is done today?

Mr. STENNIS. The Senator speaks so well. Things may not look perfect on paper, and we do find flaws in our system, but if we go to setting it aside and entering into one that is untried, then we will reap the fruits of the whirlwind. The Sentor made a fine analogy between the situation overseas and our own blessing.

Mr. ALLEN. I thank the Senator.

Mr. STENNIS. Mr. President, I do not have at this time any greatly extended remarks on the pending subject, with which I am vitally concerned. I think there is a growing concern among the membership of this body with reference to the far-reaching, drastic proposal which is Senate Joint Resolution 1.

I want to refer first to page 5, line 4, thereof, and to these four lines, which I quote. This I underscore with emphasis:

If no pair of persons has such number—

Meaning 40 percent of the whole number of the votes—

a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons who received the highest number of votes.

Mr. President, I heard the remarks, a few minutes ago, of the Senator from Indiana, who, in all frankness and good faith, mentioned his lack of complete satisfaction with that provision, and that it would be possible to write into his proposal instead one of the alternative proposals that are now before us.

I told him before he left the floor, in a personal word or two, that under the old common law pleading, as used in England and still used in a few of our States, his remarks would be what we called in common law pleading a plea of confession and avoidance.

It is a wholesome thing to do. But here is a proviso, Mr. President, that even the author of it now has decided would fail to carry out the purpose, it would fail to be workable, it would probably cause great havoc and great stir, and no doubt cause great injury. That is the provision for the runoff election, which we have referred to as being one that seems to have no defender, but to elicit more and more concern on the part of Senators.

Whatever else may be said about other provisions of this proposal, this one in itself is enough to consign it to fatal treatment here. I make the additional point that to adopt this amendment, without more certainty and with nothing more definite about when the runoff shall be, how it shall be held, and something more binding and definite about it in the Constitution would be a great tragedy. It would leave Congress with the power, it is true, to make certain rules and regulations or laws with reference to the elections, but there would be nothing in the Constitution about it. It would be like making a vehicle with two wheels, and then leaving off the hind wheels and saying, "Somebody else can put these on later."

Congress, under all kinds of pressure, and in all the kinds of turmoil that could be generated by the failure of an election to choose someone, having to operate under the worst kind of conditions and the greatest of pressure, could very well change, and be urged to change, the rules in the middle of the game. It just shows, Mr. President, how vital this matter of electing a President and Vice President of the United States is. And that Vice President is highly important, as the Senator from Alabama has pointed out and as we have had occasion to learn, unfortunately, as lately as 1963, on the succession following the lamented passing of our late President, John F. Kennedy.

These are not just theories. They are dealing with practicalities of life, one of which is that nothing that happens under our system of Government is more important than the election of a President—and a Vice President—of the United States.

So what time has been spent here has been well spent. I have been in the Senate since 1948, when I voted for the first time on one of these plans, not to set aside our present system but to bring it into a more workable condition. That time, by the way, in 1948, the resolution was called the Lodge-Gassett amendment.

That amendment passed this body by a two-thirds vote plus one. That was 22 years ago. It did not pass the House of Representatives. But this very problem has been given a great deal of time and thought and attention since then, and most of those—not all, but most of those who have really wrestled with the subject and made a deep study of it—have been more and more convinced that what we need is some modification of our present system to bring it up to date, but certainly not an abrogation or setting aside or junking of it by just saying, "Heads I win, the majority will control," and vote through on that without regard to the States.

The amendment before us would pass off the matter of the States' responsibilities, or those of the voters to the State, and suggest solving the difficult problem of what is going to happen if the leading candidate does not receive more than 40 percent of the total popular vote by just saying, "We shall have a runoff election."

This matter needs further work, Mr. President, and I believe that to vote tomorrow, or during this session of Congress—until we recess, anyway—tomorrow or thereafter, under this pressure of time, in the few days remaining, will not bring about a sound plan, but that in time we will bring up one that is modern, safe, sound, and largely tested already, and it will do the job.

I emphasize again that we could not have had this underscored any better than by the remarks of the Senator from Alabama, when he referred to what apparently is the unfortunate situation in Egypt now, with the sudden passing of Mr. Nasser.

Mr. President, the provisions of Senate Joint Resolution 1, the so-called direct-election system of electing the President and Vice President would substitute the system given us by the framers of the Constitution and used all these years with a national plebiscite.

As we consider this question it is very important that we focus on the specific issue which we are to decide. The question is not whether our present system of electing the President and Vice President of the United States is perfect and without any flaws or defects. Rather, the question is whether the proponents of the direct election system can sustain the burden of proof of demonstrating that their proposed change would be better than our present system.

It is the system we would be changing with this resolution, Mr. President. It is not just parts of the system, or bringing matters up to date, but it is the sweeping aside, with one flash of the pen, of a complete system, and substituting another.

For reasons upon which I will elaborate, I believe that the supporters of this direct election system have failed to carry this burden of proof which the proponents of any change in our Constitution are duty-bound to bear. In fact, in my judgment, such serious questions have been raised as to the workability and the underlying philosophy of the direct election system that its rejection by the Senator would be proper.

I wish to say frankly what I think is the driving wedge on this matter. We are just afraid that we will have an election in which the winner would be uncertain for a time. Say that it would be thrown into the House of Representatives; honorable men though they are, I think it would be far better to let all of the elected representatives of the people in Congress, both Representatives and

Senators, have one vote each on that matter, and change it from each State having a single vote. That is the major change I would advocate. That is not the abandonment of a system, but it is a major change in our present system that I think would remedy, in a practical way, any difficulty which exists in our present system.

In considering this important matter, we should also remember that once a provision is inserted in the Constitution, it is very difficult to remove it. If we adopted a direct election system, and experience shows, as I believe it would, that its operation was detrimental to our political values and institutions, then the entire amending process of obtaining a two-thirds vote in each House of Congress and ratification of three-fourths of the States would be required. One of the witnesses who testified before the Judiciary Committee on Senate Joint Resolution 1 was Mr. Richard N. Goodwin, a former assistant to Presidents Kennedy and Johnson. Mr. Goodwin spoke of the points I have raised in the following language:

The American Constitution is the foundation of the oldest system of government in the Western World. One of the reasons for its stability has been our unwillingness to change it except when malfunctions had already occurred or abuses had become so manifest that there was widespread and continuing public demand. Today, we propose for the first time to amend the Constitution simply because we think something might go wrong at a future date. We will exchange a mechanism which is clumsy but has worked for an ideal construction of political theory whose consequences can't be foreseen. This, it seems to me, places a heavy burden of proof on the proponents of the measure. For it is difficult to predict the results of structural change in our democratic institutions. It is not enough to demonstrate that direct elections will probably be an improvement. It must be shown beyond all reasonable doubt that the adverse consequences which are predicted by many, including myself, will not occur. I do not believe that this burden of proof can be sustained.

At a later point in his testimony, Mr. Goodwin made the following statement which we would be wise to ponder:

If we were starting a new country we might well do things differently. In fact, the idea of an electoral college would probably never occur to us. But that is not our privilege. We are trying rather to continue and improve a system of government which lasted longer than any other in the history of the world. Times change, of course, and so must we. I myself believe we need radical changes in our social and economic policies. But when it comes to modifying the structure itself, the process by which change comes, then we can only afford to act when we are certain of improvement. The theoretical and remote chance of what at worst would be a rather minor malfunction does not warrant a change which might have large and unforeseen consequences. And once made, of course, there is no return. And of one thing we can be certain. Unless we are wiser than any generation that ever lived, the results of abolishing the electoral college will be different from what its advocates now honestly expect. Our history is strewn with the wreckage of democratic reform—such as the initiative, referendum, and recall—which not only defeated expectations but often turned out to benefit those interests which they were designed to protect against. It is this uncertainty, the consciousness of fallibility, that has restrained past generations from changing the mechanisms of government except in cases of obvious and urgent necessity. Hopefully it will also restrain us.

Mr. President, I do not always agree with the ideas expressed by Mr. Goodwin, but I think we would do well to heed the warning he has given us, and to remember that once a provision is inserted in the Constitution, it is very, very difficult to remove it. I have said that if we were really going to do this now and try out a popular election and are just bent on adopting an amendment, if the American people want that—and I do not believe they do—the only reasonable way to do it would be to say that we are going to try it for one election, and put a termination date on it that would apply only for that election. Then, if we could look it over and liked it, we could say it shall continue indefinitely. I certainly do not want to throw everything on a firm, final constitutional amendment, because I believe it would prove to be like loaded dice and would not work as the proponents hope.

The Honorable Nicholas De B. Katzenbach, former Attorney General of the United States, concluded his statement to the Judiciary Committee in the following manner:

And so, as I have said before, I strongly feel that on a matter so basic to the confidence and structure of the country, we ought not to abandon the familiar and workable for the new and untried without the clearest demonstration of need. In my judgment, no such demonstration has been made. We should not substitute untried democratic dogma for proven democratic experience and this is no time to tinker with success.

Mr. President, I agree with sentiments expressed by these gentlemen. Why should we abandon a system of electing the President and Vice President which has worked well for 182 years because we are told that something might go wrong with it in the future? And, in the name of reason and conscience, if we are to change or modify our system of electing the President and Vice President why should we substitute for it a system which is subject to many real and valid objections both as to the underlying philosophy and workability?

Among the cogent objections which have been made to the direct election system are that direct election of the President and Vice President would, first, destroy the two-party system and encourage the formation of a host of splinter parties.

I believe that is undoubtedly true. Among various geographical areas; among various ethnic groups; possibly—but we would certainly hope not—among various religious groups; among various economic groups; and among all kinds of groups, in this day of marching and demanding, many people would be led to believe that marching and clamoring long and loud would be the method to use. Others would be more astute, but many would believe that this was a new start and the opening of a door and that if they tried hard enough, they would make a showing. I think this proposal would open the door to just such a possibility and that it would be a grave problem, indeed, and would generate more problems as we held more elections.

Second, it would undermine the federal system by removing the States as States from the electoral process. "Undermine" is too mild a word. I think a stronger word is needed, in that it would absolutely take away, it would obliterate, the federal system in making this selection, which is the most important thing we do every 4 years. It is the most important process we go through in our entire system. The States, which were created for the balance, for the preservation of certain rights and responsibilities to the people, and for many other functions, would be absolutely left out and obliterated.

Third, it would create a strong likelihood of electoral fraud. That has been developed on the floor in this debate by Senators and by quotations from witnesses who were well versed in the matter from long years of observation in that field, and I will not seek to develop that further.

Fourth, it would lead to interminable electoral recounts and challenges. I think that is undoubtedly true. The whole matter then would be a national affair, a Federal affair, and all the complicated election problems that are presented throughout the Nation would be thrown into one hopper.

I recall that when I first came to the Senate, I was assigned to the recounting of some votes in an election contest, and I was very impressed with what a tremendous undertaking it would have been if the Rules Committee had had even one more contest.

Fifth. It would necessitate the national direction and control of every aspect of the electoral process. Let us not fool ourselves. If we are going to have a nationwide election and then the runoff, we are going to have to pile one bale of new Federal laws on top of another bale, and we will have innumerable codes of law and of regulations, and everything will be determined by Federal law, right down to the *n*th degree, as to how elections should be held and the ballots should be counted.

As a judge, I had to pass on several election contest cases that went into the vitals of holding an election, tabulating the returns, and every other little something that occurred. If we are going to have an election altogether Federal, nationwide, in the case of over 200 million people, all operated by the Federal Government—and that is what it will come to—rather than by the States and their subdivisions, we will be borrowing trouble that we do not deserve and, in my humble opinion, we will be creating an interminable mass of procedures and regulations that cannot be promptly followed and taken care of, thus causing confusion and, more than that, delay in determining the people's choice.

Mr. President, I believe that a strong case has been made that direct election would result in these unfortunate consequences.

Before discussing some of these unfortunate consequences of direct election, it should be emphasized that, in my opin-

ion, Senate Joint Resolution 1 is not a true reform of our electoral system. Instead, such a drastic revision in our method of electing the President and Vice President would accomplish radical change, not reform.

If we are interested in reforming our system of electing the President and Vice President, this can certainly be accomplished without abandoning part of our federal system, which would be the result of converting to a system of direct election.

If the problems of the so-called faithless elector and the contingent procedure for election of the House of Representatives are deemed to be defects of the present system, this can by cured by the adoption of the so-called Ervin-Katzenbach or automatic plan. The automatic plan would abolish the office of electors and award the electoral votes of each State to the candidate for President and Vice President who have received the most votes in the State. The automatic plan would also modify the contingent election procedure, which presently calls for the election to be made in the House with each State having one vote to a provision for the contingent election to be held in a joint session of Congress, with each Senator and Representative having one vote.

If there is concern about the winner-take-all feature of awarding the entire electoral vote of a State to the candidates who receive the most popular votes, this can be cured by the adoption of either the "proportional plan" or "district plan." Under the "proportional plan" we would retain our system of electoral votes, but each candidate for President and Vice President would be automatically awarded the proportion of the electoral vote of a State which he received of the total popular vote in that State. Under the "district plan," the legislature of each State would divide the State into a number of districts equal to the number of members in the House of Representatives from that State. Each voter would vote for three electors, one representing his district and the other two representing his State's two senatorial electors.

Personally, I consider the "winner-take-all" aspects of our present electoral college system to be one of its worst features. It gives the large, urbanized, heavily populated States with huge blocks of electoral votes an undue advantage over the smaller, less populated States. By way of contrast to the direct election proposal, the "automatic plan," "proportional plan," and the "district plan" have one important characteristic in common. They each retain the elements of federalism in the process of electing the President and Vice President which were written into the Constitution by the wise men who drafted it. To convert to a system of direct popular election, however, would represent a complete abandonment of those portions of our federal system which were embodied by the framers in our process of electing the highest officers in the land.

For this reason, among others, it seems to me that this radical revision in our electoral system is one of the worst changes that could be made.

Mr. President, before discussing some of the serious questions raised by the direct election system, there is one particular provision of Senate Joint Resolution 1 which deserves comment and analysis. That is the provision which states that candidates for President and Vice President can be elected with a 40-percent plurality of the national popular vote. It is, indeed, strange that although the stated purposes of Senate Joint Resolution 1 are to make the election of the President and Vice President more democratic and to apply the concept of "one person, one vote" to presidential elections, that provision is made that the President and Vice President can be elected with as little as a 40-percent plurality of the popular vote.

Mr. President, I strongly agree with the statements made and the minority views of Senators EASTLAND, MCCLELLAN, ERVIN, HRUSKA, FONG, and THURMOND in discussing this question. I believe it is one of the best written reports, even though it is a minority report, that I have read since I came to the Senate:

Moreover, we cannot but think it somewhat disingenuous to condemn the electoral college for being "undemocratic" while at the same time embracing a 40 percent requirement under direct election. For that figure, turned upside down, says that the man who is not the choice of 60 percent of the electorate shall be President. To this, proponents of direct election like to reply that under the present system, Presidents have been elected with less than a simple majority of the popular vote even while winning a majority of the electoral vote. What this argument fails to recognize is the essential difference between the size of a plurality and the manner of its composition. A 43 percent vote under direct election, for example (assuming it could be acquired), represents a very different kind of popular plurality from a 43 percent popular vote under the electoral college. The popular vote under the electoral college, even when it is less than a simple majority, is always widely dispersed geographically and ideologically and is distributed, moreover, throughout all the States. Thus, even when the winning percentage is less than a popular majority, it is still possible for the electoral vote majority winner to govern. Under the direct election scheme, which is indifferent to the way in which majorities are formed or where they are located, there is no guarantee that a winner will actually be able to govern.

Mr. President, if we ought to have a system of direct popular election of the President and Vice President, the requirement that the winning candidates have to attain only a 40-percent plurality of the national popular vote in order to avoid a runoff should be amended to provide that the winning candidate must receive no less than 50 percent of the vote in a first election in order to avoid a runoff. If the national total of raw popular votes is to be the sole determining factor in the election of the President and Vice President, then let us at least assure that the will of the majority of the voters is given effect. The will of the majority could be quite easily frustrated under the 40-percent plurality system.

Even if an amendment were adopted to change the 40-percent plurality standard for attaining election to a standard of 50 percent, I would still be opposed to the direct popular election system because of the objections above mentioned. I do believe, however, that if we are to have a system of direct popular election that it would be far better to require candidates to receive 50 percent of the votes rather than a mere 40-percent plurality.

Mr. President, one of my chief objections to Senate Joint Resolution 1 is that its addition to the Constitution would inevitably result in strict Federal control and supervision of presidential elections. Supervision and control under our present system is properly left to the States. State control and supervision of these elections is in perfect harmony with our system of federalism, the keystone of which is power and responsibility divided and apportioned between the Federal and State governments and the three branches of the Federal Government

My concerns about this important issue are expressed in the minority views of the report of the Judiciary Committee on this measure, as follows:

There is no question the rigid uniformity must be an integral part of the direct election proposal if the one-man, one-vote rule is to be truly implemented. If the President is to be popularly elected in a nationwide election, State boundaries and jurisdictions will become inconveniences. All States would, of necessity, have to conform their election laws to a single Federal standard.

Serious questions must be raised concerning the new election machinery and standards which must be created in order to have a smoothly-run national plebiscite.

Federal laws or guidelines would have to be enacted to regulate, among other things, the elegibility of parties and candidates; the counting of ballots and the declaration of the winner; the validating and counting of absentee ballots; the penalties and prohibitions applicable to elections; the rules concerning recounts; the forum for the consideration of contested elections; the registration deadlines and a host of related matters now covered by State laws. Indeed, it is possible to envision a Federal Election Board charged with total responsibility for running the election down to and including the staffing of 180,000 polling places.

Beyond the question of enacting Federal election legislation, the matter of financial responsibility for the plebiscite must be considered. At present each State bears its share of the cost of running elections. If, however, all other administrative aspects of the election are to be assumed by the National Government, it seems logical that the financial burden must also reside in Washington.

The meaning of such fundamental shifts in election responsibility must be considered when analyzing the merits of the direct election proposal. These are not simply administrative matters which can be brushed aside for later consideration.

The proponents of the direct election system seek to answer our concern of the probability of complete Federal control and supervision of presidential elections by assuring us that Senate Joint Resolution 1 only grants Congress a "reserve power" to enact legislation, and that the States are allowed to retain their primary authority in the conduct of presidential elections. Let us examine

this so-called reserve power that Senate Joint Resolution 1 would vest in Congress and see how innocent that power is. Section 2 of Senate Joint Resolution 1 provides that:

The electors of President and Vice President in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that for electors of President and Vice President, the legislature of any State may prescribe less restrictive residence qualifications and for electors of President and Vice President the Congress may establish uniform residence qualifications.

Section 4 provides that:

The times, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law, the time, place, and manner in which the results of such elections shall be ascertained and declared.

It can be seen that although the provisions of sections 2 and 4 seem to adhere to the principle of State control of elections, that vast power is vested in Congress at its pleasure to completely overturn State laws pertaining to residency qualifications for electors and the times, places, and manner of holding presidential elections and entitlement to inclusion on the ballot. Congress is granted the authority at any time after the adoption and ratification of this amendment to enact a complete body of general law dealing with these vital matters which had been thought to be properly left with the States. For example, the "times, places, and manner of holding such elections" would certainly encompass and include such Federal functions as determining the mode of voting, deciding who will count the votes, providing supervision to prevent fraud, and promulgating a system whereby the results of the balloting could be determined and publicly proclaimed.

This is the nature of the so-called reserve power which this proposed amendment would vest in the Congress.

The whole thrust of Senate Joint Resolution 1 is that the States should have no role in the election of the President and Vice President. Uniformity is the keystone of the direct election system. If all else is to yield to the slogan, one-person, one-vote in the election of the President and Vice President, then how can one justify the various States having different residency qualifications? How can one justify one State being permitted to impose a literacy test as a requirement for voting, while other States do not have such requirements? How can one justify a situation in which a voter of one State might be denied the privilege of voting for the candidates of his choice because they were not eligible for inclusion on the ballot under the laws of the State, while citizens of other States who wish to vote for these candidates are able to do so under more lenient State standards?

Obviously, none of these variations in State laws can be justified under the logic of "one-person, one-vote," the same logic which would underlie the adoption and ratification of the direct election system. Under all of these situations, the right of a citizen to vote, or to vote for the candidates of his choice, will be denied by operation of the differences of the various State laws. This difference in treatment can only be cured by the adoption of uniform Federal laws.

It cannot be accurately said that my concern about the inevitable Federal control and supervision of the processes of national elections is based only on the groundless fears of opponents of direct election. One of the strongest supporters of direct election is the distinguished junior Senator from Michigan. As a member of the Judiciary Committee and as a Senator, he has been most active and diligent during consideration of this matter. When Senate Joint Resolution 1 was considered by the Judiciary Committee, Senator GRIFFIN offered amendments to make sections 2 and 4 thereof read as follows:

The Congress shall prescribe the qualfications for electors of President and Vice President in each State and the District of Columbia, which qualifications shall be uniform throughout the United States.

The Congress shall prescribe, by provisions of law uniform throughout the United States, the days for such elections, the requirements for entitlement to inclusion on the ballot therein; the times, places, and manner of holding such elections shall be ascertained, certified and declared; and the manner in which and the period for which ballots cast in such elections shall be preserved.

These amendments were rejected by the Judiciary Committee. Senator GRIFFIN wrote some individual views on the necessity of federally imposed uniform standards relating to presidential elections. These individual views are found on pages 22 and 23 of the committee report.

I would like to quote from certain portions of the individual views of Senator GRIFFIN:

In addition to my reservations outlined in "Separate View" concerning the runoff election, I am concerned because Senate Joint Resolution 1 does not require that uniform election procedures and voter qualifications be established as part of the plan to elect the President by direct popular vote.

To make each vote cast for President anywhere in the United States equal to every other vote is a commendable goal. But it would make no sense under such a system to count the votes of 18-year-olds in some States, 19-year-olds in others, and 21-year-olds in yet others. Of course, the current attempt to lower the voting age to 18 by statute may provide a partial answer—if the statute is held to be constitutional by the Supreme Court.

Furthermore, it would be inconsistent and self-defeating to leave each State with jurisdiction, as Senate Joint Resolution 1 does, to determine which candidates for President will appear on the ballot and the circumstances under which ballots for President will be counted.

In light of the premise on which the direct popular vote is founded—that is, making every vote count—it is essential to guard against any device which would tend to dilute the vote of any individual or class of individuals. To leave each State with jurisdiction to determine voter qualifications and inclusion on the ballot would invite discredit on the claim that every citizen has an equal opportunity to participate in the election of the President.

Consequently, I believe Sections 2 and 4 of Senate Joint Resolution 1 should be amended in accordance with the amendments which I proposed in committee. The result of adopting such amendments will be to confirm the public expectation of equal participation in the selection of a President.

Mr. President, I do not agree with my friend from Michigan that the Federal Government should take over the State functions of holding elections and determining qualifications of voters, but I must agree with his logic in carrying the thrust of Senate Joint Resolution 1 to its logical conclusion.

My colleague from Mississippi raised this point in a speech he made on the floor on September 10. Senator GRIFFIN then made the following extremely important statement, the impact and purport of which should be understood by every Member of this body in considering this issue. I wish that everyone would heed the force and logic of the following statement made by Senator GRIFFIN, which is found on page 31149 of the CONGRESSIONAL RECORD of September 10, 1970:

Although the distinguished chairman and I do not reach the same conclusions concerning the merits of the pending resolution, I must say that I share his view that it will be necessary and logical if we are to elect the President by direct popular vote, for Congress to establish uniform voter qualifications and procedures for conducting such election. Indeed, I believe Congress would be derelict in its duty if it did not establish such uniform standards in connection with, or directly following, adoption of a constitutional amendment to elect the President by popular vote.

We may, and we do, differ in our conclusions as to whether such a development would be good for the country—but the logic is unassailable. Furthermore, I can agree that the people of the several States should realize, as we consider this popular vote amendment, that uniform voter qualifications and election procedures will be a necessary and logical result. No one should be fooled on that point.

Mr. President, I submit that this candid and forthright statement of the junior Senator from Michigan goes to the heart of this question. He does not equivocate; he does not beat around the bush. He comes to grips in a forthright manner with the proposition that the adoption of this proposed amendment to the Constitution would necessarily result in the complete and total Federal takeover of the procedures, processes, and machinery of conducting presidential elections.

He and I can disagree as to whether this would be good or bad for our system or federalism, but we can agree on the inevitable consequences of direct popular election.

Mr. President, in my judgment this is reason enough to oppose Senate Joint Resolution 1.

Mr. President, if we are to maintain our federal system of divided and shared

powers, it is, in my judgment, imperative that the Senate reject Senate Joint Resolution 1, the so-called 40-percent plurality system of direct popular election of the President and Vice President.

Under our present electoral college system of electing the President and Vice President, the voters as citizens of the several States play a decisive part in the process. That is to say, the winning strategy is to assemble a coalition of States sufficiently large to win a majority of electoral votes. As a result of this, the winning candidate is under a compulsion to make a broad-based appeal to all regions of the Nation. Consequently, the one thing which can be stated with confidence about the winner of a presidential election under our electoral college system is that his support is widely dispersed geographically.

Under a system of direct popular election, none of these desirable features of our presidential election contests would necessarily continue to exist. Indeed, the winning strategy might well be to attempt to amass huge pluralities in the few large urban States and override the aggregate losses in a large number of small States.

I think that this would be a very bad situation to be endured by our people.

It is certain that under a system of direct popular election the States as such would have absolutely no influence. All votes would be counted in one grand total. If the States and the voters as citizens of the several States are to count for nothing in the process of electing the President and Vice President, then drastic political and constitutional consequences would be the impact on State power and influence on the national political parties. A related issue is whether the States would continue to play a decisive part in the nominating procedures of party candidates for the Presidency and Vice-Presidency.

One of the distinctive features of the American party system is that our parties are essentially State dominated: the so-called national parties are, in fact, coalitions of State parties; and the State parties, in turn, are coalitions of county and local party organizations. The major parties are thus organized from the grassroots up—a feature which enables them to accommodate a wide diversity of competing interests at the State and local levels, and helps to keep elected officials responsive to State and local needs. What brings the hundreds, perhaps thousands of State and local party units together is the attempt, every 4 years, to capture the presidency. It is the role of the States as States in that process which accounts for the fact that our national parties are State based. And this structure of the parties reinforces the power of the States as members of the Union.

The most obvious symbol of a State orientation of the major parties is the national convention. Delegates come to the conventions as representatives of their States, and voting power is allocated in proportion to electoral vote strength. Direct election, of course, would destroy the basis of having delegates selected or votes distributed in this manner. There would be no reason whatsoever for the States as such to be represented; delegates would most likely represent ethnic, racial, and economic groups. But without the States to act as mediators of compromise, there would be no way to determine beforehand what groups should be represented or in what proportion. It is doubtful, indeed, whether there would be conventions at all under direct election. The logic of direct election leads inevitably toward presidential primaries, perhaps regional, but most likely national in scope. One can well imagine a series of regional primaries, and, thereafter, a series of national primaries preceding the first election—to which must be added the likelihood of a runoff election after that.

It is apparent that the role of the States in the electoral college contributes greatly to national stability; it also contributes greatly to the cohesion of State party organizations. Cohesion—or the lack of it—will depend on many other facts as well, such as the strength and appeal of State and National party leaders, the volatility of issues at any given time, and the strength of the opposition party. But the importance of cohesion in State party organizations is obvious. In most States, most of the time, a single party organization is able to coordinate presidential, gubernatorial, senatorial, congressional, and other campaigns, and can thus act as a mediator among the conflicting aims of politicians and interest groups. But once the States as States are removed from the presidential election process, a strong inducement toward State party cohesion will also be removed. We cannot with any confidence predict what new forms party organizations might assume; we can confidently predict, however, that a significant restructuring of State and hence national party organizations would take place. That restructuring, in turn, would alter in unforeseen ways the power of the States to carry on political business, especially in relation to the National Government. We simply do not know with any precision how much of a Governor's or a Senator's or a Congressman's power derives from his State's role in the electoral college. We may be certain, however, that it is often considerable, and that Presidents are influenced by it.

The Framers of the Constitution were very careful to provide a distribution of powers as between the State and National Governments and as between the three branches of the National Government. One of the cornerstones of this system of distributed powers, which we call federalism, was the means by which the President and Vice President of the United States were to be elected. The States were given a definite and meaningful role in this process by the framers. If one of the underpinnings of the system of federalism which has governed this Nation since its founding is to be disregarded in the name of the slogan of "one person-one vote," then where is the attack on federalism to stop?

It is extremely interesting to note that if this proposed amendment to the Constitution is adopted by Congress, it will be ratified in a manner greatly at variance with the concept of "one person-one vote." As we all know, the process of ratification requires that the State legislatures or the State conventions of three-fourths of the States must ratify any proposed amendment to the Constitution in order to make it effective. Thus, ratification of this or any other constitutional amendment can be defeated by 13 States.

If it should happen that these 13 States are Alaska, Delaware, Hawaii, Idaho, Montana, Nevada, New Hampshire, New Mexico, North Dakota, Rhode Island, South Dakota, Vermont, and Wyoming, the ratification of this constitutional amendment could be defeated by persons representing States containing only 4 percent of the citizens who voted in the 1968 presidential election. The voters in these 13 States cast an aggregate total of approximately 3,053,000 votes out of a national total of approximately 73,-178,000.

If the principle of one-person, one-vote is to overrule our federal system insofar as it relates to the election of the President and Vice President, then there is a much more logical method of ratifying constitutional amendments. After an amendment has been proposed by Congress it should be placed on a ballot to be voted on in a national referendum. If more people voted in favor of ratification than voted against ratification, then the amendment would be adopted into the Constitution. This procedure certainly comports with the idea of one-person, one-vote much more than the present system of ratification.

And then, of course, we have the matter of equal representation by the States in the Senate. The fact that each State has two Senators, regardless of population, is certainly an affront to the concept of "one person-one vote." Even though the framers of the Constitution stipulated that the provision calling for equal representation in the Senate would be the only existing provision of the Constitution which could not be amended except by the consent of every State, I have no doubt in the light of decisions of the Supreme Court of the United States within the last 20 years that we could amend the unamendable.

Many of the proponents of the direct election system protest that they are stanch friends of the federal system and that they support the idea of equal representation in the Senate and our present ratification procedures. I do not doubt their sincerity, but I cannot understand their logic. Certainly, the framers did not think that equality of representation in the Senate or the method of ratification of constitutional amendments would be a sufficient support of the system of federalism. That is why they decided to give the States a role in the selection of Presidents, a role that has been reinforced by our federally structured political parties. We should understand that the federal principle was incorporated within the Presidency itself, by the involvement of the States in the presidential election process. The result is a finely counterbalanced structure which, in the words of Prof. Alexander Bickel:

> Cures the inevitable under-representation of the large States in Congress, while at the same time requiring a sectional distribution of the vote that elects the President, thus

making possible combinations that also give advantage to the smaller States. This is just a long way of saying that the genius of the present system is the genius of a popular democracy organized on the federal principle.

Mr. President, a vital part of our tradition of federalism is the feeling on the part of our people that they are citizens of two great political communities: The United States of America and the State wherein they reside. This concept of dual citizenship is at the core of the idea of federalism. A number of witnesses who testified before the Judiciary Committee expressed a grave concern that one aspect of the adoption of this proposed constitutional amendment would be to weaken or destroy this concept of dual citizenship.

For instance, Mr. Theodore H. White gave the following testimony:

Finally, in politics, I believe there are things that are more important than statistics and vote counting. There are communities. We live in a world of communities which have been balanced and put together by our federalized American system. I believe it is good and right that when somebody goes to the polls in Boston, Mass., he feels he is doing something about the Massachusetts vote, and when the Tar Heel from North Carolina goes to the polls he feels he is doing something for North Carolina. I would not want to strip this sense of identity from the great historic communities of the United States of America in which each man feels he has a role to play in the larger role of his community for a role which makes him just one more digit, one of those electronic figures that will come cascading in at 70 to 80 million votes in a 6-hour period some November night in which he has no identity whatsoever.

Mr. Richard Goodwin also touched on this problem:

Now it is true that they are smaller, and I think that it all depends upon whether you view the United States as a sort of one homogeneous group of people randomly dispersed across the country or as a continent which shelters diverse people with very different ways of living. If you count people instead of describe them, the citizens of Ohio, or Montana are not very important. But they may be important for other reasons; as to who they are, for their way of life, and for the land they occupy.

The electoral college, along with the Senate, is one of the few mechanisms we have to influence those at the center of affairs to visit outlying citizens, so as to learn about them and pay some attention. It is a very weak instrument for such a purpose. But there is something to me about blotting out State lines and counting us as one undifferentiated mass—like so many grains of wheat—that really does belong to the age of television and public relations.

Mr. President, I firmly believe that it is absolutely necessary that we do nothing to weaken the power of the several States under our system of government. We have, in my judgment, all too often witnessed the spectacle of concentration of power in the Federal Government in Washington and the erosion of the power of the States. The trend in the last 20 years has been to exalt the power of the Federal Government and debase the power of the States. I have resisted this trend and will continue to do so. History tells us that such a process leads to anarchy or tyranny.

The fact that the adoption of this proposed amendment would constitute an affront on our system of federalism affords a substantial basis for opposing the adoption of Senate Joint Resolution 1.

Mr. President, another aspect of the system of direct election of the President and Vice President that should be carefully examined by the Senate is the real possibility that such a system would lend itself to include fraud and irregularities in the voting processes. A related factor is the real danger that the adoption of the direct election system would increase the probabilities of recounts and contested elections.

I think we would all agree that any of these prospects is horrifying. They should certainly be avoided at all costs.

The proponents of this measure assure us that our fears are groundless and that there will be no greater likelihood of fraud, recounts, or contested elections under the direct election system than there is under the present system. I do not question the good faith of these assurances, but I do question their validity.

In considering this issue, the Senate should carefully study the testimony of some of the witnesses who appeared before the Judiciary Committee at the hearings on Senate Joint Resolution 1. For instance, Mr. Theodore H. White, an acknowledged authority on presidential elections had this to say to the Judiciary Committee:

I want to approach the problem in the most sordid way and not in the high minded manner you gentlemen have been speaking in. I want to talk of crooks in elections.

I believe that you cannot steal in any State of the Union more than 1 percent of the vote, but when elections get hot, votes are stolen. I would wonder whether the Senator from Indiana completely trusts the county of Lake County, out of Gary.

I know that in my own town of New York last year we canceled an election, a very minor election for the Democratic nomination for the presidency of a borough because there were 1,000 irregularities in those machines and a slight margin of 100 votes between them, so we called that election off and we ran it over.

I wonder here whether anybody trusts the vote in Duval County, or remembers the 87 votes of the 1948 election which made Lyndon Johnson Senator.

I could go right around the Union to Philadelphia, to Kanawha County, to South Boston, and wonder whether we really want to trust the election of Presidents to a direct pool of votes where the arts and skills of these few people who do steal votes are magnified.

Right now, what you have in the country is a system of self-sealing containers. Again, I speak the language of the press. If the crooks in Illinois, if the crooks in Cook County are going to steal votes and the crooks in upstate Illinois are going to steal votes, each State has built up some sort of antibody system so that it seals the theft, the stealing, the rigging of elections.

Mr. Ernest J. Brown, professor of law, University of Pennsylvania spoke of the possibility to recount and contest elections under a system of direct popular election in the following language:

Twice in the last three elections, we have had a very close vote. We have not known the result of the popular vote for weeks, literally. And it is rather important in today's world that the result be known and not wait until absentee ballots from overseas posts filter in for counting. So just as the matter of knowing the results quickly—and this is not idle curiosity; the world waits while the U.S. President is chosen. The United States waits, too.

Senator Ervin then commented: "The whole country, in a sense, I have noticed in presidential election years tends to stand still for a few months.

Mr. Brown replied: "That is right. We all remember that one of the things that the division into State segments, of course, lets us know simply that the distribution is such that though the aggregate popular vote may be very close, no State may be close, so that we know the result while we are still waiting over weeks to find out what the aggregate popular vote was.

So that in itself is a significant fact. But more significant is the fact that close elections—and as I say, we have had two out of the last three in popular vote terms—close elections lead to contests. And with direct popular election, the contest would be nationwide. Every ballot box, every voting machine would be subject to contest.

* * * * *

If one candidate contests a certain area, his opponent, to protect himself, warns of a contest where he thinks something might have been adverse to him. And in a little while, the whole electorate is involved.

We have seen State contests in recent years that have paralyzed State governments. And we had one contest in 1876. Without going into detail, I think the mere fact of contest is a disaster.

Then how would it be conducted? Who would conduct it? I think it would be a misfortune to throw the Federal judiciary into this. But if it were a court, there is no court that would have nationwide jurisdiction other than the Supreme Court. And if I may put it that way, heaven preserve us from throwing the Supreme Court into that arena.

Congress, I suspect, would supervise the contest. I do not think that would be very happy, either. But bear in mind, too, it would be the outgoing Congress, because the incoming Congress would not have taken office. And the outgoing Congress might have been greatly changed—we might put it in terms of repudiated—at that same election.

I continue to quote from Mr. Brown:

There is no guarantee against election contests. We can have them under the present system, we can have them under any. But the present system insulates the States. When the vote is counted by States, those lines insulate the area of contest and keep it local, and they insulate the significance of contest. It has happened more than once that there might well have been contests in a given State in an election where the aggregate popular vote was quite close. But generally, the electoral majority is somewhat greater in percentage terms than the popular majority. And so a switch of a State or two would not make the difference. So those contests did not materialize. I am not gifted either with prophecy or what might have been hindsight. But I think there are very good chances that under direct popular election, we would have had damaging contests in both 1960 and 1968. We did not have them, very fortunately.

Mr. Charles Black, professor of law at Yale Law School addressed himself to the problems of recounts and contested elections under a system of direct popular election of President and Vice President. His testimony deserves the careful consideration of the Senate. He and Senator HRUSKA discussed this problem. Professor Black began by stating:

I am appalled, as Professor Brown is, by the prospect of recounts. We have now a

compartmentalization of the recount problem, like the compartmentalization of a ship. If it springs a leak in one part, that part is sealed off from the others. The recount problem is of infrequent incidence, because very often the State in which fraud is charged or error is charged will be one which, on inspection of the electoral totals, does not matter anyway. Sometimes, though there may have been irregularities, though these may be plausibly charged, the vote will be so one sided in a State that a recount could not conceivably change the outcome as to that State, and it would still be carried by the person who seems to carry it. In a close election—and I do not care what you mean by close—if it is the difference between 39.99 percent and 40 percent, which is made so critical in any of these proposals—you have to recount every vote in every precinct, not only for the two leading candidates, but for all the others, and be absolutely certain that it was done right. All sorts of things about the propriety of write-ins would become immensely important.

Senator HRUSKA then commented:

Professor, in regard to recounts, it has been testified here that, if any recount is requested, it would tend to trigger and generate and originate additional recounts. After all, if Ohio has a recount, for example, that will lead Illinois to have one. If Illinois asks for a recount, Pennsylvania will do it, and New York. Do you see any possibility of that occurring where there is a close election in which a candidate receives 39.9 percent of the popular vote?

Mr. Black replied:

I fail to see how it could not occur. It seems to me it would be virtually the duty of the managers of a campaign to search everywhere in a close election. If a recount occurs in one place, even though, let's say, Texas has been carried two to one by one candidate, the votes in Duval County, Tex., will still be important to set off against the votes in Illinois or Vermont. I would think, for reasons on which, of course, Professor Brown is far more expert than I am, it would be almost inevitable that this would happen. So it would seem to me.

I would think that not only would this happen as a response to recount, but that the losing candidate in a very close election would almost be driven to look for a recount. We know that the counting is not all that accurate. We now concentrate on the areas where it matters, which are likely to be few, maybe none, under the present system.

But if there is a 100,000-vote difference nationwide or if it should happen under the Tydings proposal, which I have just seen today, that the crucial question was whether the man had 39.99 percent or 40 percent of the votes, then I should think it would be inevitable that a recount would be requested.

Mr. Black continued:

But even granting good faith, I think it would become the duty of the manager of anybody's campaign that might be advantaged by a recount to search very carefully, in good faith, for fraud, irregularity, and the sort of technical objections to voting that you refer to, so that even without this willful obstruction element, I should think that in a close election, it would be almost inevitable that the vote everywhere would be scrutinized and contested, and every possible irregularity sought after, whereas, under the present system, it usually does not matter and people just do not bother with it.

Senator HRUSKA asked:

Is it not a fact, however, that under the present system, compartmentalized as it is among the several States, that probability would be reduced and held to a minimum?

Mr. Black replied:

It is.

Senator HRUSKA commented:

Certainly, if we judge by past experience, it has been held to a minimum.

Mr. Black continued:

It is held to a minimum, I think for the obvious reason that it just really does not matter. In most cases, it will not make a difference whether there are 400 or 500 irregular votes in Austin, Tex. Either the Texas electoral vote will not be needed because it will not make a critical difference, or the 500 votes in Austin will not affect the Texas electoral vote because the popular vote is so lopsided in Texas. In either of those cases, there is no occasion for contest or recount.

Our system does, by this compartmentalization, reduce it to a minimum. Also, when it has to happen, it happens on a much reduced scale.

I tremble to think how hard it would be to decide who won in as close an election as 1960 and 1968. I doubt that anyone will finally be satisfied who the winner was. I doubt that the meter really reads that fine, if you scrutinize carefully every single vote, and I again suggest that, even without bad faith, it would really be the duty of those in charge of a campaign to see that this is done.

Hon. Wade O. Martin, Jr., secretary of state of the State of Louisiana, was a witness before the Judiciary Committee who brought with him more than 25 years' experience as the chief election officer of one of our States. He spoke of some of the practical problems that would be caused by the inevitable Federal control and supervision of the election processes as a result of the direct election system. Mr. Martin testified as follows:

You will realize, of course, at the outset when you try to envision this most important machine in our American system of government, that over the years timetables have been established that are as close as they can possibly be. Candidates don't want to campaign too long between elections—the first primary, the second primary, or the general election. They don't want too much time to lapse unnecessarily between the time they qualify and are voted upon by the public. Envision this machine as a very delicate one—one that must be operated by people; linotype setters; mechanics who set voting machines; commissioners who conduct the elections; election officials who, on the day of election, compute, promulgate, and publish the returns. Under our present system sufficient time must be allowed for election protests in the courts. All of these functions in this intricate machine function in such a way that any change in one phase of it must be carefully considered as to its ultimate effect on the other parts of the machine.

* * * * *

These are all practical things. I cannot impress upon you too greatly the fact that any additional work to be performed by those who prepare the ballots, and any additional candidates who might be indirectly brought into the ballots, will all reflect themselves when you get to the precinct. I will go a little further than some who have said that the adoption of a direct vote system will create chaos. I agree with that; there is no question about it. We are practically in that situation in our State at the present time.

I will state further that if great precautions are not taken, which I hardly see can be taken, we will gradually go from a condition of chaos to one of disruption, and eventual destruction of our entire election machinery.

Now, let me get to some specifics. Let's begin with the matter of who can vote. I was very impressed by a statement I read by Senator Ervin, in which he expresses great concern about the fact that dual laws, Federal and State, applicable at the same time, in the same election, might cause great consternation and confusion among the citizens. That is true.

Let me say further that these dual laws could well make it impossible for those preparing ballots to perform that function satisfactorily if great care is not exercised.

Take the matter at present, for instance, of who can vote. This is where we start an election. Who is qualified to vote?

Today, in Louisiana, we have registration of voters, as do many States. I believe that if you go to any change whatsoever, every State will need some kind of registration to predetermine the eligibilty of a person to vote in order that the list can be sent to the precincts. This would prevent bands of people taking a jet plane to vote in many states without proper identification.

We have these individuals who are in charge of registering people to vote. At the present time, we, in Louisiana, have a limited special registration to vote in the presidential elections. As you gentlemen well know, there is some pressure in Congress to enact a Federal law to allow people to vote in any State in presidential elections regardless of the length of time of residence. We have that law in Louisiana. So this is one special list, and this is a separate ballot already. By virtue of the Voting Rights Act of 1965, we have Federal registrars who register people to vote in the State. That is a second list.

* * * * *

Well, the great problem that necessarily follows is this. You do not only have separate lists to send the commissioners (which imposes upon them), but you must have special preparations in advance; special ballots, if they are paper; special ballot boxes in which to put them; special tabulators to tabulate them separately from the others; and if you have voting machines, you begin to crowd the capacity of the voting machine.

Now, let me dwell just a little on that. This may sound involved, but it is something that we must face, and I hope it will be well understood by everyone who is considering this.

Every time you overload anything, whether it is a plane, an automobile or an election machine, you make it susceptible to failure and attack in the courts.

* * * * *

After we decide who can vote, let us decide who can be candidates and what happens there in the practical application of the election laws. As this resolution is drawn, any two people can consent to combine themselves and agree that they can be voted upon as a unit for President and Vice President. Now, there is nothing in the resolution that I have been able to find that says where you qualify, with whom, and what the qualifications are. How do you get on the ballot? True enough, it says that the states shall attend to this matter, but it also says in this proposed constitutional amendment that Congress shall reserve the right to enact its own regulations on that subject. There again you face the possibility of a dual system, and this has to be resolved before any such system is sent to the States. Otherwise, you will be in serious trouble much sooner than you believe.

Gentlemen, there was not a presidential election in the last few years when we haven't received a stack of applications a foot or two high to get on the Louisiana ballot.

We know how to prepare the ballot, as it is now, because we know that we will have two slates of electors, one from each of the major parties. We probably will have one from the minor party, and we may by chance

(although it is very seldom that it ever happens), have a slate of 10 candidates for presidential electors who will seek to get on the ballot in accordance with our law, which provides that if you get on the ballot, you must have petitions of qualified electors, numbering 1,000 from each of the eight congressional districts for one elector, and also two 1,000-signature petitions for the two to be elected at-large.

Perhaps some of the liberals might think this is too restrictive and too difficult, but, if you liberalize this, there will be no room on these ballots. They will be so large that they will be unusable in the machines. You couldn't possibly afford to buy enough machines to prepare the ballot, and, if you do succeed in that financial hurdle, you will never have enough time for people to vote intelligently.

* * * * *

Now, let's go to another question, the rules for compilation of returns.

In the matter of conducting the election and the times for opening the polls, and such things as that, the States are given the authority to do it and to set the qualifications of candidates. By reserving the right in the constitutional amendment, Congress has the authority to do it; and, if they have, they probably will. Not only is this bad, but when you come to compiling the returns and certifying the results of the election, there is no discretion at all in the States. In this constitutional amendment that prerogative, in this resolution, is reserved to the Congress.

Now you are putting another burden on the election officials in every State. You are having again to establish some way by which no State election officials count, tabulate, or do anything with the returns of the election for President and Vice President if Congress shall prescribe those rules and regulations. That will be separate from what you do in the State, and at present we don't know what that will be. I don't think anybody in Congress has given too much thought about how this would work either, but if Congress is undertaking to do it on the same day, in the same election as the States, it becomes quite involved. You might have a separate election which, of course, is possible, but let's not go into these complications.

Mr. President, one of the witnesses who testified before the Judiciary Committee, Mr. Mathew Beemsterboer, a practicing lawyer of the State of Illinois, has had a great deal of experience in handling election contests and recounts in the courts of that State. He made the following pertinent remarks about the possibility of a system of direct election resulting in recounts and election contests. I quote from Mr. Beemsterboer's statement as follows:

Perhaps one of the most important factors in evaluating our present method of electing the President and Vice President, and either of the two alternatives previously commented upon and any other proposed reform, would be the potential effects of recounts, election contests and allegations of fraud or other irregularities or alleged invalidity of an election nationwide, statewide, in a congressional district or at any other level.

In my home state of Illinois, in the 1960 presidential election, the successful candidate received approximately one vote per precinct more than the unsuccessful candidate. In the State of Texas, I understand the difference in popular vote was close but not quite so close. In the event that the popular vote had been reversed in those two states and one other state with a similar number of electoral votes, a different President would have been elected. To my knowledge no proceedings were instituted to contest the result of the election in the two states specifically mentioned or in any other state. Indeed in Illinois, there is some doubt whether our general election law specifically contemplates the contest of the election of presidential electors although Section 23-19 of Chapter 46, Illinois Revised Statutes (1969) does contemplate the election of any person declared elected to any office other than certain enumerated offices may be contested by any elector of the state in a proceedings in our state Circuit Court and this could be construed as encompassing a presidential elector.

If my remarks are to be of any use to the Committee, I might best comment upon election contest procedures with which I am familiar and the difficulties which such procedures could create under the present system and might create under several of the proposed alternatives. My experience as a practicing attorney in Cook County, Illinois, has involved me in several hundred separate matters of election litigation. These matters have been concerned with almost every stage of the electoral process in Illinois, and have been litigated in our trial courts, intermediate appellate courts, the Supreme Court of the State of Illinois, our United States District Courts, the United States Court of Appeals and the United States Supreme Court. On the basis of that experience, and my experience as a special counsel for various election authorities and the supervision of investigation into alleged voting irregularities, and representing those election authorities in various courts, I feel I might possibly be able to provide the Committee with an educated guess as to any relative degree of uncertainty which might be injected into our present process of selecting the President and Vice President of the United States, and under several of the proposed alternatives.

Under the present system, unless there existed a small difference in popular vote between the candidates in one or each of several of our states, an election contest would make very little sense. If in the 1960 presidential election, a reversal of the results in the State of Illinois would have affected the outcome of the electoral vote nationwide, a contest, either under a provision of the Illinois Election Code, or in some procedure created by the Federal Judiciary, might have occurred. The unsuccessful candidate would have alleged frauds, irregularities, or improprieties in precincts wherein he had been badly defeated, and as measure of self protection, the successful candidate would have made similar allegations in precincts where he had lost by substantial margin. Whether any meaningful resolution of those difficulties could have occurred even after numerous appeals had been taken from trial court deliberations in both state and federal courts, prior to the time specified by the Constitution for the meeting of the electoral college and the swearing in of the new President and Vice President is a matter of some doubt.

Even more mischief might potentially result under a completely popular system of selecting the President and Vice President. Under such a procedure it would make very little difference whether the candidate had won or lost Illinois, or any other state, if the total popular vote was close. Then a change of ten votes in a precinct in Alaska or Illinois or anywhere, and fifty here and a hundred there might affect the outcome. The apparently successful candidate, as a matter of protection would have to ask for recounts or election contests in other precincts. The multiplicity of litigation resulting from innumerable contests in every area of the fifty states might result in the incumbents remaining in office considerably past their normal retirement date.

The least amount of mischief, delay, doubt and frustration would probably occur in the event that an electoral system were retained, but that each congressional district would receive one electoral vote and each state at large could receive two electoral votes. Without sacrificing the right of any citizen to contest the results of the election of a presidential elector in either his congressional district or state, it would appear that a contest would result only if the electoral vote were very close and then only in those congressional districts or state where the popular vote were very close. Such a system would be more truly popular, or democratic, than the present system of selecting the President and Vice President, and would result in a more easily determinable, final and acceptable result than either the present system with its perils or a direct popular election. Superimposed upon that proposal might be an abolition of the present requirement of an absolute majority of the electoral vote, and a provision that in the event of an absolute tie, that each member of the House of Representatives have one vote in breaking any such tie, rather than one vote per state.

A subsidiary question suggests itself. Under the present system of selecting the President and Vice President of the United States, or under any of the proposed alternatives, would it be necessary to abandon our present system of state and local control of the conduct of elections either for Presidential electors or directly for the Presidency and Vice Presidency in favor of federal control? I have regrettably had bitter experience with the intervention of the United States District Court in the election contest procedure. Worse yet has been my experience with having the same election being contested at the same time in both the state and the federal courts wherein the parties have been identical, the issues have been identical, but the outcome of the litigation has been different. What little meaning that has heretofore remained to the Tenth Amendment of the Constitution of the United States of America, is becoming almost completely emasculated by the activities of Federal Courts in many instances unjustifiably interferring with the state and local control of elections by utilizing a strained construction of various federal constitutional guarantees and utilizing the broad powers granted by Federal voting and civil rights legislation. Lest I not be misunderstood, I do not quarrel with the exercise of jurisdiction by the Federal Courts in situations where no remedy is provided by state law for deprivations of federal rights or in areas where the state courts refused to fully and fairly adjudicate the alleged deprivation of those federal or indeed state guaranteed rights. What I do object to is the almost total abolition of the established concepts of abstention and comity on the part of the Federal Courts in some instances and a tendency to escape from established principles such as res adjudicata by imaging trivial differences in parties or issues.

To me, at least, it would appear unwise to have federal control of even presidential elections. Several practical considerations militate against federal control. Unless presidential elections were conducted at a time other than elections for other national and/or State offices, the same registration procedures, the same polling places, the same judges of election, the same ballots, the same voting machines and other equipment would be used for all offices concerned. Economics would indicate that separate elections not be conducted. Could we tolerate a system where what was legal in the election of the President and Vice President was illegal in the state election and vice versa? What if contests and state offices were involved? Could the same ballots and the same voting machines be impounded by both the state and the federal judiciary and the same ballot be considered valid by one court and invalid by an-

other court? Could the integrity of the ballots and the voting machines be safeguarded if one examination were conducted by one court and another by another court? Unless we are prepared to conduct completely separate elections at different times, or unless we are to have federal control of state elections as well, consideration of economics, time and practicality would militate against federal conduct of a presidential election.

Mr. President, I believe that this testimony of eminent witnesses who appeared before the Judiciary Committee should cause us to seriously examine the assurances given us by proponents of this measure that its adoption and ratification will not cause problems of voting fraud, recounts, and contested elections. I am convinced that such problems would be caused by a system of direct popular election, and that this is sufficient reason to oppose the adoption of Senate Journal Resolution 1 as a part of the Constitution.

Mr. President, in my judgment, the fact that the adoption of a system of direct election for the President and Vice President would necessitate strict Federal control and supervision of the election processes, which are now supervised and controlled by the several States, is a compelling reason to oppose the adoption of this proposed Constitutional amendment.

Mr. President, I repeat for emphasis, I think it would be a tragic error if we were to abandon and throw into the trash can, so to speak, the system which has worked almost perfectly for 182 years. I agree that it should be brought up to date and modified. One of the major changes I should like to see would be, if there is a failure in the immediate selection under our system, and the election is thrown into the Congress, where every Member of Congress, House and Senate, would promptly act to select from the top candidates, with each Member of Congress having one vote, there would be an automatic standby electoral college system with every congressional district in the Nation represented, and every State in the Nation represented by the two votes cast by the two Senators. Something of that kind, almost like that, has been tried and tested. It has stood the test of time. Let us not proceed in such a hurry on a vital matter such as this. We lack time to pass on appropriation and other bills which are vital to the operation of our Government from day to day. The work and study which has been given to this subject has been timely and it would be fruitful. I trust that we will not put aside our patience here and forget what we are dealing with, saying, "Well, we have got to pass something here. I will vote for something here and then we can get on home." I believe that would be the opposite to any basic desire we might have as Senators.

I believe that the final verdict at this session will be against adopting a new system but to provide for further study on our own with modifications.

Mr. FONG. Mr. President, will the Senator from Mississippi yield?

Mr. STENNIS. I yield.

Mr. FONG. I thank the distinguished Senator from Mississippi for yielding to me.

I want to commend him for the very excellent and all-inclusive statement which he has just made. I fully agree with him. As he has said, I believe that we should not do away with something that has stood our country in good stead for 186 years. I agree with the distinguished Senator from Mississippi that there are certain defects in the electoral college system but these we can easily correct by amendment. Our electoral college system is something which has stood us in good stead for 186 years and has given us a sound and stable government. I do not believe that we should abandon it but amend the things which are defective.

Mr. STENNIS. I thank the Senator from Hawaii very much. I have benefited greatly from a study of the forceful words which the Senator from Hawaii (Mr. FONG) has used in former speeches, and the very fine points he included in the minority report.

The Senator from Hawaii represents a small State. But he is standing up strong, in the finest kind of way, for his great State of Hawaii.

Whether it be a small State, or a small group, whatever name we call it, they get recognition under our system of government, and I am very glad that they do. They also get recognition from those who are elected President and Vice President. I hope that it will continue to be that way; otherwise small States and small groups might get left out and soon be forgotten.

Mr. FONG. Mr. President, our system is a system which encourages, and even requires, accommodation and compromise. Our electoral system in order to obtain a winning plurality based on a joinder of minorities does that very thing—It forces accommodation and compromise and moderation in these troubled times.

Mr. STENNIS. Mr. President, I thank the Senator from Hawaii. I yield the floor.

### DIRECT ELECTION WOULD VITIATE ROLE OF MINORITIES IN PRESIDENTIAL RACE

Mr. FONG. Mr. President, on Wednesday, September 16, I spoke at great length to show the emasculating effect direct election of the President and Vice President would have on small States—such as my State of Hawaii and the 30-odd other "small" States. I analyzed the actual votes cast in the 1960 and 1968 presidential elections. The figures showed that small States under direct election lose as much as 91 percent of their present voting strength.

Today I rise to oppose Senate Joint Resolution 1 on behalf of all minorities, be they small States with a minority of voters, or geographic, ethnic, religious, economic or social minorities, wherever they find themselves in our great country.

Senate Joint Resolution 1 would substitute direct popular election of the President for our present electoral system. The adverse effect this amendment, if enacted, would have on minorities is something very personal and close to my heart.

My State of Hawaii, admitted to this Union of sovereign States only 11 years ago, struggled for 60 long, long years for that glorious day in 1959, when it joined the Nation as the 50th State.

Many, many people in Hawaii had worked hard and persevered despite the setbacks, delays and disappointments, decade after decade, which blocked Hawaii's bid for statehood.

As a legislator in the Hawaii Territorial House of Representatives, where I was vice speaker for 4 years and speaker for 6, and as vice president of the 1950 Hawaii statehood constitutional convention, I was an ardent advocate of statehood and, with my fellow citizens, toiled to make statehood a reality. The sweat and labor and tears of many, many people of our islands and of our many friends on the mainland went into the struggle for statehood. Finally, our small island territory in the mid-Pacific became a State.

Hawaii is a "minority" State—in many ways.

In terms of race, Hawaii is a State of minority ethnic people.

People whose racial ancestry is Japanese; Caucasian, which includes Portuguese, Spanish and Puerto Rican; pure Hawaiian and part Hawaiian; Filipino; Chinese; Samoan; Korean; Negro; American Indian and others live harmoniously in Hawaii, making our State a true mixture of peoples. And every race is a minority.

In terms of population, Hawaii is a minority State. Preliminary tallies of the 1970 census show we are now "home" to about 800,000 people. In the entire United States, that same census shows there are more than 200 million people.

Hawaii's population is an infinitesimal percentage of America's total population—or four-tenths of 1 percent. We do not even approach one-half of 1 percent of the total U.S. population.

In terms of geography, Hawaii is all by itself.

No other State is an island State—separated by a vast body of water from our sister States.

No other State is so far from our Capital—5,000 miles. Even Alaska, our only other noncontiguous State, is closer, being 3,400 miles from Washington.

We are truly a minority State.

As the representative of so many minorities, I am very conscious of the demeaning effect of Senate Joint Resolution 1 on every minority.

I have been the senior Senator from this minority State since it was admitted to statehood in 1959. During all these years, I have done my very best to preserve the voice in these United States that hard-won statehood achieved for Hawaii. Naturally, in analyzing the direct popular election proposal, I have been very concerned about its adverse impact on Hawaii's voting strength for President. As I showed in my address to my colleagues on September 16, even when Hawaii supported the winning candidate for President, President Kennedy, direct election of the President based on actual votes cast in that election would have resulted in Hawaii's

losing as much as 76 percent of her voting strength.

Not to speak out in opposition to these dire results to my State of Hawaii, as well as to all other small States, would be a betrayal of the hopes and aspirations of the people of Hawaii and of all that I have fought and labored for during my lifetime.

Under the present electoral system, a candidate knows that in order for him to be elected he must look to the States for electoral votes. Richard Goodwin, who was a writer for both Presidents Kennedy and Johnson and was closely involved in several presidential campaigns, recognized the need to look to the States for electoral votes as "the arithmetic of the electoral college, which demonstrates it may be possible to lose a few major States and at the same time win the election."

Minorities—be they "minority" States or small States, or minorities within States—loom large when a candidate seeks 270 electoral votes. Four votes here, eight votes there, 12 votes from another State—they are what add to 270; these votes from small States could well be the "swing" votes to give a candidate a majority of the electoral votes. And so, today's candidates think in terms of States "rather than numbers," Mr. Goodwin testified before the Judiciary Committee, continuing:

> Most presidential campaigns are concentrated on no more than 20 per cent of the vote, the swing vote, on the assumption the rest are pretty well committed. Today, nearly every State has a swing vote which, even though very small, might win that State's electoral vote. Thus nearly every State is worth some attention. If the focus shifts to numbers alone, then the candidate will have to concentrate almost exclusively on the larger States. That is where the people are, and where the most volatile vote is to be found.

To swing the State's electoral votes to a candidate, a presidential candidate must listen to the needs of the ethnic minorities, economic minorities, racial minorities, geographic minorities, religious minorities, social minorities, and small States. These minorities, because of their common interests, frequently vote alike—or, as it is called, as a bloc.

By joining with other groups, their vote can be the cornerstone, nay, the very foundation, of the winning vote. As the junior Senator from Arizona (Mr. GOLDWATER) observed from his experience as a presidential candidate, the best chance a man has to win the Presidency is to work on bringing together the voters of varying interests.

The power of minorities comes from the skill with which they are able to join themselves to other minorities or groups to form the winning plurality. The effective joinder of minorities within a State is one of the virtues of the present electoral system.

Let me illustrate this.

Within my State of Hawaii, the 1960 census showed we had a population of 632,772. Their racial ancestries were approximately as follows: 203,455 Japanese; 207,830 Caucasians, which includes Portuguese, Spanish, Puerto Rican; almost 100,000 pure Hawaiian and part-Hawaiian; 69,070 Filipinos; 38,197 Chinese; approximately 7,000 Koreans; 4,943 Negroes; 2,400 Samoans; 472 American Indians; and others—such as Micronesians, Vietnamese, among others.

To get the electoral vote of the State of Hawaii, a candidate must court these minorities—that is how his winning plurality is attained. Each group has political clout. Each group's votes are needed for a candidate to get the electoral votes of the State.

Under direct election, a candidate would not have to bother with these ethnic groups, which loom importantly in Hawaii, as well as many other States. The same 1960 census—the latest ethnic breakdown by the Bureau of the Census—showed there were then 179,323,175 people in the entire United States, of whom 158,831,732 were white.

Since under direct election the name of the game is numbers, why should any candidate seek the vote of the ethnic minorities? Collectively, they cannot win the election for him. They total only slightly over 20 million out of 180 million, or about 11 percent of the total population.

In Hawaii, the 203,455 persons of Japanese ancestry were very influential against a total population of 632,772. They constituted over 32 percent of the total population of Hawaii. How influential will they be when they number 464,332 throughout the United States—as against a total population of 179,323,175 of whom 158,831,732 are white? They will then be a mere two-tenths of 1 percent of the total population.

In Hawaii, there are 69,070 persons of Filipino ancestry in a total population of 632,772. They were almost 11 percent of the population of Hawaii. How influential will they be when they number 176,310 throughout the United States.

And so on down the line—the same is true for the Negro, the Jew, the Catholic, the Mormon, the Buddhist, the American Indian, the Spanish American, the poor, the farmer, the many, many other small special interest groups of which our great country is composed. Such group may now be a very large minority—25 to 35 percent of the total State voters—or, as a smaller group, be the swing vote necessary to carry a State's electoral vote. Now candidates listen to their needs. But, as an infinitestimal percentage of the national popular vote, their voice will be practically ignored.

Hawaii as a State has four electoral votes. In order to win the Presidency under our present electoral system, an electoral vote of 270—one-half of the 538 electoral votes—is required. In that perspective, the four votes of my State of Hawaii have real value—they amount to 1.48 percent of the electoral vote needed by a presidential candidate to win. Hawaii's electoral votes and the votes of the 39 States with 12 or fewer electoral votes could well be the "swing" votes necessary to put a presidential candidate into the winning box. In any event, Hawaii represents seventy-four one hundredths of 1 percent, of the total electoral votes.

But, under direct election, the votes of Hawaii will be insignificant in the total count of popular votes. In 1968, Hawaii had a 275,000 voter registration out of 82,453,445 registered voters in the United States—or thirty-three one-hundredths of 1 percent of the registered voters.

Hawaii's actual vote in 1968 was 236,218 out of the 73,211,562 votes cast throughout the United States, or a mere 0.32 percent of the total popular vote.

Hawaii cast 141,324 votes for Hubert Humphrey in 1968, out of the national total of 73,211,562 votes cast for all candidates, or two-tenths of 1 percent of the total popular vote. Whereas under the electoral college, Hawaii cast seventy-four one-hundredths of 1 percent of the electoral vote for Humphrey. Therefore, Hubert Humphrey would have lost 73 percent of Hawaii's voting strength under direct popular election. In other words, Hawaii's influence on the candidate Humphrey, who won Hawaii's electoral votes, would have dropped 73 percent under a direct election.

Under direct election, in relation to candidate Humphrey, Hawaii would have had only one-fourth of the influence it now has under the electoral system.

From the point of view of President Nixon's vote of 91,425 in 1968, Hawaii's vote represents twelve one-hundredths of 1 percent of the total vote.

President Nixon was striving to win the four electoral votes of Hawaii, which represents 0.74 percent of the total electoral vote. By receiving only 0.12 percent of the total popular vote, Hawaii's potential influence on him dropped 84 percent.

Under direct election, in relation to candidate Nixon, Hawaii would have only about one-sixth of the influence it now has under the electoral system. Is that not amazing?

The presidential candidate merely looking for "numbers" will no longer have to bother to find out what Hawaii's special needs might be. Certainly, he will not feel the support of so few people out of the total vote warrants any special consideration of their needs after election.

Only as a sovereign State does Hawaii have dignity and importance.

Only as a sovereign State can Hawaii or other small States expect to receive Federal financial assistance for its special needs or Federal appointments.

As a collector of numbers of votes, Hawaii will be utterly insignificant. And, that is true of all other small States.

Under direct election—and Senate Joint Resolution 1's requirement of a 40-percent popular plurality—the impact on the election of the President of the numerically smaller groups and States cannot be significant. There would be no need need to court minorities, or to unify minorities within a State, or to court the all too few popular votes cast in small States as they would no longer be the "swing" vote now necessary to make the winning electoral vote.

Under direct election, with its emphasis only on numbers, the strength of all minorities would be diminished or eliminated. Henceforth, the major emphasis will be on the large concentrations of voters.

The representatives of minority groups who did testify were eloquent in expressing the fears of the minorities—be they

ethnic minorities, racial minorities, or rural minorities—that, if direct popular election of the President were to replace the electoral college, there would be no heed paid to their voice expressing their needs—no one even to protect them against oppression by the majority.

The distinguished black Congressman from Missouri, Representative WILLIAM L. CLAY, has spoken out eloquently and frequently and at length against direct election. In addressing the Committee on the Judiciary he said, and I quote:

If I were not deeply and sincerely concerned with this issue of electoral reform, and its potential for affecting the struggle of black citizens for equal rights and opportunities, I would not be before you here today. When 'direct popular election' came before the House of Representatives September 18, 1969, I stood in opposition with only two other liberal-oriented colleagues among the 70 House Members who voted against passage.

He stated:

Mr. Chairman, my opposition to the proposed direct election of the President, simply stated, is predicated on the conclusion that such a system will inhibit the political influence of minority groups.

And he continued:

I firmly believe that the direct popular vote would inhibit the political influence of minority groups. The present system maximized the importance of urban regions and especially of the high cohesion minority groups. The black vote presently and potentially registered—is more effectively applied within the two-party system which has evolved from the electoral system.

And he concluded:

To perfect the system of government and at the same time diminish or eliminate the voice of minorities within that system is a perfection we cannot afford.

The representative of the NAACP testified against direct election.

The representative of the American Jewish Congress testified against direct election.

The representative of the American Farm Bureau Federation testified against direct election.

Our colleagues who have themselves been presidential candidates—the senior Senator from South Carolina (Mr. THURMOND), the junior Senator from Arizona (Mr. GOLDWATER) and President Kennedy when he was junior Senator from Massachusetts—have all spoken out against direct election, as has the senior Senator from Minnesota (Mr. MCCARTHY).

The representatives of the large, powerful groups supported direct election. Among the most active are the League of Women Voters, the U.S. Chamber of Commerce, the American Bar Association, and the AFL–CIO.

Apropos of these groups whose representatives testified in support of direct election of the President, I should like to commend my colleague, the senior Senator from North Carolina (Mr. ERVIN) for a fine bit of research he did.

On September 21, in a statement which appears on pages 32846–32849 in the CONGRESSIONAL RECORD, he showed that none of these organizations whose representatives testified in favor of direct election practice what they preach—for the United States—"one man, one vote."

For example, according to the information furnished by Senator ERVIN, the League of Women Voters elect their president, first vice president, second vice president, secretary, and treasurer by a convention. The convention consists of first, delegates chosen by the members of the local leagues, with each local league receiving one delegate for each 100 voting members, and one additional delegate for each additional 100 voting members or major fraction thereof; second, three delegates chosen by the board of each State league; and third, members of the board of directors of the League of Women Voters of the United States. A quorum consists of 100 voting delegates—other than the board of directors—from at least 10 States. Fifty-one delegates from local leagues plus a few representatives of the board of directors can elect all the League of Women Voters national officers. A far cry from a direct election by each member—not exactly "one woman, one vote."

Another example, according to information supplied by the Senator from North Carolina, the U.S. Chamber of Commerce's elective officers are a president, a chairman of the board of directors, a chairman of the executive committee, one vice president to represent each division of the Chamber, of which there are 10 divisions, and a treasurer. These officers are elected annually by the board of directors. Twenty members of the board constitute a quorum. Each year 25 directors are elected by the board of directors.

As my distinguished colleague, the Senator from North Carolina (Mr. ERVIN), summed up:

It appears that in the Chamber of Commerce the Board of Directors which elects itself elects its President.

Eleven members of a self-electing board of directors can elect the national officers of the U.S. Chamber of Commerce. A far cry from direct election and "one man, one vote."

Now let us look at the American Bar Association.

According to the data put in the RECORD by the Senator from North Carolina, the elective officers of the American Bar Association are a president-elect, who becomes president of the association upon the adjournment of the next succeeding annual meeting, a secretary, and a treasurer. They are elected by the house of delegates, by a majority of those present, whatever that number might be.

The house of delegates, according to the constitution and bylaws of the American Bar Association is composed of the following:

State delegates—one from each State.

State bar association delegates—with at least one delegate from each State bar association. If the State bar association has over 2,000 members, they are entitled to one additional delegate for each 1,250 lawyers—but a State bar association may not have more than five delegates. A five-delegate limit per State bar association, regardless of the number of its lawyer members.

Local bar association delegates, based on the number of members in each bar association—but, the additional State bar association delegates to which the State bar association is entitled is reduced by the number of delegates elected by the local bar associations within the State. So, we are back to five delegates again.

And other named officials are delegates also, such as the Attorney General of the United States, Deputy Attorney General, Solicitor General, former officers, and so forth. A far cry from direct election by the members. A far cry from "one man, one vote."

The AFL–CIO also testified in support of direct election. According to the information given by Senator ERVIN, its president and secretary-treasurer and 33 vice presidents are elected by a majority vote of their convention. The delegates to the convention represent each national or international union and organizing committee on a sliding scale. If they have—

Less than 4,000 members, one delegate.
Over 4,000 members, two delegates.
Over 8,000 members, three delegates.
Over 12,000 members, four delegates.
Over 25,000 members, five delegates.
Over 50,000 members, six delegates.
Over 75,000 members, seven delegates.
Over 125,000 members, eight delegates.
Over 175,000 members, nine delegates.
Plus one additional delegate for each 75,000 members over 175,000 members.

Where a union has fewer than 4,000 members, it is entitled to one delegate. On the other hand, in large unions, it takes 75,000 members to be entitled to one delegate. How like the large and small States representation under the electoral system. I suggest their method of election is a far cry from "one man, one vote."

These organizations want direct election of the President of the United States, yet their own national officers are not elected by direct popular vote of their members.

If their indirect, weighted systems of electing their national officers are satisfactory for their nationwide organizations, then the present electoral system, by its weighting, protects small States and minority groups and should be satisfactory to elect our national leaders, our President and Vice President.

Now let us look at where these spokesmen for direct election are located.

The headquarters of the League of Women Voters is right here, in Washington, D.C.; 1200 17th Street NW., Washington, D.C. 20036.

The headquarters of the Chamber of Commerce of the United States is also in Washington, D.C., 1615 H Street NW., Washington, D.C. 20006.

The headquarters of the AFL–CIO, yes, Washington D.C., 815 16th Street NW., Washington, D.C. 20006.

And, the American Bar Association is located at 1155 East 60th Street, Chicago, Ill. 60637.

All, curiously enough, are located in big cities—in large population concentrations.

None of these organizations can, in

good faith, be said to represent small States with a minority population, or ethnic minorities, or racial minorities, or geographic minorities, or any real minority group.

The keynote of the electoral college system is compromise and accommodation. In order to gain wide support, geographic distribution of votes, acceptance by the many minorities making up our population, whose common self-interests tend to cause them to vote as a bloc, a candidate must make himself acceptable to the greatest common denominator of voters—he cannot court the extremists of the right or left, lest he lose the votes of the opposite extremists and the moderates. So, he considers the interests of each group. He compromises. He accommodates.

Compromise is in the great American tradition that has worked so well to advance the welfare and strength of all the people of this great country of ours. There is nothing dishonorable about compromise. In fact, compromise is a healthy, moderating influence.

And, in this day and age of strife, dissension, and discord, we do not want to do anything to fan the fires of prejudice.

Under direct election, a candidate need only maximize his own votes to prevent any candidate from obtaining the necessary 40-percent vote to win the Presidency. Doctrinaire, one-issue splinter parties, catering to every craven prejudice, to every ego-maniac's whim, are all too likely to spring up—no broad geographic base will be required to make a candidacy significant. A candidate would no longer need support of the States spread across these United States. Dozens of such candidates are all too likely to appear in each election—merely as spoilers who can force a runoff and then attempt to make secret deals for the votes of their supporters.

We can all foresee candidates representing the Democratic Party, the Republican Party, the Liberal Party, and the Conservative Party, like in New York State, the American Independent Party, the Socialist Party, and any number of parties representing various racial minorities. We will have a proliferation of parties, limited only by the ideology of the candidates.

Even if the candidates of such diverse parties are not successful in their quest for the highest honor this country can bestow—the Presidency—they hurt all the people in this country and all minorities by fanning the flames of prejudice.

I need say little on the potential damage to our minorities with which extremism of the left or right is fraught.

Look at what happened to the minorities in Nazi Germany, in Fascist Spain, in Communist Russia and, to our shame, our loyal Japanese citizens during World War II.

The flames of prejudice are easily fanned. In our troubled times and troubled world, explosive conflagrations are all too likely.

Unless minorities can be protected from the tyranny of the majority, our federal form of government, our United States of America, our very civilization are in peril.

Let us not be complacent.

Mr. President, if in "perfecting" our method of electing the President we do not protect the rights and the political clout of every minority so they can protect themselves, be the minorities small States with a minority population, ethnic minorities, racial minorities, religious minorities, economic minorities, social minorities, geographic minorities, or any other minorities, I fear we are blindly buying "a protection we cannot afford"—Caveat emptor. Let the buyer beware. Let us as Senators beware. Let the States beware. Let the people beware.

If our "minorities" are to retain a voice in the election of the President and thereby maintain their dignity, their integrity and, yes, their share of their due as States and as citizens, our present electoral system must be retained.

Mr. President, I yield the floor.

## ORDER FOR THE DIVISION OF TIME FOLLOWING THE DISPOSITION OF THE JOURNAL TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that following the disposition of the Journal tomorrow, and until the automatic quorum call under rule XXII begins, the time be under the control of and equally divided between the majority leader and the minority leader or their designees.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

## ADJOURNMENT

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 12 noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 43 minutes p.m.) the Senate adjourned until tomorrow, Tuesday, September 29, 1970, at 12 noon.

## NOMINATIONS

Executive nominations received by the Senate September 28, 1970:

UNITED NATIONS

Christopher H. Phillips, of New York, to be the Deputy Representative of the United States of America to the United Nations with the rank and status of Ambassador Extraordinary and Plenipotentiary.

DIPLOMATIC AND FOREIGN SERVICE

Turner B. Shelton, of California, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Nicaragua.

G. Edward Clark, of the District of Columbia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Senegal, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of the Gambia.

U.S. DISTRICT COURTS

James R. Miller, Jr., of Maryland, to be a U.S. district judge for the district of Maryland, vice a new position created by Public Law 91–272, approved June 2, 1970.

J. William Ditter, Jr., of Pennsylvania, to be a U.S. district judge for the eastern district of Pennsylvania vice a new position created under Public Law 91–272 approved June 2, 1970.

William W. Knox, of Pennsylvania, to be a U.S. district judge for the western district of Pennsylvania vice a new position created by Public Law 91–272, approved June 2, 1970.

Malcolm Muir, of Pennsylvania, to be a U.S. district judge for the middle district of Pennsylvania vice a new position created by Public Law 91–272 approved June 2, 1970.

DEPARTMENT OF JUSTICE

Benjamin F. Butler, of New York, to be U.S. marshal for the eastern district of New York for the term of 4 years vice George J. Ward, term expired.

SUBVERSIVE ACTIVITIES CONTROL BOARD

John William Mahan, of Montana, to be a member of the Subversive Activities Control Board for the terms expiring March 4, 1975; reappointment.

Otto F. Otepka, of Maryland, to be a member of the Subversive Activities Control Board for the term expiring August 9, 1975; reappointment.

U.S. POSTAL SERVICE

The following-named persons to be members of the Board of Governors of the U.S. Postal Service for the terms indicated; new positions.

William J. Curtain, of Maryland, for a term of 1 year.

Frederick Russell Kappel, of New York, for a term of 2 years.

Theodore W. Braun, of California, for a term of 3 years.

Andrew D. Holt, of Tennessee, for a term of 4 years.

George E. Johnson, of Illinois, for a term of 5 years.

Crocker Nevin, of New York, for a term of 6 years.

Charles H. Codding, of Oklahoma, for a term of 7 years.

Patrick E. Haggerty, of Texas, for a term of 8 years.

M. A. Wright, of Texas, for a term 9 years.

DIPLOMATIC AND FOREIGN SERVICE

The following-named person for appointment as a Foreign Service information officer of class 2, a consular officer, and a secretary in the diplomatic service of the United States of America:

Francis S. Ronalds, Jr., of the District of Columbia.

For promotion from a Foreign Service Officer of class 4 to class 3 and to be also a consular officer of the United States of America:

John W. MacDonald, Jr., of New York.

For appointment as Foreign Service information officers in class 3, consular officers, and secretaries in the diplomatic service of the United States of America:

Dennis Askey, of the District of Columbia.

Mervin E. Haworth, of the District of Columbia.

Yale Newman, of the District of Columbia.

For promotion from a Foreign Service information officer of class 5 to class 4:

Jerry E. Kyle, of California.

For appointment as a Foreign Service officer of class 4, a consular officer, and a secretary in the diplomatic service of the United States of America:

Chandler P. Roland, of California.

For appointment as Foreign Service information officers of class 4, consular officers, and secretaries in the diplomatic service of the United States of America:

Preston E. Amos, of Wisconsin.

Andrew P. Guzowski, of Florida.

Robert A. Merian, of Indiana.

Mrs. Lois W. Roth, of New York.

Tobie O. Surprenant, of Connecticut.

For promotion from Foreign Service officers of class 6 to class 5:

James L. Barnes, of Florida.

Edward S. Walker, Jr., of Pennsylvania.

For appointment as Foreign Service information officers of class 5, consular officers, and secretaries in the diplomatic service of the United States of America:

Harry Iceland, of the District of Columbia.
Leonard R. Sauble, of Florida.

For reappointment in the Foreign Service as a Foreign Service officer of class 6, a consular officer, and a secretary in the diplomatic service of the United States of America:

John Dodson Coffman, of Pennsylvania.

For appointment as Foreign Service officers of class 7, consular officers, and secretaries in the diplomatic service of the United States of America:

Ross E. Benson, of California.
John S. Blodgett, of Virginia.
Michael A. Boorstein, of Colorado.
James C. Cason, of the District of Columbia.
Peter R. Chaveas, of New Jersey.
Frederick R. Cook, of New York.
Dean Dizikes, of California.
Douglas A. Dworkin, of Tennessee.
Stephen W. Faber, of New Jersey.
Lawrence F. Farrar, of Minnesota.
Royce J. Fichte, of Illinois.
Miss Joan E. Garner, of Virginia.
Harold W. Geisel, of Illinois.
Michael L. Hancock, of Georgia.
Donald Vance Hester, of Illinois.
James G. Huff, of the District of Columbia.
Morris N. Hughes, Jr., of Nebraska.
Robert Leonard Jacobs, of Illinois.
Warren E. Littrel, Jr., of Illinois.
William A. Moffitt, of Texas.
Day Olin Mount, of New York.
Thomas F. Murphy, of Illinois.
Ronald E. Neumann, of California.
Robert C. Perry, of North Carolina.
Wayne Alan Roy, of Virginia.
Robert L. Scott, of Virginia.
Hugh V. Simon, Jr., of Tennessee.
Richard A. Smith, Jr., of Connecticut.
Joseph Gerard Sullivan, of Massachusetts.
Russell J. Surber, of Washington.
Frank P. Wardlaw, of Texas.
Charles Allen Weeks, of Pennsylvania.
Andrew Jan Winter, of New York.
Ira Wolf, of Virginia.

For appointment as Foreign Service information officers of class 7, consular officers, and secretaries in the diplomatic service of the United States of America:

Arthur S. Berger, of the District of Columbia.
Miss Donna Marie Blatt, of Florida.
Nelson C. Brown, of Louisiana.
John F. Coppola, of New Jersey.
William Henry Graves, of California.
Robert C. Heath, of California.
John E. Katzka, of Virginia.
Thomas F. Lonergan, of California.
Michael F. O'Brien, of California.
Miss Anne M. Sigmund, of Kansas.
John C. Thomson, of California.
John Treacy, of New York.
John C. Wicart, of Virginia.

For appointment as Foreign Service officers of class 8, consular officers, and secretaries in the diplomatic service of the United States of America:

Larry G. Butcher, of Oklahoma.
Richard Dunlap Heim, of New Jersey.
John Scott Monier, of Illinois.
Miss Suzanne Sekerak, of Pennsylvania.
John Stern Wolf, of Pennsylvania.

For appointment as Foreign Service information officers of class 8, consular officers, and secretaries in the diplomatic service of the United States of America:

Michael L. Braxton, of the District of Columbia.
Frank Dietrich Buchholz, of New York.
Howard A. Cincotta, of Maryland.
David P. Good, of New York.
Andre N. Gregory, of California.
Philip C. Harley, of New York.
Robert D. Miller, of Pennsylvania.
Robert C. Wible, of Ohio.

Foreign Service reserve officers to be consular officers of the United States of America:

William D. Carey, of Virginia.
Gerald L. Engle, of Michigan.
William A. Wolffer, of New Jersey.

Foreign Service reserve officers to be consular officers and secretaries in the diplomatic service of the United States of America:

Charles R. Best, of Virginia.
Brian H. Bramson, of Virginia.
Robert Clayton Brown, of Virginia.
Rodney W. Carlson, of Virginia.
Charles A. Cooper, of California.
Christopher N. Darlington, of New York.
Frank B. Dean, of Florida.
Warren L. Dean, of Nebraska.
James B. Devine, of Maryland.
C. Harlow Duffin, of Florida.
Donald G. Eckrote, of Virginia.
Warren E. Frank, of Nebraska.
John F. Gilhooly, of Connecticut.
William R. Gray, of California.
Richard D. Harrington, of Maryland.
Raul J. Hernandez, of the District of Columbia.
James M. Howley, of Maryland.
Myron M. Kline, of Minnesota.
Jonathan F. Ladd, of Ohio.
Ishmael Lara, of California.
Robert B. Leete, of Connecticut.
Larry V. Luther, of South Dakota.
Richard M. Luther, of Virginia.
Charles A. Marquez, of New Mexico.
Martin W. Moser, of Pennsylvania.
John L. Murray, of Virginia.
Ronald P. Oppen, of Florida.
Philip W. Pillsbury, Jr., of Minnesota.
Arthur J. Porn, of Wisconsin.
Rowland E. Roberts, Jr., of Pennsylvania.
Leo Sandel, of Maryland.
Henry P. Schardt, of Illinois.
André C. Simonpietri, of the District of Columbia.
Raymond J. Swider, of Virginia.
Wendell L. Wallace, of Maryland.

Foreign Service reserve officers to be secretaries in the diplomatic service of the United States of America:

Richard M. Cashin, of Maryland.
Thomas C. Niblock, of North Carolina.
Robert T. Shaw, of Arizona.
Frederick A. Turco, of Maryland.

Foreign Service staff officers to be consular officers of the United States of America:

Miss Nancy C. Abell, of Illinois.
Walter M. Berwick, of Virginia.
Andrew S. Coe, of Texas.
John M. Hall, of Florida.
George A. Hannemann, of Texas.
John A. Hollingsworth, of California.
Robert C. LaPrade, of California.
Robert N. McGovern, of California.
Joseph A. Murray, Jr., of Washington.
David P. Reimuller, of California.
William C. Wagner, Jr., of Virginia.

U.S. NAVY

Vice Adm. Jackson D. Arnold, U.S. Navy, having been designated for commands and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of admiral while so serving.

# EXTENSIONS OF REMARKS

## THE GENERATION GAP

### HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

*Monday, September 28, 1970*

Mr. METCALF. Mr. President, there are few among us who have not given extensive consideration to the overused and, in many cases, little understood concept of the generation gap.

In very simplistic terms, one could describe this concept as an inability to effectively communicate thoughts and feelings between individuals of different ages. That this widespread inability exists should not be surprising, for the establishment of rapport is dependent upon the degree of mutual experiences. This is particularly true in the areas of political inclination and cultural appreciation.

I was privileged recently to read a September 1970, article, published by the U.S. Information Service, written by the father of a teenage rock music group leader. As this article may be of interest to many of us who are constantly striving to bridge the generation gap, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ROCK AND THE PLIGHT OF PARENTS

(By Edward Devol, IPS Staff Writer)

Summary: What is the impact of rock music on an American parent whose home is used as a rehearsal hall and who must act as chauffeur to the rock group his guitarist son leads? This is the inside story by a father who knows.

Rock music—that deafening electronic blend of guitar and drums—has made its place in the American musical firmament.

Musicologists laboriously analyze its structure and pronounce it interesting; critics declare it an expression of the times; famous rock performers become millionaires.

It is aimed at the young and they love it. Rock music is their bread, their wine, their heavenly choir. A thousand-million-dollar industry has arisen to serve their desires for recordings and public performances by rock musicians.

But what of the parents of a youngster who is unfulfilled by listening to the records, or even by sitting in a meadow with thousands of his peers while Blood, Sweat and Tears or some other popular rock group assails the open air with sounds amplified by several thousand watts?

Consider the plight of a household trying to survive a 17-year-old who wants to become a professional rock guitarist. There are millions of him. Most, of course, will never make a profession of music. They will do as their fathers did, abandon such dreams for the law, or carpentry, or selling insurance.

Practicality, however, is in a future the young rarely consider. Now the 17-year-old guitarist wants nothing but rock and the house quivers from the music of the Flotilla, as his three youth rock group calls itself. Living quarters designed for sound no louder than conversation are pounded by decibels better suited to an auditorium seating hundreds.

Flotilla rehearses once a week. Its 17-year-old leader, the elder of two sons, is not unreasonable. He formally requests permission for the weekly rehearsal and permission is granted. If his mother plans well, she can be out of the house at the appointed time. Usually her household duties keep her at home and when Flotilla begins to play, the mother winces, the dog howls, and the younger brother leaves home, trailing behind him rude remarks about the noise. (He likes rock music, but his subordinate status in the family does not permit him to express a liking for his big brother's rendition of it.)

The father is rarely home at rehearsal time. But to him falls the privilege of transporting Flotilla to its occasional public performances.

Once they played at a church, following the business meeting of a young people's organization. Half a dozen adults were also present, and the generation gap soon appeared.

While Flotilla was making ready—tuning guitars, testing amplifiers, eyeing the girls—young and old mixed comfortably, admiring the sheen of the guitars, remarking on the size of the amplifiers.

Then the music began. The youngsters rushed forward, eager to let the sound beat against their ears from close range; the adults retreated to the farthest corner and looked at one another with raised eyebrows.

One woman spoke to the father of Flotilla's leader. He could not hear her. She spoke again, again was not heard, and finally wrote on a piece of paper: "Loud, aren't they?"

The father nodded, hoping loyalty to his son permitted a slight frown.

She wrote again on the paper: "But quite good."

He nodded, this time with a smile.

Another time Flotilla invited itself to perform on the mall of a large shopping center. The authorities consented and Flotilla was transported to the mall by the father one evening after a particularly difficult day at the office. He stood patiently beside the car while the musicians unloaded their huge supply of guitars, amplifiers, speakers, drums and little bags containing electric cords, microphones, and tools for emergency repairs.

While the boys were setting up their equipment near the fountain at the center of the long mall, the father wandered from store to store. In the bookstore near the fountain, he heard one clerk say to another: "I hope those boys don't play so loud we can't hear our customers."

Perhaps they did, for the reinforcement of Flotilla's own amplifiers and speakers by several borrowed items produced a truly noble volume of sound. The mall, lined by shops on both sides, was an efficient trap for the sound: the wail of the guitars and the throb of the drums were trapped between the shop windows. The panes of glass vibrated slightly.

Soon Flotilla was surrounded by people. They came from the shops, they came from the parking lot. Both young and old listened and smiled. The young liked the music; the old were attracted by the novelty. A small boy stationed himself 18 inches from the guitar of Flotilla's leader and the father hoped the child would not jostle the guitar and interrupt the careful fingering of the performer.

The father watched the audience enjoying his son's music and framed the reply he would give if someone asked him who the musicians were. "The leader is my son," he would say calmly, and without boastfulness. And then he would wait for the words of praise for his son's dexterity and musicianship. But no one asked.

Flotilla played on, exalted by their own music. An attractive young girl replaced the small boy near the leader's guitar. The guitarist scarcely saw her. His music was all.

The father wanted to share the experience. He found a public telephone and called his home. When his wife answered, he said: "You ought to be here. They're playing very well."

He thought she said, "That's good," but Flotilla made it difficult to hear her.

"Listen," he said, and extended the telephone receiver in the direction of the music. "Did you hear it?"

"I heard something," she said. "It sounded like a train."

He decided that some experiences were impossible to share. But he had been there and he knew the people had liked Flotilla.

As for the future of Flotilla's leader, music was a fine profession, too. Perhaps practicality should wait. The young had less need of it.

And besides, the father thought, next time Flotilla might even get paid.

---

## AGRICULTURE

## HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. FINDLEY. Mr. Speaker, Illinois' 20th District is a combination of cities, small towns, and rural countryside. The lives of most of my constituents are centered around agriculture—either producing crops, preparing them for market, selling them, or serving those who do.

Throughout my service in Congress, therefore, I have maintained close interest in all legislation relating to agriculture. For 6 years I served on the Agriculture Committee. Since then, as a member of the Foreign Affairs Committee, I have been able to enlarge my work on behalf of farming interests. particularly expanding foreign markets.

NEW APPROACH NEEDED

Every recent indication from farmers, farming organizations, and the public has shown a demand for a new approach in farm legislation. Unfortunately, the 91st Congress failed to respond.

A comprehensive, 5-year program of transition to strengthen market income—H.R. 9009—was my principal proposal. It was later cosponsored by 71 other Congressmen—including the late Senator Dirksen. I described my 5-year plan to the House Agriculture Committee in October 1969, as "people oriented":

> Present programs are crop-oriented. (They) give income support to commodities and yield many payments of astronomical size to individual farmers, which in turn, give the big operator resources with which to get still bigger, often at the expense of the small farmer.
>
> In their place I recommend two separate but complementary approaches: first, a general cropland adjustment program not tied to individual commodities; second, a program of personal assistance available only to farmers of low income.

In March 1970, I joined with 4 other Illinois Congressmen in this plea to President Nixon:

> As Representatives of an agricultural constituency, we respectfully request that you not embrace the failures of the past, but rather, reform and build upon those portions of the farm program which hold more promise for the development of a sound market economy for American agriculture.

By May it was clear that most farmers wanted a change from the present agricultural program. In a survey of farmers in my district, 95 percent voted for substantial change and reform. Less than 5 percent preferred no change. Of those favoring change, one-third wanted H.R. 9009. Another third wanted present programs but with payments to farmers limited to $20,000. Surveys by other Congressmen confirmed my own findings.

The bill finally passed was, in effect, a 3-year extension of present law with costly gimmicks to the advantage of cotton growers, but distinctly to the disadvantage of midwestern farmers. I opposed it, as did all major farm organizations.

A $20,000 PAYMENT LIMIT

When the showdown on the farm bill came, the vote on my amendment to limit payments to $20,000 per farmer provided the test between those who wanted reform and those who favored the existing program with its big payments. For 8 years I have pressed this issue.

In May 1969, I published the names of the 425 counties in the United States which did not have a Federal food-aid program for needy people, together with the amount of Federal farm payments to wealthy farmers for not growing food in those same counties.

In May 1970, I wrote to each of the 50 Congressmen representing districts receiving the largest amount of Federal farm payments, asking them to support a responsible payment limit. I said:

> As you know, big payments to farmers of substantial means—more than any other factor—have put farm programs in disrepute with almost all citizens, urban and rural alike.

I pointed out that "each of us can fully justify support for a payment limit in terms of the wishes of our own constituency," including those from the cotton South. A farm magazine survey last year in the cotton belt showed 71 percent of those farmers want a payment limit.

On July 7, Senator RALPH TYLER SMITH of Illinois accomplished an extraordinary feat by pursuading the Senate to adopt a $20,000 limit in a pending appropriations bill.

Unfortunately, on August 5, on a very close vote, the committee's $55,000 level was chosen over the $20,000 payment limit level which I offered. Although the limit adopted was not as low as I would have liked to see, it was a step in the right direction. I will continue my efforts to establish the ceiling at $20,000.

AGRICULTURAL ADVANCES

Substantial progress was made in other areas. Transmissible gastroenteritis—TGE—which often wipes out entire litters of baby pigs, last year cost Illinois pork producers over $10 million. When the Agriculture appropriations bill was before the House, I appeared before the committee and requested additional funds for research into a cure for the disease. My request was granted.

The Agriculture appropriations bill also included $100 million in grants, I had urged for water and sewer systems in small towns. This important step will help to breathe new life into rural America. With adequate transportation, educational facilities, and municipal services, industry will bring jobs and new hope to these areas.

During this fall's corn harvest I made a detailed survey of the crop in the 13 counties of the 20th District and presented the report in a meeting to Agriculture Secretary Hardin. In it I suggested administraitve changes to cut redtape when farmers hit by crop disaster seek Federal low-interest loans.

In several conferences with European trade leaders I argued against a proposed tax which would cut our export markets for soybeans. Officials of the Department of Agriculture described this "missionary work" as helpful. While the tax is not dead, it at least is not being actively considered at this time.

---

## FOUR HUNDRED AND SEVENTY-EIGHT YEARS OF LOYALTY

### HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. SCHEUER. Mr. Speaker, one of the facts that has made the United States a great nation is that we are a pluralistic nation. From our earliest days, great contributions have been made to our society by the Americans whose ancestors have hailed from other lands.

Americans' pride in their own ancestry has helped make them better Americans.

It gives me great pleasure to record the words of one of my constituents, Frank Capra, commander of the Bronx County Post No. 39, Italian American War Veterans of the United States:

FOUR HUNDRED AND SEVENTY-EIGHT YEARS OF LOYALTY

We are Americans, of Italian heritage which is firmly imbedded deep in the grass roots of American History.

Italian American blood enriches the main stream of America. It has given and it continues to give strength, character and vitality to the nation. It shall always be so forever and ever.

The Italian Americans who fought and died in order to enjoy the blessings of peace, from the very beginning were prepared to defend it as well. Thus Italian American War Veterans have played an important role in the defense of American Liberty and Freedom.

To my knowledge no American of Italian descent has ever been called for an investigation by any Agency of the United States Government on matters pertaining to the security of this Government. A record of unwavering loyalty unmatched by any other group within this land. The Italian American Veteran has distinguished himself beyond the call of duty, eleven (11) have earned that highest honor that the United States Government could bestow, The Congressional Medal of Honor.

I am proud, we should be proud, all of us, to belong to the Italian American Veterans. With your cooperation, we shall unite and do our utmost, each and every one of us, in succeeding to bring forth our heritage to the highest pinnacle.

I am in firm belief that you should devote time and effort in your Organization. Participate in all Post activities, and let our nation know that we are the same men that answered the many calls our nation had summoned. That we are in readiness to protect our shores (if and when necessary).

In time of supreme crisis during World War II our nation asked for men to defend and protect our democratic society. The Italian Americans had 2,400,000 under arms, one-sixth (1/6th) of the United States forces. Why shouldn't we be proud, and proud I am, for I am an Italian American Veteran.

---

## PEACE, AT WHAT PRICE, IN THE MIDDLE EAST?

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. RARICK. Mr. Speaker, an uneasy peace has been negotiated in the Middle East, at least we are so told.

No one really won, but until the interpretive news analysts decide on how to best present the fiasco, one thing is for certain—we can be assured that the United States lost.

Many wonder what prompted the sudden decision of the Russians to encourage the Syrians and Egyptians to withdraw their military forces from infiltrated and invaded Jordan. We hear little these days of what our precise foreign policy in the Middle East is or how it may vary from country to country and from incident to incident. Time was when our Middle East policy consisted of neutrality except to defend territorial integrity. Now it has been redefined as maintaining a balance of power.

But, many Americans have not as yet forgotten the Jordanian episode which followed the Palestinian hijacking of aircraft. The U.S. 6th Fleet maneuvered in the Mediterranean, U.S. combat troops at bases in Germany and North Carolina were readied for combat alert and our State Department entered negotiations with the Russians to cool it.

Suddenly, we are told that the Russians are the good guys and they had applied heat at certain quarters which resulted in the involved Arab chiefs ceasing to kill each other and set up a peacekeeping commission. It is even suggested that the bad guys in the Jordanian escalation were Chinese Maoists and not Russian Communists.

What did peace in the Middle East and the saving of Hussein's kingdom cost the United States?

We are reminded that last Friday about the same time peace hit the Middle East, the Pentagon reported that the Soviet Russians were building a submarine base in Cuba. Sunday, we were notified that the United States should not take any action to remove the Russian threat but should resort to diplomacy. As usual, we are to talk while the Soviets continue to build. Nero fiddled while Rome burned. We are also told that the United States will replenish Jordan with arms spent during the uprising.

One thing that we can be sure of—through diplomacy, the United States lost again. U.S. diplomats play by strange rules. Our diplomats enter the game, never to win but only to ask "what else do we have to give you to slow down the pace?"

---

## SPEECH BY DR. PAUL ASHTON, PRESIDENT, CALIFORNIA PROFESSIONAL GUILD

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. SCHMITZ. Mr. Speaker, Dr. Paul Ashton, president, California Professional Guild, recently delivered a very interesting speech to doctors and businessmen assembled in Newport Beach, Calif. Dr. Ashton is a strong advocate of free-enterprise medicine, and is currently practicing in Santa Barbara, where he has one of the most advanced cardiac centers in the world. As an item of personal interest, he is one of the few surviving members of the Bataan "Death March." He has an excellent reputation among the medical faculty. His speech follows:

SPEECH BY DR. PAUL ASHTON

The hottest topic in medical legislation today is the creeping plague of socialized medicine. Its most recent disguise is in the form of a national health insurance program for everyone, sometimes in conjunction with a prepaid health care plan. One program that would completely restructure the present delivery of health care is the one entitled "Health Security Program" recently introduced by Senator Kennedy and Congresswoman Martha Griffith, which is the Reuther Plan and is backed by AFL–CIO. The common cry of all of these programs is "Better Health Care at Lower Cost." This is a laudable goal, and everyone should work toward it, but let's see where we're going before we jump off the cliff. The Guild has made an in-depth study of the subject and some of the flaws in the various programs being advanced are so obvious that it is hard to believe they are not being presented with tongue-in-cheek. Let's examine a few of the main weaknesses. First, who are the masterminds who are planning the future of American medicine?

HEALTHOCRATS

A new breed of experts has arrived on the scene. A highly educated group of technocrats, system analysts, economists, statisticians, social planners and administrators . . . a new race of healthocrats . . . and they are going to solve the nation's health care problems because they have had special courses and studies to equip them for this monumental task? These self-appointed guardians of our nation's health boldly say that WE (the medical profession) are too simple-minded to be entrusted with such a mission; consequently, there isn't a fumbling physician, a feeble pharmacist or a doddering dentist in the bunch. We have the experience, but they are going to save the world for us . . . and from us. The writing is on the wall, big and bold: "They (meaning all medical men) will no longer have a voice in the shape of the systems under which they practice." Here are a few direct quotes:

"The institutions and organizations of the medical community must respond to the

challenges of the times. If they refuse, their punishment will be to live under the judgment of less knowledgeable men than themselves. Indifference to the social issues of medicine will ultimately guarantee Governmental intervention . . . this is not a threat, but a realistic assessment of current trends." (John G. Veneman, Undersecretary of HEW, former California Assemblyman.)

"We are coming to recognize that there has to be a great deal more in-depth planning for the distribution of health care and manpower, and *that this doesn't necessarily require medical knowledge.*" (HEW Deputy Undersecretary Frederic V. Malek, former toolmaker.)

"I cannot help feeling that a major reason doctors have not had greater influence on such matters is that *they have usually not had enough educational background in the economic and social aspects of medical care to be able to grapple with this kind of issue* . . . if the physician wants to be one of the molders of policy he is going *to have to be equipped to do so.*" (Rashi Fein of the Harvard Center for Community Health and Medical Care.)

The HEALTHOCRATS say they advocate "no formal Federal takeover of hospitals, no socialization of doctors . . . nor any compulsion." *Who's kidding whom?*

BETTER HEALTH CARE

Let's examine the first part of the slogan . . . *"Better Health Care* at Lower Cost" . . . It is impossible to provide medical care to everyone in the country because there are simply not enough primary physicians to go around? If our medical schools would turn out more primary physicians, the natural law of competition fostered under the free enterprise system would take care of better physician distribution and better care to outlying areas. But until the experts realize this glaring deficiency in their planning, their program will just have to work with what doctors we now have.

Statistics from other countries show the patient load increases dramatically under socialized medical plans. Why can't we learn from this? In other countries, including some of the Canadian provinces that have similar health insurance programs, it has been shown that the patient load has increased tenfold; yet, interestingly enough, there has been no corresponding increase in the number of hospitalizations. This would indicate that there are no more really "sick" people—just more patients.

It's human nature for people to want something "free" whether they need it or not. So, if you are seeing around 40 patients a day now, you will be expected to see around 400 under the national health insurance program. And babies with diarrhea may have to wait weeks for an appointment because you are too busy with patients who need their band-aids changed. How can we handle such a patient load and call it "better care?" You will have to go into your waiting room and say, "All right, everyone with a backache please stand up" . . . Then you can give some group diagnosis and distribute printed sheets of do's and don'ts for back problems. Of course, if the program has enough money in it for X rays, then everyone in the group will get them . . . whether or not they are indicated. And there will be no time to help those who suffer from fear, loneliness, guilt, anxiety, or any other "illness" that is not on the fee schedule. And what about Grandma Jones who needs her gall bladder removed, but your budget is overdrawn for the year . . . will she have her cholecystectomy or will the operation be postponed until the next fiscal year when the new funds are appropriated?

(When England instituted the socialized insurance program, the standing joke was the care given to pregnant women. At the first examination, she received a rubber stamp on her stomach which read: "When this gets big enough to read without glasses, come back for another appointment.")

When any system prevents the personal one-to-one relationship between patient and doctor, *with continuity of that care* by the same doctor, *then it is less than the best.* Nothing will ever replace the doctor sitting down with a patient in an examining room and listening to his history, complaints and problems. And it must be the same doctor, with the same patient, year after year . . . one who knows his personality, his family, his history, his peculiar foibles and anxieties. To change this personal relationship for assembly-line care would be disastrous. The only conclusion is that patient care will *not* be improved . . . it will deteriorate. Now what about the claim of lower costs?

LOWER COSTS

A vast new bureaucracy will administer health care to over two hundred million people with all the present Medicare services, plus preventive medicine, plus predictive medicine, plus many other benefits and it will be for everyone, regardless of age or income, with no exclusions or deductions. This is the great giveaway . . . the biggest bargain since Barnum and Bailey. Again, we say: *"Who is kidding whom?"* Who is going to pay for the health clinics that must be built (about 2,000 of them planned across the country, many of them duplicating present facilities)? Who is going to pay for the organization costs . . . the high salaries of the Healthocrats . . . the administrative costs . . . the crushing load of paper work? The employers are supposed to pay 35% of the bill through a payroll tax; the employees will pay 25% of the costs, and the Government is supposed to pay the remaining 40%. Of course, this 40% will be passed on to the public, making double payments by the taxpayers. Sounds like an automobile pitch! The demonstration ride is free, but who is going to make the monthly payments?

Last year 67 Billion Dollars were paid to the health industry by everyone, including the Government, private citizens and insurance companies. This is big business. Now the figures being tossed into the health hopper are that the budget will be only 37 Billion . . . a *savings* of 30 Billion Dollars . . . yet everything will be Free to everyone. And all this will be accomplished by the magic of a medical budget. We recognize and agree with the crying need to provide medical care to the underprivileged and the poor, but the planning outlined by these social engineers will only compound the problems, and we resent the silly games they are playing with such vital issues. They cry "economics," but it makes one wonder *if it isn't more political than economical?* Is their goal really health to the poor, or votes at the polls? Could it also be a tool to demand the loyalty of the blue-collar worker? And even if their program was economically sound, how would it be administered?

ADMINISTRATION

The Healthocrats are going to show us how to do it. They say there will be no "formal takeover" and no "compulsion," but what do you call it when all policies and administration is set by the Government? You will be handed a pre-packaged program and will submit annual budgets for health care to be reviewed by the Healthocrats. If your costs run over your budget, then you just fill in form No. 988654709962F-aS, and in about three years you might get partial payment. *You conform or you don't get paid.* It's that simple. And these trained brains say the Government can streamline health care delivery into an efficient operation. Do you agree? Federal expertise in "health care" has already been proven . . . just look at the Veterans Hospitals. And as for their experience in "delivery," well, the Government operates a unique *mail* delivery, so why wouldn't they do as well with *health care* delivery? Put the two departments together and we will have a sort of *Medical Post Office.*

Now, one final factor no one has bothered to consider.

GOVERNMENT CONTROLS

Nothing much has appeared in print about this aspect, but it's as important, if not more so, as any of the others. To overlook it would be catastrophic. Yet the Healthocrats don't seem to realize that a doctor is probably the most independent and complete individualist left in captivity! And how long would he continue to function . . . *effectively* . . . if he were reduced to the status of a Government employee? The controls and restrictions being planned would soon reduce pharmacists to stock boys, dentists to plaster specialists and physicians to puppets (but all would be experts in filling out insurance forms!).

Under proposals now being submitted, there will be peer review, set fee schedules, no direct billing, monitoring of cases, established budgets, committee control on regional, sub-regional and local levels, working conditions, control of privileges, fixed working hours, prescribed patient loads, etc. . . . and more and more and more insurance forms and paper work. You will accept whatever changes and restrictions are set down for you by the golden boys.

Well, the program might get medical men to conform . . . and keep on conforming . . . to a point, but no one is going to tell us how to practice medicine. The success of medical science is in its freedom . . . its ability to soar off and explore new frontiers. That's what attracts many men into medicine. We are a different breed and are not geared to conform. If a doctor becomes a Federal employee on a 9–5 basis, he will soon become antagonistic, lose his dedication, incentive and enthusiasm . . . the very qualities that sent him into medicine. Medical care *cannot* be stifled and the individual expression *cannot* be thwarted. It is doubtful if the heart transplant would ever have been attempted under the program being proposed, as it was not "on the fee schedule." And what about other organ transplants and all the wide open areas ahead for medicine? The research scientist will continue to need the experience of practicing physicians to keep medicine forging ahead with new discoveries and cures. Medicine is the highest type of science and demands freedom. It is burgeoning and simply *cannot* and *must not* be curtailed and regimented.

It would fill a book to critique all the flaws in the programs being packaged for us, but we have tried to look at just a few of the major ones. We must admit that it is easy to criticize and tear down, and answers to problems as complex as ours are difficult. It is not the intent of the Guild to disparage our Government. America is the greatest nation in the world and offers unparalleled benefits, opportunities, and challenges . . . and this is why we hate to see one of our most precious commodities become a political toy. America has the best medical care in the world and it comes from the free enterprise system.

The goals are good ones, but problems cannot be solved with money and insurance forms. Guidelines have to be carefully drawn and we believe this should be done by men who have had experience and practical knowledge, not by laymen. We believe medical man can come up with better solutions. We can no longer be apathetic and say, "Maybe this issue will be something for the next generation to fight, but I will be retired before it becomes a real threat." It's upon us *NOW* and we must grasp the opportunity to be heard before it is too late. We don't *HAVE* to quietly accept what we believe will be inferior health care. Maybe we won't be able to stop the trend, but at least we'll go down hollering!

## PROTEIN FOR TOMORROW'S FACES OF HUNGER

**HON. ANCHER NELSEN**

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. NELSEN. Mr. Speaker, there has come to my attention recently a paper prepared by three eminent doctors of veterinary medicine on the importance of protein in our diets. The contents of this well-documented paper should be noted in connection with our present concern with population problems.

The paper to which I have reference was prepared for the Council on Research of the American Veterinary Medicine Association by Drs. Fred D. Maurer, George C. Poppensiek, and Paul M. Newberne. This yet unpublished paper attests to the importance of veterinary medicine in maintaining our ability to provide good protein food to our ever-increasing population. As is pointed out, veterinarians in addition to protecting the health and productivity of our $50 billion livestock industry, are caring for the Nation's 58 million pet and companion animals, shielding the human population from the many animal diseases that may affect man, and contributing to the control of human disease through cooperative research.

I must emphasize, however, that the potential of the profession of veterinary medicine is almost limitless in the areas of research and disease control so necessary to the assurance of adequate and proper food supply for the teeming population of the world today and in the years to come.

I ask that the paper, entitled "Protein for Tomorrow's Faces of Hunger," be included in the RECORD at this point in my remarks:

PROTEIN FOR TOMORROW'S FACES OF HUNGER

(By Dr. Fred D. Maurer, Associate Dean, College of Veterinary Medicine, Texas A. & M. University; Dr. Paul M. Newberne, Professor of Nutritional Pathology, Dept. of Nutrition and Food Science, Massachusetts Institute of Technology, and Dr. George C. Poppensiek, Dean, N.Y. State Veterinary College—Cornell University)

INTRODUCTION

We were warned in 1798: "Population, when unchecked, increases in a geometrical ratio. Subsistence increases only in an arithmetical ratio. A slight acquaintance with numbers will show the immensity of the first power in comparison of the second."

The alarm, terrifying in its simplicity and import, came from England's famed political economist, T. R. Malthus. It was little heeded.

Only one hundred and seventy years later, physicist-writer C. P. Snow, in a lecture at Westminster College, remarked: "I have to say that I have been nearer to despair this year, 1968, than ever in my life. We may be moving—perhaps in ten years—into large-scale famine. Many millions of people are going to starve. We shall see them doing so upon our television sets."

The number of people on earth has grown with Malthusian speed. There were only 250 million people living at the time of Christ. It took all of sixteen centuries for that population to double to 500 million people. At the rate we are going now, it will take only about 25 years for our present population of 3½ billion people to double to 7 billion.

Food supplies lag far behind. The world's production of food today is not adequate—in quantity or quality—for even 3½ billion people. To feed another 3½ billion hungry mouths only 25 years from now will require enormous increases in food supplies." (1)

From a paper written by W. M. Beeson and J. L. Krider of Purdue University: "At present there are 4 million people dying from malnutrition or starvation; by the year 2000 there will be 1 billion people or more dying from starvation unless the people of the United States intervene. United States population will increase to 300 million people by 2000 A.D." (2) FAO data indicate that each single day adds 180,000 to the world's population. (3) Beeson and Krider conclude that United States scientists and farmers can increase our food production to feed 300 million United States citizens, "but how much of the world population will we need to feed? Some authorities have predicted that the United States will be feeding one-quarter to one-half the world in 10 to 20 years. The United States is not even geared today to feed 300 million people in the U.S.A. at present nutritional levels much less millions of people outside the United States." (2)

Prediction follows prediction, and world food production falls nearly 2% behind food requirements every year. The highest rate of population increase, up to 3.5% per year, occurs in the underdeveloped countries which have the lowest per capita food production. These food deficit countries which now harbor ⅔ of the world's population will contain ⅓ of the world's people by the year 2000. Sixty percent of the inhabitants already suffer from malnutrition. Optimistic estimates predict the effect of family planning during the next 20 years will only reduce food requirements by 20%. Mass starvation cannot be avoided without changing the trend of increasing food shortages: Fortunately new high-yielding cereals and improved agricultural technology (4)(5) have greatly increased production in several developing countries. While this so-called "green revolution" has great potential, it should be looked upon as one of several necessary steps toward satisfying man's future food requirements.

To neglect the problem now because of this advance will be to risk the spread of hunger to whole nations with the consequent loss of social, economic and political stability fostering aggression. If widespread starvation is to be prevented, all potential food resources must be developed.

With only 10 countries having a surplus of food and those countries containing only 15% of the world's population, it is evident that they will not long be able to make up the deficits. It has been estimated (6) that by 1985 the United States will be able to make up only 10% of the food shortage abroad. Since we cannot long provide the food, we must help the people in the undeveloped countries to increase their own food production.

Contrary to old opinion, more farmers on more land do not automatically provide a surplus of food. The mere expansion of a subsistence agriculture is no longer sufficiently productive. The shift of the population to urban centers will require production for the market at a faster rate than total food production. Between 1962 and 1985, urban populations of the developing countries are expected to increase by about 160% and in Africa by 300%. (7)

There must be a surplus beyond the needs of the farmer's family which can be sold in the cities and provide farm capital, because to apply the new technology and increase the yield per acre, farmers must buy fertilizer, pesticides, seed, water, tools and machinery. The livestock man must provide better nutrition breeding, management and health control.

ADVANCING TECHNOLOGY

The key is improved technology which provides very high rates of return on the investment.

Through such investment, the farmer or rancher will make money, not only with which to produce more effectively but with his profits to buy the finished goods of industry. With an expanding market, industry will provide more jobs for more people who can and will buy more farm products and maintain farm prices in spite of increased production.

Obviously the improved technology of food production, whether plant or animal is the source of broad economic development essential to both agriculture and industry.

In other words, efficient crop and livestock production now requires as much education, adaptive research and capital as does industry, and they must complement each other in an economic structure that provides incentive to all those involved. This approach has made our modern civilization possible.

The great success of food production in the United States provides an example and a basis for further productivity. Although blessed by abundant natural resources, US Agriculture has not been left to chance. Research in agriculture has been basic to the production of food and to our national development.

Food is a major source of our economic strength, is vital to social welfare and world supplies can mean peace or war. (8)

Prior to 1850, over 80% of our people were required to produce food and fiber. Through applied agricultural research which increased the efficiency of crop and livestock production, more and more people have been freed from the land to engage in education, research, science and industry.

Although only about 6% of our people now are required to produce adequate food for the nation, interdependence with industry requires another 6% to provide supplies and equipment for the producers, and another 10% to provide the storage, processing, and marketing of food products. If we include food transport and retailing, over 25% of our people are dependent upon food for a livelihood. (9)(10) Further, the total consuming public is much concerned with food supply, quality and price. One of our greatest national assets is that only 18% of the American consumer's income is required for the purchase of food, in contrast to most countries which require more than twice that amount. (11)

The most acute food shortage at home and abroad is for protein foods especially those of animal origin.

The relative abundance of land for more intense forage production, the large volume of by-product forage from increasing grain production, and the edible waste from human food processing will feed a much larger U.S. livestock population. With parallel support for research and training to improve animal health and productivity, U.S. requirements for animal protein can be met, some proteins will be available for export and technical assistance can increase animal protein production in food deficit countries.

Currently, plants provide 70% of the world's dietary protein, animals, 30%. Both are needed and there is considerable interdependence both in their production and consumption.

PROTEIN REQUIREMENTS

During the twentieth century, much knowledge has been gained through extensive research on protein requirements. Proteins

References at end of article.

participate in all biological processes; they are vital for all forms of life. Discussions of needs for calories, carbohydrates, fats, vitamins, and minerals are meaningless without indications of the amounts and kinds of proteins in the diet.

Eight of the 22 amino acids, essential for growth and maintenance of cellular tissue and other metabolic functions, cannot be synthesized by the human body, and must be provided by proteins in the diet. When the essential amino acid pattern of the dietary protein closely approximates the need, the protein is utilized more completely. Animal proteins supply amino acids in about the same proportions as those needed by the body, whereas individual plant proteins are always deficient in one or more of the essential sulfur amino acids. (12) (13).

An adequate diet during infancy, growth, pregnancy and lactation should include animal protein foods. In underdeveloped countries, prolonged breast feeding is of greatest importance, but the maternal diet must be adequate.

The protein deficiency disease, kwashiorkor, widely prevalent among undernourished children, can be prevented by ingestion of milk and other animal protein products. (14) (15)

It has been established that infants and children deprived of adequate protein during the prenatal and early postnatal period of life fail to achieve optimum physical size. Even more significant, however, is the convincing evidence that these children can never reach the level of intelligence enjoyed by their contemporaries supplied adequate protein during the critical, formative period of life. Since this deficit in native intelligence cannot be regained, these observations add emphasis to the critical need for adequate animal protein. (16).

SOURCES OF PROTEIN

From a nutritional standpoint, it is possible to obtain all the essential proteins for human growth and maintenance from plant sources. To do so requires the presence of the right variety of plant proteins, enough knowledge of nutrition to select them, enough capital and technology to process them into edible products for both infants and adults, and the incentive to eat them in adequate amounts.

The protein content of plants is often too low to serve as the only protein source; for example, it takes about a kilo of corn per day to provide enough protein. To obtain all of the essentials from such plant foods may be difficult for adults and impossible for children. Being complete proteins, the inclusion of minimal amounts of animal protein makes it possible for a wide variety of plant foods to complete an adequate diet.

There are economic and geographic considerations as well: Land for direct food crop production is definitely limited; only 8% of the world's land area is considered suitable for crops and only about 2% is ideal. In the late 1950's we were using only 13.5% of U.S. agricultural lands for direct-food crops; 4% for industrial crops, and 82.5% for livestock feeds. (17) Most gains are expected to come from intensified use of present acreage. Having already taken full advantage of mechanization and fertilizer and done much to develop more productive strains in the United States, the yields of cereals per acre here are less likely to increase as rapidly during the next few years as in the past.

Efficient plant production requires substantial research and development. Although high-yielding, disease-resistant plants have been developed for various environments, adaptive research is required for each different environment and optimum yields are obtained and maintained only under ideal conditions when using proper amounts of fertilizers, water, and crop-productive chemicals, and specialized farming methods. (18)

Livestock thrive on many foods that cannot be eaten by man. Especially in the undeveloped countries very few ruminants receive feed that could be used directly by man. Some 65% of the world's land area is only suitable for grazing. R. E. Erb of Purdue reports: "Over one-half of our total land area, about one billion acres, produces forage which has little or no value unless marketed through livestock. When this forage is marketed in the form of meat and milk from cattle, it is valued at about $8 billion annually. The value of the U.S. corn crop is in comparison, about $5 billion." Since 85% of our corn crop is fed to livestock this crop also has much reduced value until marketed as eggs, meat and milk. (6) In fact, most U.S. grains have no other market than as livestock and poultry feeds. Large numbers of animals convert the waste products of grain production into food for man. It is estimated that, by 1980, the increase in by-products from grain production in the United States, with proper supplementation, will support four times as many dairy cattle as we now have. Such forage materials are now largely wasted. Recent experiments in the Philippines show that, with especially developed grain sorghums suitable for the tropics, one 6-ton crop of IR-8 rice can be grown per hectare. Then three cuttings of grain sorghum, yielding about 6 tons each can be grown on the same land. Such developments with improved cereals provide hope not only for more rice but for the luxury of feed-grain livestock production to supplement the rice with animal protein that has been so sorely needed in the tropics. Where grain-sorghums are now grown in parts of Mexico, the hog-raising industry has increased; and it has been suggested that Mexico's poultry industry would not have grown so spectacularly had it not been for the availability of sorghum for feed. (19)

From a production standpoint, 75% of the world's people live in regions where they are dependent upon animals for agricultural power, transport, and fertilizer, as well as for much of their protein. For many millions of these people, animals also provide a way of life with great additional dependence upon animals for shelter, clothing, and fuel.

In those countries with grain shortages, the principal contribution of domestic animals to food needs is in the conversion of pastures, rough forages, and unconventional protein sources to animal protein products. In the U.S., it has been estimated that range forage production can easily be doubled. (20) Research on range livestock nutrition and supplementation, on better utilization of range, and on grass and browse on land too rough, dry, or infertile to maintain food crops can contribute greatly to the available food supplies, not only in the United States, but also in vast areas of the world not now utilized or poorly utilized for food production. (21) (22) Many grassland areas, particularly in the tropics, are stocked to only a fraction of their capacity. (23) Other tropical resources, such as molasses, crude sugar, cassaba, and bananas, are poorly used or not used at all. The potentialities of molasses, in countries poorly equipped at present for livestock raising, are shown by the experience in Japan. Molasses was purchased at 7¢/gallon; by using it in animal feed, its value increased to 21¢/gallon on the farm, in terms of marketable protein produced in the animals fed. (24)

Not only cattle and other ruminants, but also swine and chickens efficiently convert protein from various sources into meat. The feeds value of garbage, broiler house litter, and animal manures are now being studied, as well as other unusual materials. (25) (26) (27)

The role of livestock will necessarily vary with the natural and potential resources and economy of each country. For those with a surplus of grain like the U.S., the excess can be converted to more desirable animal protein. Of those countries which must use their grain directly for human food, some have abundant natural forage and crop wastes which only animals can convert to food for man. Some crowded countries will necessarily use their livestock primarily as scavengers but in each case, livestock is needed to play a vital role in the utilization of resources which would not otherwise contribute to man's food supply.

Synthetic protein foods from petroleum, algae, yeasts, and bacteria will, no doubt, provide food for livestock, and are even being publicized as the solution to future human food problems; while they may eventually make a contribution, much research and development will be required. Former President Johnson's world food panel warned against the false hope that some of these synthetic foods will provide an easy answer, and decried publicity which lessens effort to do more through conventional agriculture, livestock, dairy and poultry production. Further, custom plays a major role in the diets of people; and most people will consider synthetic foods more acceptable after animals have converted them to recognizable products like ham and eggs.

EFFECTS OF DISEASE

A productive livestock industry is possible only when loss from disease is controlled. That research points the way toward animal health and productivity is evidenced by the contrast between the developed and undeveloped regions of the world. While only 40% of the world's 3 billion head of livestock are in the developed countries, they produce 80% of the world's meat, milk, and eggs. In many countries, the yield per animal is tragically low. In parts of Africa, cattle are not slaughtered until they are 6 or 7 years old and the yield of beef is roughly 1/6 that of U.S. beef animals. In these regions, it also takes from 10 to 20 cattle to produce the milk of an average American dairy cow. (25) (28) Disease, breeding, malnutrition and poor management of livestock are prime contributors to poor reproduction, retarded growth and high mortality; but it is primarily in the undeveloped countries where existing technology has not been applied and where there are many health problems awaiting research. For these reasons, calving percentages in the tropics range from only 40 to 50% and of the calf crop obtained 10 to 15% are lost prior to weaning and some 6% from weaning to market. (23) With adequate disease control and good management prospects for much greater beef production in the tropics are excellent because there is a potential for abundant forage and there are several good productive breeds of cattle well adapted to the tropical environment.

In the U.S. today, diseases and parasites decrease animal productivity by an estimated 11%, but in countries where there are no veterinarians, losses frequently exceed 50%. Even this 11% represents significant wastage of animal protein.

It is in the underdeveloped countries where the major enzootic diseases persist. They not only handicap the production of native animals, but they prevent the establishment of imported breeding stock, remain a threat to clean countries, and prohibit the exportation of animal and animal products thereby limiting trade to the detriment of both agricultural and industrial countries. While improved nutrition, breeding, management and disease control are all essential, disease control is the key to self-help; for, with improved breeds and the income from trade, the capital with which to improve management and nutrition will be available. To fulfill this international need for disease control and to protect U.S. livestock, provides ample justifi-

References at end of article.

cation for U.S. research and training in the prevention and control of such foreign diseases as foot-and-mouth disease, trypanosomiasis, babesiosis, anaplasmosis, East Coast fever, African swine fever, African horse sickness, bovine pleuropneumonia, and fowl plague.

Many of the disease control techniques are known and can be adapted to local needs while others need to be developed. Between 1870 and 1959, eight diseases were eradicated from the U.S., and in 1954, there was a joint program in Mexico of foot-and-mouth eradication which cost some $170 million. (25)

Texas fever once cost the U.S. cattle industry $40 million in losses per year; though it took many years of research and application to eradicate the disease, the total cost was only $40 million, and now we save that much every year. Losses from bovine tuberculosis were $150 million per year; but now that it is largely controlled, we are saving that much per year, plus the invaluable decrease in its hazard to man. Although livestock disease control programs are costly, they roughly save many times more than they cost. South of the Sahara, about ½ of the continent of Africa, capable of supporting approximately 125 million cattle, is unsuitable for cattle production because of trypanosomiasis transmitted by the tsetse fly. (25) Can the world afford this kind of cost when people are starving?

Although the U.S. has accomplished a remarkable degree of disease control, many diseases continue to take their toll. (28) (29) (30) (31) in the U.S. estimated annual losses from disease in cattle and pigs, alone, averaged $1.2 billion in 1965. Total annual losses from diseases and parasites were estimated to be approximately $2.8 billion. needing further research and control are reproductive problems (including mastitis), diseases of the newborn, diseases of feedlot cattle and hemoprotozoan diseases. In July 1967, a joint Federal-State Committee on research needs for agriculture recommended a 75% increase in scientific man years of research on animal diseases during the next 10 years.

The shortage of animal health services in the food-deficient regions of the world and the shift to large-scale methods of livestock production in the United States demands more emphasis on the widespread application of preventive medicine. Technological advance and mechanization has led to large specialized livestock and poultry operations which are more efficient and more profitable than small mixed farms which are fast disappearing. Now 600,000 or 20% of our 3 million farms produce 90% of the nation's food and fiber. Cattle feedlots that handle over 40,000 cattle per year are not uncommon. Intensive long-range research and the development of new preventive medical and management procedures will be the most economical way to reduce the 1 to 2% annual loss of animals now experienced in many feedlots.

The need for research and preventive medicine is equally great in the poultry industry where flocks of less than 10,000 birds are no longer profitable and many exceed 100,000. The success of modern livestock and poultry production is closely related to disease control. Recently, acute leukosis (Marek's disease) has caused serious losses in young chickens. At the time of processing, leukosis may account for 50% of the condemnation. In 1968, 271 million pounds of fryer chickens were condemned for all causes.

In 1968, average mortality for young turkeys was 9 percent but respiratory infections and transmissible enteritis may cause serious losses during the growing period. Disease conditions account for 85% of the condemnations in packing plants. In 1968, over 35 million pounds of turkeys were condemned for all causes. (32)

Footnotes at end of article.

The diseases of wildlife are so closely involved with the epidemiology of diseases of domestic animals that both must be understood if either is to be controlled. Work to improve the health of wildlife is also justified by its recreational and potential economic value as a food resource. Some species of wild ruminants are more efficient in the conversion of rough forage into food for man than are domestic species.

The maintenance of animal health must include the control of toxic hazards as well as infectious disease. The extensive use of chemical insecticides, herbicides, fertilizers, and drugs—and the exposure of animals to industrial wastes—require continuing research for evaluation and control.

Problems of sterility and reproduction annually cost enormous amounts. Improved reproductive rate and production of healthy animals must be attained. During the past 25 years, a gain of only about one pig per litter farrowed and 10% in calves saved has been achieved. Death losses in 1967 totaled 2,514,000 of a 43,647,000 calf crop. (20) (10)

SUPPORT FOR ANIMAL DISEASE RESEARCH

Of the expenditures for agricultural research in 1968, only about 16% was allocated to animal disease and parasite problems; about 31% was spent for plant research, and the remainder for agricultural engineering, animal husbandry, entomology, and soil and water. The 1966 scientific man-year imputs on agricultural problems per billion dollars of product were 294 for crops, and 92 for livestock and poultry. (33) During the same year, total cash receipts from farm marketings were $9.1 billion for crops and $22.4 billion for livestock and livestock products. (33)

In view of the greater return from livestock and poultry in proportion to the research imput, it would appear prudent to increase the research expenditure for livestock research.

Although total research expenditures have increased in the past 15 years, this increase merely reflects an increase in costs, not an increase in scope. (34) There must be enough research to keep animal production economically attractive to the producers.

It is of major concern that essential research to curtail serious losses from animal diseases at home and abroad is not being accomplished while there is time to do it. Neither are enough research men being trained nor gaining experience in livestock disease research for the nation to be adequately prepared for an emergency effort when the imminence of a food crisis requires more personnel for such work. Funding agencies and the various groups that will benefit from more research on and control of livestock diseases must give long-range consideration to the availability of research scientists to do this work. A long period of relatively poor support for livestock research has caused veterinarians and other scientists to be attracted to other areas of opportunity. (23) (24) (35) In addition to protecting the health and productivity of our $50 billion livestock industry, veterinarians are caring for the nation's 58 million pet and companion animals, shielding the human population from the many animal diseases that may affect man, and contributing to the control of human disease through cooperative research.

Since profitable livestock production now requires as much education, research, and capital as industry, it appears time for the producer to take a lesson from industry to help assure his own future. Industry finds it profitable and necessary to plow back an average of 6% of gross sales into research. This is proportionately 40 times more than the state and federal governments allot to health research for livestock. The livestock industry finds it difficult to provide direct support for research to protect its great investment against loss from disease. This is partially due to the large number of independent livestock producers and the difficulty of effecting close cooperation for this purpose among the associations of producers, processors, distributors, and food retailers. If they were to speak with one voice, and contribute a very small fraction of current sales receipts to research, they could insure higher future income. A start has been made in a few places; for instance, in Iowa in 1968, 5¢ per head for feeders, and 10¢ per head for slaughter animals was collected from the sale of hogs for research on swine problems.

Likewise, the consuming public which now obtains ample food for less than 18% of its income could avoid drastic increases in food costs by becoming alert to the facts of the situation and by investing a small percentage of current food savings into research which will help insure a plentiful supply at reasonable prices in the future. The investment of 0.1% of current food costs in research now may well avoid a 10% increase in food costs later. Through example, such interested groups and enlightened consumer associations could influence the establishment of a high priority for livestock research which would contribute greatly to the national welfare.

In "The State of Food and Agriculture 1968", FAO, has stated—"Even in developed countries the efficiency of livestock production still appears to be well below its potential level. As disease control improves, and the steadily accumulating discoveries in nutrition, breeding and management are applied, substantial increases in productivity become possible. The main lines of advance are the widespread use of complete rations to improve conversion rates, the genetic selection of efficient feed converters in all classes of livestock, and improved disease control in livestock." (18)

PROTEIN FROM FISH

Aquatic animals provide an insufficiently developed resource of protein food for both man and animals. With well-planned conservation, with the maintenance of the essential conditions of a natural environment, and the necessary culture and restocking, perpetual annual harvesting has been demonstrated and found profitable. (36) Denmark, which started trout farming in 1890, exported over 7.5 million Kg in 1961. (37) Several other European countries have similar fish farming industries which provide a vital source of food.

In 1966, some 25 million pounds of channel catfish were raised in U.S. ponds, a growth from a few thousand in 1963. (38) In 6 years, Arkansas increased its fish farming 35%, to 51,000 acres in 1968. (38) U.S. fish culture annual production now retails for about $75 million. Yet 75% of all fish products used in this country are imported, indicating a much greater market potential for local production. (39) Shellfish and shrimp are also being raised frequently on farms in cooperation with rice culture in flooded paddies. (36) In addition, fish raised in flooded rice fields feeding on insects and plant pests have increased the yield of rice by as much as 7%.

An acre of sea can produce as much food as an acre of arable land. One acre of fresh water, which can be on otherwise unproductive land, with supplemental feeds can produce more than an acre of land. Reservoirs, salt marshes and other idle waters can be made productive. Fish provide the most efficient means of converting feed to edible meat; this they can do at the rate of 1.4 pounds of feed per pound of fish compared with 2.0 pounds of feed for 1 pound of chicken, either of which is more efficient than any domestic animal. Methods for the culture of marine fauna in estuaries and even at sea are being developed. To maintain winter temperatures compatible with fish culture in estuaries, the utilization of heat from the water used to cool atomic reactors has been considered.

When fish are free to seek an ideal environment for the species, they migrate with changing seasons and seek conditions which provide essential nutrients, an optimal temperature range, optimal oxygen, and water free of pollution with toxic or noxious substances, all vital factors for survival, growth and reproduction. By contrast, fish farming generally involves confinement and concentration of fish into environments where health problems become apparent, often revealing serious losses which require diagnosis and control. (40)

AQUATIC ANIMAL HEALTH

Crowding of aquatic fauna not only creates the same hazards of disease concentration and transmission as in animals, but also lowers resistance and contributes to pollution. Where fish farming is well-developed, problems with viral, bacterial, fungal, parasitic, and protozoan infections are prevalent. Fish pathogens represent health hazards to man and animals, as well as handicaps to fish production.

In Finland, mycotic infections tend to be more serious in polluted waters where the pH is altered and where there is a low oxygen content. Fish eggs are especially vulnerable to the mycoses, and protozoan infections are most hazardous to young fish in crowded environments. Trematodes, with fish-eating birds as intermediate hosts, are frequently a serious problem. Cestodes, numerous in pike, perch, whitefish, and bream, not only destroy the fish, but 25% of the human population of Finland is infected from eating raw fish. Nematodes cause liver destruction in some species, and parasitic crustaceans cause serious losses. Finnish veterinarians must control tapeworms, salmonellosis, botulism, *E. coli*, *Enterococci*, and *Pseudomonas* to prevent significant hazards to human health. (41)

Maintenance of fish health is considered one of the most important conditions for proper production in Poland, which has a major fish-food industry. There, 14 major fish diseases are under constant veterinary supervision and control. The Minister of Agriculture provides funds for diagnosis, research, and disease control at five fish health centers. (40) Russia has 150 veterinary research and teaching institutions which concentrate on fish disease problems. (43)

A brief review of the literature reveals that fish and other aquatic animals serve as reservoirs and transmit numerous diseases of man and animals, such as leptospirosis, trichinosis, erysipelas, erysipelothrix, listeriosis, and salmon poisoning. An eosinophilic phlegmonous enteritis caused by a parasite from herring has been reported in the Netherlands, (44) and a meningitis in Tahiti was related to fish consumption. Mollusks are frequently incriminated in poisonings because they live near shore in waters that tend to be polluted, are eaten raw, and are filter feeders. Their ingestion and transmission of radioisotopes, (45) hepatitis virus, (46) enteric bacteria, heavy metals, and phytoplankton have all caused illness in man. Mercury poisoning has been reported in cats, birds, and man following ingestion of fish with a high concentration of organic mercury in their tissues.

These largely foreign references to disease problems give ample evidence of the need for U.S. colleges of veterinary medicine to provide training in fish diseases, to apply the world's knowledge to our domestic fish production problems through adaptive research, and to do research on the many unknowns.

The obvious primary need is for a preventive approach to eliminate the unhealthful factors or etiologic agents and provide the essential elements for health and productivity. Viewed in this light, it becomes apparent that, if natural waters are to provide a productive habitat for fish, or if we are to create artificial environments for optimal fish culture, we must first learn all of the characteristics of the ideal environment for each species, the essential nutrients, and the natural sources of its food. Since our natural water resources must also be fully utilized as supplies for our cities, for industry, irrigation, and recreation, it becomes important to learn the level of tolerance of each species of fish for alterations in its environment, and to set permissible legal limits on environmental alteration and contamination compatible with fish production in selected waters. These points are not mentioned just as an appeal for conservation, but to point up the immediate need for a team approach for research to understand the essential characteristics of the natural environment of fresh and marine waters most favorable for the desired fauna while these environments and the life they support still exist. To do otherwise will not only result in the loss of great natural food resources but, if the characteristics of the optimum environment for each species are not learned while we have a natural model, we may never be able to reconstruct it for the maintenance for productive culture of the species.

The veterinarians and other scientists must join together on the research team which will use the health and productivity of fish as barometers for control of a compatible environment. There is need for veterinarians, ecologists, nutritionists, toxicologists, geneticists, aquatic agriculturalists, water resources engineers, irrigation engineers, industrial chemists, commercial and recreational fisheries men, and legal advisors concerned with the national welfare, all working together to most wisely utilize and not destroy these resources.

SUMMARY

In summary, there must be more efficient production from all food sources if mass starvation is to be prevented.

As a humane people striving for national and international stability, we would like to prevent malnutrition or starvation any where any time. World production and distribution of food especially animal protein is inadequate in many regions and population growth is increasing shortages. Improved production methods attainable through research have demonstrated ability to meet former demands and have adequate potential for the future.

Domestic livestock and poultry, wild and aquatic animals each have great undeveloped potentials for making major contributions to the world's food supply. Improved animal health is a vital key to more efficient animal production. Veterinary medical research and training provide effective means of developing improved techniques and competent men to apply them at home and abroad. A national priority for the support of research and training is the key to optimal utilization of animals as a perpetual food resource.

People in government and education must urge support for research and development, and those people directly involved in the production, processing and distribution of foods of animal origin must not only unite in seeking support but provide self-help or all share responsibility for the disaster of spreading hunger.

## THE PRESIDENT SHOULD TAKE THIS OPPORTUNITY TO MEET IN EUROPE WITH LEADERS OF THE INTERNATIONAL RED CROSS ON BEHALF OF AMERICAN PRISONERS OF WAR

### HON. JOHN WOLD

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. WOLD. Mr. Speaker, I have wired the President proposing that a day be found during his 8-day European tour for a meeting in Geneva with leaders of the International Red Cross on behalf of Americans held prisoner in Southeast Asia.

This tour of Europe on which the President is embarked would be a marvelous opportunity to make a dramatic and unprecedented visit to the Red Cross to urge a renewed effort by that humanitarian organization on behalf of our prisoners.

I ask, Mr. Speaker, that my wire to the President be printed in the RECORD with my remarks. The wire follows:

SEPTEMBER 28, 1970.

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: I respectfully urge you to dedicate at least one day of your eight day European tour to a personal meeting with leaders of the International Red Cross on behalf of American Prisoners of War in Southeast Asia.

A personal visit to Red Cross Headquarters in Geneva, Switzerland would be impressive both in symbolism and in substance. It would I believe be without precedent and its significance would not be lost on the Government of North Vietnam which is very sensitive to world opinion on the prisoner issue.

This would be a singularly dramatic act on behalf of our prisoners. It would encourage other nations to take similar action on behalf of prisoners and impress North Vietnam with the strength of American determination to see our men properly treated in POW camps.

A day carved out of your schedule for a meeting with the Red Cross could produce solid results for our prisoners held in Vietnam and for their families.

Sincerely,

JOHN S. WOLD,
*Member of Congress.*

## THE DEMOCRATS AND THE "WHITE PAPER"

### HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. DICKINSON. Mr. Speaker, the reaction of the Democratic Party to the news that the administration has succeeded in halting the rising cost of living was a sorry performance, even for a campaign year. This country has been suffering under a Democrat-made inflation for so long that one would think nobody would like to see it go on. But judging from their actions yesterday, some Democrats would not mind seeing a weak economy—at least until after November.

Somewhat like a magician, the chairman of the Senate Democratic Policy Committee reached under the table and produced a 26-page "white paper" which told us that—contrary to what appeared to be a brightening economic picture—the economy was in real trouble.

I think it is worth taking a look at the authors of that report—three economists who served under Presidents Kennedy and Johnson. It was these experts who advised President Johnson that this country could afford both "guns and butter." For those who do not remember it was the "guns and butter" policy which produced a $25 billion Federal deficit in 1968 and kicked off a gross inflationary spiral which is now being brought to an end by a Republican administration.

If the Democrats are going to persist in looking for dark clouds, they should at least find instant experts who have some credibility left. All in all, last week's "white paper" recalled the spectacle of Larry O'Brien, the onetime apologist for the war in Vietnam, criticizing President Nixon for not ending it.

## DEMOCRATS RESPONSIBLE FOR WAR AND INFLATION

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. DERWINSKI. Mr. Speaker, last Wednesday, my esteemed colleague from across the aisle, the majority leader of the House, stated that he welcomed the sudden slackening of the rise in the cost of living as a relief from the inflation which has been so burdensome to consumers.

This rather surprised me. Although I was delighted to hear that a spokesman of the Democrat Party welcomed the end of inflation, it has long been my feeling that this concern is not shared by most Democrats.

Democrats, traditionally, have long enjoyed accusing Republicans of being responsible for economic difficulties. The worse the economy, they reason, the better chance for voters to support Democrats at the polls in November.

This seems to be the Democrat line this fall, now that November elections are coming up. However, there have been a number of signs recently that the war-induced inflation inherited by the Nixon administration from the guns-and-butter economy of the 1960's is easing. The prime rate is down. The cost of living has ceased its upward spiral. Workers' spending power has increased 4 months in a row. The money squeeze is easing. The balance of trade is healthy. The Standard and Poor's Index is up. Fears of recession are declining as corporate profits and total real output—GNP—increase steadily. Yet only one Democrat stood up to hail even one of these signs of the improving state of the econmy. But as I leafed through back issues of the CONGRESSIONAL RECORD, I discovered that at least a dozen Democrats have stood up on the floor to make speeches in the last month and a half criticizing Nixon's handling of the economy. They talk about a recession that simply doesn't exist, and call attention to unemployment, without explaining that it is inextricably linked to the winding down of the war in Vietnam which they were responsible for getting us into in the first place.

Which brings me to another point. It is the Democrat Party which is traditionally associated in the minds of most voters with getting this country into war. Both world wars, the Korean war and now the conflict in Vietnam were begun under Democrat administrations. That the Nixon administration was voted into the White House was due, in no small part, to this fact. People felt that Nixon was the man who could develop a sound Vietnam policy. Their hopes were justified, for almost daily we have evidence that the war in Vietnam is indeed being properly phased down. Troops are being withdrawn, the weekly death toll is lower than it has been in 4 years, and there is every sign of success in Vietnamization.

Yet, I hope I am not considered uncharitable if I suggest that I think that now, as elections are approaching, there

are many Democrats who continue to try to shift the blame for the war to the Nixon administration. They got us into the war, but they would not give Nixon credit for trying to get us out—at least not until after November.

The conclusion is logical: It is the Democrats and not the Republicans who are the party of war and inflation. The record shows that it is the Democrat Party which is responsible for both problems—war and inflation. And the solid Nixon record in handling both these problems left over from the Democrats will not let them get away with turning the issues around.

## RESULTS OF A QUESTIONNAIRE

### HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HANNA. Mr. Speaker, I rise today to inform the House of the results of a questionnaire I sent to my constituents, from which I have received 30,000 responses. In a time when the Congress is in session almost the year round, it is imperative that the Members find effective and frequent channels of communication with their constituents. I have found the mailed questionnaire to be such a device and have made it a practice to poll my constituents in this way about six times a year. I have always had a large return and found the results most informative and useful. I heartily commend this technique to my colleagues for their consideration.

The most striking result was that the economy is the issue of No. 1 concern. Forty-four percent ranked inflation or unemployment as having the highest priority to them. The Vietnam war ranked second and student unrest third:

I. WHAT TO DO ABOUT INFLATION

| | Percent |
|---|---|
| 1. Wage/price controls | 26 |
| 2. Voluntary wage/price restraints | 29 |
| 3. Decrease federal spending | 35 |
| 4. Increase federal spending | 5 |
| 5. Nothing | 2 |
| 6. No answer | 3 |

With respect to inflation, 35 percent urged reduction in Government spending, 29 percent asked for the Federal Government to establish a program of voluntary restraint on wages and prices, and 26 percent asked for mandatory Federal wage and price controls.

II. WHAT TO DO ABOUT UNEMPLOYMENT

| | Percent |
|---|---|
| 1. Federal job placement program | 29 |
| 2. Federal subsidy to underskilled workers | 7 |
| 3. Provide job training programs | 25 |
| 4. Provide unemployment compensation | 2 |
| 5. Two or more of above | 17 |
| 6. Do nothing | 13 |
| 7. No answer | 7 |

As a solution to rising unemployment, 29 percent of the respondents wanted Federal programs to find jobs for youth and the unemployed. Closely related was 25 percent who favored Federal job training and retraining.

III. VIETNAM

| | Percent |
|---|---|
| 1. Leave the President the option of attacking enemy sanctuaries | 38 |
| 2. Provide military aid to Cambodia | 9 |
| 3. Prepare to reduce troop levels | 28 |
| 4. Withdraw all troops immediately | 19 |
| 5. No answer | 7 |

Thirty-eight percent of the sample favored allowing the President the option of attacking enemy sanctuaries near Vietnam. Twenty-eight percent favored reducing our troop levels in Vietnam, and 19 percent favored immediate and complete withdrawal of our troops from Vietnam.

IV. STUDENT UNREST

| | Percent |
|---|---|
| 1. State government should have control over the campus | 54 |
| 2. Use of local police and National Guard | 23 |
| 3. Federal aid for riot training | 13 |
| 4. Federal police force | 0 |
| 5. No answer | 10 |

To cope with campus disorder, 54 percent favored increased State government control of colleges, while 23 percent favored the use of National Guard forces.

## CONGRESSMAN ESHLEMAN'S LATEST NEWSLETTER

### HON. EDWIN D. ESHLEMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. ESHLEMAN. Mr. Speaker, I am sending to my constituents my latest newsletter. I am including the contents of that newsletter in the RECORD at this point:

WASHINGTON SPOTLIGHT—REPORT FROM YOUR CONGRESSMAN ED ESHLEMAN

PICK A PAMPHLET

A checklist is enclosed with this newsletter. It is a catalog and order form for government publications which cover a wide variety of topics. I can get these pamphlets for you if you so desire. Just complete the order form and send it back to me. The instructions for this procedure are in my brief note on the front of the checklist.

BIG DECISION

After 15 years and $285,000 worth of planning, the Franklin Delano Roosevelt Memorial Commission has decided to plant a rose garden to honor the Nation's 32nd President.

AN APPEAL

This is the time of year when United Campaigns in nearly all localities make their annual appeal for funds. Because so many worthwhile programs are supported with the money collected by United Campaigns, your contribution is not only charitable but extremely valuable to your community.

THE SYSTEM

In a paragraph which didn't get widely reported, Vice President Agnew gave a definition of the American system which bears repeating. He said, "The system—our democratic system, here in America—is not a something-for-nothing machine. It requires that each of us contribute. Its base is not government. Its base is the people. Its great strength is not the great strength of government, but the strength of the people."

DRUG ISSUE

Most of this edition of my newsletter is devoted to the problem of drug abuse. It is an attempt to familiarize young people, parents, educators and community leaders with several aspects of the drug problem—the dangers to the individual and society, the different types of drugs, some of the language of the drug culture, and some suggestions for dealing with a deteriorating situation. I hope that I can communicate in some small way my very deep concern about the growing threat of drug abuse. I, also, am hopeful that this material will help bring about a better understanding of the whole issue.

DRUG ABUSE DEPENDENCE AND DISASTER

INTRODUCTION

Drug use is a part of our human history—and so is drug abuse. Drugs may be defined as substances which alter the structure or function of a living organism, and they have been known to man since the days of ancient Egypt and China. Down through the centuries drugs have been a blessing to man as a medical tool. Unfortunately, they also have been a curse when misused.

In modern America we are faced with widespread misuse of drugs. No one is certain exactly why we have this drug abuse problem, but some educated guesses have been offered. Some experts feel that social pressures and tensions have contributed to an irrational and impulsive use of drugs. Others feel that the mass media and instantaneous communications have made us more aware of drug abuse and therefore more susceptible to it. Still others attribute the growth of the problem to the emergence of a drug culture which views drugs as magic potions, capable of working miracles. Nearly everyone agrees that the illicit traffic in drugs has been a contributing factor since "pushers" are extremely anxious to find new and larger markets for their product. The disastrous increase of drug abuse among our young people probably can be traced to simple causes—the desire to belong to an "in" crowd, and/or the desire to escape from physical or emotional problems.

Drug abuse, then, is not new. The reasons given for its growth in recent years are not particularly startling. Nevertheless, solutions to the problem have escaped us. It is apparent that the problem cannot be dealt with legally, socially or morally until more people can separate fact from fiction in the matter of drugs, dependence on them, and the personal and social disasters they cause.

THE DANGERS

The drug user enters a dangerous world. He endangers himself and the world around him. In some cases these dangers are known and rationalized away by the user. But in other cases the dangers are unknown to a person who engages in some initial drug experimentation. Too often, individuals and society suffer because ignorance of the consequences paved the way to drug abuse.

Drug addiction is a combination of both physical and psychological dependence on drugs. An individual gives up self-determination to become a slave to drugs. His dependence may start by smoking the first joint, injecting the first fix, or swallowing the first pill. The rest is downhill.

The days of screaming meemies and violent withdrawal are pretty much over when an addict is properly treated, but other horrors remain. There are still ugly cysts and sores, scars and amputations, V.D. and infection, all the results of filth and abuse of needles. Mental collapse and long range damage to vital body organs have been shown to be directly related to drug abuse. Perhaps more far reaching, some authorities suspect that drug use may damage or change chromosomes leading to abnormalities in future generations.

Another element which cannot be overlooked is the legal aspect of drug abuse. Even

the most casual exposure to certain legally controlled harmful drugs can lead an individual into a nightmare of courts, convictions and prisons which can taint an entire life and career.

The dangers of drugs to the individual are the most serious consideration, but the dangers to the whole of society cannot be ignored. All of us suffer because money is poured into the pockets of organized crime to sustain the narcotics traffic. We are the victims of the crimes committed by drug addicts who steal and even murder to get money enough to support their habit. Persons under the influence of drugs commit irresponsible acts which threaten innocent lives and valuable property.

This list of dangers is a blanket accusation of drug misuse. Drugs are guilty until proven innocent, and the responsibility for such proof rests with those who advocate legalization of the drugs we now outlaw. Until that evidence is forthcoming, drug abuse is not only illegal, it's harmful—and stupid!

DRUG TYPES AND EFFECTS

Marijuana (cannabis derivative)—This drug is worthy of some special mention because it is probably abused more than any other. It comes from the flowering tops and leaves of the hemp plant which are dried or powdered to produce a product that can be sniffed or smoked. The effects sought by the marijuana user are sociability, euphoria and intensified sense perception. The adverse effects are impaired coordinated and memory, and a disturbed sense of time. While there is no evidence that use of this drug leads to physical dependence, the user can become psychologically dependent upon it. In addition, some recent findings at St. John's University in New York indicate that marijuana usage results in genetic damage.

Hallucinogens (Psychedelic including LSD, peyote, mescaline, DMT, DET, psilocybin, and others)—Hallucinogens usually are taken for perceptual experiences, exhilaration, distortion of the senses and enhanced creativity. The adverse effects are intensification of existing psychosis, suicidal or homicidal tendencies, panic reactions and recurrent flashbacks. Most evidence does not point to either physical or psychological dependence, but a very definite possibility of genetic damage has shown up in some tests of the hallucinogens.

DRUG SCENE: TERMS

BAG: One's favorite drug or "thing"
BIG C: Cocaine
BLASTED: Under influence of drug
BUTTONS: Peyote (cactus buttons)
BUSTED: Arrested
BURNED: Bad buy, cheated
CAP: Capsule of any drug or narcotic
COLD TURKEY: Abrupt withdrawal
FIX: injection of narcotics
GIVE WINGS: Give first heroin injection to a friend
HIGH: Under influence of drugs
HIT: On drag on a "Joint"
HOOKED: Dependent on drugs
JUNKIE: Heroin addict "HYPE"
MAINLINE: Inject drugs intravenously
OD: Deadly overdose, "Hot Shot"
OUTFIT: Paraphernalia for injecting
PEACE PILL: Veterinarian tranquilizer
P.C.P.-"Hog"
PUSHER: Seller, supplier of drugs
SPACED: Unable to concentrate "Mentally drifting"
STONED: High on drugs
TRIP: High on hallucinogens
TURN ON: To recruit or start your friends on drugs
TURNED ON: To start, be given drugs:
To be made happy or excited
TURNED OFF: To quit drugs
Narcotics (Opiates including opium, morphine, heroin, dolophine, methadone and codein)—The narcotics user is most often seeking euphoria, freedom from pain and increased confidence. The effects found are depression of brain, nervous system and body functions; and a feeling of lethargy and apathy. The narcotics are both physically and psychologically addictive. Organic or genetic damage does not seem to be a threat, but there are other related dangers such as fatal overdoses.

Amphetamines (Stimulants including Benzedrine, Dexedrine, Desoxyn, Methamphetamine, Methedrine and Cocaine)—The effects sought by an amphetamine user range from increased alertness, to increased confidence in mental and physical capabilities, to loss of weight. The adverse effects which have been noted are excitability, sleeplessness, loss of appetite, and toxic psychosis. This type of drug probably does not lead to physical dependence, but psychological dependence is possible. In addition there are some indications that organic damage may occur.

Barbiturates (Depressants including Phenobarbital, Nembutal, Seconal Amytal, Butisal and Luminal)—Barbiturates are likely to be used for initial relaxation, anxiety reduction, "hazy joyousness", sleepliness, or dulling of pain. The adverse effects include slurred speech, sluggishness, loss of coordination, quarrelsomeness, and erratic behavior. These drugs can be both physically and psychologically addictive and could also bring about organic damage.

Volatile chemicals (Vapors including model glue, dry-cleaning fluids, ethyl alcohol, shoe polish, lacquer, paint thinner and others)—The user of these drugs seeks hallucinations, changed color perception, and a "floaty", relaxed feeling. The adverse effects of such use are impaired judgment and vision, slurred speech, irritability, dizziness, and loss of appetite. Physical dependence is not a very real possibility, but psychological dependence is. Organic damage is also a proven result of misuse of vapors.

TELL TALE SIGNS

We must recognize the enemy to fight it effectively. There are some common symptoms which may indicate that an individual is misusing drugs. Here are some things to watch for.

(1) Sudden changes in normal behavior and performance patterns. (2) Unusual flare-ups or outbreaks of temper. (3) Deterioration of personal appearance. (4) Wearing sunglasses at inappropriate times and places to cover bloodshot, watery eyes, with extremely wide or extremely small pupils. (5) Appetite extremes ranging from none or very little to huge, especially for sweets or liquids. (6) Adoption of abnormal ideas and ideals in place of a formerly strong values system.

If someone you know shows definite drug abuse symptoms, it's possible that a problem has developed or is developing. The drug abuser must have help to deal with his problem. The best source of aid is a doctor.

CONCLUSION

Drug abuse is expensive for all of us. We spend millions of tax dollars each year to control abuse and to treat people who have become drug dependents. The cost also must be measured in the millions of dollars of lost productivity from individuals who rob themselves of the ability to contribute to society. The drug abuse nightmare of personal destruction, social rejection and criminal activity touches each American.

Therefore, drug use is not a matter of pure individual choice, because drug use breeds drug abuse. Medical control and legal restraints must be there to guarantee that drugs will be used as tools for man and not abused in a cycle of dependence and disaster.

## A REPORT FROM PARIS

HON. ROBERT W. KASTENMEIER
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. KASTENMEIER. Mr. Speaker, the following is a very provocative report recently brought back from the Paris peace talks. The report was mailed to me by Mr. James M. Dennis, a member of the Wisconsin Committee to Stop the War, and was written by Mr. Adam Schesch.

The Schesch report is based on information gathered by a commission of inquiry—a grassroots citizens group from Minnesota comprised of farmers, trade unionists, businessmen and women, professionals, members of the Black community, and members of the university community. These citizens spent June 25 through July 2 talking with the delegations of the Provisional Revolutionary Government of South Vietnam, representatives of North Vietnam, and members of our own delegation. The commission emerged spontaneously from an independent attempt by private citizens to gain facts beyond the information available through the mass media.

Efforts of the citizens group are to be commended, and offer new and valuable insights into the social and political forces now operating in Vietnam. Such knowledge is essential if we are to make meaningful progress in our efforts to bring the tragic Vietnam War to a negotiated conclusion.

I commend to my colleagues' attention this interesting report:

A REPORT FROM PARIS

(By Adam Schesch)

INTRODUCTION

On June 27 and 28, a very unusual group of American citizens held two days of intensive meetings in Paris with the delegations of the Provisional Revolutionary Government of South Vietnam and the Democratic Republic of (North) Vietnam. On Monday, June 29, this same group, called a Commission of Inquiry, had a Conference with spokesman for the Patriotic Laotian Front, known in the United States as the Pathet Lao, and the acting representative in France of a brand new guerrilla movement, the National United Front of Cambodia (NUFK).

What made this group unusual was its purposes and its composition. The Commission had grown out of the spontaneous reactions in Minneapolis-Saint Paul, Minnesota, to the invasion of Cambodia on April 30, 1970. The Twin Cities' Commission was organized for a specific reason—to go to Paris to discuss the questions about settlement most bothering the American public, with the "Other Side."

From the start, the group was bound together by a belief that total and immediate withdrawal of all U.S. forces from Vietnam is the best solution to the war. It knew, however, that it needed hard facts and concrete answers to the "Twenty Questions Americans Most Want to Know" if it was going to succeed in convincing a section of the American people that this solution is correct.

For this very reason, it decided that past expeditions to Paris had a fundamental weakness—they were not composed of the Americans who had the questions. So an American jury was picked. The people in

Minneapolis-St. Paul felt that the best group that could be chosen would be a cross section of a typical American city. They would be able to do what no group of Asian Studies experts, or famous dignitaries, or well known national antiwar activists could do. They could bring back information in a form people would understand.

The final delegation included: 1) a high school teacher (English), 2) an architect, 3) a Catholic priest, 4) a Japanese-American artist, 5) a farmer from a small town near the South Dakota-Minnesota border, 6) a Physics professor, 7) a writer, 8) a mental health worker, 9) a Vietnam Veteran, 10) a private investigator, 11 & 12) a wealthy Twin Cities businessman and his wife, 13) a Catholic mother of eight, 14) a retired assistant principal of a vocational-technical high school, 15) an electrician, 16) a dentist, 17) a mechanical maintenance worker, 18) a community organizer from the Black community in the Twin Cities, 19 & 20) two Black university students, 21) a Black secretary, 22) a physician, 23 & 24) a banker and his wife, 25) a shop steward in the United Auto Workers, 26) a truck gardener, 27) a Black educator, 28) a retired engineer, 29) a French language major, 30) a French language instructor, and 31) myself, a Ph.D. candidate in South East Asian history.

Our talks with the two delegations were held separately. On Saturday, we met with the PRG for 11 hours; on Sunday we held discussions with the DRV for 9 hours. The format of both the Saturday and Sunday sessions was similar. Each delegation chose to deliver an opening presentation, then followed a long period of questions and answers, a meal break and the showing of about an hour's worth of films. All in all, we were able to formally question the PRG delegation for more than five hours and the DRV delegation for more than four hours. Quite a bit was learned during the two hours smorgasbord meals with Vietnamese and French food, in which we broke down into small clusters of three and four and continued talking. For example, I had a half hour informal discussion with the official translator for the North Vietnamese delegation on the nation-wide village history project now underway in North Vietnam. (We are trying to gather together the personal notes from these discussions as they will enrich our account quite a bit.)

In formal statements and in the questions, the following topics took precedence: 1) the nature of the struggle in the South; 2) the question of withdrawal of American forces and the release of the prisoners of war; 3) the concrete aspects of a political solution including the holding of elections in South Vietnam; 4) the attitude of both groups to the question of reprisals; 5) the question of the Catholic minority; 6) the nature of land reform in the liberated zones in the South, in the program of the PRG, and in North Vietnam; 7) the relations between the PRG and the DRV towards Laos and Cambodia and the settlement of the Indochina question; 8) the destruction in the South and the question of reparations; 9) and the question of reunification of both halves of Vietnam.

Monday's schedule was quite different. Five people were assigned to go to the American Embassy to meet with Philip Habbid, the then acting head of the U.S. delegation to the peace talks. The basic purpose for seeing him was to find out what the official reactions were to some of the very concrete proposals we had obtained. This group spent two hours and fifteen minutes with him before rejoining the rest of the delegation which was meeting at the Friends Meeting House with three different delegations.

We met at six PM with several unofficial spokesmen for the Laotian Patriotic Front, the Pathet Lao, and from seven-eight PM with the acting spokesman for the new National United Front of Cambodia, the formal organization that grew out of the joining together of Prince Sihanouk, with the older Cambodian guerilla movement, as a result of the *coup d'etat* of March 1970.

The meeting with the Cambodian delegate brought some surprises. First of all, I obtained a copy in French of the program of NUFK which had just been released. Secondly, our group learned some unusual facts concerning the mysterious Columbia Eagle which was kidnapped on the high seas, a few weeks before Sihanouk's overthrow, by two so-called "hippies" and brought to Sihanoukville. Finally, we got a detailed explanation of the nature of Sihanouk's relation to Funk and the older "Khmer Rouge" guerilla movement of the 1960's.

Later on that evening, we attended a three hour reception given in our honor by the Union of Vietnamese in France, a large umbrella organization of more than a dozen groups whose membership is in the thousands, representing a large part of the 30,000 or so Vietnamese residing in France at the present.

With Monday night, the formal program of the Commission of Inquiry ended. Most of the group left for Minneapolis Tuesday morning. I had made arrangements however, to see several people on Tuesday, Wednesday, and Thursday, in order to utilize the trip in a more complete fashion. I was able to arrange conferences with Jean Chesneaux, Philippe Devillers, Wilfred Burchett, with the Information Officers of the PRG and the DRV, and with Anneck Levy, a French authority on Thailand. Unfortunately, Burchett was unable to make my appointment on Thursday and I had to leave for Madison without having a private interview with him.

The following text is less than one-half of the original report I prepared.

THE PROVISIONAL REVOLUTIONARY GOVERNMENT

One of the key problems of the Paris Peace Talks is the continued refusal by the United States delegation, acting on instructions from Washington, to recognize the primary position of the new Provisional Revolutionary Government. For purposes of a settlement of the war, the various forces on the "other side" consider the PRG the "senior" member of their bargaining team. In their terms this means that the PRG is the group which is going to be the most directly involved in every phase of the settlement. This point concerning the withdrawal and a political settlement was made most emphatically to our Commission in Paris.

A typical example of the ways in which the United States delegation continues its policy of non-recognition was revealed in Ambassador Lodge's formal leave-taking of Paris last year. He said goodbye to the delegations from North Vietnam and Saigon, but did not even telephone the Provisional Revolutionary delegation.

The North, the Democratic Republic of Vietnam, admits that it is indeed helping its brothers in the South, but at the same time, makes it quite clear that it is playing second fiddle to the PRG in terms of the structuring of the settlement proposals. At no time did the southern PRG say to us, "The position of the North is as follows . . .", while on the other hand the North, the DRV, used the phrase, "As the PRG has stated . . .", several times during discussion of key questions. So, in order even to talk about the points covered at the conference, it is necessary to discuss the nature of the key delegation—the PRG.

The PRG is actually the concrete symbol of the southern guerilla movement's intention to move toward a post-war government of national reconciliation. The National Liberation Front has deliberately stepped down from the international podium in order to begin the process of creating conditions increasingly conducive to the formation of varied Vietnamese groups, formal and informal, which can unite around a basic, minimum policy of national independence and internal social change. This concept of ever more embracing coalitions also seems strange because of the successful campaign over the years to represent the National Liberation Front as simply a monolithic Communist organization rather than a closely knit association of established groups and formerly unorganized peasants. In this coalition, the southern branch of the Communist Party of Vietnam, called the Peoples' Revolutionary Party, was and is a prominent but definitely minority member. No western estimates have ever put the Communist membership in the National Liberation Front at more than two per cent of the total.

The NLF, particularly since 1967, has been very definite about its desire to include in a post-war settlement, as many of the separate factions in the South as possible. Thus, during 1969, it took advantage of the growing support among previously uncommitted or formerly pro-Saigon elements, to launch the Provisional Revolutionary Government in which the NLF itself a coalition, is merely one part, although a large part. In addition to the NLF, there are two other sections to the Provisional Revolutionary Government, whose delegation we met in Paris—the non-NLF elements who joined with the NLF during 1968 and 1969 to create the PRG, and a section of seats in the top decision-making bodies which are vacant and reserved for groups yet to come in. Thus, in order to bring into focus those with whom we spoke, one must realize that the NLF is no longer functioning at the international level, although, of course, many of the PRG officials in Paris and in Vietnam were and are officials in the NLF.

THE WITHDRAWAL TIMETABLE

The question which was uppermost in the minds of the Commission and the Vietnamese delegations concerned the withdrawal of American forces. The opening talk of the PRG delegation on Saturday and some of their later responses attempted to clarify the meaning and the reasons for the PRG's use of the words "total," "immediate," and "unconditional" withdrawal of U.S. forces. They began with the explanation of the word "total."

The PRG feels that the Nixon administration is attempting to force a carefully worked out deception upon the American public. They argue that Washington is attempting to, remove during the coming year, almost all of the remaining combat ground forces in South Vietnam, and that the drastic reduction of combat casualties which will result, is purposely designed to weaken the antiwar movement by distracting a large portion of its participants from continued activity. They contend that Washington would like to leave between 200,000 and 300,000 men in Vietnam to carry on an intensified air war against the guerillas. They supported their contentions with some very hard figures on bombing tonnage increased throughout Indochina since Nixon assumed office.

The PRG's attitude toward this tactic is quite specific. They feel that by all past standards they have won the war on the ground and that the entire armed pacification program has been defeated in all its forms. Their view is that the air war is directed, not against guerilla forces, but against the population which provides the food, shelter and recruits for those forces. In other words, it is an air war of terror to drive huge sections of the population out of the rural areas and to concentrate them where they can be controlled by the Saigon troops reinforced with new equipment and supported by the United States Air Force.

The PRG contends that by this means, Washington's plan is to create a situation in which Saigon can hold on in much the same manner as South Korea.

From this argument flows one of the key demands, and a demand whose actual terms have been distorted for over a year. The PRG is demanding the total withdrawal of all

U.S. forces in the shortest time that such a withdrawal can mechanically be effected. No political conditions will be accepted as the price of that withdrawal.

"Immediate withdrawal" usually conjures up images of thousands of American soldiers dying horrible deaths as they run for their lives toward a Dunkirk-type evacuation. In fact, the Vietnamese have laid out an extremely complete and concrete timetable for the withdrawal of U.S. forces.

If the U.S. will agree in principle to a total withdrawal of all its forces over an immediate period of time which they define as extending over six months, they will treat as mechanical details the following items:

First they understand the six-month timetable to consist of an orderly, that is, a staged withdrawal, not the scramble for the boats Washington has depicted. They pointed out to the Commission that the U.S. command in Saigon has estimated a total withdrawal could be accomplished in only four months. On this point, I had the feeling that if the U.S. were to say seven or eight months, they would sit down and talk about it.

The PRG would treat the orderly withdrawal of Americans as "mechanical," i.e., not to be quibbled over. They also emphasized their willingness to treat in a similar fashion all the details of withdrawal referring to the safety of American forces. The word "safety" was used at least a dozen times during the discussion of this question.

Finally, as part of the phased military withdrawal, they would treat as mechanical details, not subject to political qualification, the release of all American Prisoners of War. This point became especially relevant when they discussed the fact that there are U.S. POW's now being held in South Vietnam by the forces of the PRG. When POW's would be released was clearly answered—all POW's will be released as part of the military ceasefire. This was repeated and emphasized. It would seem to make futile all efforts to obtain release of American POW's before such a ceasefire. Moreover, it would lay to rest any doubts that the release of the POW's would become a political football to be argued about after the war ended.

In summary, the PRG does want an immediate and total withdrawal. It has clearly stated that the word "immediate" is referring to a short and specific timetable—the period six months was used several times. The PRG would not quibble over all details connected with the orderliness and the safety of the withdarawal, and the simultaneous release of all American POW's.

The settlement of the war involves in addition to the military withdrawal of United States forces, which is seen as a necessary first step, the ultimate reconciliation of several elements among the Vietnamese people. These might be broadly grouped into four categories: 1) the Provisional Revolutionary Government, whose dominant member is the National Liberation Front; 2) the Saigon Government, which represents at this point mainly the civilian and military bureaucracy; 3) several formal and informal groups in the South who are caught between the two camps, including most of the Catholic community, several factions of the Buddhist community, intellectuals and professionals, segments of the two large religious sects (the Cao Dai and the Hoa Hao), and a small uncommitted part of the peasant population; and 4) the government and peoples of North Vietnam.

Immediately related to this complex problem of social reconciliation, is the political settlement, about which three key areas were discussed in Paris: 1) the holding of elections in South Vietnam and the creation of a post-war government; 2) the question and problem of reprisals; and 3) the question of reunification of the two halves of Vietnam.

The Provisional Revolutionary Government and the Democratic Republic of Vietnam delegations both placed a heavy emphasis on the importance and concreteness of the settlement formulas given (8 May 1969) by the PRG's predecessor in Paris, the National Liberation Front. The PRG and DRV both indicated that the U.S. delegation had yet to give a concrete reply to specific sections of that proposal. During our discussions in Paris, the two delegations referred to key sections of this ten-point settlement proposal. For example, it outlines the creation of a Provisional Government to be made up of all parties who will support a minimal program such as that suggested in the following: during the intervening period between the restoration of peace and the holding of general elections, NO party shall impose its political regime on the people of South Vietnam. The political forces representing the various social strata and political tendencies in South Vietnam that stand for peace, independence, and neutrality, including those persons who for political reasons have to live abroad, will enter into talks to set up a Provisional Coalition Government based on the principles of equality, democracy, and mutual respect with a view to achieving a peaceful, independent, democratic, and neutral South Vietnam.

The Provisional Coalition Government will carry out the military agreements concerning the withdrawal of foreign troops. Its major duty, however, will be to provide an atmosphere of unity so that all parties can work toward the holding of democratic elections, the drafting of a permanent constitution, and the formation of a government based on both. To effect this, the Provisional Revolutionary Government must work to ensure full democratic rights, the release of all political prisoners, and the absolute prevention of reprisals. Its duty specifically is: to prohibit all acts of terror, reprisal and discrimination against people having collaborated with either side and who are not in the country or abroad, as provided for in the 1954 Geneva Agreements on Viet Nam.

Then having laid stress on the fact that the Provisional Coalition Government is composed of all elements, the Ten-Point Program outlines the step-by-step route to normal political conditions.

The people of South Vietnam shall settle their own affairs without foreign interference. They shall decide for themselves the political regime of South Vietnam through free and democratic elections. Through free and democratic elections, a constituent assembly will be set up, a constitution worked out, and a coalition government of South Vietnam installed, reflecting national concord and the broad union of all social strata.

North Vietnam is quite clearly excluded from every single step in this process. It is only after all these steps have been taken and after there is a functioning government of South Vietnam which is pursuing a neutral foreign policy, that any talks on reunification can begin.

The reunification of Vietnam will be achieved step by step, by peaceful means, through discussions and agreement between the two zones, without foreign interference. Pending the peaceful reunification of Vietnam, the two zones shall re-establish normal relations in all fields on the basis of mutual respect.

Both delegations in Paris were emphatic on two related aspects of the reunification problem. The first aspect is that both parts of Vietnam are equal during the gradual reunification process. The second aspect is that Vietnam is essentially one country. This is expressed forcefully in the Ten-Point Program:

The military demarcation line between the two zones at the 17th parallel, as provided for by the 1954 Geneva Agreements, is only of a provisional character and does not constitute in any way a political or territorial boundary. The two zones shall reach agreement on the state of the Demilitarized Zone, and work out modalities for movements across the provisional military demarcation line.

The Vietnamese outlined the sequence of necessary steps to reunification. Thereafter, they talked at considerable length about particular aspects of each phase of the problem:

A. The Provisional Coalition Government is to be a major guarantee of peace. This was emphasized in the discussions relating the formation of the Provisional Coalition Government to the holding of elections and to the no-reprisal policy. The PRG argues that open participation of all groups in the PRG is in and of itself one of the best guarantees that no pressures will be brought to bear against any one faction. This is so because all factions will have a share of the interim power of the PCG as it runs South Vietnamese affairs.

B. The actual composition of the Provisional Coalition Government was intended to be a barrier against one side or the other controlling the nature of a post-war government. It is emphatically not an attempt to impose any kind of final government in advance. The PRG responded to President Nixon's charge that they wanted a guarantee of participation in a post-war government as part of a settlement package. The main goal of the Provisional Coalition Government is free elections whose outcome will rest with the voters.

C. As for the fairness of elections, three distinct points were mentioned: 1) all parties would be involved in creating and administering the election mechanism; 2) they were opposed to all outside forces intervening in the situation because it was a problem for the South Vietnamese themselves. (This is another reason why they feel the U.S. has to withdraw its forces first. While the United Nations was specifically ruled out, the International Control Commission was not banned as a possible observer of the elections. This might be worthwhile checking into); 3) the North Vietnamese are to have no role in these elections, or in the drawing up of the constitution for a post-war government for South Vietnam, or in any aspect of the political process which would begin with the formation of the Provisional Coalition Government.

D. The attitude of the North in this regard was quite clear. The North is completely in agreement with the PRG. Because of the actual history of the last fifteen years, reunification will be a careful and lengthy process in which South Vietnam participates as an equal partner with the North. The North believes, in principle, that the South Vietnamese people should decide the shape of their government themselves. Although the North is currently participating in the war in the South, its aid is not the same as U.S. aid to Saigon. They believe that Vietnam is ultimately one country.

E. Finally, the PRG made it quite clear that it wants to put its fate in the hands of the voters, obviously confident that it will get support from a significant section of the population. What Washington was unwilling to face in 1954 must be confronted by those now in power and that is that a large part of the population, this time in South Vietnam alone, is supporting a movement in which a native Communist Party is a trusted and major member. We must ask: Will we allow Washington to continue to prevent a nationwide election in South Vietnam as it did when Diem refused (1956) to hold the elections that the Geneva Agreements had specifically called for?

REPRISALS

After the opening statements on the elections in the South, the delegation felt that it should raise the question of reprisals against individuals or groups for their previous activities. We found that the PRG's discussions of the PCG and elections were

reinforced by the PRG's own attitude toward the question of reprisals and what it regards as proof of its good intention. These fell into four areas: the Catholics, political opponents, the nature of the Civil War, and land reform (see the analysis section).

The PRG and the DRV took a very firm stand on the question of the Catholic minority. They said that the bulk of the Catholic community was made up of peasants who were in all ways except religion, identical to the rest of the population of the South. In all respects except religious discrimination, they had suffered from the same things that drove the non-Catholic population into a resistance movement against Diem. The PRG and DRV maintained that they do not discriminate against Catholics. They both referred to the numerically significant participation of Catholics in both the leadership of the NLF, the PRG, and in the government of North Vietnam.

Referring to the active participation of Catholics in the resistance movement, a PRG delegate asked why should the movement want to shatter the unity it had already achieved between Catholic and non-Catholic. This point was accompanied by colorful examples of how ordinary Vietnamese Catholics aided the NLF during its years of struggle, even hiding NLF cadre from Diem's police in Saigon.

The PRG discussed the question of political opponents. Here the discussion started off with a logical question—the right of the United States and the Saigon regime to talk about this factor in light of their past records. Indeed, the Diem government has admitted that between 1954 and 1960, 48,200 persons were arrested as alleged Communists in South Vietnam. The DRV delegation maintained that these figures were actually over 500,000 imprisoned and over 70,000 killed.

It was pointed out that even if the end of the war might bring an unavoidable number of deaths from personal, non-official reprisals, it would be much less than the massive killing going on right now as the war continues.

At Saturday's conference with the PRG, we saw a color film prepared by a team of internationally known French movie makers. It explored all aspects of the "health question" in the South, including the incredible damage to the countryside and to the people from our bombings. For a person who is used to enjoying the beautiful farm country of Dane County (Wisconsin), it was torture to see formerly rich rice lands turned into a landscape resembling the moon with miles of fifty to one hundred foot wide bomb crater, three to five craters wide. The horror of the war against the people was brought home to us by the scene of napalmed women and children and burning villages.

Regarding reprisals, still another consideration about the nature of the war was presented. It is a civil war in which brother has been pitted against brother. Several personal examples came from our hosts. In one case, an uncle of the speaker was in the Saigon administration. In another case, cousins were in the Saigon armed forces. "With brother, parents, cousins, and members of the same village and province in all camps, how could one conceive of a 'bloodbath' taking place?" Perhaps it was too coincidental that the Vietnamese spokeswomen reverted to English for the word "bloodbath." When questioned after the translation was given, she stated that there was no word for "bloodbath" in Vietnamese.

THE SITUATION IN THE SOUTH

The material and memories that we brought back from Paris helped us acquire a more realistic view of the Viet Cong. We had discussed the nature of the land reform in the South as well as in the North, the nature of the Woman's Liberation Movement, relations with minority peoples, the participation by ordinary people in the political decisions of the Liberated areas, and the kinds of programs being carried out by both the PRG and the DRV. For example, we saw the health programs of the PRG. This included color film sequences showing donated medicines from Europe being transported in trucks, on bikes, by foot, and in boats over South Vietnam countryside to reach village dispensaries and hospitals. At the same time, we viewed an underground jungle factory producing hospital equipment and watched an operation being performed in an underground surgery room. Finally, we saw a traveling medical team as it administered free inoculations to the members of a village. We thus realized that the PRG was already a functioning government, and that its supporters were human beings quite like ourselves. These are facts that should not easily be put aside.

As for the military situation itself, most of my information came from conversations and interviews outside the conference. (See last paragraph of Introduction for names of sources.)

According to my sources, the PRG/NLF has deliberately changed its whole military posture since Tet. It has purposely moved its operations from populated areas because the United States was relying on air strikes against all areas which appeared to be hostile. In order to keep aggressive American or Saigon ground units busy, the military strategy has been to carry out minor but continuous operations on the fringes of the populated areas, and to make daring strikes at military bases. In many cases, the Saigon Army commanders and units at the local level have either worked out secret agreements with the PRG/NLF or decided not to stir up trouble where overt military operations are not being carried out.

The military situation is reflected in the civilian aspects of the PRG. Because of the enormous gains made during the Tet offensive in rural areas, and because of its previous strength, the PRG no longer had to give military protection to its civilian governmental apparatus at the local level. In much of the rural areas, elections have been held to establish self-governing committees at the village level. In many cases, PRG officials also hold nominal positions in the Saigon bureaucracy. This kind of duplicity is intended to protect heavily populated areas from becoming the victims of indiscriminate bombing raids because they are classified as "contested areas."

A couple of very amusing accounts were told about this sort of thing, and it was pointed out to me that hardly a week goes by without some new scandal of "reconciliation" being uncovered by the Saigon secret police. Yet the overwhelming bulk of these "arrangements" have gone undetected. As one interviewer put it, "The PRG has spent the first two years eating out the Saigon administration like acid." He went on to describe Saigon as no more than a facade kept up to prevent more "Ben Tre's" (the city we "bombed to save"). In this same fashion, my French contacts discussed the steadily growing series of demonstrations for peace and negotiations in Saigon and Hue. The hand of the PRG is clearly present, and the demonstrations indicate that the question of possible reprisals is simply melting away under the impact of overt and covert arrangements.

ANALYSIS

In order to understand the political events of the last two years, one must briefly review the course of the Vietnamese revolution over the last generation. What marks the course of the Vietnamese revolution is a basic faith in the idea of a gradual revolution, a permanent revolution, the idea that the revolution is not simply a date but a series of steps to a goal.

What the Vietnamese revolutionaries have is faith that if they are given a chance to explain and educate, they can bring the overwhelming bulk of the Vietnamese people along the road to a revolutionary transformation of present-day Vietnamese society. This belief partly rests on a proven assertion that many of the practices of a revolutionary society—like cooperation in rice farming in the village—have very strong roots in precolonial Vietnam. In this sense, the Vietnamese revolutionaries have correctly analyzed that there have always been strong cooperative and community-oriented tendencies in the Vietnamese culture and social arrangements. This historic element has allowed them to fashion a complex alliance of forces whose aim is a twin revolution—a nationalist and a socialist revolution linked as mutually re-enforcing goals.

The dual nature of the Vietnamese revolution is not supported by every single socioeconomic grouping in the society. This must be made clear. In addition, every single element of the social revolutionary program is not viewed in exactly the same way by all groups supporting it. But the Vietnamese Communist Party and other secular social revolutionaries have been able to obtain overwhelming support around a core of revolutionary goals. These are what might be called the "irreducible minimum." They are the reforms that will have almost universal appeal, yet at the same time allow for possible progress to greater forms of social cooperation, including Vietnamese socialism, by being the necessary "first steps."

A key example of this kind of "revolution-building reform" is the land reform program of the NLF. All but the tiny upper strata of the landlord class can agree to it. Yet even this group is not to be crushed under the land reform program. The land reform program of the united front of all groups, including the Communists, simply demands that all surplus land beyond that which a family needs for a family farm will be redistributed.

As the PRG put it, "Land policy is consistent with the special conditions of South Vietnam, i.e., in which the whole people are participating in the war effort. This means that there is a balance between the landless and the people with land. The key is land to the tiller at the place where he works. This means land to the peasant family including families of soldiers in the puppet army. We know that many men are forced to join the army.

As for the landlords, none will lose more than the surplus, the amount beyond what his family can cultivate.

It is certainly true that the two per cent of the top landlords who held forty-five per cent of the land right into the late 1960's will lose a great deal of wealth if they stay around. That is why several thousand of them will probably choose to leave the country with suitcases full of dollar bills, as several thousands have already done.

It might help here to point out that the much discussed peasant protests in the North in 1956 did not concern moves to force people into communes and collectives but rather a poorly administered and mechanically carried out land distribution program. This is an important difference. It is also significant that only by 1960 did the number of peasant families exceed fifty per cent. This gradualist approach is reflected by the fact that even as late as 1967, the United States Army Area Handbook for North Vietnam spent several pages describing the locally controlled cooperative system, which is still the main form of organized agriculture in the North. In fact, mechanisms still exist whereby a family which wants to pull out may pull out of a cooperative in much the same manner as in the United States, by going through a formal legal withdrawal process.

In addition to land reform, the other two

elements of the irreducible minimum program of social change are: 1) the emancipation of women from their subordinate roles, and 2) the granting of local control and autonomy to 750,000 hill tribes. These two aspects of the PRG program are seldom discussed in the United States, perhaps because Saigon has made no comparable commitment.

Proof of the PRG's commitment to women's liberation was the composition of the delegation. The Chairwoman of the PRG delegation and the Minister of Foreign Affairs is Madam Nguyen Thi Binh. She heads a staff which has a sexual balance at all levels of responsibility.

Women and members of minority groups are represented in important decision-making posts in the Provisional Revolutionary Government. Members of the Edeh and Jarai minorities hold several posts, including the position of representative of the Autonomous Nationalists Movements in the Central Committee of the PRG and NLF. The Central Committee also includes representatives of the lowland Khamer (Cambodian) minorities, representatives of the Cao Dia and Binh Xuyen sects, and representatives of the Catholic and Buddhist clergy and laity.

The Vietnamese revolutionaries, in addition to working on the key areas of land reform, women's liberation and minority group rights, have encouraged and built upon the cooperative aspects of the Vietnamese village through such programs and through village clinics, free health care and the construction of communically owned irrigation systems. These types of activities produce a powerful tendency toward a socialist society. Yet, this program is accepted by non-Communists as a domestic policy around which they can all unite.

It has already been stated that the PRG has made strong guarantees of safety to these groups. The real point is, though, that since the Tet offensive, the NLF and PRF have been moving to implement these guarantees. According to Phillipe Devillers and other contacts in France, the NLF and PRG have changed their focus of activity since Tet. They are concentrating on talking to people and on encouraging people to reach an accommodation with the PRG.

Over the last two years, the PRG has succeeded in reaching numerous supporters of Saigon, exiles, and fence sitters. This is extremely important. It indicates that the war in Vietnam has become a true war of national liberation, a war against a foreign invader.

In this grand anti-imperialist alliance, long-standing political differences have been put aside. This was the significance of the reception given us by the Society of Vietnamese in France. This is an umbrella organization, made up of many fence sitters, voluntary exiles, Catholics, professionals, etc., who had left Vietnam in various waves over the last few years.

The PRG has convinced large numbers of the Vietnamese community in exile that they have a positive role to play in post-war Vietnam. In Paris, there are many intellectual, doctors, professors, students, scientists, and managers who are planning for the first time to return to post-war Vietnam. How else can one explain the request which was put to me in great detail that Americans help collect scientific, medical, and professional text books for eventual shipment to Vietnam?

In Vietnam itself, the most sensitive question concerns what would happen to low ranking officers and non-commissioned soldiers in the Saigon Army. Battle casualties suggest that a tacit understanding has already been reached. When the Saigon Army invaded Cambodia, they suffered casualties far higher than in the weeks before the invasion. Yet Saigon suffered these high casualties in Cambodia at the hands of a retreating army. The earlier casualties suffered in Vietnam were presumably the result of the aggressive actions of the Saigon forces as they daringly plunged into the heart of the enemy's military concentrations. If this is so, how does Washington explain Saigon's low casualties in Vietnam?

As for the Catholic, the PRG stated to us, Archbishop Binh of Saigon, the head of the southern Catholic community, has formally endorsed the "no reprisal" assurances of the PRG/NLF and the sections of the political settlement. (Even more surprisingly, *Far Eastern Economic Review* on March 5, 1970, noted that Archbishop Binh and Denang's Bishop Pham Ngoc Chi, a refugee bishop, have even called for reunification with the North.) If they are satisfied, who are we to doubt?

In recent months, the Thieu-Ky regime has made wholesale arrests. All of the people arrested have been calling for peace and negotiations with the PRG. Those arrested include members of the Buddhist clergy, the university community, assembly members, trade union leaders, white-collar administrators, and Catholics. This means that members of all of these groups believe that the PRG has a workable program and that it will adhere to its guarantee for their well-being.

The picture, then, is that only a very small minority of the urban Vietnamese will not have worked out guarantees for their well-being and safety when the war comes to an end. In a real sense, the Provisional Coalition Government has already been formed. It includes, in addition to the PRG/NLF and its huge peasant base, the urban-based Buddhist sects, the Catholic community, the urban intelligentsia, and the reconciled civilian and military officials from middle and lower echelon positions.

Who is left? President Thieu has already shipped his two sons out of the country and his wife is rumored to have secretly purchased a villa in Rome. Others will also provide for themselves abroad. The wealthy merchants and landlords, the collaborators, the corrupt high officials, and the dope smugglers—these people will undoubtedly leave. In fact, as Devillers pointed out to me, one of the key points which is implicit in the PRG agreement to a staged withdrawal over several months was that this would allow the quiet and orderly departure of whatever upper class individuals chose to leave.

## LAW AND ORDER

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. FINDLEY. Mr. Speaker, the gun as a tool of the criminal is a source of great concern. Accordingly I have proposed in House Resolution 17323 stiff penalties for possession of firearms by a criminal. I have continued, however, to oppose all proposals for Federal registration and licensing of guns. In my view, such would be unfair to the law-abiding gun owner and do nothing to deter the criminal.

I have also proposed that the Federal Government finance an expansion of the FBI academy—where several 20th district police have already received training—so all local police can take special training and refresher courses.

To help curb civil disorders I have proposed that the National Guard be given special riot weapons and training so it can serve more effectively in its growing role as a police reserve.

## BEWARE OF THE "TROTS"

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. ASHBROOK. Mr. Speaker, during the antiwar demonstrations here in Washington last October and November one organization which did yeomen work in reaching potential sympathizers and in organizing the demonstrations was the Student Mobilization Committee to End the War in Vietnam—SMC. Cooperating with the New Mobilization Committee and the Vietnam Moratorium Committee, SMC played a leading part in the fall offensive, that program formulated months in advance of the October and November protests to produce a public ground swell of opposition to the Vietnam war and the administration's policy in that area. Before, during, and after the demonstrations, sources such as FBI Director Hoover and a number of us here in Congress pointed out that SMC was controlled by Trotskyites, through the Socialist Workers Party—SWP—and its youth arm, the Young Socialist Alliance—YSA—who, although divorced from Moscow nevertheless worked diligently for the overthrow of the U.S. Government.

With the advent of a new school year, it is especially urgent that students on college campuses and in high schools alert themselves as to the philosophy, strategies, and tactics of the "Trots" among youth circles. In the September issue of VFW, the magazine of the Veterans of Foreign Wars, Mr. Hoover provides useful information on these organizations in an article entitled "The Red University—Goal of Trotskyist Communist in the U.S." The article notes that today there are an estimated 50 YSA chapters on college campuses throughout the Nation and "they operate openly and effectively, representing orthodox communism's most extensive current beachhead in higher education." Mr. Hoover further emphasizes the threat of these radicals to young citizens and our way of life:

> For that reason they seek to radicalize students, to teach them to hate America and jeer at our Flag, to encourage disrespect for our laws. They want young people to hate the military, to belittle our national leaders, to laugh at veterans organizations, such as the Veterans of Foreign Wars, and to ridicule the men and women who have so valiantly defended our nation around the world.

The VFW and Mr. Hoover are certainly to be commended for publicizing this information to correct the lack of knowledge about the Trotskyites and their designs for the youth of our Nation.

On September 24 the VFW issued a press release calling attention to the Hoover article in an added effort to spread the word about the Trots. I insert at this point in the RECORD the VFW press release of September 24 and the above-cited article by Mr. Hoover from the September issue of VFW.

J. EDGAR HOOVER ARTICLE DRAWS PRAISE FROM EDUCATORS

WASHINGTON, D.C. (Sept. 24).—The Young Socialist Alliance (YSA) today has an estimated 50 chapters operating openly and effectively on American campuses, according to J. Edgar Hoover.

In an article appearing in the September issue of the Veterans of Foreign Wars magazine, the F.B.I. director said these chapters represent orthodox Communism's most extensive current beachhead in higher education and are the largest and best organized youth group in left-wing radicalism.

Hoover said the Trotskyist youth group, founded in the late 1950s, has shown a vast membership growth and resurgence in the past 24 months. He cited the YSA's National Convention in Minneapolis last December that drew an estimated 1,000 members and observers.

"This sudden—and surprising—upsurge of Trotskyist Communism has sprung from the recent student unrest on our college campuses, especially the rise of New Leftism and the agitation against the war," the F.B.I. director explained.

The V.F.W. article stated a "ready-made channel of Trotskyist influence on the college campus is the Student Mobilization Committee."

Hoover said few people realize that the SMC movement is controlled by the Trotskyists and that this old-line Communism is making an almost unbelievable comeback in the U.S.

"Here lies a danger of great magnitude," the F.B.I. director warned. "This threat becomes clear when we realize that Trotskyists' activities on campus are really secondary to their main goal, namely, to bring about a Communist revolution.

"They want young people to hate the military, to belittle our national leaders, to laugh at veterans organizations such as the Veterans of Foreign Wars, and to ridicule the men and women who have so valiantly defended our nation, the director wrote.

The National Commander of the V.F.W., Herbert R. Rainwater from San Bernardino, Calif., commended Hoover on the magazine story which he said has drawn praise from educators throughout the nation.

---

THE RED UNIVERSITY—GOAL OF TROTSKYIST COMMUNISM IN THE UNITED STATES

(By John Edgar Hoover, Director of the FBI)

A college student strode across the university campus. He was a clean-cut young man, his hair cut short, wearing a pair of brown trousers and a white sports tie. There was nothing of the beatnik or hippie type in his appearance.

In his hand he carried several pieces of paper, a small book and a magazine. He was on his way to meet a friend.

A few minutes later the student met his friend, another young student. The two shook hands and then started to talk in an animated fashion. The first student suddenly, as if he needed some printed data to reinforce a point he was making, took the magazine he was carrying, opened it to an article and then beckoned his friend to read it.

What was the magazine? It was a copy of "Young Socialist."

What is the "Young Socialist?" It is the organ of the Young Social Alliance (YSA), the nation's top Trotskyist youth group. (The magazine has now been replaced by another publication.)

The two young men were on their way to a meeting of the campus chapter of YSA.

On the West Coast a conference opened in a school auditorium. It was a blustery winter day, but attendance was excellent. Into the auditorium walked a tall young man and an attractive young lady. They were to be speakers at the conference.

Who were the people attending this Conference? They were members of the YSA and its parent group, the Socialist Workers Party (SWP).

What was the young man on the university campus showing his friend in "Young Socialist?" An article entitled "YSA Program for the Campus Revolt." He pointed particularly to a paragraph (under the heading "A Revolutionary Strategy") dealing with the "Red University," a major concept of Trotskyism.

"The concept of a 'Red University,'" the paragraph read, "oriented toward the needs of the working class and the oppressed first arose in Europe. The concept means that the university ought to be transformed from a factory producing robots into an organizing center for anticapitalist activities, a generator of revolutionary education, an arena for mobilizing youth in the struggle for the complete transformation of society."

The discussion in the campus YSA meeting that evening was on the role of the university in making a Communist revolution.

What was the topic of the speeches of the tall young man and the attractive young lady entering the auditorium to attend the West Coast Conference?—the "Red University."

The young man lashed out savagely against American universities. The university, he charged, was playing a despicable role in society by allowing ROTC training and military recruitment on campus. The real function of the university, he asserted, should be to expose the fallacies of capitalism and to train students to bring about a "socialist" (in Trotskyist language "socialism" means Communism) revolution.

The lady speaker was even more bitter. She denounced universities as mere "factories" producing "technicians" and "robots" for capitalism. Trotskyists, she said, must encourage young people to become dissatisfied—not only with their schools but also with the whole structure of society. That's the way to bring about the revolution. That's the way to radicalize and agitate students. That's the way to bring about the "Red University."

In these two incidents, a campus meeting and a West Coast conference, we see the everyday operations of an Old Left Communist group known as Trotskyists. We see also one of their major current aims—the influencing of young people leading, they hope, to establishing the "Red University."

Much less has been heard about the Trotskyist brand of Communism than the Stalinist Communists of the Communist Party, USA. The Trotskyists are old-line, orthodox Marxist-Leninists, basing their ideology on the teachings of Marx, Engels and Lenin.

However, they follow the interpretations of these Communist "masters" by Leon Trotsky, Lenin's famous collaborator in the Russian Revolution of 1917, instead of what they call "Stalinism," that is, the kind of Communism developed by Stalin and his successors in the Soviet Union. To the Trotskyists, Stalin "corrupted" the original teachings of Communism (especially through his terror tactics) and only they, the Trotskyists, possess what they call the "pure" version.

The Trotskyists (followers of Trotsky are called Trotskyists; their opponents call them Trotskyites) detest the Soviet Union and its representative in the United States, the Communist Party, USA (though recently the two groups have worked together in antiwar programs, more or less tolerating each other for tactical purposes).

For years, the Trotskyists (the Socialist Workers Party was founded in 1938 by members expelled from the Communist Party, USA, as a result of the Stalin-Trotsky feud) were orphans in the ideological vineyards of the left. They were small, ineffectual and virtually forgotten when compared to the much larger Communist Party, USA.

But the tables have now turned. The Trotskyists, especially its youth group (YSA was founded in the late 1950's), have shown a vast membership growth and resurgence in the last 24 months until YSA is today the largest and best organized youth group in left-wing radicalism. Trotskyist influence is especially strong in the youth field, particularly on the college campus.

For example, at YSA's National Convention in Minneapolis last December, roughly 1,000 members and observers were in attendance. Enthusiam was high. The convention was effectively organized and run. A number of new recruits were obtained.

This sudden—and surprising—upsurge of Trotskyist Communism has sprung from the recent student unrest on our college campuses, especially the rise of New Leftism and the agitation against the war. Trotskyist leaders have skillfully exploited this situation for their own advantage.

For example, the "YSA Program for the Campus Revolt," which the two young students were discussing on the University campus, is filled with so-called "immediate demands" to attract the extremist student: "end campus complicity with the Vietnam war, abolish ROTC, end all ties between the university and the military. No military recruiters on campus. End cooperation with the Selective Service system, abolish the draft."

Then there are demands for "student-faculty control of education:

"Student-faculty control over the university, including the hiring and firing of faculty members and administrative officials, repeal all anti-student legislation, no police on campus."

In addition, YSA's program demands: "Free education through the university level for everyone who wants it. Abolish tuition. An annual salary for all students with automatic increases to offset inflation. Guaranteed jobs upon graduation."

Today there are an estimated 50 YSA chapters on college campuses throughout the nation. They operate openly and effectively, representing orthodox Communism's most extensive current beachhead in higher education.

A ready-made channel of Trotskyist influence on the college campus is the Student Mobilization Committee (SMC). The SMC is a nationwide antiwar group which, along with the New Mobilization Committee to End the War in Vietnam, has influenced literally thousands of students, faculty members and others against the war in Vietnam. SMC has received extensive publicity in the national news media and its leaders are frequently interviewed as "representatives" of student opposition to the American presence in Vietnam.

Early in 1970, an SMC National Conference was held in Cleveland, Ohio, for the purpose of organizing antiwar protest strategy. Some 4,000 individuals of varying ideological backgrounds attended. Yet, few people know that SMC is controlled by the Trotskyists. YSA and SWP leaders hold top positions in the SMC and call the signals.

Under the banner of Leon Trotsky, old-line Communism—virtually unopposed—is making an almost unbelievable comeback in the nation. Here lies a danger of great magnitude. This threat becomes clear when we realize that Trotskyists' activities on campus are really secondary to their main goal, namely, to bring about a Communist revolution.

"Our participation (in campus agitation)," says YSA's *Program for the Campus Revolt*, "is designed to demonstrate in practice how the student struggle is linked to the broader struggle to replace capitalism with socialism (Communism)."

In other words, the current situation of unrest on campuses is being used by the

Trotskyists merely as an agitational point, to stir up discontent, to radicalize students and to obtain YSA and SWP recruits. The main goal is a total transformation of our society along Marxist lines.

That's why the Trotskyists have developed the concept of the "Red University." They know that the young people of today will be the leaders of tomorrow. For that reason they seek to radicalize students, to teach them to hate America and jeer at our Flag, to encourage disrespect for our laws.

This YSA-SMC attempt to stir up discord among GIs is not motivated by any legitimate concern for the GI. To the Trotskyists, this agitation is just another tactic, as their program on campuses, to radicalize young people and to lay the groundwork for the Communist revolution.

In this process, the Trotskyists seek—in orthodox Communist teaching—to create a strong centralized party, with discipline and organization, which can serve as the vanguard of revolution. This Trotskyist resurgence should be a matter of concern to all patriotic Americans.

As citizens, veterans and Americans, you should know more about Trotskyist Communism in our country—its origins, tactics and aims.

You should be familiar with the Socialist Workers Party, the Young Socialist Alliance and the Student Mobilization Committee. The next time you see or hear about their activities, you will realize that they are not some distant, strange groups or some bland, non-revolutionary organizations which intend no harm to our country.

Many citizens, unfortunately, equate the word "socialism" as used by the Trotskyists with a democratic form of socialism. Nothing could be further from the truth. In Trotskyist language, "socialism" or "socialist" means Communism. Trotskyism is revolutionary Communism working for the destruction of this nation.

To meet this Trotskyist challenge, we must be positive in our support of America—its ideals, its values, its principles.

As never before, America needs help. In today's world, with so many forces endeavoring to disrupt democratic government, each citizen must be willing to stand up and boldly say: "You can count on me."

A free society can survive only through the wholehearted, intelligent and vigilant support of its citizenry.

I know, speaking for the readers of the *V.F.W. Magazine*, that you will do your share.

## EQUAL RIGHTS AMENDMENT

## HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mrs. GRIFFITHS. Mr. Speaker, at this time, I would like to insert into the RECORD a letter I received from Robert L. Kahn, president of the Society for the Psychological Study of Social Issues, expressing support for my equal rights resolution, House Joint Resolution 264. The letter follows:

THE SOCIETY FOR THE PSYCHOLOGICAL STUDY OF SOCIAL ISSUES,
*September 14, 1970.*

Hon. MARTHA W. GRIFFITHS,
*House Office Building,*
*Washington, D.C.:*

The Society for the Psychological Study of Social Issues is a group of approximately three thousand psychologists and allied social scientists who seek, in various ways, to bring theory and practice into focus on human problems of the group, the community, and the nation as well as the increasingly important ones that have no national boundaries.

The Society supports all women in their determination to achieve constitutional equality, and strongly urges the Senate to pass the Equal Rights Amendment to the U.S. Constitution without change as presented by the Honorable Martha W. Griffiths.

Sincerely yours,

ROBERT L. KAHN,
*President.*

## STATEMENT BY DR. IVAN HINDERAKER

## HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HANNA. Mr. Speaker, in this time of increasing student unrest, I call the attention of my colleagues to a recent statement by the chancellor of the Riverside campus of the University of California, Dr. Ivan Hinderaker.

I have known Dr. Hinderaker personally for over 15 years. Over these years I have come to have a high regard for Dr. Hinderaker both as an educator and as an administrator. His statement is a constructive contribution to the unending efforts to reconcile dissent with orderly progress.

The statement follows:

TO ALL STUDENTS AT UCR

(Statement by Dr. Ivan Hinderaker)

You are members of a unique generation. It is a generation extraordinarily concerned not with things as they are but things as they should be. In this concern, you should both be encouraged and commended.

UCR has a tradition of coupling its concern for change with an equally strong concern for change with non-violence. This campus has developed in an atmosphere of freedom—an atmosphere which has allowed all of us, students, faculty, and administration, freedom of expression, freedom of dissent. In particular, UCR students have been encouraged to "do their thing." The result has been a campus where ideas, not people, have been in conflict, and vigorous inquiry, not violence, has obtained.

Apathy, or worse, indifference to such issues as war, environmental pollution, economic exploitation is not a virtue with me. It is not a virtue at UCR.

Campus rules governing dissent and its expression are few. We cannot, and will not, tolerate any action that interferes with the rights of another individual or that interrupts the functioning of this campus. That's it. The individual who cannot live within this simple policy should plan now to leave. We cannot compromise or be flexible on this issue.

So demonstrate if you choose. Present a collective statement of your views. Do so by voice, or with placards, posters, and leaflets. But do so in the awareness that dissent, like all human action, has its limits.

Dissent and demonstrations are good when they serve as a means of expressing ideas—for alerting our society to injustice, to alienation, to inequality of opportunity. Demonstrations are bad when they become an end in themselves, when they are destructive of both human needs and resources.

Students who resort to violence to express their anger or release their frustrations help destroy the one bright hope we have: the freedom of ideas and inquiry. Any UCR student who resorts to violence or any UCR student who interferes with the rights of others or interrupts the functioning of this campus will be dismissed.

The limits of dissent at UCR are broad. But when dissent crosses the line into disruption, it must be—and will be—stopped. The survival of the University and this campus is at stake today and we will not permit the actions of a few to destroy the freedom of us all.

## SENATOR SKIDMORE OF TUSCALOOSA COUNTY

## HON. WALTER FLOWERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. FLOWERS. Mr. Speaker, last Wednesday, September 23, we lost a great man from my home county of Tuscaloosa in the untimely death of our Alabama State senator, E. W. Skidmore. A true man of the people, "Skid" had abilities found in only the very few, and characteristically he was most generous with his time and talents in service of his fellow man. Although never afraid to take a stand on controversial matters, Senator Skidmore was equally loved and admired by friend and foe alike.

He was an old and treasured friend of mine and in tribute to his memory I include the following article from the Tuscaloosa News of September 24, so eloquently written by Associate Editor Paul Davis, at this point in the RECORD:

SENATOR SKIDMORE OF TUSCALOOSA COUNTY

(By Paul Davis, associate editor)

The old log cabin was like something out of a picturebook. It was built of logs, had a sagging front porch and those giant oak trees out front.

In the fireplace, the oak logs crackled and the senator, in khaki pants and shirt, told one tall tale after another.

It really wasn't cold enough for a fire, but the setting demanded it. There was a nip in the air and fall was on its way. All the boys had been swinging from ropes dangling from the branches of the oaks and they perspired as they sat in front of a fire that was too hot.

The senator first produced popping corn and later peanuts. There was an appropriate pan for each and the boys took turns shaking the pans over the fire, passing the handle on to a companion when the handle grew too hot or the fire started to make the knuckles on a small hand start to burn.

The older folks sat in rockers and canebottom chairs, but all attention was on the senator, not the kids. Finally, after much urging, he took down a black-frayed case from the mantle over the fireplace and took from it a shiny violin—he called it a fiddle.

He held his fiddle tenderly, almost caressing it.

He plucked the strings about midway up the neck and the sound attracted the attention of the youngsters in front of the fireplace. They turned and watched as he twisted the wooden pegs and the vibrations on each string were perfect.

Then he took his bow and played the beautiful tunes you could hum, like "Beautiful Dreamer" and "Greensleeves." Then he'd throw in one of the real old fiddlin' tunes that made you pat your foot.

That was the man, the senator, E. W. Skidmore—a giant in the eye of young boys who clustered around him.

I was one of those boys who had the opportunity—through family and church ties—to be around the senator so many times and

spend those long Saturday afternoons at his cabin and in his home. Many of those afternoons were spent on the sleeping porch of the house which for many years now has served as his office.

With his son Paul, we built houses in the trees and melted lead and made toy soldiers by the hundreds. When a mold wouldn't tighten just right and the soldiers came out a bit heavy on one side, the senator could, with a screwdriver and a pair of pliers, solve the problem in minutes. He always had a minute or two to spare.

When he died Wednesday, he was doing what he loved best, practicing law in the courtroom with 12 jurors at his side to listen to the beautiful oratory. He loved to speak and people loved to hear him.

He used the oratory as a toy many times, playing with words simply to entertain his audience. At other times, he used all the compassion he had and in a masterful way blended the words that could melt the hardest of hearts.

He used this great power to push through some of the state's most meaningful school and mental health legislation. He served the mentally ill and retarded of Alabama well and for four years was on the national mental health board.

Yet, deep down inside there was the politician image he loved.

He was the Deep South Senator that has been pictured in a thousand cartoons. He could start a rumble deep in the pit of his stomach and belch out those deep velvet tones that could make a woman swoon and every man jealous.

He was a symbol of manhood, strength and power.

He wore his trousers high, well above the stomach he developed in later years of life. The trousers were drawn in at the top and he looked like he wore a girdle. Then there was a massive chest which made him look more like an operatic baritone than a senator. But it served him well.

His son Paul had said two weeks ago that the senator was doing well, had cut his civic work load, was organizing his time and was really in his most productive years.

He had a quiet office where he was surrounded by his books and his guns. He loved the guns. They were on the wall, in his desk and he for years carried a tiny handgun in his pocket. That was during the years he was prosecuting people twice a week in city court and he often wondered if some drunk might someday become unhappy enough with him to do a foolish thing. Thus he carried the little gun, often in his coat pocket.

And on his necktie there was a miniature pistol. He delighted in showing it. He would take it off, reach into a drawer and get a cap, put it in the tiny gun and fire it, blow away the smoke and put it back on his tie.

He always loved that fiddle, too. Just a month ago, he played a tune or two at a meeting of the Tuscaloosa Civitan Club. He didn't do this sort of thing much anymore. A lack of practice and fingers that were no longer nimble make fiddlin' a bit of a chore. In his younger days, he could play half the night away, joining with fiddlers like Bob Kyle and Temo Callahan.

Another side to the senator's life—and a major side too—was his church, the Northport Church of Christ. He had been known to teach classes and preach when called on.

Church officers talked among themselves about an occasional $100 bill which popped up in the Sunday collection plate. In fact, it was once discussed in a business meeting, but the senator didn't say a word. He placed the bill there, but it was never mentioned. His regular contribution was by check, the bill was just slipped in once in awhile because he loved his church.

He was a deep thinker and he involved himself totally in everything he did—from his church work, to his legisislative duties to his legal work. And he was doing just that when he died.

"I think that's the way he wanted it to end," his son Paul said Wednesday afternoon. "He loved that courtroom and a jury trial. That was just the greatest joy of his life."

Paul is an attorney, too. While his father worked in the courtroom of Judge Dominick Wednesday, Paul was a few floors away in Judge Mize's courtroom. On his jury was the County Coroner Rufus Strickland and it was Strickland, a friend of the senator's, who gave the mouth-to-mouth resuscitation to try to save the life of a friend.

It was almost a year ago now that the senator received his first warning about his heart and the setting was similar. He was arguing a case before the Alabama Supreme court when he fell. That time he made it. This time, the heart was gone and he was dead before he reached the hospital.

Gov. Albert Brewer summed it up well yesterday:

"He used his eloquent speaking ability to plead the cause of the less fortunate and left his mark on much progressive social legislation . . . his accomplishments will benefit generations yet unborn."

The Senator was a good man.

---

## HORTON SALUTES NANCY TURNER, OUTGOING PRESIDENT OF WOMEN'S COUNCIL OF MEMORIAL ART GALLERY

---

## HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HORTON. Mr. Speaker, when I think of the outstanding cultural benefits accruing to the greater Rochester, N.Y., area because of the Memorial Art Gallery, I always think of the oft-quoted biblical statement that "man does not live by bread alone."

I was reminded of this recently when I read a fine tribute in the Rochester Democrat and Chronicle to Mrs. Richard L. Turner This was in a column headlined Nancy Spotlights The Doers and it enumerated many of the fine contributions that Nancy Turner continues to make to her community.

She recently completed 2 years as President of the Women's Council of the Memorial Art Gallery. Her tenure was marked by many outstanding events and inspiring progress in the history of the gallery. For the past 10 years much of Nancy's volunteer time has been devoted to the furthering of the Art Gallery's impact on the area. We are all indebted to her for her splendid leadership.

Especially noteworthy is Mrs. Turner's statement of appreciation for the gallery. She said:

Art nowadays is more important than ever. We all have so much leisure, and we can't spend it all worrying about the problems of the world. The gallery is a place to refresh, to re-investigate ourselves. It is important to preserve the fine things that have been done—Rembrandt, Cezanne, the others—as well as to press on to new accomplishments.

It is always refreshing to be reminded that the Nancy Turners of this world are mighty important and valuable people. They are indeed the doers, and all of the rest of us benefit in many ways by their devotion to their causes.

I would like to share with my colleagues in the House of Representatives the newspaper column from the Democrat and Chronicle, for I believe all will find it inspiring. It was headed "It Is a Place To Refresh" and pays a well-deserved tribute to Nancy Turner. The article follows:

IT IS A PLACE TO REFRESH

"When we gave our Greek Ball at the gallery this June, it occurred to all of us that it might be interpreted as frivolous. The world, the country, everyone's own little bank account were in such jeopardy . . ."

"But we were confident that we were having a beautiful party in a place which is well worth thinking about."

Mrs. Richard L. (Nancy) Turner, who this May completed her two-year term as president of the Women's Council of the Memorial Art Gallery, has spent most of her volunteer time for the past 10 years thinking about the gallery. She started as a docent (one of the volunteer guides) and took on, successively, posts as chairman of volunteers, chairman of hospitality, and the presidency.

The presidency made her ex-officio member of gallery committees, as well as of the board of managers. She took the job in May 1968, three months before the gallery reopened after extensive re-modeling. "It's a job where you work intensely, but in spurts."

Mrs. Turner, petite and well-tanned with a casual curly hairstyle, is the mother of four children, ranging in age from 10 to 17.

Her husband, also on the board of several volunteer groups, is chairman of the board of Schlegel Manufacturing Co., a local firm making weatherstripping. Their 10-room, 130-year-old Greek Revival house at 22 Stoney Clover Lane in Pittsford overlooks a huge chunk of Western New York, five acres of which they own. They moved the house to Pittsford from Henrietta 12 years ago, cutting it in half and carting it down the highway.

At the gallery, Mrs. Turner and the Council face a similar task of recounciling an old institution with a changing environment.

The 185-member council has recently expanded its numbers, but it is still an Old Rochester, membership-by-invitation-only organization. "We're slowly becoming aware of the problems of reaching out to the community. We want to be a place for everyone . . . After all the gallery has a terrific membership, more than 8,000 members."

The Women's Council does not work with selection of exhibits or the actual running of the gallery. "Our role is supportive, to help the staff, to provide services beyond what they can do. We also do some fund-raising, of course."

Volunteers come from gallery membership lists and low-key recruitment campaigns, as well as from the Women's Council itself. "We have need for so many different kinds of abilities. We try to involve anyone interested in the gallery, and draw the most dedicated people into the Council."

The Education Department is supported by volunteers who work as docents; operate the 30-school traveling exhibit program; transport students in the Monday sculpture class for the blind and the summer-school program for inner-city youngsters; run parties for students in gallery art programs and sponsor art-appreciation courses.

Volunteers help staff the Gallery shop, as well as the Lending and Sales Gallery. They raise money through projects like the outdoor cafe at the Clothesline Art Show, the tours of foreign art centers, smaller projects like this fall's three-day tour of the Metropolitan Museum of Art in New York. That conscience-pricking Greek Ball raised more than $4,000 which probably will go towards the purchase of an art object for the gallery.

"We do our share of sherry-pouring, too,"

said Mrs. Turner. "You might say we provide the woman's touch at those affairs." Such affairs include openings, teas, receptions, dinners and conferences where the Gallery inevitably offers guests sherry from a glass pitcher and coffee from an urn, served by a gracious Council Volunteer.

"An important function of the Council, of any women's council really, is to generate enthusiasm for the organization. But you must be careful not to do things which are connected in people's minds with old-fashioned, very social affairs. We do some thinking before we undertake a project."

The Gallery, she thinks, is a place more people should know about, and enjoy. "Art nowadays is more important than ever. We all have so much leisure, and we can't spend it all worrying about the problems of the world. The gallery is a place to refresh, to re-investigate ourselves. It is important to preserve the fine things that have been done—Rembrandt, Cezanne, the others—as well as to press on to new accomplishments."

Besides the Gallery, Mrs. Turner is active in the Allen's Creek Garden Club, which is helping restore the Stone-Tolan House; the Women's Council of the Rochester Museum, and of the alumni clubs of Smith College (B.A. in theater) and The Masters School in Dobbs Ferry.

## CRAMER ANNOUNCES FILING IN SUPREME COURT

## HON. WILLIAM C. CRAMER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. CRAMER. Mr. Speaker, as my colleagues in the House know, I have filed an amicus brief in the Charlotte-Mecklenburg case which will be heard by the U.S. Supreme Court on October 12, to consider the legality of busing in our schools. At this time I want to bring to the attention of this body the leadership role played by Congressman ALBERT WATSON in this important matter.

After counseling with me for some time, Congressman WATSON asked to join on my brief which outlines the legislative history and congressional intent of sections 401(b), of which I was the author, and 407(a) of the Civil Rights Act of 1964 prohibiting the transportation or assignment of students in public schools to overcome racial imbalance.

Due to his strong belief that busing is illegal and that the courts and school officials are defying the will of Congress and of the people in this matter, Congressman WATSON then set out to secure the support of other Members of Congress.

Greatly to his credit and as evidence of his influence with his fellow Members, 83 Congressmen and Senators agreed to join in my brief.

Answering his persuasive call were representatives of 22 States, almost equally divided between Republicans and Democrats.

Last Friday, September 25, I filed a motion in the Supreme Court formally asking leave for those 83 Members of Congress to join in my brief.

Having such a large number of Congressmen petition to enter this case is of historical importance. Hopefully it will communicate to the Court the fact that the Congress of the United States wants and expects its prohibitions against busing to be heeded.

Were it not for Congressman WATSON's efforts, this demonstration of congressional support would never have occurred. All of those who believe in local government and personal liberty can be proud and thankful of what my friend and colleague, ALBERT WATSON, has accomplished.

Following is a list of the 42 Democrats and 41 Republicans who joined in my amicus curiae brief:

PETITION

ALABAMA

Sen. John Sparkman (D).
Sen. James B. Allen (D).
Rep. Jack Edwards (R).
Rep. William L. Dickinson (R).
Rep. George Andrews (D).

## ISRAELI SECURITY AND THE U.S. COMMITMENT

## HON. FLORENCE P. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mrs. DWYER. Mr. Speaker, the Washington Evening Star this week carried two especially perceptive articles on the subject of United States-Israel relations in this time of great crisis in the Mideast. I believe they deserve special attention.

The first, on September 23, was written by Richard Wilson and the second, on September 24, carried the byline of Crosby S. Noyes.

Both these columns—considered individually or together—present a convincing case for a clearer and more decisive expression of the U.S. commitment to the independence, territorial integrity, and security of Israel.

This is an objective I have long and strongly advocated—for these reasons:

First. Ambiguity or equivocation about this country's commitment to Israel can only weaken Israel's confidence in the United States and provide dangerous encouragement to Israel's enemies.

Second. Hesitation or delay now can only increase the cost and the risk of any future assistance the United States provides Israel, assistance it must provide in any event if Israel's security becomes more directly threatened by joint Soviet-Arab operations or weapons.

Third. Clear, explicit, and demonstra-

ble U.S. support of Israel security will help stabilize the Mideast situation by removing all doubt about the U.S. position on the part of the disputing parties. In a shifting, complex, sensitive situation, doubt is dangerous and clarity desirable.

Fourth. Unqualified U.S. support will not arouse any greater hostility toward the United States than already exists among the Arab nations. It will not bring any added risk of further hostilities, for Israel is not an aggressive power and the Arabs can only be deterred by the certainty of effective response. Nor will such a U.S. posture reduce our ability to advance a peaceful settlement in the Mideast. By helping to equate the balance of power in that area, we would be contributing to the possibility of realistic negotiations and an equitable settlement.

The articles follow:

[From the Washington Evening Star, Sept. 23, 1970]

ARMS FOR ISRAEL SEEMS TO BE BEST FOR U.S.

(By Richard Wilson)

The net result of events in the Mideast is that the United States is now more deeply and directly involved than President Nixon originally intended.

While the odds are considered to be against direct United States intervention in Jordan, contingency plans have had to be considered. In general, involvement of U.S. forces which have moved into the eastern Mediterranean area cannot be ruled out.

These were the conditions the President wished to avoid in his original delay in withholding from Israel additional Phantom jet fighters-bombers and in making his proposal for the Mideast cease-fire. But now, following Premier Golda Meir's visit, it appears more unavoidable than ever that the United States will be compelled to supply Israel with the highly sophisticated equipment it desires to counter the Soviet-manned missile bases.

The American airline hostages held by the Palestinian Arab commandos and civil war in Jordan, with Syria's evident intervention, have immensely complicated the problem. Taken separately the fate of King Hussein is not considered vital to American interests, but as part of the general turmoil in the Middle East this is a highly explosive factor which could set off a chain reaction.

Several factors need to be borne in mind when judging what President Nixon will do in this highly dangerous situation.

It should be recalled that in the case of the seizure of the USS Pueblo by North Korea, with its crew held hostage and subjected to severe torture, the United States took no direct retaliatory action. The action was not taken because it might have endangered the lives of the Pueblo crew and because there was no way, short of an unthinkable direct invasion of North Korea, that retaliation could have been effective under the circumstances.

A similar condition seems to exist with respect to the air passenger hostages. They have been dispersed into several groups and thus could not be released in a single attack even if they survived while the rescue operation was under way.

This would seem to rule out any dramatic airlift carried out by stealth in the dark of night. Evacuation of other American personnel in Jordan, if the fighting continues, might be another matter but the State Department has seen no need for this action yet. If Nixon follows the methods used to obtain freedom for the Pueblo crew it will be attempts by secret negotiation.

Insofar as direct intervention to rescue the government of King Hussein is concerned, Washington apparently is relying heavily on the unshaken belief that the Soviet Union does not desire a confrontation from which there could be no backdown.

In spite of the bad faith of the cease-fire, during which the Egyptian military position was greatly strengthened, the Nixon administration is relying basically on Russia's interest in not having a major war in the Mideast. This faith may be proved misplaced but it is being given a further test.

Summed up, the U.S. policy is expected to continue to be so, although each day the United States is drawn in more deeply.

In the end, this may cost the United States more than a billion dollars in economic and military aid for Israel which President Nixon had been seeking to avoid.

Some speculation has centered on the point that Nixon is capable of direct and dramatic action, as in Cambodia, and thus he may act similarly in Jordan or Israel. This speculation leaves out of consideration the fact that the Cambodian operation was controllable and low risk, quite different from intervention in the Middle East where our forces are not large, when they exist at all, and do not have the immediate backup of the half-million men who were nearby in Vietnam.

The best bet, therefore, seems to lie with strengthening Israel so it will be made evident that a new Russian-backed attack by Egypt and other Arab countries would be at a very high risk for them.

This is the process which will have to begin now, and Mrs. Meir seemed to indicate when she left Washington that it would begin. Perhaps it is too late, but it is better late than never.

---

[From the Washington Evening Star, Sept. 24, 1970]

ISRAEL DOUBTS ON THE UNITED STATES FAR FROM RESOLVED

(By Crosley S. Noyes)

Despite the atmosphere of cordiality and mutual comprehension generated in the course of Golda Meir's visit, some grave and possibly insoluble problems will continue to trouble relations between Israel and the United States.

In the immediate and fairly superficial context, the Israeli prime minister's trip was a success. She was successful in breaking the linkage—assuming any linkage existed—between an American willingness to supply arms to Israel and Israel's unwillingness to engage in any peace talks as long as Egypt and the Soviet Union continue to violate the terms of the cease-fire agreement.

On this point, the Israeli case is strong.

There is no question at all that the Egyptians and Russians have taken advantage of the cease-fire to move a complex system of anti-aircraft missiles into the zone bordering the Suez Canal's west bank. There is no question that this move—taken after all parties agreed to a "standfast" arrangement on the construction of military emplacements—seriously threatens Israel's defense lines if shooting begins again.

In this situation, any peace negotiations are out so far as the Israelis are concerned. It isn't just that the Egyptians and Russians acted with callous duplicity in the matter of the cease-fire. In the Israeli view, the violation of the cease-fire agreement is proof that any agreement that might be reached with the Egyptians would be worthless, regardless of what assurances might be given from the other side.

It also confirms their suspicions that the intention of the Egyptians and Russians is to renew their "war of attrition" against Israel as soon as they feel the time is ripe. The arrival in Egypt of bridging and amphibious equipment reinforces expectations of an attempt to break Israel's Bar-Lev defenses and invade the Sinai peninsula.

To negotiate in these circumstances, the Israelis say, would be to negotiate "with a pistol at our head." The choice, they are convinced, would be to accept the Russian and Egyptian terms or face the possibility of a military defeat. Accepting the Russian and Egyptian terms, in the Israeli view, would be the equivalent of accepting the inevitability of another all-out war.

The Nixon administration, with considerable reluctance, has agreed to go along with this line of argument at least part way. Assurances have been given that some, if not all, of Israel's military needs will be supplied, including aircraft and electronic equipment designed to offset the new sophisticated Russian missile system. The Americans also concede that Israel has been put into a sticky military position. But they also suggest that Israel's position will be no less disadvantageous if there are no negotiations and if the war of attrition resumes at the end of the 90-day truce.

The problems between the United States and Israel, however, go far deeper than this disagreement over tactics. They go, in fact, to a fundamentally different concept of how Israel's security can best be assured.

The Nixon administration apparently is basing its policy on the hope that the Soviet Union's interests are best served by avoiding a new outbreak in the fighting and a direct confrontation with the United States in the Middle East. It is convinced that negotiations under the auspices of Sweden's Gunnar Jarring offer the best possibility of a settlement of the Middle East conflict. And it seems willing to bring pressure on Israel to get the negotiations started.

For their part, the Israelis, whose sole concern is for their own security, cannot understand American passivity in the face of the rapidly expanding Soviet military presence in the Middle East. To them, this presence represents a deadly threat. For while they are confident of their ability to deal with the Arabs, they know that they cannot fight the Soviet Union and win.

The Israelis have no real trust in American assurances when it comes to our willingness and ability to guarantee Israel's security. They remember only too well how Britain, France and the United States repudiated their own guarantees of Israel's borders on the eve of the 1967 war. And their confidence has not been bolstered by the American performance in the case of the present cease-fire violation.

They are painfully aware also of their dependency on the United States as a source of arms. They fear, with some reason, that if a negotiation gets under way, the United States will use this leverage to force Israel into disastrous concessions to the Arabs—that they will, in fact, be negotiating "with two pistols at their head" and will have no choice except capitulation to Soviet-Arab terms.

In short, the crisis of confidence is very far from over. And it will take a good deal more than reassuring words to convince Israeli leaders that the United States, in a time of great peril, is a trustworthy ally.

---

## MAN'S INHUMANITY TO MAN—HOW LONG?

### HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks:

"How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

How long?

---

## OLEAN WOMAN DIRECTS VFW WAR PRISONER CAMPAIGN

### HON. JAMES F. HASTINGS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HASTINGS. Mr. Speaker, the other day Frank Borman spoke at a joint session of the Congress on one of the most agonizing aspects of the war in Vietnam—the fate of U.S. prisoners of war.

In connection with Mr. Borman's speech, it is most appropriate that I call to the attention of my colleagues the work of Mrs. Alexander Cottone, of Olean, N.Y., in my district, and the organization she so ably serves—the Veterans of Foreign Wars.

Mrs. Cottone was elected president of the Auxiliary of the National VFW at its meeting last month in Miami Beach, Fla. Her first official act on returning to Olean was to launch a massive petition-signing campaign aimed at mustering national public support to obtain the release of our captive servicemen, some of whom have been prisoners longer than any American in any war.

Mrs. Cottone reflects the deep concern we all feel for the safety of the approximately 1,400 held in North Vietnam and for their anguished wives and families. She is a woman of energy, wisdom, and great dedication. She believes deeply in this cause, and as a thematic guide for this effort, she has chosen the words: "Our Flag—so proudly we hail."

Her selection to head up this project is a source of personal pride to me and to our district, as well as all of New York State where her efforts on behalf of the VFW and its many veterans-aid programs are well known.

Mrs. Cottone says:

If Americans unite in showing that they care, they may be able to bring about the relief and release of American prisoners of war held in Southeast Asia.

It is my understanding that the United States officially lists 375 prisoners of war being held in North Vietnam; another 77 in South Vietnam, and three in Laos. Listed as missing are more than 1,000 servicemen.

The North Vietnamese have failed to live up to a single article of the Geneva agreement which they signed in 1957. They have barred inspection of prison camps by neutral groups such as the International Red Cross, and their treatment of prisoners violated all the basic standards of human decency.

It is a cruel irony that these men who hold freedom so dearly should be captive. We, as Americans, would be without conscience if we fail to do all we can to secure their release.

I urge every American to join in support of this effort by the VFW so that these prisoners of war can be reunited with their families.

---

## ERODING PUBLIC CONFIDENCE IN THE BAR

### HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. WYMAN. Mr. Speaker, I have long urged the disbarment of Attorney William Kunstler. On February 26, 1970, I wired the president of the American Bar Association as follows:

FEBRUARY 26, 1970.

BERNARD G. SEGAL, ESQ.,
*President, American Bar Association,*
*Philadelphia, Pa.*

What are you doing about acting to put the American Bar Association or at the very least yourself as president on public record with the New York Court of Appeals requesting disbarment of Kunstler. Am advised Santa Barbara burning of Bank of America branch yesterday directly attributable to Kunstler inflammatory incitations broadcast on national TV. No person who so conducts himself in or out of court has the right to remain in good standing. There must be some way the American Bar can act to at the very least show the American people it cares something about such flagrant misconduct.

Regards,

Congressman LOUIS C. WYMAN.

On April 10, 1970, I wrote President Segal that—

Kunstler's activities are so blatant, flagrant, contemptuous, unethical, unprofessional, and violative of his oath as an officer of the court, as to warrant immediate effective disciplinary action.

Subsequently, on President Segal's recommendation, I wrote Attorney Bonomi of the Bar Association of the city of New York, inquiring concerning the status of proceedings to disbar Kunstler, only to receive a response that—

All records in disciplinary matters are confidential unless made public by order of the appellate division.

In my opinion the organized bar owes it to the public to purge itself of professional activists who urge criminal activity outside the law and who demonstrably incite to overt acts of violence in this country.

The bar owes its living to public confidence and reliance. Unless it deals firmly and responsibly with those who disgrace the bar, who defy and defile the law of the land, and who make a mockery of the lawyer's oath to uphold the Constitution of the United States, public confidence in lawyers and the bar will be destroyed. The continued undisciplined incitements of Messrs. Kunstler and others to sedition, insurrection, and civil disobedience, are an indictment of the organized bar, not only of New York but throughout the Nation. Even the great American Bar Association cannot afford to stay aloof from such deliberately contemptuous conduct.

In this connection a recent column by William F. Buckley, Jr., appearing in the Washington Star of September 25 is significant.

WHY NOT DISBAR WILLIAM KUNSTLER?

(By William F. Buckley Jr.)

The other day, asked by the moderator of a debate at the University of Rochester if I could suggest a measure that would help to bring judicial reform, I answered yes, the disbarment of William Kunstler.

Many of the students booed. I replied that they could hardly be booing me, it must be that they disapproved the canon of ethics that binds lawyers in New York State.

Either Kunstler must be disbarred, I said, or the canon of ethics repealed: The two cannot coexist. The crowd was silent, but sullen, as was Kunstler, who shared the platform with me.

It was a coincidence that the day before, James L. Buckley (he is my brother, which is also a coincidence), running for the U.S. Senate in New York, called publicly for Kunstler's disbarment. He asked the other two candidates, Richard Ottinger and Charles Goodell, to join with him in asking the Association of the Bar of the City of New York to take action against lawyer Kunstler.

A still further coincidence is that the evening before the debate at Rochester I saw a pre-publication copy of the October Playboy magazine which carries a long interview with Kunstler. Some of the racier passages no doubt would have been quoted in the letter addressed by James Buckley to the president of the bar association, the Honorable Bernard Botein, if James Buckley had read Playboy.

On resistance: "It is the role of the American left," says lawyer Kunstler, "to resist rather than merely protest: To resist illegitimate authority."

What is "illegitimate authority"? Why, the authority that ordains "the draft . . . any payment of taxes to support the war in Vietnam . . . the domestic and foreign policies of a government that crushes people on every level (he means the U.S. government) . . . all the things in this society that tend to degrade and destroy people."

In very plain English, Kunstler says no American need obey the law.

How, specifically, should we go about breaking the law? Well, take the college situation. "The students can take over (their) college by occupying its buildings." Just plain occupying them? No—the students should occupy the buildings pending the administration's capitulation. If the administration refuses to grant the students' demands, they move one step further. "Another form resistance could take would be the burning down of a particular college building."

This was too much even for Playboy. "You condone arson" Kunstler was asked.

"Yes," said Kunstler, "if a point has been reached in a given situation where the mechanisms of society are not responding to serious grievances."

In plain English that means: Go ahead and burn down the building if in your opinion your grievances are sincere, and the mechanisms of society have not appeased you.

Speaking for myself, I can count 68 times during the period since my 21st birthday, when, applying the Kunstler Code, I'd have felt compelled, personally, to put a torch to the White House.

Can we assume that when the Vietnam war is over, so will Kunstler's war against the United States? Not at all. "I would hate to think," he told Playboy, "that the war in Vietnam could be the only catalyst for resistance. There is so much more that remains to be resisted: The oppression of black people . . . poverty . . . unequal distribution of wealth, and so on."

Really, our society is surely suicide-bent if William Kunstler is permitted to serve as a *lawyer*. One might as well license a werewolf to practice medicine.

Kunstler is a revolutionary. He wishes ardently to politicize all American institutions, and he begins, of course, with the courts.

Was the recent mess in Chicago old judge Hoffman's fault? Don't be ridiculous. "No matter who the judge was, the defendants would have tried to focus on the war in Vietnam, on the issues of racism, poverty, and youth culture," Kunstler now reveals.

There is a case to be made for giving an individual a certain amount of scope for his revolutionary ambitions. But there is no tradition whatever for permitting him to work from a privileged position within an institution—our judicial system—which requires loyalty to the processes of law.

## INVESTIGATION DEMANDED

### HON. WILLIAM H. HARSHA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HARSHA. Mr. Speaker, the Presidential Commission on Obscenity and Pornography was created almost 3 years ago when Congress found "that the traffic in obscenity and pornography is a matter of national concern." (Public Law 90–100). Reportedly, however, as the time for the final release of the Commission's report draws near, the 18-member panel is planning to recommend a repeal of all pornography laws.

This, to me, seems to be a highly incredible solution to the ever-increasing prevalance of hard-core pornography in our society and its ever-continuing attack on our national moral fiber. Because I have long believed in the urgent and serious need for legislation to control the smut in our mails, literature and films, I seriously question the alleged findings and recommendations of the Commission. The public opinion against the rampage of pornography convinced the Congress that it should do something about the situation. It therefore created the Commission to investigate the matter, yet the Commsision is supposedly suggesting that Congress do nothing but repeal what pornography laws they have already enacted. I am not alone in my concern over these developments, and on the basis of the dissenting views of one member of the Commission is supposedly suggesting I strongly suggest Congress take a closer look at the Commission's activities.

In the first draft of his statement, Keating accuses the Commission majority of recommending that "smut peddlers of the world—have—freedom to purvey in the United States their scatological, depraved, deviated, sick, sex products." According to Commissior findings which have already been privately disclosed, pornography has no relation to crime or sexual deviancy. In other words, it is not a causal factor for crime and it is not a source of corruption for minors. In view of these findings, the Commission maintains that America should adopt a liberal and lenient policy allowing hard-core pornography on the market for consenting adults. How they reached this conclusion when many experts emphatically maintain that pornography is harmful and morally debasing is extremely hard to conceive.

I am most curious, as many interested and concerned citizens and legislators are, as to the nature of the evidence and investigation which led the Commission to this irresponsible conclusion. Keating has charged that the public may never know exactly what the Commission did because, he maintains, it denied information to the public and blocked a full minority report. This was done in part by a "confidentiality" or secrecy pact adopted by the Commission. The Commission also refused to permit dissenting or minority Commission members a reasonable method by which they could report to the Congress and to the President—"much less the requisite funds, staff, and time to so report," according to Keating. He also cited instances where the Commission—or certain members of it—contracted for various studies or technical reports without the knowledge of the whole Commission. These technical reports themselves have never been submitted in their entirety to the full Commission and some of them will not be completed before the time of the Commission expires. Therefore, the complete evidence and findings could not have possibly been reviewed before the release of the Commission's final report. If Keating's allegations are indeed true, such procedures and conclusions by a Presidential Commission certainly warrant a more convincing explanation, and it is on this basis that I demand an investigation of this matter be conducted.

Mr. Speaker, the Commission on Obscenity and Pornography has spent 3 years and $2 million on its study. Judging from the preliminary data on its activities and Keating's report, it looks like the public may have been shortchanged. The public has strongly indicated its desire to extricate the media from the mire of pornography into which it is sinking. It has clamored for protection from unsolicited pornographic mailings and finally received it in landmark legislation which I supported earlier this year. This is definitely not the time to stop and to forget about controls, as the Commission reportedly suggests. It is not the time to allow smut peddlers to grow fatter on their depraved, sordid, multimillion-dollar business. It is time we take a look at the President's Commission on Obscenity and Pornography and its findings to ascertain the validity of Keating's charges before the Commission's alleged libertine recommendations set a precedent which could break the dam wide open for the most vile and repugnant onslaught of pornography America has ever endured.

## GOLD STAR MOTHER'S DAY OBSERVANCE IN ST. LOUIS

### HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mrs. SULLIVAN. Mr. Speaker, in 1936, in Public Resolution 123 of the 74th Congress, the people of the United States set aside the last Sunday in September as Gold Star Mother's Day to honor those who had made "the supreme sacrifice of motherhood" in "the World War." This was the war which was to have ended wars, and even though the seeds of World War II were already germinating, most Americans in 1936 felt and hoped we would never again be involved in warfare. Hundreds of thousands of Americans have been killed in wars since then, and American mothers are still joining the ranks of Gold Star Mothers, as civilization finds itself far from the objectives which were supposedly accomplished by the world in the termination of World War I 52 years ago.

Yesterday, at ceremonies at the Soldier's Memorial in St. Louis, it was my privilege to join with Gold Star Mothers of the St. Louis area in observing the day set aside by the 74th Congress to honor mothers whose sons have died in the armed services of the United States. My remarks on that occasion may be of interest to my colleagues in the House, and I submit them for inclusion in the CONGRESSIONAL RECORD, as follows:

REMARKS BY THE HONORABLE LEONOR K. SULLIVAN, DEMOCRAT, OF ST. LOUIS, MO., TO OBSERVE GOLD STAR MOTHER'S DAY AT THE SOLDIERS' MEMORIAL, SUNDAY, SEPTEMBER 27, 1970, AT 2 P.M.

The span of a human lifetime is so brief compared to the life of our country—now nearly 194 years old—that we know *well* only the most recent periods of that history, and take a lot for granted, or on faith, as to what transpired before our time. We studied about the heroes of our American heritage and the wise and far-sighted policies they were usually supposed to have pursued; we remember little, or never learned, about the deep and bitter discords which accompanied the development of those same policies.

There is much about present-day America which is disconcerting, disillusioning, and even frightening. On almost every plane of human endeavor, we are disappointed in the attitudes of *so many* of our people even while they are enjoying a level of material advantages never before known to any people on earth. And *so* we ask ourselves where America went wrong—what happened—why we have so much to divide us and worry us when we should be rejoicing as a people in the blessings of liberty which enable us to engage in our own ways in the pursuit of happiness.

Are these the "bad new days" compared to the "good old days" in our history? It is certainly easy to think so. Yet, if we look to the newspapers of any other era in American history, we find headlines and editorials which reflected even more emphatically than they do today a deep concern over the direction and course of American life and the impending doom of decency and civilization. If you read the debates in the Congress of the United States for almost *any* day of any bygone year, you will find expressed the same misgivings and fears for our country's future and the survival of good manners and decency as we find today.

FINDING ANCHORS OF NATIONAL FAITH

It is a good thing to refresh our understanding of our past by searching out the news and commentary of other days of strife and discord in America, for we thus develop some perspective on the worrisome problems and deep divisions we encounter today. Perhaps the *tone* of America is neither worse nor better today—but of course it certainly is *different*.

We have difficulty in finding anchors of national faith which can hold us steady against the swirling waves of controversy and the harsh winds of change and confusion.

Some say we have had it *so good for so long*

that we have lost our capacity as a people to cling together in any common cause. Many Americans see no threat today from outside and no danger at home, while others see only scourge and pestilence and disaster everywhere.

But things aren't really *that* good *or* bad. They are, as I said, different—different from what we had grown up expecting, different from what we remember, different from what we like to think were the conditions which preceded us in America. In company with, I am sure, the majority of you, I don't like a lot of these changes *either*.

And yet, the basic strength of the American experiment in self-government remains tough and vibrant and alive. Lincoln called it "the last, best hope of earth"—and he used those words during one of the darkest moments in our national existence, to describe a country whose survival was in doubt and whose people were engaged in destroying each other. We have been through many terrible ordeals since that time, but nothing to match our own civil war in terms of loss of American lives. In the past, too, we suffered economic disasters beyond the comprehension or belief of today's affluent young people, and there were wars of incomparable savagery; but we not merely survived, we grew to unmatchable economic and technological power.

THE LUXURY OF UNLIMITED CRITICISM

But none of it came cheap—or by wishing—or by accident—or by villainy.

I thought of these things as I left Washington to come back to St. Louis, knowing I would be meeting with you today and joining you in celebrating a national observance of deep significance to you and of great meaning to all of those Americans who truly care what we *are* as a country and as a people. Throughout our history, most Americans were called upon to give at least a little toward the common good; many gave a lot; some gave everything. At the time these events occurred the causes for which the sacrifices were made loomed larger, perhaps, than they often appeared later in retrospect—certainly larger than they *now* appear to those who have never had to make similar sacrifices, or make any sacrifices at all. The obligations of citizenship unfortunately fall unevenly, and always have. So too, do the rewards of citizenship fall unequally. But there is a sense of pride which comes to those who have had to do much, or give much, so that others who give little can nevertheless enjoy all of the advantages of citizenship in a country which permits any one of us the luxury of unlimited criticism of everything about our national life and heritage.

Much as we sometimes might despair over the shortcomings and defects of human conduct which affront our national conscience or besmirch our heritage, these are neither new nor fatal threats to our survival as a *good* people, a decent people, a nation which enshrines freedom not merely in statues and slogans, but in our hearts, too.

Of course, it is not easy to tolerate the constant attacks on and criticisms of the structure of our government and our laws or remain calm through the raucus challenges to public order and common decency.

But our heritage requires such tolerance—not to the point of permitting lawlessness without punishment, but to clearly separate illegal acts from unpopular thoughts and opinions.

"THE HOME AS FOUNTAINHEAD OF THE STATE"

We are not *nearly as* divided as we appear. But we argue a lot—and bitterly.

In passing the joint resolution which set aside the last Sunday in September as "Gold Star Mother's Day", Congress declared that we honor *ourselves*, as well as the mothers of America, when we "revere and give emphasis to the home as the fountainhead of the state." This I deeply believe—that our country will retain greatness only as long as we revere the home as the focus, the center, of the values which give a people self-respect and national purpose. Much of the discord which attempts to destroy our unity as a people stems from the dissatisfactions and animosities and inadequacies of many American homes in providing the haven of love and mutual respect a child needs and craves for healthy growth. Where there is love and respect flowing to the child from parent and to parent from the child, there may not always be luxury or even comfort, but there is a rocklike sense of wellbeing and stability and security and that youngster will make it all right—will find satisfying avenues in life to translate his ideals into causes for his country and his fellow man.

There is great idealism among today's youth, even though it often doesn't show—or shows up sometimes in ways we find immature and offensive. Aside from the fringe of kooks and revolutionaries, most of the youth of today will find ways—satisfying and challenging ways—to contribute to change and improvement to American life, within the structure of what many of these impatient young people denounce as the "establishment."

"A PUBLIC EXPRESSION OF LOVE, SORROW, REVERENCE"

We can all remember our *own* impatience with authority when we were their age. And we have watched the older brothers and sisters of today's youth go through those same periods of doubts and questioning and even despair—and then find their way, too.

Nations go through those periods of self-doubt, too. But for those who gave a *great deal* to enable this nation to survive and to grow to its present incredible dimensions of strength and prosperity and opportunity and achievement, there can be no doubt that it was *not* in vain—this last best hope of earth, this sometimes united, often divided, raucus, argumentative place of free minds and searching souls and clashing ideas we have managed to hold together through nearly 200 years.

Young as it is among nations, the United States *is* the oldest democracy in all the world operating under the same written constitution. And the mothers here today for whom this day is named can take deep and personal and distinctive pride in that historic achievement, for it was made possible by sacrifices such as *they* have made. I salute the Gold Star Mothers as mothers of our heritage of freedom.

Some day, perhaps, the world will have learned other, better ways of assuring freedom's survival than those which have had to be used in the past. When that day comes, if it does, I'm sure every Gold Star Mother will thank God.

In the meantime, in behalf of all of your fellow citizens, I thank *you* as we here observe what Congress has instructed should be set aside as a day to demonstrate "a public expression of the love, sorrow and reverence of the people of the United States" for those mothers who suffered what Congress described in Public Resolution 123 of the 74th Congress as "the supreme sacrifice of motherhood." Thank you.

## KY HAD TO BE STOPPED?

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. RARICK. Mr. Speaker, the power boys had to stop Vice President Ky from coming to the United States and from being a guest speaker at a fundamental Christian American rally to end the war in Vietnam by victory. The stakes were too high. Mr. Ky's appearance and his message might have jarred the apathetic silent majority into demanding an end to the Vietnam war.

Mr. Ky's appearance might have embarrassed too many decisionmakers who could not tolerate a sudden end to the war because it woud upset international timetables.

Mr. Ky's message might damage the programs of those American Friends of Hanoi who need a no-win stalemated war to enable them to continue their divisive tactics and their operations of undermining our system of government.

Beyond any doubt, those who have worked diligently and long to discourage and prevent the appearance of Vice President Ky—at this time—and at the request of fundamental Bible-believing Christians, have revealed their typical double standard of behavior.

Is there a dime's worth of difference? Why can't the American people hear the truth for themselves, just once—at this time?

## TENTH ANNIVERSARY OF AEROSPACE CORPORATION

### HON. CHET HOLIFIELD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HOLIFIELD. Mr. Speaker, the Aerospace Corporation, which is located in my home State of California, has recently celebrated its 10th anniversary. It was on June 25, 1960, that the U.S. Air Force Ballistic Missile Division, headquartered in Inglewood, Calif., called a press conference to announce the "formation of a new nonprofit organization, the Aerospace Corporation, to serve the Air Force in the scientific and technical planning and management of missile-space programs." A few weeks before that date, Aerospace had been organized and chartered under the laws of California.

The ensuing decade, for Aerospace, has been one of achievement. The Nation is the beneficiary of its technical genius in helping the Air Force to design missile and space programs which are so important to the defense and safety of the United States. This is the technical genius of no single individual, though many distinguished scientists and engineers have been, and are, associated with Aerospace. It is the technical genius of an organization which can bring many technical talents and disciplines to bear, to keep abreast of new technologies, to probe their possibilities for defense, and to monitor contractor performance in translating ideas and design specifications into workable systems.

And, in keeping with the trend of the times and Secretary of Defense Melvin Laird's recommendation that the civil departments of Government utilize the "unique capabilities" of such nonprofit organizations in "efforts to overcome our

domestic problems," Aerospace has been lending its talents to civil concerns. For example, techniques for analyzing human heart functions by use of computers were developed, initially by company funds and later by grants from the National Institutes of Health. This work has been expanded to encompass broad cardiac studies with the Loma Linda Medical Center.

Today, Aerospace expertise is being applied to a wide spectrum of problems in the civil sector; some are supported by earnings, others have received contract funds. Such programs include research on the chemical composition of smog—using rocket motor combustion theory, analyses of urban transportation problems, and conceptualization of personal transit systems. Other efforts include technical assistance to Los Angeles in acquisition of a police data handling system, and to El Segundo in design of a police communications system.

Aerospace also has undertaken to provide management assistance to the Department of Interior in the design and construction of a data center to process information from earth resources observation satellites. This new program is expected to result in greatly increased capability to detect, monitor, and conserve the Nation's natural resources.

In sum, within the span of 10 busy years, Aerospace has earned recognition as a powerful national resource in the world of technology. Its strength to date has been centered very largely on development of military space and missile programs; here the corporate commitment is to continue this effort. Additionally, as has been suggested so briefly above, the opportunities are very large to employ the special talents assembled at Aerospace on the many problems in the civil sector that demand early solution.

The technical excellence of this organization is reflected in the list of national leaders and other prominent persons who have served as members of the board of trustees throughout the decade. Representing leadership in science, engineering, industry, and public service, and vested with general authority over affairs of the corporation, they have established basic policies for Aerospace and have guided the direction of its work.

Without attempting to name all the distinguished men who have served as Aerospace trustees, I will note those who were called to high Federal office while serving on the board; Dr. Harold Brown, Director of Defense Research and Engineering and later Secretary of the Air Force; William C. Foster, Director of the U.S. Arms Control and Disarmament Agency; Roswell L. Gilpatric, Deputy Secretary of Defense; Dr. Robert C. Seamans, Jr., Secretary of the Air Force; Dr. Chalmers W. Sherwin, Deputy Director of Defense Research and Engineering; Dr. Jerome B. Wiesner, scientific adviser to President Kennedy and Director of the Office of Science and Technology. Most recently, T. Keith Glennan was named by President Nixon as U.S. Representative to the International Atomic Energy Agency. The present chairman is James McCormack, a retired Air Force general and former chairman and chief executive officer of the Communications Satellite Corporation.

Mr. Speaker, I take note of the many achievements of Aerospace and the 10th anniversary of its formation because the Committee on Government Operations was largely responsible for that formation. The Military Operations Subcommittee, under my chairmanship, conducted extensive studies and investigations which pointed to the need for a new organizational arrangement to give technical support and assistance to the Air Force in the development of new and very challenging defense and space systems.

Looking back, those were turbulent and exciting years, with a zest for accepting technical challenges which characterized our Government leaders and military authorities, and which today unfortunately is questioned in so many quarters. I hope that the United States, in learning the lessons of the past and how to prevent a recurrence of past mistakes, will not lose its resourcefulness, determination, and energy in advancing new technologies for the common defense and the general welfare. Aerospace stands as a symbol of a decade of technical achievement, and I look forward to its continued achievements in the future.

---

## ROTC—THE UNIVERSITIES' STAKE IN DEFENSE

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. TEAGUE of Texas. Mr. Speaker, at a time when the military in general and the ROTC in specific has become the target for the radical elements of student groups and the New Left, and even to some extent members of faculties, I believe the following article written by John Bitner to be most timely. I commend its reading to all Members of this body:

### ROTC—THE UNIVERSITIES' STAKE

(By John W. Bitner)

It is time for Americans—all Americans—to take a close look at what is happening to the Reserve Officers Training Corps: the downgrading, even the elimination of the program in some of the nation's leading universities. The results can be far more serious than most citizens realize.

The roots of concern go deep into the American's attitude toward the military. National defense is, of course, essential; and it had better be in the hands of intelligent, well-trained men. But the nation has no place for a dominant military elite. Its defenders must understand the aspirations and peaceful pursuits of a free, self-governing people. And it is precisely in this light that the ROTC provides a sensitive balance.

For more than 50 years our country's ROTC program has leavened our officer corps, contributing to the strength of the civilian community and maintaining a bridge between civilian and military life. It is, and has traditionally been, the largest single producer of officers for our armed forces.

Since national security requires a well-trained officer corps, the nation is better off by far if much of that corps is composed of men with the sound academic training, disciplined individual thinking and the understanding social outlook that our colleges and universities can contribute.

The truth of this was significantly underlined by a recent special committee of civilian educators and military officers, commissioned by Secretary of Defense Melvin R. Laird to study problems of the ROTC program. The committee and its advisory panel included not only two generals and an admiral, but also nine university presidents or chancellors and other men of academic and administrative stature representing leading universities in all sections of the country.

The members of this committee advised Secretary Laird a few months ago: "most American colleges and universities do have a responsibility to share in the defense of the free society of which they are a part. It is in their institutional self interest to contribute to the leadership of the armed forces." The committee also unanimously agreed that "If ROTC were to be removed from the nation's campuses there would be grave danger of isolating the services from the intellectual centers of the public which they serve and defend."

The grave danger is here and now. Faculty and administrative actions have already caused ROTC to be terminated at a number of leading universities. Several other universities are making it increasingly difficult—in some cases perhaps impossible—for the services to remain on campus. Last year Princeton reduced ROTC from departmental status, removed academic credit for course offerings, reduced the status of ROTC instructors, and imposed restrictions on them and their families with respect to schooling, housing and other matters. Here, as in certain other schools, the conditions imposed seemed to make the situation untenable for ROTC.

It is disturbing that the attacks on ROTC have originated mainly within the very intellectual centers that provide its relevance to the national civilian-military balance.

These attacks are spearheaded by sincere but emotional individuals who use the ROTC as a symbol against which to demonstrate their moral aversion to the Vietnam war without seeing the program in its larger context; and by groups bent on generating mass disruption through the use of force to block and wreck the actions of all those with whom they disagree. They seem to disregard the possibility that there might come a time once again when the United States would be called upon to defend itself or perish—or to defend an ally whose cause they considered just. For these people, as for all of us, to eliminate ROTC is to deliver a hostage to fortune.

Since such opponents of ROTC may not regard themselves as shareholders in the university's responsibilities to our nation's defense, the burden of these responsibilities falls rather upon the trustees, the administration, and a fully informed faculty—and, perhaps, dedicated alumni. It is to these groups that we must look for the assurance that decisions are made in mature and broad perspective, and only after full consideration of all relevant factors.

In military service, as in other professional disciplines, sound fundamental training and leadership qualities should be acquired early in life from experts; and for a career officers corps, these qualities are best acquired at a time when the young man's understanding of his world is being broadened in all directions: in the arts of living and thinking as well as in the skills of command. This is the unique function of the ROTC on the college campus.

To the extent that a school rejects ROTC, the school shrugs off the challenge of that unique function. Even more disturbing: it abandons a significant area of academic free-

dom: the right of a student to choose whether he will train for a military career at the same time he proceeds with his academic education.

Thus may a university help to defeat its own purposes. The erosion of ROTC is a threat not to the military, but to those Americans who fear and distrust the control of our armed forces by a narrow military point of view.

It is in the Ivy Group universities that the chipping away at ROTC is most alarming. No man is an island; nor is any intellectual center an island unto itself. The policies and decisions of such schools as those in the Ivy Group are watched by other schools, both large and small, all over the nation. When ROTC is shackled or banished by one institution, it becomes easier for other institutions to rationalize similar action, and to hasten the day when ROTC may be finished at the bellwether schools—and at others.

Officer candidate schools do not offer a satisfactory alternative to ROTC. Such commissioning programs are very useful when rapid expansion is needed in a national emergency. But the environment is not conducive to academic pursuits; the courses are brief, and in emergencies the faculties, quickly assembled, have no opportunity to relate the candidates to more than the restricted immediate objectives.

ROTC, on the other hand, embodies the strong asset of continuing contact between highly motivated military teaching staffs and critically-thinking, civilian-oriented faculties. Both bodies benefit from continued exposure to one another. None of the services believes that the OCS concept alone could satisfy the continuing officer procurement requirement.

The trend against ROTC programs can still be reversed. Early in 1970 Princeton, after new discussions with Army ROTC officials, relaxed some of its restrictions; and—as this is written—the Army will probably stay. The future of Air Force and Navy programs at Princeton is still in doubt; but there is at least an opening for reconsideration and negotiation by all the concerned parties.

This is the direction that all colleges and universities should be taking now: not capitulation to minority demands, frequently based on motives that are emotional though sincere; but a new examination of the function and the challenge of ROTC in the American pattern of freedom, security, and intellectual elbow-room.

Certainly there is ample room for reexamination of campus-ROTC relationships by men of good will representing both points of view. Let us then have new in-depth discussions between the colleges and universities where there has been a deterioration or cessation of ROTC on the one hand, and appropriate military department officials on the other: discussions which, with the best overall interests of our nation in mind, should be aimed at re-evaluation of how the academic world and our armed services can best relate in meeting the nation's defense training problems.

And let's have these discussions before more damage—possible irreversible damage—is done.

## GOVERNMENT OPERATIONS

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. FINDLEY. Mr. Speaker, while most Members of Congress are assigned to only one legislative committee, it is my good fortune to serve on two committees—Foreign Affairs and Government Operations. The Executive and Legislative Reorganization Subcommittee, of which I am a member, has jurisdiction over all proposals to reorganize the executive branch of Government.

Public concern over air and water pollution and the general state of the environment was reflected in hearings on President Nixon's proposal to consolidate all related functions in an Environmental Protection Agency. The reorganization plan was accepted by Congress on September 28. It should provide farmers and city dwellers alike greatly needed protection of cropland, air, and water.

## CONGRESSIONAL REPORT TO NINTH DISTRICT RESIDENTS—SEPTEMBER 21, 1970

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. HAMILTON. Mr. Speaker, violence, although always a part of our history, has increased in frequency recently. The bombing at the University of Wisconsin, the Mexican-American riot in Los Angeles, and the shooting of a Philadelphia park policeman in the last few days are grim reminders of its presence.

As the rate of increase of serious crimes in this country has gone up—13 percent in the first 3 months of 1970 over the same period in 1969—so has the number of crimes against police officers. From 1960 through 1969, 561 enforcement officers were killed in the line of duty—86 in 1969 alone. Fifteen policemen have been killed this year in unprovoked attacks.

Bombings, a more recent form of violence—though common in the late 1800's—have killed 40, injured 384, and caused some $22 million in property damage in the 15 months ending last July. From January 1969, to April 1970, the Justice Department reported a total of 4,330 bombings, 1,475 attempted bombings, and 35,129 threats of bombings in this country.

The growing menace of violence threatens our society. It is corroding the central political processes of our democatic way of life, substituting force and fear for argument and reason. Almost every large community has been affected by some pattern of violence—racial disorders, bombings of public and private buildings, conflicts between radicals and the police, or disturbances on high school and college campuses.

As I have talked with Hoosiers during recent weeks, I have found them shaken and disgusted by the rising trend of violence. All have expressed revulsion and concern that we deal firmly with crime, disorder, disruption, riots, and bombings.

The stance is correct, because we all lose by violence. It must be brought under control to safeguard life and property and to bring about the understanding and cooperation needed to remedy the underlying causes of violence. No society can remain free, much less deal with its fundamental problems, if its people live in fear. It is an ancient wisdom that a house divided against itself cannot stand.

The Government must work to make violence both unnecessary and unrewarding. To make it unnecessary, our institutions must be capable of giving each citizen a voice in the normal life of the community and the Nation. To make violence unrewarding, our institutions must be able to control violence when it occurs, and to do so firmly and fairly. Specific measures can and in some cases, have been taken:

Sharply increase the investment in the prevention of crime, and the administration of justice through law enforcement agencies, the courts, and the penal system.

Urge that public officials continue to develop effective tactics for handling both peaceful demonstrations and violent disturbances.

Give young people a larger role in shaping their own destiny by lowering the voting age, reforming the draft, and providing greater opportunities for youth to become involved in worthwhile service activities.

Improve the social conditions of family and community life for all who live in our cities and towns.

The objectives are consistent with the preamble of the Constitution. It does not speak only of justice, or only of order; it embraces both. Two of the purposes set out in the preamble are to "establish justice" and to "insure domestic tranquility." If we are to suceed in preventing and controlling violence, we must achieve both these goals.

Chairman Louis Lundborg of the Bank of America has said that—

> We have two choices as to which way we can go. We can divide into armed camps and shoot it out, or we can try to find common grounds so that we can grow together. One course is easy but blind, the other course is hard and slow but it is the path of wisdom.

This is wise counsel.

## SEPTEMBER MINSHALL OPINION POLL

### HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. MINSHALL. Mr. Speaker, following are the letter and opinion poll I am sending to the 23d Congressional District:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D.C., September, 1970.*

DEAR FRIENDS: Through the years I have found the Minshall Opinion Poll one very valuable way to make my voice in Washington genuinely representative of the views of the 23rd Congressional District. Combined with the first-hand information I obtain in my committee hearings and on the House floor, the consensus obtained from these polls is most important in helping me reach legis-

lative decisions. Further, on matters of Administrative policy-making, I always call results of the questionnaire to the attention of the White House and the President's Cabinet.

As in the past, a copy of this poll is being sent to every home in the District. If you wish additional copies, you may obtain them from my Cleveland office, 2951 New Federal Office Building, telephone 522–4382.

Because returns run into the tens of thousands, I am sure you can understand why it is impossible for me to answer each one individually. However, all will be carefully tabulated and results made known in the October "Washington Report".

No envelope is needed for the attached self-mailer. Simply cut along the dotted line, fold with the return address outside, stamp, and mail. *Please do not staple or tape together* as this slows the tabulating process. Should you have any specific question or problem in which you would like my assistance, I would appreciate your sending it separately from the poll in order to avoid delay in giving your request top-priority action.

It is always a pleasure to be of service and I thank you for giving me the very helpful benefit of your views through the Minshall Opinion Poll.

With best wishes,

Sincerely yours,

WILLIAM E. MINSHALL,
*Member of Congress.*

MINSHALL OPINION POLL

1. Over 144,000 U.S. troops have been withdrawn from Vietnam by the new Administration with the promise that all our combat forces will be out by next spring. Do you feel this schedule is:
(a) Satisfactory?
(b) Too slow?
(c) Too rapid?

2. In the Near East crisis, should the United States:
(a) Avoid any and all intervention?
(b) Play a diplomatic role only?
(c) Continue present level of aid to Israel?
(d) Increase aid to Israel?
(e) Send in American troops as well as aid?

3. Do you favor my resolution calling for phase-out of the draft and establishment of a peacetime All-Volunteer Army?

4. Do you approve of my vote against the Supersonic Transport (SST) program?

5. Are you in favor of my federal revenue-sharing bill which would return part of all federal taxes to states and local governments for their use?

6. To eliminate crime and violence would you support:
(a) Increased federal aid to local law enforcement agencies?
(b) More severe sentences by the courts for law-breakers?
(c) Greater emphasis on rehabilitation in penal institutions?
(d) Outlawing extremist groups that advocate violence?
(e) Stronger laws against illegal sale of drugs?
(f) Stepped-up anti-poverty programs?

7. What policies should be adopted regarding campus violence:
(a) Immediate suspension of students, faculty or other college employees who participate in riots?
(b) Suspension of federal aid to colleges where administrators permit violence to disrupt academic pursuits?
(c) Strict law enforcement to protect persons and property?
(d) No outside interference—permit colleges to solve the problem?

8. As our country shifts from a wartime to peacetime economy, do you think the following sectors of society are pursuing correct policies to solve the problems of unemployment and inflation:
(a) Federal government?
(b) State and local governments?
(c) Labor?
(d) Business and industry?

9. What do you consider the most critical problem facing our Nation today?

## OUR NEW "LOW PROFILE" IN GREECE

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. EDWARDS of California. Mr. Speaker, the decision by the United States to resume full scale arms shipments to Greece, which for 3 years has been under the dictatorship of a military junta in complete opposition to all democratic principles, is appalling. At a time when the administration claims we are supposed to be lessening our military involvement worldwide, it is difficult to understand why we choose to support a regime which has no use for the ideals by which our own Government has endured and grown strong. I commend to my colleagues' attention the following editorial which appeared in the September 24 issue of the Washington Post:

OUR NEW "LOW PROFILE" IN GREECE

The game is over: fullscale shipment of arms to Greece is to be resumed. For three-plus years, since the colonels deposed an elected government in 1967, the United States had maintained a "selective embargo" on arms to its NATO ally, (although in view of the Pentagon's inscrutable arms-supply procedures, it remains to be seen just how "selective" the embargo was). Ostensibly, its purpose was to pressure the colonels back towards representative government. In reality, one suspects, the purpose was to appease the junta's many American and West European foes who contended, quite rightly, that a dictatorship had no proper place in an alliance of free peoples.

In the meantime, the interplay between an American bureaucracy habituated to supporting the Greek military and an outraged public was overtaken by events: first, by the Arab-Israeli war of 1967, which was quick and confined to local terrain, and then, more importantly, by the Soviet Mediterranean buildup of 1969–70 and its accompaniment of American concern. Thus did the Mideast crisis cast a regional shadow falling over Athens. When the Defense Department announced the "prudent positioning" of C–130s in Greece, for the Jordanian crisis, it was obvious time had run out. "Strategy" is back in the saddle after all; once again the celebrated "Nixon Doctrine" of diminishing involvement bites the dust.

And the United States is back in the unbecoming position of rendering its full sanction, with no semblance of official reluctance, to a regime which looks like enduring, but not much else. It is a regime which said it had to keep its promise—extracted under duress—to free Palestinian terrorists, but which refuses to keep its promise to restore constitutional government—even by its own constitution—to the Greek people. There have been some recent signs of relenting—some more political prisoners have been freed, some books taken off the proscribed list. Evidently this was done to sweeten the announcement on American arms.

A case can be made that the United States had exhausted whatever leverage its "selective embargo" had given it, and that nothing further was to be gained by holding out. If that was so, however, then a new case can now be advanced: that the Nixon administration has, by increasing its involvement, increased its leverage too. One way to put the new involvement to some good purpose is to press harder for return to democratic rule. If there was one place in the Mediterranean to keep that "low profile" Mr. Nixon is always talking about, one would have thought it was Greece. Now that the United States is going to stand up straight there, it at least ought to do so in a way that will not leave the Greek people in doubt about whatever their liberty is of any American concern.

## WHITE HOUSE COMMISSION ON PORNOGRAPHY

### HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. DON H. CLAUSEN. Mr. Speaker, soon we are to officially receive the report of the President's Commission on Obscenity and Pornography, which is the result of 2 years of work and several hundred thousand dollars in taxpayers' money, which, incidentally, was a Commission that was not appointed by President Nixon but, rather, by his predecessor.

The final conclusions of this report are no secret; nor, in my judgment, are they acceptable.

The final conclusion recommends that we throw out all of our current laws relating to pornography, since, in the view of the Commission, "pornography causes no demonstrable social harm."

Quite frankly, such a conclusion is absolutely unbelievable. This House has, on two separate occasions, by a large margin, indicated that it strongly believes that pornography can, and must, be controlled. Now, a nonrepresentative group of people, not responsible to the electorate, tells us, in fact, that we do not know what we are talking about, and that we should throw away the results of several years' efforts to develop laws that will control the spread of this filth and still not violate the guarantee of free speech. America must wake up to the subtle efforts to distort the tried and true set of values among our people, particularly the younger generation.

I, for one, am not prepared to accept such a judgment on the part of a permissive group of people who controlled the Commission's activities and, hence, their final determinations. This attitude, in my judgment, has been one of the prime contributors to polarization and divisiveness in the country and has literally broken up many families.

For those who feel "free speech must be protected," I would strongly suggest that they take time to read the remarks of veteran newsman James J. Kilpatrick, which were aired on the American Broadcasting Co. on September 23. Mr. Kilpatrick has, in my judgment, presented a very rational, unemotional statement of the problem. His conclusion, namely, the rejection of the Commission's recommendations, is completely valid and rea-

sonable and I commend him for his efforts on behalf of those of us who wish to protect society from the disease known as pornography.

I am, therefore, including Mr. Kilpatrick's remarks in the RECORD at this point:

REMARK BY JAMES J. KILPATRICK

Within the next week, the Federal Commission on Obscenity and Pornography will release the report on which it has worked for the past two years. Officially, at least, the report is not yet available, but so many advance texts have been leaked around Washington that a few words of comment are in order—first on the nature of the commission and its report, and second, on the nature of the problem itself.

The commission is known as the President's commission, but it was created before Mr. Nixon came in office. He has named but one member to it, Charles Keating of Cincinnati. Mr. Keating has dissented at the top of his lungs, and the White House, in effect, has repudiated the Report before it appears. The majority of the commission, its director and staff, embarked upon their assignment with a pre-conditioned view that may fairly be described as the generally permissive view. The principal recommendations reflect that view, in concluding that "obscenity" is without a constant meaning in law; that pornography causes no demonstrable social harm and creates no clear and present danger to society; and that laws prohibiting a traffic in pornography, except as to juveniles, should be repealed.

From that conclusion, I too dissent. Many forces that act upon society, for good or ill, are incapable of measurement or demonstration. The positive harm that is done by pornography strikes me as one of those things. The debasement of love, the exploitation of the human body, the debauchment of long-accepted standards of good taste, can be sensed by rational men. And society, I believe, has a clear right to protect itself from the disease we know as pornography.

I love free speech. As a newsman, I live by a free press. But I have learned this much, that there is indeed a clear distinction between liberty and license. Freedom depends for its survival upon order; and order embraces the preservation of certain values that society itself decides are its values. In such a scheme of things, no place exists for the commercial pornographer, preying upon the base and ugly instincts that civilized men forever struggle to rise above. The pending report of the Commission on Obscenity and Pornography ought to be read, for it contains some useful information; and it ought then to be rejected.

## DEMOCRATS FLEE THE LEFT FOR THE CENTER

### HON. LAURENCE J. BURTON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. BURTON of Utah. Mr. Speaker, Columnist Joseph Alsop had noted the abrupt flip-flop of the arch-liberal wing of the Democratic Party on the issue of law and order. In his column, which appeared in the September 13, 1970, Baltimore Sun, Mr. Alsop also notes that the American people are fed up with violence and riots—and with those who have been encouraging and condoning the disruption of our college campuses and the cities of America. It is going to take a lot of fancy footwork on the part of the "radiclibs" to get this monkey off their back.

Text of Mr. Alsop's column is as follows:

DEMOCRATS FLEE THE LEFT FOR THE CENTER

(By Joseph Alsop)

WASHINGTON.—The liberal Democratic scramble to the center is so hasty, even so undignified, that it is extremely comic. But it is a nationwide phenomenon. It has great future significance. And it is getting less attention than it certainly deserves.

The fact of the scramble can be richly documented. Senator Edward Kennedy, of Massachusetts, for instance, has recently uttered the most eloquent, sensible and unqualified condemnation of student violence that has yet been heard from anyone. But it was produced in the campaign year, and not when the bullyboys of the New Left had the two leading universities of his own state in a literal state of siege.

In Illinois, again, Adlai Stevenson 3d was merely doing the fashionable thing, back in 1968, when he described the Chicago police as "storm troopers in blue." But the fashions for 1970 were revealed when Mr. Stevenson named a former U.S. attorney, Thomas Foran, the prosecutor of the Chicago Seven, as vice chairman of his campaign for the Senate.

In Connecticut, the pattern is the same. In 1968, the Rev. Joseph Duffey was the local leader of Senator Eugene McCarthy's forces and state boss of Americans for Democratic Action. That year, he told the English reporters of "An American Melodrama"—"I guess you could call me a revisionist Marxist." For Father Duffey, in those days, civil disobedience was also a useful tool of social change.

Today, however, as the Democratic senatorial candidate, Father Duffey is busily explaining to all and sundry that when he said "revisionist Marxist," he really meant that he was a strong anti-Communist. He issued a ringing statement of approval, too, when the Yale Corporation refused to give the student body two weeks off to conduct political agitation in the election year. The hard hats, he remarked in effect, do not have this kind of political privilege, so why should students have it?

In Minnesota, yet again, there is former Vice President Hubert Humphrey, who once remarked, when riots were more modish, that he could lead a pretty good riot himself. Today, however, Mr. Humphrey is being enormously aided in his Senate race by two facts indicating what is modish nowadays.

On the one hand, he was infinitely less wallowingly permissive than most other liberal Democrats in the period before the fashions changed so greatly. And on the other hand, he is remembered as the chief target of the Chicago rioters at the time of the Democratic convention two years ago. And folks in Mnnesota tend to think that rioters' targets must be pretty fine fellows.

One could cite comparable data from just about every state in which a liberal Democrat is running for the Senate this year. Some candidates, indeed, have gone from words to action. In Maryland, for instance, Senator Joseph Tydings's sponsorship of the dubious and extremely controversial D.C. anti-crime bill is one of the biggest factors in his favor in what looks like a rough race.

The scramble to the center, then, is indeed a national phenomenon. One may guess that its first impetus came from the horrifying Gallup Poll, showing that a substantial majority actively approved the Kent State shootings. One can be sure, too, that one factor that has helped mightily to turn the scramble into a stampede is an admirable book, "The Real Majority" by Richard Scammon and Ben J. Wattenberg.

Yet the political data set forth by Mr. Scammon and Mr. Wattenberg were fully available to every liberal Democratic politician long before permissive wallowing became the unbreakable rule for all liberal Democrats.

What, then, are the deeper causes of this remarkably complete and abrupt change in political fashions? How was the "mini" replaced so swifty by the "midi"—as it were?

The answer is, surely, that there has been a profound change in the country's political mood, which any politician would be a fool not to respond to. It took a long time for the vast majority of American voters to get good and mad about the riots, the disorders, the violence, the crime and the collapse of national values that the liberal Democrats used to pass over in silence, or even to condone.

The anger runs deep and strong today, however, and it is the anger itself that gives the change of political fashion permanent meaning. There is no question of the fashions changing back again. The only question is whether the liberal Democrats kept their "minis" on too long.

## A STORY OF REAL PARTNERSHIP BETWEEN THE STATE OF WISCONSIN AND THE PEOPLE OF NICARAGUA

### HON. VERNON W. THOMSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. THOMSON of Wisconsin. Mr. Speaker, a story of real partnership has just been brought to fruition that bears telling and, indeed, merits wide dissemination. It involves not only a successful people-to-people program between the State of Wisconsin and the people of Nicaragua, but also illustrates that successful U.S. assistance does not require billions of dollars. It is a story of cooperation between peoples and coordination between governments. And it is a story which should reveal that response to a specific need at a specific time is far more valuable than the aggregate of grandiose governmental programs.

Last year, a bacterial ring rot disease drastically reduced the potato seed supply in the Jinotega area of northwestern Nicaragua where most of the potatoes in the country are grown. A study undertaken in the area recommended the importation of new potato seed for a potato improvement program and also to supplement the loss of seed to the disease. Members of a local potato-producers cooperative obtained a credit loan for the purchase of 63 tons of certified potato seed from suppliers in New England. Unfortunately, nearly 60 percent of the shipment was spoiled in transit. The reduction in the yield from the usable seed impaired the ability of the farmers to meet their loan obligations as well as seriously limiting potato production.

The plight of the farmers was reported to the Nicaragua Partners of the Alliance, a private-citizens group which is paired under the Partners of the Alliance program with people in the State of Wisconsin. Wisconsin was a leader among the U.S. States to become involved in the Partners program, which joins citizen groups in the United States and Latin America working to attain the objectives of the Alliance for Progress on a nongovernmental grassroots basis of cooperation. Today there are 40 U.S. States

joined with 40 areas of 18 Latin American and Caribbean countries. The Partners of the Alliance office in the Agency for International Development served as a catalyst in bringing these people-to-people committees together to work in the fields of agriculture, health, education, cultural exchange, and trade, serving as a complement to the government-to-government program of the Alliance for Progress. Partners groups are mainly concerned with small, though important, projects in rural areas, assisting in the development of cooperatives, the building of schools, providing equipment for health clinics, promoting student and teacher exchanges, and so forth.

When the Nicaragua Partners were requested to help on the potato problem, they voted unanimously to intervene on behalf of the farmers of Jinotega and the contact with the Wisconsin Partners was made. At this same time, Gov. Warren P. Knowles of my State led a delegation of businessmen on a trade mission to Latin America and their first stop was in Wisconsin's Partner country of Nicaragua. The request of the potato farmers was brought to the Governor's attention and he endorsed the idea of assisting in this emergency.

The project to respond to the request for 10 tons of potato seed was undertaken immediately by the Wisconsin Partners coordinated by Dr. Philip H. Falk, retired superintendent of schools in Madison, and executive secretary of the Wisconsin Partners. Wisconsin asked the Partners office in AID to contact the U.S. Department of Agriculture to secure approval for the importation of the shipment and to seek their help in getting the seed to Nicaragua in time for planting. Dr. William H. Conkle, leader, Extension Service, International Programs, USDA, gave valuable assistance, along with Mr. Lawrence McGary, USDA, extension adviser in Nicaragua.

Dr. Robert Hougus, a potato expert at the University of Wisconsin School of Agriculture in Madison, was instrumental in obtaining seed which was made available as a contribution to this citizen effort Partner's project. The producers in Nicaragua handled the transportation charges from Wisconsin to Jinotega. In December, shipment was made.

The seed arrived in Nicaragua in January of this year and was delivered to the potato producers in the Jinotega area. In accordance with a plan developed by the producers, the seed was distributed to farmers and planted. The yield was nearly triple the normal previous yields. The project proved to be an outstanding success.

Governor Knowles recently received and released a letter from Alfonso Lovo Cordero, Minister of Agriculture and Livestock in Nicaragua, which I include at this point in my remarks:

MINISTERIO DE AGRICULTURA
Y GANADERIA,
*Managua, D.N., August 12, 1970.*

HON. WARREN P. KNOWLES,
*Governor of Wisconsin,*
*Office of the Governor,*
*Madison, Wis.*

DEAR GOVERNOR KNOWLES: So often U.S. assistance abroad, regardless of its benefits, is criticized both locally and internationally while little or no mention is made of many highly successful endeavors enjoying participation at all levels of the social structure.

The purpose of this letter is to relate to you the results of a complete success carried out in Nicaragua with the participation of the Wisconsin Partners, AID, the U.S.D.A., this Ministry and the potato growers of the Jinotega area in the northern part of the country.

For many years Nicaraguan potato production has supplied only about 30 percent of the demand. This is a result of a limited area suited to potato production and inefficient production practices. For example, there had been only one potato seed importation since the U.S. Marine supplied seed in the early thirties until 1969. The 1969 shipment resulted in a 60 percent loss in transit. The poor farmers were beside themselves. Even though the sound seed produced good yields the total operation resulted in a loss to the participating farmers who were unable to service their bank loans.

The Extension Service of this Ministry did not abandon the farmer. Instead, farmers were told that they could continue to depend on this source of help.

You will perhaps recall that during the course of your brief visit late last year the Nicaraguan Partners related the unfortunate circumstance to members of the Wisconsin Partners. Upon the return of your party to Wisconsin we were advised that 200 cwts. of seed potatoes were available for immediate shipment. The seed arrived here in early January. It was moved directly to the planting area and distributed to 33 producers in accordance with a plan previously developed by them. Planting was initiated immediately and the results were remarkable. Where fertilizer was applied yields averaged about seven tons per acre and unfertilized fields yielded about four tons. This is compared to normal previous yields of about two tons. In addition, the farmers received $200 per ton for the potatoes sold. Needless to say, the farmers, as well as the related technical personnel were overjoyed with the results.

As a result of the good yields, six of the producers constructed suitable storage facilities for seed, three producers pooled their resources and bought a tractor, while one producer earned enough additional income to buy a farm.

Please excuse all of the details but they are essential in order to relate the entire magnitude of the success. Even though Nicaragua may not become self-sufficient in potato production, great forward strides have been accomplished in increasing yields, improving production efficiency and farmer income and, above all, at least 33 farmers are convinced that it pays dividends to use good seed and follow recommended cultural practices.

In this humble way, I join with the Nicaraguan Partners and the potato growers of Jinotega in expressing our thanks and gratitude to the Wisconsin Partners and to you personally for the meaningful assistance rendered.

Sincerely yours,
ALFONSO LOVO CORDERO,
*Minister of Agriculture and Livestock.*

## RESOLUTION ADOPTED BY THE BYELORUSSIANS

## HON. LEONARD FARBSTEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
*Monday, September 28, 1970*

Mr. FARBSTEIN. Mr. Speaker, on September 5–7, 1970, the participants of the Ninth Convention of Byelorussians of North America, adopted the following resolution.

I commend it to the attention of my colleagues:

RESOLUTION OF THE 9TH CONVENTION OF BYELORUSSIANS OF NORTH AMERICA IN NEW YORK CITY ON SEPTEMBER 5–7, 1970

Whereas the Byelorussian people in their land have been subjected to a colonial oppression from Moscow; and

Whereas the Russian Communist dictatorship in its dealings with Byelorussia's neighbors has torn away parts of the Byelorussian ethnographic territory having incorporated that largest part of it into the Russian Soviet Federated Socialist Republic; and

Whereas the key positions in the Byelorussian SSR are occupied mainly by foreigners subservient to the Moscow center and unresponsive to the needs of the Byelorussian people; and

Whereas the Byelorussian people suffer from an incredibly low standard of living as a result of exploitation of their natural and human resources which have been used by Moscow to conduct its international shemes in Latin America, Indochina, Africa and now especially the Middle East, as well as in other parts of the world; and

Whereas a policy of forcible Russification is being carried out in the Byelorussian SSR, the Byelorussian language being eliminated more and more from administration, science, education, and publications in the BSSR; and

Whereas Byelorussia is deprived of genuine diplomatic and cultural ties with the outside world, is unable to participate independently even in such international events as the Olympic games, her only foreign representation in the United Nations being a tool of Moscow's policies; and

Whereas the Government of the BSSR, fully controlled by the Communist Party center in Moscow, does not care for any improvement of Byelorussia's political status and the economic and cultural well-being of the Byelorussian people, nor does it protest against economic exploitation and Russification of Byelorussia; and

Whereas the Byelorussian nation has and will never become reconciled to a state of colonial dependence, but has decidedly resisted Muscovite oppression in defense of its natural rights to be its own master; and

Whereas the Byelorussian people are still conducting their freedom fight—

We the Byelorussians of the United States and Canada unanimously reaffirm our will to support the fighting Byelorussian people in the Soviet Union in their struggle for cultural freedom and political independence. We are determined to seek further support for fighting Byelorussia among political leaders and statesmen of the United States or America and Canada. We and our children shall never cease our effort until Byelorussia will again become a free and democratic nation in accordance with the postulates and principles enunciated in the constitutional charters of the Byelorussian Democratic Republic whose freedom and independence were proclaimed in Minsk (Minsk) on March 25, 1918.

Long live Fighting Byelorussia!

Long live the Byelorussian Democratic Republic!

New York City, September 6, 1970

J. ZAPRUDNIK,
*Chairman of the Convention.*
W. STANKIEVICH,
*Chairman of the Byelorussian-American Association.*
A. HRYCUK,
*Chairman of the Byelorussian Canadian Alliance.*

## CONGRESSMAN WOLFF'S REPORT

### HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. WOLFF. Mr. Speaker, regularly I report to my constituents on my activities here in Washington and back in my congressional district. As I do on all these occasions I would like to include my current report in the RECORD at this point:

SEPTEMBER, 1970.

DEAR FRIEND AND CONSTITUENT: The 91st Congress is rapidly moving toward adjournment later this fall and pending matters are consequently speeding up here in Washington. Recently there have been a number of legislative and administrative actions about which I feel you should be advised. These items are detailed on the following pages.

I always indicate in these regular newsletters how greatly I value your comments or suggestions on matters pending in Congress. Please do not take these as idle words for I sincerely believe that I can better perform my job of representing and serving you if I know what issues concern you and what views you hold on matters of public policy. So once again permit me to say—please let me know whenever you have an opinion on a matter pending in Congress or whenever I can serve you. Best wishes.

Sincerely yours,

LESTER L. WOLFF,
*Member of Congress.*

#### WE MUST STOP HIJACKINGS

Recognizing that the only effective means of dealing with international air piracy is to deter hijackings, I recently offered a five-point program to head off any repetition of the reprehensible Arab terrorists' multiple hijacking. I was pleased that President Nixon immediately moved in the direction of my first suggestion—the stationing of special U.S. guards on all international flights of U.S. planes.

The other points I suggested were: installation of armor plates between cabins and cockpits of U.S. aircraft; a thorough search of all passengers and baggage in international flights; a comprehensive inspection of all U.S. aircraft prior to the time any crew or passengers board the plane, and an embargo on air traffic to any country which refuses to immediately return hijacking hostages and/or return the hijackers to the country of origin.

Moreover, I have introduced a resolution to crack down on hijackers. This resolution has been referred to the House Committee on Foreign Affairs, of which I am a member, and the Chairman, Rep. Thomas E. Morgan, has promised prompt hearings on my recommendations.

#### STOP DRUGS AT THEIR SOURCE

For years I have been active in the fight to control and end drug abuse. My work has convinced me that a most effective means of solving this problem would be to stop the drug traffic at its source to prevent the illegal importation of drugs. To put some teeth into efforts to control the international drug traffic I have sponsored legislation (H.R. 18402) to cut off American assistance to any country failing to take adequate steps to make certain that illegal drugs from those countries do not come to our shores. This legislation is based on the principle that such problems are most effectively stopped at their primary source.

#### WOLFF CREDIT CARD BILL GAINS

The House of Representatives has passed another bill of which I was an original sponsor—legislation to stop the unsolicited mailing of credit cards to protect the consumer from the many problems caused when a credit card is lost or stolen in the mail. This legislation will also mean that an individual will only have as much credit as he seeks and not be subjected to unfair credit practices.

#### REMEMBERING AMERICAN POW'S

I have joined with a number of my colleagues in the House of Representatives in a letter to the Premier of North Vietnam demanding that American prisoners of war be given humane treatment. As an original sponsor of legislation in support of our POW's, I believe we must continue to focus national and world attention on their plight and persevere in our efforts until they and all our men in IndoChina return home safely.

#### L. I. ECONOMIC PROBLEMS DEMAND ATTENTION

Unemployment on Long Island is running far ahead of the national average and it is obvious that our national economic ills are magnified in our own community. I am acting with many groups and individuals here on the island to ease our problem.

After a recent meeting with the Citizens Coalition to Save Jobs on Long Island, the Coalition and I wrote to President Nixon asking him to designate Long Island an economic disaster area to make us eligible for special federal assistance. We do not seek handouts nor giveaways; what we do seek is a fair share of work for Long Island in the crucial industries such as pollution control, prefabricated housing, mass transit development, educational equipment, etc.

I have undertaken to visit as many plants on the Island as my schedule permits to help devise new sources of employment for those members of our labor force out of work. In this time of economic stress I am doing all that I can to reverse the unhappy trends of rising unemployment and rising prices. But a final solution to our local economic problems cannot be achieved until our national economy is set back on the right path, as I outlined in the special letter I sent to you recently.

#### EMERGENCY HOUSING MONEY APPROVED

High interest rates and home building costs have been a significant inflationary factor and—since housing starts have been reduced—a cause of unemployment. Recognizing this, the House has passed the Emergency Home Finance Act, which I was pleased to support. It will make available one billion dollars for home mortgages so they will be more readily available at reasonable rates to low and middle income families. Also benefiting from this legislation will be returning veterans who today cannot secure home mortgages. This legislation will also be an indirect assist to those of you who are now unable to sell your homes because prospective buyers can't secure mortgages.

#### RECOGNITION DUE PUBLIC SERVANTS

Policemen and firemen serve invaluable roles in our society; we can never express adequate thanks to those men who risk their lives to make certain we are safer at all times.

In recognition of these fine men, I worked with the Nassau County Shields Organization to bring federal recognition to police officers who take such great personal risks for the benefit of society as a whole.

Also, I have sought to give due recognition to our firefighters by introducing three bills for their benefit. This legislation would do the following:

Provide federal compensation for firemen injured while protecting federal property or fighting fires in civil disorders.

Extend to non-profit activities of firemen preferred second and third-class mailing permits to cut costs in the many valuable community programs sponsored by various fire companies in our area.

Provide financial benefits to aid the cost of volunteer fire training undertaken selflessly by hundreds of men in our area and tens of thousands of men throughout the United States.

Finally, I have joined with those seeking to permit regular New York City firemen who live in areas with volunteer and alert fire companies to volunteer their services to those companies when they are off duty. If these men are willing to give their time and expertise to help local fire companies, it is absurd for them to be denied this right.

Along with my colleague, Rep. Mario Biaggi, of the Bronx, I held an all-day hearing in New York earlier this month on the problems of unhealthy fad diets, food myths and diet pill abuse which confront the American consumer. We listened to fourteen witnesses, including doctors, nutritionists, dieticians and a representative of Ralph Nader, detail how the consumer is bilked of millions of dollars with phony promises of spectacular weight loss. Not only are most of these gimmicks unsuccessful, but according to the testimony we heard, many such phony diets are truly unhealthy.

What we have is a billion dollar a year "get slim quick" business in which the government has thus far failed to protect the consumer. My hearing is the first step in a program to make sure the consumer really is protected. I intend to follow this issue up with additional hearings in Washington and legislation to crack down on quack diet promotions.

Action is needed to enable the American consumer to find effective, healthy means of maintaining body weight without being subject to a host of quacks who will trade an individual's health for a quick profit.

#### L.I. SOUND STUDY UNDERWAY

As I indicated to you in my last newsletter, we had made progress on the Wolff-Ribicoff Long Island Sound Bill. Now I am pleased to be able to report that we have reached an agreement in Washington which effectively accomplishes the purpose of this legislation and which will speed up the needed study and "Master Plan" for the Sound.

The existing New England River Basins Commission will undertake a comprehensive study of the Sound with a guarantee of adequate funds for the three-year, $2.8 million study. Most importantly, the Commission's authority will be enlarged to include all of the Sound and its shoreline. This is a great breakthrough since it should mean an end to the piecemeal destruction of the Sound.

Now, Senators Ribicoff and Javits, Representative Reid and I will devote our attention to creating a regulatory body with the authority and expertise to effectively enforce the recommendations made for the preservation of the Sound.

#### DEFENSE DEPARTMENT GRANTS WOLFF'S REQUEST FOR GI'S

The Defense Department has agreed to a request I made several months ago that those servicemen ordered into Cambodia this spring and others who have been serving in Laos be accorded the same tax benefits allowed GI's in Vietnam. Whatever one's view of the wisdom of our policy in IndoChina, I trust we can agree that all our servicemen should receive equitable treatment.

There is also pending in Committee legislation I authored to provide these same tax benefits to our men in Korea in recognition of the fact that conditions there are still hazardous. A majority of Congressmen (218) have cosponsored this bill which I drafted.

## PUBLIC APATHY AND PRIVATE GREED

### HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. VAN DEERLIN. Mr. Speaker, the Chula Vista Star-News, a suburban newspaper in my district, has taken on the local establishment in striking a blow for cleaner air.

At issue is the opposition of the Chula Vista Chamber of Commerce to a proposition on the November ballot which would permit California's counties to divert up to 25 percent of their gas tax allocations from highway development to mass transit and pollution control.

The Star-News is unhappy with the chamber's position, and characteristically does not mince words in saying so.

Copublisher Lowell Blankfort, who wrote the editorial, underscores our interdependence in the struggle for a better environment. If a few take a permissive attitude toward polluters, then all must suffer. Mr. Blankfort recently witnessed smog over the formerly pristine Sahara Desert. Now he warns that if something does not happen soon to reverse the despoliation of the earth, mankind's final epitaph might well read:

Here lies Homo Sapiens; he killed himself out of public apathy and private greed.

It is not a pleasant thought, but one to ponder. The editorial, which ran in the Star-News September 6, follows:

[From the Chula Vista (Calif.) Star-News, Sept. 6, 1970]

THE SMOG LOBBY

If you want to see a classic example of why our air and our rivers are filled with poison, why our hills and valleys are scarred with massive freeways and our birds and fish are dying, one need look no farther than our own Chula Vista Chamber of Commerce.

Chamber directors recently decided they would rather have yet more freeways than see adequate funds provided to fight smog and develop mass rapid transit as an alternative to the smog-spewing, traffic-congesting roads.

They went on record in opposition to a November ballot proposition, authored by our own state Senator James R. Mills, that would permit counties and cities, each at their own option, to divert up to a quarter of gas tax revenues to anti-smog research and developing mass rapid transit.

The chamber's reason: There isn't enough money for the highway programs. This at a time when the face of California, from Mission Valley to the High Sierras, continues to be slashed by freeways which, it has been proven, merely bring more traffic congestion after a few years and soon bring demands for even more freeways.

By 1980, at the present rate, the number of cars in California will almost double, to 20 million. How can they be accommodated? Other alternatives to the automobile and the poison it and industry spew must be developed.

But the special commercial interests who infest chambers of commerce and trade associations don't want other alternatives. They want more automobiles and more freeways.

Some of these special interests are obvious—people involved in the auto industry and the oil industry and the contractors and the highway engineers. Others are less obvious—subdividers and land speculators and real estate interests who profit richly with every freeway that's built and who are the big beneficiaries of the gas tax that motorists pay.

The little guy who pays the gas tax may get home a few minutes faster—for a while, until the new freeway also becomes congested—but his benefits are puny compared with the fat cats. And for those few minutes, he is increasingly taking time off his life every time he takes a breath of what was once called fresh air.

However, the special interests know how to organize, propagandize and lobby the politicians—and the little guy doesn't.

They can afford to contribute heavily to political campaigns—which is one reason that Senator Mills' opponent, a multi-millionaire himself, also has found it easy to raise money from other special interests who want to see Jim Mills out of the legislature at any price.

The special interest lobby managed to kill every single anti-pollution bill at the last session of the legislature except Senator Mills' proposed constitutional amendment.

Now, through special-interest groups such as the Chula Vista Chamber of Commerce, they are attempting to defeat that measure at the polls in November.

A short time ago, when we were flying over Africa's desolate Sahara Desert, 100 miles south of the Mediterranean coast, we looked down into a pall of smog.

Over the public address system, the pilot announced that this new smog was only six months old—that oil refineries were near and the winds also were now blowing the smog from the Mediterranean shore. Even remote parts of the earth are no longer free from fumes.

Renowned scientists say that, at the rate we are despoiling our earth, the human race has only another half century to survive. Some say that the extinction process is already irreversible.

If there is anyone left to write humanity's epitaph, he might well write: "Here lies Homo Sapiens; he killed himself out of public apathy and private greed."

## VFW FREEDOM SIGNATURE WEEK

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. DERWINSKI. Mr. Speaker, the vigorous support that Congress is giving to all diplomatic and humanitarian efforts on behalf of American prisoners of war in Southeast Asia certainly reflect the wishes of the American public.

An example of public interest and support of our efforts is exemplified by a resolution adopted by the Marham, Ill., City Council in conjunction with which was adopted by a proclamation by Mayor Peter P. Wolff of Markham designating the week of September 20–26, 1970, as "VFW Freedom Signature Week." This is an oustanding example of the strong interest which the public has in the welfare of our American servicemen held by the enemy.

The proclamation follows:

PROCLAMATION

Whereas, there are over 1,400 servicemen held as prisoners in Southeast Asia by North Vietnam and her allies; and

Whereas, North Vietnam, despite appeals from neutral sources such as the International Red Cross, has consistently refused to divulge any information about the men on their health and well being, including even naming those they are holding, or even permitting such groups to inspect North Vietnamese prison camps to determine if they meet the minimum standards of care and treatment embodied in the Geneva Convention; and

Whereas, such callous disregard for long-established international rules for humane treatment of such prisoners is causing unbearable anguish among these American prisoners and their families at home;

Therefore, I, Peter P. Wolff, Mayor of the City of Markham, do proclaim September 20–26, 1970, as "V.F.W. Freedom Signature Week" and urge all citizens of this community to demonstrate their obligation to these fellow Americans by signing petitions requesting the immediate release of all Americans held prisoner by the North Vietnam government and by Communist political front groups in Southeast Asia.

PETER P. WOLFF,
*Mayor.*

## STATEMENT ON THE DEATH OF ADMIRAL MACMILLAN

### HON. HASTINGS KEITH

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. KEITH. Mr. Speaker, the recent passing of Rear Adm. Donald B. MacMillan in Provincetown, Mass., is the final chapter in the amazing life of one of our Nation's greatest adventurers. He was the last surviving member of Robert E. Peary's successful expedition to the North Pole but his life meant more than that. His continuing efforts to explore unknown frontiers and to enrich man's knowledge of his planet are a tribute to the finest quality in all men.

An editorial appearing in the New Bedford Standard-Times highlights this great man's life and accomplishments and under unanimous consent I include the editorial in the RECORD:

DONALD B. MACMILLAN

The nation, and much of the world as well, will remember Rear Admiral Donald B. MacMillan of Provincetown principally as an explorer, and this is as it should be.

He was for many years the only survivor of Robert E. Peary's North Pole expedition that fought its way across the bitter Polar Sea, and his own expeditions to little known and unknown Arctic areas spanned nearly a half-century.

Moreover, his treks into the North were made in an era before air transportation revolutionized exploration of this vast 50-below frontier. In MacMillan's day, it was man and dog sled against the elements, and only the hardy and knowledgeable survived.

Yet Admiral MacMillan was far more than an explorer. In the first instance, he was a sailor of outstanding competence. Especially along the Northeast coast, to think of MacMillan is to think as well of the white-hulled schooner Bowdoin in which he logged more than 200,000 miles in the interests of contributing to man's knowledge of the world. His exploits afloat in Bowdoin, meeting the challenges of ice and gales are thrilling chapters of accomplishment in themselves.

Finally, Admiral MacMillan was a perpetual scholar and educator. He prided himself on learning something new every day. The Arctic, its people, its flora and fauna, he looked upon as a vast new world to be learned about. He not only studied it himself; he took scientists and teachers North; he encouraged the young men of his schooner

crew to become scientists and teachers, and the total body of Arctic knowledge that he thus assisted in accumulating is immeasurable.

This thoughtful, gentle-spoken man, whose lectures on the North have delighted and informed thousands of Americans of all ages, made a major contribution to America and to American history, and his death will only reemphasize the lasting dimension of that contribution.

## UNITED STATES ALLOWS APARTHEID REGULATIONS IN SOUTH AFRICA NASA INSTALLATION

### HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. KOCH. Mr. Speaker, I would like to bring to the attention of our colleagues the fact that the United States has bowed to the racial hiring practices used by the South African Government. The United States National Aeronautics and Space Administration has an installation in South Africa and permits its personnel hiring to be done, under apartheid regulations, by a South African national agency under contract to NASA for the operation of NASA's facility in that country.

I have urged NASA to change its policy and hire directly. It refuses to do so. I have written to President Nixon urging that he require such a change by Executive order.

I include in the RECORD a copy of the correspondence in this matter and urge my colleagues to support this request:

STATE UNIVERSITY OF NEW YORK,
*Stony Brook, N.Y., July 30, 1970.*

Representative EDWARD I. KOCH,
*Committee on Science and Astronautics,*
*Rayburn House Office Building,*
*Washington, D.C.*

DEAR REPRESENTATIVE KOCH: It has recently been brought to the attention of the U.S. scientific community in an article in *Science* (10 July) that Federal agencies, most notably NASA, NIH, and AEC, are using funds to support scientific research activities in South Africa that may well involve personnel policies which are discriminatory, and which appear to violate the ethical code that requires "informed" or "advised" consent from human experimental subjects.

Since the operations of NASA fall within the jurisdiction of the House Committee on Science and Astronautics, I would like to request that the Committee seek to ascertain the facts in this case and report to the public. It would seem that an arrangement whereby NASA contracts to support a tracking station in South Africa where the apartheid regulations are rigidly enforced is wholly inconsistent with the State Department policy that "the United States would not be party to any arrangement involving racial discrimination."

At a time when it is increasingly difficult for us to win public support for scientific research, and when fewer of our young people seem to be attracted to scientific careers, it is dismaying to learn that our most prestigious scientific agencies may be involved in such ventures. I would be very interested in hearing what course of action you thought might be effective in this case.

Sincerely,

LESTER G. PALDY,
*Assistant Professor of Physics.*

CONGRESS OF THE UNITED STATES,
*Washington, D.C., August 4, 1970.*

Dr. THOMAS PAINE,
*Director, National Aeronautics and Space Administration, Washington, D.C.*

DEAR DR. PAINE: I have received a letter from a constituent on the subject of NASA contracts supporting apartheid regulations in South Africa by permitting its hiring practices to be governed by these regulations.

I would appreciate having your response so that I may advise the constituent.

Sincerely,

EDWARD I. KOCH.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
*Washington, D.C., August 19, 1970.*

Hon. EDWARD I. KOCH,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. KOCH: This is in further response to your inquiry on behalf of Lester G. Paldy regarding NASA activities in South Africa.

Under the terms of an intergovernmental agreement dated September 13, 1960, NASA contracted with the South African Council for Scientific and Industrial Research (CSIR) to operate a NASA tracking and data acquisition station near Johannesburg. This station was established in South Africa under earlier cooperative arrangements with the U.S. Naval Research Laboratory in anticipation of the International Geophysical Year, some years before the National Aeronautics and Space Administration was established on July 29, 1958. A detailed statement on the functions and operations of this station and the reasons for its location in South Africa are included in the attached staff paper.

NASA does not support scientific research in South Africa and the only funds expended there are for the operation and maintenance of the NASA tracking station. NASA has similar staffing and operating arrangements with Australia, the United Kingdom and Spain.

Sincerely yours,

H. DALE GRUBB,
*Assistant Administrator for Legislative Affairs.*

CONGRESS OF THE UNITED STATES,
*Washington, D.C., August 27, 1970.*

H. DALE GRUBB,
*Assistant Administrator for Legislative Affairs, National Aeronautics and Space Administration, Washington, D.C.*

DEAR MR. GRUBB: Thank you for your letter of August 19. Your reply really does not reply to the basic question. That question is directed to NASA's employment practices in South Africa. I would appreciate knowing whether your hiring is governed by apartheid regulations mandated under South African law. If you are governed by them, then I would urge in your renewal agreement that, it being a United States installation, the facility be exempted from such regulations. If, on the other hand, that is already the case, I would be delighted to know that. I would appreciate the facts regarding this most basic question.

Sincerely,

EDWARD I. KOCH.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
*Washington, D.C., September 17, 1970.*

Hon. EDWARD I. KOCH,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. KOCH: This is in response to your August 27, 1970 letter regarding NASA's employment practices in South Africa.

NASA neither recruits nor employs personnel at its tracking and data acquisition station near Johannesburg, South Africa. As we indicated in our August 19, 1970 letter, the South African Council for Scientific and Industrial Research (CSIR) staffs and operates the station under contract to NASA. NASA has similar staffing and operating arrangements with Australia, the United Kingdom, and Spain. In each of these countries, hiring of local personnel by the national agency under contract to NASA for station operation is a local function.

As the staff paper we sent to you indicates, NASA's contractual relationship with the CSIR implements an agreement between the Government of the United States and the Government of South Africa, negotiated by the Department of State as in the net national interest. NASA must, of course, operate within the framework of national relationships with other countries.

Sincerely yours,

H. DALE GRUBB,
*Assistant Administrator for Legislative Affairs.*

CONGRESS OF THE UNITED STATES,
*Washington, D.C., September 22, 1970.*

Hon. RICHARD M. NIXON,
*President, the White House, Washington, D.C.*

DEAR MR. PRESIDENT: I want to bring to your attention the fact that federal agencies such as NASA are engaging in hiring practices involving racial discrimination in South Africa. The defense given to me by NASA is that "NASA neither recruits nor employs personnel at its tracking and data acquisition station near Johannesburg, South Africa. . . . In each of these countries, hiring of local personnel by the national agency under contract to NASA for station operation is a local function."

I hope that you will agree with me that it is an intolerable situation which allows United States funds paid to persons performing services to the United States government, in this case NASA, to be used in support of racial discrimination. I would urge that you require that federal agencies hiring in foreign lands be required to have in their contracts with other countries provisions which permit only nondiscriminatory hiring practices in so far as they affect the United States agency.

I would appreciate knowing whether this meets with your approval and if such a directive will be forthcoming.

Sincerely,

EDWARD I. KOCH.

CONGRESS OF THE UNITED STATES,
*Washington, D.C., September 22, 1970.*

H. DALE GRUBB,
*Assistanant Administrator for Legislative Affairs, NASA, Washington, D.C.*

DEAR MR. GRUBB: I have your letter of September 17 with further regard to NASA's employment practices in South Africa.

I believe that the practices you describe in your letter of having hiring done by the "national agency under contract to NASA for station operation" is racially discriminating and is NASA's way of evading its responsibilities.

I find that an intolerable situation and urge that a change be made.

Sincerely,

EDWARD I. KOCH.

THE WHITE HOUSE,
*Washington, D.C., September 24, 1970.*

Hon. EDWARD I. KOCH,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. KOCH: This will acknowledge and thank you for your letter of September 22 to the President regarding the hiring of foreign nationals by government agencies, with particular reference to NASA policies in South Africa. You may be assured your letter will be brought to the President's attention at the earliest opportunity.

With cordial regard.

Sincerely,

WILLIAM E. TIMMONS,
*Assistant to the President.*

## PORT TOBACCO

### HON. GILBERT GUDE

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. GUDE. Mr. Speaker, the Conservation and Natural Resources Subcommittee recently concluded hearings on the Potomac estuary and the possible impact of uncontrolled planning for powerplants, oil depots, and other such facilities on the entire area. One vital aspect of the southern Maryland community which we must preserve are those elements which demonstrate the history and heritage of our people—we want this for future generations and for tourism.

Port Tobacco, in Charles County, was chosen as a theme in the Montgomery County Historical Society Contest, and it exemplifies one of the forgotten areas that was once an important place in America's heritage. Miss Kimball's theme speaks eloquently of the heritage we hope to preserve and I submit it for the interest of my fellow colleagues:

PORT TOBACCO

(By Carla P. Kimball)

Once a thriving river port, the business and cultural center of Maryland, Port Tobacco, like many other small towns in the state has faded into oblivion. It is only one of the towns and villages which has failed to gain the recognition that it deserves. Located in a valley near the point where the Potomac River bends around the lower end of Charles County, Port Tobacco is one of the few communities along the eastern seaboard that can boast of having had a living community for over three centuries. Other eighteenth century villages which sprang up along the Potomac are Leonardtown, Bladensburg and Georgetown; however, it seems rather ironic that these towns are large commercial areas today, when they were of minimal importance in very early years, whereas all that exists of the town of Port Tobacco is a vague memory.

Port Tobacco did not originate as a river port town, but rather as the site of the village of the Potabac Indians.

In the early years of the colony, Father Andrew White, a prominent figure in Maryland's religious history, made frequent trips to the village. In 1639, he converted the Queen of the Potabac Indians and 130 of her subjects. From Port Tobacco, Father White's home for the greatest part of his stay in Maryland, came the first work on Indian language, customs and religion in America.[1]

The name, Port Tobacco, is also of Indian origin. Fessenend S. Blanchard, author of *A Cruising Guide to the Chesapeake*, wrote that the Indian name, Portofacco, meant "in the hollow of the hills," [2] and the present name evolved from this. It is interesting to note the various versions of the name in its evolutionary process to Port Tobacco. In 1608 it was spelled Potapaco, Potobanos in 1632, Portobacke in 1635, in 1690, Portobao, and even Porto Batto at one time.[3] As years passed, even the inhabitants of the town lost sight of the fact that the name was not derived from its location at a wealthy and prosperous tobacco port, but from the Potabac Indians, long since driven from their home by land-hungry settlers.

Like other ports on the Potomac, Port Tobacco was strategically located to tap the tobacco trade of the area and grew "under the warehousing requirements and factorage system of the colonial period".[4] With the coming of the eighteenth century, Charles County planters began to prosper from the tobacco fields, and Port Tobacco grew to be the business center and most important port in Maryland. Because of Port Tobacco's location on a spacious estuary, it enjoyed a fine harbour and ships could easily anchor to receive the annual crop of southern Maryland. This growing river port was one of the first on the Potomac to trade with England. In *The Dulaneys of Maryland*, it is written that each year the products of English looms and forges were brought to Port Tobacco on the trading vessels of London merchants in exchange for return cargoes of tobacco.[5]

When referring to tobacco towns, such as Port Tobacco, Frederick Gutheim, author of *The Potomac*, stated that in each, one would typically find a merchant with his office, store and warehouse, ready to buy tobacco and sell goods from London.[6] As an indication of the size and commercial importance of Port Tobacco, Dr. Robert Honyman who stayed in Port Tobacco a short time in 1775 stated this about the town: "Port Tobacco is about as big as New Castle (Delaware) . . . There are six stores in the place . . ." [7] Records show that these merchants included the following: Robert Fergusson, an agent for several Scottish firms; John Craig, a factor (i.e. merchant) for Cuninghame, Findlay, and Company; Robert Mundell [8] and John Robertson, both representatives of Glassford and Company at Port Tobacco; and George Gray, a factor for John Jamieson and Son of Glasgow, Scotland.[9]

In 1658, Port Tobacco was made the seat of Charles County.[10] In the same year, the first county courthouse was built [11] and as the center of county government, the major portion of the population of Charles County must have lived in and around the town of Port Tobacco. By 1747, the poor quality of Maryland's tobacco, made it necessary for an Inspection Act to be passed to improve the quality and raise the price. Certain ports were designated as authorized inspection stations; Port Tobacco was one. The Inspection Act limited the number of ports which were permitted to export tobacco, thus Port Tobacco increased in importance.[12]

By the end of the American Revolution, Port Tobacco had become the cultural center of Maryland. Situated on one of the most favored routes between the North and the South, the town "was absorbing sophistication like a sponge." This statement is supported by a record of the presentation of *The Beggar's Opera* in Port Tobacco, as early as 1752.[13] Jockey clubs came into being in the middle of the eighteenth century and distinguished meetings were held by such clubs at Port Tobacco, as well as Marlboro and Annapolis.[14] To say the least, life in this town was not dull. Court records show that, "The townspeople traded and visited, sang and prayed; slandered their neighbors and got hauled into court for it; they played on the cittern, a sort of guitar, hunted, fished in the streams and river. . . ." As the town grew and prospered, many of the wealthy land owners sent their sons and sometimes even daughters to either England, Belgium or France to be educated. Generally, it can be concluded, that Port Tobacco was a town of "wealth and consequence." [15]

Located in a valley, the hills overlooking the town were covered with the tobacco crops of the wealthy plantation owners. Many of the mansions in what is known as the Port Tobacco Valley were masterpieces of colonial architecture and still stand today in their restored state. It is amazing that this river port town has gained so little recognition, when one considers that many prominent colonial figures were among its residents. One home which overlooks Port Tobacco is Mulberry Grove, the birthplace and home of John Hanson, president of the first Continental Congress of the United States. As previously mentioned, Port Tobacco was the home of Fr. White and other Jesuit priests in Maryland, and in 1649, a large grant of land was given to Thomas Mathews as trustee for the priests.[17] The building erected on the land became known as St. Thomas Manor; the author of *Potomac Landing* stated, that it "has been owned by the Jesuits and used by them as a residence uninterruptedly for the interval of nearly three hundred years." [18] An Englishman, J. F. D. Smyth, touring the U. S. said that the sight of St. Thomas Manor "is the most beautiful place and the most elegant situation in the world." [19] St. Ignatius Church, built by the Jesuits, adjoining St. Thomas Manor was not only one of the principle early churches of the colonies, but also is the oldest active parish in the United States.[20]

Another colonial mansion in the Port Tobacco Valley, built circa 1730, was Rose Hill, the home of Dr. Gustavus A. Brown, the physician who attended George Washington in his last illness.[21] Rose Hill stands high above Port Tobacco overlooking the Potomac River. During the Civil War, the home was taken over and used as a base by Union soldiers. By 1865, the Brown Family had long since passed away and the home now belonged to the Floyds. Young Bob Floyd fought under the Confederate flag, while Mrs. Floyd and beautiful young Olivia remained in Rose Hill. Union soldiers camped on the grounds about the manor house, while officers occupied the spare rooms. Young Olivia, a loyal Southerner was in constant communication with the Army of Northern Virginia. She would creep away at night and ride to Ladler's Ferry with information she had been told by the Union soldiers.[21] However, to this day, the citizens of Port Tobacco dispute the fact that this young woman's name was Olivia Floyd, but rather, they contend that the inhabitant of Rose Hill during the Civil War was Bell Boyde, the famous Confederate spy. Nevertheless, Rose Hill stands today high above Port Tobacco overlooking the Potomac River.[22]

Habre de Venture is "one of the finest examples of Colonial and Southern architecture in Maryland." Built in 1742, it was the home of Thomas Stone, one of the state's four signers of the Declaration of Independence.[23] In 1760, Dr. James Craik built his home, La Grange. Dr. Craik was a physician in the Continental Army and a close friend of President George Washington.[24] William Chandler, a colonel in the Revolutionary War built Chandler's Hope early in 1650, which later became the temporary home of the first Carmelite nuns in the area.[25] From Chandler's Hope, the Carmelites moved to their permanent home, overlooking the Port Tobacco Valley; Mount Carmel was "the first convent of religious women established in the original thirteen colonies." [26]

With the American Revolution came the beginning of a series of destructive blows which brought an end to Port Tobacco as the business and cultural center of Maryland. Town commerce was almost entirely stopped; British factors were forced to leave the town; the prized tobacco warehouses were destroyed, thus cutting trade to a minimum. During the war years, Baltimore and other more urbanized trading communities such as Georgetown and Alexandria engrossed much of the trade and shipping that would previously have been handled in Maryland's smaller ports, including Piscataway, Bladensburg, and Chaptico, as well as Port Tobacco. Many of these areas declined.[27] As Port Tobacco's importance began to diminish, the town of La Plata, about three miles north of Port Tobacco, began to rise; the Popes Creek Railroad had established communication between the little village and the rest of the States. Moreover, by this time, the piling up of silt in Port Tobacco's harbour had made it impossible for ships to land there. By 1882, there was talk of moving the seat of Charles County from Port Tobacco to the rising town of La Plata. In 1892, the final blow was dealt to Port Tobacco, when by mysterious means,

Footnotes at end of article.

the courthouse was burned. "Whatever the cause . . . the fire did indeed settle the issue insofar as Port Tobacco was concerned." It would have been senseless to rebuild the county courthouse in a town which had been bypassed by the railroad, and which was no longer accessable by sea; therefore, in 1895, the county seat was changed from Port Tobacco to La Plata.[28] What was left of the old courthouse and other public buildings were sold and the proceeds were applied to the costs of the buildings in the new seat of Charles County. Naturally, business followed the court and residents followed business. Fifty years later, when the town was taken in hand by the Society for the Restoration of Port Tobacco, "there was little left of the public buildings but the memory."[29] Paul Wilstach wrote this about the abandoned town:

Nearly all the eighty houses have long since gone the way of those at St. Mary's, but the few remaining, with their mossy brick and sagging roofs and crazy chimneys, compose a unique and very quaint specimen of a derelict colonial town.[30]

Stag House, built about 1709, is one of the two homes which are still standing in the exact location of the old town.[31] The buildings mentioned previously have been restored and are occasionally opened for public tours; however, for the most part, the corn and tobacco fields cover the area where the town once flourished.

It is hoped that the reconstruction of Charles County's courthouse will constitute the first major step of the restoration of Port Tobacco, and plans are being made by the Society for the restoration of Port Tobacco for this town to become a second Williamsburg. The preceding appears to be a tragic end to the story of a town which was so much a part of Maryland's colonial history, but perhaps, if the plans of the Restoration Society succeed, Port Tobacco will live again.

## COLLEGE OF WILLIAM AND MARY TOLD TO LOWER STANDARDS

### HON. WATKINS M. ABBITT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. ABBITT. Mr. Speaker, press reports over the weekend have revealed that the Department of Health, Education, and Welfare has blatantly demanded that the College of William and Mary take extraordinary steps to achieve a degree of integration which will satisfy the bureaucrats in the Office of Education.

According to the information available, HEW has insisted that the College of William and Mary, the Nation's second oldest educational institution, expand its efforts to achieve integration and if necessary lower its academic standards in order that more black students may qualify.

This points up once again the ridiculous position in which many educational institutions now find themselves as a result of edicts by HEW. Through its maze of guidelines and inconsistent pronouncements the Office of Education is attempting to establish percentage goals which many institutions find impossible to meet. The College of William and Mary has long been noted for its fine academic standards and its students come from all over the United States and from other countries as well. It does not exclude students of any race and accepts freely all those who seek enrollment, so long as they are able to meet the qualifications. Under this program, William and Mary has attained a substantial degree of integration of its facilities. Now, HEW is not satisfied—and seeks to substitute its own guideline in place of those established by the college administration. This is a pattern of operation which, if carried to its logical conclusion, would turn over the admissions policy of practically every school in the country to the HEW headquarters in Washington. Certainly we do not want to see this happen and if it ever should, control of our education would no longer be in the hands of the individual schools but left to the whims and fancies of fuzzy-thinking bureaucrats.

Last year I introduced a bill which would provide that any school which lowered its academic standards in order to take in otherwise unqualified students would lose its eligibility for Federal assistance. I believe very strongly that legislation of this type is very desirable in the times in which we live. It is now obvious, however, that even more stringent steps need to be taken to protect the schools from the Federal Government itself. I propose to go into this matter very fully and have strongly protested this action to the Department of Health, Education, and Welfare. It seems to me that we cannot afford to let steps of this kind go unchallenged.

## EQUAL RIGHTS AMENDMENT HEARINGS

### HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mrs. GRIFFITHS. Mr. Speaker, at this time, I would like to insert in the RECORD a letter sent by the National Association of Women Lawyers, dated September 14, 1970, to the Honorable JAMES O. EASTLAND, chairman of the Senate Committee on the Judiciary, and an article carried

in the New York Times. Raised are certain questions as to the selection and scheduling of witnesses before the Senate Judiciary Committee on the equal rights amendment. The items follow:

NATIONAL ASSOCIATION OF WOMEN LAWYERS,
*Chicago, Ill., September 14, 1970.*

Hon. JAMES O. EASTLAND,
*Chairman, Committee on the Judiciary, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: As members of the legal profession, we feel obligated to call your attention to patently biased actions in the selection and scheduling of witnesses for the Judiciary Committee hearings held September 9, 10, 11 (and to be held September 15) on the Equal Rights Amendment, under the chairmanship of Senator Sam. J. Ervin—and to protest the denial of a "day in court" to our organizations and to others who wished to be heard as proponents.

The three days during which Senator Ervin presided heard exclusively witnesses preselected as opponents of the measure, and who testified against it, with one surprising exception. We submit that the procedures followed, under your delegation of authority have reflected discreditably upon the Senate Committee on the Judiciary.

On May 5, 6 and 7, full-scale hearings were held before the Sub-Committee on Constitutional Amendments, on S.J. Res. 61. Both proponents and opponents were heard each day, alternately. Only Senators Birch Bayh, presiding, and Senator Marlow Cook attended regularly. Senator Ervin did not attend at all.

After passage of H.J. Res. 264 and its placement on the Senate Calendar by the Majority and Minority leaders, the Judiciary Committee, at request of Senator Ervin, announced additional "public hearings on September 9, 10, 11 by the full Committee" on S.J. Res. 231 and on H.J. Res. 264, purportedly "to elicit opinions from constitutional experts" and "enlist aid of competent constitutional scholars (CONGRESSIONAL RECORD, 8–21–70, p. 29672).

Nevertheless, the first witness called by Senator Ervin on September 9 was not a lawyer, and was one who had testified at the May hearings, the Vice President of the Hotel and Restaurant Employees and Bartenders International Union. In fact, only three of the eight witnesses scheduled during these three days, all invited as opponents, were law professors or scholars.

It was only after repeated requests from various sources that the hearings were extended to September 14 and 15 in order to give the PROPONENTS an opportunity to be heard. When the tentative list for those days was ascertained by arduous and persistent effort, it was revealed that 8 to 10 witnesses were listed for each of those two days—i.e. the same number in one day as had had three days to present the opposition.

The National Association of Women Lawyers and The Women's Bar Association of the District of Columbia were denied any opportunity to testify either day, and were expected to be mollified by the assurance that we might "file a statement for the record." The delays and uncertainties about when, and if, appearances would be arranged were especially inconvenient upon witnesses who would come from Florida and Ohio, or other distant places. We mention the following, in the field of law, as having been so treated and as having had appearance denied or *cancelled completely* at the last minute (although these hearings were to develop legal questions):

The Women's Bar Association of the District of Columbia—(signatory to this letter)—one of the largest such groups, with some 400 members in the Metropolitan Washington area.

The National Association of Women Lawyers—only national bar for women in the legal profession—has representation in the House of Delegates of the American Bar Association.

The Women's Equity Action League—civil rights for women in employment and education engaged in court test cases on sex discrimination.

Dr. Pauli Murray, attorney and legal scholar, Brandeis University.

Miss Marguerite Rawalt, former President of the Federal Bar Association and of the National Association of Women Lawyers.

United Automobile Workers of America, Counsel Bernard Ashe, who has been on amicus briefs in test cases under Title VII.

National Organization for Women, Regional Vice President, Miami, and other organizations whose membership includes "housewives and mothers" who stand FOR the amendment and whose requests to testify were not honored:

The General Federation of Women's Clubs—800,000 members in over 14,000 clubs in the United States, largest organization of women in the world—international president denied listing.

National Federation of Republican Women's Clubs—with thousands of members actively supporting the Amendment—denied listing.

Soroptimist Federation of America—largest organization in the world of women in executive positions.

Many advocates, denied opportunity to be heard, have expressed their feeling that they have been treated with disdain, not to say contempt, and certainly in a manner designed to weaken their espousal before the Senate and the public. And this under the aegis of the Committee of the highest legislative body, the Committee which is the watchdog for the nation over judicial due process.

We make the observation that had the desire to elicit opinions from constitutional experts and scholars been sincerely paramount, the witness list should have been weighted with such persons. The fact is that out of a total of 23 witnesses scheduled, there were six law professors and an additional four attorneys, while the two leading bar associations of women lawyers, and three organizations active in test litigation involving sex discrimination, were cancelled out or never scheduled at all.

On the second day of hearings, Senator Ervin announced that he would not chair the hearings agreed to be extended to September 14 and 15 in order to let the proponents be heard. He asked Senator Marlow Cook, the only other Senator attending these hearings, to preside. Senator Cook could not be available on September 14, but readily agreed to preside over September 15 hearings. Apparently, no other member of the Committee was willing to chair the 14th meeting. Six witnesses for the amendment were thus foreclosed from testifying, with cancellation of that day's hearings. This summarily cancelled out two outstanding women lawyers one of whom was the only black woman witness. Further, the only two bar associations of women lawyers were denied any opportunity to appear, despite the focus on developing the constitutional ramifications. Another cancellation important to the proponents was that of the Counsel for the United Automobile Workers International, the representative of millions of workers, and the leading labor union advocate of the Equal Rights Amendment.

To lawyers, such manipulated arrangements translate into a denial of due process and a cause for righteous indignation. When eight amendment opponents, upholding the views of the chair (with one unexpected exception) were allowed three days time to testify, while sixteen proponents were limited to two days, only to have half of them summarily cancelled out entirely and the other eight compacted into one day, this may well be labelled with the opponents' favorite phrase as a "blunderbuss approach" (Note: chairman and opposition witnesses repeatedly called the Equal Rights Amendment a "blunderbuss approach" to equality of rights).

It is submitted that this one-sided testimony for which wide press coverage was prearranged, has unjustifiably promulgated the negative view to the public. Since the House-passed Resolution is scheduled for debate the last week of September, since we are informed that your Committee is meeting September 16 to consider this matter, and since we do not desire any postponement of full Senate consideration, we do not ask for extended hearings or any other action that might postpone full Senate consideration.

We trust the Committee will do what it can to rectify the damage done our just cause by the unfair hearings conducted in its name by reporting favorably on Wednesday the Equal Rights Amendment as originally introduced in both Houses. The tenor of the Senate Committee report can reflect the favorable testimony offered by legal authorities that will otherwise not be known to the Senate or the public.

Respectfully yours,

MARGARET LAURENCE,
*National Legislation Chairman, National Association of Women Lawyers.*
MARGARET BELLER,
*President, Women's Bar Association of the District of Columbia.*

---

[From the New York Times, Sept. 13, 1970]

EQUAL RIGHTS: WHO IS AGAINST IT AND WHY

WASHINGTON.—Prof. Leo Kanowitz of the University of New Mexico Law School testified before Congress last week in favor of the equal rights amendment to the Constitution, but it was all a terrible mistake.

He had been invited to appear before the Senate Judiciary Committee because Senator Sam J. Ervin, Jr., Democrat of North Carolina, the leading opponent of the amendment, had the mistaken impression that the professor, too, opposed the amendment, which would prohibit the denial of any legal right to any person because of sex.

Professor Kanowitz thus turned out to be the only favorable witness in three long days of hearings in which Senator Ervin sought to establish that the enactment of the amendment would mean that husbands would no longer be required to support their wives and children and that such sex distinctions as separate prisons and separate public toilets would be declared illegal—arguments that supporters of the amendment say are simply ridiculous.

That Senator Ervin has "stacked" the hearing is demonstrable. He has started off with the opposition witnesses, contrary to usual Congressional practice, and is apparently planning to use the excuse of the press of other Senate business to limit the testimony of favorable witnesses to a single day this week.

PRESIDES AT HEARING

As he has presided over the hearing (he is not the chairman of the Judiciary Committee, but James O. Eastland of Mississippi, who is the chairman, has let him act as chairman in this case), Senator Ervin has shown that he shares scarcely a single idea or principle with the backers of the amendment. In the packed committee hearing room, it is almost possible to hear the amendment's advocates grind their teeth in anger and frustration as the Senator takes off on one of his oratorical flights concerning the "good Lord's plan" that men and women should be different.

However, not everyone who opposes the amendment holds to the Senator's view that, even today the place of most women is in the home. One witness who disagreed most

emphatically—but was nevertheless perhaps the most forceful of all the week's opposition witnesses—was Myra K. Wolfgang, a labor union leader from Detroit. Mrs. Wolfgang is a national and local officer of the Hotel and Restaurant Employees and Bartenders Union, and she is no "pussycat" embracing the idea that domination by males is her natural and happy fate.

She told Senator Ervin, at one point, that the men in the union movement were just like men elsewhere—"full of male chauvinism."

But Mrs. Wolfgang opposes the equal rights amendment because she believes it would hurt the working women that she represents. Specifically, she fears it would wipe off the books state laws that set maximum daily and weekly hours of work for women, but none for men. Women, she said, need more protection than men from the demands of employers that they work large quantities of overtime—60 hours a week, and more—because when their day's work on the assembly line or in the laundry or hotel is done, they have to go home and cook and clean and take care of children.

And, she continued, the husbands of these working-class women rarely give them any help.

With a jerk of her head toward the college-educated women who were filling most of the seats in the hearing room, she went on to say that 10-hour days might be all right for "lady lawyers" and other women in the professional and managerial fields, whose jobs are not physically exhausting, who can pay for household help, whose husbands are more disposed to lend a hand at home and whose children, if any, are probably grown.

Mrs. Wolfgang's testimony thus highlighted the fact that much of the opinion on the equal rights amendment may be dividing on what amounts to class lines.

The relatively affluent, eductaed women who are supporting the equal rights amendment feel strongly that even laws that genuinely protect women should not be retained only for women because, as long as women are protected from certain hardships, they will also be looked down upon, and kept down, both professionally and personally. They will take their chances, willingly, with any hardships that true equality brings.

Mrs. Wolfgang's view is that such women do not know what real hardship is and that she is not about to risk such hardship for working class women for the sake of some theory about equality.

Professor Kanowitz has quite a different answer, shared by many of the amendment's advocates—namely, that the risk to the working class woman really is not great because states probably would not invalidate the maximum hours laws for women but would, instead, extend them to men.

This argument appeared likely to become the central issue over which the amendment is fought in the Senate. Eighty Senators—much more than the required two-thirds—had signed their names as sponsors of the amendment. But that was back when no one in the Senate thought the amendment would ever get through the House, which it did last month.

Now, however, Senators know their votes on this issue will matter. Many are troubled by some of the arguments that was highlighted last week. Whether the supporters will be able to answer them all in their brief day before the committee remains to be seen. The equal rights amendment has been placed on the "must" list for consideration by the Senate before it adjourns this year.

## STRIKING GENERAL MOTORS

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 28, 1970*

Mr. DERWINSKI. Mr. Speaker, as the strike by the United Auto Workers Union against General Motors Corp. continues, the adverse impact on the economy, on the employees of the company, and certainly on consumers of General Motors' products cannot be minimized. An extremely objective and penetrating editorial commentary by WBBM–TV, channel 2 in Chicago on September 17 sets the strike in its proper perspective:

STRIKING GENERAL MOTORS

A long strike at General Motors Corporation by the United Auto Workers Union could cause new dislocation of the economy. There are predictions the strike will last six to eight weeks . . . and this could hurt the nation. The Wall Street Journal points out such a strike could imperil the recovery of the economy . . . could cause layoffs in plants dependent on General Motors . . . raise the total unemployment figure and make consumers cautious about spending extra funds.

General Motors sells nearly 20 billion dollars worth of products in the United States annually . . . spends over 13 billion dollars on services and materials—including 10 percent of the nation's steel output.

We haven't even mentioned the inflationary effect a costly settlement at General Motors and at the other auto companies and the rise in car prices might have on the total economy. The government has always stayed out of autoworkers' strikes . . . but we believe it should be jumping into this walkout.

We believe the administration should have set wage-price guidelines in the past—should have worked harder to forestall this strike. We believe it could enunciate guidelines for settlement now . . . certainly insist on continuous bargaining.

The public has a major role in this confrontation between the two giants of labor and management . . . and its voice should be heard through its government.

The government does not work for General Motors or the UAW alone, but also for you.

# SENATE—*Tuesday, September 29, 1970*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. RUSSELL).

The Reverend Horace Churchman Lukens, pastor, the Presbyterian Church, Vienna, Va., offered the following prayer:

Almighty and gracious God, who dost overrule the affairs of men and nations, grant the presence of Thy spirit in the Senate of our beloved country.

Deliver us from the pressures of the moment. Guide us by Thy humility and wisdom.

When we are weary in well-doing, refresh us with Thy power. Bring wholeness to our tortured spirits. Clear our minds with Thy truth and move our wills into Thy will.

Send Thy gifts upon us, the spirit of openness to Thee, the spirit of honesty and love, the spirit of understanding and forgiveness.

Feed our hearts with Thy love and guide our minds in the way of peace.

Heal our land, O God, and make us a people pleasing to Thee, who hast demonstrated Thy saving mercy in Jesus Christ our Lord. Amen.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Monday, September 28, 1970, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The PRESIDENT pro tempore. The Chair now lays before the Senate the unfinished business of the previous day, which will be stated.

The assistant legislative clerk read as follows: Senate Joint Resolution 1, proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

The Senate resumed the consideration of the joint resolution.

CONTROLLED TIME UNDER CLOTURE MOTION

The PRESIDENT pro tempore. Under the order entered on Friday, September 25, 1970, the first hour of today's session will be equally divided between the Senator from Montana (Mr. MANSFIELD) and the minority leader, the Senator from Pennsylvania (Mr. SCOTT).

Who yields time?

Mr. MANSFIELD. Mr. President, I yield myself 1 minute before I turn the time over to the distinguished Senator from Indiana (Mr. BAYH).

The PRESIDENT pro tempore. The Senator from Montana is recognized for 1 minute.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Finance, the Committee on Commerce, and the Subcommittee on Public Lands of the Committee on Interior and Insular Affairs be authorized to meet during the session of the Senate today.

Mr. BAYH. Mr. President, although it is with great reluctance, consistency compels the Senator from Indiana, who realizes the pressures and the obligations of the majority leader, to object.

The PRESIDING OFFICER. The Senator has that right. Objection is heard.

Mr. MANSFIELD. Mr. President, I yield the remainder of the time on this side to the distinguished Senator from Indiana (Mr. BAYH).

The PRESIDENT pro tempore. The Senator from Indiana is recognized.

## LIMITING CAMPAIGN EXPENDITURES FOR RADIO AND TELEVISION ADVERTISING

Mr. SCOTT. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 1 minute.

Mr. SCOTT. Mr. President, last week, the Senate passed and sent to the President a bill limiting the campaign expenditures for radio and television advertising.

Both the Senator from Tennessee (Mr. BAKER) and myself as conferees refused to sign the conference report because we felt this was not good legislation and did not adequately deal with the problem of increasing expenses necessary to campaign effectively for public office.

Last week WTOP broadcast an editorial pointing up the inequities in the bill, making the point that the way to provide real fairness is to limit overall campaign spending.

I ask unanimous consent to have the broadcast editorial printed in the RECORD.

There being no objection, the broadcast editorial was ordered to be printed in the RECORD, as follows:

VETO THE CAMPAIGN SPENDING BILL

[A WTOP editorial, Washington, D.C.—broadcast Sept. 25 and 26, 1970]

WTOP urges President Nixon to veto the bill passed by Congress this week which would limit TV and radio spending in political campaigns.

The bill cannot fulfill its promise, which is to cut down the unfair advantage of the rich candidates. The theory goes that if wealthy and poor candidates have equal access to television, it won't be possible to "buy" an election with a lavish budget.

But the problem is not television; the problem is the lavish budget. A ceiling on TV and radio spending will send the rich guy scurrying to invest heavily in other media, and the unfair advantage will persist.

An alternate way to provide real fairness is to limit *overall* campaign spending. That way, candidates would have the freedom to get their cases to the public as they see best.

For TV and radio stations to oppose limits on TV and radio spending sounds, admittedly, like a self-interest pleading, but the facts are otherwise. Political dollars are not as significant to broadcasters as they seem, because they frequently replace dollars from regular advertisers.

An issue much more dear to us is that the bill sitting now on the President's desk represents another needless intrusion of government into the realm of communications. Limits this year on broadcasting almost surely will be followed by restraints on other media. The losers won't be the media; the losers will be the public.

A curb on television and radio campaigning would be misguided and dangerous, and that's sufficient reason for a veto of the bill by the President.

This was a WTOP Editorial . . . Norman Davis speaking for WTOP.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time be taken equally out of both sides.

The PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, will the Senator from Indiana yield me 30 seconds for a unanimous consent request?

Mr. BAYH. I yield 30 seconds to the Senator from West Virginia.

The PRESIDENT pro tempore. The Senator from West Virginia is recognized for 30 seconds.

PRIVILEGE OF THE FLOOR DURING ROLLCALL VOTE ON CLOTURE MOTION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, beginning with the rollcall motion to invoke cloture and until the vote is announced, the Chamber, the floor, and the lobbies be cleared of all Senators' aides, with the exception of aides to the majority and minority leaders, and aides to the Senator from Indiana (Mr. BAYH), who is the chief sponsor of the resolution.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. SCOTT. Mr. President, I now yield 5 minutes to the distinguished Senator from Alabama (Mr. ALLEN).

The PRESIDENT pro tempore. The Senator from Alabama is recognized for 5 minutes.

Mr. ALLEN. Mr. President, I oppose Senate Joint Resolution 1 because of what it provides and because of what it does not provide.

In the first place, it provides, through its provision for a 40-percent President, that we can elect a plurality President in this country. I oppose the 40-percent provision.

I also oppose the runoff provision. I believe that these two provisions are the worst features of the resolution. I oppose them for what they do not say.

Senate Joint Resolution 1 does not provide when the runoff shall take place. It does not provide who shall certify the returns of the election. It does not provide to whom the returns shall be sent in and who shall make the final determination.

It makes no provisions for contests. It makes no provisions for recounts. Further, Mr. President, the provisions of Senate Joint Resolution 1 could not, from a practical point of view, go into effect until the presidential election of 1976.

Therefore, it seems to the junior Senator from Alabama that there is no hurry about enactment of the resolution.

Further, there is no unanimity of opinion with regard to the resolution. Many of its sponsors have reservations as to its wisdom and some of its sponsors have amendments themselves to it. In fact, the very amendment under consideration at this time is an amendment of the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Maryland (Mr. TYDINGS), which would eliminate the runoff provision. Both Senators are cosponsors of the resolution. There are perhaps a dozen proposed amendments. Also, the distinguished Senator from Missouri (Mr. EAGLETON), another cosponsor, has an amendment to the resolution. Therefore, there is no unanimity of opinion.

The Senate itself, in the past, has submitted and passed the proportional plan, which did not pass the other body. The distinguished Senator from Indiana (Mr. BAYH) himself at one time recommended and espoused the automatic plan. So, before we send this measure out to the States for their action, we should come up with the best possible resolution. If the Senate could change its mind, if the Senator from Indiana can change his mind on what is the best approach, certainly between now and 1976, the Senate could change its mind again.

It does seem to the junior Senator from Alabama that now is no time to rush this measure through. Now is no time to cut off debate.

Furthermore, I oppose this measure because it would result in the proliferation of splinter parties. There is a built-in protection under the present system, our electoral college system, that discourages splinter parties because no party, large or small, can register in the electoral college unless it carries the popular vote in at least one State.

So, Mr. President, we are going to see third parties proliferate. We are going to see an end brought to our two-party system.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. GURNEY. Mr. President, I yield 1 additional minute to the Senator from Alabama.

The PRESIDENT pro tempore. The Senator from Alabama is recognized for 1 additional minute.

Mr. ALLEN. Mr. President, we are going to see our two-party system destroyed, we are going to see our federal system destroyed if this amendment is submitted to the States, and by them ratified.

Furthermore, if this measure goes to the States for ratification, it means that for 7 years we will not have meaningful action in Congress for electoral college reform.

Possibly some changes should be made in the electoral college. But if we submit

this measure to the States and allow 7 years for its ratification, it will foreclose the possibility of Congress submitting any meaningful reform back to the States for such 7-year period.

Let us not cut off debate. Let us decide on a better plan and submit it to the States.

Mr. President, I yield back the remainder of my time.

The PRESIDENT pro tempore. Who yields time?

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be taken equally from both sides.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GURNEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The question before the Senate is, Is it the sense of the Senate that debate on the pending motion shall be brought to a close?

Mr. GURNEY. Mr. President, I yield 5 minutes to the Senator from North Carolina.

The PRESIDENT pro tempore. The Senator from North Carolina is recognized for 5 minutes.

Mr. ERVIN. Mr. President, the most serious business that the Congress can ever perform is submitting a proposed constitutional amendment to the people of the States for ratification or rejection. I do not think this is the proper time for the Senate to reach a decision on this matter simply because 34 Members of the Senate are engaged in campaign for reelection and are not able, in many cases, to be here except at great sacrifice to themselves. For these reasons, they quite naturally are unable to give their full consideration to the various proposals that are now pending before this body.

There are at least four separate proposals pending before this body: the direct election plan, the district plan, the Katzenbach plan, and the proportional voting plan, with variations of each. I think we should consider such a serious matter as this in an atmosphere where Senators are not perplexed with election problems, where Senators can give their undivided attention to the matter pending before the Senate, and where they can solve the problem in an atmosphere of intellectual calmness.

The Senate today is in a hurried condition; it is in a harried condition. This is true because we are, we hope, in the last stages of a session. The Senate should not seek to solve this problem in the closing days of a hurried and harried session.

Furthermore, I point out that on the 3d of November we are going to have an election in which the entire membership of the House of Representatives is going to be selected by the people and in which 34 Members of the Senate are going to be selected by the people. In all human probability there may be a substantial number of retirements from Congress, either voluntary on the part of Members or involuntary, at the hands of the people. I think that when an election is to be held on the 3d day of November and perhaps new Senators and new Representatives chosen, we should not undertake to submit a constitutional amendment when the body that submits it may turn out to be, more or less, a "lameduck" Congress.

I think the people should have the right to have their freshly chosen Senators and Representatives participate in the decision as to whether the Constitution should be amended. Furthermore, we should consider this question in an atmosphere of calmness.

The junior Senator from Alabama has pointed out most eloquently that there is no possibility that any amendment which this Senate may vote to submit to the people could become effective in any event before the year 1976, and it is the height of folly, in my judgment, for a hurried and harried Senate to undertake to submit an amendment under these circumstances.

When we amend the Constitution we do not act as we do when we pass a law. A law can be changed at the next session, but a constitutional amendment cannot be changed except by the same process by which it is placed in the Constitution. It can only be removed in the same manner. When a constitutional amendment is adopted it is something which binds untold generations of Americans. For that reason I respectfully suggest this Senate should not act on this matter in these hurried and harried days when one-third of the membership is absent a large part of the time.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator's 5 minutes have expired.

Mr. ERVIN. Mr. President, I would like to have 1 additional minute.

Mr. GURNEY. I yield 1 additional minute to the Senator from North Carolina.

Mr. ERVIN. Mr. President, I recognize there should be reform in the electoral process. We should do away with faithless electors. We should do away with the archaic method of election in the House when no candidate receives a majority of the electoral vote. We should also give serious consideration to whether or not we should do away with the winner-take-all proposition in respect to the electoral votes of particular States.

I pledge, come January, if the good Lord permits me to remain in this body, that I will devote my major efforts to an electoral reform which will give us a genuine reform in the fields I have mentioned, without converting 184,000 separate election precincts into one great big election precinct, where a fraudulent vote in each precinct or a miscounted vote in each precinct would put every close election conducted in this Nation in a state of uncertainty.

The PRESIDING OFFICER. Who yields time?

Mr. BAYH. Mr. President, I yield 1 minute to the Senator from Alaska.

AMENDMENT NO. 954

Mr. STEVENS. Mr. President, I send to the desk an amendment to the Griffin-Tydings amendment, and I ask unanimous consent that it be considered as an amendment read in accordance with rule XXII in the unanimous-consent agreement entered into in this body last Friday.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Mr. President, reserving the right to object, and I do not know whether I will object, we did not hear the reading of the amendment.

Mr. STEVENS. Mr. President, I ask that this amendment be read in accordance with rule XXII.

The PRESIDING OFFICER. Under the order of last Thursday, blanket unanimous consent has been granted to qualify any amendment up to the time of the vote.

Mr. STEVENS. That is all I ask; that this amendment be accorded the same treatment as all other previous amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT NO. 954

Beginning with line 1, page 5, strike out all to and including line 7, page 5, and insert in lieu therof the following:

"SEC. 3. The persons joined as candidates for President and Vice President having the greatest number of votes shall be elected President and Vice President, if such number be at least 40 per centum of the total number of votes cast. If none of the persons joined as candidates for President and Vice President shall have at least 40 per centum of the total number of votes, but the persons joined as candidates for President and Vice President having the greatest number of votes cast in the election received the greatest number of the votes cast in each of several States which in combination are entitled to a number of Senators and Representatives in the Congress constituting a majority of the whole number of Members of both Houses of the Congress, such persons shall be elected President and Vice President. For the purposes of the preceding sentence, the District of Columbia shall be considered to be a State, and to be entitled to a number of Senators and Representatives in the Congress equal to the number to which it would be entitled if it were a State, but in no event more than the number to which the least populous State is entitled.

"If, after any such election, none of the persons joined as candidates for President and Vice President is elected pursuant to the preceding paragraph, the Congress shall assemble in special session, in such manner as the Congress shall prescribe by law, on the thirty-fourth day after the date on which the election occurred. The Congress so assembled in special session shall be composed of those persons who are qualified to serve as Members of the Senate and the House of Representatives for the regular session beginning in the year next following the year in which the election occurred. In that special session the Senate and the House of Representatives so constituted sitting in joint session shall choose immediately, from the two pairs of persons joined as candidates for President and Vice President who received the highest numbers of votes cast in the election, one such pair by ballot. For that purpose a quorum shall consist of three-fourths of the whole number of Senators and Representatives. The vote of each Member

of each House shall be publicly announced and recorded. The pair of persons joined as candidates for President and Vice President receiving the greatest number of votes shall be elected President and Vice President. Immediately after such choosing, the special session shall be adjourned sine die.

"No business other than the choosing of a President and a Vice President shall be transacted in any special session in which the Congress is assembled under this section. A regular session of the Congress shall be adjourned during the period of any such special session, but may be continued after the adjournment of such special session until the beginning of the next regular session of the Congress. The assembly of the Congress in special session under this section shall not affect the term of office for which a Member of the Congress theretofore has been elected or appointed, and this section shall not impair the powers of any Member of the Congress with respect to any matter other than proceedings conducted in special session under this section."

On page 5, line 16, immediately after the period, insert the following new sentence: "No such election shall be held later than the first Tuesday after the first Monday in November, and the results thereof shall be declared no later than the thirtieth day after the date on which the election occurs.".

AMENDMENT NO. 956

Mr. DOLE. Mr. President, I send an amendment to the desk and ask that it be printed and considered as read.

In considering the issue of electoral reform many points of controversy, dispute and disagreement have arisen, but there have been numerous points about which a great number of observers and commentators have agreed.

One of these points is that reform is needed. Two of the three elections in the decade of the 1960's nearly resulted in constitutional crises, and the 1968 presidential election was the most potentially confusing and disruptive to take place in our country in recent history.

Many plans, proposals, compromises and substitutes have been considered and discussed in recent weeks. Some are simple, some complex. Some might pass the Congress but not the State legislatures; others would stand much better chances of passing the legislatures but not the Congress.

Out of all this confusion and variety of argument, a consensus seems to have emerged that any candidate for President who have won a simple majority of the popular vote should be the President.

Majoritarianism is an ingrained element of the U.S. political tradition, and its application to presidential politics is equally valid as in other areas of public and private life.

Regional, geographical and Federal considerations aside, the American people believe that any person who can command more than 50 percent of the vote of the people should be the President.

The greatest number of our 37 Presidents have been chosen by a majority of the votes, but in 15 elections the winning candidate has had less than a majority—sometimes substantially less and sometimes only a fraction of a percentage point less.

The distinguished senior Senator from North Carolina and others have pointed out on numerous occasions the dangers and inherent uncertainties of total reliance on the popular vote in electing the President. The opportunities for regional, one-issue, and splinter candidates to disrupt the system have been fully cataloged and explained. With sole reliance on popular vote, the election of the President would be placed on even more unsure footing than it finds itself today. Thus the proposal has been advanced that some vestige of the present electoral system should be preserved as a backup to direct election. There have been several such backup systems suggested, but the one which seems to me to be the most reliable and the most in keeping with our past practices would be the so-called automatic electoral system. This system would eliminate the office of elector and the opportunities for capricious, unpredictable or unscrupulous behavior by individuals casting electoral votes. It would instead cast electoral votes automatically on the basis of the popular vote winner in each State.

Mr. President, the plan contained in the amendment I am introducing today combines the concepts of electing the majority votegetter and the automatic electoral vote system. I believe it offers a viable alternative to many of the objections which have been raised to the plans heretofore introduced and a positive answer to the problem of reforming our presidential election system.

I ask unanimous consent that my amendment be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. HUGHES). The amendment will be received and printed, and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 956) is as follows:

AMENDMENT NO. 956

Strike out all after the resolving clause, and insert in lieu thereof the following:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE ——

"SECTION 1. The President and the Vice President shall be elected as provided in this article. No person constitutionally ineligible for the office of President shall be eligible for that of Vice President.

"SEC. 2. On the Tuesday next after the first Monday in November of the year preceding the year in which the regular term of the President is to begin, unless the Congress shall by law appoint a different day, there shall be held in each State and in the District of Columbia an election in which the people thereof shall cast their votes for President and for Vice President. In such election, each voter shall cast a single vote for two persons, one a candidate for President and the other a candidate for Vice President, who shall have consented to the joining of their names on the ballot. The places and manner of holding the election shall be prescribed in each State by the legislature thereof but shall be subject to regulation by the Congress. The voters in each State shall have the qualifications requisite for persons voting for members of the most numerous branch of the State legislature. The voters in the District of Columbia shall have the qualifications prescribed by the Congress.

"There shall be cast for the persons receiving the greatest number of votes for President and for Vice President in each State a number of electoral votes equal to the whole number of Senators and Representatives to which that State may be entitled in the Congress. There shall be cast for the persons receiving the greatest number of votes for President and for Vice President in the District of Columbia a number of electoral votes equal to the whole number of Senators and Representatives to which the District would be entitled in the Congress if it were a State, but in no event more than the number cast by the least populous State.

"Within forty-five days after the election, or at such other times as the Congress may direct, the official custodian of the election returns of each State and of the District of Columbia shall prepare, sign, certify, and transmit sealed to the seat of the Government of the United States, directed to the President of the Senate, a list of all persons for whom votes were cast for President and a separate list of all persons for whom votes were cast for Vice President. Upon each such list there shall be entered the number of votes cast for each person whose name appears thereon, the total number of votes cast for all such persons, and the name of the persons for whom the electoral votes of such State or District are cast.

"SEC. 3. On the 6th day of January following the election, unless the Congress shall by law appoint a different day not earlier than the 4th day of January and not later than the 10th day of January, the President of the Senate shall, in the presence of the Senate and the House of Representatives, open all the certificates. The persons joined as candidates for President and Vice President who receive the greatest number of votes cast by the voters shall be President and Vice President if such number is at least 50 per centum of the total number of votes cast. If no such persons receive at least 50 per centum of the total number of votes cast, then the persons joined as candidates for President and Vice President who receive the greatest number of electoral votes shall be President and Vice President, if such number is a majority of the total number of electoral votes. If no such persons have a majority of the total number of electoral votes, then from the two pairs of persons receiving the highest number of electoral votes the Senate and the House of Representatives sitting in joint session shall immediately choose one pair as the President and Vice President by ballot. A quorum for this purpose shall consist of three-fourths of the whole number of the Senators and Representatives. The vote of each Member of each House shall be publicly announced and recorded, and in addition there shall be cast for the persons for whom the electoral votes of the District of Columbia were cast a number of votes equal to the number of such electoral votes. The pair of persons receiving the greatest number of votes shall be chosen.

"SEC. 4. If, at the time fixed for the counting of the votes as provided in section 3, the person who would have been entitled to become President, other than by choice of the Senate and House of Representatives, shall have died, the person who is entitled to become Vice President, other than by choice of the Senate and the House of Representatives, shall be President.

"The Congress may by law provide for the case of the death of any of the persons from whom the Senate and the House of Representatives may choose a President or a Vice President whenever the right of choice shall have devolved upon them; for the case of the death of both the persons who, except for their deaths, would have been entitled

to become President and Vice President; and for the case of the death or withdrawal, prior to the election provided for in section 2, of a candidate for President or for Vice President."

Mr. HRUSKA. Mr. President, how much time is remaining on this side?

The PRESIDING OFFICER. There are 22 minutes remaining to the proponents and 11 minutes remaining to the opponents.

Mr. HRUSKA. Mr. President, I yield myself 3 minutes. Did the Presiding Officer say we have 11 minutes?

The PRESIDING OFFICER. Yes.

Mr. HRUSKA. I yield myself 3 minutes.

Mr. President, this afternoon the Senate is once again being asked to cut off debate on Senate Joint Resolution 1 which provides for the direct popular election of the President. And once again I hope that this request will be soundly rejected.

On the opening day of discussion on this resolution I said that this proposal was "the most mischevious and dangerous constitutional amendment that has ever received serious consideration by Congress." Nothing that I have heard during this debate has changed my mind with regard to that statement; if anything, my fears concerning this proposal have increased rather than decreased.

Those of us who oppose the national plebiscite scheme have attempted to point out over the past days the dangers which would result from direct popular election of the Chief Executive. We have dwelt at some length on the probable destruction of the two-party system, on the undermining of the separation of powers, on the grave weakening of the federal system, on the radicalization of public opinion, on the erosion of protection for minority groups, on the interminable challenges and recounts, on the irresistible temptation of fraud. We have asked the proponents many questions concerning these threats to our stable Government, Mr. President. And answers come there not. Answers come there not.

Any person who seeks to alter our Constitution bears a heavy burden of proof to show not only that his proposal is salutary for some apparent immediate purpose, but that it is in the permanent and aggregate good of the Nation. It is my firm belief that the proponents have failed to meet both of these obligations.

To quote Richard Goodwin:

For the first time it is proposed that we amend the Constituton simply because we think something might go wrong at a future date.

No other constitutional amendment in our history has been put forward with such an inadequate demonstration of what it might entail. This single reason would be sufficient to reject direct election. But the opponents have not rested our case on that proposition alone; we have put forward at least eight very compelling and very disturbing consequences of the adoption of this proposal, any one of which would justify rejection of this radical idea. Let me quote Alexander Bickel of Yale Law School on the threat to the stability of this Nation posed by direct election:

There is a tendency, visible in the last two or three elections, toward fragmentation and I think any structural arrangement, such as direct election, that encourages that fragmentation risks, God help us, the end of this Republic and of the finest experiment in government ever known to man.

Those are very strong words, but this Senator believes with him that direct election poses that tremendous threat to this Nation.

The reason we are asked to vote on cloture today is because some claim that the opponents have been engaged in extended debate on this issue. Very candidly, let me point out that the only obstruction to Senate business began quite clearly last Thursday. There was none until last Thursday. A few facts will illustrate my point very clearly. This resolution was laid down as the pending business of the Senate on September 8. Sixteen business days have elapsed since that time; direct election has been discussed to some extent on 14 of those days. During that time the Senate has filled 1,697 pages in the CONGRESSIONAL RECORD, of which only 340 have been devoted to direct election. Just one-fifth of our debate has been on Senate Joint Resolution 1; four-fifths have gone for other things. Let me point out that in just 1 week, the 5 days directly preceding last Thursday, the Senate approved 53 measures and ratified one treaty. Fifty-three bills and one treaty. Contrast this to the entire month of July when the Senate acted on only 37 measures. Thirty-seven in a month compared with 54 in a week. That amounts to a tremendous legislative record which certainly would compare favorably with any week that I have spent in the Senate. And compare that with what has happened since last Thursday: Not one single measure has been permitted to come to the floor for debate and a vote.

Two weeks ago under similar circumstances I pointed out that during this session the Senate has spent 17 days discussing the qualification of a nominee for the Supreme Court, 47 days discussing the question of foreign military sales, and 29 days discussing military procurement—important subjects all. Now we have spent 14 days discussing a constitutional amendment which would alter our entire form of government in this Nation. To any reasonable person there seems to be an imbalance in the amount of time we have devoted to various subjects—especially when it is considered that there was no threat of cloture offered on the three longest debates.

This Senator sincerely hopes that cloture will again be defeated this afternoon. A vote against cloture is not a vote against electoral reform—there remain ample opportunities to enact meaningful reform which the States will ratify before the 1972 elections. A vote against cloture is a vote against a radical and dangerous alteration in the structure of this Nation's Government.

Mr. President, If I have any time remaining I reserve it for future use.

The PRESIDING OFFICER. Who yields time?

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, hopefully with the time being taken out of both sides.

The PRESIDING OFFICER. Is there objection? The Chair hears no objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GURNEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GURNEY. Mr. President, I yield 2 minutes to the distinguished Senator from Mississippi (Mr. STENNIS).

Mr. STENNIS. Mr. President, I just have this to say, in reiteration, in a way, of what I said yesterday. As one who has been here since debate on this subject in 1948, let me say at that time I voted for the so-called electoral reform idea, which was then the Lodge-Gossett measure that passed this body by a two-thirds vote plus one.

I am opposed to the invoking of cloture today, but as one who has been through many of these debates—and this is a good one—I will join on any proposals that are anywhere near my way of thinking on this subject—not like mine, but anywhere near like mine—in trying to get together on a sound, constructive, forward-looking amendment to submit to the States that will bring our method of electing the President up to date, and eliminate some of the hazards and uncertainties that we do have now.

I will work with any Senator, as I have said, who has a proposal nearly like mine. I believe we can in that way bring out, and Congress can pass, a sound, constructive proposal that will be adopted by the States.

I believe, with all due deference to the Senator from Indiana, that his amendment or anything close to it, if passed by Congress, will not be approved by three-fourths of our States. So, in the way of getting something constructive across the board, let us not impose cloture here now, but have time for deliberation, planning, and explanation, rather than the pressure of just a little more consideration and then having to vote right or left.

I thank the Senator for the time. I yield back whatever time I have left.

The PRESIDING OFFICER. Who yields time?

Mr. BAYH. Mr. President, I yield 5 minutes to the Senator from Montana (Mr. MANSFIELD).

Mr. MANSFIELD. Mr. President, nearly 2 weeks more of the Senate's time have been consumed since the Senate last voted on the pending question. On that occasion, just before the vote, I indicated my feeling to the Senate that since the Constitution itself requires a two-thirds vote to change its terms, sufficient minority protection was available. The exercise of going through the procedures of rule XXII—designed to protect precisely the same minority—was, I said, an unnecessary and unreasonable burden to impose against the Senate.

I renew my plea that the Senate reject this effort. I do not believe the minority can in this way hide behind cloture proceedings. I think this vote—requiring two-thirds of the Senate—must be considered a vote on the merits of constitutional change.

After all, the merits of that question having been pending before the Senate since last September 2. Before that, a proposed constitutional change was before the House of Representatives, where it was overwhelmingly approved. Before that, some 4½ years ago, this precise question was the subject of a series of hearings before the Senate Committee on the Judiciary. And for years, the matter has been debated, discussed, and thrashed over.

Its success is based on a two-thirds vote. And again I point out, the success of cloture is based upon a two-thirds vote. A vote today must therefore be considered a vote on the question of constitutional change.

Finally, it should be made clear that this attempt by a few Senators to require a two-thirds vote of the Senate twice with respect to constitutional change would seem to abuse the whole purpose and intent of rule XXII. The notion of continuous debate in the Senate until two-thirds say otherwise after all is a device that was established to protect the minority. But when the question itself contains a built-in minority safeguard—as do proposed constitutional amendments—then it is clear that requiring two-thirds twice abuses the terms and intent of rule XXII and the notion of extended debate.

I hope the Senate rejects this effort and adopts the cloture motion. I hope each Senator votes today as he would on the merits of the question. A vote today against the consideration of the merits of Senate Joint Resolution 1 must be considered a vote to protect the antiquated status quo of national elections. The question today is: Can the Senate be permitted to consider changes in the electoral process?

I hope the Senate supports the direct election of the President by the people of the United States.

Mr. GRIFFIN. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. GRIFFIN. First of all, I wish to make clear in the RECORD a point with which I am sure the majority leader would agree; although on many other occasions when the majority leader refers to the "minority" he is referring to those on the Republican side of the aisle. However, in the statement just made the majority leader was not referring to Republicans when he used the word "minority."

Mr. MANSFIELD. No.

Mr. GRIFFIN. I am sure he would be first to agree that this is not a partisan issue.

Mr. MANSFIELD. That is correct.

Mr. GRIFFIN. There are votes for and against this cloture motion on both sides of the aisle. Indeed, I wish to emphasize that the President of the United States is for the proposal pending before the Senate to change the Constitution and reform the electoral process.

Second, I wish to associate myself with the general thrust of the remarks made by the distinguished majority leader. When the Constitution requires a two-thirds vote on an issue, it seems to me that we ought to be able to get to a vote on the merits. Furthermore, I think it will be an unfortunate reflection on the Senate, if we cannot get to a vote on the merits of an issue which requires a two-thirds vote in order to be passed.

There is no question in my mind but that a failure to get to a vote on the merits in this case will greatly increase the pressure next January for further changes in rule XXII. I believe the Senate ought to be very much aware of that, as we proceed to a vote. I hope the cloture motion will prevail.

Mr. MANSFIELD. I thank the Senator, and am in accord with his statement as to rule XXII.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HRUSKA. Mr. President, I yield 1 minute to my colleague from Nebraska.

Mr. CURTIS. I thank my colleague.

Mr. President, I point out that there is no assurance of a vote on the merits even if cloture prevails. The last time cloture was invoked, there were dozens of amendments voted upon with roll calls in this Chamber, with no debate whatever; and there is no assurance that amendments will get consideration. But there is no assurance that even the resolution will be fully considered on its merits.

If they want to proceed on this, the proponents should show some willingness to accommodate some of these people who wish to offer amendments. It is entirely possible that we will have to vote on amendments that are not debated.

Mr. FULBRIGHT. Mr. President, will the majority leader yield to me?

Mr. MANSFIELD. If I have any time.

The PRESIDING OFFICER. Who yields time?

Mr. BAYH. I yield 1 minute to the Senator from Arkansas.

Mr. FULBRIGHT. Mr. President, I wish to state that I do not agree with the Senator from Michigan that a vote against cloture is a vote against electoral reform. I have, in the past, voted for a change in this constitutional provision. I voted for a proportional plan some years ago, and I think a change should be made now. I approve of electoral reform.

The Senator from Nebraska has called attention to the fact of the much longer time that was taken by the Senators who were so determined in their objections to giving this body voice in our foreign policy, that so much more time was taken in opposition to the Cooper-Church amendment.

I, for one, am for a change in the electoral college. I have not quite made up my mind which one I am going to support. I have in the past, as I say, supported the proportional plan, and may again.

But I do not think undue time has been taken on such an important matter. I hope the view is not generally accepted that, because we want the issue thoroughly debated, we do not want any reform.

The PRESIDING OFFICER. Who yields time?

Mr. HRUSKA. Mr. President, I yield myself 2 minutes.

The words spoken by the Senator from Arkansas, in my opinion, are well taken. We have many amendments pending here, which will qualify for a vote if cloture is voted. We do not know their substance; we do not know the arguments for and against. The legislatures that will ultimately be called upon to make a judgment on this subject will not know the arguments for and against.

Let me repeat a couple of points I made earlier: Since September 8, when this resolution was made the pending business, 16 business days have elapsed. Since that time, direct election has been discussed to some extent on 14 of those days. During that time, the Senate has filled about 1,700 pages of CONGRESSIONAL RECORD. Only 340 of those pages have been devoted to this joint resolution, Mr. President. And during the week preceding last Thursday, there were 53 measures and one treaty approved by this body. The discussion on this joint resolutive in no way interferred with the business of the Senate until last Thursday when objection was heard to consideration of any matter except direct election.

This measure, with its many ramifications, has not had ample discussion for the record, and for the guidance of those who will turn to this debate for the purpose of ultimately taking action on it if the resolution is agreed to by the Senate. I respectfully suggest that cloture should not be voted. There should not be a limitation on debate until we have had an ample opportunity to explore the many amendments, some of which we have not even had an opportunity to see or consider at all.

For that reason, I urge again that the cloture motion be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. HRUSKA. How much time remains, Mr. President?

The PRESIDING OFFICER. One minute, to the opponents.

Mr. BAYH. Mr. President, I yield myself 4 minutes.

The Senator from Indiana does not need to tell the Senate that the pending order of business is Senate Joint Resolution 1, or, to be specifically accurate, the Griffin-Tydings amendment to Senate Joint Resolution 1. This provides for the direct popular election of the President. The Senator from Indiana happens to favor direct popular election.

We are not about to decide whether the proposition of the Senator from Indiana, the Senator from Tennessee, and several other cosponsors is to be enacted by the Senate. The issue is not whether this question is to be put to a vote on the merits, but whether we are to have any electoral reform at all. Despite the well-intentioned statements of some of our

colleagues, let the record show that is the issue before us. Are we going to go to another election night 1968, when, if there had been a change of fewer than 42,000 votes in the right three States, we would not have elected any President.

Neither Mr. Nixon nor Mr. Humphrey would have had a majority of the electoral vote, and that would have given to a third-party candidate the chance to go from one candidate to the other and sell off the Presidency to the highest bidder. Last time the third party candidate happened to be Governor Wallace. But it could just as well have been someone on the left.

Are we going to sit still and let this happen? As a token of good faith, I have said on this floor, and I say again, to the Senator from Michigan (Mr. GRIFFIN), the Senator from Alaska (Mr. STEVENS), the Senator from Kansas (Mr. DOLE), the Senator from Maryland (Mr. TYDINGS), and all others who have expressed concern about the runoff provision, that I am willing to yield on that and accept some workable agreement. We can get together and say we will not have a runoff, that we will go to the Electoral College and then to Congress, or make some other provision. I am willing to accept a compromise, and pledge my own effort not only to see that it is accepted by this body, but to see whether the other body will accept it. I think they will. But now we are saying that we are not going to permit the Senate to vote on anything. It has been said that we do not have enough time. It has been said by the Senator from Arkansas, I think accurately, that we have debated other issues at greater length. But I think we can make a valid distinction between the invocation of cloture on a normal piece of legislation that requires only a majority vote of this body, and a constitutional amendment. As to the former the cloture rule provides an additional safeguard against unjustifiably cutting off debate. But a constitutional amendment has greater protection built into it than rule XXII provides. You not only need two-thirds of the Senate; you need two-thirds of the House and then three-fourths of the State legislatures.

We have perused the record, and I respectfully suggest that we have already spent significantly more time debating this proposed constitutional amendment than any other constitutional amendment in more than a hundred years.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. BAYH. I yield.

Mr. FULBRIGHT. In the first place, this matter is very complicated. In all honesty, I am bound to say to the Senator that I have learned more about the various proposals in the last 48 hours than I had before.

As often happens, we become engaged in other matters, and only when we are faced with necessity, do we study it. I have learned a good deal about what is proposed here. I honestly think there has not been an undue amount of time devoted to this matter in view of its complexity.

I am impressed by what the Senator says about the two-thirds requirement with respect to a constitutional amendment. I am also very much interested in the preservation of rule XXII. I think it is as important as anything else about the Senate, and I do not wish to do anything to prejudice that rule.

I am not taking the position that we will never vote on this matter. The Senator says we are. I do not say that we shall never vote on it. I do not think we have taken enough time, and I am not prepared to vote on it today. That does not mean I will not be prepared to vote on it tomorrow or the next day, because I think there is much merit in what the Senator says about the constitutional amendment requiring two-thirds for adoption and, therefore, there is not the same justification of delay as might be the case with ordinary bills.

Mr. BAYH. I appreciate the position of the Senator from Arkansas. I was merely trying to point out the protection built into a constitutional amendment, and he pointed out that he understands it.

Mr. FULBRIGHT. This is complicated, a little more complicated than some of the other issues.

Mr. BAYH. The Senator is correct.

Mr. FULBRIGHT. The effect of this amendment, I dare say, a great many people do not know yet, because it is very complicated.

Mr. BAYH. I am not sure this guarantee would be persuasive to the Senator from Arkansas, but I would be willing to pledge, as the principal sponsor of Senate Joint Resolution 1—and I think the other sponsors would also be willing to pledge—that if we can get the debate terminated and we are in a position to sit down with the authors of the amendments and see how much time they think they need on each one of those amendments, I personally, would be willing to agree to any reasonable unanimous-consent request to allow adequate debate on each of those amendments.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. MANSFIELD. That cannot be done, because if cloture is invoked, each Senator is limited to 1 hour, and that time is not transferable.

Mr. BAYH. Mr. President, the Senator from Indiana would like to propound a parliamentary inquiry.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator will state it.

Mr. BAYH. In the event cloture is voted, is it not possible for one Senator to yield time to another Senator if unanimous consent is granted?

The PRESIDING OFFICER. Only by unanimous consent.

Mr. BAYH. So what the Senator from Indiana is suggesting is that we can get a reasonable amount of time on each amendment, so that we will have a chance to study each of them and let them come to a vote. Of course debate is essential. I would not want to vote on any of these amendments, even one I might propound, without any time for debate at all.

I would suggest to the Senator from Nebraska that it is patently unfair to suggest that we have not made an effort to come to a vote. The Senators who have been setting in the Chamber have seen the Senator from Indiana propose on three different occasions unanimous-consent agreements to vote on any of the 13 amendments that are before the Senate. They have also seen the Senator from North Carolina object, as is his right, to each request. We have made an effort.

I have said to the Senator from North Carolina, whom I respect, that I will vote on anything. Let us get started. But he has said, "No." That is why we were forced—frankly, against my preference—to move to get the debate shut off. I would be glad to sit down with the Senator from Arkansas or any other Senator who is concerned about insufficient time to vote on these measures.

On both sides of the aisle there are Senators whose political lives are on the block right now. One of them is making a mad dash back here at this very moment. Some have canceled a whole day's schedule and traveled the whole continent to be here. I think we have to recognize that the number of times we can ask these Senators to make this sacrifice is not unlimited. They are going to be here today. I hope that we will give serious consideration to shutting off this debate and sitting down with the proponents and the opponents of the various amendments. Let us agree to a reasonable time, and then let us let the Senate work its will.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. RANDOLPH. Is it not a fact that if cloture is invoked, each Senator would have 1 hour, and we could then have 100 hours of debate, if it were thought necessary to continue this discussion? Contrary to what the public has been led to believe by opponents of cloture, the debate would continue. By invoking cloture, we would not close out floor consideration of this vital matter. If there were 8 hours of debate each day, we could use 12½ days in further argument on this issue. I regret that we did not secure cloture September 17. I doubt that we can do so now, but I emphasize that citizens generally expect Senators to come to grips with the central problem and stop the filibuster.

Mr. BAYH. The Senator, who supports cloture and electoral reform, is correct. I appreciate the Senator's bringing this up. I suggest that some Senators are not going to want to spend this hour, and I am sure they will be willing to yield it to others.

Mr. HRUSKA. It cannot be yielded.

Mr. BAYH. As the Presiding Officer just pointed out, it can be yielded by unanimous consent.

The Senator from Indiana is pledging himself in advance not to object. We will have reasonable time to debate the amendments. The Senator from Nebraska has been on committees, and he knows how complicated these things are, and so does the Senator from Indiana.

One last word. I think we really are faced by a bigger question right now than the success or failure of direct election, of the automatic plan, or of the

cloture petition. I respectfully suggest that the Senate is now going to answer the question that is being posed by hundreds of thousands of people in this country, as to whether our system will work. If this system will not let the Senate vote on an issue that requires two-thirds of the vote in this body and a two-thirds vote in the House and three-fourths of the State legislatures, the Senator from Indiana finds great difficulty in protecting it as he has.

Mr. ALLEN. Mr. President, the majority report does not make a case for the direct-election amendment. It is so flawed in many respects that I find it difficult to imagine that many Senators would be willing to stand alone on the arguments presented in the report.

Let me briefly refer to the majority report in a descriptive and not in an argumentative manner.

The first 6 pages of the report consist in the main of a statement of facts. These pages outline the provisions of the proposal; the purpose of the amendment; a history of Senate Joint Resolution 1; an analysis of the resolution; a description of the electoral college system; and an inadequate, if not inaccurate, statement of the design of the framers of the Constitution in adopting the electoral college.

Mr. President, even the factual presentation is flawed by words and phrases such as "the antiquated electoral college"; "undemocratic unit vote"; "the hybrid electoral college system"; "degenerated"; "dangerous and anachronistic"; and such images as "political peritonitis."

Mr. President, the lack of valid evidence to support such rhetoric is such as to suggest that its use is most inappropriate in a serious consideration of a proposed constitutional amendment.

Let us examine what purports to be evidence to support the conclusions. As a beginning, let us examine the use of the terms "archaic" and "anachronism." The word "archaic" suggests a relationship to an earlier period. "Anachronism" has reference to a chronological misplacing of persons, events, object, or customs in regard to each other.

But, Mr. President, while it is true that the electoral college is related to its origin in the Constitution, what evidence is offered to prove that it is chronologically misplaced? There is none. The statement is a bald-faced conclusion which we are asked to accept without evidence.

Can we assume that the electoral college is an anachronism because it is associated with an earlier period? If so, the Constitution, of which it is a part, is subject to the same charge. Of course, I do not consider the Constitution or any part of it to be antiquated or anachronistic.

On the other hand, one might associate the Magna Carta with antiquity, but not the Constitution of the United States. Of course, there are some, perhaps too many, who consider Magna Carta and "due process of law" to be anachronisms. It seems to me the Supreme Court subscribes to that point of view. Then too, there are liberal extremists who suggest that the English Bill of Rights and the American Constitution are anachronisms because they are concerned with limiting powers of civil government whereas today it is contended the need of socialist governments is for more governmental powers over the people and their institutions.

But the point is that the majority report does not demonstrate that the electoral college is either antiquated or that it is an anachronism.

On the other hand, Mr. President, it can be demonstrated to the satisfaction of reasonable men that the electoral college is just as valid, viable, and useful today as it was the day it was adopted.

The nearest approach to an argument to support the charge of anachronism is based on the fact that the electoral college is the result of a compromise. It is true, of course, but what conclusions can be drawn from the fact of compromise? It has been said by participants in the Constitutional Convention, and in truth, that the Constitution itself is a "bundle of compromises." Is that evidence that the Constitution is an anachronism? Of course not.

The majority report completely ignores the fact that while there were many compromises in the Constitution, none compromised sound principles. In other words, the electoral college compromise was completely consistent with underlying and determinant principles of the form of government created by the Constitution. It is appropriate to consider some of these principles.

Is the electoral college consistent with the principle of federalism? Of course it is.

Is it consistent with the principle of dual sovereignty without which there could be no Federal Government? Of course it is.

Is the electoral college consistent with the principle of separation of powers without which there could be no checks and balances? Of course it is.

Is it consistent with the principle of a limited government—which is to say a government governed by the supreme law of the Constitution? Of course it is.

Is it consistent with the principle of diffusion of power as a protection from the dangers of political parties and factions? Of course it is.

Is it consistent with a government which recognizes the existence of separate institutions of authority in a free society of which civil government is but one and of which the Federal Government is but one of many civil governments. Of course it is.

Mr. President, it is not enough to say that the electoral college is an anachronism merely because it is the result of a compromise. This is a crude method of indirectly attacking the principles from which the compromises arose.

Mr. President, let us examine the electoral college compromise in more detail. The majority report distorts both the nature of and the essence of the compromise. As a matter of fact, one might be misled into believing that the compromise was necessary to the adoption of the Constitution. I doubt that.

The electoral college was not conceived as the primary method of electing Presidents. Madison explained that it was generally conceded that electors, no matter how appointed would vote for a candidate for President from their separate States. At one point Mr. Madison was so bold as to predict that such would be the case 99 out of 100 times. What is the significance of this estimation concerning the persons for whom the electors would vote?

For one thing, the most populous States having the largest number of electors would have the advantage in nominating leading candidates. On the other hand, electors from smaller States would have the balance of power in the election and could prevent a candidate from obtaining a majority vote. Thus, an election by the House of Representatives appeared inevitable.

In fact, an election of the President by the House was anticipated and welcomed. The effect of such a system was to permit choice of nominees by the populous States and empower the less populous States to exercise the balance of power by reason of the compromise that each State should have but one vote in the House.

The compromise balanced out the nominating advantage of larger States against the advantage of smaller States by reason of the unit vote by States in the House.

Is that undemocratic? If so, then logic would compel us to say that the process of nomination by political parties today is also undemocratic. It is a fact that presidential nominating conventions of the major political parties today are dominated by a numerically greater delegate representation from the most populous States.

Is it not true that after nominations are made by the most populous States that party candidates must appeal to the voters of the less populous States in order to get a majority of electoral votes? The difference today is in the method of nominating candidates for one thing and the fact that unit vote of States has been transferred from the House to the electoral college. One method may be better than another but not because one method is more democratic than the other.

Let it be noted, however, that under the direct election proposal, most populous States will continue to dominate the nominating conventions but they will also dominate the election. Well, I do not believe the American people are going to buy that deal. A lot more should be said about the alleged "undemocratic" electoral college. But to the best of my knowledge, no recent candidate for election to Congress has gone to the people and advocated weakening the federal system of government. He has not campaigned on a promise to fight for greater concentration of power to both nominate and elect Presidents and Vice Presidents in the populous States.

He has not said that he advocates the takeover of the election machinery of the States and to change the system of representation from population to qualified voters. Who, when, and where has any candidate campaigned on the issue that the principles of the Constitution are archaic?

However, we have read of a great deal of lipservice given to the idea of democ-

racy and we must further examine this aspect of the case.

Mr. President, do the proponents of this direct election want democracy? I doubt it. The Constitution certainly did not structure a democracy. Why do not candidates go to the people and advocate political democracy?

In this connection, I am reminded of an observation by Plato in evaluating the principle of democracy.

Democracy is a most accommodating and charming form of government, full of variety and diversity . . . dispensing equality to equals and unequals alike . . . and if a man has a mind to establish a state he must go to a democracy as he would go to a bazaar, where they sell them and pick out that which suits him.

With the technology at our command, it is now possible to put an electronic voting box on most every telephone pole in the United States and with the aid of electronically coded keys every qualified voter in the United States could vote on any issue with almost instantaneous computation of results. Is that the kind of democracy one wants? Why should the people in a democracy be limited the right to vote only for elected officials?

But of course this is not the democracy that proponents of the direct election contend for. They just want a "lock on the board" so to speak. A system of election that allows the most populous States to nominate as well as elect the President and Vice President. But that is as far as it goes.

The proponents invoke the imagery of Athenian democracy under the misleading and rather absurd slogan "one man—one vote." I hope the womens lib group will take hold of that silly slogan and give it a working over. But the advantages of the slogan is that it permits the sloganeer to evade the real issue. The essence of the slogan as applied to presidential elections is that the power to elect is shifted from numbers of people modified by the weight of States in the electoral college and shifted to numbers of voters who may or may not vote in elections. Such a change is too extreme to be dismissed with a slogan—one man—one vote. The slogan is the product of what even liberal critics of the Supreme Court refer to as a "judicial Bonapartism." But that is beside the point.

But how many advocates of one man, one vote would be willing to see the principle applied to any issue other than elections of the President and other public officials? Not many. In this connection, Mr. James Burnham, one of the philosophers in residence on the staff of the National Review has called attention in the issue of September 8, 1970, to the paradox existing in England today.

Burnham quotes from the ultra-liberal English New Statesman as follows:

Even in British politics, there are some unmentionable truths. If democracy worked in an Athenian sense, this country would still exercise the death penalty, flog young criminals, forbid abortion, repatriate (colored) immigrants, punish homosexuals, ban strikes and abolish aid to poorer countries . . . We resolve the paradox by the theory of delegated democracy . . . Better the liberal elitism of the statute book than the reactionary populism of the market place.

If the real Democrats in our country who would please stand up and say so we might ask if it is not true that we would then have voluntary prayers in public schools; local control of local institutions of self-government; and impeachment of Federal judges who refuse to be bound by the law of the Constitution? Would we not reestablish the right of a free people to balance the legislative powers of their State governments if they wanted to; would we not have an end to bombings, looting, arsonists, snipers, and campus riots under the pretense of freedom of speech and assembly; would we not have Communists out of our defense plants and subversive individuals denied support from tax funds?

Under the circumstances, Mr. President, I cannot believe that those who engage in the one man, one vote Bonapartist sloganeering are altogether serious in promoting democracy and I think it shameful that such slogans should be resorted to in an effort to bamboozle the people into further undermining our federal system of government.

Mr. HRUSKA. I yield my remaining time to the Senator from Wyoming.

Mr. HANSEN. Mr. President, the question before the Senate, more properly, it seems to me, is not, shall we deny the Senate the right to shut off all debate now, but, rather, are we to junk and to cast aside a system that has served this country very well for nearly 200 years?

I think it is significant that the Senator from Indiana pointed out that he is agreeable—he said that he has spoken to Senators DOLE, GRIFFIN, STEVENS, and TYDINGS—to change the runoff proposal on the basis of something that would be workable. I should like to underscore the word "workable." He is admitting, himself, that to try to have a runoff by direct election would not be a very workable system.

I think we must bear in mind that if we are going to have 1 hour of debate only—that means on the proposal and all amendments—we will not have a chance to debate or understand most of them.

Mr. BAYH. Mr. President, I yield 1 minute to the Senator from Tennessee.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator from Tennessee is recognized for 1 minute.

Mr. BAKER. Mr. President, for whatever time I have, I shall make these remarks brief.

The Senate has discussed Senate Joint Resolution 1 at length and in depth. It has done so eloquently and well. It has examined the circumstances and it will continue to do so whether cloture is invoked or not, because electoral reform is a necessity in this country.

The sole issue today is whether we shall have electoral reform according to this formula. I think that we should. We should have the popular vote to elect President and Vice President of the United States.

I share with others in this Chamber some concern as to the runoff provision but I do not share any fear that we will not be able to accommodate appropriate modifications of that runoff procedure during the 100 hours of debate that the Senate will have, if and when cloture is invoked.

Mr. President, I intend to vote for cloture. I hope that the Senate will invoke cloture and that the Senate will then set about the business of long overdue electoral reform.

## CLOTURE MOTION

The PRESIDING OFFICER (Mr. HOLLINGS). All time has now expired. The clerk will report the cloture motion.

The legislative clerk read the cloture motion, as follows:

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the pending resolution of the Senator from Indiana (Mr. BAYH)—proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

Mike Mansfield, Clifford P. Case, Charles McC. Mathias, Jr., Charles H. Percy, Edmund S. Muskie, George D. Aiken, Lee Metcalf, Walter F. Mondale, Edward M. Kennedy, Joseph D. Tydings, William Proxmire, Birch Bayh, Hugh Scott, Philip A. Hart, Fred Harris, Richard S. Schweiker, Mike Gravel.

## CALL OF THE ROLL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HOLLINGS). Under rule XXII, the Chair directs that the clerk call the roll to ascertain the presence of a quorum.

The assistant legislative clerk called the roll, and the following Senators answered to their names:

[No. 333 Leg.]

| | | |
|---|---|---|
| Allen | Goldwater | Montoya |
| Allott | Goodell | Moss |
| Anderson | Griffin | Muskie |
| Baker | Gurney | Nelson |
| Bayh | Hansen | Packwood |
| Bennett | Harris | Pastore |
| Bible | Hart | Pearson |
| Boggs | Hartke | Pell |
| Brooke | Hatfield | Percy |
| Burdick | Holland | Prouty |
| Byrd, Va. | Hollings | Proxmire |
| Byrd, W. Va. | Hruska | Randolph |
| Case | Hughes | Ribicoff |
| Church | Jackson | Russell |
| Cook | Javits | Saxbe |
| Cooper | Jordan, Idaho | Schweiker |
| Cotton | Kennedy | Scott |
| Cranston | Long | Smith, Maine |
| Curtis | Magnuson | Smith, Ill. |
| Dodd | Mansfield | Spong |
| Dole | Mathias | Stennis |
| Dominick | McCarthy | Stevens |
| Eagleton | McClellan | Symington |
| Eastland | McGee | Talmadge |
| Ellender | McGovern | Thurmond |
| Ervin | McIntyre | Tydings |
| Fannin | Metcalf | Williams, N.J. |
| Fong | Miller | Williams, Del. |
| Fulbright | Mondale | Young, N. Dak. |

Mr. KENNEDY. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Tennessee (Mr. GORE), and the Senator from Hawaii, (Mr. INOUYE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the

Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are absent on official business.

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from California (Mr. MURPHY) and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The PRESIDING OFFICER (Mr. HUGHES). A quorum is present.

The Chair would caution the occupants of the galleries that there will be no display of approval or disapproval at the announcement of the vote.

PARLIAMENTARY INQUIRIES

Mr. HRUSKA. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Nebraska will state it.

Mr. HRUSKA. Is it correct to say that a vote of "yea" will limit debate pursuant to rule XXII, whereas a vote of "nay" will reject the limitation of debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD of West Virginia. Mr. President, would the Chair kindly caution the occupants of the galleries with respect to rule XIX in connection with demonstrations of approval or disapproval?

The PRESIDING OFFICER (Mr. HUGHES). The occupants of the galleries are guests of the Senate and are cautioned to refrain from making displays of approval or disapproval on announcement of the vote.

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Indiana will state it.

Mr. BAYH. Mr. President, is it accurate to say that under rule XXII, if cloture should be invoked, each Senator will have 1 hour in which to debate anything that he desires, and that by unanimous consent his time can be yielded to other Senators in debate as we proceed to a final vote under the cloture motion?

The PRESIDING OFFICER (Mr. HUGHES). The Chair would advise the Senator from Indiana that under a unanimous-consent request, the Senator is correct.

Mr. HANSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Wyoming will state it.

Mr. HANSEN. Mr. President, is it not the case, under the parliamentary inquiry just propounded by the distinguished Senator from Indiana (Mr. BAYH), that each Senator will not have 1 hour's time to debate anything he may choose but that he shall be restricted to 1 hour during which he may debate all things in which he is interested.

Mr. MANSFIELD. That is correct—in toto.

Mr. HANSEN. I think that is an important distinction.

The PRESIDING OFFICER (Mr. HUGHES). The Chair would advise the Senator from Wyoming that each Senator has a total of 1 hour.

Mr. BAYH. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Indiana will state it.

Mr. BAYH. Mr. President, to make certain that all Senators know their rights, do I correctly understand that if, after the invocation of cloture, the proponents and the opponents of the general proposition take the various amendments and sit down and come up with an agreement on a time limitation, then Senators who do not wish to speak can yield their time to Senators who do?

The PRESIDENT. Under a unanimous-consent agreement on a time limitation on each amendment, the Senator is correct.

Mr. GRIFFIN. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The regular order has been called for.

## VOTE

The PRESIDING OFFICER. Pursuant to rule XXII, a rollcall has been had, and a quorum is present.

The question before the Senate now is, Is it the sense of the Senate that debate on the pending motion shall be brought to a close?

The yeas and nays are automatic.

Those in favor of closing debate will vote "yea." Those opposed will vote "nay."

The clerk will now call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Tennessee (Mr. GORE), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are absent on official business.

On this vote, the Senator from Alabama (Mr. SPARKMAN) is paired with the Senator from Texas (Mr. YARBOROUGH) and the Senator from Alaska (Mr. GRAVEL). If present and voting, the Senator from Alabama would vote "nay," and the Senators from Texas and Alaska would vote "yea."

On this vote, the Senator from North Carolina (Mr. JORDAN) is paired with the Senator from Ohio (Mr. YOUNG) and the Senator from Oklahoma (Mr. BELLMON). If present and voting, the Senator from North Carolina would vote "nay" and the Senators from Ohio and Oklahoma would vote "yea."

Also on this vote, the Senator from Nevada (Mr. CANNON) is paired with the Senator from Tennessee (Mr. GORE) and the Senator from Hawaii (Mr. INOUYE). If present and voting, the Senator from Nevada would vote "nay" and the Senators from Tennessee and Hawaii would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from California (Mr. MURPHY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness and, if present and voting, would vote "nay."

If present and voting, the Senator from Vermont (Mr. AIKEN) would vote "yea."

Also if present and voting, the Senator from Texas (Mr. TOWER) would vote "nay."

On this vote the Senator from Oklahoma (Mr. BELLMON) and the Senator from Ohio (Mr. YOUNG) are paired with the Senator from North Carolina (Mr. JORDAN). If present and voting, the Senator from Oklahoma and the Senator from Ohio would each vote "yea" and the Senator from North Carolina would vote "nay."

The yeas and nays resulted—yeas 53, nays 34, as follows:

[No. 334 Leg.]

YEAS—53

| | | |
|---|---|---|
| Anderson | Hatfield | Packwood |
| Baker | Hughes | Pastore |
| Bayh | Jackson | Pearson |
| Boggs | Javits | Pell |
| Brooke | Kennedy | Percy |
| Burdick | Long | Prouty |
| Byrd, W. Va. | Magnuson | Proxmire |
| Case | Mansfield | Randolph |
| Church | Mathias | Ribicoff |
| Cook | McCarthy | Saxbe |
| Cranston | McGovern | Schweiker |
| Dodd | McIntyre | Scott |
| Eagleton | Metcalf | Smith, Maine |
| Goodell | Mondale | Smith, Ill. |
| Griffin | Montoya | Symington |
| Harris | Moss | Tydings |
| Hart | Muskie | Williams, N.J. |
| Hartke | Nelson | |

NAYS—34

| | | |
|---|---|---|
| Allen | Ervin | McGee |
| Allott | Fannin | Miller |
| Bennett | Fong | Russell |
| Bible | Fulbright | Spong |
| Byrd, Va. | Goldwater | Stennis |
| Cooper | Gurney | Stevens |
| Cotton | Hansen | Talmadge |
| Curtis | Holland | Thurmond |
| Dole | Hollings | Williams, Del. |
| Dominick | Hruska | Young, N. Dak. |
| Eastland | Jordan, Idaho | |
| Ellender | McClellan | |

NOT VOTING—13

| | | |
|---|---|---|
| Aiken | Inouye | Tower |
| Bellmon | Jordan, N.C. | Yarborough |
| Cannon | Mundt | Young, Ohio |
| Gore | Murphy | |
| Gravel | Sparkman | |

The PRESIDING OFFICER (Mr. HUGHES). On this vote the yeas are 53 and the nays are 34. Fewer than two-thirds of the Senators present and voting having voted in the affirmative, the motion is rejected.

## UNANIMOUS-CONSENT REQUEST

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be laid aside temporarily and that the Senate turn to the consideration of Calendar No. 1254, H.R. 17604, a bill having to do with the authorization for certain types of military construction at military installations.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. BAYH. Mr. President, would the distinguished majority leader withhold that request long enough for us to suggest the absence of a quorum?

Mr. MANSFIELD. Mr. President, I withhold my request.

Mr. BAYH. Mr. President, I respectfully suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, I should like to express my deep personal appreciation to the majority leader, the minority leader, and their assistants for the patience and cooperation they have given us in our effort to try to find a way to correct the imperfections that exist in the electoral college system.

In addition, I wish to express my gratitude to those Members of the Senate who have been inconvenienced because of the efforts of the Senator from Indiana to try to see that the Senate would be put to a test on this question. I know that there are Senators present who should be campaigning. I can see some in the Chamber who, I am afraid, canceled an entire day's campaigning to be here and to speak out and stand up and be counted on this important issue. I, as one Member of this body, am doubly grateful to them, and I apologize if my responsibility to try to pursue a solution to this problem has caused undue hardship on them.

We did not secure enough votes to get cloture at this time. I would hope that because of the gravity of the problem and the time that has been expended not only by the Senate and individual Members thereof, but also by citizens across the country who are members of the illustrious organizations that have lent their good names to a solution of this problem, such as the American Bar Association, the Chamber of Commerce, the AFL–CIO, the UAW, the League of Women Voters, and others, we will not shirk our responsibility to the Senate or to the country. I hope that we will give serious consideration in the hours and days ahead to the gravity of the problem which exists and to the fact that it will continue to exist unless the Senate puts the question to a vote.

If Senators do not like the proposal of the Senator from Indiana and some 39 cosponsors, then let us vote it down. Let us deny it the necessary two-thirds. Then let us try to get a vote on another proposal. The Senator from Indiana does not feel that he is arbitrary; he wants to get the best solution he can. Failing to obtain a direct-election amendment, let us try to obtain something else. But I think that every Senator who has studied the question and who has shown enough interest to submit an amendment or a resolution should be given the courtesy of a vote on it.

Because of my full understanding of the responsibility that rests on the shoulders of the leadership, I am reluctant at this time to again tie up the entire Senate. I should like to have an opportunity to talk with a few Senators who have expressed a willingness to try to have this proposal considered at another time. For that reason, I will not object to the proposal of the Senator from Montana to put aside Senate Joint Resolution 1 temporarily. I emphasize "temporarily."

Mr. President, I must say I have been committed to this matter for so long and I feel it is so important I am inclined to stand here individually and push the point until doomsday; but I think it would be unrealistic and it would work a hardship on those Senators who have other responsibilities.

So, out of deference to the leadership, I foreclose my opportunity to deny this unanimous consent request. However, I believe that the leadership understands that I intend to pursue this matter further and talk to Senators individually who have different ideas, until we have a resolution of this problem.

I do not want to go through another election day like in 1968 when I looked at the television screen and realized that we almost did not elect a President at all. And at that very same moment in history one of the networks suggested Illinois was going to go for Nixon, and thus he would be President Nixon, the very next picture showed that his opponent, Mr. Humphrey had a majority of the votes. We cannot let that happen. We cannot allow a candidate with a minority of the popular vote to be elected President.

I hope in the next few hours and days we will be able to work out a resolution of this impasse. We must not hide behind a parliamentary right, but must vote for what is right or wrong, depending on the dictates of our consciences.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. BAYH. I yield.

Mr. DOLE. Mr. President, I appreciate the statement of the Senator from Indiana, and am wondering at this time if it might be appropriate to consider some substitute for Senate Joint Resolution 1. We have discussed this prior to this moment. There are a number of us who feel very strongly about electoral reform. I appreciate the Senator from Indiana's basic tolerance, understanding, and willingness to discuss some of the options available.

As the Senator knows, I submitted earlier today an amendment to the effect that a candidate who received 50 percent of the vote would be President; and failing that we go to the so-called Katzenbach plan making the electors automatic. If no one has a majority of the electoral vote, a joint session of the House and Senate would determine who would be President. It appears this might offer some hope and compromise because it incorporates the principle of direct election, the 50-percent provision assuring that a person receiving that percentage will be President.

At the same time, the proposed compromise does not destroy the electoral system. I say this in all good faith, because, as the Senator knows, we have commiserated about this possibility and other possibilities for some days.

Mr. BAYH. Mr. President, in answer to the distinguished Senator from Kansas, I appreciate his concern. I have already committed myself in two or three or four instances to finding a contingency other than the runoff, whether it is to be the proposal of the Senator from Kansas, or the Senator from Missouri, who has a different kind of contingency in an overall reform, or the Senator from Michigan, or the Senator from Maryland, or the Senator from Alaska or other Senators.

I am hesitant to say at this particular time which of these proposals favor. However, let the record show again that I am not only wedded to the runoff, but I am committed to finding a contingency that is better adapted than a runoff.

I have expressed concern about the 50-percent provision proposed by the Senator from Kansas, because under it the present incumbent in the White House would not have been elected by direct popular vote. My reluctance stems from that plus the proliferating effect that would result from the 50-percent provision. But I am willing to talk to the Senator from Kansas and other Senators to see if we can resolve this problem.

---

## MILITARY CONSTRUCTION AUTHORIZATIONS, 1971, PENDING BUSINESS TEMPORARILY LAID ASIDE

Mr. MANSFIELD. Mr. President, I renew my request that the pending business be laid aside temporarily and that the Senate proceed to the consideration of Calendar No. 1254, H.R. 17604.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read the bill by title, as follows:

H.R. 17604, an act to authorize certain construction at military installations, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the bill, which had been reported from the Committee on Armed Services, with an amendment to strike out all after the enacting clause and insert:

TITLE I

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction.

INSIDE THE UNITED STATES

UNITED STATES CONTINENTAL ARMY COMMAND

*(First Army)*

Fort Belvoir, Virginia, $4,959,000.
Carlisle Barracks, Pennsylvania, $503,000.
Fort Dix, New Jersey, $11,671,000.
Fort Eustis, Virginia, $260,000.
Fort Hamilton, New York, $575,000.
Fort Knox, Kentucky, $8,249,000.
Fort Lee, Virginia, $98,000.
Fort George G. Meade, Maryland, $257,000.

*(Third Army)*

Fort Benning, Georgia, $2,855,000.
Fort Campbell, Kentucky, $497,000.
Fort Gordon, Georgia, $31,447,000.
Fort Jackson, South Carolina, $506,000.
Fort Stewart, Georgia, $1,534,000.

*(Fourth Army)*

Fort Bliss, Texas, $809,000.
Fort Sam Houston, Texas, $15,496,000.
Fort Sill, Oklahoma, $581,000.

*(Fifth Army)*

Fort Carson, Colorado, $623,000.
Fort Benjamin Harrison, Indiana, $523,000.
Fort Riley, Kansas, $7,515,000.
Fort Leonard Wood, Missouri, $1,946,000.

*(Sixth Army)*

Hunter-Liggett Military Reservation, California, $2,915,000.
Fort Lewis, Washington, $3,757,000.
Presidio of Monterey, California, $2,635,000.
Fort Ord, California, $3,497,000.
Presidio of San Francisco, California, $7,004,000.

*(Military District of Washington)*

Fort Myer, Virginia, $525,000.

UNITED STATES ARMY MATERIEL COMMAND

Aeronautical Maintenance Center, Texas, $4,413,000.
Alabama Army Ammunition Plant, Alabama, $117,000.
Anniston Army Depot, Alabama, $915,000.
Atlanta Army Depot, Georgia, $117,000.
Badger Army Ammunition Plant, Wisconsin, $1,604,000.
Burlington Army Ammunition Plant, New Jersey, $384,000.
Charleston Army Depot, South Carolina, $67,000.
Cornhusker Army Ammunition Plant, Nebraska, $650,000.
Harry Diamond Laboratory, Maryland, $12,898,000.
Iowa Army Ammunition Plant, Iowa, $300,000.
Letterkenny Army Depot, Pennsylvania, $410,000.
Fort Monmouth, New Jersey, $2,757,000.
New Cumberland Army Depot, Pennsylvania, $99,000.
Picatinny Arsenal, New Jersey, $752,000.
Radford Army Ammunition Plant, Virginia, $2,333,000.
Ridgewood Army Weapons Plant, Ohio, $120,000.
Rock Island Arsenal, Illinois, $2,750,000.
Sierra Army Depot, California, $369,000.
Tobyhanna Army Depot, Pennsylvania, $115,000.
Tooele Army Depot, Utah, $249,000.
Watervliet Arsenal, New York, $1,362,000.
White Sands Missile Range, New Mexico, $2,261,000.
Yuma Proving Ground, Arizona, $1,798,000.

UNITED STATES ARMY SECURITY AGENCY

Vint Hill Farms, Virginia, $475,000.

UNITED STATES ARMY STRATEGIC COMMUNICATIONS COMMAND

Fort Huachuca, Arizona, $2,383,000.
Fort Ritchie, Maryland, $876,000.

UNITED STATES MILITARY ACADEMY

United States Military Academy, West Point, New York, $8,519,000.

ARMY MEDICAL DEPARTMENT

Walter Reed Army Medical Center, District of Columbia, $10,216,000.

CORPS OF ENGINEERS

Topographic Command, Missouri, $558,000.

MILITARY TRAFFIC MANAGEMENT AND TERMINAL SERVICE

Military Ocean Terminal, Bayonne, New Jersey, $3,440,000.
Oakland Army Base, California, $1,458,000.

UNITED STATES ARMY, HAWAII

Schofield Barracks, $2,955,000.

OUTSIDE THE UNITED STATES

UNITED STATES ARMY, PACIFIC

Korea, Various Locations, $6,190,000.
Vietnam, Various Locations, $25,000,000.

SAFEGUARD SYSTEM COMMAND

Kwajalein Missile Range, $560,000.

UNITED STATES ARMY SECURITY AGENCY

Various Locations, $2,535,000.

UNITED STATES ARMY, EUROPE

Germany, Various Locations, $7,864,000.
United Kingdom, Burtonwood, $1,191,000.
Various Locations: For the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations, including international military headquarters, for the collective defense of the North Atlantic Treaty Area, $35,000,000; Provided, That, within thirty days after the end of each quarter, the Secretary of the Army shall furnish to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a description of obligations incurred as the United States share of such multilateral programs.

SEC. 102. The Secretary of the Army may establish or develop classified military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $2,000,000.

SEC. 103. The Secretary of the Army may establish or develop Army installations and facilities by proceeding with constructions made necessary by changes in Army missions and responsibilities which have been occasioned by: (a) unforeseen security considerations, (b) new weapons developments, (c) new and unforeseen research and development requirements, or (d) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of $10,000,000: Provided, That the Secretary of the Army, or his designee, shall notify the Committee on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire as of September 30, 1971, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to that date.

SEC. 104. The Secretary of the Army is authorized to acquire, under such terms as he deems fair and reasonable, and at the present fair market value, State owned and privately owned land and estates in land and improvements thereon located within the boundaries of the White Sands Missile Range, New Mexico.

SEC. 105. The Secretary of the Army is authorized to acquire out of appropriations which may be available for Civil Defense in the fiscal year 1971 Independent Offices Appropriations Act, under such terms as he deems appropriate, land or interests in land in approximately one hundred and sixty acres in the vicinity of Mount Joy, Pennsylvania, as he considers necessary for the construction of a prototype Decision Information Distribution System facility to augment and upgrade the Area's Civil Defense warning capability.

SEC. 106. (a) Public Law 88–174, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 101, as follows:

With respect to "Aberdeen Proving Ground, Maryland", strike out "$4,065,000" and insert in place thereof "$4,326,000".

(b) Public Law 88–174, as amended, is amended by striking out in clause (1) of section 602 "$155,919,000" and "$200,788,000" and inserting in place thereof "$156,180,000" and "$201,049,000", respectively.

SEC. 107. (a) Public Law 88–390, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 101, as follows:

With respect to "Edgewood Arsenal, Maryland," strike out "$6,843,000" and insert in place thereof "$7,405,000".

(b) Public Law 88–390, as amended, is amended by striking out in clause (1) of section 602 "$256,536,000" and "$307,597,000" and inserting in place thereof "$257,098,000" and "$308,159,000", respectively.

SEC. 108. (a) Public Law 89–188, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 101, as follows:

(1) With respect to "Aberdeen Proving Ground, Maryland," strike out "$3,419,000" and insert in place thereof "$3,874,000".

(2) With respect to "Rock Island Arsenal, Illinois", strike out "$826,000" and insert in place thereof "$835,000".

(b) Public Law 89–188, as amended, is amended by striking out in clause (1) of section 602 "$261,135,000" and "$317,996,000" and inserting in place thereof "$261,599,000" and "$318,460,000", respectively.

SEC. 109. (a) Public Law 89–568, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 101, as follows:

With respect to "Fort Jackson, South Carolina", strike out "$5,565,000" and insert in place thereof "$5,928,000".

(b) Public Law 89–568, as amended, is amended by striking out in clause (1) of section 602 "$59,352,000" and "$134,067,000" and inserting in place thereof "$59,715,000" and "$134,430,000", respectively.

SEC. 110. (a) Public Law 90–110, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 101, as follows:

(1) With respect to Fort Lee, Virginia, strike out "$1,727,000" and insert in place thereof "$2,575,000".

(2) With respect to United States Military Academy, West Point, New York, strike out "$15,495,000" and insert in place thereof "$18,077,000".

(b) Public Law 90–110, as amended, is amended by striking out in clause (1) of section 802, "$284,625,000" and "$388,018,000", and inserting in place thereof "$288,055,000" and "$391,448,000", respectively.

SEC. 111. (a) Public Law 90–408, as amended, is amended under the heading "INSIDE THE UNITED STATES" in section 101, as follows:

(1) With respect to "Fort Benjamin Harrison, Indiana", strike out "$4,590,000" and insert in place thereof "$7,200,000".

(2) With respect to "Pine Bluff Arsenal, Arkansas", strike out "$169,000" and insert in place thereof "$253,000".

(b) Public Law 90–408, as amended, is amended by striking out in clause (1) of Section 802 "$363,805,000" and "$450,957,000" and inserting in place thereof "$366,499,000" and "$453,651,000", respectfully.

SEC. 112. (a) Public Law 91–142 is amended under the heading "INSIDE THE UNITED STATES," in section 101, as follows:

With respect to "United States Military Academy, West Point, New York", strike out "$17,421,000" and insert in place thereof "$28,159,000".

(b) Public Law 91–142 is amended by striking out in clause (1) of section 702 "$175,853,000" and "$279,988,000", and inserting in place thereof "$186,591,000" and $290,726,000", respectively.

TITLE II

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilites by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

INSIDE THE UNITED STATES

FIRST NAVAL DISTRICT

Naval Shipyard, Portsmouth, New Hampshire, $5,685,000.

Naval Station, Newport, Rhode Island, $2,409,000.

Navy Public Works Center, Newport, Rhode Island, $644,000.

Naval War College, Newport, Rhode Island, $4,390,000.

THIRD NAVAL DISTRICT

Naval Submarine Base, New London, Connecticut, $6,652,000.

FOURTH NAVAL DISTRICT

Naval Air Propulsion Test Center, Trenton, New Jersey, $356,000.

Navy Ships Parts Control Center, Mechanicsburg, Pennsylvania, $697,000.

Naval Station, Philadelphia, Pennsylvania, $4,342,000.

Naval Publications and Forms Center, Philadelphia, Pennsylvania, $250,000.

NAVAL DISTRICT WASHINGTON

Bolling/Anacostia, Washington, District of Columbia, $16,200,000.

Naval Air Facility, Washington, District of Columbia, $57,000.

Naval Research Laboratory, Washington, District of Columbia, $2,628,000.

Naval Station, Washington, District of Columbia, $573,000.

Naval Academy, Annapolis, Maryland, $10,000,000.

Naval Ordnance Station, Indian Head, Maryland, $159,000.

Naval Weapons Laboratory, Dahlgren, Virginia, $530,000.

FIFTH NAVAL DISTRICT

Naval Amphibious Base, Little Creek, Virginia, $2,449,000.

Naval Station, Norfolk, Virginia, $1,120,000.

Naval Air Rework Facility, Norfolk, Virginia, $2,070,000.

Naval Shipyard, Norfolk, Virginia, $5,216,000.

Naval Supply Center, Norfolk, Virginia, $55,000.

Naval Air Station, Oceana, Virginia, $1,886,000.

Naval Weapons Station, Yorktown, Virginia, $1,221,000.

SIXTH NAVAL DISTRICT

Naval Air Station, Cecil Field, Florida, $470,000.

Naval Air Rework Facility, Jacksonville, Florida, $1,388,000.

Naval Station, Mayport, Florida, $519,000.

Naval Training Center, Orlando, Florida, $16,013,000.

Naval Training Device Center, Orlando, Florida, $1,665,000.

Naval Air Station, Pensacola, Florida, $8,444,000.

Naval Air Station, Whiting Field, Milton, Florida, $420,000.

Naval Air Station, Saufley Field, Florida, $457,000.

Naval Air Station, Meridian, Mississippi, $2,782,000.

Naval Construction Battalion Center, Gulfport, Mississippi, $1,721,000.

Naval Shipyard, Charleston, South Carolina, $6,884,000.

Naval Station, Charleston, South Carolina, $2,233,000.

Naval Weapons Station, Charleston, South Carolina, $5,180,000.

EIGHTH NAVAL DISTRICT

Naval Air Station, Corpus Christi, Texas, $2,957,000.

Naval Inactive Ship Maintenance Facility, Orange, Texas, $146,000.

NINTH NAVAL DISTRICT

Navy Public Works Center, Great Lakes, Illinois, $12,525,000.

Naval Training Center, Great Lakes, Illinois, $3,537,000.

ELEVENTH NAVAL DISTRICT

Naval Observatory Flagstaff Station, Flagstaff, Arizona, $286,000.

Naval Weapons Center, China Lake, California, $1,585,000.

Naval Dental Clinic, Long Beach, California, $1,163,000.

Naval Shipyard, Long Beach, California, $8,371,000.

Pacific Missile Range, Point Mugu, California, $2,929,000.

Naval Weapons Station, Seal Beach, California, $405,000.

Naval Air Station, Miramar, California, $3,100,000.

Naval Air Station, North Island, San Diego, California, $1,122,000.

Naval Station, San Diego, California, $1,909,000.

TWELFTH NAVAL DISTRICT

Naval Air Station, Lemoore, California, $3,973,000.

Naval Air Station, Alameda, California, $3,023,000.

Naval Weapons Station, Concord, California, $455,000.

Naval Air Station, Moffett Field, California, $48,000.

Naval Supply Center, Oakland, California, $195,000.

Naval Shipyard, Hunters Point, San Francisco, California, $5,058,000.

Naval Shipyard, Mare Island, Vallejo, California, $4,246,000.

Naval Auxiliary Air Station, Fallon, Nevada, $2,222,000.

Naval Ammunition Depot, Hawthorne, Nevada, $495,000.

THIRTEENTH NAVAL DISTRICT

Naval Ammunition Depot, Bangor, Washington, $70,000.

Naval Radio Station T, Jim Creek, Oso, Washington, $159,000.

Naval Shipyard, Puget Sound, Bremerton, Washington, $4,914,000.

Naval Air Station, Whidbey Island, Washington, $2,541,000.

FOURTEENTH NAVAL DISTRICT

Fleet Intelligence Center, Pacific, Pearl Harbor, Oahu, Hawaii, $4,579,000.

Naval Submarine Base, Pearl Harbor, Oahu, Hawaii, $4,123,000.

Navy Public Works Center, Pearl Harbor, Oahu, Hawaii, $220,000.

Naval Dental Clinic, Pearl Harbor, Oahu, Hawaii, $1,752,000.

Naval Ammunition Depot, Oahu, Hawaii, $529,000.

Naval Air Station, Barbers Point, Oahu, Hawaii, $2,480,000.

OMEGA Navigation Station, Haiku, Oahu, Hawaii, $3,162,000.

Naval Communication Station, Honolulu, Wahiawa, Oahu, Hawaii, $200,000.

SEVENTEENTH NAVAL DISTRICT

Naval Station, Adak, Alaska, $5,179,000.

Naval Arctic Research Laboratory, Barrow, Alaska, $2,638,000.

MARINE CORPS FACILITIES

Marine Barracks, Washington, District of Columbia, including special relocation costs, $700,000.

Marine Corps Development and Education Command, Quantico, Virginia, $5,283,000.

Marine Corps Base, Camp Lejeune, North Carolina, $1,384,000.

Marine Corps Air Station, Cherry Point, North Carolina, $6,764,000.

Marine Corps Recruit Depot, Parris Island, South Carolina, $112,000.

Marine Corps Air Station, Yuma, Arizona, $332,000.

Marine Corps Supply Center, Barstow, California, $75,000.

Marine Corps Air Station, El Toro, California, $5,344,000.

Marine Corps Air Station, Santa Ana, California, $1,050,000.

Marine Corps Auxiliary Landing Field, Camp Pendleton, California, $1,570,000.

Marine Corps Base, Camp Pendleton, California, $9,294,000.

Marine Corps Base, Twentynine Palms, California, $1,605,000.

OUTSIDE THE UNITED STATES

TENTH NAVAL DISTRICT

Naval Station, Roosevelt Roads, Puerto Rico, $343,000.

Naval Station, San Juan, Puerto Rico, $134,000.

ATLANTIC OCEAN AREA

Naval Station, Keflavik, Iceland, $10,613,000.

Naval Facility, Argentia, Newfoundland, $1,580,000.

EUROPEAN AREA

Naval Air Facility, Sigonella, Sicily, Italy, $582,000.

Naval Radio Station, Thurso, Scotland, $282,000.

PACIFIC OCEAN AREA

Naval Communication Station, Harold E. Holt, Exmouth, Australia, $747,000.

Naval Magazine, Guam, Mariana Islands, $3,287,000.

Naval Station, Guam, Mariana Islands, $1,464,000.

Naval Ship Repair Facility, Guam, Mariana Islands, $740,000.

Navy Public Works Center, Guam, Mariana Islands, $740,000.

Naval Air Station, Cubi Point, Republic of the Philippines, $243,000.

Naval Station, Subic Bay, Republic of the Philippines, $2,128,000.

Navy Public Works Center, Subic Bay, Republic of the Philippines, $859,000.

SEC. 202. The Secretary of the Navy may establish or develop classified Navy installations and facilities by acquiring, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the amount of $974,000.

SEC. 203. The Secretary of the Navy may establish or develop Navy installations and facilities by proceeding with construction made necessary by changes in Navy missions and responsibilities which have been occasioned by: (a) unforeseen security considerations, (b) new weapons developments, (c) new and unforeseen research and development requirements, or (d) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of $10,000,000: *Provided*, That the Secretary of the Navy or his designee, shall notify the Committee on Armed Services of the Senate and House of Representatives, immediately upon reaching a decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire as of September 30, 1971, except for those public works projects concerning which the Committee on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to that date.

SEC. 204. The Secretary of the Navy is authorized to acquire, under such terms as he deems appropriate, privately owned land or interests in land (including easements) contiguous to the south approach to Runway 34R of the Marine Corps Air Station, El Toro, California, as he considers necessary for safe and efficient operation of that station. Acquisition of such land or interests in land

shall be effected by the exchange of such excess land or interests in land of approximately equal value as the Secretary of Defense may determine to be available for the purpose. If the fair market value of the land or interests in land to be acquired is less than the fair market value of the Government property to be exchanged, the amount of such deficiency shall be paid to the Government.

SEC. 205. The Secretary of the Navy is authorized to acquire, under such terms as he deems appropriate, land or interests in land (including easements) in approximately four hundred eighteen acres of privately owned property contiguous to the western approach to Runway 06–24 of the Marine Corps Air Station, Santa Ana, California, as he considers necessary for safe and efficient operations at that Station. Acquisition of such land or interests in land shall be effected by the exchange of such excess land or interests in land of approximately equal value, as the Secretary of Defense may determine to be available for the purpose. If the fair market value of the land or interests in land to be acquired is less than the fair market value of the Government property to be exchanged, the amount of such deficiency shall be paid to the Government.

SEC. 206 (a) Public Law 89–568, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 201 as follows:

(1) With respect to Naval Submarine Medical Center, New London, Connecticut, strike out "$6,101,000" and insert in place thereof "$10,846,000".

(b) Public Law 89–568, as amended, is amended by striking out in clause (2) of section 602 "$119,164,000" and "$143,327,000" and inserting in place thereof "$123,909,000" and "$148,072,000" respectively.

SEC. 207. (a) Public Law 90–408, as amended, is amended under the heading "INSIDE THE UNITED STATES", in section 201 as follows:

(1) With respect to Naval Air Station, Lakehurst, New Jersey, strike out "$1,284,000" and insert in place thereof "$1,448,000".

(2) With respect to Naval School, Underwater Swimmers, Key West, Florida, strike out "$100,000" and insert in place thereof "$175,000".

(3) With respect to Navy Training Publications Center, Memphis, Tennessee, strike out "$289,000" and insert in place thereof "$413,000".

(4) With respect to Naval Hospital, Corpus Christi, Texas, strike out "$8,000,000" and insert in place thereof "$9,900,000".

(5) With respect to Naval Weapons Station, Concord, California, strike out "$395,000" and insert in place thereof "$650,000".

(6) With respect to Naval Shipyard, Bremerton, Washington, strike out "$1,640,000" and insert in place thereof "$3,102,000".

(7) With respect to Marine Corps Base, Camp Pendleton, California, strike out "$1,838,000" and insert in place thereof "$2,040,000".

(b) Public Law 90–408, as amended, is amended by striking out in clause (2) of section 802 "$234,900,000" and "$241,765,000" and inserting in place thereof "$239,082,000" and "$245,947,000" respectively.

SEC. 208. (a) Public Law 91–142 is amended under the heading "INSIDE THE UNITED STATES" in section 201 as follows:

(1) With respect to Naval Air Station, Cecil Field, Florida, strike out "$1,135,000" and insert in place thereof "$1,288,000".

(2) With respect to Naval Hospital, Camp Pendleton, California, strike out "$19,805,000" and insert in place thereof "$24,100,000".

(3) With respect to Naval Undersea Warfare Center, San Diego, California, strike out "$6,400,000" and insert in place thereof "$6,736,000".

(4) With respect to Navy Public Works Center, Pearl Harbor, Oahu, Hawaii, strike out "$6,519,000" and insert in place thereof "$7,278,000".

(b) Public Law 91–142 is amended in clause (2) of section 702 by striking out "$271,251,000" and "$306,305,000" and inserting in place thereof "$276,794,000" and "$311,848,000" respectively.

TITLE III

SEC. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

AEROSPACE DEFENSE COMMAND

Otis Air Force Base, Falmouth, Massachusetts, $81,000.

Peterson Field, Colorado Springs, Colorado, $5,998,000.

Tyndall Air Force Base, Panama City, Florida, $1,853,000.

AIR FORCE LOGISTICS COMMAND

Gentile Air Force Station, Dayton, Ohio, $240,000.

Griffiss Air Force Base, Rome, New York, $7,555,000.

Hill Air Force Base, Ogden, Utah, $2,090,000.

Kelly Air Force Base, San Antonio, Texas, $18,060,000.

McClellan Air Force Base, Sacramento, California, $5,514,000.

Robins Air Force Base, Macon, Georgia, $5,551,000.

Tinker Air Force Base, Oklahoma City, Oklahoma, $2,071,000.

Wright-Patterson Air Force Base, Dayton, Ohio, $7,538,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tullahoma, Tennessee, $479,000.

Edwards Air Force Base, Muroc, California, $214,000.

Eglin Air Force Base, Valparaiso, Florida, $5,928,000.

Holloman Air Force Base, Alamogordo, New Mexico, $650,000.

Kirtland Air Force Base, Albuquerque, New Mexico, $1,263,000.

Satellite Tracking Facilities, $869,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Rantoul, Illinois, $8,504,000.

Columbus Air Force Base, Columbus, Mississippi, $372,000.

Craig Air Force Base, Selma, Alabama, $610,000.

Keesler Air Force Base, Biloxi, Mississippi, $8,057,000.

Lackland Air Force Base, San Antonio, Texas, $55,000.

Laredo Air Force Base, Laredo, Texas, $627,000.

Laughlin Air Force Base, Del Rio, Texas, $310,000.

Lowry Air Force Base, Denver, Colorado, $5,561,000.

Moody Air Force Base, Valdosta, Georgia, $2,227,000.

Randolph Air Force Base, San Antonio, Texas, $1,112,000.

Reese Air Force Base, Lubbock, Texas, $1,333,000.

Sheppard Air Force Base, Wichita Falls, Texas, $6,251,000.

Vance Air Force Base, Enid, Oklahoma, $1,901,000.

Webb Air Force Base, Big Spring, Texas, $349,000.

Williams Air Force Base, Chandler, Arizona, $4,199,000.

AIR UNIVERSITY

Maxwell Air Force Base, Montgomery, Alabama, $677,000.

ALASKAN AIR COMMAND

Elmendorf Air Force Base, Anchorage, Alaska, $2,309,000.

Various Locations, $4,886,000.

HEADQUARTERS COMMAND

Andrews Air Force Base, Camp Springs, Maryland, $3,949,000.

MILITARY AIRLIFT COMMAND

Charleston Air Force, Charleston, South Carolina, $7,136,000.

Dover Air Force Base, Dover, Delaware, $8,327,000.

McChord Air Force Base, Tacoma, Washington, $619,000.

Norton Air Force Base, San Bernardino, California, $1,612,000.

Scott Air Force Base, Belleville, Illinois, $2,825,000.

Travis Air Force Base, Fairfield, California, $696,000.

PACIFIC AIR FORCES

Hickam Air Force Base, Honolulu, Hawaii, $1,855,000.

STRATEGIC AIR COMMAND

Barksdale Air Force Base, Shreveport, Louisiana, $354,000.

Beale Air Force Base, Marysville, California, $590,000.

Blytheville Air Force Base, Blytheville, Arkansas, $213,000.

Castle Air Force Base, Merced, California, $82,000.

Davis-Monthan Air Force Base, Tucson, Arizona, $404,000.

Dyess Air Force Base, Abilene, Texas, $150,000.

Ellsworth Air Force Base, Rapid City, South Dakota, $196,000.

Francis E. Warren Air Force Base, Cheyenne, Wyoming, $178,000.

Grand Forks Air Force Base, Grand Forks, North Dakota, $1,089,000.

K. I. Sawyer Air Force Base, Marquette, Michigan, $483,000.

Loring Air Force Base, Limestone, Maine, $515,000.

March Air Force Base, Riverside, California, $209,000.

Malmstrom Air Force Base, Great Falls, Montana, $1,202,000.

McCoy Air Force Base, Orlando, Florida, $139,000.

Minot Air Force Base, Minot, North Dakota, $134,000.

Offutt Air Force Base, Omaha, Nebraska, $1,276,000.

Pease Air Force Base, Portsmouth, New Hampshire, $488,000.

Vandenberg Air Force Base, Lompoc, California, $3,158,000.

Westover Air Force Base, Chicopee Falls, Massachusetts, $1,176,000.

Wurtsmith Air Force Base, Oscoda, Michigan, $663,000.

Various Locations, $430,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Austin, Texas, $337,000.

Cannon Air Force Base, Clovis, New Mexico, $645,000.

England Air Force Base, Alexandria, Louisiana, $726,000.

Forbes Air Force Base, Topeka, Kansas, $415,000.

George Air Force Base, Victorville, California, $1,156,000.

Homestead Air Force Base, Homestead, Florida, $1,735,000.

Langley Air Force Base, Hampton, Virginia, $4,792,000.

Little Rock Air Force Base, Little Rock, Arkansas, $425,000.

Lockbourne Air Force Base, Columbus, Ohio, $518,000.

Luke Air Force Base, Phoenix, Arizona, $11,719,000.

MacDill Air Force Base, Tampa, Florida, $240,000.

McConnell Air Force Base, Wichita, Kansas, $148,000.

Mountain Home Air Force Base, Mountain Home, Idaho, $71,000.

Myrtle Beach Air Force Base, Myrtle Beach, South Carolina, $813,000.

Nellis Air Force Base, Las Vegas, Nevada, $2,732,000.

Seymour-Johnson Air Force Base, Goldsboro, North Carolina, $1,428,000.

Shaw Air Force Base, Sumter, South Carolina, $1,996,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado Springs, Colorado, $700,000.

AIRCRAFT CONTROL AND WARNING SYSTEM

Various locations, $613,000.

UNITED STATES AIR FORCE SECURITY SERVICE

Goodfellow Air Force Base, San Angelo, Texas, $1,216,000.

OUTSIDE THE UNITED STATES

AIR FORCE SYSTEMS COMMAND

Eastern Test Range, $243,000.

Satellite Tracking Facilities, $1,455,000.

MILITARY AIRLIFT COMMAND

Wake Island Air Force Station, Wake Island, $80,000.

PACIFIC AIR FORCES

Various Locations, $6,607,000.

STRATEGIC AIR COMMAND

Anderson Air Force Base, Guam, $2,273,000.

Goose Air Base, Canada, $862,000.

Ramey Air Force Base, Puerto Rico, $406,000.

UNITED STATES AIR FORCES IN EUROPE

Germany, $5,273,000.

United Kingdom, $10,695,000.

Various Locations, $1,049,000.

UNITED STATES AIR FORCE SECURITY SERVICE

Various Locations, $644,000.

SEC. 302. The Secretary of the Air Force may establish or develop classified military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $33,792,000.

SEC. 303. The Secretary of the Air Force may establish or develop Air Force installations and facilities by proceeding with construction made necessary by changes in Air Force missions and responsibilities which have been occasioned by: (a) unforeseen security considerations, (b) new weapons developments, (c) need and unforeseen research and development requirements, or (d) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, revert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $10,000,000: *Provided,* That the Secretary of the Air Force or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire as of September 30, 1971, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to that date.

SEC. 304. (a) Public Law 89–188, as amended, is amended under the heading "INSIDE THE UNITED STATES" in section 301 as follows:

(1) With respect to Andrews Air Force Base, Camp Springs, Maryland, strike out "$2,923,000" and insert in place thereof "$3,081,000."

(b) Public Law 89–188, as amended, is amended by striking out in clause (3) of section 602 "$216,360,000" and "$340,106,000" and inserting in place thereof "$216,518,000" and "$340,264,000", respectively.

SEC. 305. (a) Public Law 90–408, as amended, is amended under the heading "INSIDE THE UNITED STATES" in section 301 as follows:

(1) With respect to Vance Air Force Base, Enid, Oklahoma, strike out "$165,000" and insert in place thereof "$280,000."

(2) With respect to Westover Air Force Base, Chicopee Falls, Massachusetts, strike out "$150,000" and insert in place thereof "$220,000."

(3) With respect to Langley Air Force Base, Hampton, Virginia, strike out "$537,000" and insert in place thereof "$631,000."

(4) With respect to Seymour-Johnson Air Force Base, Goldsboro, North Carolina, strike out "$99,000" and insert in place thereof "$173,000."

(5) With respect to Shaw Air Force Base, Sumter, South Carolina, strike out "614,000" and insert in place thereof "$707,000."

(b) Public Law 90–408, as amended, is amended by striking out in clause (3) of section 802 "$121,917,000" and "$193,572,000" and inserting in place thereof "$122,363,000" and "$194,018,000", respectively.

## TITLE IV

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities and equipment, for defense agencies for the following acquisition and construction:

INSIDE THE UNITED STATES

DEFENSE ATOMIC SUPPORT AGENCY

Bossier Base, Louisiana, $170,000.

Sandia Base, New Mexico, $1,090,000.

DEFENSE SUPPLY AGENCY

Defense Construction Supply Center, Columbus, Ohio, $942,000.

Defense Depot, Odgen, Utah, $98,000.

Defense Personnel Support Center, Philadelphia, Pennsylvania, $3,570,000.

Defense Depot, Tracy, California, $1,813,000.

NATIONAL SECURITY AGENCY

Fort Meade, Maryland, $1,617,000.

SEC. 402. The Security of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities and equipment in the total amount of $35,000,000: Provided, That the Secretary of Defense, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

## TITLE V—MILITARY FAMILY HOUSING

SEC. 501. The Secretary of Defense, or his designee, is authorized to construct, at the locations hereinafter named, family housing units and trailer court facilities in the numbers hereinafter listed, but no family housing construction shall be commenced at any such locations in the United States, until the Secretary shall have consulted with the Secretary, Department of Housing and Urban Development, as to the availability of adequate private housing at such locations. If agreement cannot be reached with respect to the availability of adequate private housing at any location, the Secretary of Defense shall immediately notify the Committees on Armed Services of the House of Representatives and the Senate, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise.

(a) Family housing units—

(1) The Department of the Army, one thousand three hundred units, $31,500,000:

Redstone Arsenal, Alabama, two hundred units.

Fort Huachuca, Arizona, one hundred units.

Sacramento Army Depot, California, one unit.

Sharpe Army Depot, California, one unit.

Fort Carson, Colorado, two hundred forty units.

U.S. Army Installations, Oahu, Hawaii, three hundred units.

Rock Island Arsenal, Illinois, forty units.

Fort Leavenworth, Kansas, one hundred fifty units.

Natick Laboratories, Massachusetts, twenty-eight units.

Fort Jackson, South Carolina, two hundred forty units.

(2) The Department of the Navy, three thousand five hundred units, $84,039,000.

Marine Corps Air Station, El Toro, California, three hundred units.

Naval Air Station, Lemoore, California, two hundred fifty units.

Naval Complex, San Diego, California, nine hundred units.

Naval Submarine Base, New London, Connecticut, three hundred units.

Naval Complex, Pensacola, Florida, two hundred units.

U.S. Naval Installations, Oahu, Hawaii, three hundred units.

Naval Training Center, Great Lakes, Illinois, one hundred fifty units.

Naval Complex, Newport, Rhode Island, two hundred units.

Naval Complex, Norfolk, Virginia, six hundred units.

Naval Station, Guam, three hundred units.

(3) The Department of the Air Force, two thousand eight hundred units, $65,101,000:

Williams Air Force Base, Arizona, two hundred units.

Castle Air Force Base, California, two hundred fifty units.

Norton Air Force Base, California, two hundred fifty units.

Homestead Air Force Base, Florida, two hundred units, and additional real estate.

Moody Air Force Base, Georgia, two hundred units.

Robins Air Force Base, Georgia, two hundred units.

U.S. Air Force Installations, Oahu, Hawaii, two hundred units.

Scott Air Force Base, Illinois, four hundred units.

Keesler Air Force Base, Mississippi, four hundred units.

Seymour-Johnson Air Force Base, North Carolina, two hundred units.

Wright-Patterson Air Force Base, Ohio, three hundred units.

(b) Trailer court facilities—

(1) The Department of the Navy, fifty spaces, $150,000.

(2) The Department of the Air Force, three hundred eighty-nine spaces, $1,050,000.

SEC. 502. Authorization for the construction of family housing provided in this Act shall be subject, under such regulations as the Secretary of Defense may prescribe, to the following limitations on cost, which shall

include shades, screens, ranges, refrigerators, and all other installed equipment and fixtures:

(a) The average unit cost for each military department for all units of family housing constructed in the United States (other than Hawaii and Alaska) and Puerto Rico shall not exceed $22,500 including the cost of the family unit and the proportionate costs of land acquisition, site preparation, and installation of utilities.

(b) No family housing unit in the areas listed in subsection (a) shall be constructed at a total cost exceeding $40,000 including the cost of the family unit and the proportionate costs of land acquisition, site preparation, and installation of utilities.

(c) When family housing units are constructed in areas other than those listed in subsection (a) the average cost of all such units shall not exceed $32,000 and in no event shall the cost of any unit exceed $40,000. The cost limitations of this subsection shall include the cost of the family unit and the proportionate costs of land acquisition, site preparation and installation of utilities.

(d) Construction at Fort Leavenworth, Kansas, of units which were authorized by Public Law 89–188 (79 Stat. 793) or 90–110 (81 Stat. 279), shall not be subject to the cost limitations of subsection (a) of this section or to the cost limitations contained in prior Military Construction Authorization Acts, but the average cost of such units shall not exceed $26,000 including the cost of the family unit and the proportionate costs of land acquisition, site preparation, and installation of utilities.

SEC. 503. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on cost of construction of family housing, the limitations contained in section 502 of this Act shall apply to all prior authorizations for construction of family housing not heretofore repealed and for which construction contracts have not been executed by date of enactment of this Act.

SEC. 504. The Secretary of Defense, or his designee, is authorized to accomplish alterations, additions, expansions or extensions not otherwise authorized by law, to existing public quarters at a cost not to exceed—

(a) for the Department of the Army, $5,170,000.

(b) for the Department of the Navy, $6,300,000.

(c) for the Department of the Air Force, $7,400,000.

(d) for the Defense Agencies, $326,000.

SEC. 505. The Secretary of Defense, or his designee, is authorized to construct, or otherwise acquire, two hundred family housing units in foreign countries at a total cost not to exceed $5,523,000. This authority shall be funded by the use of excess foreign currencies, when so provided in Department of Defense Appropriation Acts, except that appropriation of $488,000 is authorized for purchase of United States manufactured equipment in support of the housing.

SEC. 506. Section 515 of Public Law 84–161 (69 Stat. 324, 352), as amended, is amended to read as follows:

"SEC. 515. During fiscal years 1971 and 1972, the Secretaries of the Army, Navy and Air Force, respectively, are authorized to lease housing facilities for assignment as public quarters to military personnel and their dependents, if any, without rental charge, at or near any military installation in the United States, Puerto Rico or Guam if the Secretary of Defense, or his designee, finds that there is a lack of adequate housing at or near such military installation and that (1) there has been a recent substantial increase in military strength and such increase is temporary, or (2) the permanent military strength is to be substantially reduced in the near future, or (3) the number of military personnel assigned is so small as to make the construction of family housing uneconomical, or (4) family housing is required for personnel attending service school academic courses on permanent change of station orders, or (5) family housing has been authorized but is not yet completed or a family housing authorization request is in a pending military construction authorization bill. Such housing facilities may be leased on an individual unit basis and not more than seven thousand five hundred such units may be so leased at any one time. Expenditures for the rental of such housing facilities may not exceed an average of $190 per month for each military department, nor the amount of $250 per month for any one unit, including the cost of utilities and maintenance and operation."

SEC. 507. Section 507 of Public Law 88–174 (77 Stat. 307, 326), as amended, is amended by striking out "1970 and 1971" and inserting in lieu thereof "1971 and 1972".

SEC. 508. The Secretary of Defense, or his designee, is authorized to relocate family housing units from locations where they exceed requirements to military installations where there are housing shortages: *Provided*, That the Secretary of Defense shall notify the Committees on Armed Services of the House of Representatives and the Senate of the proposed new locations and estimated costs, and no contract shall be awarded within sixty days of such notification.

SEC. 509. There is authorized to be appropriated for use by the Secretary of Defense, or his designee, for military family housing as authorized by law for the following purposes:

(a) for construction and acquisition of family housing, including improvements to adequate quarters, improvements to inadequate quarters, minor construction, relocation of family housing, rental guarantee payments, construction and acquisition of trailer court facilities, and planning, an amount not to exceed $203,635,000, and

(b) for support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act, as amended (12 U.S.C. 1715m), an amount not to exceed $588,636,000.

## TITLE VI

### GENERAL PROVISIONS

SEC. 601. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529) and sections 4774(d) and 9774(d) of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

SEC. 602. There are authorized to be appropriated such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: Inside the United States, $178,957,000; outside the United States, $78,340,000; section 102, $2,000,000; or a total of $259,297,000.

(2) for title II: Inside the United States, $243,574,000; outside the United States, $24,365,000; section 202, $974,000; or a total of $268,913,000.

(3) for tiitle III: Inside the United States, $188,867,000; outside the United States, $29,587,000; section 302, $33,792,000; or a total of $252,246,000.

(4) for title IV: A total of $44,300,000.

(5) for title V: Military family housing, $792,271,000.

SEC. 603. (a) Except as provided in subsection (b), any of the amounts specified in titles I, II, III, and IV of this Act, may, in the discretion of the Secretary concerned, be increased by 5 per centum when inside the United States (other than Hawaii and Alaska), and by 10 per centum when outside the United States or in Hawaii and Alaska, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. However, the total cost of all construction and acquisition in each such title may not exceed the total amount authorized to be appropriated in that title.

(b) When the amount named for any construction or acquisition in title I, II, III, or IV of this Act involves only one project at any military installation and the Secretary of Defense, or his designee, determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (a), the Secretary concerned may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 per centum the amount named for such project by the Congress.

(c) Subject to the limitations contained in subsection (a), no individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installation may be placed under contract if—

(1) the estimated cost of such project is $250,000 or more, and

(2) the current working estimate of the Department of Defense, based on bids received, for the construction of such project exceeds by more than 25 per centum the amount authorized by such project by the Congress, until after the expiration of thirty days from the date on which a written report of the facts relating to the increased cost of such project, including a statement of the reasons for such increase has been submitted to the Committee on Armed Services of the House of Representatives and the Senate.

(d) The Secretary of Defense shall submit an annual report to the Congress identifying each individual project which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense based upon bids received for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope was reduced in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army, or the Naval Facilities Engineering Command, De-

partment of the Navy, or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected, together with the design, construction, supervision, and overhead fees charged by each of the several agencies in the execution of the assigned construction. Further, such contracts shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report semiannually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts completed on other than a competitive basis to the lowest responsible bidder.

SEC. 605. (a) As of October 1, 1971, all authorizations for military public works (other than family housing) to be accomplished by the Secretary of a military department in connection with the establishment or development of military installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, and IV of the Act of December 5, 1969, Public Law 91–142 (83 Stat. 293), and all such authorizations contained in Acts approved before December 6, 1969, and not superseded or otherwise modified by a later authorization are repealed except—

(1) authorizations for public works and for appropriations therefore that are set forth in those Acts in the titles that contain the general provisions;

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts or land acquisitions in whole or in part before October 1, 1971, and authorizations for appropriations therefor; and

(3) notwithstanding the repeal provisions of section 705(a) of the Act of December 5, 1969, Public Law 91–142 (83 Stat. 293, 315), all authorizations for military public works (other than family housing), contained in titles I, II, III, IV, and V of the Act of July 21, 1968, Public Law 90–408 (82 Stat. 367), and all authorizations for appropriations therefor, and not superseded or otherwise modified, are hereby continued and shall remain in full force and effect until October 1, 1971.

(b) Effective fifteen months from the date of enactment of this Act, all authorizations for construction of family housing, including trailer court facilities, all authorizations to accomplished alterations, additions, expansions, or extensions to existing family housing, and all authorizations for related facilities projects, which are contained in this or any previous Act, are hereby repealed, except—

(1) authorizations for family housing projects as to which appropriated funds have been obligated for construction contracts or land acquisitions or manufactured structural component contracts in whole or in part before such date; and

(2) authorizations to accomplish alterations, additions, expansions, or extensions to existing family housing, and authorizations for related facilities projects, as to which appropriated funds have been obligated for construction contracts before such date; and

(3) Notwithstanding the repeal provision of section 705(b) of the Act of December 5, 1969, Public Law 91–142 (83 Stat. 293, 316) authorization for two hundred and sixty family housing units at Fort Polk, Louisiana.

SEC. 606. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction cost index is 1.0:

(1) $3,200 per man for permanent barracks;

(2) $11,000 per man for bachelor officer quarters; unless the Secretary of Defense or his designee determines that because of special circumstances, application to such project of the limitations on unit costs contained in this section is impracticable: *Provided*, That notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

SEC. 607. Chapter 159 of title 10, United States Code, is amended

(1) By striking out the figure "$200,000" in the item relating to section 2674 in the analysis and inserting "$250,000" in place thereof.

(2) By striking out the figure "$200,000" in the catchline of section 2674 and inserting "$250,000" in place thereof.

(3) By striking out the figures "$200,000", "$50,000", and "$25,000" in section 2674(b) and inserting "$250,000", "$75,000", and "$37,500", respectively, in place thereof.

(4) By striking out the figure "$25,000" in sections 2674 (a) and (e) and inserting "$37,500" in place thereof.

SEC. 608. Section 2675 of title 10, United States Code, is amended by (1) inserting "(a)" before "Notwithstanding", and by (2) adding the following new subsections:

"(b) A lease may not be entered into under this section if the average estimated annual rental during the term of the lease is more than $250,000 until after the expiration of thirty days from the date upon which a report of the facts concerning the proposed lease is submitted to the Committees on Armed Services of the Senate and House of Representatives.

"(c) A statement in a lease that the requirements of this section have been met, or that the lease is not subject to this section, is conclusive."

SEC. 609. Section 709 of the Military Construction Authorization Act, 1970 (83 Stat. 317), is amended by (1) deleting from the first sentence thereof "1971" and inserting in its place "1972"; and (2) deleting from the last sentence thereof "$750,000" and inserting in its place "$3,000,000".

SEC. 610. (a) The Secretary of Defense is authorized to assist communities located near Grand Forks Air Force Base, Grand Forks, North Dakota, and Malmstrom Air Force Base, Great Falls, Montana, in meeting the costs of providing increased municipal services and facilities to the residents of such communities, if the Secretary determines that there is an immediate and substantial increase in the need for such services and facilities in such communities as a direct result of work being carried out in connection with the construction, installation, testing, and operation of the Safeguard Anti-ballistic Missile System and that an unfair and excessive financial burden will be incurred by such communities as a result of the increased need for such services and facilities.

(b) The Secretary of Defense shall carry out the provisions of this section through existing Federal programs. The Secretary is authorized to supplement funds made available under such Federal programs to the extent necessary to carry out the provisions of this section, and is authorized to provide financial assistance to communities described in subsection (a) of this section to help such communities pay their share of the costs under such programs. The heads of all departments and agencies concerned shall cooperate fully with the Secretary of Defense in carrying out the provisions of this section on a priority basis.

(c) In determining the amount of financial assistance to be made available under this section to any local community for any community service or facility, the Secretary of Defense shall consult with the head of the department or agency of the Federal Government concerned with the type of service or facility for which financial assistance is being made available and shall take into consideration (1) the time lag between the initial impact of increased population in any such community and any increase in the local tax base which will result from such increased population, (2) the possible temporary nature of the increased population and the long-range cost impact on the permanent residence of any such community, and (3) such other pertinent factors as the Secretary of Defense deems appropriate.

(d) Any funds appropriated to the Department of Defense for carrying out the Safeguard Anti-ballistic Missile System shall be utilized by the Secretary of Defense is carrying out the provisions of this section to the extent that funds are unavailable under the Federal programs.

(e) The Secretary shall transmit to the Committees on Armed Services of the Senate and the House of Representatives semiannual reports indicating the total amount expended in the case of each local community which was provided assistance under authority of this section during the preceding six-month period, the specific projects for which assistance was provided during such period, and the total amount provided for each such project during such period.

SEC. 611. (a) The Secretary of Defense is directed to undertake a study and to prepare a report on the weapons training now being conducted in the Culebra complex of the Atlantic Fleet Weapons Range. This study shall consider all feasible alternatives, geographical and technological, to the training now taking place in the Culebra complex, and shall result in specific recommendations for, together with the estimated costs of, moving all or a part of such activities to a new site or sites, and appropriately modifying such activities to minimize danger to human health and safety. In preparing such study, the Secretary is directed to consider the impact of each of the alternatives on:

(1) the safety and well-being of the people who live on Culebra;

(2) the natural and physical environment of Culebra and adjoining cays and their recreational value;

(3) the development of a sound, stable economy in Culebra;

(4) the unique political relationship of Culebra and Puerto Rico to the United States;

(5) the operational readiness and proficiency of the Atlanta Fleet; and,

(6) national security.

(b) In preparing the report required by this section, the Secretary shall consult with the people of Culebra, the Government of Puerto Rico, and all appropriate Federal agencies having jurisdiction or special expertise on the subject matter involved. The report required by this subsection shall be transmitted to the President of the United States and to the chairmen of the Committees on Armed Services of the Senate and the House of Representatives no later than April 1, 1971.

(c) The Department of Navy is directed to terminate all weapons range activities conducted on or near the eastern coast of Culebra and the cays within three nautical miles of the eastern coast no later than January 1, 1972, unless the President of the United States determines that the national security of the United States requires the continuation of such activities beyond this date.

(d) Pending the completion of the report required by this section and its review by the President of the United States, the appropriate committees and the Congress, the Department of Navy is directed to avoid any increase or expansion of the present weapons range activities in the Culebra complex and, wherever possible, without degrading the training activities, to institute procedures which will minimize interference with the normal activities and the solitude of the people of Culebra.

SEC. 612. Effective October 28, 1969, section 1013 of Public Law 89–754 (80 Stat. 1255, 1290) as amended, is amended by (1) inserting "or if as the result of such action and other similar action in the same area," after the word "part," in subsection (a)(3), and by (2) adding the following new subsection:

"(k) The authority provided by this section to the Secretary of Defense shall also be available when the Department of Defense has ordered a reduction in the scope of operations at a military base or installation. All references in subsections (a), (b), and (c) of this section to "closures" or "closings" or words of similar effect shall be deemed to include the reduction in scope of operations at a base or installation."

SEC. 613. Chapter 159 of title 10, United States Code, is amended as follows:

(1) by adding the following new section at the end thereof:

"§ 2683. Relinquishment of legislative jurisdiction

"(a) Notwithstanding any other provision of law, the Secretary of a military department may, whenever he considers it desirable, relinquish to a State all or part of this legislative jurisdiction of the United States over lands or interests under his control in that State. Relinquishment of legislative jurisdiction under this section may be accomplished (1) by filing with the Governor of the State concerned a notice of relinquishment to take effect upon acceptance thereof, or (2) as the laws of the State may otherwise provide.

"(b) The authority granted by this section is in addition to and not instead of that granted by any other provision of law."; and

(2) by adding the following new item at the end of the analysis:

"2683. Relinquishment of legislative jurisdiction."

SEC. 614. Notwithstanding any other provisions of law, the Secretary of the Army, or his designee, is authorized to convey to the Anheuser-Busch Company, subject to such terms and conditions as the Secretary of the Army shall deem to be in the public interest, all right, title and interest of the United States in and to the land generally identified as Camp Wallace located in York County, Virginia, and James City County, Virginia, comprising approximately one hundred and ninety-one acres. In consideration of such conveyance by the Secretary of the Army, the Anheuser-Busch Company shall convey to the United States unencumbered fee title to certain lands generally identified as being a portion of the Oakland Farm in Newport News, Virginia, comprising approximately one hundred and ninety-one acres, together with such buildings and improvements thereon, or to be constructed thereon without cost to the United States, as are acceptable to the Secretary of the Army and subject to such other conditions as are acceptable to the Secretary of the Army. The exact acreages and legal descriptions of both properties are to be determined by accurate surveys as mutually agreed upon by the Secretary of the Army and the Anheuser-Busch Company: *Provided further*, That the Secretary of the Army is authorized to accept the lands so conveyed to the United States which lands shall become a part of the Fort Eustis Military Reservation and be administered by the Department of the Army.

SEC. 615. Title I, II, III, IV, V, and VI of this Act may be cited as the "Military Construction Authorization Act, 1971."

TITLE VII

RESERVE FORCES FACILITIES

SEC. 701. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed—

(1) For the Department of the Army:

(a) Army National Guard of the United States, $13,700,000.

(b) Army Reserve, $9,300,000.

(2) For the Department of the Navy: Naval and Marine Corps Reserves, $4,500,000.

(3) For the Department of the Air Force:

(a) Air National Guard of the United States, $6,500,000.

(b) Air Force Reserve, $3,500,000.

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774(d) and 9774 (d) of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

SEC. 703. This title may be cited as the "Reserve Forces Facilities Authorization Act, 1971."

## NATIONAL AIR QUALITY STANDARDS ACT OF 1970

Mr. RANDOLPH. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 17255.

The PRESIDING OFFICER (Mr. HUGHES) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 17255) to amend the Clean Air Act to provide for a more effective program to improve the quality of the Nation's air, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. RANDOLPH. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and he appointed Mr. RANDOLPH, Mr. YOUNG of Ohio, Mr. MUSKIE, Mr. SPONG, Mr. EAGLETON, Mr. COOPER, Mr. BOGGS, Mr. BAKER, and Mr. DOLE conferees on the part of the Senate.

## ELECTORAL REFORM

Mr. HOLLAND. Mr. President, the Senator from Florida is not in the position of being unwilling to vote on a change in the electoral system. The Senator from Florida voted for the Lodge-Gossett program when that came up some years ago. I cannot remember the exact year. The Senator from Florida has offered, in each Congress, for some time, what he thought was a perfection or improvement upon the Lodge-Gossett plan, and has appeared twice or more before the subcommittee of the Judiciary so ably headed by the Senator from Indiana.

The Senator from Florida finds it impossible to swallow that part of Senate Joint Resolution 1 which proposed such a downgrading of the States, and he thinks the best illustration of it is the fact that, under that resolution, citizens of the District of Columbia would have much greater weight in presidential elections than the people of 11 other sovereign States, when, as a matter of fact, the District of Columbia has no sovereign statehood and has no responsibility of passing legislation governing the daily lives of the citizens such as that which exists in every one of the 50 States of the Union.

The Senator from Florida simply wants to state for the record again that he is ready to vote for the fractional system, in as nearly a perfect form as can be gotten, and he thinks the form he and the Senator from North Carolina have developed through the years is a good system. If that were to be impossible, he is ready to vote for the district system, though he thinks that is not the preferable course, because it still will disfranchise, under the winner-take-all doctrine, the minority voting citizens in our districts and the minority voting citizens in every State as to the electors who will represent the State or as to the election weight which would represent the States.

But the Senator from Florida cannot give any acquiescence to the program suggested by the Senator from Indiana simply because of the complete downgrading of the States, and the leading of the Senate and the country to a highly centralized form of government of the kind which destroys our federal system, in the opinion of the Senator from Florida.

The Senator from Florida wants his friend the Senator from Indiana—who seems to pay little attention to what he is saying—to know that if Senate Joint Resolution 1 as stated is insisted upon, the Senator from Florida, insofar as he is able to stand and insofar as he is able to resist, will do so. He thinks there are a good many of us who feel the same way. He is sorry to say he thinks that all alined behind the direct election systems—all the people he knows, at least—favor a form of Federal Government in which there is a downgrading, not just in this field but in other fields, of the responsibility and jurisdiction of the several States.

That is the brief statement of the Senator from Florida. He has no animus in this matter at all. He thinks the Senator from Indiana has followed his rights

courageously and properly. He has no criticism of him in the slightest. He is not going to have. But he wants him to realize that many of us still believe in the preservation of the States and of the right to serve their own citizens and, in this particular matter, in having some weight in the selection of the President and Vice President.

The Senator from Florida simply wants his friend from Indiana to realize that there is a sizable number in the Senate who still have that feeling and will continue to have it, and will have it in such degree that if his amendment, Senate Joint Resolution No. 1, were proposed, there would be a continuation of this fight before every legislature in the Union, and that we will probably tie up the chance of having any agreed upon reform of the Layering proposition which is now in the Constitution.

So there is strong opposition to Senate Joint Resolution No. 1. But I have not any unwillingness to support other approaches to this very difficult problem, which the Senator from Florida is glad the Senator from Indiana has given his time and attention to.

The Senator from Florida wants the Senator from Indiana to understand that while nobody against the amendment questions either his conscientiousness or the fact that he has spent countless hours on this question, there are many of us who have spent a good deal of time on this question, dating back many years, and that we do have strong convictions against the downgrading of the States, as would be required or permitted under Senate Joint Resolution No. 1.

I thank the Senator. I am glad to yield to him if he wishes me to do so.

Mr. BAYH. Mr. President——

Mr. HOLLAND. I am glad to yield to the Senator.

Mr. BAYH. Mr. President, is the Senator through? I would like to get the floor.

Mr. HOLLAND. I am very glad to yield the floor.

Mr. BAYH. I certainly would not want to provide further remarks. I appreciate the very thoughtful statement of my friend from Florida. I know of his long and abiding interest. As he has said, he appeared before our committee on at least two occasions, and I have appreciated his interest.

Of course, he and others are only pursuing their rights under the rules of the Senate. But I think it is important, despite the sincerity in our hearts, and despite the tenacity and the desire to pursue a course that we feel is right, that each of us recognizes how his acts are going to be interpreted by others.

I have suggested that I am willing to vote on the proposition of the Senator from Florida. I am willing to vote on the proposition of the Senator from North Carolina. In fact, I have said repeatedly that I am willing to vote on every single proposal that has been made by my colleagues.

But the fact of the matter is that those who are presently taking up the time of the Senate have not on a single occasion suggested that they are willing to give the proposition of the Senator from Indiana the same courtesy.

In essence, what we are saying is that as long as the direct election proposal is before the Senate, we are going to avail ourselves of our right to filibuster, and keep the Senate from voting, and only if our personal plan comes before the Senate will we stop doing that.

I know this is every Senator's right, and that Senators are doing it because of the concern they have over the proposition of the Senator from Indiana.

But I think that when others look at it, it is going to be painfully obvious that we are not treating everyone's proposal the same.

It seems to me that if we are really seeking to be equitable, and give everyone his equal opportunity, we should give all of these plans an opportunity to be heard.

I must say I have difficulty understanding the attitude of certain Members of this body who are my beloved colleagues. Of course, they are operating within their rights; but I do not know how to explain to the 200 million people of America a philosophy that says, "If I don't get my way, I am going to bring the whole house down. If I don't get my way on my proposal, we are not going to have any electoral reform at all."

Mr. President, that is exactly where the U.S. Senate is. That is where the body is that prides itself on the history and traditions of men like Calhoun, Clay, Webster, Kennedy, and Johnson, and on the distinguished occupants of this body now. That is where we are. At least that is how it will look to all those Americans who are questioning the system. Right now the system is not working.

Mr. BYRD of West Virginia. Mr. President, I ask for the regular order.

## MILITARY CONSTRUCTION AUTHORIZATION, 1971

The PRESIDING OFFICER. The regular order is consideration of H.R. 17604, as laid before the Senate.

Mr. JACKSON. Mr. President, I yield to the Senator from Rhode Island on a privileged matter.

Mr. PASTORE. Mr. President, I have a preferred matter.

## PUBLIC BROADCASTING FINANCING ACT OF 1970—CONFERENCE REPORT

Mr. PASTORE. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3558) to amend the Communications Act of 1934 to provide continued financing for the Corporation for Public Broadcasting. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER (Mr. HUGHES). Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

(For conference report, see House proceedings of September 23, 1970, page 33319, CONGRESSIONAL RECORD.)

Mr. PASTORE. Mr. President, I have cleared this matter with the Senator from Michigan (Mr. GRIFFIN), who is one of the conferees.

House and Senate conferees met on Tuesday, September 22, and agreed on a report which would authorize the appropriation of not more than $30 million annually for the fiscal years 1971 and 1972 for expenses of the Corporation for Public Broadcasting. In addition, in each of those fiscal years not more than $5 million would be authorized to be appropriated for payment to the Corporation under a matching fund program.

The 2-year authorization is a compromise between the Senate version of S. 3558 which would have provided a 3-year authorization and the House version which was for 1 year only.

The conferees felt that in view of the lateness of the session a 1-year authorization would only necessitate duplication of existing efforts. A 2-year authorization, on the other hand, would obviate this and also enable the Corporation to plan and negotiate future projects.

The conferees also deleted the Senate provision requiring non-commercial educational broadcast stations which receive assistance under title II of the Public Broadcasting Act to keep records, including audio recordings, for a reasonable length of time of programs they broadcast involving issues of public importance.

While the Senate conferees felt that there was merit in this provision there had been no full scale hearings on this issue by either body, and they agreed to its deletion on the assurance that hearings would be held in the next Congress on the desirablity of such a requirement not only for noncommercial stations but commercial ones as well.

Mr. President, in my opinion the provisions of this report are sound and should be of great assistance to the Corporation for Public Broadcasting and all educational broadcasting. I respectfully urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, if I may have the attention of the Senate, in view of the changed circumstances from this morning, I ask unanimous consent that all committees of the Senate be authorized to meet during the session of the Senate today.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, would the Senator repeat that request?

Mr. MANSFIELD. I said, in view of the changed circumstances from this morning, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

Mr. BAYH. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MILITARY CONSTRUCTION AUTHORIZATION, 1971

The Senate resumed the consideration of the bill (H.R. 17604) to authorize certain construction at military installations, and for other purposes.

Mr. JACKSON. Mr. President, the bill before the Senate today provides construction and other related authority for the military departments and defense agencies within and outside the United States, including authority for miltary family housing and the construction of facilities for the Reserve components. The sum total of the new authority granted by this bill is $1,654,527,000, and in addition thereto, approval is granted for an increase in prior years' authority in the amount of $33,586,000 for a total authorization of $1,688,113,000. This is approximately $104 million below the budget request.

In new authority the Army is authorized $259.3 million; the Navy, $268.9 million; the Air Force, $252.3 million; defense agencies, $44.3 million; military family housing, $792.3 million; and $37.5 million for the Reserve components. At the outset I should like to point out that the bill contains no construction authority for the Safeguard anti-ballistic-missile system, some $335 million in such authority having been previously transferred and included in the procurement authorization bill which recently passed the Senate.

Again this year, particular attention has been given to modernizing and replacing obsolescent structures in the physical plants of the military departments and to improving the living conditions of the troops.

Exclusive of funds provided for the construction upkeep and debt payments on military family housing, the major portion of the bill—about one-half—provides for operational and training facilities, followed in order of magnitude by housing and community facilities which include housing for some 26,000 bachelor personnel, and then utilities and ground improvements of which some $75 million is designated for air and water pollution in over 100 projects. Lesser amounts are provided for maintenance and production facilities, supply facilities, administrative facilities, and real estate.

Recognizing the importance of sufficient and adequate living facilities in the retention of skilled and experienced personnel, special attention has been given to the matter. The bill provides for 7,600 units of new military family housing, and 400 additional units for the two Safeguard ABM sites now under construction were included in the military procurement bill. This is the largest increment of family housing approved by the committee in several years. In this regard I might state that an increase in the average unit cost limitation has been approved at $22,500 per unit, which is an increase of $1,500, made necessary by rising construction costs. Also of particular significance is a modest increase granted this year in the per-man cost of both barracks and bachelor officer quarters. This will enable the military departments to keep pace with building cost increases, and in regard to housing for enlisted personnel, it will permit an increase in living space from 72 to 90 square feet per man and will provide other amenities for their comfort and well-being.

Now, Mr. President, I should like to mention a few specific items that I believe will be of special interest.

First, I wish to mention the expansion of the Marine Barracks here in the District of Columbia for which $700,000 is provided. The committee has gone into the matter quite thoroughly both last year when this request was denied and again this year, particularly in view of certain local opposition to the proposal. The need for the expansion of the barracks is unquestioned and is long past due. It will, however, necessitate the acquisition by the Navy of about an acre of land adjacent to the existing barracks. On a portion of this property are located some 24 housing units and two small businesses which must be acquired. There are an estimated nine families now residing in these housing units, of which three are owner-occupied. The balance of these units are vacant and are in extremely poor condition, and several are boarded up. Special language has been included in the bill to permit the Navy to adequately compensate these families that must be relocated for their property and inconvenience. This may be done under the terms of the Housing Act of 1949, as amended—42 U.S.C. 1465. The property, of course will be acquired at its fair market value. The occupants will be compensated for their actual cost of moving.

An additional $1,000 can be paid over a 2-year period, if necessary, to those tenants required to move in order to assure that they are housed in safe, decent, and sanitary facilities. Not to exceed $5,000 in additional acquisition costs may be paid to the owner occupants, and not to exceed $2,500 in addition to moving expenses can be paid as small business displacement payments.

Mr. President, I might add that with the enactment of this measure, the Department of the Navy will have up to $100,000 for this purpose if necessary. Language has been included in the committee report requiring that the Department of the Navy work with the appropriate housing authorities in the District of Columbia to insure that those families to be relocated are properly housed in equal or better facilities than they now occupy. The relocation allowances I have described in this instance in no way set a precedent and for the most part parallel the provisions in the Federal-Aid Highway Act of 1968—23 U.S.C. 501, and the following. I am confident that the families in question will be found adequate housing and will be properly compensated for their property and inconvenience.

The next item of interest is the impact upon local communities located in the area of the Safeguard ABM sites in Montana and North Dakota. The influx of construction workers and the follow-on of permanent duty personnel in several of these small rural communities has overtaxed and will continue to greatly overtax such municipal facilities as do exist in these areas, such as sewage disposal and water system, schools, medical facilities, law enforcement facilities, and so forth. These small communities have no resources to cope with this situation, and such assistance as they may expect to receive through various Government programs is inadequate to grant prompt and sufficient relief. This unquestionably is a situation generated by the Safeguard program, and, as such, should be considered a part of the program. It is indeed a national problem rather than a local one. A provision has been included in the bill to permit the Department of Defense to use such funds as are necessary and available to them for the Safeguard program to supplement the programs of other Government agencies in order to relieve this situation when it is found proper and necessary.

Mr. MANSFIELD. Mr. President, will the Senator yield at that point?

Mr. JACKSON. I yield.

Mr. MANSFIELD. Mr. President, the Senator will recall that the distinguished Governor of the State of Montana, Forrest Anderson, appeared before the subcommittee of which the Senator is chairman, the Subcommittee on Military Construction of the Committee on Armed Services. He will recall also that, due to the courtesy of the distinguished Senator from Washington, the manager of the bill now being considered, the Senator from Montana, now speaking, was, as is the custom, a part of that committee at that time.

The Senator is aware of the great interest of the people of the State of Montana in the problems which will come with the implanting of the ABM system there, as well as in North Dakota, relative to the need for increased facilities and the like. If the Senator would not mind, I should like to ask him a few questions, just to make the record straight, which I believe will implement what he has already said.

Section 610 of the bill deals with certain authority granted to the Secretary of Defense in assisting communities, such as Conrad, Shelby, Chester, and other towns in Montana and North Dakota, located near approved Safeguard anti-ballistic-missile sites. As I understand the intent of this section, it directs the Secretary of Defense to provide financial assistance to small towns located in these areas in meeting the costs of increased municipal services and facilities required to support the ABM construction and operation. Is this a correct understanding?

Mr. JACKSON. The Senator is correct. This is to be done through existing federal programs, supplementing them, of course, if such is necessary.

Mr. MANSFIELD. Mr. President, will the Senator yield further?

Mr. JACKSON. I yield.

Mr. MANSFIELD. The distinguished chairman will recall the testimony presented by Governor Anderson of my State and witnesses from North Dakota during which they pointed out that small farming communities in sparsely populated agriculture areas find themselves faced with the immediate necessity of providing increased municipal facilities such as schools, medical facilities, sewage and water, police and fire protection, and other requirements for which they are without the resources to accomplish. It was demonstrated that State and local obligations to match funds for needed improvements would run from 30 to 70 percent. Taxes would have to be increased in these small communities to offset these expenditures. Spokesmen for Montana and North Dakota made it clear that these communities are now taxed to the legal limits and simply cannot afford to make such a substantial contribution to support the ABM which is, in fact, a national defense system. Does the distinguished chairman agree with me that Safeguard funds should be used to pay the local share of approved project costs normally required as contributions from the community?

Mr. JACKSON. The answer to the question is "yes." Of course, this program will continue until such time as the tax base increases to where they may be able to pay their own way, if that ever occurs.

Mr. MANSFIELD. I appreciate that.

Section 610(b) states that the Secretary of Defense shall carry out the provisions of this section through existing Federal programs. Does this mean that it is clearly the responsibility of the Secretary of Defense to coordinate and expedite assistance to these small communities?

Mr. JACKSON. I think this is a proper assumption to be made. The Secretary should work through the established program to which we refer.

Mr. MANSFIELD. The Senator leads me into the next question.

In the event that existing Federal programs are found to be inadequate or unresponsive, is it the intent of this section to require the Secretary of Defense to provide direct financial assistance from funds available to his Department?

Mr. JACKSON. He should do so through the proper agencies having jurisdiction over the various programs. He has this responsibility.

Mr. MANSFIELD. So that if those funds are not forthcoming from those agencies, they will be forthcoming from the Department of Defense.

Mr. JACKSON. This is correct, with Safeguard funds.

Mr. MANSFIELD. Note that a determination of need is left to the discretion of the Secretary of Defense as well as the determination of the amount of financial assistance to be made available. I question how the Secretary shall make such a determination as a local community and the Defense Department may disagree on what constitutes an immediate and substantive increase in the need for services and facilities. Does the Senator agree that an agency designated by the Governor of the State might well make the initial determination so as to prevent an impasse which might occur between the communities and the Office of the Secretary of Defense.

Mr. JACKSON. Yes. This could be helpful but, of course, the State agency should coordinate with the proper Federal agency and the office of the Secretary of Defense.

Mr. MANSFIELD. Exactly. That fits in with my thinking.

Is it the intent of this section that State agencies and communities should coordinate with various Federal agencies, or is it clear that they can deal solely with one agency; that is, the Department of Defense or its subordinate designee?

Mr. JACKSON. They should coordinate with the appropriate agencies and the office of the Secretary of Defense, which will have a coordinator, as I understand it.

Mr. MANSFIELD. Section 610(e) states that the Secretary shall transmit semiannual reports to the Armed Services Committee of the Senate and House indicating the total amount expended in the case of each local community provided assistance during the preceding 6-month period, specific projects for which assistance was provided, and the total amount provided for each such project. Would the distinguished chairman agree that this semiannual report should also be provided to the Subcommittee on Appropriations for Military Construction so that both the authorizing and appropriating committees receive concurrent information?

Mr. JACKSON. The answer is yes. I think the two subcommittees which the distinguished majority leader has referred would be the appropriate subcommittees; namely, the authorizing and appropriating committees.

Mr. MANSFIELD. May I express my thanks to the distinguished Senator from Washington, who is the chairman of the legislative committee, who now has this legislation pending, and point out that the Senator from Montana, as chairman of the Subcommittee on Appropriations for Military Construction, has worked closely with the Senator from Washington both in the matter of legislation being heard and in the matter of appropriations being considered. It has been an extremely fine and close relationship.

One more question, if I may:

Even though section 610 leaves considerable discretion to the Secretary of Defense, is it not true that the Congress intends that no unfair burden shall be placed on any small community as a result of the placement of the Safeguard system in or near its area, and that it is clearly the responsibility of the Federal Government through its agent, the Department of Defense to fund community facilities made necessary by the emplacement of the Safeguard system?

Mr. JACKSON. I agree with that statement. The burden here rests on the Secretary of Defense, to see to it that the policy is carried out when it is found to be necessary and proper.

Now, Mr. President, I want to take this opportunity to commend the able majority leader who went into this matter in great detail during our joint sessions. I must say that the testimony brought out in connection with the problem we found in both Montana and North Dakota was resolved as a result of that testimony in the way it now appears in the bill. I express my deep appreciation for the help extended to the authorizing side of this operation by the able majority leader.

Mr. MANSFIELD. I thank the distinguished Senator from Washington.

Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the committee report dealing with the impact of ABM on local communities; an excerpt dealing with section 610 as printed on page 69 of the committee report accompanying H.R. 17604; and section 610 of the bill itself, as it appears on page 100 of the bill.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

IMPACT OF ABM ON LOCAL COMMUNITIES

The first two antiballistic missile sites are under construction in the vicinity of Conrad, Montana, and Langdon, North Dakota. These are both small farming communities in sparsely populated agricultural areas in the two states. With the influx of construction workers and the later-to-follow permanent party personnel, these small rural communities, which must bear the major burden of the influx, find themselves in straitened circumstances in attempting to cope with the problem. They find themselves faced with the immediate necessity of providing increased municipal facilities, such as additional schools, enlarged medical facilities, improved sewerage and water facilities, additional police and fire protection, etc., for which they are without the resources to accomplish. To be sure, the Department of the Army has designated personnel to advise and assist them with their impact problems. Such relief as can be expected, however, depends on a variety of Federal agencies and categorical programs. This, of course, takes time and affords only partial relief. Even if immediate relief could be obtained through these programs, according to testimony presented, the local and state obligations under them would run from 30 to 70 percent and taxes would have to be increased in these small affected communities to offset this difference. Spokesmen for both the states of Montana and North Dakota have made it clear that these communities for the most part are now taxed to the legal limits and they simply cannot afford to make such a substantial contribution to support the antiballistic missile program which is indeed a national defense system and not just for the protection of these two areas. They are firmly of the opinion that any improvement or expansion of municipal facilities made necessary by the impact of Safeguard construction should be a part of the programmed cost of the system and borne by the Government.

The Committee is of the opinion that this is a unique if not unprecedented situation. Consequently, there has been included an amendment to the bill, namely Section 610, which would authorize the Secretary of Defense to afford these communities such relief as he finds necessary.

Section 610 was added to the bill by the Senate Committee and authorizes the Secretary of Defense, under certain conditions, to utilize funds appropriated to the Department of Defense for carrying out the Safeguard antiballistic missile system for the purpose of assisting any local community in meeting expenses incurred by such community in providing increased municipal services and facilities as a direct result of

the work being carried out in connection with the deployment of the Safeguard antiballistic missile system, and that an unfair and excessive financial burden will be incurred by such community as a result of the increased need for such services and facilities.

SEC. 610. (a) The Secretary of Defense is authorized to assist communities located near Grand Forks Air Force Base, Grand Forks, North Dakota, and Malmstrom Air Force Base, Great Falls, Montana, in meeting the costs of providing increased municipal services and facilities to the residents of such communities, if the Secretary determines that there is an immediate and substantial increase in the need for such services and facilities in such communities as a direct result of work being carried out in connection with the construction, installation, testing, and operation of the Safeguard Antiballistic Missile System and that an unfair and excessive financial burden will be incurred by such communities as a result of the increased need for such services and facilities.

(b) The Secretary of Defense shall carry out the provisions of this section through existing Federal programs. The Secretary is authorized to supplement funds made available under such Federal programs to the extent necessary to carry out the provisions of this section, and is authorized to provide financial assistance to communities described in subsection (a) of this section to help such communities pay their share of the costs under such programs. The heads of all departments and agencies concerned shall cooperate fully with the Secretary of Defense in carrying out the provisions of this section on a priority basis.

(c) In determining the amount of financial assistance to be made available under this section to any local community for any community service or facility, the Secretary of Defense shall consult with the head of the department or agency of the Federal Government concerned with the type of service or facility for which financial assistance is being made available and shall take into consideration (1) the time lag between the initial impact of increased population in any such community and any increase in the local tax base which will result from such increased population, (2) the possible temporary nature of the increased population and the long-range cost impact on the permanent residence of any such community, and (3) such other pertinent factors as the Secretary of Defense deems appropriate.

(d) Any funds appropriated to the Department of Defense for carrying out the Safeguard Anti-ballistic Missile System shall be utilized by the Secretary of Defense in carrying out the provisions of this section to the extent that funds are unavailable under other Federal programs.

(e) The Secretary shall transmit to the Committees on Armed Services of the Senate and the House of Representatives semiannual reports indicating the total amount expended in the case of each local community which was provided assistance under authority of this section during the preceding six-month period, the specific projects for which assistance was provided during such period, and the total amount provided for each such project during such period.

Mr. JACKSON. Mr. President, another matter that has been of considerable local interest is the addition to the bill by the House Committee of $2.3 million for an elementary school to be located on the Bolling Air Force Base property in the District of Columbia. This school was not requested by the Department of Defense but was added by the House above the budget. The school would be operated by the Department of Defense for the benefit of the dependents of the military personnel residing in the area of the Bolling Air Force Base. The apparent motivation for this proposal is the dissatisfaction of the parents over undesirable conditions existing in the public schools which their dependents must attend. It has been the policy of the Department of Defense, and properly so, that the education of military dependents is the responsibility of the local community and there is no precedent for establishing such a school as in this instance. The committee has not included this project in the bill before you, Mr. President, because to do so would establish a precedent of providing Federal schooling for military dependents when public schools, which now receive Federal impact aid assistance, are available.

Finally, Mr. President, I wish to mention a situation that has excited considerable public interest and that is the weapons training activities of the Navy on the island of Culebra and the surrounding cays which are located off the east coast of Puerto Rico. While it is not an issue in this bill, there are pending before the committee both a land acquisition and a disposal project in relation thereto. The Navy now owns about a third of the land comprising this island group, which has for a long period of time been used for weapons training for the Atlantic Fleet. The Navy has proposed to acquire a leasehold interest in another 2,350 acres, primarily to use as a safety zone, while at the same time excessing for conveyance to the Government of Puerto Rico some 680 acres of coastal land now under Navy control. This property is used for a weapons training area for the Roosevelt Roads Naval Station and is unquestionably highly important to the Navy. Nevertheless, there has been growing dissention among the inhabitants of Culebra and others over these continuing Navy activities. The time is at hand when something must be done to make at least a portion of the area now in use by the Navy available for development and recreational purposes and to ameliorate the distress of the local residents. The committee has gone into this matter quite extensively and as a result, there has been included in the bill a provision—section 611, page 102 of the bill—to require the Secretary of the Department of Defense to undertake a study to consider all feasible alternatives to the training now taking place on the Culebra Complex and to report to the President of the United States and the appropriate committees of the Congress as to his findings by April 1, 1971. The Department of the Navy is further directed to terminate all weapons range activities conducted on or near the east coast of Culebra and the cays within 3 nautical miles of the east coast no later than January 1, 1972, unless the President of the United States determines the national security of the United States requires the continuation of such activities beyond that date. As I have previously stated, the time is now at hand when we must face up to this problem which has been a festering sore for a number of years. The committee views are more extensively set forth beginning on page 5 of the report.

Mr. President, I believe that I have succinctly outlined the salient features of the bill before you. I am confident that the construction needs of the Defense Department will be adequately provided for during fiscal year 1971.

Mr. THURMOND. Mr. President, as the ranking Republican on the Military Construction Subcommittee, I am pleased to join with the subcommittee chairman, Mr. JACKSON of Washington, in presenting the fiscal year 1971 military construction authorization to the Senate.

The decisions of the subcommittee which received the approval of the full committee resulted in authority for military construction in the amount of $1.688 billion consisting of $1.654 billion in new authority and an increase in prior years' authorization of $33,586,000.

This year the trend of the military authorization bill continues toward emphasizing housing facilities for military personnel. The bill provides 7,600 units of new military family housing and new housing for some 26,000 bachelor personnel.

Of particular note this year was the administration's request for approval of a number of air and water pollution projects. These numbered over 100 and cost approximately $75 million.

The subcommittee members of the Senate Armed Services Committee have heard witnesses on all portions of the bill. Particular study was given to certain provisions of the bill, specifically the Marine barracks expansion in Washington, D.C., and the Culebra firing range in Puerto Rico.

Also, of special interest was the addition by the House Armed Services Committee to the military construction bill of $2.3 million for construction of an elementary school building to be located at Bolling Air Force Base.

These three issues proved to be the most controversial which the subcommittee faced.

The subcommittee acted favorably on the request of the Navy for $700,000 in funds to acquire about 1 acre of land in the District of Columbia which contains some 24 housing units and two small businesses. Special language was included in the bill to insure fair treatment of those persons presently occupying this property. The land is to be used for a much needed and long overdue expansion of the Marine barracks in the District of Columbia.

Second, the subcommittee has requested the Defense Department to make a detailed study by April 1, 1971, of the Culebra issue. This is a small island group off Puerto Rico which the Navy has used for years as their Atlantic Fleet test firing range. This firing range is critical to Navy test and training programs and, despite extensive efforts to date, an adequate substitute area has not been located.

Third, the need for a school on the Bolling-Anacostia grounds to provide a proper educational environment for military dependents residing in that area was proposed by the House Armed Serv-

ices Committee. The House added $2.3 million to the bill for construction of an elementary school to meet this special need. Witnesses appeared before the Senate subcommittee citing the circumstances which they felt justified this request. I do not concur in the decision of the subcommittee to reject this project.

Leaders of the Military Parents Association of Washington, D.C., appeared before the Senate subcommittee and made out a strong case. They are merely asking that the Government meet its obligation to provide safe and adequate school facilities for children of military dependents. District of Columbia schools have failed to provide such an environment. The record is full of cases where these children of military personnel have been assaulted or robbed. We cannot continue to ignore the plight of these families.

Finally, Mr. President, the work of the subcommittee has gone most smoothly because of the outstanding leadership of the Senator from the State of Washington. Able assistance has been provided, as in past year, by Mr. Gordon A. Nease, professional staff member, and his efficient secretary, Miss Mary E. Keough.

The distinguished Senator from Colorado (Mr. DOMINICK) contributed greatly to the successful consideration and preparation of the bill. It was a pleasure for the minority members to work with him. I urge favorable consideration of the bill by the Senate.

Mr. GOLDWATER. Mr. President, will the distinguished Senator from Washington permit me to ask him a few questions?

Mr. JACKSON. Mr. President, I am glad to do so.

Mr. GOLDWATER. Mr. President, referring to page 14 of the report as it relates to the cadet activities building at West Point, I want to make it clear for the RECORD that the subcommittee did authorize an additional sum of money in the amount of $10,738,000. However, the subcommittee stipulated that the money not be appropriated. Is that a correct statement?

Mr. JACKSON. The Senator is correct.

Mr. GOLDWATER. West Point and the Army understands that they will have to get the money from their own sources.

Mr. JACKSON. The Senator is correct. The authorization is not in addition to other programs. On the contrary, it will be necessary, as the Senator from Arizona has pointed out, for the Army to take and obtain this money out of other programs. However, they are authorized to go ahead on that basis.

Mr. GOLDWATER. Mr. President, I might point out at this time that the experience at West Point is similar to the experience met in other areas of the United States where local unions have not been allowed to form.

As I understand it, at West Point the pay is portal to portal from as far away as New York City, and at Fort Huachuca, Ariz., from as far away as Tucson, a distance of 70 miles. For the Army, at Yuma, there would be the same situation. However, there is no other town close to it.

I would hope there would be some way, through the subcommittee and the full committee possibly working with the Secretary of Labor and with the labor movement itself, that we might be able to change this so that where we have a situation like West Point, located a long ways away from the nearest location, the unions themselves would authorize the establishment of locals nearby.

This involves a tremendous cost. Some of these costs can run as high as $40 an hour.

If we have to continue this, I do not see any way in which we can make a proper guess, or even an estimate, as to what the construction cost will amount to at West Point and other remote sites.

I point out that the particular bill we are talking about has increased by about 64 percent. I would say that most of it is in the cost of the labor and that the rest of it is in building on that hard granite they have there.

In closing, Mr. President, I am in complete agreement with what the subcommittee has further recommended at the bottom of page 14 of the report; namely, that a Facilities Advisory Board be appointed to assist in the planning and review of the West Point Academy construction program.

I am happy to inform the chairman of the subcommittee that the Board has either been fully appointed by this time or it is in the process of being appointed.

It has not been the easiest thing to get a number of qualified retired engineers and architects, graduates and nongraduates of West Point, to agree to assist in this difficult job.

Mr. President, I am glad that the subcommittee and the full committee has recommended this. I point out that at no time in history at West Point has there ever been a facility where the entire corps can be gathered. This will now be possible. I understand that this will be called Eisenhower Hall. West Point will have the proper facilities.

I take this opportunity to thank the chairman of the subcommittee, the Senator from Washington (Mr. JACKSON), for his diligent learning and constantly applied work in this field. It is not easy. It requires great knowledge of the subject, which the Senator has.

While I was not of too much help to him this year because of absence, it has been a real pleasure for me to serve with him on this subcommittee.

Mr. JACKSON. Mr. President, I thank my good friend, the able junior Senator from Arizona.

Mr. President, I do want to take this opportunity, too, to express my appreciation to all members of the subcommittee.

We worked together on a completely nonpartisan basis, as we have done in the past. By holding joint hearings with the Appropriations Subcommittee on Military Construction, I think that we were able to do a much better job again this year, as we have in the past.

I want especially to express my deep appreciation to our very able staff people—Gordan A. Nease, and Mike Rexroad of the Appropriations Subcommittee. Mr. Nease serves as the staff director for the subcommittee of the Armed Services Committee. Without their help, as always, we know this job could not have been done.

I want to thank the distinguished Senator from Arizona for his special interest in this problem at West Point.

We have been trying, as the Senator is aware, for several years to try to bring the costs in line. We hope now that, with the final warning we have provided here, this rather sticky problem will finally be resolved in a way that will avoid further overruns in the future.

Mr. BAKER. Mr. President, I call up my amendment which is at the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment proposed by the Senator from Tennessee (Mr. BAKER) on behalf of himself and the Senator from New York (Mr. JAVITS), ordered to be printed in the RECORD, is as follows:

On page 104, line 6: beginning with the word "unless" strike out all through the word "date" on line 9 and insert in lieu thereof the following: "and on Agua Cay no later than January 1, 1973, and to terminate all weapons range activities on Culebra and within three nautical miles thereof not later than January 1, 1976, unless the President of the United States determines that the national security of the United States requires the continuation of any such activities beyond such date or dates and that no satisfactory alternative site or sites can be made available."

Mr. BAKER. Mr. President, I neither hope nor expect to detain the Senate long on this matter. I had hoped that the distinguished manager of the bill would be able to accept this amendment, but since he cannot I am bound to present it to my colleagues for their consideration and disposition.

I believe that most—if not all—members of the Senate have some familiarity with the matter of Culebra, a small island 20 miles east of Puerto Rico which has long been the heart or inner range of the U.S. Navy's Atlantic Fleet Weapons Range. On Culebra and the surrounding cays, the Navy carries out ship-to-shore bombardment, air-to-surface aerial bombardment and missile activities, practice mining of coastal waters, and other related naval munitions practice. Each of these activities is of great importance to maintaining the battle readiness of the Atlantic Fleet and must be carried out at some single location or set of locations.

Although the island of Culebra has been inhabited since these operations were undertaken nearly 30 years ago, it is only recently that the use of the island by the Navy has become a matter of serious controversy, both in Puerto Rico and in the United States. At a time when the only common use of the island by the Navy was for the purpose of ship-to-

shore shelling, which is relatively safe and unobtrusive for other and inhabited parts of the island, and at a time when the political situation in Puerto Rico and the rest of the Caribbean was relatively stable and relations with the United States harmonious, there was little objection to the naval bombardment of Culebra.

Today it is different. Ship-to-shore bombardment has been supplemented by heavy and almost daily bombardment by supersonic aircraft. During major fleet operations, such as the annual Springboard exercise, the waters around Culebra are aswarm with various sorts of military vessels and aircraft, utilizing all kinds of actual and practice ordnance. In an incident now somewhat famous to those who know of the issue at all, a boat carrying Puerto Rican Gov. Luis Ferré was, earlier this year, lying off the waters of Culebra when a Naval shell fell close to the boat and far from its target.

The Committee on Armed Services gave the most careful and commendable consideration to this problem in its deliberation on the pending bill. Under the expert leadership of our distinguished colleague the Senator from Washington (Mr. JACKSON) the committee agreed to an approach to the problem of Culebra that marks a very significant step toward alleviating the problem. The solution of the committee is embodied in section 611, of the old bill, not the star print, which is found beginning at page 56 of the bill, line 8. The section provides that the Secretary of Defense shall conduct an exhaustive study of the Culebra problem and report to the Congress no later than April 1, 1971. The section further provides that the Navy shall avoid any increase or expansion of weapons range activities on Culebra pending the report of the Secretary of Defense to the Congress.

Finally, and of the most immediate significance to the people of Culebra and Puerto Rico, the committee bill provides that all weapons range activities on the eastern shore of Culebra will be terminated by January 1, 1972, regardless of the findings of the Secretary of Defense, unless the President determines that such operations are required by the national security of the United States.

Mr. President, again I commend the distinguished committee or including this section in the bill. I support everything that it does. The investigation and report required by section 611(a) is certainly badly needed and long overdue.

However, in the view of the people of Culebra and the very distinguished Governor to Puerto Rico, Luis Ferré, the committee provision, while highly commendable, does not go far enough. It is at the direct personal request of Governor Ferré, for whom I have the highest personal regard, that I have introduced this amendment today and urge my colleagues to accept it.

What would my amendment do? It would add three simple requirements to the existing provisions in the committee bill. First, it would require that all weapons range activities be ceased on the small and rocky Agua Cay, where aerial activity has become extremely annoying and disruptive of life in the inhabited parts of the island; these activities would cease no later than January 1, 1973, 1 year later than the end of all operations on the eastern shore. Second, my amendment would provide for the cessation of all weapons range activity on all of Culebra and the adjoining waters no later than January 1, 1976. Third, my amendment would preserve the necessary authority of the President to continue beyond such deadlines any specific activities that he finds essential to the national security, but my amendment would add the requirement that the President also find, prior to such continuation, that "no satisfactory alternative site can be made available." Such a finding is, I think, implicit in the committee language, but it seems to me well that it be made explicit and that a specific finding be required.

Mr. President, there has been a considerable degree of emotionalism connected with this issue. I do not share in that emotionalism. While I am certainly sympathetic to the circumstances in which the people of Culebra find themselves, I do not believe that the use of the island by the U.S. Navy is "shocking," "outrageous," "immoral," "inhumane," or any of the rest of those charged and misleading terms.

What I do believe is that humanitarian and political considerations require that the United States find an alternative site for conducting essential naval weapons range activities within a reasonable period of time. Five years is a reasonable period of time.

The citizens of Puerto Rico are American citizens. As such, the strength of the American Navy should be of as much importance to them as it is to citizens of the 50 States. At the same time, the needs and aspirations of our fellow American citizens in Puerto Rico—where young men enlist and are drafted to defend our country—should be a matter of real concern to this Government.

There is a growing tide of nationalism in Puerto Rico. The people of Puerto Rico are concerned about naval shelling of Culebra. The Governor of Puerto Rico has asked that the shelling be terminated at a date certain. In a letter to all Senators, the people of Culebra have asked that all activities be terminated on a date certain. The distinguished Resident Commissioner of Puerto Rico in the House of Representatives, the Honorable JORGE L. CÓRDOVA, in a letter to all Senators, has asked that all activities be terminated on a date certain. There is no equivocation on the part of these officials who so ably and accurately represent the views of the people of Puerto Rico. I believe that if we ignore these direct appeals to the Congress on behalf of the people of Puerto Rico, we will think better of it later.

Mr. President, I ask unanimous consent that there be inserted in the RECORD at the completion of my remarks the following documents: First, a letter to me from the Honorable JORGE A. CÓRDOVA, dated September 28, 1970; second, a copy of a letter from Mr. CÓRDOVA to Senator HENRY M. JACKSON, of the same date; and, third, a copy of a letter that was sent to me and to all other Senators dated September 23 by Culebra Mayor Ramon Feliciano, Pablo Munet Santiago, president of the Culebra Municipal Assembly, and Anastacio Soto, president of the Culebra Rescue Committee and Culebran's Fishermen's Association.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1, 2, and 3.)

Mr. BAKER. Mr. President, my amendment would in no way affect the excellent requirement proposed by the Committee that the Secretary of Defense report to the Congress no later than April 1, 1971. If this report, or any subsequent report or finding by the Secretary or the President, indicates that the national security will be seriously impaired by the provisions of this act, or that no alternative site or sites can possibly be made available for such necessary activities, I am confident that the Congress would give the most prompt and thorough consideration to such a finding.

However, I do not believe that it is reasonable to hold out an open ended and vague hope to the people of Puerto Rico and Culebra that just maybe someday all of the bombardment will cease. It seems to me far more just and far better politics to say to the people of Puerto Rico that we intend to stop and we will stop all bombardment of your island by January 1, 1976, unless we find that certain of these activities simply cannot be relocated to other areas and must be carried out in the paramount interest of national security.

I do not wish to detain the Senate any longer, but I strongly urge that the Senate accept this amendment.

EXHIBIT 1

HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 28, 1970.*

Hon. HOWARD H. BAKER, Jr.,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR BAKER: I enclose copy of letter I have just addressed to Senator Jackson on the Culebra problem. It expresses the position of the Governor, as well as mine. The Governor would appreciate it if an amendment is proposed on the Senate floor providing for the total phase-out of firing on Culebra and surrounding cays within five years. As you know, this five years phase-out has been recommended by Dr. Robert Kilmarx in a report of which you probably have copy, but of which I enclose another copy, as something which is entirely feasible and consistent with the readiness of the Navy for modern warfare.

With warm personal regards,

Sincerely,

JORGE L. CÓRDOVA.

EXHIBIT 2

HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 28, 1970.*

Hon. HENRY M. JACKSON,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR JACKSON: On September 21 I asked the members of the Senate to support Senator Goodell's amendment to H.R. 17604 (the Military Construction Authorization Bill) unless you should be successful in finding an acceptable solution to the problem of Culebra.

Since then the Senate Armed Services Committee has agreed to your amendment,

which in my judgment would lay the foundation for an acceptable solution to the problem. I therefore wish to express to you my support of your amendment.

I am aware of the difficulties involved in obtaining the actual enactment of this amendment, and that its wording inevitably reflects compromise looking toward such enactment. Yet I must point out that it falls short of the solution desired by Governor Ferré in one respect; it does not provide for a total phase-out of firing on Culebra and its surrounding cays within five years.

I have just discussed this matter with Governor Ferré, and I am authorized to convey to you his position in this respect, as well as his appreciation, which I fully share, for the great interest you have taken in this matter, the effective work which you have done, and the very substantial contribution which has resulted from your interest and your work.

With warm personal regards,

Sincerely,

JORGE L. CÓRDOVA.

---

EXHIBIT 3

ESTADO LIBRE ASOCIADO DE
PUERTO RICO,
GOBIERNO MUNICIPAL DE CULEBRA,
*Culebra, Puerto Rico, September 23, 1970.*

AN OPEN LETTER TO EVERY U.S. SENATOR

DEAR SENATOR: We, as representatives of the citizens of Culebra, after consultation with them, declare that the overwhelming majority of the people of Culebra strongly urge passage of the Goodell-Cranston Amendment to end the naval shelling and bombardment of our island. The people of Culebra have endured this weapons practice for thirty-four years, and they believe that the time to call a halt is now! We are unwilling to endorse even one more day of anxiety and fear for our children, our wives and our fellow citizens. The people of Culebra have voted today at an open meeting to urge that the Goodell-Cranston Amendment be brought to a vote in the Senate. We believe that our basic rights as American citizens support this position.

We have been informed, however, that political realities will make it difficult to gain acceptance of this amendment in the Senate-House Conference Committee. We also recognize that, because the Navy has not been as diligent as it could have been in preparing for the use of alternative sites, arguments can be made in support of a more gradual withdrawal. Based on these two assumptions, we have consulted with our fellow citizens to discover the most unpalatable conditions which they reluctantly can accept with dignity. These conditions, which have been carefully considered and which represent our greatest concession and *not* a bargaining position, are:

(1) that the Navy terminate its weapons practice on the eastern portion of Culebra and the cays within three nautical miles thereof not later than January 1, 1972;

(2) that the Navy cease its weapons activities on Agua Cay not later than January 1, 1973;

(3) that the Navy cease all of its remaining weapons activities on Culebra and the surrounding cays not later than January 1, 1976;

The removal of weapons activity from Agua Cay is particularly important, because the target on Agua Cay, which is used for aerial jet bombardment, is the most objectionable target to the people living in the town of Dewey, for several reasons: (1) Agua Cay is the closest aerial bombing target to the town; (2) Agua Cay is the most disturbing target in terms of interference with air and ship traffic between Culebra and Puerto Rico; (3) Agua Cay is, after Cuelbrita, the most important fishing area; (4) the jets that use Agua Cay frequently pass over the town at supersonic speeds and low altitudes, causing great discomfort.

In addition, the people of Culebra cannot understand why the Navy should be permitted to acquire one-year, nonhabitation easements over the eastern portion of the island. If land speculation is the concern, can not authorization for the acquisition of easements by the Navy be conditioned, at least, upon the failure of the government of Puerto Rico to freeze development of this land before the enactment of the military construction authorization bill into law? If there are no alternatives to the easements as an assurance against the exploitation of this land by land speculators, there are two conditions which the people support: (1) if the purpose of the easements is really to prevent land speculation, an exception must be made for one-family dwellings of full-time residents; (2) the farmers of Culebra demand that they be permitted to continue to administer and control their own farms.

Although the Culebrans have many courageous supporters in the United States Senate, we would like to express our gratitude to two Senators who have been friends of Culebra: Senator Goodell and Senator Jackson. Without their efforts, we would not hold the hope and confidence which we all now share in the future of Culebra. Each man has supported the democratic wishes of our people in his own way, but each has made an enormous contribution to our cause.

Respectfully yours,

PABLO MUNET SANTIAGO,
*President, Municipal Assembly.*
RAMON FELICIANO,
*Mayor of Culebra.*
ANASTACIO SOTO,
*President Culebra Rescue Committee, and Culebra Fishermen's Association.*

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOODELL. Mr. President, I want to express my respect to the Senator from Tennessee for his efforts to resolve this problem. He has been concerned about it, as has also the chairman of the Armed Services Subcommittee (Mr. JACKSON). He has expressed his concern. He has called upon the Navy to give explanations and justifications. He has met with the subcommittee a number of times to try to resolve this problem.

On September 1, I reintroduced an amendment to the military construction authorization bill which I had previously introduced to the military procurement authorization bill. That amendment called for immediate cessation of the Navy's shelling and bombardment of the Island of Culebra, which is a part of Puerto Rico on which nearly 800 American citizens live.

I withdrew that amendment to the military procurement authorization bill in order to allow time for the Subcommittee on Military Construction of the Armed Services Committee, of which the Senator from Wahington (Mr. JACKSON) is chairman, to negotiate with the Navy on the question of Culebra.

Section 611 of the pending legislation represents the product of that negotiation. The Senator from Washington (Mr. JACKSON) and his subcommittee have labored long on this issue, and I know that they share the goal of the Culebrans—the total cessation of shelling on the island.

Nevertheless, section 611 is inadequate to meet that objective, and it, therefore, does not, as it now stands, serve the interests of the Culebrans. Section 611 is inadequate in two major respects.

First, it provides for withdrawal by the Navy from the eastern part of the island, contingent upon national security considerations, by January 1, 1972. In covering only the eastern third of Culebra, section 611 fails to provide for cessation of shelling in the area of Dewey, the population center of Culebra; Flamingo Beach, a recreation and fishing center off Dewey; and Agua Cay, a wildlife and fishing center just off Culebra.

Section 611, therefore, fails to cover those areas which the Culebrans most cherish and which there is most need to cover in this bill.

Section 611 provides, also, for withdrawal from even the limited portion of Culebra which is covers unless the President of the United States determines that the national security of the country requires the continuation of such activities beyond January 1, 1972. The national security exemption, in my opinion, will nullify the intention of the Senator from Washington's (Mr. JACKSON) insertion of section 611, and will lead to indefinite extension of Navy shelling of Culebra.

The argument is made in support of the national security exemption that the political cost in 1972 of invoking that exemption and continuing shelling of Culebra will be so high that the President will not dare do so. I would argue, however, that it will be possible for a low-level Navy official to make the decision and to continue shelling without high political cost, since the Navy has already told Congressman BENNETT'S Real Estate Subcommittee in the House and Senator JACKSON'S subcommittee in the Senate that national security requires continued shelling, and that there is no alternative that would meet the Nation's national security goals.

Can we expect the Navy and the President to change their minds when they have already twice, in response to requests from the Congress, responded in such a way as to preclude withdrawal from Culebra?

Mr. BAKER. Mr. President, would the Senator from New York yield to me long enough for me to ask for the yeas and nays on the amendment?

Mr. GOODELL. I yield.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. GOODELL. Mr. President, I wonder how long we should go on compromising on an issue like this? American citizens are being shelled. The President of Puerto Rico, a few months ago, was cruising on his yacht near Culebra and almost was hit by one of the Navy's shells. There have been injuries and deaths. Members of Congress and Senators and committees have asked for an

explanation, and all we get from the Navy is generalizations—it is necessary for the national security. They do not tell us why specifically. We have had expert studies that have indicated clearly that we could have alternates—either another island or artificial islands which could be satisfactory for the Navy's purposes.

While the people go on being shelled in Culebra, all we get is excuses from the Navy and a strong positive statement that there is no alternative; they just have to go on shelling Culebra.

If they were shelling a section of the State of Washington or Long Island, when American citizens were nearby and in jeopardy, I wonder if it would take us so long to bar the Navy from this kind of activity. People on Culebra are as much American citizens as you and I. They have some rights. Culebra is an island that has rather great potential for development on behalf of the Culebrans, but not while the Navy is there shelling.

We are talking about an amendment here offered by the Senator from Tennessee that would take effect by 1972, provided the President did not make a determination to have it go further.

Then we have a further provision that it would be effective by 1976—again provided the President did not make a determination that it was in the national security to go beyond that—6 years from now.

I see no reason why Congress should not assert itself at this time. Since the Navy has preferred to give us notification, my own preference is my amendment, which would immediately bar the shelling. It would not go on any more. But if we do have concern that perhaps there is some justification here, and until a substitute is found which could involve the national security, why do we not give the Navy a deadline in the future and say, "You have got to get out of there by January 1, 1972—period"? Then the Navy Department, the executive branch, will be on notice that "This is the intention of Congress, this is the will of the Congress; find yourself a substitute."

We know perfectly well that the general language here is not going to induce the Navy to take the kind of initiative, the kind of action necessary to provide an alternative, because the Navy has testified before our committees. The Navy has said there is no alternative; it is the Navy's intention to just stay there.

Now we have an amendment before us which provides that somebody in the Navy Department, in the name of the President, can say it is in the national security interests to remain there even after the date we set, and even 6 years from now. What kind of justice is that for American citizens, almost 800 of them, who live on the Island of Culebra? The shelling is going to go on—we know that—under this amendment.

As a further fallback, even if we are going to take the Baker amendment, we should require that Congress share in this decision. If there is a determination by the President that it is in the national security to continue the shelling beyond the date we set, we ought to have the President come up here and make that recommendation and persuade Senators like the distinguished Senator from Washington, chairman of the subcommittee, that they really do have some reasons why it has to be done beyond that date, to assure us that it is not a decision made by a Navy Department official who finds it is too much trouble for them to find an alternative, and who just wants to stay there.

I commend the Senator from Washington for the pressure he has already put on the Navy. But I am saying this is not enough pressure. We have got the Navy to move just a few little inches. They still are saying it is absolutely necessary to remain there, and to go on with the shelling.

I see no indication that the Navy has gotten the message that the chairman of the Armed Services Subcommittee on Military Construction wants the Navy out and wants the Navy to cease its shelling. I say the Navy is not going to get the message from this amendment. The Navy is not going to get the message from the provisions of sections 611 that are now in the bill.

Mr. President, I shall vote for the Baker amendment at this point, because it is better than the provisions of the bill as it now stands; but I shall offer an amendment to the Baker amendment which would require that not only the President, but Congress as well, make this determination that it is in the national security interest to be an exemption, and they be permitted to continue shelling after the date set in the Baker amendment.

We are talking about 6 years. We are talking about an effective date for the initial phase of this amendment over a year hence. I see no reason why, if there is justification, it cannot be brought to Congress to persuade us. It certainly has not been brought to Congress up to this point. No one has given us any specifics in secret, in confidence, or openly in public, to justify the continued shelling.

So, Mr. President, I send to the desk at this point an amendment to the Baker amendment.

The PRESIDING OFFICER (Mr. CASE). The amendment will be received.

Mr. GOODELL's amendment is as follows:

On line 8 of the pending amendment of the Senator from Tennessee (Mr. BAKER) strike out the word "determines" and insert in lieu the following: "and the Congress of the United States by joint resolution determine"

Mr. JACKSON. Mr. President, together with other members of the Subcommittee on Military Construction of the Armed Services I have been actively engaged in seeking to find realistic and practical alternatives to the Department of the Navy's present Atlantic Fleet weapons training activities now being conducted on and near the island of Culebra off the coast of Puerto Rico. This effort has involved a special hearing before the Subcommittee on Military Construction on August 11; numerous meetings with the Secretary of the Navy and his representatives; meetings with the Governor of Puerto Rico, the mayor of Culebra, and attorneys for the municipality of Culebra; and extensive discussions with the State Department, the Department of the Interior, and the White House.

The Culebra situation presents a complex problem which will not yield to simple answers. It raises important questions concerning the safety and well-being of the residents of Culebra, the natural environment of the area, the political relationship of Puerto Rico to the United States, and the Nation's national security interest in insuring that the young men who fly Navy aircraft and man Navy weapons are given the best possible armaments training. The importance of this latter point was emphasized with the deployment on September 18 of the attack aircraft carrier *John F. Kennedy* to the Mediterranean, When deployed in connection with the crisis in the Mideast the *John F. Kennedy* was engaged in training exercises near the Culebra complex of the Atlantic Fleet Weapons Range. More recently, reported Russian attempts to secure a submarine base in Cuba underscore the importance of the Atlantic Fleet's training mission.

All of these matters were carefully considered by the committee and are reflected in the language of section 611 of the bill and in the committee's report. The amendment adopted by the committee and the directives contained in the report furnished a sound and a realistic interim solution whch is responsive to the desires of the people of Culebra and which does not endanger national security or the preparedness of the men assigned to the Atlantic Fleet.

Section 611 as approved by the committee provides for the following:

First. The Department of the Navy is directed to terminate, no later than January 1, 1972, all weapons range activities on the eastern coast of Culebra and on the Island of Culebrita and adjoining cays.

Second. The Department of the Navy is directed not to increase or expand present activities pending the Secretary's completion of the report and transmittal of his recommendations.

Third. The Secretary of Defense is to undertake a study and prepare a report on all feasible alternatives, geographical and technological, to the training activities now taking place in Culebra.

Fourth. The report, together with the Secretary's recommendations, is to be transmitted to the President and to the Armed Services Committees no later than April 1, 1971.

Fifth. In preparing the report and recommendations the Secretary is directed to consider environmental factors, safety, the economy of Culebra, and political ramifications as well as national security.

Sixth. The Secretary is directed to consult with the people of Culebra, the government of Puerto Rico, and all appropriate Federal agencies.

In addition to the express directives set forth in Section 611 of the bill, the committee's report directs that the following actions be taken:

First. Pending completion of the re-

port and an opportunity to act on the Secretary's recommendations no Walleye missiles are to be fired on Culebra or adjoining cays.

Second. Aircraft overflights over the town of Dewey are to be avoided.

Third. Advance notice of training schedules is to be given.

Fourth. Six hundred and eighty acres of land are to be transferred to the government of Puerto Rico.

Fifth. A safety zone in the area adjoining the northwest peninsula's ship-to-shore impact area is to be established.

Sixth. A temporary nonhabitation easement on the eastern portion of Culebra is to be acquired to insure safety while the Navy phases out of this area by January 1, 1972. This easement will also serve to prevent land speculation and unplanned development and subdivision. This will furnish Puerto Rico and the Congress an opportunity to consider the creation of a National Recreation and Seashore Area on the eastern part of the island and on the adjacent islands and cays. At present, much of this property is in Federal ownership and has great recreational potential.

Mr. President, the junior Senator from New York and the Senator from Tennessee have both expressed strong concern over the impact of the Navy's activities on the safety and solitude of the people of Culebra. I must say that I share their concern. I know they are deeply disturbed, as is the chairman of the subcommittee and the members of the committee. On the basis of many meetings and a careful review of a great deal of information, it is my view that the committee's amendment is reasonable and deserving of the Senate's full support.

The amendment is, in part, an interim solution. It terminates the most objectionable activities on the eastern coast of Culebra, but preserves for future determination the activities on the western coast. A decision on these activities would be made after completion of the Secretary's report on April 1, 1971. This will insure that all alternatives are considered in an orderly fashion and that appropriate changes may be implemented without undue disruption of the Atlantic Fleet's important weapons training mission.

Mr. President, I should like at this point to have printed in the RECORD section 611 of the act and the pertinent language from the report explaining the provisions of section 611.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEC. 611. (a) The Secretary of Defense is directed to undertake a study and to prepare a report on the weapons training now being conducted in the Culebra complex of the Atlantic Fleet Weapons Range. This study shall consider all feasible alternatives, geographical and technological, to the training now taking place in the Culebra complex, and shall result in specific recommendations for, together with the estimated costs of, moving all or a part of such activities to a new site or sites, and appropriately modifying such activities to minimize danger to human health and safety. In preparing such study, the Secretary is directed to consider the impact of each of the alternatives on:

(1) the safety and well-being of the people who live on Culebra;

(2) the natural and physical environment of Culebra and adjoining cays and their recreational value;

(3) the development of a sound, stable economy in Culebra;

(4) the unique political relationship of Culebra and Puerto Rico to the United States;

(5) the operational readiness and proficiency of the Atlantic Fleet; and,

(6) national security.

(b) In preparing the report required by this section, the Secretary shall consult with the people of Culebra, the Government of Puerto Rico, and all appropriate Federal agencies having jurisdiction or special expertise on the subject matter involved. The report required by this subsection shall be transmitted to the President of the United States and to the chairmen of the Committees on Armed Services of the Senate and the House of Representatives no later than April 1, 1971.

(c) The Department of Navy is directed to terminate all weapons range activities conducted on or near the eastern coast of Culebra and the cays within three nautical miles of the eastern coast no later than January 1, 1972, unless the President of the United States determines that the national security of the United States requires the continuation of such activities beyond this date.

(d) Pending the completion of the report required by this section and its review by the President of the United States, the appropriate committees and the Congress, the Department of Navy is directed to avoid any increase or expansion of the present weapons range activities in the Culebra complex and, wherever possible, without degrading the training activities, to institute procedures which will minimize interference with the normal activities and the solitude of the people of Culebra.

---

NAVAL ACTIVITIES ON ISLAND OF CULERBA

In section 611 the Committee has adopted language which directs the Secretary of the Defense to undertake a thorough study and to prepare a report on all feasible alternatives, geographical as well as technological, to the weapons training now taking place on the island of Culebra and adjoining cays. The language of the Committee amendment specifically directs the Secretary to consider a wide range of factors in making the study and in developing recommendations to the Committees on Armed Services, to the President, and to the Congress. These factors include national security, the operational readiness of the Atlantic Fleet, the political relationship between Puerto Rico and the United States, Culebra's economy, the natural environment, and the safety and well-being of the people who live in Culebra.

The Secretary is also directed to consult with the people of Culebra, the government of Puerto Rico and other Federal agencies in undertaking the study and in the preparation of the report. Pending transmittal of the report and a reasonable period of time for the Committees to act on the Secretary's recommendations the Department of the Navy is directed to avoid any increase or expansion of its training mission in the Culebra complex and, wherever possible, to undertake actions which will reduce or eliminate potential areas of friction and misunderstanding between the Navy, the people of Culebra and the government of Puerto Rico. The report is to be transmitted to the President and to the Committees no later than April 1, 1971.

Subject to a determination by the President of the United States that the Nation's national security requires the continuation of the activities involved, the Department of the Navy is directed to terminate weapons range activities on or near the eastern coast of Culebra and adjoining cays no later than January 1, 1972. The Navy has recently terminated live bombing in this area and the remaining activities consist of strafing targets and inert bombing activities. It appears that these aspects of the Navy's mission may be met by better scheduling and by increased use of areas on and near Vieques Island, areas near the western coast of Culebra and other areas.

ACTIONS ALREADY UNDERTAKEN

The Committee is advised that the Navy has already undertaken a wide range of actions designed to make the Navy's training program more compatable with the aspirations and desires of the people of Culebra. These actions are discussed in a September 23, 1970 letter from Secretary Chafee to Senator Jackson, Chairman of the Subcommittee on Military Construction. They include suspension of weekend training activities except in extraordinary circumstances; making Flamingo Beach on the Northwest coast available for weekend use by the people of Culebra; suspension of live bombing on the islands and bays east of Culebra; advance notice and publication of training schedules; installation of warning lights and flags; the assignment of a full time officer to Culebra to work with the local community; and the creation of employment opportunities for the residents of Culebra. The Secretary's letter follows:

---

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
*Washington, D.C., September 23, 1970.*

HON. HENRY M. JACKSON,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR JACKSON: In response to your request for information as to what the Navy is doing to make its training operations around Culebra less inconvenient to the local citizens, I am pleased to furnish you with the following information:

1. All weekend training around Culebra has been suspended except in extraordinary circumstances where such training is necessary to meet an operational commitment, for example, a ship deploying to the Mediterranean in the current crisis. This procedure is being strictly adhered to, and I can assure you that weekend training is no longer scheduled for the convenience of a visiting ship or aircraft squadron.

2. We are concentrating our greatest efforts in avoiding weekend training on the ship-to-shore bombardment exercises on the northwest peninsula. This will mean that Flamingo Beach will be available on Saturdays and Sundays for use by the people of Culebra, except in unusual circumstances.

3. Several weeks ago Mayor Feliciano of Culebra told Frank Sanders, Assistant Secretary of the Navy (Installations and Logistics) and Joseph A. Grimes, Jr., my special assistant, that the people of Culebra were most bothered by: (a) The live bombing of Shark Rock and Palada Cays and (b) The use of Ladrones Cay and Culebrita as targets. Accordingly, we have suspended all live bombing of Shark Rock and the Palada Cays (the only live targets on the cays and rocks to the east of Culebra). We are also making every effort to use the Vieques and west Culebra air-to-ground targets whenever possible so as to reduce use of the east Culebra targets to a minimum.

4. Several weeks ago we began publishing training schedules in the Puerto Rican press on Fridays for the following week. Changes are authorized only when operationally necesary and never with less than 24 hours notice. This, incidentally, is a further step in advance scheduling over the 72 hour ad-

vance notice procedure we instituted earlier in the summer. Hopefully, it will make planning easier for fishermen, yachtsmen and tourists as well as for the people of Culebra.

5. We are installing additional warning lights and bravo warning flags, and we have requested Mayor Feliciano's assistance in finding a location in downtown Dewey to hoist the red warning flag when the range is in operation. We also plan to acquire range safety boats that will help clear the area when boats inadvertently enter a restricted area while the range is in operation.

6. The Navy has established a billet for a full time officer on Culebra to work with the local community to assure that all avoidable inconveniences to the people are in fact avoided; that claims and complaints, if any, are expeditiously dealt with, and that possible Navy assistance to the community will be brought to the attention of higher authority. We have looked carefully for the right man, and we have now located a Spanish speaking officer with extensive experience in Latin America. We expect that he will report to Roosevelt Roads within the next few weeks.

Those are some of the steps the Navy is taking to make its training exercises around Culebra less of a burden to the people of the island. There is, however, another element, besides the level of inconvenience, that determines how a local community reacts to a military presence. That element is the positive contribution the military makes to the community.

In the past the Navy has helped with school books, ball fields, and water and molasses for the cattle during periods of drought, but many Culebrans have felt that the Navy presence on Culebra did not, on balance, benefit the community. Now, however, in addition to the steps mentioned above, we are starting to hire more Culebrans for work on the range. This will not only improve range safety but will also greatly assist the economy of the island. In fact, the number of applicants greatly exceeds the number of jobs available.

Despite many instances of good community relations in the past, it is fair to say that the Navy did not pay sufficient attention to the needs and desires of the people of Culebra. Part of the reason was that the Navy for many years expected the Culebrans to be resettled to some other location in Puerto Rico, both for their benefit and the benefit of the Navy. As you know, we abandoned that plan earlier this year, and now the Navy is making renewed efforts to adjust its training schedules to the desires of the people of Culebra. These efforts are being made in good faith, and we feel that in time most Puerto Ricans will accept them in that light.

Sincerely yours,

JOHN H. CHAFEE,
*Secretary of the Navy.*

COMMITTEE RECOMMENDATIONS

The Committee concurs in the actions already undertaken by the Department of the Navy to improve community relations. In addition to the actions already undertaken or planned by the Department of the Navy the Committee directs that the following additional actions be taken:

*1. Walleye Missile*

Culebrita island on the eastern coast of Culebra has been designated by the Navy as a target for training operations using the Walleye Missile. The prospect of firing this and perhaps other missiles on Culebrita has caused a great deal of apprehension and fear among the residents of Culebra. The Committee believes that this activity can be performed elsewhere without serious degradation in the quality of the Navy's training program. In view of these factors, pending completion of the report and an opportunity to act on the Secretary's recommendations, the Committee directs that the Walleye Missile not be fired at Culebrita or adjoining cays.

*2. Overflights*

The Committee directs that all possible efforts be made to avoid overflights over the town of Dewey and other occupied areas of Culebra.

*3. Training Schedules*

Advance notice of training schedules is desirable and will go far towards improving community relations and in avoiding an accident which could endanger lives or property. The officer assigned to Culebra should be given authority to insure compliance with the schedules and should be equipped with a communications system which will enable him to give timely warning to the people of Culebra if there should be any change in schedule due to extraordinaary circumstances.

*4. Disposal of Land*

Disposal Report No. 300 submitted by the Department of the Navy proposes the transfer of some 680 acres of Federally owned land to the government of Puerto Rico. This land is near the town of Dewey and on the municipality's harbor. The Committee concurs in the proposed transfer.

*5. Acquisition of nonhabitation easements*

Acquisition Report No. 102 submitted by the Department of the Navy proposes the acquisition of nonhabitation leasehold interests on 2,350 acres of land on Culebra. The purpose of the acquisitions are to establish safety zones which will permit continued grazing and agricultural use, but which will prevent the construction of permanent residences within the safety zone areas. The acquisitions are in two blocks. The first is on the Northwest corner of the island and is adjacent to the Northwest Peninsula which is the impact area for ship-to-shore firing. The second is on the eastern part of the island and provides a safety zone for activities conducted on Culebrita and adjoining cays.

The Committee recommends that the Northwest safety zone nonhabitation easement be acquired pursuant to the terms proposed by the Navy.

The Committee recommends that the eastern safety zone nonhabitation easement be acquired until January 1, 1972. At this date activities on the islands east of Culebra will cease.

*6. Recreational value*

On August 24, 1970, the Chairman of the Senate Interior Committee wrote to the Secretary of the Interior requesting a report on the suitability of the island of Culebra and adjoining cays for some form of national recreation or seashore area status. On September 8, 1970 the Department of Interior replied that "Culebra has been identified as having public recreational potential" in an inventory and study of the islands of the United States. The Bureau of Outdoor Recreation's report, "Islands of America" should be available to the Congress by October 1970.

In view of the recreational value of this area, its uniqueness, and the fact that substantial portions are now in Federal ownership, the Committee believes that the status quo should be maintained until the Secretary's report and recommendations are received and acted upon. The nonhabitation easement on the eastern portion of Culebra will insure safety, preserve the status quo and will prevent development of the area by land speculators and subdividers.

Mr. JACKSON. Mr. President, I have received this morning, upon my return to the city, a letter from the Secretary of the Navy, dated September 29, 1970, and I should like to read the pertinent parts of Secretary Chafee's letter. I ask unanimous consent that the entire letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE NAVY,
*Washington, D.C., September 29, 1970.*

Hon. HENRY M. JACKSON,
*Washington, D.C.*

DEAR SENATOR JACKSON: The rumblings on Capitol Hill are audible here in the Pentagon. Therefore, I feel that I should once again describe the training conducted around Culebra.

The training conducted at the Atlantic Fleet Weapons Range is essential to fleet readiness. The complex includes training areas on and around Culebra, at Vieques, at Roosevelt Roads, San Croix and 118,000 square miles of open ocean. Culebra is a vital part of this complex which provides integrated fleet training for the ships of the Atlantic Fleet.

Ninety percent of the Atlantic Fleet's ship-to-shore gunfire training is conducted on the northwest peninsula of Culebra, and eighty percent of the air-to-ground weapons delivery training done at the Atlantic Fleet Weapons Range is done on the rocks and cays to the east and west of Culebra. It is a unique area and one for which we have yet to find a suitable substitute.

Your proposed amendment does restrict this training and, therefore, it must have an effect on the overall readiness of the Fleet. However, by giving us some time to realign schedules and targets for the eastern range, you do provide us a means of compensation for this restriction. It is better, or course, than eliminating the entire Culebra complex as a training area at this time.

Those amendments that require the Navy to either leave immediately or provide an unrealistic and artificial deadline for leaving can only be described as detrimental to the readiness of the Atlantic Fleet.

If we were to lose Culebra as a target area for naval gunfire support we would have to increase the use of Bloodsworth Island in the Chesapeake Bay. This, coupled with the limited ability of Vieques to absorb additional naval gunfire training without an unacceptable reduction in Marine training, would permit only sixty percent of the Atlantic Fleet's ships to complete gunfire support training because of the limited capabilities and potential inherent in Bloodsworth Island and Vieques. The actual degradation of naval gunfire support training would be qualitatively reduced in excess of forty percent.

With respect to the air-to-ground training, the Navy and Marine Corps have eight targets in the Atlantic Fleet Weapons Range, seven of them around Culebra. These are used for the advanced training of squadrons, maintenance of combat efficiency of embarked carrier air wings and task force training. If the seven Culebra targets were lost, the advanced training would, of necessity, be required to be done elsewhere. Other available targets could absorb only fifty-five percent of the target time now used at Culebra. Therefore, it is evident that forty-five percent of advanced squadron combat efficiency and task force training requirements could not be accomplished.

The gradual phasing out of gunnery and bombing on Culebra and its cays would require new technology for weapons systems training and evaluation of ships and aircraft and their crews. Or, it would require suitable alternatives to Culebra. The Navy has and is continuing to work toward developing these new technologies, but the state of the art is not sufficient yet to provide a substitute to Culebra.

Some have suggested floating islands or platforms but neither of these is now a practical alternative because of the state of the art and the cost. Further, Navy studies thoroughly conducted over many years have concluded that there is no island alternative to Culebra. The many and varied alternatives mentioned by the press and others have been investigated and they have not proven to be suitable alternatives to Cule-

bra. Therefore, the elimination of Culebra as a training area at this time or at some future but inflexible date without a viable alternative would certainly degrade fleet readiness. That, as you know, is not an academic subject. Fleet readiness or the lack thereof is real and of great concern to this country. Recent events in the Mediterranean and the subsequent reaction of our fleet there served to highlight the essential quality of the need for the highest state of fleet readiness. It may be of interest to you to know that all of the more than forty combatant ships serving in the Sixth Fleet trained at the Atlantic Fleet Weapons Range and, therefore, on the targets on and around Culebra.

The integrated fleet training and advanced training they received there makes them ready to do whatever our country calls upon them to do. Without it, they would not be as fully trained and capable to professionally and efficiently carry out the tasks that could be assigned to them. Therefore, this training is essential to the safety and well-being of the men who sail our ships and fly our aircraft and to the readiness of the Fleet to carry out its mission.

I have written and spoken to you before on the matter of Culebra, and this letter is to reinforce the Navy's position in the face of active debate on the subject.

If I can be of further assistance to you in providing information, please do not hesitate to call on me.

Very best personal wishes.

Sincerely yours,

JOHN H. CHAFEE,
*Secretary.*

Mr. JACKSON. The pertinent parts I should like to read are as follows:

The training conducted at the Atlantic Fleet Weapons Range is essential to fleet readiness. The complex includes training areas on and around Culebra, at Vieques, at Roosevelt Roads, San Croix and 118,000 square miles of open ocean. Culebra is a vital part of this complex which provides integrated fleet training for the ships of the Atlantic Fleet.

Ninety percent of the Atlantic Fleet's ship-to-shore gunfire training is conducted on the northwest peninsula of Culebra, and eighty percent of the air-to-ground weapons delivery training done at the Atlantic Fleet Weapons Range is done on the rocks and cays to the east and west of Culebra. It is a unique area and one for which we have yet to find a suitable substitute.

Your proposed amendment does restrict this training and, therefore, it must have an effect on the overall readiness of the Fleet. However, by giving us some time to realign schedules and targets for the eastern range, you do provide us a means of compensation for this restriction. It is better, of course, than eliminating the entire Culebra complex as a training area at this time.

Those amendments that require the Navy to either leave immediately or provide an unrealistic and artificial deadline for leaving can only be described as detrimental to the readiness of the Atlantic Fleet.

If we were to lose Culebra as a target area for naval gunfire support we would have to increase the use of Bloodsworth Island in the Chesapeake Bay. This, coupled with the limited ability of Vieques to absorb additional naval gunfire training without an unacceptable reduction in Marine training, would permit only sixty percent of the Atlantic Fleet's ships to complete gunfire support training because of the limited capabilities and potential inherent in Bloodsworth Island and Vieques.

* * * * *

Therefore, it is evident that forty-five percent of advanced squadron combat efficiency and task force training requirements could not be accomplished.

The gradual phasing out of gunnery and bombing on Culebra and its cays would require new technology for weapons systems training and evaluation of ships and aircraft and their crews. Or, it would require suitable alternatives to Culebra. The Navy has and is continuing to work toward developing these new technologies, but the state of the art is not sufficient yet to provide a substitute to Culebra.

Further, Navy studies thoroughly conducted over many years have concluded that there is no island alternative to Culebra. The many and varied alternatives mentioned by the press and others have been investigated and they have not proven to be suitable alternatives to Culebra.

* * * * *

It may be of interest to you to know that all of the more than forty combatant ships serving in the Sixth Fleet trained at the Atlantic Fleet Weapons Range and, therefore, on the targets on and around Culebra.

The integrated fleet training and advanced training they received there makes them ready to do whatever our country calls upon them to do. Without it, they would not be as fully trained and capable to professionally and efficiently carry out the tasks that could be assigned to them. Therefore, this training is essential to the safety and well-being of the men who sail our ships and fly our aircraft and to the readiness of the Fleet to carry out its mission.

Mr. President, I should like to conclude my remarks on the pending amendment by saying that it may well be the decision of the committee, after hearing from the Navy, that what is contained in the pending amendment should be the final decision. I want to make that very clear.

I also want to make very clear that the committee has not had an opportunity, in the time available, to be able to say that we are in a position to make a final judgment as to what area or areas should be involved in the Navy's weapons training mission. I do think, in all fairness, that the guidelines we have laid down here will make it possible to bring about a final decision by April 1. We have made a start. We have required certain actions to be taken by the Navy in the time set out in the bill. We based that decision on information we had received, which was not disputed. But, Mr. President, I think it would be a mistake to proceed without all the facts. A finding and a decision should be deferred until April 1. By that time, the committee will have the report from the Secretary of Defense. The committee then will be in a position to make a final recommendation. It may well be—and I want to emphasize this—that Congress will then decide to go along with some type of amendment such as the amendment that is now before the Senate.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. GOODELL. Mr. President, I want to express my appreciation for what the Senator from Washington has said and what he has done. I, of course, feel at this point that the Navy has had ample time, that there have been studies and restudies, and that in each instance the Navy comes back with a flat assertion that there is no alternative and that they have to continue. But they do not give us any persuasive evidence of this. To my knowledge, they have not given any persuasive evidence of this to the Senator from Washington, who is the chairman of this very important subcommittee. They have given no persuasive evidence of this to any other Member of the Senate, to my knowledge.

The Senator from Washington has taken an approach that at least we will not leave this whole thing on dead center.

I should like to clarify the legislative history in the viewpoint of the Senator from Washington and, hopefully, the viewpoint of the Senate, that if the Baker amendment is rejected and the Goodell amendment is rejected and section 611 remains in the bill as it now stands, are we saying to the Navy, and is it the intention of the Senator from Washington to say to the Navy, "Look, you go out and find an alternative, if one is available consistent with the national security, an alternative to the continued shelling of Culebra, if there is one available, consistent with the national security"?

Mr. JACKSON. If there is an alternative available, I think they should move to that alternative.

Mr. GOODELL. And we are saying that in section 611, as it stands now, it is our intention that their studies should not be a study to go out and find all sorts of new reasons and justifications for what they are doing. It should be a study aggressively to find an alternative consistent with the national security, if there is one.

Mr. JACKSON. In addition, I point out that the committee will review the findings of the Navy and their report, independent of whatever recommendations they make. We intend to make the final legislative adjudication of this controversy.

Mr. GOODELL. Exactly. But the Senator does agree with my statement that that is our intention in section 611 as it now stands?

Mr. JACKSON. The Senator says it is his intention?

Mr. GOODELL. No, the intention of the Senator from Washington.

Mr. JACKSON. Yes. The whole purpose here is to see to it that every possible alternative is exhausted, so that we will have before us, by April 1, all the alternatives; and if there are no alternatives, then the committee will have to act independently. As I say, we have already moved down that road. We have set target dates, as the Senator is aware, on section 611, for their removal from the eastern side of the island, and three nautical miles on the eastern side of Culebra. We believe that this is a proper step because it is clear that there is no dispute on this point. We would have gone further, but we did not have sufficient information at the time.

Mr. GOODELL. I do not want to delve beyond permissible limits in open session, but I should like to ask the Senator from Washington if, up to this point, the Navy has presented to the Senator, as chairman of the subcommittee, any persuasive evidence that there is no alternative to the shelling of Culebra.

Mr. JACKSON. I am not satisfied——

Mr. GOODELL. I do not say that the study has not been made, but I want to know if there is persuasive evidence which has been presented to the Senator's committee that there is no alternative.

Mr. JACKSON. The Navy has indicated in the past that there is no suitable alternative. I am not satisfied with that conclusion. That is the reason why we have provided that they are to report back by April 1, 1970 as the section provides. It is useful at this point to read the language:

The Secretary of Defense is directed to undertake a study and to prepare a report on the weapons training now being conducted in the Culebra complex of the Atlantic Fleet Weapons Range. This study shall consider all feasible alternatives, geographical and technological, to the training now taking place in the Culebra complex, and shall result in specific recommendations for, together with the estimated costs of, moving all or a part of such activities to a new site or sites, and appropriately modifying such activities to minimize danger to human health and safety—

I might say that in addition to my responsibility on the subcommittee, as chairman of the Interior and Insular Affairs Committee which has legislative jurisdiction pertaining to the government of Puerto Rico, I am deeply concerned about the implications of the current activities in connection with Culebra and that area as they relate to the political impact—the effect these activities will have on our relations in that area of the Caribbean. Thus, I have deep concern not only in connection with my responsibilities as chairman of the Military Construction Subcommittee but I should also emphasize that I feel strongly, as chairman of the Committee on Interior and Insular Affairs, that I have that dual responsibility and I intend to deal with the matter in a fair but firm way to see that the problem is resolved.

Mr. GOODELL. I appreciate what the Senator from Washington has said. I think we have made it clear now, the import in section 611 as it now stands, even if the Baker or Goodell amendments fail, and that is that the Navy shall, with all due energy, imagination, and initiative undertake the study and find a feasible alternative to the shelling of Culebra consistent with national security. We are not saying to them, "You have got another 6 months to come in with some reports and tell us why it is a good idea to keep on shelling Culebra," but we are telling them, "Intensively study this problem, because it is the objective of Congress to get the shelling ended on Culebra consistent with the national security."

I appreciate very much the agreement of the Senator from Washington on this question. He is a very important factor in this whole consideration during the months ahead.

Mr. JACKSON. I thank the Senator from New York. Might I read from page 9 of the report where we refer to item six, "Recreational Value."

I read this provision because it concerns my responsibility as chairman of the Committee on Interior and Insular Affairs:

6. RECREATIONAL VALUE

On August 24, 1970, the Chairman of the Senate Interior Committee wrote to the Secretary of the Interior requesting a report on the suitability of the island of Culebra and adjoining cays for some form of national recreation or seashore area status. On September 8, 1970 the Department of Interior replied that "Culebra has been identified as having public recreational potential" in an inventory and study of the islands of the United States. The Bureau of Outdoor Recreation's report, "Islands of America" should be available to the Congress by October 1970.

In view of the recreational value of this area, its uniqueness, and the fact that substantial portions are now in Federal ownership, the Committee believes that the status quo should be maintained until the Secretary's report and recommendations are received and acted upon. The nonhabitation easement on the eastern portion of Culebra will insure safety, preserve the status quo and will prevent development of the area by land speculators and subdividers.

In connection with section 611, we also required that the study be coordinated under subsection (b) in the bill, which states:

(b) In preparing the report required by this section, the Secretary shall consult with the people of Culebra, the Government of Puerto Rico, and all appropriate Federal agencies having jurisdiction or special expertise on the subject matter involved.

Then we go on to say that it will be submited to the President, to the House and to the Senate.

The point I want to make is that the Department of the Interior is one of those important agencies that should and must be involved in connection with the requirements set forth in the section concerning the report that is to be prepared.

Mr. DOMINICK. Mr. President, will the Senator from Washington yield?

Mr. JACKSON. I yield.

Mr. DOMINICK. I have been listening to this debate with interest. I am privileged to sit on the subcommittee with the distinguished Senator from Washington and listened to the evidence brought before us both in public and private hearings on this particular subject.

It seemed apparent to me during this process that we are faced with a rather difficult situation, one being the understandable desire of the people of Culebra to live without being surrounded by military activities; and the other being the undoubted need of the Navy to have some form of targeting and practice areas so that the efficiency of the fleet can be maintained.

We worked hard on this and made a number of proposals and amendments in order to come up with the final form of the bill. Meanwhile, as Senators know, the so-called Real Estate Subcommittee of the Committee on Armed Services of the House of Representatives had been to Culebra to investigate the same situation, and issued a report, a copy of which I hold in my hand, dated August 4, 1970.

In order to put this in perspective, I think that a few of the comments made by that subcommittee are in order. But first I might point out that two of the Representatives serving on the subcommittee are from the State of New York, Representatives STRATTON and KING, and all are agreed on the majority of the points made in the report.

Some things that are of interest in this discussion, I think, contained in the report, are:

1. The committee found that the inconvenience of range firing noise to the citizens of Culebra was, in fact, infinitesimally small, and that ordinary conversation would prevent it from being heard in the town of Dewey.

2. The Navy proposal will improve the present safety of Culebrans without requiring any of them to move.

This proposal is the easement over the eastern end of the island and the transferal of 680 acres of governmental land to the Government of Puerto Rico and Culebra.

The report continues:

3. There are, in fact, no rare Puerto Rican parrots on the island as was alleged, and possibly there never have been, but if any rare wildlife can be found there in the future its chances of survival will be improved, not harmed by the Navy proposal to limit human habitation in certain areas.

4. Contrary to testimony received during the open hearing: there are no bombs dropped on the island of Culebra *and no napalm is dropped on Culebra or any other part of the Atlantic Fleet Weapons Range;* artillery shells fired at the northwest peninsula are scarcely audible in the town of Dewey; and it can positively be stated that none of the firings which took place during the subcommittee's visit caused the school building or any other building in the town of Dewey to tremble.

It mentions, I think, two other points which are probably not so important as those I have read. They are available in the report.

The point I make is that I think a good deal of information has been circulated which just is not so.

The military construction subcommittee and the full committee came to some kind of a compromise whereby the Armed Services committees would have continuing jurisdiction in this matter and would eliminate as of a certain date activities on the eastern end; whereby we would, with the consent of the Navy, already obtained, eliminate the firing of any missiles at all in that area: and would, with the use of the Navy study, determine whether there is any possibility of continuing the target range there or anywhere else in the Atlantic Weapons Range.

I personally thought that we came up with a pretty good proposal. I am a little bit disheartened that it has not been greeted with acclaim by the junior Senator from Tennessee and the junior Senator from New York.

I do think, in addition to what I have already said, that I should place in the RECORD at this point the actions which the Navy has undertaken and which are discussed in a letter of September 23 to the Senator from Washington (Mr. JACKSON) these include the suspension of any weekend training activities except in extraordinary circumstances. That means that over the weekends the people of Culebra can do anything they want to do without worrying about weaponry.

Flamengo Beach on the west coast will be available for weekend use for the people of Culebra.

There will be the suspension of live bombing and advance notice and publication of training schedules, warning flags, the assignment of a fulltime officer on Culebra to work with the local community, and the creation of employment opportunities for residents.

By the steps taken to date by the Navy and the provisions in the committee bill we have alleviated at least the immediate concern of people in that area and we have also laid the basis for a permanent solution to this problem.

As we get down the road, after the study is in, we can then find out whether there are other available resources, what it will cost, what the terms might be, and any other factors which deal with this matter, including the desires of the people of Culebra and the Governor of Puerto Rico, who have to be consulted in the process of this study.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. DOMINICK. I yield.

Mr. GOODELL. Mr. President, will the Senator agree with the coloquy the junior Senator from New York had with the junior Senator from Washington a few moments ago, in which we agreed that the intention of section 611, as it now stands, is to direct the Navy to go out and find an alternative to the shelling of Culebra, if there is an alternative available, consistent with the national security.

Mr. DOMINICK. Yes, I would think that is accurate. Definitely, we have suggested that they do this. In fact, in that section we have demanded that they do it, keeping in mind that they might come back and say that there is not any alternative.

Mr. GOODELL. Mr. President, I understand that. They will then have to present evidence to the subcommittee to convince the subcommittee that there is no alternative. As the Senator from Washington has said, there would be a review by the committee.

We know very well that the Navy has come back in every instance in connection with every study and flatly said that there was no alternative. However, they presented no documentation or detail as to why. We have had other studies that have contradicted the Navy and said that there are alternatives.

Mr. DOMINICK. The Senator is correct. In the process we have to consider the cost and a variety of things of that nature.

There is an established air route between Puerto Rico and Saint Thomas in the Virgin Islands. If we try to redirect the method of firing, which we explored at some length, we find it will inject weapons into that air route, which will not be greeted with pleasure by the airline or by passengers flying on the airlines.

There are a number of problems that are not self-evident. If we make a simplistic approach we will almost certainly find ourselves in serious trouble.

Mr. JACKSON. Mr. President, I thank my friend, the Senator from Colorado, for his help in trying to resolve the problem pending before the Senate.

I think that the Senator from Colorado has brought out a point that has been overlooked in the debate up to this time. That is the work of the House subcommittee that visited the area. This further complicates the problem, especially when we go to conference.

I must say that I am not at all sanguine about what might happen in conference, even in connection with section 611, now in the bill.

The Senator from Colorado and I were in unanimous agreement in connection with the action we have taken here. We are both determined to see to it that this problem is resolved in a timely, but in a fair way. I want to emphasize that point.

Mr. President, I yield the floor.

Mr. THURMOND. Mr. President, those of us who have studied this matter and gone into it thoroughly certainly feel great sympathy for the Puerto Ricans in this matter.

The Real Estate Subcommittee of the House held public hearings on this matter on June 10, 1970. They heard all who wished to testify at that time. Subsequently the subcommittee made an on-the-site inspection in order to gain first-hand information about the situation.

The distinguished Senator from Colorado has just mentioned some of the points brought out from their visit and on-site inspection.

The subcommittee, after having public hearings and making an on-site inspection, took certain positions. I wish to call to the attention of the Senate certain of these positions, without going into detail on all of them.

The Real Estate Subcommittee of the House came to the conclusion that the Culebra complex is irreplaceable and definitely required for our national defense.

Although the subcommittee of the House recognized that the feelings and desires of the Culebran people are important, and they did recognize that, they also found that they must give consideration to the Nation's defense needs, which in these circumstances involve the readiness of the Navy to respond promptly and effectively whenever called upon.

The "nonhabitation" easements on this island requested by the Navy will give the protection to the people of Culebra which they have a right to expect with the continued presence of the Navy, according to the subcommittee.

The Navy convinced the subcommittee that it had made an extensive search and found no site which could be made available to the Navy to substitute for Culebra, in the essential defense program of the Atlantic Fleet Weapons Range. There have been charges in the press that the Navy cares more for its weapons than for human beings. The subcommittee repudiated that by saying that the subcommittee does not consider that to be the case. The reason for training is to develop a force to protect the way of life and the very lives of all Americans. Further, realistic training gives the fighting men in this country a better chance to survive in a combat environment.

The committee further stated that the safety zones the Navy desires, and its safety procedures, are for the very purpose of protecting the lives and property of the people of Culebra. Therefore, the subcommittee feels that the charges made by some of the news media are without foundation in fact.

Mr. President, the subcommittee made certain recommendations and took certain actions. Some of the recommendations they made were as follows:

1. Assign an officer to full-time duty on the island of Culebra;

2. Erect in the town of Dewey a rotating beacon or visible red flag to more adequately alert the residents of actual range usage;

3. Employ more patrol boats or helicopters to better patrol areas of the range into which boats may inadvertently enter while the range is in use;

4. Revise immediately schedule posting procedures; be certain of their accuracy; and eliminate the posting of "blanket schedules";

5. Investigate further the possibility of unexploded ordnance being in the waters around the island of Culebra; and if such are found, investigate the feasibility of their removal.

Mr. President, one item not previously discussed that the subcommittee felt the Navy should consider was the possible rerouting of the present flight patterns so that the aircraft could remain even farther away from the Island of Culebra than they do today; and if the Navy proposes the use of any new missile on Culebrita or any other island in the range, it should report to the House Committee prior to the scheduling of any such firing.

Then, they required the Navy to submit a report of the implementations of the recommendations as soon as possible.

Mr. President, in addition to this study, which seems a rather thorough study made by the Real Estate Subcommittee of the Committee on Armed Services of the House of Representatives, our Subcommittee on Military Construction went into this matter and made recommendations. Those recommendations are embodied in the committee report. I shall not take the time of the Senate now to go into detail. The point is that the Senate has gone into this matter through the Subcommittee on Military Construction and a full study will be made and a report made by the Defense Department.

In view of this it is felt that the position taken by the Subcommittee on Military Construction is the proper course and a reasonable one to protect the people down there and also to protect the national defense of this country because we have to keep both of those matters in mind.

In view of this I hope the amendment of the Senator from Tennessee, as well as the amendment of the Senator from New York will not be agreed to by the Senate.

Mr. JAVITS. Mr. President, I wish to support the position taken by my colleague (Mr. GOODELL) and the Senator from Tennessee (Mr. BAKER) on Culebra. Both of them have rendered a very distinct service to the people of this particular island and Puerto Rico in trying to find a rational way to settle the problem. It will be noted that the amend-

ment originally submitted by my colleague from New York (Mr. GOODELL), which I cosponsored, was much more drastic in terms of completely eliminating testing, and so forth, on Culebra almost at once. Now, some reasonable compromise is needed to reconcile the positions.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. GOODELL. Mr. President, I would like to ask for the yeas and nays on my amendment to the Baker amendment.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that it may be in order to order the yeas and nays on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I shall be very brief because I wish to address myself strictly to the diplomatic and political phases of the matter.

Mr. President, this has become an enormous issue in Puerto Rico. As Puerto Rico represents a very key area of the United States in terms of our relations with all Latin America, typifying, as it were, our attitude toward the people of that whole area, we should do our utmost to meet their views consistent with the requirements of national security.

The great virtue of the Baker amendment is that it sets an outside date so that the people can have some sense of planning and the Navy can have some sense of planning; and it still has the national security provision which is contained in the committee amendment, as well; but it sets an outside date to terminate all weapons range activities on Culebra.

If the amendment of my colleague from New York is accepted it ties Congress into the process, which is important from the point of view of relations with Puerto Rico, because they rely on Congress.

I served on the Puerto Rico Status Commission, and I am well aware of the reliance they place on their relations with the United States, which are heavily premised in what their people wish, and what Congress requires. That was the whole burthen of the Status Commission's report, and it is the reason for the new excellent standard of relations between the United States and the Commonwealth of Puerto Rico.

In addition, I deeply feel that Governor Ferre of Puerto Rico, who has the deepest feelings about his relations with the United States and the national security of the United States, and the fact that they can look to us for security and defense, would not favor any solution which would not go the last mile to meet American views on the mainland on this subject.

Mr. President, for these reasons, and in the absence of any showing that there is a danger to the national security, I hope both amendments will be agreed to.

Mr. GOLDWATER. Mr. President, I shall be brief. I rise to oppose both of these amendments—not their intent, but I think we should take time to study this matter, as the Military Construction Subcommittee has suggested.

A firing range is probably the most valuable piece of real estate that a branch of the military has. While I realize this range has been used for over 30 years and that the island, which was once uninhabited, is now inhabited, I am convinced, having talked with Navy officials, that they will find a solution to this problem.

On the west coast we have San Clemente, off San Diego. Nobody lives on that island, so there is no problem. I can recall the problem that the Air Force found itself in just after World War II when aircraft rockets were put to use on fighter-type aircraft. We had the very fine range facilities at Yuma, Ariz. Then when we went to the 4-inch rockets, they were landing in Mexico. Naturally, when the Mexicans objected, we could no longer use that range. Fortunately, we had another range at Tyndall, Fla., where the rockets would land in the ocean. That saved our whole rocket program.

What I am concerned about is that if we vote for the amendment today the Navy is going to be forced to stop its practice of both air-to-ground and ship-to-shore target practice at a time in our Nation's history when, if anything, we should be increasing our range practice.

I would hope we would go along with the committee's recommendation. I think it is a very sound one. The Navy has convinced us that a solution can be found to this problem. I think it would be a very grave and serious mistake to chop the Navy off from any programs they now have without some place for the Navy to practice its gunnery, both air-to-ground and surface-of-the-sea-to-shore. I hope the vote will be a resounding "no."

Mr. BAKER. Mr. President, I have no further remarks on the subject other than to say I do feel the matter of the relationship between the United States and the Commonwealth of Puerto Rico is substantially at stake. That relationship has been unique and a very good one indeed. The Culebra question will not greatly alter that relationship, I trust, regardless of which way we go, but I think Congress ought to be responsive to the overwhelming sentiment of the people of Puerto Rico in this respect, and that is what I believe this amendment does.

I am ready to vote.

Mr. HATFIELD. Mr. President, the time has come to put a stop to the needless shelling and bombing of the small inhabited island of Culebra. This Puerto Rican municipality has suffered for many anguished years as the target of U.S. naval training exercises.

The Navy needs training, but not on a 7,000-acre island inhabited by U.S. citizens. Fortunately uninhabited alternative sites are available and would permit less restricted training that is superior to that now offered at Culebra.

I cannot help wondering whether the Navy shells and bombs would have fallen on Culebra and its neighboring keys if the people residing there spoke English instead of Spanish, wore white instead of dark skin, and, perhaps most important, were represented by a voting Member of the U.S. Senate.

Gov. Luis Ferre spoke to me about this increasingly serious controversy several weeks ago. All Puerto Rico is understandably incensed at this treatment of the Culebrans. I share their indignation.

I hope the Navy will decide to turn its guns away from Culebra. If, however, there is no clear decision by the Navy to end its firing on Culebra and neighboring keys, I shall cast my vote for the Goodell amendment to the military construction authorization bill to cut off funds for this unacceptable activity.

Mr. PELL. Mr. President, the use of the island of Culebra as a weapons range poses troublesome questions regarding the rights of the residents of Culebra to a measure of individual security and peace.

Because of the commonwealth status of Puerto Rico, we in the Congress bear a special responsibility to assure that the citizens of the Commonwealth are given equitable treatment. And, through their elected spokesmen, the citizens of Culebra and of Puerto Rico have made their opposition to the naval weapons range operations unmistakably clear.

We in the Congress have also the responsibility to provide for the defense of our country. In the interests of national defense, I believe our Navy men must be given the equipment, the support, and the training they require and that includes adequate weapons test and training range facilities.

In this instance, however, I question whether a confrontation between the desires of the people of Culebra and our national defense requirements is unavoidable. I question whether sufficient consideration has been given to the possibility of using other uninhabited, natural, or manmade sites for the essential weapons range activities.

This same conclusion has been reached in several independent studies of the issue, including a study conducted by the Armed Services Journal, widely known as the spokesman for the services.

Reluctantly, I must agree with the conclusion reached by the editors of the Armed Services Journal:

> Our hearts are with the United States Navy, but not about Culebra.

Mr. DODD. Mr. President, I strongly support the amendment offered by the distinguished junior Senator from Tennessee, because I do not feel the committee's recommendation is adequate.

The committee's recommendation, as I understand it correctly, is that all bombardment of the eastern shore of Culebra be terminated before January 1, 1972.

The Baker amendment adds to this a prohibition against the bombardment of Agua Cay after January 1, 1973, and a prohibition of all bombardment in the Culebra area after January 1, 1976.

If anything, I would like to see all the bombardment stopped much sooner. But since this amendment was suggested by the Governor of Puerto Rico, it is my hope that it will be acceptable to the Puerto Rican people.

This is the key to the entire situation, because we simply cannot treat the Puerto Rican people like colonial subjects, whose will we are free to disregard.

They are fellow Americans, and they demand that they be treated as fellow Americans. I urge my colleagues to vote for the amendment. But whether the amendment carries or the committee's recommendation prevails, I hope the Navy will move as rapidly as possible to reduce the intensity of their bombardment practice in the Culebra area and to find an alternative practice area in advance of the suggested deadlines.

Mr. GOODELL. Mr. President, I call up my amendment to the amendment of the Senator from Tennessee, and I am ready to vote.

The PRESIDING OFFICER. The amendment of the Senator from New York to the amendment of the Senator from Tennessee will be stated.

The legislative clerk read the amendment, as follows:

On line 8 of pending amendment strike out the word "determines" and insert in lieu thereof: "and the Congress of the United States by joint resolution determine"

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York to the amendment of the Senator from Tennessee.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Maine (Mr. MUSKIE). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Maine (Mr. MUSKIE), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Oklahoma (Mr. HARRIS) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG), are absent on official business.

On this vote, the Senator from Alaska (Mr. GRAVEL) is paired with the Senator from Missouri (Mr. SYMINGTON). If present and voting, the Senator from Alaska would vote "yea" and the Senator from Missouri would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from South Dakota (Mr. MUNDT), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Texas (Mr. TOWER) would each vote "nay."

The result was announced—yeas 17, nays 58, as follows:

[No. 335 Leg.]

| Harris | Mundt | Yarborough |
| Hartke | Murphy | Young, Ohio |

So Mr. GOODELL's amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Tennessee (Mr. BAKER).

Mr. BAKER. Mr. President, the question recurring on the amendment which I offered earlier, I hope that the Senate will adopt this amendment. What it does is to provide an outside cutoff date of January 1, 1976, for the shelling of Culebra. It provides that if the President of the United States determines that the national security interest requires a continuation after that date, he may so certify.

This is the amendment requested by the distinguished Governor of the Commonwealth of Puerto Rico, and I hope we will respond to the wishes of the people of that Commonwealth by voting in the affirmative.

I am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee. On this question the yeas and nays have been ordered. and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Tennessee (Mr. GORE), the Senator from Oklahoma (Mr. HARRIS), the Senator from Indiana (Mr. HARTKE), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Maine (Mr. MUSKIE), and the Senator from Missouri (Mr. SYMINGTON), are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG), are absent on official business.

I further announce that, if present and voting, the Senator from Maine (Mr. MUSKIE), the Senator from Missouri (Mr. SYMINGTON), the Senator from Alaska (Mr. GRAVEL), the Senator from Oklahoma (Mr. HARRIS), and the Senator from Ohio (Mr. YOUNG), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Maine (Mrs. SMITH) would vote "yea."

On this vote, the Senator from Kentucky (Mr. COOK) is paired with the Senator from Texas (Mr. TOWER). If present and voting, the Senator from Kentucky would vote "yea" and the Senator from Texas would vote "nay."

On this vote, the Senator from Illinois (Mr. SMITH) is paired with the Senator from South Dakota (Mr. MUNDT). If present and voting, the Senator from Illinois would vote "yea" and the Senator from South Dakota would vote "nay."

The vote was recapitulated.

After some delay:

Mr. STENNIS. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. The regular order is called for.

The result was announced—yeas 37, nays 39, as follows:

[No. 336 Leg.]

YEAS—37

| | | |
|---|---|---|
| Baker | Goodell | Pearson |
| Bayh | Hart | Pell |
| Boggs | Hatfield | Percy |

| Hartke | Murphy | Young, Ohio |

So Mr. BAKER's amendment was rejected.

Mr. THURMOND. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. STENNIS and Mr. DOMINICK moved to lay the motion on the table.

Mr. BAKER. Mr. President, I ask for the yeas and nays on the motion to table.

There was not a sufficient second and the yeas and nays were not ordered.

The PRESIDING OFFICER (Mr. SAXBE). The question recurs on the motion to table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. GOODELL. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. GOODELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered, and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

AMENDMENT No. 915

On page 102, after line 20, strike through line 18 on page 104 and insert a new section, as follows:

"SEC. 611. None of the funds authorized to be appropriated by this Act or by any other law shall be used for research, development, test, evaluation, personnel training exercises, or the procurement of weapons or other supplies by any military department if such activities include the naval shelling or air bombardment of the island of Culebra (located off the east coast of the Commonwealth of Puerto Rico), or any of the keys adjacent to such island, or of any waters within three nautical miles of such island."

On page 49, line 23, delete "611" and insert in lieu thereof "612".

Mr. GOODELL. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. GOLDWATER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Arizona will state it.

Mr. GOLDWATER. Is it proper to inquire what this amendment says and what it does?

Mr. GOODELL. I will explain it. I think it would be easier that way.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read the amendment as follows:

On page 102, after line 20, strike through line 18 on page 104 and insert a new section, as follows:

"SEC. 611. None of the funds authorized to be appropriated by this Act or by any other law shall be used for research, development, test, evaluation, personnel training exercises, or the procurement of weapons or other supplies by any military department if such activities include the naval shelling or air bombardment of the island of Culebra (located off the east coast of the Commonwealth of Puerto Rico), or any of the keys adjacent to such island, or of any waters within three nautical miles of such island."

On page 49, line 23, delete "611" and insert in lieu thereof "612".

Mr. GOODELL. Mr. President, I shall not hold up the Senate for any great length of time on this amendment. The issue of the shelling of Culebra has been debated thoroughly. This is the first amendment that I have put into the military authorization bill. The Senator from Washington (Mr. JACKSON) on the subcommittee inquired further into what the Navy might be able to do to suspend the shelling. This amendment would provide, as a matter of law, for the barring of any shelling of Culebra, now—immediately.

There is nothing complicated about the amendment. Other amendments have fixed dates in the future, and provisos, and leaving out exemptions, and so forth. The President said it was in the national security to continue the shelling of Culebra.

The issue here is simple. There are almost 800 American citizens on Culebra. The island has been shelled for many years. Recently, there have been some close calls where shells have fallen where children were bathing. They have also fallen near populated areas. Some individuals have been injured. Last spring, the Governor of Puerto Rico was in a boat near Culebra and a shell fell right beside the boat.

Mr. President, these are American citizens. The Navy is shelling all around them. I think it is time we stop calling on the Navy to make further studies and report back, because every time they do, they tell us it has no alternative.

To the credit of the Senator from Washington, he has now put into the bill section 611 requiring a further study. He has put the heat to the "baby" and now we want a study and we want the Navy to come back and tell us what alternatives they have to stop the shelling of Culebra.

Meanwhile, the people of Culebra are going to be subjected to a continuous shelling all around them. Some of them may be killed, maimed, or injured. All activities on the island of Culebra will be suspended.

Mr. President, I ask that the Senate now go on record as indicating that it wants this shelling to end and that it regards very highly the rights of the 800 American citizens on Culebra, rights that are now being violated by the Navy.

Mr. President, if this kind of thing were going on in Washington, in Georgia, or on Long Island, and citizens there were endangered because of shelling taking place all around them, I think that everyone representing those people would be standing up and defending their rights and trying to stop this action.

Mr. President, I ask support for my amendment.

Mr. JACKSON. Mr. President, I shall be very brief. Under section 611 of the bill, the Secretary of Defense is directed to undertake a study and report on the weapons training activities now conducted in the Culebra complex of the Atlantic Fleet weapons range.

We further direct that this study shall consider all feasible alternatives. There is no sense in talking about stopping this important training if we are not going to find some other place where proper practice and training activities can be conducted. We call upon the Secretary of Defense to study all feasible alternatives, geographical and technological, to the training now taking place in the Culebra complex. We require that the Secretary of Defense report back by April 1.

Mr. President, I share the concern expressed here earlier by the junior Senator from New York and the junior Senator from Tennessee.

The point I want to make is that we do not have before the committee and did not have before the committee adequate evidence that would warrant the immediate cessation of naval gunfire practice in that area. It has been going on for over 30 years.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. GOLDWATER. Mr. President, can the Senator tell me, if he knows, how many people were living on that island when the Navy commenced to use it 30 years ago?

Mr. JACKSON. About 600. I believe there are 730 now.

Mr. GOLDWATER. No one has moved away because of the shelling?

Mr. JACKSON. That is my understanding. But I do feel there is a serious problem. I share that concern.

I want to emphasize that the committee has taken responsible action here. We have decreed by statute that the eastern area of the island and the cays within 3 nautical miles are to be relieved of any further activity on the part of the Navy no later than January 1, 1972.

The evidence before the committee made it very clear that this was warranted. I do not think that was in dispute. What we need here now are alternatives.

There are other areas along the east coast that may be affected by any such alternative decision. Senators from States on the east coast may have some interest in wanting to know where it will be.

We ought to have all of the alternatives before us. The committee will then be in a position to make a legislative adjudication of this problem. I ask the Senate to go along on the need for appropriate study.

With the alternatives considered that can be presented by the Secretary of Defense, I would express the hope, as I have

earlier, that the Navy might not use Culebra. I hope this will be possible. But I cannot in conscience stand up here and accept the amendment without facts to support it.

Certainly after all these years, they should have until April 1 of next year to come forth with their findings. Then the committee can consider the whole matter de novo. We can go over it from the beginning and make our determination based on whatever evidence is submitted.

We are not bound by the findings and recommendations of the Navy or the Defense Department. We will give the matter serious consideration.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. GOODELL. Mr. President, I know that the Senator from Washington will give the matter serious consideration. I might say with reference to the question raised by the Senator from Arkansas concerning no one leaving that area—and this was one of the reasons I wanted the Senator to yield at this time—that many Culebrans have left.

This is a very unhappy situation there. These people are native to the island. This is their home. Are we to say to them, "We will go on shelling because it doesn't disturb you very much."

There are still 600 or 700 living there. A great many of them have left because of these conditions and moved to various parts of the United States or Puerto Rico.

I commend the Senator from Washington for his very earnest and sincere efforts. I appreciate what he has been doing, and I know that the people of Puerto Rico and Culebra do also. However, this thing has been studied and studied.

The Navy has been required to come through with studies. Independent research groups have studied it. As a result of these studies by some of the independent sources, we find that there are alternatives to shelling Culebra.

The Navy decides in each case that they must go on shelling the island of Culebra in the national security interest. But they give no specific details on or off the record, in secret or open briefings.

The Senator from Washington has agreed that this is the case. He has not had a persuasive case presented by the Navy. The Senator from Washington wants to afford more time for study. I appreciate the reasons why the Senator from Washington wants to do that. However, I think we have studied this thing to the point where it is time for action.

Mr. JACKSON. Mr. President, as the Senator from New York knows, this matter was not even before the committee. The Senator from Washington felt sufficiently concerned to take affirmative and unilateral action. There was no matter pending before the committee.

Mr. GOODELL. I understand that.

Mr. JACKSON. The Senator from Washington, as was expressed earlier, is also chairman of the Committee on Interior and Insular Affairs and has a special interest as far as the Commonwealth of Puerto Rico is concerned. He felt, despite the study made by the House, that this matter should be gone into very carefully.

This is what we have attempted to do. We have taken legislative action on the part on which we are able to reach a conclusion. We have not been able to reach a conclusion on this overall problem. We simply did not have adequate testimony.

Again, I want to say that we will review the recommendations and findings of the Navy independently. I do not intend to take as gospel their recommendations. Again, I will say that the Department of Defense will make findings and recommendations. I do not, however, intend to take as the final word the findings of the Department of Defense.

We will review them—I emphasize that—independently so that the Senate will have a chance to know what the alternatives are. If we have to move out of Culebra—and we may—we will have to move out. But the Senate should make that determination based on adequate testimony and adequate evidence. That is all I ask for.

Mr. President, I hope we can vote on the amendment.

Mr. THURMOND. Mr. President, I rise in opposition to the Goodell amendment which would prohibit further gunnery and bombing activities on the island of Culebra and adjoining cays. If adopted, the Navy would be forced to conduct a significant amount of its Atlantic Fleet operational training by fragmenting it to areas which do not have the ingredients necessary to conduct a comprehensive training program. There are few alternatives to the Culebra range and no one of them can be considered adequate.

The loss of the Culebra target area for naval gunfire support would dictate increased use of Bloodsworth Island range in the Chesapeake Bay area. Besides the Bloodsworth Island range for naval gunfire there is only the Viegues Island area some 10 miles from Culebra which is presently serving as a Marine training site.

Well over 80 percent of the Navy's ship-to-shore firing is now being conducted in the Culebra area. The U.S. Navy has used this area for the past 34 years without any serious incidents.

Despite claims to the contrary the Navy record for safety is exceptional. This can be best proven by the fact that in all of the 34 years there has been only one claim filed against the Navy in connection with an injury or property loss on Culebra. The single claim was filed in 1968 when it was contended a calf was killed as the result of shelling in that area.

Mr. President, it is easy to stand here on the Senate floor and speculate about how simple it would be to locate another firing area. However, the Navy has made considerable efforts already in this area without success.

The Culebra site cannot be duplicated because it is exceptional from the standpoint of what the Navy needs. There is a very small population there—some 700 people. They are some 5 miles from the area being routinely shelled and 2½ miles from the nearest range where limited firing is performed.

Further, this is an area where the weather is excellent year around. The terrain on Culebra includes hills and ledges, another factor hard to find but necessary as an impact area for Navy ship-to-shore shelling.

Still further Culebra is relatively free of commercial shipping thus permitting Navy ships to conduct a wide variety of maneuvers and even land assault forces.

Finally, Culebra is only a few miles from the Navy's Roosevelt Roads Station which provides still another ingredient—a sizable support station for ships and personnel engaged in the range training areas.

The loss of the Culebra target area for naval gunfire support would dictate increased use of Bloodsworth Island in the Chesapeake Bay area. This, coupled with the limited ability of Vieques to absorb additional naval gunfire use, would permit only 60 percent of the Atlantic Fleet ships to complete naval gunfire support training.

Because of the limited capabilities and potential inherent at Bloodsworth Island and Vieques, the actual degradation of naval gunfire support training would be qualitatively reduced in excess of 40 percent.

The restricted sea area at Bloodsworth Island precludes realistic high speed maneuvering and firing at both long and short ranges. Shoal water prevents closure within 5,000 yards of the impact area which combined with an average terrain height of 2 feet does not allow ships to attain proficiency in locating and destroying targets by direct fire—a requirement for ship survival during operations off a hostile shoreline.

Finally, the terrain does not permit the placing of varied targets and observation posts which are essential for the detailed scoring and evaluation of naval gunfire support training. This kind of detailed evaluation is vitally important, because all tactics, doctrine and combat procedures are based upon the predictable performance of each weapons system.

With respect to the air-to-ground training, the Navy and Marine Corps have a total of eight targets in the Atlantic Fleet Weapons Range, seven of them at cays around Culebra. These are used for the advanced training of squadrons, maintenance of combat proficiency of embarked carrier air wings and task force training operations.

If the seven Culebra targets were lost, the advance training would, of necessity, be required to be conducted elsewhere. Targets in the continental United States, which are used primarily for basic aircrew training, would have the capability to absorb 55 percent of the target time now used at Culebra. Thus, we would still lack the target availability to meet 45 percent of our advanced squadron, combat proficiency and task force training requirements.

The outer ranges of the Atlantic Fleet Weapons Range provide the Atlantic Fleet with the only combined airspace, sea space, and electronic environment in which air-to-air and surface-to-air missile training and evaluation can be accomplished. This coupled with the air-to-ground and naval gunfire support targets on Culebra and the outlying cays provide the Atlantic Fleet the only multi-threat environment within which the carriers, destroyers, submarines, am-

phibious ships and the service force can conduct the inter-type and task force training. This type training is essential to molding individual units into an effective force capable of employing the full range of seapower.

A gradual phasing out of gunnery and bombing activities on Culebra and its cays would require new technology for weapon systems training and evaluation of ships and aircraft and their crews. The Navy has and is continuing to work toward developing this capability, but as yet no specific alternatives to realistic land impact areas have been developed. The Navy is not optimistic that a solution can be found in the immmediate future.

The Navy has undertaken to find alternatives to Culebra. To date they have been unsuccessful. The few sites found do not come close to providing what is needed. The building of an artificial island has even been considered.

The Senate Armed Services Committee, recognizing the problems in the Culebra issue, has written into its report a requirement that the Department of Defense study this matter and report back to the committee. In the meantime, present testing is to be reduced to a minimum by January 1, 1971. It is hoped this Department of Defense study can develop some alternatives acceptable to maintaining the military preparedness of the Atlantic Fleet. Nothing short of that should be accepted.

In view of this study and the other facts I have stated it is my hope the Senate will reject the Goodell amendment. No evidence exists that the people of Culebra have been harmed by this range which has existed for these many years. Some of the incidents cited here on the floor by proponents of this amendment have been blown up despite competent testimony to the contrary.

Further, the Navy has taken steps recently to further strengthen safety measures in this island area. Some of these steps resulted from a House subcommittee report issued last June. These steps should strengthen the good relations between the Navy and the people of Culebra which have existed until recently.

The safety of the people of Culebra and the surrounding waters and islands is of paramount importance. No shelling of range areas should ever be placed above the safety of the Culebrans or anyone else. None of us would like to have the Navy or anyone else shelling in our backyards.

However, the Navy has an undisputed ownership in the Culebra area and has conducted their range firings over the years without injury to any person. Offers have been made to move the Culebrans to nearby and more prosperous islands. Land exchanges have been offered to further tighten security measures. The Navy should spare no steps in trying to work with the inhabitants of these islands.

It is my opinion land developers are mostly responsible for the present uproar about Culebra. They are generating a lot of smoke in order to turn a fast buck. We should not yield to land developers who will take this island from the poor and build fancy houses for the rich.

It would also be unwise to act hastily on a matter of such importance to our national security. Let us wait until the range control improvements suggested by the House subcommittee and the Navy are put into effect. Let us wait until the Department of Defense conducts the study requested by the Senate Armed Services Committee. These steps deserve time. The Senate should not overrule these efforts in the face of the recommendation of the responsible Senate committees.

In view of these points I urge defeat of the Goodell amendment.

Mr. FULBRIGHT. Mr. President, I will not delay the Senate. I want the record to show that the former Governor, Luis Munoz-Marin of Puerto Rico, who, in effect, was the founder of the Commonwealth and Governor for 16 years, sent me a wire expressing the interest of this Commonwealth in being released from the necessity of being bombed.

Then, the present Governor, who, if I recall correctly, is a Republican, and a leading industrialist of Puerto Rico, Governor Ferre, a man of the highest integrity, came to see me, and he pleaded with me, and I assume with other Senators, that this target practice is a great imposition upon a small community; that it is one of the most densely populated areas in the Western Hemisphere, about as densely populated as any place in the world. It has very limited land, with no way to expand it. The United States, on the other hand, has over 3 million square miles, with many islands off both coasts. Certain islands off the coast of South Carolina could be converted to this use if necessary. In any case, Puerto Rico is a small, struggling community, with a great many people and very limited land. Both of those Governors are outstanding men. I certainly think it is insensitive and callous for the great United States to take this attitude especially with troops and navies all over the world, with equipment of all kinds on foreign bases—at last count. I think we have about 450 scattered all over the world. It is simply incredible to believe there is not any place else where the Navy could conduct firing practice with obsolete guns. Certainly these guns, in view of the nuclear weapons and missiles that we have, are simply used as an exercise to keep the Navy boys happy and give them something to do. That firing range certainly could not be of great importance. It may have marginal importance for the happiness of sailors. To say that a great country like ours, with 200 million people, cannot do anything about this situation, which involves a small community with many people on it, is a very bad attitude to take. I hope the Senate will show some magnanimity and consideration for this small community.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Tennessee (Mr. GORE), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Indiana (Mr. HARTKE), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Maine (Mr. MUSKIE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH) and the Senator from Ohio (Mr. Young) are absent on official business.

I further announce that, if present and voting, the Senator from Maine (Mr. MUSKIE), the Senator from Alaska (Mr. GRAVEL), the Senator from Ohio (Mr. YOUNG) and the Senator from Missouri (Mr. SYMINGTON), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH) and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from South Dakota (Mr. MUNDT), the Senator from Maine (Mrs. SMITH), and the Senator from Illinois (Mr. SMITH), would each vote "nay."

On this vote, the Senator from Kentucky (Mr. COOK) is paired with the Senator from Texas (Mr. TOWER). If present and voting, the Senator from Kentucky would vote "yea" and the Senator from Texas would vote "nay."

The result was announced—yeas 19, nays 55, as follows:

[No. 337 Leg.]

So Mr. GOODELL's amendment was rejected.

Mr. JACKSON. Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I should like to have the attention of the Senator from Washington.

I do not know whether an amendment is going to be necessary, but I should like at least to ask some questions for the RECORD.

If the Senator will direct his attention to section 103, at page 56, he will note that the bill provides the following:

> The Secretary of the Army may establish or develop Army installations and facilities by proceeding with constructions made necessary by changes in Army missions and responsibilities—

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. JAVITS. I think Senators will find that what I am about to ask is important. It could involve ultimately vast sums of money and matters of vast significance by the United States. This is not a light matter, it concerns the strategic arms race which has occasioned months of debate in this Chamber, and may again, I hope Senators will give me their close attention.

The section reads:

> The Secretary of the Army may establish or develop Army installations and facilities by proceeding with constructions made necessary by changes in Army missions and responsibilities which have been occasioned by: (a) unforeseen security considerations.

Then follow other specifications, including new weapons development. The one I am focusing on is "unforeseen security considerations."

Mr. President, these words are broad enough to justify the acquisition of new ABM sites. If, for example, the United States should enter into some form of SALT agreement with the Soviet Union and should adopt what has been widely speculated upon as the "National Command Authority" formula—that is, an ABM installation of great magnitude around Washington and one around Moscow—I see nothing in this language which would prevent the Secretary of Defense from going right ahead to do it without any further congressional authorization. He would have the difficulty probably of requiring appropriations as this section does not carry any real money. It carries $10 million. But, nonetheless, he would have authority; and perhaps could use money for missiles and other hardware already authorized or appropriated for use at other sites.

I have questioned the Senator from Washington about this, and I charge no secret motive of any kind by the committee. He tells me—and I take his word for it—that this has been the kind of provision which has been carried on for a long time to take care of contingencies which might occur under ordinary circumstances.

Within the framework of this enormous struggle over the ABM, within the framework of negotiations which are now going on with the Soviet Union—in other words, within the present circumstances—it would seem at first reading that this does represent an enormous grant of discretionary authority which could be used to fit the kind of situation that I have described. Moreover, taken literally the language of this section would allow the Secretary of the Army to move ahead with ABM sites aimed at "area defense," despite Senator JACKSON's own fine work to prevent this.

I think it is very essential, before any of us decide whether an amendment is deserved, that this matter be resolved. An amendment would be very simple. It would just confine the meaning of this to whatever has been authorized by law. But this is a new law, so I think it is essential that we have the views of the bill.

Mr. JACKSON. Mr. President, I am happy to respond to the questions posed by the able Senator from New York.

First, let me say that this section provides emergency authority for each of the three services. Identical language appears in the Navy and the Air Force titles of the bill.

The purpose of this language, which has been on the statute books for over a decade, is to deal with emergency situations. For example, in connection with our research work, the scientists could well come up with a new concept that would require the construction of a building forthwith. This particular section would make it possible for the Department of the Army to undertake that on-going research activity by building a facility to fulfill the findings made at that particular point in time. It is entirely of an emergency nature.

Another example: In connection with the military operation in 1962, as it pertained to the missile crisis in Cuba, it was necessary for the armed services to undertake various emergency activities, including construction of facilities. They operated under section 103 to do that on an emergency basis.

In any event, they would have to come to both the Armed Services and the Appropriations Committees, for reprograming of funds already available to them to accomplish construction under this section.

I assure the Senator from New York that under no circumstances could this section be used to develop a new weapons system, or to deploy a new weapons system. It is related directly and primarily to emergency situations. Certainly, the example that the Senator from New York gave—that is, the newspaper discussions about a possible tradeoff with the Soviet Union regarding their having ABM facilities in the area of Moscow and a similar arrangement for the District of Columbia in our case—would require specific authorization by Congress. There can be no question about that.

To corroborate the point legislatively, I may say to the Senator that, as he knows, the House did include in the bill on which we have just completed a conference a provision for the so-called area defense concept, which included a number of sites, including the District of Columbia. That was eliminated in conference.

I do not think there can be any doubt, under any circumstances, that they would be prohibited from utilizing the authority of this section to develop and deploy any kind of weapons system, whether it is ABM or any other. They could develop and do research work on systems but could not deploy a system under this authority.

Mr. JAVITS. If the Senator would allow me to make two observations——

Mr. JACKSON. I want to emphasize that it has been on the statute books for over 10 years.

Mr. JAVITS. I understand that, and I said that myself; but I was looking forward to the situation in which we stand now.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. BROOKE. Has the $10 million authorization always been in the bill in the last decade?

Mr. JACKSON. I am advised that it has varied anywhere from $5 to $10 million—$5 million, $8 million, $10 million. But it has been $10 million for several years.

Mr. BROOKE. Is it clear that under this authorization the Secretary of Defense could not expand to area defense?

Mr. JACKSON. No question whatever. I can assure the distinguished Senator from Massachusetts that there is no authority under section 103 or any other section of this bill to undertake any such activity.

Mr. STENNIS. Mr. President, will the Senator yield.

Mr. JAVITS. I am not quite through.

Mr. STENNIS. Mr. President, will the Senator yield on that point?

Mr. JAVITS. I yield.

Mr. STENNIS. Supplementing what the Senator from Washington has said, in years past I was chairman of the subcommittee that handled this bill for many years. A similar provision has been here all these years, and it is a necessary one. Some years very little has been used under it, as I recall. There is no question about this. It is a needed, necessary, regular routine authorization. Further, as the Senator has said, we had this real issue up in the conference on the procurement bill, which has been agreed to, and the conference report has already been approved this afternoon by the House. That bill came back here exactly as it left the Senate so far as the ABM, area defense, or anything else like that is concerned. There is no question about it, it will be before this body this week.

Mr. JAVITS. I should like to ask the Senator another question. The $10 million figure on page 56, line 20, is that $10

million an authorization limitation on the whole section or, if not, what is it a limitation on?

Mr. JACKSON. We confine the limit to section 103.

Mr. JAVITS. What I meant is, is the $10 million ceiling for anything other than under this section?

Mr. JACKSON. That is right.

Mr. JAVITS. That is correct. I see. So that it cannot exceed $10 million in authorizations in terms of cost?

Mr. JACKSON. To follow up on the Senator's point, on the top of page 57, where it reads:

This authorization will expire as of September 30, 1971, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to that date.

They have to notify us of any activity under the section.

Mr. JAVITS. I should like very much, because we are certainly not anxious to create any big problems if there are none, to deal with the problem in a congenial way to all concerned. We have had some bitter experience with interpretations made on the floor. We could write a few books about assurances of managers of bills. For example, on the Gulf of Tonkin resolution and what was ultimately done with the Gulf of Tonkin resolution, in view of its plain words of the legislation. It occurred to my executive assistant Mr. Lakeland, who is helping me follow this bill, and I think it is a sound inquiry, in light of the situation, so that I am pursuing it. I think it will be a service to the Senate and the country. I submit this also to my colleagues, like the Senator from Kentucky (Mr. COOPER) and others, who have been leaders in this fight for months.

Would the Senator from Washington feel it was appropriate and fair to use the word he used—to wit, "emergency" and to say, "made necessary by emergency changes in Army missions, and so forth," thereby implementing this discussion and at least adding something to the bill to represent our acceptance of the word used by the Senator from Washington as the reason why we should not feel such a broad grant of authority was necessary.

Mr. JACKSON. May I respond to that——

Mr. JAVITS. Yes.

Mr. JACKSON. By saying that we did make it clear that under the provisions of section 103, which we have been discussing——

Mr. JAVITS. Fine.

Mr. JACKSON. There is authority to take advantage of any findings in the area of research, so as to authorize under this provision construction of a building necessary to support that research activity. I would point out that this is not an emergency but a matter of urgent consideration. If they should have to wait to go through the whole authorization process, invaluable time would be lost. Therefore, if it were confined to any emergency situation in every situation, I think it would work to the disadvantage of some of our important research activities.

I want to emphasize again that there is absolutely no authority under section 103 for the Army to undertake any kind of construction program that would involve deployment, of any new system.

Mr. JAVITS. If the Senator would allow me to make one suggestion here—I am submitting this to the Senator because I want to proceed in a way congenial to all concerned—perhaps we could solve the problem by inserting the word "emergency," in connection with "unforeseen security considerations," and instead of saying "unforeseen," say "emergency security considerations."

In other words, what I am trying to do is to take the statement of the Senator himself and, by making some minor change, show that we have accepted his statement as giving the necessary assurance; making it clear that it does not apply to strategic weapons systems.

Mr. JACKSON. The Senator would say that this authority cannot be used, for example, to deploy——

Mr. JAVITS. A weapons system.

Mr. JACKSON. A weapons system.

Mr. JAVITS. I would find that acceptable.

Mr. JACKSON. That is something else, but I would like to say that I would prefer to go over this very carefully, so that we do not tie our hands here in connection with an emergency development. I cite the Cuban missile crisis.

Mr. JAVITS. The Senator did, yes.

Mr. JACKSON. When President Kennedy had to use his authority——

Mr. JAVITS. Right.

Mr. JACKSON (continuing). And actually build facilities in the movement of troops in October of 1962, does the Senator not see, because of that development. I would rather think this through a little, and then come up with some limiting language at another time. I would rather not do so on the floor.

Mr. JAVITS. I do not know when else we can do it in view of the fact that the bill is now pending before us.

Mr. JACKSON. If I am here when this bill comes up next year——

Mr. JAVITS. Oh, well, I am sorry, but I do not think we want to do that. But I do not want to present the Senator with an amendment at this minute. Other Senators have amendments to offer. I have the explanation now, and I will do my best to work something out which will be agreeable.

Mr. DOMINICK. Mr. President, I think the colloquy the Senator just had with the Senator from Washington is crystal clear as to the intent, but let me give some examples where the word "emergency" would not be used.

Let us suppose, for example, that there is a further reduction and consolidation in the Armed Forces this year, and all of a sudden, in order to put this together, the Secretary of Defense decides he has to consolidate some bases and provide more construction on a base, in order to take care of the concentration of population which has not been provided for in the basic bill. That is one example.

Suppose we have a NATO agreement, in view of a Soviet threat, to decide as to how we had better boost our forces. We might have to take some emergency action with respect to that. Of course, that would not be emergency action but real action with respect to the deployment of troops, and for construction overseas, whatever it may be. This is designed to give that flexibility, still limited in amounts and still with the requirement that the Army has to inform the committees before they take irrevocable action on these particular items. So, under those circumstances, although I can see that the Senator is legitimately concerned with the breadth of the language, it would seem to me that this colloquy has ironed out those problems.

Mr. JAVITS. I have already made clear my position. I shall desist for the moment and allow other Senators to go forward. I shall see, in the meantime, if I cannot come up with something that will be mutually agreeable to those who feel as I do, and the manager of the bill.

Mr. FONG. Mr. President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER (Mr. EAGLETON). The amendment will be stated.

The legislative clerk read as follows:

On page 104, line 6, after the comma after '1972' insert the following "and on the island of Kahoolawe, State of Hawaii,".

Mr. FONG. Mr. President, I am offering an amendment, on page 104, line 6 of the bill, after the comma after "1972", to insert the following: "and on the island of Kahoolawe, State of Hawaii." It goes to that paragraph in the bill that states:

The Department of Navy is directed to terminate all weapons range activities conducted on or near the eastern coast of Culebra and the bays within three nautical miles of the eastern coast no later than January 1, 1972, unless the President of the United States determines that the national security of the United States requires the continuation of such activities beyond this date.

To this directive to terminate target activities, I have added the island of Kahoolawe. The island of Kahoolawe is 45 miles long and 6 miles southwest of the island of Maui.

By Executive Order 10346, it was set aside as a bombing range by the President. This Executive order contemplates that Kahoolawe should be returned to civilian use and that certain conservation measures should be taken on the island; namely, to protect it from erosion, to see that the cloven hoof animals do not exceed 200, and to maintain the island so that at the time it is restored to Hawaii, it be a habitable island.

In the amendment, I provide that the island of Kahoolawe be treated the same as the island of Culebra so that if, in the discretion of the President after January 1, 1972, he feels the national security of the United States requires the continuation of that island as a bombing target, it can be used in that manner.

The reason I bring this to the attention of the Senate is that I have received numerous requests from the people on the island of Maui relative to the cessation of the bombing of Kahoolawe. The

people of Maui are very fearful that the bombs dropped on that island by U.S. warships, Navy, and Air Force planes may some day hit them. In fact, a 500-pound live bomb fell on the island of Maui on September 29, 1969. The bombs that have landed on Kahoolawe have constantly shaken the people on Maui. The shocks have been felt 30 miles away. Persons have been shaken and concrete slabs have been cracked.

Apropos of this, in 1965 two Navy planes were trying to bomb Kaula, just 19 miles from the island of Niihau in Hawaii, and they dropped eight 250-pound bombs on the island of Niihau. So, if the Navy navigators and Navy aviators can make a mistake 19 miles away from an inhabited island, they could certainly make a mistake and bomb the island of Maui, only 6 miles from Kahoolawe.

I have received a resolution from the county of Maui asking that the island be spared from bombing.

I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, Sec. 1-2 of the Charter of the County of Maui states that the County of Maui includes the island of Kahoolawe; and

Whereas, the recent bombing practice held by the United States Navy on the island of Kahoolawe created concussions which affected residents in various areas of the island of Maui; and

Whereas, there is serious danger that stray bombs from these bombing practices could destroy life and property on the island of Maui; and

Whereas, there are other unpopulated islands in the Pacific Ocean which could be used for such bombing practices; now, therefore, Be it

*Resolved*, by the Council of the County of Maui that it does hereby respectfully request the United States Navy to seriously consider selecting an isolated island in the Pacific Ocean for bombing practices and to return Kahoolawe to productive use such as cattle raising and to provide fishing grounds for local fishermen; and Be it further

*Resolved*, that a certified copy of this resolution be transmitted to the United States Navy, Pearl Harbor, Hawaii.

Mr. FONG. Mr. President, I also ask unanimous consent that Executive Order 10346 be printed in the RECORD.

There being no objection, the Executive order was ordered to be printed in the RECORD, as follows:

EXECUTIVE ORDER 10436

RESERVING KAHOOLAWE ISLAND, TERRITORY OF HAWAII, FOR THE USE OF THE UNITED STATES FOR NAVAL PURPOSES AND PLACING IT UNDER THE JURISDICTION OF THE SECRETARY OF THE NAVY

Whereas it appears necessary and in the public interest that the Island of Kahoolawe, Territory of Hawaii, which comprises an area of approximately forty-five square miles, and which forms a part of the public lands ceded and transferred to the United States by the Republic of Hawaii under the joint resolution of annexation of July 7, 1898, 30 Stat. 750, be taken and reserved for the use of the United States for naval purposes, except that portion comprising an area of 23.3 acres, more or less, heretofore taken for lighthouse purposes by Proclamation No. 1827 of the President of the United States dated February 3, 1928 (45 Stat. 2937); and

Whereas it is deemed desirable and in the public interest that provision be made for the conducting of a program of soil conservation on the island while the reservation made hereby is in force, and that the area within such reservation be restored to a condition reasonably safe for human habitation when it is no longer needed for naval purposes:

Now, Therefore, by virtue of the authority vested in me by section 91 of the act of April 30, 1900, 31 Stat. 159, as amended by section 7 of the act of May 27, 1910, 36 Stat. 447, it is ordered as follows:

1. The Island of Kahoolawe, Territory of Hawaii, except that portion taken by the United States for lighthouse purposes by proclamation No. 1827 of February 3, 1928, is hereby taken and reserved for the use of the United States for naval purposes, and is placed under the jurisdiction of the Secretary of the Navy.

2. The Secretary of the Navy shall, within a reasonable period following the date of this order, eradicate from the island all eleven-hooved animals, or shall within such period and at all times thereafter while the area hereby reserved or any portion thereof is under his jurisdiction take such steps as may be necessary to assure that the number of such animals on the island at any given time shall not exceed two hundred.

3. The Territory of Hawaii shall have the right, at its expense and risk, at reasonable intervals to enter and inspect the island to ascertain the extent of forest cover, erosion, and animal life thereon, and to sow or plant suitable grasses and plants under a program of soil conservation: *Provided*, that such entrance and inspection shall not interfere unreasonably with activities of the Department of the Navy or of the United States Coast Guard.

4. When there is no longer a need for the use of the area hereby reserved, or any portion thereof, for naval purposes of the United States, the Department of the Navy shall so notify the Territory of Hawaii, and shall, upon reasonable request of the Territory, render such area, or such portion thereof, reasonably safe for human habitation, without cost to the Territory.

Mr. FONG. Mr. President, I ask that the island of Kahoolawe be given the same consideration as the island of Culebra. I do not think that I am asking too much. I am only asking that the committee take a look at what is happening out there in the Pacific and see whether there are alternate sites that could be used by the Navy to practice target bombing.

The island of Culebra has been given this exemption if the President should decide in the national interest that it is not necessary that we use the island of Culebra.

I am only asking that we be given the same consideration. Let us take a look at this matter.

I would hope that the distinguished Senator from Washington would accept the amendment and see what might be done.

Mr. JACKSON. Mr. President, I would like to accept the amendment. But I think I can say on behalf of the subcommittee that we do not have any evidence in regard to this matter. This is the first I have heard of it. I understand the concern of the Senator. I would be very happy, as part of this investigation, to ask the Navy to get right on this matter.

The difference between this situation and the one in subsection (c), page 104, is that in the case of the eastern end of Culebra, the language and the date that was set was worked out with the Navy. The Navy plans to get out of that area by that time. We simply set the time as it was given to us. That was one of their preliminary findings.

We do not have any information regarding the special problem adjacent to the island of Maui.

I can assure my good friend the Senator from Hawaii that we will ask the Navy to look into this matter forthwith. However, I hesitate to accept the amendment to set a cutoff date here when we have no word from the Navy as to their position on this matter.

I assure the Senator that we will go into this matter deliberately. I feel sure that I can speak for the members of the subcommittee in that regard.

Mr. FONG. Mr. President, since the distinguished Senator from Washington has assured me that he will look into this matter and will give it his utmost consideration, I am willing to withdraw my amendment. I hope that the committee really looks into the matter and asks the Navy to see whether it can find alternative sites and see what can be done in the matter.

Mr. JACKSON. Mr. President, this will be done. The Senator will be firmly advised of the action taken by the subcommittee with the appropriate responses from the Navy. We will look into it at the same time that we take a look at the report on Culebra, which comes from the Navy which must be submitted to Congress by April 1

Mr. FONG. Mr. President, I thank the distinguished Senator from Washington.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn. The bill is open to further amendment.

Mr. JAVITS. Mr. President, I send to the desk an amendment on behalf of myself and Senators COOPER, BROOKE, and HATFIELD.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

On page 57, after line 5 insert:

*Provided*, That this section may not be used as authority to initiate the deployment of any strategic weapons system at any site not otherwise specifically authorized by law.

Mr. JAVITS. Mr. President, I shall just be a moment. I have tried to present what the Senator himself says with respect to the ambit he wishes this amendment to touch.

Mr. JACKSON. Mr. President, I am happy to take the amendment to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 17604) was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Maine (Mr. MUSKIE), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from Alabama (Mr. SPARKMAN), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), the Senator from Alaska (Mr. GRAVEL), the Senator from North Carolina (Mr. JORDAN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Missouri (Mr. SYMINGTON), the Senator from Ohio (Mr. YOUNG) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Vermont (Mr. AIKEN), the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Texas (Mr. TOWER), are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from New York (Mr. GOODELL) is detained on official business.

If present and voting, the Senator from New York (Mr. GOODELL), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Maine (Mrs. SMITH), the Senator from Illinois (Mr. SMITH), and the Senator from Texas (Mr. TOWER) would each vote "yea."

The result was announced—yeas 73, nays 0, as follows:

[No. 338 Leg.]

So the bill (H.R. 17604) was passed.

Mr. JACKSON. Mr. President, I move that the Senate insist on its amendments and request a conference with the House thereon, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. JACKSON, Mr. STENNIS, Mr. ERVIN, Mr. CANNON, Mr. BYRD of Virginia, Mr. THURMOND, Mr. TOWER, and Mr. DOMINICK conferees on the part of the Senate.

Mr. MANSFIELD. Mr. President, once again the Senate owes a deep debt of gratitude to the distinguished Senator from Washington (Mr. JACKSON). His handling of this year's military construction authorization equalled the splendid task he has performed in steering this highly inportant measure through the Senate in years past.

Senator JACKSON is to be commended. He is to be commended for his articulate presentation, for his strong advocacy and for his deep understanding. To this measure, Senator JACKSON lent all of the many outstanding legislative skills he applies to every task he undertakes in this body. We are grateful.

The Senate is grateful as well to Senator THURMOND. He, too, played a vital role in assuring the overwhelming success of this vital authorization. As the ranking minority members of the subcommittee, he cooperated and assisted with characteristic willingness and great ability.

To the Senate also, goes my personal thanks. Each Member joined to assure the efficient disposition of the military construction proposal with full regard for the views of each Member.

IMPROVING THE PORTSMOUTH NAVAL SHIPYARD

Mr. MCINTYRE. Mr. President, I am pleased by the action being taken today to pass H.R. 17604, the military construction bill.

The distinguished Senator from Washington (Mr. JACKSON) the chairman of the Subcommittee on Military Construction of the Armed Services Committee, has given his expected capable leadership in bringing forth a realistic and meaningful bill to provide for this important part of our defense structure.

I am particularly pleased that this important legislation contains $5,685 million for improvements at the Portsmouth Naval Shipyard of Portsmouth, N.H.

The Portsmouth shipyard is in its 170th year of service to the Nation. It has been an integral part of the Nation's defense since 1815.

The shipyard provides the Navy with a competent, dedicated, well-staffed installation to give undergirding to our naval strength. The deterrent power of our Navy is one of the keystones of our Nation's safeguard against war. Without the kind of deterrent the Portsmouth facility is capable of efficiently and expeditiously servicing, our defense would suffer.

As we are all well aware, the shipyard has been threatened for many years with closure. It has been recently announced that the closure order has been rescinded. I am naturally pleased by this announcement. Those of us representing northern New England have worked long and hard to see that the shipyard stays open.

The action we are taking in H.R. 17604 does not directly relate to the closure of the shipyard. The funds we are authorizing here are devoted to providing needed improvements in the drydock facilities, the engineering management offices, and high pressure steam services outlets and pure water processing and distribution at the installations. This action is necessary to enable the shipyard to carry out presently assigned and vital projects irrespective of whether the shipyard does or does not close sometime in the future.

I have appreciated the chance to work with the Senator from Washington in assuring that these vital funds for the Portsmouth shipyard are included in this authorization.

I am sure that this legislation will have the wholehearted support of the Senate because of the extremely important provisions it covers in providing for the Nation's defense.

---

## CONTINUANCE OF CIVIL GOVERNMENT FOR THE TRUST TERRITORY OF THE PACIFIC ISLANDS

Mr. JACKSON. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 3479.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3479) to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands which was to strike out all after the enacting clause, and insert:

That section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is amended by deleting "for fiscal year 1969, $5,000,000 in addition to the sums heretofore appropriated, for fiscal year 1970, $50,000,000 and for fiscal year 1971, $50,000,000" and inserting in lieu thereof the following: "for each of the fiscal years 1971, 1972, 1973, 1974, and 1975, $60,000,000".

Mr. JACKSON. Mr. President, I move that the Senate concur in the amendment of the House with an amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment of the Senator from Washington will be stated.

The legislative clerk read the amendment, as follows:

On lines 6 and 7, strike "1973, 1974, and 1975," and insert "and 1973,".

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Washington.

The motion was agreed to.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 15073) to amend the Federal Deposit Insurance Act to require insured banks to maintain certain records, to require that certain transactions in U.S. currency be reported to the Department of the Treasury, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. PATMAN, Mr. BARRETT, Mrs. SULLIVAN, Mr. REUSS, Mr. WIDNALL, Mrs. DWYER, and Mr. WYLIE were appointed managers on the part of the House at the conference.

## ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (H.R. 14373) to authorize the Secretary of the Navy to convey to the city of Portsmouth, State of Virginia, certain lands situated within the Crawford urban renewal project (Va–53 )in the city of Portsmouth, in exchange for certain lands situated within the proposed southside neighborhood development project.

## EQUAL EMPLOYMENT OPPORTUNITIES ENFORCEMENT ACT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 1153, S. 2453. I do this so that it will become the pending business.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read the bill by title, as follows: S. 2453, a bill to further promote equal employment opportunities for American workers.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Equal Employment Opportunities Enforcement Act of 1970".

SEC. 2. Section 701 of the Civil Rights Act of 1964 (78 Stat. 253; 42 U.S.C. 2000e) is amended as follows:

(1) In subsection (a) insert "governments, governmental agencies, political subdivisions," after the word "individuals".

(2) In subsection (b) strike out all before *"Provided further"*, and insert in lieu thereof the following:

"(b) The term 'employer' means a person engaged in an industry affecting commerce who has eight or more employees for each working day in each of twenty or more calendar weeks in the current or preceding calendar year, and any agent of such a person, but such term does not include (1) the United States, a corporation wholly owned by the Government of the United States, an Indian tribe or any department or agency of the District of Columbia subject by statute to procedures of the competitive service (as defined in section 2102 of title 5 of the United States Code), (2) a bona fide private membership club (other than a labor oragnization) which is exempt from taxation under section 501(c) of the Internal Revenue Code of 1954: *Provided*, That during the first year after the date of enactment of the Equal Employment Opportunities Enforcement Act of 1970, persons having fewer than twenty employees (and their agents) shall not be considered employers, and during the second year after such date, persons having fewer than fifteen employees (and their agents) shall not be considered employers:"

(3) In subsection (c) beginning with the semicolon strike out through the word "assistance".

(4) In subsection (e) strike out between "(A)" and "and such labor organization", and insert in lieu thereof "twenty or more during the first year after the date of enactment of the Equal Employment Opportunities Enforcement Act of 1970, (B) fifteen or more during the second year after such date, or (C) eight or more thereafter,"

(5) At the end of subsection (h) insert before the period a comma and the following: "and further includes any governmental industry, business, or activity".

SEC. 3. Section 702 of the Civil Rights Act of 1964 (78 Stat. 253, 42 U.S.C. 2000e–2) is amended to read as follows:

"EXEMPTION

"SEC. 702. This title shall not apply to an employer with respect to the employment of aliens outside any State, or to a religious corporation, association, educational institution, or society with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its religious activities.

SEC. 4. (a) Subsections (a) through (e) of section 706 of the Civil Rights Act of 1964 (78 Stat. 259; 42 U.S.C. 2000e–5(a)–(d)) are amended to read as follows:

"(a) The Commission is empowered, as hereinafter provided, to prevent any person from engaging in any unlawful employment practice as set forth in section 703 or 704 of this title.

"(b) Whenever a charge is filed by or on behalf of a person claiming to be aggrieved, or by an officer or employee of the Commission upon the request of any person claiming to be aggrieved, alleging that an employer, employment agency, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs, has engaged in an unlawful employment practice, the Commission shall serve a copy of the charge on such employer, employment agency, labor organization, or joint labor-management committee (hereinafter referred to as the 'respondent') as soon as practicable thereafter and shall make an investigation thereof. Charges shall be in writing, signed under oath, and shall contain such information and be in such form as the Commission requires. Charges shall not be made public by the Commission. If the Commission determines after such investigation that there is not reasonable cause to believe that the charge is true, it shall dismiss the charge and promptly notify the person claiming to be aggrieved and the respondent of its action. If the Commission determines after such investigation that there is reasonable cause to believe that the charge is true, the Commission shall endeavor to eliminate any such alleged unlawful employment practice by informal methods of conference, counciliation, and persuasion. Nothing said or done during and as a part of such informal endeavors may be made public by the Commission, its officers or employees, or used as evidence in a subsequent proceeding without the written consent of the persons concerned. Any officer or employee of the Commission who makes public information in violation of this subsection shall be fined not more than $1,000 or imprisoned for not more than one year, or both. The Commission shall make its determination on reasonable cause as promptly as possible and, so far as practicable, not later than one hundred and twenty days from the filing of the charge or, where applicable under subsection (c) or (d), from the date upon which the Commission is authorized to take action with respect to the charge.

"(c) In the case of a charge filed by or on behalf of a person claiming to be aggrieved alleging an unlawful employment practice occurring in a State, or political subdivision of a State, which has a State or local law prohibiting the unlawful employment practice alleged and establishing or authorizing a State or local authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof, the Commission shall take no action with respect to the investigation of such charge before the expiration of sixty days after proceedings have been commenced under the State or local law, unless such proceedings have been earlier terminated: *Provided*, That such sixty-day period shall be extended to one hundred and twenty days during the first year after the effective date of such State or local law. If any requirement for the commencement of such proceedings is imposed by a State or local authority other than a requirement of the filing of a written and signed statement of the facts upon which the proceeding is based, the proceeding shall be deemed to have been commenced for the purposes of this subsection at the time such statement is sent by registered or certified mail to the appropriate State or local authority.

"(d) In the case of any charge filed by an officer or employee of the Commission alleging an unlawful employment practice occurring in a State or political subdivision of a State which has a State or local law prohibiting the practice alleged and establishing or authorizing a State or local authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof the Commission shall, before taking any action with respect to such charge, notify the appropriate State or local officials and, upon request, afford them a reasonable time, but not less than sixty days: *Provided*, That such sixty-day period shall be extended to one

hundred and twenty days during the first year after the effective day of such State or local law, unless a shorter period is requested, to act under such State or local law to remedy the practice alleged.

"(e) A charge under this section shall be filed within one hundred and eighty days after the alleged unlawful employment practice occurred and a copy shall be served upon the person against whom such charge is made as soon as practicable thereafter, except that in a case of an unlawful employment practice with respect to which the person aggrieved has initially instituted proceedings with a State or local agency with authority to grant or seek relief from such practice or to institute criminal proceedings with respect thereto upon receiving notice thereof, such charge shall be filed by or on behalf of the person aggrieved within three hundred days after the alleged unlawful employment practice occurred, or within thirty days after receiving notice that the State or local agency has terminated the proceedings under the State or local law, whichever is earlier, and a copy of such charge shall be filed by the Commission with the State or local agency.

"(f) If the Commission determines after attempting to secure voluntary compliance under subsection (b) that it is unable to secure from the respondent a conciliation agreement acceptable to the Commission, which determination shall not be reviewable in any court, the Commission shall issue and cause to be served upon the respondent a complaint stating the facts upon which the allegation of the unlawful employment practice is based, together with a notice of hearing before the Commission, or a member or agent thereof, at a place therein fixed not less than five days after the serving of such complaint. Related proceedings may be consolidated for hearing.

"(g)(1) A respondent shall have the right to file an answer to the complaint against him and with the leave of the Commission, which shall be granted whenever it is reasonable and fair to do so, may amend his answer at any time. Respondents and the person aggrieved shall be parties and may appear at any stage of the proceedings, with or without counsel. After the Commission issues a complaint it shall, upon application by the person aggrieved, appoint an attorney for such person in all cases in which it determines that the aggrieved party is unable to pay for an attorney without undue hardship. The Commission may grant such other person a right to intervene or to file briefs or make oral arguments as amicus curiae or for other purposes, as it considers appropriate. All testimony shall be taken under oath and shall be reduced to writing. Any such proceeding shall, so far as practicable, be conducted in accordance with the rules of evidence applicable in the district courts of the United States under the Rules of Civil Procedure for the district courts of the United States.

"(2) After the Commission issues a complaint, it may, upon application by the person aggrieved, compensate such person for reasonable expenses in connection with the preparation for the hearing and in connection with participation in the hearings, including the cost of expert witness fees, transcripts, and copying. Not more than $1,000 will be allocated in any single proceeding to carry out the provisions of this paragraph. The Commission may perform the services for which the aggrieved party would otherwise seek reasonable expenses under this subsection.

"(h) If the Commission finds that the respondent has engaged in an unlawful employment practice, the Commission shall state its findings of fact and shall issue and cause to be served on the respondent and the person or persons aggrieved by such unlawful employment practice an order requiring the respondent to cease and desist from such unlawful employment practice and to take such affirmative action, including reinstatement or hiring of employees, with or without backpay (payable by the employer, employment agency, or labor organization, as the case may be, responsible for the unlawful employment practice), and including payment of attorney's fees pursuant to section 706(x), if the person aggrieved was represented by counsel in the proceedings before the Commission, as will effectuate the policies of this title: *Provided,* That interim earnings or amounts earnable with reasonable diligence by the aggrieved person or persons shall operate to reduce the backpay otherwise allowable. Such order may further require such respondent to make reports from time to time showing the extent to which he has complied with the order. If the Commission finds that the respondent has not engaged in any unlawful employment practice, the Commission shall state its findings of fact and shall issue and cause to be served on the respondent and the person or persons alleged in the complaint to be aggrieved an order dismissing the complaint.

"(i) After a charge has been filed and until the record has been filed in court as hereinafter provided, the proceeding may at any time be ended by agreement between the Commission and the respondent for the elimination of the alleged unlawful employment practice, approved by the Commission, and the Commission may at any time, upon reasonable notice, modify or set aside, in whole or in part, any finding or order made or issued by it. An agreement approved by the Commission shall be enforceable under subsections (l) through (n) and the provisions of those subsections shall be applicable to the extent appropriate to a proceeding to enforce an agreement.

"(j) Finding of fact and orders made or issued under subsections (h) or (i) of this section shall be determined on the record. Sections 554, 555, 556, and 557 of title 5 of the United States Code shall apply to such proceedings.

"(k) Any party aggrieved by a final order of the Commission granting or denying in whole or in part the relief sought may obtain a review of such order in any United States court of appeals for the circuit in which the unlawful employment practice in question is alleged to have occurred or in which such party resides or transacts business, or in the Court of Appeals for the District of Columbia Circuit, by filing in such court within sixty days after the service of such order, a written petition praying that the order of the Commission be modified or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Commission and to any other party to the proceeding before the Commission, and thereupon the Commission shall file in the court the record in the proceeding as provided in section 2112 of title 28, United States Code. Upon the filing of the petition the court shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to grant to the petitioner or any other party, including the Commission, such temporary relief or restraining order as it deems just and proper, and to make and enter upon the pleadings, testimony, and proceedings set forth in such record a decree affirming, modifying, or setting aside in whole or in part, the order of the Commission and enforcing the same to the extent that such order is affirmed or modified. Any party to the proceeding before the Commission shall be permitted to intervene in the court of appeals. The commencement of proceedings under this subsection shall not, unless ordered by the court, operate as a stay of the order of the Commission. No objection that has not been urged before the Commission, its member, or agent shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The findings of the Commission with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any party shall apply to the court for leave to adduce additional evidence and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the hearing before the Commission, its member, or its agent, the court may order such additional evidence to be taken before the Commission, its member, or its agent, and to be made a part of the record. The Commission may modify its findings as to the facts, or make new findings, by reason of additional evidence so taken and filed, and it shall file such modified or new findings, which findings with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with it, the jurisdiction of the court shall be exclusive and its judgment and decree shall be final except that the same shall be subject to review by the Supreme Court of the United States, as provided in section 1254 of title 28, United States Code. Petitions filed under this subsection shall be heard expeditiously.

"(l) The Commission may petition any United States court of appeals for the circuit in which the unlawful employment practice in question occurred or in which the respondent resides or transacts business, for the enforcement of its order and for appropriate temporary relief or restraining order, by filing in such court a written petition praying that its order be enforced and for appropriate temporary relief or restraining order. The Commission shall file in court with its petition the record in the proceeding as provided in section 2112 of title 28, United States Code. A copy of such petition shall be forthwith transmitted by the clerk of the court to the parties to the proceeding before the Commission. Upon the filing of such petition, the court shall have jurisdiction of the proceeding and of the question determined therein and shall have power to grant to the Commission, or any other party, such temporary relief, restraining order, or other order as it deems just and proper, and to make and enter upon the pleadings, testimony, and proceedings set forth in such record a decree affirming, modifying, or setting aside in whole or in part, the order of the Commission and enforcing the same to the extent that such order is affirmed or modified. Any party to the proceeding before the Commission shall be permitted to intervene in the court of appeals. No objection that has not been urged before the Commission, its members, or agent shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The findings of the Commission with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any party shall apply to the court for leave to adduce additional evidence and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the hearing before the Commission, its member, or its agent, the court may order such additional evidence to be taken before the Commission its members, or its agent, and to be made a part of the record. The Commission may modify its finding as to the facts, or make new findings, by reason of additional evidence so taken and filed, and it shall file such modified or new findings, which find-

ings with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with it the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the same shall be subject to review by the Supreme Court of the United States as provided in section 1254 of title 28, United States Code. Petitions filed under this subsection shall be heard expeditiously.

"(m) If no petition for review, as provided in subsection (k), is filed within sixty days after service of the Commission's order, the Commission's findings of fact and order shall be conclusive in connection with any petition for enforcement which is filed by the Commission under subsection (l) after the expiration of such sixty-day period. The clerk of the court of appeals in which such petition for enforcement is filed shall forthwith enter a decree enforcing the order of the Commission and shall submit a copy of such decree to the Commission, the respondent named in the petition, and to any other parties to the proceeding before the Commission.

"(n) If within ninety days after service of the Commission's order, no petition for review has been filed as provided in subsection (k), and the Commission has not sought enforcement of its order as provided in subsection (l), any person entitled to relief under the Commission's order may petition for a decree enforcing the order in the United States court of appeals for the circuit in which the unlawful employment practice in question occurred, or in which a respondent named in the order resides or transacts business. The provisions of subsection (m) shall apply to such petitions for enforcement.

"(o) The Attorney General shall conduct all litigation to which the Commission is a party in the Supreme Court of the United States pursuant to this title. All other litigation affecting the Commission, or to which it is a party, shall be conducted by attorneys appointed by the Commission.

"(p) Whenever a charge is filed with the Commission pursuant to subsection (b) and the Commission concludes on the basis of a preliminary investigation that prompt judicial action is necessary to preserve the power of the Commission to grant effective relief in the proceeding, the Commission shall, after it issues a complaint, bring an action for appropriate temporary or preliminary relief pending its final disposition of such charge, or until the filing of a petition under subsections (k), (l), (m), or (n) of this section, as the case may be, in the United States district court for any judicial district in the State in which the unlawful employment practice concerned is alleged to have been committed, or the judicial district in which the aggrieved person would have been employed but for the alleged unlawful employment practice, but, if the respondent is not found within any such judicial district, such an action may be brought in the judicial district in which the respondent has his principal office. For purposes of sections 1404 and 1406 of title 28, United States Code, the judicial district in which the respondent has his principal office shall in all cases be considered a judicial district in which such an action might have been brought. Upon the bringing of any such action, the district court shall have jurisdiction to grant such injunctive relief or temporary restraining order as it deems just and proper, notwithstanding any other provision of law. Rule 65 of the Federal Rules of Civil Procedure, except paragraph (a) (2) thereof, shall govern proceedings under this subsection.

(q) (1) If a charge filed with the Commission pursuant to subsection (b) is dismissed by the Commission, or if within sixty days from the filing of such charge or the expiration of any period of reference under subsection (c) or (d), whichever is later, the Commission has neither issued a complaint under subsection (f) nor entered into an agreement under subsection (f) or (i) which is acceptable to the Commission and to which the person aggrieved is a party, the Commission shall so notify the person aggrieved and such person may, within thirty days thereafter, bring a civil action against the respondent named in the charge. Upon application by the complainant and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the action without the payment of fees, costs, or security. Upon the commencement of such civil action, the Commission shall be divested of jurisdiction over the proceeding and shall take no further action with respect thereto; except that, upon timely application, the court in its discretion may permit the Commission to intervene in such civil action if the Commission certifies that the case is of general public importance.

"(2) The right of an aggrieved person to bring a civil action under paragraph (1) of this subsection shall terminate once the Commission has issued a complaint under subsection (f), or has entered into an agreement under subsection (f) or (i) which is acceptable to the Commission and to which the person aggrieved is a party: *Provided*, That if after issuing a complaint the Commission enters into an agreement under subsection (i) without the agreement of the person aggrieved, or has not issued an order under subsection (h) within a period of one hundred and eighty days of the issuance of the complaint, the Commission shall so notify the person aggrieved and a civil action may be brought against the respondent named in the charge at any time prior to the Commission's issuance of an order under subsection (h) or, in the case of an agreement under subsection (i) to which the person aggrieved is not a party, within thirty days after receiving notice thereof from the Commission: *Provided further*, That where there has been no agreement under subsection (i), if the person aggrieved files a civil action against the respondent during the period from one hundred and eighty days to one year after the issuance of the complaint such person shall notify the Commission of such action and the Commission may petition the court not to proceed with the suit. The court may dismiss or stay any such action upon a showing that the Commission has been acting with due diligence on the complaint, that the Commission anticipates the issuance of an order under subsection (h) within a reasonable period of time, that the case is exceptional, and that extension of the Commission's jurisdiction is warranted.

"(3) With respect to any charge filed prior to the effective date of the Equal Employment Opportunities Enforcement Act of 1970, the Commission, if unable to secure a conciliation agreement from the respondent after determining that there is reasonable cause to believe that the charge is true, may bring a civil action against the respondent named in the charge."

(b) Subsection (f) through (k) of section 706 of such Act and references thereto are redesignated as subsections (r) through (w), respectively.

(c) Section 706(u) and (v) of such Act, as redesignated by this section, are amended (1) by striking out "(e)" and inserting in lieu thereof "(q)", and (2) by striking out "(l)" and inserting in lieu thereof "(u)".

(d) Section 706(w) of such Act, as redesignated by this section, is amended by inserting after the word "discretion," the words "and, in the case of any action or proceeding before the Commission, the Commission, in its discretion,", and by adding at the end thereof the following new sentence: "Whenever the person aggrieved has an attorney appointed by the Commission and the Commission finds that the respondent has not engaged in an unlawful employment practice the Commission shall pay a reasonable attorney's fee to the person aggrieved."

Sec. 5. Section 707 of the Civil Rights Act of 1964 is amended by adding at the end thereof the following new subsection:

"(c) (1) Effective three years after the date of enactment of the Equal Employment Opportunities Enforcement Act of 1970, the functions of the Attorney General under this section shall be transferred to the Commission if the Attorney General and at least three of the members of the Commission certify to the Congress that the Commission has the capability and the intention to carry out the functions set forth in this section and that a transfer under this subsection would contribute to carrying out the objectives of title VII of this Act.

"(2) In all suits commenced prior to the date any transfer occurs, proceedings shall continue without abatement, all court orders and decrees shall remain in effect, and the Commission shall be substituted as a party for the United States of America or the Attorney General, as appropriate."

Sec. 6. (a) Subsection (b), (c), and (d) of section 709 of the Civil Rights Act of 1964 (78 Stat. 263; 42 U.S.C. 2000e–8(b)–(d)) are amended to read as follows:

"(b) The Commission may cooperate with State and local agencies charged with the administration of State fair employment practices laws and, with the consent of such agencies, may, for the purpose of carrying out its functions and duties under this title and within the limitation of funds appropriated specifically for such purpose, engage in and contribute to the cost of research and other projects of mutual interest undertaken by such agencies, and utilize the services of such agencies and their employees, and, notwithstanding any other provision of law, may pay by advance or reimbursement such agencies and their employees for services rendered to assist the Commission in carrying out this title. In furtherance of such cooperative efforts, the Commission may enter into written agreements with such State or local agencies and such agreements may include provisions under which the Commission shall refrain from processing a charge in any cases or class of cases specified in such agreements or under which the Commission shall relieve any person or class or persons in such State or locality from requirements imposed under this section. The Commission shall rescind any such agreement whenever it determines that the agreement no longer serves the interest of effective enforcement of this title.

"(c) Every employer, employment agency, and labor organization subject to this title shall (1) make and keep such records relevant to the determinations for whether unlawful employment practices have been or are being committed, (2) preserve such records for such periods, and (3) make such reports therefrom as the Commission shall prescribe by regulation or order, after public hearing, as reasonable, necessary, or appropriate for the enforcement of this title or the regulations or orders thereunder. The Commission shall, by regulation, require each employer, labor organization, and joint labor-management committee subject to this title which controls an apprenticeship or other training program to maintain such records as are reasonably necessary to carry out the purpose of this title, including, but not limited to, a list of applicants who wish to participate in such program, including the chronological order in which such applicants were received, and to furnish to the Commission upon request, a detailed description of the manner in which persons are selected to participate in the apprenticeship or other

training program. Any employer, employment agency, labor organization, or joint labor-management committee which believes that the application to it of any regulation or order issued under this section would result in undue hardship may apply to the Commission for an exemption from the application of such regulation or order, and, if such application for an exemption is denied, bring a civil action in the United States district court for the district where such records are kept. If the Commission or the court, as the case may be, finds that the application of the regulation or order to the employer, employment agency, or labor organization in question would impose an undue hardship, the Commission or the court, as the case may be, may grant appropriate relief: If any person required to comply with the provisions of this subsection fails or refuses to do so, the United States district court for the district in which such person is found, resides, or transacts business, shall, upon application of the Commission, have jurisdiction to issue to such person an order requiring him to comply.

"(d) In prescribing requirements pursuant to subsection (c) of this section, the Commission shall consult with other interested State and Federal agencies and shall endeavor to coordinate its requirements with those adopted by such agencies. The Commission shall furnish upon request and without cost to any State or local agency charged with the administration of a fair employment practice law information obtained pursuant to subsection (c) of this section from any employer, employment agency, labor organization, or joint labor-management committee subject to the jurisdiction of such agency. Such information shall be furnished on condition that it not be made public by the recipient agency prior to the institution of a proceeding under State or local law involving such information. If this condition is violated by a recipient agency, the Commission may decline to honor subsequent requests pursuant to this subsection."

(b) Section 709 of the Civil Rights Act of 1964 is amended by: (1) redesignating section 709(e) as 709(f) and (2) by adding immediately after section 709(d) as amended, the following subsection (e):

"(e) Any record or paper required by section 709(c) of this title to be preserved or maintained shall be made available for inspection, reproduction, and copying by the Commission or its representative, or to the Attorney General or his representative in connection with his authority under section 707, upon demand in writing directed to the person having custody, possession, or control of such record or paper. Unless otherwise ordered by a court of the United States, neither the members of the Commission nor its representative shall disclose any record or paper produced pursuant to this title, or any reproduction or copy, except to Congress or any committee thereof, or to a governmental agency, or in the presentation of any case or proceeding before any court or grand jury. The United States district court for the district in which a demand is made or in which a record or paper so demanded is located, shall have jurisdiction to compel by appropriate process the production of such record or paper."

SEC. 7. Section 710 of the Civil Rights Act of 1964 (78 Stat. 264; 42 U.S.C. 2000e–9) is amended to read as follows:

"INVESTIGATORY POWERS

"SEC. 710. For the purpose of all hearings and investigations conducted by the Commission or its duly authorized agents or agencies, section 11 of the National Labor Relations Act (49 Stat. 455; 29 U.S.C. 161) shall apply: *Provided*, That no subpena shall be issued on the application of any party to proceedings before the Commission until after the Commission has issued and caused to be served upon the respondent a complaint and notice of hearing under subsection (f) of section 706."

SEC. 8. (a) Section 703(a)(2) of the Civil Rights Act of 1964 (78 Stat. 255; 42 U.S.C. 2000e–2(a)(2)) is amended by inserting the words "or applicants for employment" after the words "his employees".

(b) Section 703(c)(2) of such Act is amended by inserting the words "or applicants for membership" after the word "membership".

(c)(1) Section 704(a) of such Act is amended by inserting "or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs," after "employment agency" in section 704(a).

(2) Section 704(b) of such Act is amended by (A) striking out "or employment agency" and inserting in lieu thereof "employment agency, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs,", and (B) inserting a comma and the words "or relating to admission to, or employment in, any program established to provide apprenticeship or other training by such a joint labor-management committee" before the word "indicating".

(d)(1) The second sentence of section 705(a) is amended by inserting before the period at the end thereof a comma and the following: "and all members of the Commission shall continue to serve until their successors are appointed and qualified: Provided, That no such member of the Commission shall continue to serve (1) for more than sixty days when the Congress is in session unless a nomination to fill such vacancy shall have been submitted to the Senate, or (2) after the adjournment sine die of the session of the Senate in which such nomination was submitted".

(2) The fourth sentence of section 705(a) of such Act is amended to read as follows: "The Chairman shall be responsible on behalf of the Commission for the administrative operations of the Commission, and shall appoint, in accordance with the provisions of title 5, United States Code, governing appointments in the competitive service, such officers, agents, attorneys, hearings examiners, and employees as he deems necessary to assist it in the performance of its functions and fix their compensation in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and General Schedule pay rates: Provided, That assignment, removal, and compensation of hearing examiners shall be in accordance with sections 3105, 3344, 5362, and 7521 of title 5, United States Code."

(e) Section 705(g)(1) of such Act is amended by inserting at the end thereof the following: ", and to accept voluntary and uncompensated services, notwithstanding the provisions of section 3679(b) of the Revised States (31 U.S.C. 665(b))".

(f) Section 705(g)(6) of such Act is amended to read as follows:

"(6) to intervene in a civil action brought by an aggrieved party under section 706."

(g) Section 713 of such Act is amended by adding at the end thereof the following new subsections:

"(c) Except for the powers granted to the Commission under subsection (h) of section 706, the power to modify or set aside its findings, or make new findings, under subsections (i), (k), and (l) of section 706, the rulemaking power as defined in subchapter II of chapter 5 of title 5, United States Code, with reference to general rules as distinguished from rules of specific applicability, and the power to enter into or rescind agreements with State and local agencies, as provided in subsection (b) of section 709, under which the Commission agrees to refrain from processing a charge in any cases or class of cases or under which the Commission agrees to relieve any person or class of persons in such State or locality from requirements imposed by section 709, the Commission may delegate any of its functions, duties, and powers to such person or persons as the Commission may designate by regulation, including functions, duties, and powers with respect to investigating, conciliating, hearing, determining, ordering, certifying, reporting or otherwise acting as to any work, business, or matter: Provided, That nothing in this subsection authorizes the Commission to provide for persons other than those referred to in clauses (2) and (3) of subsection (b) of section 556 of title 5 of the United States Code to conduct any hearing to which that section applies.

"(d) The Commission is authorized to delegate to any group of three or more members of the Commission any or all of the powers which it may itself exercise."

(h) Section 714 of such Act is amended by striking out "section 111" and inserting in lieu thereof "sections 111 and 1114".

SEC. 9. (a) Section 5314 of title 5 of the United States Code is amended by adding at the end thereof the following new clause:

"(55) Chairman, Equal Employment Opportunity Commission."

(b) Clause (72) of section 5315 of such title is amended to read as follows:

"(72) Members, Equal Employment Opportunity Commission (4)."

(c) Clause (111) of section 5316 of such title is repealed.

SEC. 10. Section 715 of the Civil Rights Act of 1964 (78 Stat. 253; 42 U.S.C. 2000e et seq.) is amended to read as follows:

NONDISCRIMINATION IN FEDERAL GOVERNMENT EMPLOYMENT

"SEC. 715. (a) All personnel actions affecting employees or applicants for employment (except with regard to aliens employed outside the limits of the United States) in military departments as defined in section 102 of title 5, United States Code, in executive agencies (other than the General Accounting Office) as defined in section 105 of title 5, United States Code (including employees and applicants for employment who are paid from nonappropriated funds), and in those portions of the government of the District of Columbia, and the legislative and judicial branches of the Federal Government having positions in the competitive service, shall be made free from any discrimination based on race, color, religion, sex, or national origin.

"(b) The Equal Employment Opportunity Commission shall have authority to enforce the provision of subsection (a) and shall issue such rules, regulations, orders, and instructions as it deems necessary and appropriate to carry out its responsibilities hereunder, and the head of each executive department and agency and the appropriate officers of the District of Columbia shall comply with such rules, regulations, orders, and instructions: Provided, That such rules and regulations shall provide that an employee or applicant for employment shall be notified of any final action taken on any complaint filed by him thereunder.

"(c) Within thirty days of receipt of notice, given pursuant to subsection (b) or a previously issued Executive order, of final action taken on a complaint of discrimination based on race, color, religion, sex, or national origin, or after ninety days from the filing of the initial charge until such time as final action may be taken, an employee or applicant for employment, if aggrieved by the final disposition of his complaint, or by the failure to take final action on his complaint, may file a civil action as provided in section 706(q), in which civil action the head of the executive department or agency, or the District of Columbia, as appropriate, shall be the respondent.

"(d) The provisions of section 706(q) through (w), as applicable, shall govern civil actions brought hereunder.

"(e) All functions of the Civil Service Commission which the Director of the Office of Management and Budget determines relate to nondiscrimination in Government employment are transferred to the Equal Employment Opportunity Commission.

"(f) This section shall become effective one year after the date of enactment of this Act.

"(g) Nothing contained in this Act shall relieve any Government agency or official of its or his primary responsibility to assure nondiscrimination in employment as required by the Constitution, statutes, and Executive orders."

SEC. 11. The amendments made by this Act to section 706 of the Civil Rights Act of 1964 (except those subsections designated by this Act as (o) and (q)(3) thereof) shall not be applicable to charges filed with the Commission prior to the enactment of this Act.

## PROGRAM

Mr. GRIFFIN. Mr. President, I should like to inquire of the distinguished majority leader if he can give us some idea as to what the schedule might be for the rest of the day and tomorrow.

Mr. MANSFIELD. Mr. President, I shall be happy to respond to the distinguished acting minority leader.

There will be no further votes tonight. I do not know what, if anything, will be done on the pending business. The Senate convenes at 10 o'clock tomorrow morning. Hopefully—and I think this can be stated unequivocally; at least I hope it can—we will be back on the two-shift schedule.

It is anticipated that around the hour of 11 o'clock we will be able to turn to the pending business and dispose of it by 3 o'clock in the afternoon, at which time I shall discuss the situation further with the acting minority leader.

## EXTRAORDINARY RECORD OF SENATOR SCOTT

Mr. JAVITS. Mr. President, I wish to call to the attention of the Senate the extraordinary record compiled by the distinguished minority leader (Mr. SCOTT) in many areas: the fields of human needs and race relations, his understanding of the real missions of the private enterprise system in terms of the welfare of the people, and his perceptive understanding of the situation in the Middle East and the need for good U.S.-Israel relations.

I ask unanimous consent that a statement describing Senator SCOTT's record be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATOR HUGH SCOTT'S RECORD ON LEGISLATION TO MEET HUMAN NEEDS

Pennsylvania's Senator Hugh Scott has championed the cause of the poor and the underprivileged during his service in Congress. Believing that no person should be denied the opportunity to work, to attend good schools, to live in a decent home and to eat properly, Senator Scott has dedicated himself to seeking appropriate solutions to these pressing problems.

Consumer protection is not a new issue for Senator Scott. Nearly ten years ago he sponsored a bill to establish a Select Senate Committee on Consumer Affairs. Senator Scott sees the danger of big business and big government leaving the interests of the consumer too far behind. To amplify the Federal government's interest in consumers, Senator Scott recommended Pennsylvania's Virginia Knauer as the President's Special Assistant for Consumer Affairs. Since she took office, Senator Scott has worked closely with her on several important matters such as the Wholesome Fish Act, deceptive advertising and consumer "class action" legislation.

Education matters occupy a great deal of Senator Scott's time in Washington. Federal aid to education has expanded enormously the last ten years, and Senator Scott works closely with the U.S. Office of Education to ensure that it provides the necessary innovations to enable our youngsters to achieve a quality education. Increased Federal aid is needed to supplement state and local funds, and Senator Scott has recognized that need by supporting additional funds for education.

Health care in the United States has been beset by monumental problems. High cost of medical supplies, high physician fees and a general lack of community health care facilities are just a few of these problems. With an ever-increasing population, the Federal government must take up the slack and ensure that no person suffers from a lack of good medical care. Senator Scott's interest in comprehensive health insurance plans goes back to his days in the House of Representatives. He believes that we are all entitled to federally sponsored health insurance and will push for enactment of such a program. Senator Scott helped to shape the current Medicare and Medicaid programs but knows that they are now inadequate and in great need of an overhaul. Another area in need of greater attention is mental health, and Senator Scott is working closely with Federal officials in order to increase the Government's role in solving this critical problem.

Housing is one of our greatest visible problems. Lack of adequate mortgage money and a general lack of Federal assistance has caused a critical shortage of needed housing. Senator Scott has taken positive action to reverse the trend. One of his first votes as a senator was to retain a certain number of public housing units and to keep a higher level of Federal funds for slum clearance. With three out of every four Pennsylvanians now living in an urban area, Senator Scott is devoting even more time to assuring decent housing for all residents of the Commonwealth.

Job opportunities for unskilled and semi-skilled workers have increased in recent years, and Senator Scott is working hard to similarly increase Federal participation in the training of persons to fill these jobs. The unemployment rate among low-income groups is alarming, and Senator Scott has long urged job training and re-training to place unskilled or semi-skilled workers in positions of suitable employment. Senator Scott also introduced the Family Assistance Plan to overhaul the welfare system and provide job incentives.

Senior citizens are all too often the forgotten citizens of our time. But Senator Scott has not forgotten them. Time and again he has demonstrated his concern for the special needs and requirements of retirees and elder Americans. Senator Scott's efforts to improve the Social Security system have had a tremendous impact on Pennsylvanians receiving old age, survivors and disability insurance payments. The so-called Scott "expedited payments" plan, now a part of the Social Security law, ensures that Social Security recipients will get their checks on time. In addition, Senator Scott supports automatic cost-of-living increases in Social Security payments.

Senator Hugh Scott has dedicated his career to helping people help themselves. He has consistently demonstrated his concern for human needs. He truly represents all Pennsylvanians.

The following summary outlines Senator Scott's record on legislation to meet human needs:

THE 91ST CONGRESS

*Legislation*

S. 15—Rural Job Development Act—To provide income tax incentives and other benefits for employers operating certain industrial or commercial enterprises in rural job development areas.

S. 861—To provide Federal assistance to States for establishing and strengthening consumer protection programs.

S. 1072—To authorize funds to carry out purposes of Appalachian Regional Development Act of 1965.

S. 1300—To improve the health and safety conditions of persons working in U.S. coal mining industry.

S. 1362—To provide Federal financial assistance to Opportunities Industrialization Centers to assist in job training in low-income areas.

S. 1689—To protect children against dangerous toys.

S. 1788—To assist in removing financial barriers to the acquisition of a post-secondary education by all those capable of benefitting.

S. 1865—To establish programs to find causes and effects of malnutrition and to facilitate detection and treatment.

S. 1896—To include dental and eyecare and hearing aids among the benefits provided by Medicare.

S. 1997—To provide for more effective prevention and treatment of alcoholism by providing grants for education and training programs and by establishing regional centers for research in alcoholism and alcohol-related problems.

S. 2037—To authorize grants for the construction or modernization of Neighborhood Health Centers.

S. 2184—To include prescribed drugs under coverage of the supplementary medical insurance program for the aged.

S. 2259—Credit Union Act amendment to assist in meeting the savings and credit needs of low-income persons.

S. 2470—To allow the elderly to trade food stamps for prepared meals.

S. 2518—To liberalize conditions governing eligibility of blind persons to receive disability insurance benefits.

S. 2579—To authorize Commissioners of Education to make Vocational Education Opportunity Grants.

S. 3025—Urban Land Improvement and Housing Assistance Act of 1969.

S. 3204—To require safety devices on household refrigerators.

S. Con. Res. 41—Con. Res. urging adoption of policies to offset adverse effects of governmental monetary restrictions upon the housing industry (ceramic tile industry).

S. Amdt. 682—To provide a minimum monthly Social Security benefit of $100 and increases in larger monthly benefits.

S. Amdt. 683—To increase special age 72 Social Security benefits by 10%.

S. Res. 68—To authorize funding of the Senate Select Committee on Nutrition and Human Needs.

*Votes*

Voted to prohibit issuance of credit cards, except on request, and to limit holder's liability for loss.

Supported the Consumer Products Warranty and Guaranty Act.

Voted to increase school aid for federally impacted areas by $60 million.

Voted for the Hospital and Medical Facilities Construction and Modernization Amendments of 1968 (Hill-Burton).

Voted to create the National Insurance Development Corporation to provide reinsurance for insurance companies for losses resulting from riots and civil disorders.

Voted for the Housing and Urban Development Act of 1968.

Voted to increase appropriations for the Office of Economic Opportunity from $1,624 billion to $2,048 billion.

Voted to express the sense of the Senate that the aggregate of opportunities for job training for disadvantaged youth shall in no event be less than that for fiscal year 1969.

Voted to increase funds for the Neighborhood Youth Corps summer program under the Manpower Training and Development Act.

Voted to authorize funds to extend programs under the Economic Opportunity Act.

Voted for a 15% increase in Railroad Retirement benefits.

THE 90TH CONGRESS

*Legislation*

S. 35—To amend the Internal Revenue Code to extend head-of-household tax benefits to widows, widowers, and individuals 35 or older who maintain their own households.

S. 291—To increase out-side earnings limitation for Social Security recipients to $3000.

S. 1003—To increase protection afforded consumers against injurious flammable fabrics.

S. 2053—To provide for periodic cost-of-living increases for Social Security recipients.

S. 2088—To provide incentives for creation by private industry of additional employment opportunities for residents of urban poverty areas.

S. 2134—To provide incentives for establishment of new or expanded job producing industrial and commercial establishments in rural areas.

S. 2219—To provide Federal financial assistance to help cities and communities of U.S. develop and carry out intensive local programs of rat control and extermination.

S. 2268—Requiring meaningful disclosure of the cost of credit in advertising promoting retail installment sales, loans, or open-end credit plans.

S. 2572—To establish a Domestic Development Bank for development of employment and business opportunities in certain urban and rural areas.

S. 2573—To charter an Economic Opportunity Corporation to encourage private enterprise participation in the effort to rebuild urban slums and eliminate poverty in the U.S.

S. 2871—To broaden and expand food service programs for children under the National School Lunch Act.

S. 3649—To provide private enterprise with incentives to employ and train unemployed and low-income unskilled persons residing in both urban and rural areas, and to provide community employment and training by Federal and local governments as the employer of last resort.

S. 3732—To create a Catalogue of Federal Assistance Program to aid persons in determining whether they qualify for assistance programs.

S. 3771—To allow individuals to continue to purchase vitamin and mineral supplements without a prescription.

S. 3876—To establish a community self-determination program to aid people of urban and rural communities in securing employment.

*Votes*

Voted for the Truth in Lending Act.

Voted to increase by $14.9 million funds for the Teacher Corps.

Voted to authorize $50 million for Fiscal Year 1969 and 1970 for school lunch programs.

Voted for the Vocational Educational Amendments of 1968.

Voted to increase by $10 million funds for the school dropout prevention program under the Elementary and Secondary Education Act.

Voted to increase funds for grants to neighborhood facilities by $15 million.

Voted to increase funds for the model cities program by $300 million.

Voted not to limit contract authorization for rent supplement program to $20 million.

Voted to restore $40 million in 1968 contract authorization for the rent supplement program.

Voted not to limit eligibility for the home-ownership program to families whose income was 70 percent or less of the prescribed limits for low- and moderate-income programs.

Voted to give those whose homes were destroyed in riots and civil disorders priority in relocating in urban renewal areas.

Voted to establish a Department of Housing and Community Development.

Voted not to eliminate funds for the rent supplement program for FY 1966.

Voted not to reduce from 90 to 50 percent the Federal contribution of funds to pay the salary of any teacher in the National Teacher Corps.

Voted to establish a $200 million program of grants to employers of up to 15 percent of the cost of training the unemployed.

Voted not to abolish the Job Corps.

Voted to transfer the Headstart program for disadvantaged pre-school children from the Office of Economic Opportunity to the Office of Education so that it would be better administered.

Voted not to reduce the authorizations for the Economic Opportunity Amendments of 1967 by $198 million.

Voted to add $25 million to the Headstart program under the Office of Economic Opportunity.

Voted to increase by $215 million funds for the Office of Economic Opportunity.

Voted for Economic Opportunity Act of 1969 including additional appropriations for the Senior Opportunities and Services Program.

Voted to allow Senior Citizen welfare recipients to retain a portion of state welfare payments irrespective of the 15% Social Security increase.

Voted for the Housing and Urban Development Act of 1968 including programs of low cost rental and cooperative housing for the elderly.

THE 89TH CONGRESS

*Legislation*

S. 2067—To increase educational assistance allowances to war orphans.

S. 2778—To provide financial assistance for the education of orphans and other children lacking parental support.

S. 2921—To provide a special school milk program for children.

S. 3451—To assist in provision of adequate housing in areas in which there is a shortage of housing credit as a result of the occurrence of riots and other civil disorders.

*Votes*

Voted for the Fair Packaging and Labeling Act.

Voted to liberalize the formula providing financial assistance to local school agencies for children of low-income families.

Voted for the Elementary and Secondary Education Act of 1965.

Voted to provide $5.2 million for matching grants to the States for community development training programs.

Voted to retain the rent supplement program for disadvantaged persons.

Voted for the Housing and Urban Development Act of 1965.

Voted to provide an additional $587.5 million for the urban renewal program.

Voted for the Appalachian Regional Development Act of 1965.

Voted for the Manpower Act of 1965.

Voted for the Public Works and Economic Development Act of 1965.

Voted to retain the voluntary assistance program for needy children under the Economic Opportunity Act of 1965.

Voted for the Demonstration Cities and Metropolitan Development Act of 1966.

Voted to retain the medicare provisions of the Social Security Amendments of 1965.

Voted to provide limited disability insurance benefits for the partially blind.

Voted for the Social Security Amendments of 1965, including the Medicare and Medicaid programs.

Voted for the Housing and Urban Development Act of 1965 including rent supplements for low-income tenants.

Voted for special Social Security benefits for certain previously ineligible persons over 72.

THE 88TH CONGRESS

*Legislation*

S. 259—To allow income tax deduction for certain amounts spent in providing a higher education for self, wife, dependents.

S. 1249—To protect consumers against misbranding, false invoicing and false advertising of certain wood products.

S. 1262—To improve Social Security disability benefits for the blind.

S. 1274—To provide preference in awarding certain government contracts to contractors in areas of substantial and persistent unemployment.

S. 2181—To improve rehabilitation programs for the blind under the Social Security Act.

S. 2385—To improve State medical assistance programs for the aged.

S. 2751—To provide additional funds for special milk program for children.

*Votes*

Voted not to reduce vocational education authorizations and not to eliminate programs for residential vocational schools and work-study grants.

Voted against reducing by $100 million the authorization of appropriations to finance youth programs under the Economic Opportunity Act of 1964.

Voted for the Economic Opportunity Act of 1964.

Voted for the Social Security Amendments of 1964 including increased benefits.

Voted for the Hospital and Medical Facilities Construction Act Amendments of 1964 which increased funds for grants for the construction of nursing homes.

Voted for the Housing Act of 1964 including increased funds for loans to non-profit sponsors of rental housing for the elderly, and provided for low-interest rehabilitation loans for private home owners.

THE 87TH CONGRESS

*Legislation*

S. 937—The Old Age Health Insurance Program to provide a program of Federal matching grants to States to provide health insurance for persons 65 or older at reduced rates.

S. 2982—To assure decent, safe and sanitary housing to families displaced by construction of highways forming a part of the Interstate System.

S. 3384—To allow a tax deduction for travel expenses to and from work for disabled persons.

S. Res. 119—To establish a Select Committee on Consumers.

*Votes*

Voted to withhold authorized funds from any State or school because of segregation.

Voting not to reduce to 37,000 the number

of public housing units authorized under the proposed Housing Act of 1961.

Voted not to reduce by $700 million authorized grants for urban renewal.

Voted for Humphrey-Scott amendment providing three-fourths Federal contribution rather than two-thirds on urban renewal housing in small communities in distressed areas.

Voted for the Housing Act of 1961.

Voted not to limit the length of time or the authorization for the retraining program of the Manpower Development and Training Act of 1961.

Voted for the Housing Act of 1961 providing direct loans for housing for the elderly and increased the Federal contribution to low-rent public housing occupied by Senior Citizens.

THE 86TH CONGRESS

*Legislation*

S. 563—To permit an in-school child of a deceased individual to continue eligibility for a child's Social Security benefits between ages 18 and 21.

S. 565—To increase from $1200 to $2400 the allowable outside income for Social Security recipients without suffering deductions from benefit checks.

S. 942—To establish a Commission on Equal Job Opportunity Under Government Contracts.

S. 1016—To provide for a 5-year program of assistance to school districts in meeting debt service on loans for construction of urgently needed elementary or secondary public facilities.

S. 3330—To permit needy children deprived of parental support to be eligible for assistance under the State plans for aid to dependent children.

S. 3350—To provide program of Federal matching grants to States for over-65 health insurance.

S. 3558—To establish program of financial and technical assistance to alleviate conditions of substantial and persistent unemployment in economically depressed areas.

*Votes*

Voted to authorize allocation of up to $600 million for school construction in each of the next 5 fiscal years.

To provide voluntary participating health benefits plan for persons 65 or over whose income is not more than $3000 individually or $4500 per couple who are not recipients of public assistance.

Voted to include tubercular and mentally ill patients in medical care for the aged provisions of the Social Security Amendments of 1960.

Voted for the Social Security Amendments of 1960, which eliminated the age of 50 as a minimum to qualify for disability benefits and liberalized the retirement test for eligibility.

THE 85TH CONGRESS

*Votes*

Voted not to eliminate $300 million in funds for direct loans to veterans, not to eliminate 35,000 additional public housing units, and not to cut back from two-thirds to one-half Federal share of capital grants for slum clearance.

Voted to override the President's (Eisenhower) veto of the Housing Act of 1959.

Voted not to reduce from 37,000 to 25,000 the units of public housing authorized.

Voted to provide for 37,000 additional low-cost dwelling units.

Voted for the Housing Act of 1960.

---

## GAMAL ABDEL NASSER

Mr. HATFIELD. Mr. President, the death of Gamal Abdel Nasser has brought in its wake great speculation about the possible political and military consequences. However, aside from his well-known role as the Arabs' most prominent and charismatic leader, he was a husband, father, and grandfather. It is his widow, Thaia, his three sons, Kahlid, Hakim Amir, and Abd-al-Hamid, and his two daughters, Muna and Houda, who will suffer most from his absence; for President Nasser was a devoted husband and parent.

The man who has been called by his people the greatest leader since Saladin, accomplished what no other Arab leader had done in 2,500 years: end the rule of Egypt by foreign nationalities. The son of a postal clerk, Gamal Abdel Nasser understood his people and their problems. He was devoted to, to use his own words, the establishment of "freedom, pride, and dignity in Egypt." Next to his family, it is the Arab people who will most greatly miss him. Serving as President since 1956, he assumed almost religious stature among many of his countrymen as well as among Arabs throughout the Middle East. And because President Nasser was the only man who commanded the respect, loyalty, and following of so many people in the Middle East, that troubled land and the world has lost one of the few who had the ability to unify the Arab world.

Whether or not one agreed with his politics, President Nasser accomplished a great deal for his people and did support the U.S. peace initiative.

He was a religious man, a Moslem, and viewed himself as a "fatalist," meaning that God determined his life and the crises he faced. He was a forward-looking man concerned for the future of his land.

He once stated:

> There is little time for reflection in my job. It must go forward. This is my destiny. I believe in God and destiny, and that one should not look back.

His countrymen have begun a 40-day period of mourning, during which time I hope that we and the people throughout the world can find an affirmation of life and hope for all of the peoples of the Middle East. The Arabic word "nahdha' has, I believe, particular significance for us all with the passing of Gamal Abdel Nasser: "sit up and take notice of the world around you." For possibly through this man's tragic and untimely death we of all nations can grow closer through our common humanity and through our common effort bring to ourselves a greater dignity and peace.

---

## ORDER FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, with statements therein limited to 3 minutes, except that as to the able Senator from Wisconsin (Mr. PROXMIRE), who has been very patiently waiting, I ask unanimous consent that he be permitted to proceed for 10 minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

## MILITARY AUTHORIZATION BILL A DEFEAT FOR THE SENATE

Mr. PROXMIRE. Mr. President, when the military authorization bill passed the Senate in early September, a number of us had serious doubts about it. That was true even though the Senate bill was much better than the House bill. But a whole series of amendments to improve the bill were beaten back by the managers. Because I believe that this country must have a strong defense, I voted for the bill while disagreeing with a number of its provisions. The President requested some $20.6 billion. The House authorized almost the entire amount, cutting the total by only $34 million. The Senate, however, authorized only $19.2 billion, which was $1.36 billion below the President's request. That was a 6.7-percent cut in the President's request.

SENATE CUT $1.3 BILLION FROM PRESIDENT'S REQUEST

Along with many others, I felt that the committee had done a good job in the total dollar amounts cut from the authorization. If that cut could be carried through to the appropriations bill and to a cut in actual spending by the President, we could make a significant start on reordering our priorities. My view is that this could both strengthen the United States militarily and strengthen us economically. I say that even though I differed with the committee on a number of specific aspects of the bill; namely, their authorization of the ABM, the contingency fund for the C–5A, funds for the B–1 bomber, and other items.

SENATE GOT WORST OF BARGAIN

Now the bill has returned from conference. I am disappointed in its provisions and I believe that the Senate, on the whole, got the worst of the bargain. If the Senate committee had not been so determined in the Senate floor debate to beat back, with the help of the Pentagon, virtually every amendment proposed to the bill here on the floor, they would have had far greater bargaining power in the conference committee and might well have arrived at a final bill which would be more nearly like the Senate bill we passed.

On the money provisions, the House and Senate conferees essentially split it down the middle. That is the ordinary course of events, but it certainly means that the overall cut is small—a 3.4-percent cut.

The Senate won its position on the ABM by a final agreement that the ABM system would be restricted to protection of the Minuteman bases. It refused to go along with a start on the anti-Chinese ABM system. For that, the Senate should get full marks. The only problem is that in the view of many of us, the ABM system is not needed at all, may never work, is highly vulnerable, and will be outdated before it is ever completed.

The Senate also sustained its position on the building of a third nuclear carrier, which will be postponed if not stopped. In addition, the Senate was sustained on the amendment by the Senator from Arkansas (Mr. FULBRIGHT) concerning payment to troops in Southeast Asia, and in its position on Israel credits.

But for these the Senate paid a very heavy price. Among them were these:

CHEYENNE HELICOPTER

The $17.6 million in the House bill for continuing the development of the Cheyenne helicopter was retained. This helicopter is a lemon. As the Senate report stated, it also is a competitive system with the AX, and means that we are proceeding with a costly, duplicative system. Furthermore, it indicates how temporary alleged cuts in defense spending by the Pentagon really are. A year ago, amidst a great flurry of activity, the Pentagon announced that the Cheyenne was cancelled. But it was not cancelled. Like Old Man River it just keeps rollin' along. And it is symptomatic of everything that has been wrong with Defense procurement. Here is a weapon which is far more costly than anticipated, which if it is ever delivered will be delivered very late, and which does not work. That is what we mean about waste in the Pentagon.

FREEDOM FIGHTER

The conference also kept in $30 million for the so-called Freedom Fighter, which every unbiased source admits is a "boondoggle." None of the $28 million authorized last year has even been obligated. Yet, we are going ahead with $30 million more. This is done at the whim and at the insistence of the chairman of the House Committee, Mr. RIVERS. It is his personal and private project. When critics talk about waste in defense, unneeded weapons systems, and the fact that procurement is a mess, the Freedom Fighter is example No. 1.

This is an aircraft which even the Air Force has had thrust upon it. This authorization makes a mockery of intelligent procurement. But it is in the final bill.

THE M60A1E2 TANK

The Army's tank program has been in great trouble. The workhorse tank is the M60A1 tank. It is being produced at the rate of about 30 a month. The Army asked for $67.6 million for it.

The M60A1E2 tank, a later version, has been plagued with troubles. This tank would carry a new turret and the 152-millimeter gun Shillelagh main armament system. But the tanks were never assembled.

Because of this, the Senate committee recommended that $10.9 million of the $67.6 million asked for the M60A1 this year come from the recoverable funds and equipment of the M60A1E2 tank. That was a very sensible decision. The Senate committee refused to fund the M60A1E2 tank this year. It cut $12.1 million here.

But that very intelligent decision ran into opposition in the House committee. So, the full funding for both tanks is included in the conference report.

INDEPENDENT RESEARCH AND DEVELOPMENT

Let me turn to the issue of independent research and development, or I.R. & D. as it is known. This is research done at the discretion of the contractor which is in turn charged off against overhead on the contract. There have been numerous abuses in the past.

Last year I proposed an amendment to limit the funds for this work. As a result, the amounts were limited to 93 percent of the funds spent in the previous year. In addition, the committee held hearings on a bill I introduced and came up with a series of reforms and recommendations which appeared in this year's Senate bill.

Essentially, what the committee did was this. First, it established a ceiling of $625 million for the work done by the 50 largest contractors. This represents about 95 percent of the funds, and compares with the $759 million reported as spent for all I.R. & D. in 1969. It represents an overall cut of $114 to $117 million.

Second, the Defense Department was required to negotiate advance agreements with the major contractors.

Third, it attempted to close a loophole whereby funds disallowed for one category could be charged off against another category.

Finally, it required that no payments could be made for work which was not relevant to the functions and operations of the Department of Defense. In the past firms had charged huge amounts to the Government for research into commercial activities.

The truth is that I.R. & D. has been used in the past as a means of financing a stable of engineers, free to be used for strictly commercial purposes. The companies then charged much of this off to the Government as it charged heat, light, rent, and other items.

It was a mess, and it was done without any critical examination on the part of the Congress, the President, or the Bureau of the Budget largely because it was an unknown practice and was never a line item.

The committee's action, thanks largely to Senator MCINTYRE, chairman of the Research and Development Subcommittee, went a considerable way to reform I.R. & D. practices.

But the conference committee has emasculated the Senate committee's work. The ceiling has been removed. The restriction on relevancy to the DOD's mission and function has been changed. As the conference report states:

> The conferees agreed to delete the reference to relevancy and substitute the words, "in the opinion of the Secretary of Defense, a potential relationship to a military function or operation" to assure a broad interpretation of the relationship of basic research to military requirements.

That language, in my opinion, in spite of the talk about "basic research," gives the Secretary a blank check instead of the tight control needed.

Once again, we face a situation in which some of the activities under I. R. & D. may become scandalous.

GENERAL RESEARCH RESTRICTION NULLIFIED

Last year the Senate adopted the Mansfield amendment which prohibited the use of research funds for those projects which did not have a direct and apparent relationship to a specific military function or operation. That amendment, the Mansfield amendment, was a great public service and long overdue.

It was continued by the Senate this year. But, it too, has been emasculated in the same language that the I. R. & D. research limitations have been emasculated. It gives the Secretary of Defense a blank check. I hope very much that the majority leader, the Senator from Montana (Mr. MANSFIELD), will act to restore the original language of his bill in whatever legislative or parliamentary way he deems necessary to achieve that end. This Senator would stand behind him in such an effort.

THE C–5A AMENDMENT

As we all know, the Senate bill provided a $200 million "contingency" fund for payments to Lockheed aircraft over and above its contract for C–5A aircraft. This amount was also in the House bill. But because of the scandal over this contract the Senate Committee added language designed to make certain that it kept some jurisdiction over any plan that the Air Force and the Pentagon proposed to "bail out" Lockheed.

The Senate bill provided that the $200 million could not be obligated until the Secretary of Defense has presented a plan that has been approved by the House and Senate Committees on Armed Services.

As the Senate report states:

> In effect this means that the proposed contractual arrangement both for the use of the $200 million and the completion of the entire C–5A program will require approval of the two Committees. Through this method there will be the opportunity of a complete review by the Committees on this problem.

But the House refused to agree to even this genteel language. It merely said that the Pentagon should present its plan and wait 30 days before final action. The committees are not required to approve the plan.

This is most ironic, in view of the fact that both the Armed Services Committee of the Senate and the House are very sympathetic and understanding with regard to both Lockheed and Pentagon problems; but even that kind of exposure to criticism by sympathetic Members of Congress was deleted in the conference report.

Those of us who have followed the saga of the C–5A have no confidence whatsoever that the Air Force or the Pentagon will act responsibly in this situation. We know, already, of the proposed contract which would substitute a cost-plus arrangement for a fixed price contract, thus enabling Lockheed to recoup tens and perhaps hundreds of millions of dollars which the Air Force itself has said it does not owe the company.

This program started with a buy-in. It is ending with a bailout.

One need merely trace the highlights of the Air Force's continuing surrender to the Lockheed Corp. on the C–5A program to understand why, as a minimum and as a last resort, the appropriate congressional committees should have to approve any plan worked out for Lockheed by the Air Force.

Let me review those highlights.

BUY-IN

First, the Air Force now admits that Lockheed's proposal was a buy-in, that the contractor underbid his two rivals with the knowledge that the eventual costs would far exceed the original contract price. This fact was evident from the admission that the Air Force's own cost estimates for the program were sub-

stantially higher than Lockheed's bid. Yet, the Air Force simply ignored the obvious buy-in, and went ahead to award the contract to Lockheed.

GOLDEN HANDSHAKE

Second, the Air Force agreed to insert into the contract the now notorious repricing formula, often referred to as the golden handshake, and it kept the existence of this provision a well-guarded secret from the Congress and the general public for more than 2 years. Throughout this time, the Air Force boasted that the C–5A contract contained firm price commitments from the contractor. The contract was supposed to contain a fixed price, to which Lockheed had committed itself. But the golden handshake unhinged the fixed price and transformed the firm price commitment into jelly. What is left of the firm price commitment? It has long been forgotten and has been buried under the weight of fantastic cost overruns.

HUGE OVERRUNS CONCEALED

Third, the Air Force knew as early as 1966 that serious cost overruns were piling up on this program. Air Force teams had reported from the plant in Marietta, Ga., in 1966 and 1967 that the costs were exceeding by a wide margin the original estimates. The Air Force refused to audit the contractor's books to determine the full extent of the cost problems. The Air Force refused to take any steps to retard the cost overruns. And what is worse, the Air Force ordered all written evidence of the cost overruns to be suppressed in its own internal reports and concealed them from the Congress and the public.

As late as 1968, the Air Force was asserting in congressional hearings that there were no cost problems with the C–5A, that the costs were on target, and that the program was on time. Now, of course, we know not only that the costs were overrunning, but that the program was suffering schedule slippages as serious delays have since been announced.

DEGRADING PERFORMANCE

Fourth, throughout the development and production of the C–5A, Lockheed has encountered severe technical and engineering problems. A responsible agency would have insisted on the solution of these problems. The Air Force has taken another course of action. The Air Force's solution to technical problems has been not to solve the problems, but rather to modify and generally to degrade the technical requirements. As with the question of price, the Air Force in the past has claimed that the contractor had entered into "firm" performance commitments. Here, too, the Air Fore has made a mockery out of the so-called contractual commitments by changing them to suit the contractor's needs.

QUICK DRAW ON RUN B OPTION

Fifth, over a year ago the Air Fore conceded that the C–5A contract, with its repricing formula and other questionable provisions, was a bad deal for the Air Force, and it proceeded to negotiate for a new contract with Lockheed. One of the issues now in contention is whether the Air Force violated its contract by reducing the number of planes it intends to buy. This issue arose out of the decision of the Air Force in January of 1969, to exercise its option to buy the so-called run B increment of planes. Under the original contract, the Air Force was obligated to buy only 58 C–5A's, with an option to order an additional 62, called run B. In November of 1968, after discovering the huge $2 billion cost overrun, I formally requested an investigation by the General Accounting Office and by the Department of Defense into the costs of this program, and asked the Air Force and the Secretary of Defense to withhold its decision on the option, to not order the additional aircraft, until the investigations were complete.

But the Air Force refused to exercise such caution and, in an act of high irresponsibility, it decided in January 1969, to exercise the option. It has not investigated into the causes or even the nature of the cost overruns, as I had requested, when it made this decision.

In this instance, as in many others, the Air Force succumbed to the interests of Lockheed. Throughout the history of this program, dating from 1964, the Air Force has demonstrated an almost complete unawareness of the Government's interests and the taxpayers' interest.

NEW BAILOUT

At times it appears as if the Air Force were acting as an advocate not of national security, or of a strong Air Force, but of the Lockheed Aircraft Corp. How else can we interpret the Air Force's recent proposals to restructure the C–5A contract? This restructuring turns out to be the most shameless capitulation by the Air Force so far. It is an almost total admission of defeat, and it would take the Air Force out of business of cost control altogether. The Air Force wants to transform the original contract into a cost-plus type arrangement. Five long years after entering into the original agreement with a fixed price, the Air Force is willing, if not eager, to completely lift the lid to take the ceiling wholly off the contract.

Mr. President, the Air Force ought to be ashamed. And I dare say if we permit this situation to continue, the Senate will have reason to share in the shame.

PRIVATE RELIEF BILL

The $200 million contingency fund provision in this bill amounts to special legislation. This provision is, in effect, a private bill for the private relief of a private corporation.

SENATE BIG LOSER

For all of these reasons, the Senate lost out in the conference committee. While it split the difference on funds, it lost about two thirds of the substance of its important amendments.

I believe this episode justifies bigger and larger cuts when the military appropriation bill comes before us. That will be our last chance to make a significant cut this year in some of the excessive items in the military budget.

The experience of the military authorizations conference report should lead the Senate to cut deeper and harder in the military appropriations. Then, when the Senate goes to conference, it can retain in the final bill a large proportion of the work it has done.

I believe that is the constructive course which lies before us. In view of the disappointment in losing many of the reforms the Senate made in procurement that it is the one way in which the Senate can redeem itself and by which the taxpayers of the country may be protected.

## COMMUNICATION FROM EXECUTIVE DEPARTMENTS

The PRESIDENT pro tempore laid before the Senate the following letter, which was referred as indicated:

REPORT ON EXTORTIONATE CREDIT TRANSACTIONS

A letter from the Attorney General of the United States, transmitting, pursuant to law, a report on extortionate credit transactions covered by the Consumer Credit Protection Act of 1968, dated September 1970 (with an accompanying report); to the Committee on Banking & Currency.

## PETITION

A petition was laid before the Senate and refered as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the City Council of Philadelphia, praying for the declaration of a boycott of the Arab States; to the Committee on Foreign Relations.

## ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The PRESIDENT pro tempore announced that on today, September 29, 1970, he signed the following enrolled bills, and joint resolutions, which had previously been signed by the Speaker of the House of Representatives:

S. 3637. An act to revise the provisions of the Communications Act of 1934 which relate to political broadcasting;

H.R. 11953. An act to amend section 205 of the act of September 21, 1944 (58 Stat. 736), as amended;

H.R. 18127. An act making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Quality Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1971, and for other purposes.

S.J. Res. 218. Joint resolution providing for the designation of a "Day of Bread" and "Harvest Festival Week";

S.J. Res. 228. Joint resolution to authorize the President to designate the period beginning October 5, 1970, and ending October 9, 1970, as "National PTA Week";

H.J. Res. 589. Joint resolution expressing the support of the Congress, and urging the support of Federal departments and agencies as well as other persons and organizations, both public and private, for the international biological program;

H.J. Res. 1178, Joint resolution authorizing the President to proclaim the month of October 1970 as "Project Concern Month"; and

H.J. Res. 1366. Joint resolution to provide for the temporary extension of the Federal Housing Administration's insurance authority.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ALLEN, from the Committee on Government Operations, with amendments:

S. 2867. A bill to amend section 202(a) of the Federal Property and Administrative Services Act of 1949 to remove a preference accorded to the District of Columbia over State governments in the disposition of excess real property (Rept. No. 91–1245).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 3070. A bill to encourage the development of novel varieties of sexually reproduced plants and to make them available to the public, providing protection available to those who breed, develop, or discover them, and thereby promoting progress in agriculture in the public interest (Rept. No. 91–1246).

By Mr. PASTORE, from the Joint Committee on Atomic Energy, without amendment:

S. 4141. A bill to amend the Atomic Energy Act of 1954, as amended, to eliminate the requirement for a finding of practical value, and for other purposes (Rept. No. 91–1247).

By Mr. MAGNUSON, from the Committee on Commerce, without amendment:

H.R. 12943. An act to amend section 3 of the Act of November 2, 1966, to extend for 3 years the authority to make appropriations to carry out such Act (Rept. No. 91–1248).

By Mr. BYRD of West Virginia, from the Committee on the Judiciary, with amendments:

S. 642. A bill to make it a Federal offense to assassinate, kidnap, or assault a Member of Congress or a Member-of-Congress-elect (Rept. No. 91–1249).

By Mr. RANDOLPH, from the Committee on Public Works, without amendment:

H.R. 18104. An act to amend section 15d of the Tennessee Valley Authority Act of 1933 to increase the amount of bonds which may be issued by the Tennessee Valley Authority (Rept. No. 91–1251).

## SPECIAL REPORT ON REORGANIZATION PLAN NO. 3 OF 1970, PROVIDING FOR THE ESTABLISHMENT OF THE ENVIRONMENTAL PROTECTION AGENCY—REPORT OF A COMMITTEE (S. REPT. NO. 91–1240)

Mr RIBICOFF, from the Committee on Government Operations, submitted a report entitled "Reorganization Plan No. 3 of 1970, providing for the establishment of the Environmental Protection Agency," which was ordered to be printed.

## PROHIBITION OF UNAUTHORIZED ENTRY INTO CERTAIN BUILDINGS—REPORT OF A COMMITTEE—INDIVIDUAL VIEWS (S. REPT. NO. 91–1252)

Mr. McCLELLAN. Mr. President, from the Committee on the Judiciary, I report favorably with an amendment S. 2896, to prohibit unauthorized entry into any building or the grounds thereof where the President is or may be temporarily residing, and for other purposes.

I submit a report thereon and I ask unanimous consent that the report be printed, together with the individual views of the Senator from North Carolina (Mr. ERVIN).

The PRESIDING OFFICER (Mr. EAGLETON). The report will be received and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Arkansas.

## OMNIBUS CRIME CONTROL ACT OF 1970—REPORT OF A COMMITTEE—INDIVIDUAL VIEWS (S. REPT. NO. 91–1253)

Mr. McCLELLAN. Mr. President, from the Committee on the Judiciary, I report favorably with an amendment H.R. 17825, to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes.

I submit a report thereon. I ask unanimous consent that the report be printed, together with the individual views of Senators BAYH, HART, and KENNEDY.

The PRESIDING OFFICER (Mr. EAGLETON). The report will be received and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Arkansas.

## EXECUTIVE REPORT OF A COMMITTEE

As in executive session, the following favorable report of a nomination was submitted:

By Mr. LONG, from the Committee on Finance:

Wilmot R. Hastings, of Massachusetts, to be General Counsel of the Department of Health, Education, and Welfare.

## BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DODD:

S. 4403. A bill to provide criminal penalties for acts committed in furtherance of urban terrorism, to provide licensing provisions and criminal penalties designed to control the unlawful use of explosives, and for other purposes; to the Committee on the Judiciary.

(The remarks of Mr. DODD when he introduced the bill appear below under the appropriate heading.)

By Mr. DOMINICK:

S. 4404. A bill to assure safe and healthful working conditions for working men and women; by providing the means and procedures for establishing and enforcing mandatory safety and health standards; by assisting and encouraging the States in their efforts to assure safe and healthful working conditions; by providing for research, information, education, and training in the field of occupational safety and health; and for other purposes; to the Committee on Labor and Public Welfare.

(The remarks of Mr. DOMINICK when he introduced the bill appear below under the appropriate heading.)

By Mr. MONTOYA:

S. 4405. A bill to provide that the United States make payments on claims of nationals of the United States against the government of Czechoslovakia based on awards made by the Foreign Claims Settlement Commission, and for other purposes; to the Committee on Foreign Relations.

By Mr. MONDALE:

S. 4406. A bill for the relief of Eleftherios Papageorgiou.

By Mr. MONDALE (for Mr. KENNEDY):

S. 4407. A bill for the relief of Rocco D'Alessio, Lucia Di Biase D'Alessio and Angelo D'Alessio; to the Committee on the Judiciary.

By Mr. GOODELL (for himself and Mr. JAVITS):

S. 4408. A bill to amend section 403 of the Appalachian Regional Development Act of 1965; to the Committee on Public Works.

(The remarks of Mr. GOODELL when he introduced the bill appear below under the appropriate heading.)

By Mr. FANNIN:

S. 4409. A bill to amend title XVIII of the Social Security Act to provide coverage under the supplementary medical insurance program for surgical services furnished in certain facilities which are established to perform surgery without inpatient hospitalization; to the Committee on Finance.

By Mr. BIBLE:

S. 4410. A bill to amend section 1 of the act of August 9, 1955, relating to the leasing of Indian lands; to the Committee on Interior and Insular Affairs.

S. 4411. A bill for the relief of Kathy Cox (Kyong Suk Han); to the Committee on the Judiciary.

By Mr. GOODELL:

S. 4412. A bill to require the Secretary of Transportation to prescribe regulations governing the humane treatment of animals transported in air commerce; to the Committe on Commerce.

(The remarks of Mr. GOODELL when he introduced the bill appear below under the appropriate heading.)

By Mr. HRUSKA (for himself and Mr. CURTIS):

S. 4413. A bill to amend the act of June 6, 1902, to remove the restriction on use with respect to certain lands and improvements heretofore conveyed to the city of Lincoln, Nebr., and for other purposes; to the Committee on Public Works.

By Mr. BURDICK (for himself and Mr. BYRD of West Virginia):

S.J. Res. 238. Joint resolution authorizing the President to declare November 11 (also known as Veterans Day) as a National Day in Support of U.S. Prisoners of War in Southeast Asia; to the Committee on the Judiciary.

(The remarks of Mr. BURDICK when he introduced the joint resolution appear below under the appropriate heading.)

## S. 4403—INTRODUCTION OF THE URBAN TERRORISM PREVENTION ACT

Mr. DODD. Mr. President, this morning someone brought to my attention the September 26 issue of the Quicksilver Times, which is perhaps the most prominent of our local underground newspapers.

Ordinarily I would not recommend to anyone that they read the Quicksilver Times, which is a sick melange of pornography and profanity and other manifestations of psychological disorientation.

But in this case, I hope that my colleagues will take the time to read this squalid publication, because it bears in the most direct way on the legislation which I shall introduce today.

The opening editorial of the Quicksilver Times says:

With this issue and the printing in it of Underground Manual No. 3 we have crossed a bridge from the old style of underground papers . . . to the dissemination of revolutionary how-to information . . . we feel it

is vitally . . . important to make public knowledge revolutionary information that is hard to come by as well as of immense practical value.

Eight pages of this tabloid newspaper are devoted to the republication of what is described as "Underground Manual No. 3."

In this manual there are instructions, complete with diagrams, on how to make improvised grenades, platter charges, claymore mines, telephone boobytraps, a door knob boobytrap, improvised igniters, detonators and burning fuses, time bombs, Molotov cocktails, explosives of various kinds, and numerous other terrorist devices.

At another time and in another atmosphere, such a publication might have been regarded as a curio. But in the terrible time in which we live, it can be taken for granted that the exhortation to terrorism contained in this pathetic publication, and the explicit instructions on "how to do it," will produce a certain quota of terrorist activities by some of the emotionally unbalanced young people who are exposed to the Quicksilver Times.

THE TERROR MUST STOP

Mr. President, I introduce, for reference to the appropriate committee a bill called the "Urban Terrorism Prevention Act."

This bill has been motivated by the terrifying growth of urban terrorism over the past several years. I think it no exaggeration to say that this terrorism has grown to proportions which pose a serious threat to the lives of our citizens, to the economic life of our urban community, to the continued functioning of our academic institutions, and to organized government in general.

According to the Treasury Department, between January 1969 and April of this year, there were 4,330 bombings in the United States, 1,174 attempted bombings, and over 35,000 threats of bombing. The cases of arson were even more numerous. And attacks on policemen in our major cities reached levels which caused several metropolitan police chiefs to say that they were confronted with open guerrilla warfare or open insurrection.

These terror attacks are for the most part the work of the followers of a handful of extremist organizations, some of them far right, most of them far left.

On the right, the two most notorious terrorist groups have been the KKK and the Minutemen of America. Their operations have generally taken the form of bombing or arson attacks on churches and synagogues and the homes of civil rights leaders.

On the far left, there are the Black Panthers and the White Panthers, the Weathermen, the Maoist Communists who call themselves the Progressive Labor Party, and a variety of groups and grouplets, all of them committed to revolution and acts of violence.

Our terrorists justify their acts of violence on political grounds, and they frequently point to the role played by revolutionary terrorists in bringing about the downfall of the czarist regime in Russia. But the terrorists in czarist Russia were models of rationality compared to the lunatic breed of terrorists that has sprung up in our country over the past several years.

According to Russian scholars with whom I have discussed the matter, the Russian terrorists targeted their action for the most part against czarist officials whom they regarded as guilty of oppressing the people or of specific repressive measures. And when they assassinated these officials, they would take public credit for what they called the "execution."

They did not go in for the bombing of public buildings or libraries, or research institutions, or for arson, because this is the kind of terrorism that cannot be practiced without endangering innocent lives.

And they did not go in for the random assassination of policemen and firemen. The firemen they were disposed to regard as useful public servants. The policemen they may not have liked because they looked upon them as upholders of an oppressive regime. But they did not hold them responsible for the basic social evils against which they were fighting, and they therefore did not carry out "executions" against ordinary policemen.

The breed of terrorists we are confronting today in the United States may very well be the most ruthless and irrational in the entire history of political terror.

They are obsessed people who derive an almost obscene satisfaction from the most gruesome sort of violence.

What can one say about a terrorist like Weatherman leader Bernadine Dohrn, who said about the murder of actress Sharon Tate and her friends:

Dig it, first they killed those pigs, then they ate dinner in the same room with them, then they even shoved a fork into a victim's stomach! Wild!

Or what can one say about the mind of a man like Rap Brown, who on the night of the Cambridge, Md., riot, addressed a Negro audience in these terms:

Look what the brothers did in Plainfield (New Jersey). They stomped a cop to death. Good. He's dead. They stomped him to death. They threw a shopping basket on his head and took his pistol and shot him and then cut him.

Detroit exploded. Newark exploded. Harlem exploded. It's time for Cambridge to explode, baby.

We are dealing here with a special kind of political lunacy, but it is the kind of lunacy that can tear our society apart unless we move rapidly, because present conditions make this special brand of lunacy highly contagious.

Today it is questionable whether there are more than 4,000 or 5,000 active terrorists, of the right and of the left. But if we fail to bring the epidemic under control, several years from now we may find ourselves faced by three or four times this number.

I say that we must crack down, and crack down immediately, and crack down hard on the terrorists, both of the extreme left and of the extreme right.

We must crack down not only on those who are caught in the act of bombing or arson or shooting policemen, but on the handful of extremist organizations which advocate acts of terrorism and instruct their members and followers in the techniques of terrorism.

Advocacy, incitation, and instruction bear a direct relationship to the act. Clearly the hundreds of thousands of terrorist flyers and pamphlets that have been distributed in recent years have had more than a little to do with the thousands of terrorist incidents that have taken place. No reasonable person could argue otherwise.

The bill I am introducing today places a ban on the advocacy of urban terrorism and provides criminal penalties for such advocacy.

I know there are those who argue that any ban on the advocacy of terrorism would constitute an infringement of the right of free speech, and they will invoke certain recent Supreme Court decisions to uphold their argument.

In particular, they will refer to the Supreme Court decisions in the Dennis case and the Yates case.

I do not think that these critics have really read the decisions to which they refer.

It is true that the Supreme Court has ruled that one cannot ban the simple advocacy of revolution, when the need for revolution is presented as an abstract doctrine. However, in decision after decision, the Supreme Court has upheld the right of Government to ban the advocacy of illegal actions.

The Supreme Court said:

The essential distinction in *Yates* v. *the United States* (354 U.S. 298, 324–25 (1957)) is that those to whom the advocacy is addressed must be urged to do something now or in the future, rather than merely to believe in something.

In its earlier decision on the Dennis case, the Supreme Court held that—

Overthrow of the government by force and violence is certainly a substantial enough interest for the government to limit speech. Indeed, this is the ultimate value of any society, for if a society cannot protect its very structure from armed internal attack, it must follow that no subordinate value can be protected.

But in terms of the legislation I here propose, I believe that the most pertinent citation is the following paragraph from the Supreme Court decision in the Yates case:

The essence of the *Dennis* holding was that indoctrination of a group in preparation for future violent action, as well as exhortation to immediate action, by advocacy found to be directed to "action for the accomplishment" of forcible overthrow, to violence as a "rule or principle of action," and employing "language of incitement" . . . is not constitutionally protected when the group is of sufficient size and cohesiveness, is sufficiently oriented towards action, and other circumstances are such as reasonably to justify apprehension that action will occur.

Before proceeding to draft this legislation, I asked the American Law Division of the Library of Congress to research the question of the constitutionality of a law banning the advocacy of terrorism. The research paper which they sent me expressed the belief that the measure I planned to introduce

would be upheld on constitutional grounds.

In addition to banning the advocacy of urban terrorism, the bill which I have introduced today does the following things:

First. It calls for the licensing of all manufacturers and distributors of explosives. The licensing language, I might point out, is closely modeled after the licensing language of the gun bill, which has already been approved by Congress.

Second. It provides greatly increased penalties for terrorist activities and very heavy penalties for any violation of the licensing laws.

Third. It calls for the appointment of an additional Assistant Attorney General to administer the act.

Fourth. It authorizes an appropriation not to exceed $20 million, to carry out the provision of the act, including the provision of adequate supporting staff for the Assistant Attorney General and of additional investigative personnel for the Federal Bureau of Investigation.

One of the principal statements of findings incorporated in my bill says that the growing climate of violence in our society and the increasingly numerous incidents of bombing, arson, and attacks on law enforcement officers in themselves constitute circumstances under which there is substantial likelihood that incitation to specific acts of terrorism will imminently result in such acts.

I do not believe that anyone could take issue with the validity of this finding.

The penalties prescribed in my bill are far more severe than those now in the books. I believe this is warranted by the magnitude of the crime.

Bombs or Molotov cocktails are potentially weapons of mass murder, and it should therefore be a much more serious matter to manufacture or transport or be found in the possession of an explosive or incendiary device than it is to be found in the possession of a sawed-off shotgun or other concealed firearms.

Here are some samples of the very heavy penalties which my bill prescribes for terrorist activity:

The penalty for leadership or active membership in terrorist organizations is $5,000 to $10,000 fine or 5 to 10 years in prison, or if personal injury or death results directly from such advocacy or incitation or instruction, $10,000 to $25,000 fine or 10 to 20 years in prison, or both.

The penalty for manufacturing or distributing explosives without a license is $5,000 to $10,000 or 5 to 10 years in prison or both; or if personal injury or death results, $10,000 to $25,000 and 10 years to life imprisonment.

The penalty for improper possession of commercially produced explosives is $2,000 to $5,000 fine or 2 to 5 years in prison, or both.

The penalty for possession of any explosive not produced by a licensed manufacturer is $5,000 to $10,000 fine or 5 to 10 years in prison, or both.

The penalty for receiving, transporting or possessing a Molotov cocktail or other incendiary device or any explosive attached to a boobytrap mechanism or timing mechanism, is not less than $5,000 fine or not less than 5 years in prison, or both.

The penalty for threats of bombing is $5,000 to $10,000 fine, or 5 to 10 years in prison, or both.

There are some who will say that such penalties are Draconian. My argument in reply to them is that we are dealing with madmen each one of whom is a potential mass murderer, that we are confronting a national emergency, and that the most severe penalties are in order if we are to save our society from the onslaught of the bombers and the arsonists and all the other practitioners of urban guerrilla warfare.

At this juncture, the epidemic of terrorism is limited to a few thousand diseased minds. It is the purpose of this bill to terminate the epidemic by isolating the bearers of the disease of violence.

In closing my remarks, I think it pertinent to recount a true story which I heard from a veteran Russian scholar.

Many years ago this scholar had a conversation with a man who was chief of police of Petrograd under the Kerensky regime. The chief of police told him that in the summer of 1917 he had approached Kerensky and asked for permission to arrest Lenin and the Bolshevik Central Committee because he believed that this would prevent a lot of trouble in the future.

Kerensky refused to give him this permission, in part because he was an idealist, in part because he felt that the Bolshevik movement was too weak to constitute a menace.

A short while later, Lenin went into hiding in Finland, and it was too late to do anything about the proposal of the chief of police.

One cannot help but admire Kerensky for the idealism and goodness of heart which inspired his refusal to the chief of police.

However, one can also not help but reflect that had Kerensky given the chief of police the green light to arrest Lenin and his coconspirators, the Bolshevik revolution might have been avoided, and mankind might have been spared the countless millions of lost lives and untold human suffering for which the spread of communism has been responsible.

In this situation, as in so many other situations in history, there is no surer guide than the ancient adage that "a stitch in time saves nine."

The PRESIDING OFFICER (Mr. HUGHES). The bill will be received and appropriately referred.

The bill (S. 4403) to provide criminal penalties for acts committed in furtherance of urban terrorism, to provide licensing provisions and criminal penalties designed to control the unlawful use of explosives, and for other purposes, introduced by Mr. DODD, was received, read twice by its title, and referred to the Committee on the Judiciary.

## S. 4404—INTRODUCTION OF THE OCCUPATIONAL SAFETY AND HEALTH ACT

Mr. DOMINICK. Mr. President, I introduce, for appropriate reference, a bill relating to the occupational safety and health of American employees. This bill is identical to the Steiger bill (H.R. 19200) now pending in the House. I am offering this bill for the purpose of permitting the Members of the Senate to give it consideration prior to the consideration on the floor of S. 2193, the occupational safety and health bill which has been reported by the Labor and Public Welfare Committee.

At the time S. 2193 is considered, the bill which I am introducing today will be offered as a substitute amendment for S. 2193.

The PRESIDING OFFICER (Mr. DOLE). The bill will be received and appriately referred.

The bill (S. 4404) to assure safe and healthful working conditions for working men and women; by providing the means and procedures for establishing and enforcing mandatory safety and health standards; by assisting and encouraging the States in their efforts to assure safe and healthful working conditions; by providing for research, information, education, and training in the field of occupational safety and health; and for other purposes; introduced by Mr. DOMINICK, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

## S. 4408—INTRODUCTION OF A BILL AMENDING THE APPALACHIAN REGIONAL DEVELOPMENT ACT

Mr. GOODELL. Mr. President, the Appalachian Regional Development Act was passed in March 1965—and I supported this legislation—in an attempt to alleviate the severe conditions of substandard housing, poor health, inadequate education, and heavy outward migration that existed in Appalachia. Since its inception, the Appalachian program has had an impact in such diverse areas as health, sewage treatment, education and transportation.

Through the accelerative action of the public investments provided for by the Appalachian Regional Development Act, significant strides have been made toward the development of a regional infrastructure that will prove attractive to private capital investment. Experience has demonstrated that public investment alone can achieve no more than a temporary economic uplift, which ultimately will falter and fail. But to the extent that public investments can be made to stimulate the flow of private investment, they will make a significant contribution to sound and lasting economic development.

A massive Federal revenue-sharing program such as the one recommended by the President will provide the best solution to the problems of economic development which beset all States. Clearly, no Federal agency or authority has greater knowledge of the needs and problems of an individual State than the State itself. Lacking this, however, I am convinced that the concept behind the Appalachian Regional Development Act provides the most effective and workable approach to regional development.

Currently, 14 counties of New York State's southern tier are participating

in the Appalachian regional development program. These counties constitute a region of New York State which, in large measure, had been excluded from the mainstream of economic development and quality of life associated with this.

New York's Appalachian region is progressing with the construction of a regionwide network of 16 area occupational education centers which, upon completion, will give every student and adult the opportunity to acquire job relevant occupational education or reeducation. This is a considerable accomplishment in light of the fact that, during the 1950's, Appalachia lost over half its jobs in agriculture, nearly 59 percent of its jobs in mining, and 40 percent of its railroad employment.

There are other regions of New York State contiguous to the present Appalachian region which are beset with the same—and in some instances more severe—problems which the current Appalachian region has struggled so long to overcome. People in these areas are no different in their aspirations for a sound economic base, for better employment opportunities, and for a more rewarding life. The communities, towns, and counties are attempting to help themselves often through the imposition of unusually high debt burdens. The State is extending every assistance possible. But a State such as New York, with major urban centers and a magnitude of problems facing them, finds its dollars spread thin. The application of the Appalachian development concept to these areas can mean a major step toward solution of the problems.

The President has recognized the great need that exists for expansion of the Appalachian regional development area, and a study he transmitted to Congress concludes:

> There is sufficient economic justification to warrant the inclusion of portions of upper New York State in an economic development region. Further, the socio-economic orientation of the area in question appears to favor inclusion within the Appalachian region.

The study also points out that the counties in the northern portion of New York State experience generally greater distress than the counties currently included in the Appalachian program.

Accordingly, the bill I introduce today would implement the first alternative proposed in the President's study by including 34 additional counties in New York State in the Appalachian regional development area.

The time for action is now. The concept involved has been proven to be sound; the need has been established. To wait any longer simply delays the process of development. We stand to lose much more by waiting than we could ever gain by failing to enlarge this vital and fruitful program.

The PRESIDING OFFICER (Mr. SAXBE). The bill will be received and appropriately referred.

The bill (S. 4408) to amend section 403 of the Appalachian Regional Development Act of 1965, introduced by Mr. GOODELL (for himself and Mr. JAVITS), was received, read twice by its title, and referred to the Committee on Public Works.

## S. 4412—INTRODUCTION OF A BILL TO PROVIDE HUMANE TREATMENT OF ANIMALS SHIPPED BY AIR

Mr. GOODELL. Mr. President, I am today introducing a bill to assure the humane treatment of animals transported by airlines. This bill is identical to the legislation introduced in the House on September 17, 1970, by Representative LOWELL WEICKER, JR. of Connecticut.

The purpose of this bill is to require the Secretary of Transportation to establish regulations for the care and humane treatment of animals that are transported by air commerce, and authorizes fines of $1,000 for violation of these rules.

At present, there are no regulations established by the Civil Aeronautics Board or the Federal Aviation Administration or the Department of Agriculture or any Federal agency for the care and humane treatment of animals shipped by air. This bill will require that more regulations be established.

Mr. President, I have received a number of complaints about the lack of Federal regulation from my constituents in New York State, and I am sure that other Senators have also heard from their constituents in this regard. Valuable animals and personal pets are regularly shipped by air, and it is important that they be given care and humane treatment in transit.

Mr. President, I ask unanimous consent that the text of my bill be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. SAXBE). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4412) to require the Secretary of Transportation to prescribe regulations governing the humane treatment of animals transported in air commerce, introduced by Mr. GOODELL, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 4412

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 307 of the Federal Aviation Act of 1958 is amended by adding at the end thereof the following new subsection:

"REGULATIONS GOVERNING HUMANE TREATMENT OF ANIMALS

"(g) The Secretary of Transportation shall, as soon as practicable after the date of enactment of this subsection, prescribe regulations governing the humane treatment of animals transported in air commerce."

SEC. 2. That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the side heading: "SEC. 307. Airspace control and facilities." is amended by adding at the end thereof the following:

"(g) Regulations governing humane treatment of animals.".

## SENATE JOINT RESOLUTION 238—INTRODUCTION OF JOINT RESOLUTION DESIGNATING VETERANS DAY AS A NATIONAL DAY IN SUPPORT OF UNITED STATES PRISONERS OF WAR IN SOUTHEAST ASIA

Mr. BURDICK. Mr. President, on behalf of myself and the Senator from Virginia (Mr. BYRD), I introduce for appropriate reference, Senate Joint Resolution 238, authorizing and requesting the President to declare November 11 as a National Day in Support of United States Prisoners of War in Southeast Asia.

Last week we were privileged to hear, in joint session of the Congress, Colonel Frank Borman discuss his 14-nation journey made on behalf of our American servicemen held prisoner of war and missing in action in Vietnam.

Colonel Borman painted a vivid picture of the thoughts that must be running through the minds of these men. As I listened to Colonel Borman, I realized that of the many tragedies arising from this war, none is more painful than the plight of the prisoner. Some of these men have been held longer than any other prisoners in the history of the United States.

The tragedy is not confined to the captured men, but strikes at their families, friends, and communities. In a recent issue of the Grand Forks, North Dakota, Herald, Marilyn Hagerty explained how the lives of North Dakota natives have been affected by the persistent refusal of the North Vietnamese to abide by the Geneva Conventions on Prisoners of War. I ask unanimous consent to have this article printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BURDICK. Mr. President, I doubt there is a Member of this body who has not joined an effort to publicize the attitude of the North Vietnam government. Citizens across the country are adding their names to petitions which will let the North Vietnamese government know our Nation is united in wanting the secure humane treatment and release of these servicemen. One such effort is "Freedom Signature Week" sponsored by the Veterans of Foreign Wars. During the week of September 20–26, VFW members throughout the Nation circulated petitions calling attention to the inhuman treatment of American prisoners and appealing for their release. In North Dakota, it was hoped to obtain 75,000 signatures.

Efforts such as these accord with Colonel Borman's principal suggestion he offered the Joint Session: "that every American continue maximum effort to mobilize world opinion and world awareness of this problem."

Today the Senator from West Virginia (Mr. BYRD) and I offer another means of focusing world opinion on this problem by the introduction of the resolution authorizing the President to designate November 11—Veterans Day—a National Day in Support of United States Prisoners of War in Southeast Asia. I cannot think of a more appropri-

ate observance of Veterans Day than by the public voicing that these are not forgotten men.

The PRESIDING OFFICER (Mr. (SAXBE). The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 238) authorizing the President to declare November 11—also known as Veterans Day—as a National Day in Support of United States Prisoners of War in Southeast Asia, introduced by Mr. BURDICK (for himself and Mr. BYRD of West Virginia), was received, read twice by its title, and referred to the Committee on the Judiciary.

The article presented by Mr. BURDICK is as follows:

[From Grand Forks Herald, Sept. 20, 1970, Grand Forks, N. Dak.]

FAMILIES OF POWs, MIAs WAIT, PRAY, WRITE LETTERS

(By Marilyn Hagerty)

At night, when they go to bed, there's that gnawing, empty feeling. When they awake in the morning, it's still there.

It goes on and on—unresolved.

Families of men who are Prisoners of War (POWs) or Missing In Action in Southeast Asia (MIAs) know no peace of mind. In Grand Forks, there are five of those families. They are associated with a new national League of Families which headquarters in Washington.

While their efforts have been mainly individual from the kitchen table, they now hope to work with families in the 50 United States. Families who are joined in the common bond of waiting, praying and writing letters.

They hope to keep America aware of the more than 1,500 servicemen who should not be forgotten. They hope to encourage a mountain of mail to Hanoi.

They want to protest the secrecy that surrounds those who have been captured. They want to ask for humane treatment for them. They want to implore Hanoi and communist allies to abide by the provisions of the Geneva Peace Treaty on prisoners.

Families of the national league believe that nothing short of public outrage by citizens of the world will help improve the lot of their husbands, fathers, brothers and sons.

Of the more than 1,500 men believed to be captured, only names of 450 have been released.

Recently named as coordinator for the League of Families in North Dakota is Mrs. Leland Torkelson, Box 155, Crosby. Her son, Capt. Loren Torkelson is known to be a POW. He went down in April, 1967.

Mrs. Torkelson's daughter, Mrs. Everett Knudsvig, lives in Grand Forks.

With the captain's wife, members of the Torkelson family have worked relentlessly in the cause of prisoners.

"What people sometimes don't realize is that every day is important," says Mrs. Knudsvig.

"A few years ago," she says, "everything was hush hush. We were told all information was classified. That we could not talk about it.

"The secrecy was getting us nowhere," she says, "and it was hard on everyone."

She said since release of nine prisoners by Hanoi, the thinking has changed. The liberated men feel the silence has no effect. They are for rallying the public to the atrocities. They recommend a steady flow of letters of protest to Hanoi.

"And it does help to talk about it," says Mrs. Knudsvig.

Families of the following five men are among those here in the National League:

Capt. Loren Torkelson, USAF, Crosby, POW since 1967, brother of Mrs. Knudsvig.

Lt. jg., William M. Christensen, U.S. Navy, Missing in Action since March 1966, brother of Richard Christensen, 605 24th Ave. S.

Major Keith Hall, USAF, POW, since January, 1968, son of Mr. and Mrs. Norman Hall, 710 Ninth Ave. S.

Capt. Clifford Cushman, USAF, MIA since Sept. 1966, son of Mr. and Mrs. M. L. Cushman, 536 Oxford St.

Major Martin W. Steen, USAF, MIA since May, 1966, son of Mrs. Ethel Steen, 210 N. Sixth St.

While the wives of Capt. Torkelson and Maj. Steen have received messages from them, nothing has been heard from the others.

"It's just a vacuum," says Mrs. Steen.

She was one of several North Dakotans who went to Washington in June when the League of Families organized.

Mrs. Steen says packages are sent regularly to Maj. Steen by his wife, who lives at Tempe, Ariz. Only the nearest of kin is allowed to send a package and then only every other month.

"The first package was returned," says Mrs. Steen. "Now they are sent, but never acknowledged."

With her daughter-in-law, she feels the frustration and the loneliness of not knowing a thing. But Mrs. Steen keeps writing letters. She has no idea of what good it does.

Her son went down while returning from a mission over North Vietnam four years ago. His F105 plane was known to have been short of fuel. A searching crew the next day found his parachute belt, which had been cut.

"It indicated he must have landed on his feet," says Mrs. Steen.

But for 4½ years, no word.

Lt. Christensen, who is a native of Grand Forks, has not been heard from since he took off on an F4C Phantom Jet Fighter on a mission in March of 1966.

His brother, Richard, who works at the Area Social Service Center here, says it was in inclement weather. Christensen is a lieutenant junior grade (lt. jg.), in the Navy, a radar-navigator.

Christensen's parents are Mr. and Mrs. Charles M. Christensen, Great Falls, Mont., formerly of Grand Forks.

For almost two years, the family of Maj. Hall waited and wondered. An F4DD pilot, he was shot down by ground fire in January, 1968. He was listed as Missing In Action in Southeast Asia.

The family understood there had been some radio contact with Hall—then a Capt.—after he reached ground. Their hopes that he was alive came true when messages started coming through from him.

This year, his wife, the former Judy Waldon of Grand Forks, has received three brief messages. The last was in May. Mrs. Hall and their three children live at Ft. Walton Beach, Fla.

Maj. Hall is a 1956 graduate of the University of North Dakota.

Seven letters have come through from Capt. Torkelson to his wife, Merle, in Carmichael, Calif. the last was in May.

Torkelson, who like his wife is a UND graduate, went down in April, 1967. His F4C Phantom Jet reportedly was riddled in a "dog fight."

Later he was pictured in a Bangkok newspaper as a captured American pilot. He has been seen among POWs in North Vietnamese propaganda movies. He was recognized as one of the prisoners receiving communion in a film made at Christmas of 1968.

Torkelson has a sister, Mrs. Dennis Thomte, Omaha, who was among a small group of women from that city to go to Washington last May. Their mission was to join with others in an appeal for International Justice for Prisoners.

Spokesman for women on that mission was Carolyn Cushman of Omaha. She is the wife of Capt. Cushman of Grand Forks—missing in action since he was shot down over North Vietnam Sept. 25, 1966.

Mrs. Cushman is a tireless worker in the interest of those held prisoner and those missing in action. She is a director of the Forgotten Americans Committee in Omaha.

She is steadfast in her belief, "No matter what your political views are about the war, all Americans can be united in support of their country's servicemen—either prisoners of war or missing in action."

Carolyn Cushman is relentless in her efforts. She has written Cushman's parents here that the Forgotten Americans Committee is now organizing a big fall rally in that city. It will be a sequel to one held there last spring. The committee sets up displays at public events, passes out literature and seeks signatures on petitions. They have "action packs" available for people anywhere who start a Forgotten Citizens Committee.

The address is P.O. Box 37403, Omaha.

All of the efforts, though, cause only a ripple in the whole broad spectre.

Through it all, families hope Hanoi will take note. Their prayers are fervent.

They ask the Almighty Father to, "Give to all of us who wait and hope in the face of every disappointment the will to perservere in the cause of peace." And they ask for "wisdom to conquer hate with love and every doubt with renewed faith in You."

Mrs. Cushman says, "There is nothing in heaven or earth I would not do to bring back my beloved Cliff."

## ADDITIONAL COSPONSORS OF BILLS

S. 4050

At the request of the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Oklahoma (Mr. BELLMON), the Senator from Colorado (Mr. DOMINICK), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 4050, to authorize the issuance of U.S. conservation savings bonds in order to afford an opportunity for the people of the United States, through the purchase of such bonds, to participate in the financing of programs to conserve and improve the Nation's environment.

S. 4345

Mr. HARTKE. Mr. President, it is with a sense of deep concern that I join the distinguished Senator from New Jersey (Mr. WILLIAMS) in cosponsoring S. 4345, a bill to update the retirement income credit.

Last year the Congress passed with my strong support a far-reaching Tax Reform Act.

Several measures in the new law, including a number I have advanced, will provide urgently needed tax relief for overburdened taxpayers. For example, the Act will:

Raise the personal exemption deduction in four steps from $600 to $750;

Authorize a new low-income allowance which will remove more than 5 million tax returns from the tax rolls;

Increase the standard deduction from 10 percent of adjusted gross income with a $1,000 ceiling to 15 percent with a $2,000 maximum deduction; and

Lower the tax rates for single persons.

But because of time limitations, no action was taken on a matter of vital importance for retired teachers, policemen, firemen and Federal annuitants—the

need for bringing the retirement income credit up-to-date.

The retirement income credit was enacted in 1954 to provide these individuals with comparable tax relief as received by Social Security beneficiares.

Government annuitants and persons living primarily on investment income receive substantially equivalent treatment by claiming a 15-percent credit on their retirement income—their taxable pensions, annuities, interest, dividends, and rents.

Since 1962 there have been three badly needed increases in social security benefits.

Yet, the retirement income credit has not been modernized during this 8 year period, although hundreds of thousands of Government retirees are in need of tax relief.

As a consequence, the credit no longer provides an equivalent income exemption for Government pensioners.

Today the maximum amount for computing the credit is $1,524 for a single person—the same figure employed back in 1962.

In contrast, an individual may now receive $2,278 tax free under social security.

My bill would help to restore greater fairness in our tax system by placing Government annuitants on a substantially equivalent basis with persons receiving social security benefits.

First, S. 4345 would raise the maximum amount for computing the credit from $1,524 to $2,278—the maximum benefit now payable to a person under the Social Security Act. For a married couple, this figure would be increased from $2,286 to $3,417.

In terms of dollars and cents, this raise could provide a tax savings of $113 for a single taxpayer and $170 for a married couple filing jointly.

For a retired couple living on a limited fixed income, this savings could provide badly needed medical care, food for the table, or money for medicine.

In my own State of Indiana, this measure could provide $4 million in tax relief for an estimated 40,000 elderly taxpayers.

Second, S. 3445 would provide for an automatic adjustment mechanism to keep the retirement income credit current with social security increases. With this approach, Government annuitants will be protected against longstanding delays which can result in the loss of precious tax dollars.

In far too many instances, these local, State and Federal pensioners—desperately in need of tax relief—have been overlooked or ignored.

Equity in our tax system presents a very compelling argument to rectify this situation and to place these taxpayers on a par with social security beneficiaries.

For these reasons, I urge prompt and favorable consideration of S. 4345.

Mr. President, I ask unanimous consent that, at the next printing my name be added as a cosponsor of S. 4345, to adjust the amounts of retirement income for which a tax credit is allowable under the Internal Revenue Code of 1954 in order to provide benefits thereunder comparable with tax benefits accorded social security recipients.

The PRESIDING OFFICER (Mr. HUGHES). Without objection, it is so ordered.

At the request of the Senator from New Jersey (Mr. WILLIAMS), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Vermont (Mr. PROUTY) were added as cosponsors of S. 4345, to adjust the amounts of retirement income for which a tax credit is allowable under the Internal Revenue Code of 1954 in order to provide benefits thereunder comparable with tax benefits accorded social security recipients.

## SENATE RESOLUTION 473—SUBMISSION OF A RESOLUTION AUTHORIZING ADDITIONAL FUNDS FOR SPECIAL COMMITTEE ON AGING

Mr. WILLIAMS of New Jersey submitted the following resolution (S. Res. 473); which was referred to the Committee on Rules and Administration:

S. RES. 473

*Resolved*, That the Special Committee on Aging is hereby authorized to expend, from the contingent fund of the Senate, $24,000, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 316, Ninety-First Congress, agreed to February 16, 1970.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT—AMENDMENTS

AMENDMENT NO. 954

Mr. STEVENS submitted an amendment, in the nature of a substitute, intended to be proposed by him to the Griffin-Tydings amendment (No. 711) to the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States, which was ordered to lie on the table and to be printed.

(The remarks of Mr. STEVENS when he submitted the amendment appear earlier in the RECORD under the appropriate heading.)

AMENDMENT NO. 955

Mr. ERVIN submitted an amendment, in the nature of a substitute, intended to be proposed by him, to the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

AMENDMENT NO. 956

Mr. DOLE submitted an amendment, in the nature of a substitute, intended to be proposed by him, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

(The remarks of Mr. DOLE when he submitted the amendment appear earlier in the RECORD under the appropriate heading.)

AMENDMENT NO. 957

Mr. DOLE submitted an amendment, intended to be proposed by him as a substitute for amendment No. 711, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 958

Mr. COTTON submitted an amendment, in the nature of a substitute, intended to be proposed by him, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 959

Mr. BAYH submitted an amendment, in the nature of a substitute, intended to be proposed by him, to amendment No. 711, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 960

Mr. BAYH submitted an amendment, intended to be proposed by him, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 961

Mr. BAYH submitted an amendment, in the nature of a substitute, intended to be proposed by him to amendment No. 911, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 962

Mr. BAYH submitted an amendment, intended to be proposed by him, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 963

Mr. SPONG submitted an amendment, intended to be proposed by him, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

## SOCIAL SECURITY AMENDMENTS OF 1970—AMENDMENTS

AMENDMENTS NOS. 964 AND 965

Mr. MONDALE submitted two amendments, intended to be proposed by him, to the bill (H.R. 17550) to amend the Social Security Act to provide increases in benefits, to improve computation methods, and to raise the earnings base under the old-age, survivors, and disability insurance system, to make improvements in the medicare, medicaid, and maternal and child health programs with emphasis upon improvements in the operating effectiveness of such programs, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

AMENDMENT NO. 968

SAVING THE NATION'S FAIRS

Mr. TYDINGS. Mr. President, I rise today on behalf of myself and Senators COTTON and MURPHY to submit legislation designed to preserve one of the Nation's historic institutions: the State fair. Owing to the revocation of the tax-exempt status of the Maryland State Fair and Agricultural Society, and attempts by the Internal Revenue Service to tax the Rochester, N.H., Fair, the Los Angeles County Fair Association, the Marshfield, Northampton, and Topsfield fairs in Massachusetts, and the Knox Agricultural Fair of Maine, as well as other fairs across the country, most of the Nation's fairs find themselves faced with financial disaster. Unless the tax-exempt status of these fairs is restored

and preserved, they will not be able to operate without very substantial State subsidies—subsidies that will not be forthcoming given the difficult fiscal position of most of our States.

BRIEF LEGISLATIVE HISTORY

Exemption from taxation of labor, agriculture, horticultural organizations, and charitable and educational organizations was provided by the Revenue Act of 1913.

Regulations 45, article 512, issued in 1921 under the Revenue Act of 1918, provided as follows:

Agricultural and horticultural organizations.—Agricultural or horticultural organizations exempt from tax do not include corporations engaged in growing agricultural or horticultural products or raising live stock or similar products for profit, but include only those organizations which, having no net income inuring to the benefit of their members, are educational or instructive in character and have for their purpose the betterment of the conditions of those engaged in these pursuits, the improvement of the grade of their products and the encouragement and promotion of these industries to a higher degree of efficiency. Included in this class as exempt are organizations such as county fairs and like associations of a quasi-public character, which through a system of awards, prizes, or premiums are designed to encourage the production of better live stock, better agricultural and horticultural products, and whose income, derived from gate receipts, entry fees, donations, etc., is used exclusively to meet the necessary expenses of upkeep and operation. Societies or associations which have for their purpose the holding of annual or periodical race meets, from which profits inure or may inure to the benefit of the members or stockholders, do not come within the terms of this exemption. A corporation engaged in the business of raising stock or poultry, or growing grain, fruits, or other products of this character, as a means of livelihood and for the purpose of gain, is an agricultural or horticultural society only in the sense that its name indicates the kind of business in which it is engaged, and it is not exempt from tax.

These regulations were basically unchanged until 1958, when the Internal Revenue Service adopted regulations under the corresponding provision of the 1954 code which dropped all references to racing.

In 1950, an unrelated business income tax on exempt organizations was enacted. Section 511(a) imposes a tax on the "unrelated business income" of most exempt organizations, including those described in section 501(c); that is, income derived from a trade or business "regularly carried on" by a tax-exempt organization is taxed if the business is not "substantially related" to the performance of the functions upon which the organization's exemption is based.

RACING SUBSTANTIALLY RELATED TO MARYLAND FAIR'S FUNCTION

The relevant history of the Maryland State Fair will be briefly stated, for it is typical of our Nation's fairs. The Maryland State Fair is nearly 100 years old. And, its fundamental objectives and activities have remained substantially the same since it first opened in Baltimore County in 1878.

The fair was established and continues to be operated primarily to improve and stimulate interest in the area's agricultural products. In addition, the fair offers grandstand shows, rides, and horse racing on a half-mile track—all of which have been offered since the fair's inception.

That the horse racing is an intimately related and secondary part of the fair is clear. Far more people attend the fair each day than attend the races. Indeed, all persons attending the racing events must purchase a ticket to the fair, and many of them visit the fair as well.

Thoroughbred horse racing has been conducted at the fair for nearly a century for two reasons: as an attraction to encourage greater attendance at the fair, and as a part of the State's horse-breeding industry. At a trial concerning a local real property tax assessment on the track area—which was held to be improper by the highest court of the State of Maryland because the racing area was found to be an integral part of the fair—Dr. Gordon M. Cairns, Dean of the School of Agriculture at the University of Maryland, described racing's integral role:

Any fair exists primarily for an educational function and purpose. This is to acquaint the people of the area through demonstrations, through exhibits, displays and the like. Secondly, the competitions that are held there are the basis for the development of the various aspects of our livestock and agricultural industry.

Basically, all fairs are created with the objective—with two objectives. The one is education and the other is how to get the people there to show them what is educational and they have to have the traditional, shall we say, entertainment features associated therewith to help draw the crowds to those attractions.

Imposition of the unrelated business income tax specifically was to prevent unfair competition by exempt organizations with profitmaking organizations. However, the operations of the racetrack during the fair by the Maryland State Fair is not competitive with any tracks in the State.

Furthermore, the fair's racing license always has been conditional upon the maintenance of a bona fide fair with agricultural exhibits.

In 1924, the racing commission reported that:

The County Fairs, which have become a valuable asset to the State, enjoyed a successful season, and each year are doing more and more to benefit and promote the agriculture and breeding industries of the State. Racing constitutes an important event at each of the fairs, and the Commission is constantly seeking to improve the conditions under which it is conducted.

The 1939 report of the racing commission sums up the role which county fair racing plays in the Maryland breeding industry:

County fair racing . . . furnish(es) an arena in which the breeders with horses that have not developed the class necessary for the big tracks can acquire purse money to reduce the losses they sustain in their breeding ventures.

Finally, though it should be obvious, it is worth pointing out that no part of the net profits of the Maryland State Fair are received by an individual. All funds go to support and improve the fair.

UNREASONABLE IRS POSITION

In 1955, the Internal Revenue Service forced the Maryland State Fair to go to court to obtain a decision that income from its horseracing is an integral part of the fair and, therefore, not subject to the unrelated business income tax. The U.S. District Court for the District of Maryland ruled in the fair's favor.

But even the court ruling apparently has not satisfied the IRS. It has attempted to tax this income in subsequent years and even has proposed revoking the tax exemption of the entire fair.

Then, in 1968, the IRS issued regulations intended to clarify the meaning of "related" activities of an exempt organization. These regulations state that a business is judged "related" if its conduct "has causal relationship to the achievement of exempt purposes; and is 'substantially related', for purposes of section 513, only if the causual relationship is a substantial one."

Given the integral relationship between the fair's racing activity and its other activities, one would have assumed that this IRS regulation had settled the matter once and for all; that racing would clearly be regarded as a related business activity.

But, later that same year, much to everyone's surprise, the IRS issued a ruling claiming that income from the operation of racing run by a fair is unrelated business income subject to Federal income tax. And, the reasons given for the ruling hardly were compelling: First, that the races are carried on in a manner similar to commercial racetracks; second, that the conduct of the races is not related to the organization's exempt purpose because it does not contribute importantly to the educational objectives of the fair; and, third, the races are not a type of recreational activity that is intended to attract the public to the fair's educational features.

The manner of the IRS approach is particularly disturbing—tax only the entertainment revenue with no offset of other fair activities expenses.

NEED FOR CONGRESSIONAL ACTION

Mr. President, a crisis generated by the Internal Revenue Service threatens the tax-free status of our fairs located in virtually every State. I have already mentioned that fairs in California, Maryland, Maine, Massachusetts, and New Hampshire have recently been subjected to IRS attempts to tax horseracing revenues. A recent survey of some of our country's fairs reveals 25 conducting some sort of horseracing as part of fairs, and these fairs are located in the States of California, Colorado, Connecticut, Illinois, Indiana, Iowa, Maine, Massachusetts, Montana, Nebraska, New Hampshire, New Mexico, Ohio, Pennsylvania, South Dakota, Utah, and Vermont. And there are probably other States with fairs conducting horseracing of which we do not know. But we do know that the fairs of virtually all 50 States carry on public entertainment activities such as horseracing, rodeos, dog-racing, auto racing, water shows, thrill shows, stage shows, music shows, circuses and the like, and that there is no policy or logical difference, nor should there be

any, between these types of public entertainment. And we do know that all of these entertainment activities are historically a part of fairs, many, particularly horseracing, antedating the Federal income tax, and vitally necessary today to draw crowds to witness the agricultural achievements of the area.

Mr. President, if the State fairs of this Nation are held liable for Federal income taxes, they surely will be forced to close. An important part of our agricultural economy and of the American heritage will perish. I do not believe that the Senate can afford to stand by idly while this happens.

Therefore, I am offering legislation today to amend the Internal Revenue Code of 1954 to provide that income from entertainment activities held in conjunction with a public fair conducted by an organization in section 501(c) shall not be "unrelated business" and shall not affect the tax exemption of the organization. It is my belief that much support for such legislation exists in the Congress, since almost every State has one or more nonprofit fairs with public entertainment activities of the type I have described.

In my opinion, a new ruling by the IRS on this matter would have been preferable to additional legislation. But, since careful explanation of this desirable alternative discloses that no new ruling will be forthcoming, I believe it is incumbent upon the Congress to act. For no less is at stake than the survival of the State fair as an American institution.

I ask unanimous consent that the text of this amendment be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER (Mr. SAXBE). The amendment will be received, printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 968) was referred to the Committee on Finance, as follows:

AMENDMENT NO. 968

At the proper place insert the following new section:

INCOME FROM PUBLIC ENTERTAINMENT ACTIVITIES AT CERTAIN FAIRS AND EXPOSITIONS

SEC.—(a) Section 513 of the Internal Revenue Code of 1954 (relating to the definition of an unrelated trade or business) is amended by adding the following subsection 513(d):

"(d) SPECIAL RULE FOR FAIRS AND EXPOSITIONS.—The term 'unrelated trade or business' shall not include the operation of a public entertainment activity in conjunction with a National, State, local, regional or international fair or exposition conducted by an organization described in section 501(c); nor shall the operation of any such public entertainment activity prevent, or cause the denial of, the exemption of such organization otherwise exempt under section 501(c)."

(b) The amendment made by subsection (a) shall apply with respect to taxable years beginning after December 31, 1959.

AMENDMENT NO. 974

Mr. EAGLETON (for himself and Mr. SYMINGTON) submitted an amendment, intended to be proposed by them, jointly, to House bill 17550, supra, which was referred to the Committee on Finance and ordered to be printed.

## AMENDMENT OF OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968—AMENDMENT

AMENDMENT NO. 966

Mr. HARTKE. Mr. President, I am today submitting an amendment to H.R. 17825 which amends the Omnibus Crime Control and Safe Streets Act of 1968.

This country is, in fact, fighting two wars. One in Southeast Asia and the other one in the streets of America. The latter conflict is the overtalked, but underfought, war on crime. In 1968, this war killed 12,000 persons, hospitalized 200,000 persons, and produced property losses in excess of $1 billion. If positive action is not taken—and taken soon—a crime crisis of unprecedented proportions will soon envelop our Nation.

Supposedly, title I of the Omnibus Crime Control and Safe Streets Act of 1968 could be the greatest single device at the disposal of the Federal Government to check the crime which is engulfing our cities in fear. Under title I, $63 million was made available to the States in 1969 for the creation of State planning agencies and action programs to upgrade both State and local criminal justice agencies. The appropriations under the act were increased in 1970 to $286 million with much larger expenditures slated for next year.

However, great sums of money have not produced great results as the program has operated far below its potential. The reports by the National League of Cities, the U.S. Conference of Mayors, the Urban Coalition and Urban America, the National Association of Counties, and the National Governors Conference have all indicated the lack of leadership at both the Federal and State levels that now jeopardizes the war against crime.

The Law Enforcement Assistance Administration has not actively sought to encourage excellence in programing at the local level. If the LEAA is to have an effective leadership role, it must abandon the policy of granting 50 percent of the aid under title I to the States without requiring them to designate the action money would be spent geographically and for what purposes.

The urban coalition cites the highly political focus in the distribution of action funds, as one need for reform under title I. Funds have been squandered on piecemeal projects, instead of coming to terms with the crime problem through well-funded innovative programs. Funds have been used for political rewards and not for criminal counteraction. In an attempt to share the harvest of Federal revenues, many grants are so small as to have an insignificant effect on crime. The war against crime should be placed above such political considerations and motivations.

Funds allocated under title I have often been misspent in low-crime areas. The National League of Cities study zeroes in on the seeming inability to insure that planning and action grant funds will be concentrated in those areas with the highest incidence of crime.

I am offering legislation today that will change section 306 of title I so that no more than 50 percent of the funds appropriated by Congress, as compared to the present 85 percent, would go to the States as block grants. Attached to this amendment is the proviso that a State's block-grants allocation will be increased by 20 percent from funds allocated at the discretion of LEAA, where it finds that the comprehensive State plan, required under the act, adequately deals with the the needs and problems of the urban areas and those areas of high crime incidence within the State. The legislation further guarantees that a State's block grant will be increased by another additional 20 percent from LEAA discretionary funds in the case of a State contributing at least 50 percent of the non-Federal share of the cost for programs of local government. Thus, a State that complies with the two provisos in this legislation will receive a 90-percent block-grant allocation rather than 85 percent currently provided.

The purpose of the first proviso is not to weaken the effective control that the States now exerts over title I funds but to increase the sensitivity and awareness of State governments to the needs of their major urban areas. Similarly, the second proviso is not designed to strengthen the position of the urban areas at the expense of the States, but is an attempt to establish the realities resulting from the fiscal situation of the States and cities. If the block-grant approach is to succeed, a partnership must not only be cemented among the Federal and State Governments, but also among the State and local governments. This partnership can be cemented more firmly by requiring a more equitable sharing of the costs, to alleviate the burden placed upon overextended governmental units.

This war cannot be won until we are willing to designate certain priorities and finance these priorities appropriately. We must carry this war to where it is being fought.

The PRESIDING OFFICER (Mr. HUGHES). The amendment will be received and printed, and will lie on the table.

---

## ESTABLISHMENT OF A FEDERAL BROKER-DEALER INSURANCE CORPORATION—AMENDMENTS

AMENDMENT NO. 967

Mr. HARTKE. Mr. President, I submit an amendment to S. 2348. S. 2348 established a federally chartered corporation to protect securities investors against losses resulting from financial failure of broker-dealer firms. My amendment would protect the private pensions of millions of American workers through Federal insurance of their pension plans. The need for both steps should be obvious. The justice of offering protection not only for investors, but also to American workers should be equally clear.

I have no objection to the basic intent and purpose of S. 2348. When President Nixon mentioned in his economic speech of June 17 this concept as one of eight measures needed to "help the people who need help most in a period of economic transition." I readily indicated my support. Of course, I think it is only fair to

mention the previous initiative and leadership of the distinguished Senator from Maine, Senator MUSKIE. He was the original sponsor of this bill, and has been working on it for many months.

My amendment is based on legislation I have offered in the 88th, 89th, and 90th Congresses. Similar legislation has been introduced in the House and extensive hearings on the need for pension reinsurance were held on the House side this year. I first became aware of the need for this legislation when the Studebaker plant closed suddenly in South Bend, Ind., in 1964. At that time many workers, some with 30 years of hard work behind them were denied pensions benefits to which they were entitled. My subsequent studies discovered that between 1954 and 1969, more than 10,000 private pensions have failed, leaving almost 400,000 employees with reduced, or no pensions at all.

At the present time, there are about $100 billion invested in private pension funds. These pensions are to cover the private pensions of some 25 to 30 million American workers. By 1980, it is estimated that private pension plans assets will grow to more than $250 billion, covering some 45 million workers. Clearly we should act now to protect the future and retirement income of these American workers.

Mr. President, I ask unanimous consent that my amendment and explanation of it be printed in the CONGRESSIONAL RECORD at this point.

The PRESIDING OFFICER (Mr. HUGHES). The amendment will be received and printed, and will lie on the table; and, without objection, the amendment and explanation will be printed in the RECORD.

The amendment (No. 967) is as follows:

AMENDMENT NO. 967

On page 31, strike out lines 12 and 13, and insert in lieu thereof the following:

"TITLE I—SECURITIES INVESTOR PROTECTION ACT OF 1970

"SEC. 101. This title may be cited as the 'Securities Investor Protection Act of 1970'."

On page 31, line 14, strike out "SEC. 2." and insert in lieu thereof "SEC. 102".

On page 72, line 18, strike out "SEC. 3" and insert in lieu thereof "SEC. 103".

On page 73, line 8, strike out "SEC. 4" and insert in lieu thereof "SEC. 104".

On page 73, line 8, strike out "Act" and insert in lieu thereof "title".

On page 73, line 9, strike out "Act" and insert in lieu thereof "title".

At the end of the bill, add the following new title:

"TITLE II—FEDERAL REINSURANCE OF PRIVATE PENSION PLANS ACT

"SHORT TITLE

"SEC. 201. This title may be cited as the 'Federal Reinsurance of Private Pension Plans Act'.

"DEFINITIONS

"SEC. 202. As used in this title—

"(a) The term 'pension fund' means a trust, pension plan, or other program under which an employer undertakes to provide, or assist in providing, retirement benefits for the exclusive benefit of his employees or their beneficiaries. Such term does not include any plan or program established by a self-employed individual for his own benefit or for the benefit of his survivors or established by one or more owner-employees exclusively for his or their benefit, or for the benefit of his or their survivors.

"(b) The term 'eligible pension fund' means a pension fund which meets the requirements set forth in section 401 of the Internal Revenue Code of 1954 with respect to qualified pension plans.

"(c)(1) The term 'insured pension fund' means an eligible pension fund which has been in operation for not less than three years and, for each of such years, has met the requirements set forth in subsection (b) and has been insured under the program established under this title.

"(2) Any addition to, or amendment of, an insured pension fund shall, if such addition or amendment involves a significant increase (as determined by the Secretary) in the unfunded liability of such pension fund, be regarded as a new and distinct pension fund which can become an 'insured pension fund' only upon compliance with the provisions of paragraph (1) of this subsection.

"ESTABLISHMENT OF INSURANCE PROGRAM

"SEC. 203. There is hereby established in the Department of Health, Education, and Welfare a program to be known as the Federal insurance program for private pension plans (hereinafter referred to as the 'progam'). The program shall be administered by, or under the direction and control of, the Secretary.

"CONTINGENCIES INSURED AGAINST UNDER PROGRAM

"SEC. 204. (a) The program shall insure (to the extent provided in subsection (b)) beneficiaries of an insured pension fund against loss of benefits to which they are entitled under such pension fund arising from—

"(1) failure of the amounts contributed to such fund to provide benefits anticipated at the time such fund was established, if such failure is attributable to cessation of one or more of the operations carried on by him in one or more facilities of such employer; or

"(b) The rights of beneficaries of an insured pension fund shall only be insured under the program to the extent that such rights do not exceed—

"(1) in the case of a right to a monthly retirement or disability benefit for the employee himself, the lesser of 80 per centum of his average monthly wage in the five-year period for which his earnings were the greatest, or $500 per month;

"(2) in the case of a right on the part of one or more dependents, or members of the family, of the employee, or in the case of a right to a lump-sum survivor benefit on account of the death of any employee, an amount found by the Secretary to be reasonably related to the amount determined under subparagraph (1).

In the case of a periodic benefit which is paid on other than a monthly basis, the monthly equivalent of such benefit shall be regarded as the amount of the monthly benefit for purposes of clauses (1) and (2) of the preceding sentence.

"(c) If an eligible pension fund has not been insured under the program for each of at least the three years preceding the time when there occurs the contingency insured against, the rights of beneficiaries shall not be insured and in lieu thereof the contributions made on behalf of such pension fund during such period shall be returned to the pension fund.

"PREMIUM FOR PARTICIPATION IN PROGRAM

"SEC. 5. (a) Each eligible pension fund may, upon application therefor, obtain insurance under the program upon payment of such annual premium as may be established by the Secretary. The Secretary shall establish separate premium rates for insurance against each of the contingencies described in section 204(a)(1) and section 204(a)(2). In establishing such premium rates for insurance against the contingency described in section 204(a)(2), the Secretary shall provide that the rate shall vary, to whatever extent is appropriate, for different classes of investments. Premiums rates established under this section shall be uniform for all pension funds insured by the program and shall be applied to the amount of the unfunded obligations and assets or class of assets, respectively, of each insured pension fund. The premium rates may be changed from year to year by the Secretary, when the Secretary determines changes to be necessary or desirable to give effect to the purposes of this title; but in no event shall the premium rate established for the contingency described in section 204(a)(1) exceed 1 per centum for each dollar of unfunded obligations, nor shall the aggregate premium payable by any insured pension fund for the contingency described in section 204(a)(2) exceed one-quarter of 1 per centum of the assets of such fund.

"(b) The Secretary, in determining premium rates, and in establishing formulas for determining unfunded obligations and assets of pension funds, shall consult with, and be guided by the advice, the Advisory Council (established by section 208).

"(c) If the Secretary (after consulting with the Advisory Council) determines that, because of the limitation on rate of premium established under subsection (a) or for other reasons, it is not feasible to insure against loss of rights of all beneficiaries of insured pension funds, then the Secretary shall insure the rights of beneficiaries in accordance with the following order of priorities—

"First: individuals who, at the time when there occurs the contingency insured against, are receiving benefits under the pension fund, and individuals who have attained normal retirement age or if no normal retirement age is fixed have reached the age when an unreduced old-age benefit is payable under title II of the Social Security Act, as amended, and who are eligible, upon retirement, for retirement benefits under the pension fund;

"Second: individuals who, at such time, have attained the age for early retirement and who are entitled, upon early retirement, to early retirement benefits under the pension fund; or, if the pension fund plan does not provide for early retirement, individuals who, at such time, have attained age sixty and who, under such pension fund, are eligible for benefits upon retirement;

"Third: individuals who, at such time, have attained age forty-five;

"Fourth: individuals who, at such time, have attained age forty; and

"Fifth: in addition to individuals described in the above priorities, such other individuals as the Secretary, after consulting with the Advisory Council, shall prescribe.

(d) Participation in the program by a pension fund shall be terminated by the Secretary upon failure, after such reasonable period as the Secretary shall prescribe, of such pension fund to make payment of premiums due for participation in the program.

"REVOLVING FUND

"SEC. 206 (a) In carrying out his duties under this title, the Secretary shall establish a revolving fund into which all amounts paid into the program as premiums shall be deposited and from which all liabilities incurred under the program shall be paid.

"(b) The Secretary is authorized to borrow from the Treasury such amounts as may be necessary, for deposit into the revolving fund, to meet the liabilities of the program. Moneys borrowed from the Treasury shall bear a rate of interest determined by the Secretary of the Treasury to be equal to the average rate on outstanding marketable obligations of the United States as of the period such moneys are borrowed. Such moneys

shall be repaid by the Secretary from premiums paid into the revolving fund.

"(c) Moneys in the revolving fund not required for current operations shall be invested in obligations of, or guaranteed as to principal and interest by, the United States.

"AMENDMENT TO INTERNAL REVENUE CODE

"SEC. 207. (a) Section 401(a) of the Internal Revenue Code of 1954 (relating to definition of qualified pension and other similar plans) is amended by adding at the end thereof the following new paragraph:

"'(11) Notwithstanding the preceding provisions of this subsection, no pension fund which, for any taxable year is insurable under the Federal Reinsurance of Private Pension Plans Act, shall be a qualified pension plan under this section if such fund is not insured for such year under the program established under such Act.'

"(b) Section 404(a)(2) of such Code (relating to deductibility of contributions to employees' annuities) is amended by striking out 'section 401(a) (9) and (10)' and inserting in lieu thereof 'section 401(a) (9), (10), and (11)'.

"(c) The amendments made by this section shall be effective with respect to taxable years which begin not less than six months after the date of enactment of this title.

"ADVISORY COUNCIL

"SEC. 208. (a) There is hereby created a Federal Advisory Council for Insurance of Employees' Pension Funds (hereinafter referred to as the 'Advisory Council'), which shall consist of nine members, to be appointed by the President, by and with the advice and consent of the Senate. The President shall select, for appointment to the Council, individuals who are, by reason of training or experience, or both, familiar with and competent to deal with problems involving employees' pension funds and problems relating to the insurance of such funds. Members of the Council shall be appointed for a term of two years.

"(b) Members shall be compensated at the rate of $100 per day for each day they are engaged in the duties of the Advisory Council and shall be entitled to reimbursement for traveling expenses incurred in attendance at meetings of the Council. The Advisory Council shall meet at Washington, District of Columbia, upon call of the Secretary who shall serve as Chairman of the Council. Meetings shall be called by such Chairman not less often than twice each year.

"(c) It shall be the duty of the Advisory Council to consult with and advise the Secretary with respect to the administration of this title."

In lieu of the matter relating to amending the title of the bill, insert the following:

"Amend the title so as to read: 'A bill to provide greater protection for customers of registered brokers and dealers and members of national securities exchanges, and for other purposes.'"

The explanation presented by Mr. HARTKE is as follows:

PUBLIC REINSURANCE FOR PRIVATE PENSION PLANS

A. PURPOSE OF THE PROGRAM

To establish a Federal system of reinsurance for private pension plans. The program would be financed by premiums to be paid by pension funds as a condition of qualification for favorable tax treatment under the Internal Revenue Code. Such a program would be similar to the program of insurance of deposits in savings banks and savings and loan associations through the Federal Deposit Insurance and the Federal Savings and Loan Insurance Corporations and the insurance of the mortgage obligation to make future payments under the Federal Housing Act.

B. NEED FOR THE PROGRAM

Congress has provided through legislation strong incentives for the establishment of private pension plans. Although the response has been gratifying in terms of the numbers of such plans which have been instituted, the very fact that most pension programs have been in existence for so few years, has created a serious problem. Since most pension plans are newly created they are still far from being fully funded even where a program of funding has been undertaken. In fact, present tax regulations preclude the funding of past service liabilities in less than about 12 years; they do not require that they be funded at all.

As a result termination of a pension plan may mean that the funds accumulated are inadequate to even pay full pensions to those nearing retirement age, let alone to protect the benefit expectations of other workers who may find that the security they thought they had established for their older years, through the accumulation of pension credits, has disappeared overnight.

The proposal embodied herein would insure to the worker at least some measure of the security which he has rightly come to expect; and because of its self-financing feature would not result in the expenditure of 1 cent of public funds. It would protect a worker's investment in a pension fund just as his savings are insured if deposited in a savings bank or a savings and loan association which are protected by insurance through a Government corporation. It would also insure the obligations of the fund to make future payments to him just as a mortgagee's right to receive future mortgage payments is insured by FHA.

C. PENSION RIGHTS PROTECTED

It is hoped that within the maximum premium rate set by the bill that all credits earned under all private pension plans will be able to be protected against the risk of termination. If, however, the premium should prove to be insufficient, the bill establishes a series of priorities for protection.

The highest priority would go to those who have already retired and who are receiving a pension and to those who are eligible to retire under the terms of their plan and who have attained normal retirement age. Next in line for consideration would be those who are eligible to retire by virtue of having attained the age specified in the plan for early retirement. If early retirement is not provided, age 60, the usual age for early retirement, should be used.

Third in line for possible coverage would be those workers whether or not eligible to retire who are over the age of 45 and who therefore presumably will find it impossible to accumulate sufficient new credits to provide adequately for their old age.

Fourth in the line of priorities would be those workers who have reached the age of 40. And last, reinsurance would be provided for all pension credits regardless of the age of the individual at the time of termination. This last classification would of course provide the complete coverage of every earned pension credit referred to earlier as the ultimate goal of this proposal. The desirability of such extensive coverage, if at all feasible, need not be restated.

It should be understood that insurance of credits in the third, fourth, and last priorities would not mean immediate payments from the pension reinsurance system. Payments would only be made when the individual reaches the normal retirement age.

D. PENSION PLANS ELIGIBLE FOR INSURANCE

The proposal contemplates insurance for all private pension plans which qualify under the Internal Revenue Code and which have been in operation and have paid premiums for a specified number of years before the insurance became effective would seem necessary. Such a suicide clause would seem necessary to prevent the establishment of a program with the knowledge that the plan will be terminated for one of several reasons. This would exclude "pay as you go" plans but would include all funded plans whether insured or trusteed. This would include plans which provide for terminal funding, which provide only for the funding of future service liabilities, and which provide for the funding of both past and future service liabilities. It is recognized, of course, that since these different types of plans have significantly different levels of funding, that the unfunded liabilities will vary from plan to plan. Since it is this unfunded liability that will be insured, the amount of the individual plan's premium will be computed on the basis of the amount of unfunded liability.

While the bill proposes to insure all qualified pension plans, further study may prove it necessary to require a reasonable amortization program (30 or 40 years) for past service liabilities. Such a requirement may be necessary if it is determined that the reinsurance scheme would progressively become more expensive because of the large unfunded liabilities of aging firms.

The only limitation which I believe should be placed on this all-inclusive aspect of the insurance is one related to the amount of benefit which any particular plan promises to its members. This would be similar to the limitation of $10,000 of savings which are eligible for insurance under existing programs. Such limitations are set forth in the bill.

E. RISKS AGAINST WHICH THE SYSTEM SHOULD INSURE

The reinsurance system would insure against all risks to earned pension credits if it is to provide a meaningful sense of security to the employee. These risks fall into two categories: (1) risks to the plan which depend on the degree to which it is funded, and (2) risks to the plan which depend on forces outside of it and which operate irrespective of the extent to which it is funded.

A clear example of a risk in the first category would be the termination of a plan because of the business failure of the employer. In such a case the risk insured against would be its unfunded liability which is attributable to the rights which are insured. As previously pointed out, the premium for insurance of this risk would be determined by the amount of unfunded liabilities.

Since the reinsurance plan is basically underwriting the benefit levels set forth in the plan, the amount of the unfunded liability, both for the purpose of determining the liability insured and the premium charged, would be determined on the basis of a set of standard actuarial assumptions. These actuarial assumptions could be determined by the Secretary on the basis of consultation with the Advisory Council established specifically for the purpose of consultation on the proposed program.

When the employer has not gone out of business, but has closed a plant or reduced the work force, continued funding of the past service liability may become such a burden as to jeopardize the existence of the remaining operation. To protect the rights of both terminating and continuing employees, the bill provides that where there is a partial termination determined in accordance with recent Internal Revenue Service Regulations (code sec. 401(a)(7)), an appropriate portion of the assets would be allocated to the terminating employees. The reinsurance would then pick up any additional liability on behalf of those employees. The employer would continue operation of

his plan, with the remaining assets, on behalf of the continuing employees.

Where there is no termination, the program would not be applicable but the per capita past service amortization payment on a plan exceeds some specified percentage (e.g., 200 percent) of the initial per capita past service amortization payment, usually as a result of a severe reduction in the work force, the reinsurance would assume any past service liability financing required which is in excess of the specified percentage.

The second type of risk different from those which we have been discussing and which should be insured against, is the risk of depreciation of the funded assets. The risk involved, in the situation is probably very slight and is not dependent on the size of the unfunded liability. The premium for this risk is, therefore, computed separately than the premium for insuring the unfunded liabilities. While the risk here would depend upon the types of assets, it would probably be administratively unfeasible, as well as undesirable to set reinsurance premiums for individual investments at the same time consideration might be given to vary the premium by class of assets; i.e., Government bonds, stocks, mortgages, etc.

Since the premiums established, particularly with respect to the second risk outlined above, may eventually prove to be excessive, the legislation includes a provision authorizing the administrator to provide for the suspension or reduction of either type of premium for a period of time.

F. ESTABLISHMENT AND ADMINISTRATION OF REINSURANCE SYSTEM

The most logical existing agency to administer the system of reinsurance for private pension plans would be the Social Security Administration in the Department of Health, Education and Welfare. In addition to having the actuarial and technical personnel who are engaged in a similar operation, the administration by the social security offices would provide an opportunity for automatic notification to a prospective pensioner under a private plan at the time he files an application for social security benefits.

The legislation authorizes the Secretary to borrow moneys from the Treasury for the establishment of a reinsurance fund. This money would be repaid by the premiums which the fund would receive and the legislation would thereby achieve a self-financing status at no cost to the public.

## DEPARTMENT OF CONSUMER AFFAIRS ACT—AMENDMENTS

AMENDMENT NO. 969

Mr. WILLIAMS of New Jersey. Mr. President, I submit, for appropriate reference, an amendment to S. 860—the Department of Consumer Affairs Act—a bill which I have cosponsored.

The purpose of this amendment is to help provide greater assurance that the food products purchased by America's consumers are clean, high quality, and properly branded.

In 1891 Federal food inspection first began with the certification of meat for wholesomeness by the Department of Agriculture.

Since then, other major milestones include the initiation of inspection services for:

Prevention of adulterated and misbranded food from moving in interstate commerce in 1906;

Grain in 1907;

Certain dairy products in 1908;

Fresh fruits and vegetables in 1917;

Shellfish in 1925;

Dressed poultry in 1927; and

Poultry products moving in interstate commerce in 1957.

Today virtually all food products receive some form of inspection or grading activity.

Yet there is strong cause for concern. For example, a recent report issued by the Government Accounting Office revealed that there are some grave inadequacies in the Federal meat inspection program. In a sampling, serious unsanitary conditions were found. Improper slaughter operations resulted in the contamination of carcasses with fecal material and hair. Meat was found to be processed in unsanitary areas and with dirty equipment.

And there is compelling evidence to indicate that inspection for other food products is often substandard or nonexistent in some instances.

One reason for this critical problem is that our food inspection legislation has usually evolved on a piecemeal basis, designed to meet difficulties as they arose.

As a consequence, parts of the food inspection function are performed by all levels of government. Several Federal agencies are now charged with the duty of inspecting the Nation's food supply, including the Department of Agriculture; the Department of Health, Education, and Welfare; the Department of the Interior; and even the Department of Defense.

This has often led to unnecessary overlap—causing alarm among consumers, concern among advocates of more efficient government and dissatisfaction from the food industry.

GAO estimates that more than 14,500 persons are now involved in Federal food inspection alone.

Moreover, inspection is frequently performed by more than one government agency at the same establishment and oftentimes on the same product.

For instance, at a dairy products company visited by GAO, the following duplication was found to exist:

Military veterinarians made monthly sanitary inspections and tested milk samples for bacteria and butterfat;

The Department of Agriculture also checked the establishment's sanitary conditions and took butter and cheese samples;

Personnel from the Food and Drug Administration inspected periodically for potential health hazards; and

The State health department checked the company's sanitary conditions and analyzed the fluid milk for bacteria.

Because of this fragmented approach, there is no clearcut coordinated Federal policy for inspection of our Nation's food supply.

In New Jersey, legislation has been introduced which would discontinue that State's meat and poultry inspection program and rely solely upon the Federal program. While I understand that this move is being made as an economy measure, I am deeply disturbed that the health of the people of New Jersey may be jeopardized by this action. The Comptroller General's report makes clear that we must improve the quality and efficiency of our food inspection activities before the States can in good conscience defer to the Federal Government.

The American consumer pays for this neglect, which may be in the form of poorer quality or unwholesome food.

Equally disturbing are reports that, based on the law of averages, each person in the United States is likely to have a diseased, contaminated, adulterated, or misbranded food product served to him at some point during any given year. This is unnecessary and unpardonable in our modern, technologically advanced society.

For these reasons, I introduce this amendment today to bring the many food inspection services under one Federal agency, the proposed Department of Consumer Affairs:

A department that will protect the consumer in an effective and uncompromising fashion.

A department that will give added meaning to the right of the consumer to be protected against inferior quality and adulterated food.

This Department, it seems to me, would be especially well equipped for discharging this function because it can act as a central spokesman for all consumers—all 200 million Americans.

Moreover, it will be one agency charged with the duty of representing the consumer in the highest councils of Government.

With this approach, we can streamline and strengthen Federal food inspection.

By placing this duty within the jurisdiction of one Federal department, we can hope to achieve clearer lines of responsibility.

Greater coordination can also be expected because there will be no unnecessary overlapping functions between competing agencies.

And most important, when the American housewife goes to the supermarket to buy food for her family, she can be more secure that her fruits, vegetables, fish, or meat are clean, wholesome and properly labeled.

In this manner, The American consumer can be more assured of a fair and honest exchange for his hard earned dollar.

Now is the time to move closer to these goals. Now is the time to provide for an effective and coordinated food inspection service.

Therefore, I urge prompt and favorable consideration of this amendment to protect:

Consumers from having adulterated and mislabeled products pawned off on them;

Producers against market loss caused by inferior products replacing wholesome food products;

Honest businessmen maintaining high-quality standards from unfair competition; and

The health and safety of all Americans.

Mr. President, I ask unanimous con-

sent that the text of this amendment be printed in the RECORD.

The PRESIDING OFFICER (Mr. SAXBE). The amendment will be received and printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 969) was referred to the Committee on Government Operations, as follows:

AMENDMENT NO. 969

On page 8, strike out lines 1 through 4 and insert in lieu thereof the following:

"(3) all functions, powers and duties of the Secretary of Agriculture under the Federal Meat Inspection Act (7 U.S.C. 601 et seq.), the Poultry Products Inspection Act (21 U.S.C. 451–470), and section 203(h) of the Agricultural Marketing Act of 1946 (7 U.S.C. 16–22(h)) relating to the inspection, certification and identification of the class, quantity, quality and condition of agricultural commodities, and any other functions, powers and duties of the Secretary of Agriculture which relate to the standardization, grading, or classing of agricultural commodities for consumer consumption;".

On page 8, line 16, strike out the period and insert in lieu thereof a semicolon.

On page 8, line 22, strike out the semicolon and insert in lieu thereof a period.

---

## ESTABLISHMENT OF A COMMISSION ON SECURITY AND SAFETY OF CARGO—AMENDMENTS

AMENDMENTS NOS. 970 THROUGH 973

Mr. BIBLE. Mr. President, I submit four amendments I intend to propose to my bill, S. 3595, to establish a Commission on Security and Safety of Cargo.

Their purpose is to change the thrust of this bill, introduced on March 16, 1970, from that of establishing a commission to recommend solutions to meet the problem of cargo theft to legislation that would also begin immediately to deal affirmatively with some of the more obvious phases of the increasingly critical public carrier crime crisis. I am confident this course of action will meet the approval of eight distinguished and equally concerned Senators who are cosponsors of this bill—Mr. JENNINGS RANDOLPH of West Virginia, Mr. HARRISON A. WILLIAMS, JR., of New Jersey, Mr. JOSEPH M. MONTOYA of New Mexico, Mr. FRED R. HARRIS of Oklahoma, Mr. JACOB JAVITS of New York, Mr. PETER DOMINICK of Colorado, Mr. ROBERT DOLE of Kansas, and Mr. TED STEVENS of Alaska.

Since the introduction of my bill, the Senate Small Business Committee, of which I have the honor to be chairman, has held additional hearings and conducted further investigation into the growing magnitude of the problem posed by cargo theft, pilferage and hijacking now threatening the normal channels of commerce nationwide.

Mr. President, I believe that some urgency is appropriate because we know that cargo crime by theft, pilferage, hijacking, and vandalism within the transportation cycle nationally in 1969 cost American businesses upward of some $1,200,000,000.

These loss figures, developed by our committee from cargo claims and other data, do not include U.S. mail thefts, as an example, showing $65 million in losses of securities and other high-value items from 1967 to 1969 at New York City's John F. Kennedy Airport alone. Today the record will bear out a judgment that there are massive assaults by organized and unorganized criminal elements on cargo moving in interstate and international commerce.

My four amendments propose:

First. That the Secretary of Transportation be required, in consultation with air, rail, truck, and water transport regulatory agencies and the Commission on Security and Safety of Cargo, to establish mandatory physical security standards immediately for docks, piers, terminals and vehicles to guarantee that steps be taken to protect cargo.

Second. That the Commission's term of existence be reduced from 5 to 2 years, thus requiring final recommendations at an earlier date.

Third. That the Commission make a specific evaluation and recommendation about the development of a Federal license and/or identification system for cargo handlers in all transport modes.

Fourth. That the Shipping Act of 1916 be amended to require the Federal Maritime Commission to establish a uniform loss reporting system immediately to be implemented by agency regulations.

In explanation of my amendments, the first would require carriers to meet certain standards. To their credit, most of the modes of transportation have attempted to establish voluntary programs to meet some physical security standards. However, data provided to our committee, some from carriers themselves, show these attempts have largely been ineffective for many reasons. As I have previously commented at our hearings, it appears many carriers are lackadaisical and slipshod in establishing security standards for cargo. Their efforts to date have failed to dent the problem. Too many public carriers, right along with some of our regulatory agencies, have failed to realize they owe responsibilities to the consumer public and to business shippers in addition to the carriers they regulate.

The second amendment really comes to the heart of the problem—the urgency of coming to grips with cargo crime generally. The bill's language is clear that the Commission be required to propose specific solutions to the Congress, the President, and the other sectors involved. I emphasized that the Commission is not intended to be merely another study commission, but is rather one with a specific mission to propose definitive, deterrent programs in an admittedly difficult area. I am convinced that members of the Commission would recognize the urgency and enormity of the problem and could, by concentrated work, propose effective action programs within a 2-year period, rather than 5 years, as originally proposed.

The third amendment deals with a complex area wherein the rights of labor, management, and the public good are involved. However, it is such a vital component, as it concerns the integrity of the thousands of cargo handlers through whose hands billions of dollars worth of goods of all sizes, shapes, and values pass daily. Whether cargo can be transported safely without improved screening and identification of employees would seem extremely doubtful, based upon evidence available today. Certainly, specific evaluations and recommendations from the proposed Commission, with its broad-base membership, are absolutely necessary.

The fourth and final amendment would require the Federal Maritime Commission to establish a uniform loss reporting system.

I am pleased to announce that it will not be necessary to require by statute that the Civil Aeronautics Board or the Interstate Commerce Commission establish such uniform loss reporting systems for air and truck carriers because I have received communications from the Chairmen of both agencies within the past week assuring me that mandatory loss reporting systems will be implemented by both agencies immediately by appropriate rulemaking proceedings. This was done in response to our committee's recommendations and my persistent personal appeals that this step be taken so that not only the regulatory agencies, but all concerned businesses and their customers may know what the true dimensions of cargo theft and loss are.

The facts are that today no governmental agency or private company, trade or service organization knows the value, the tonnage or description of cargo moving through our regular commerce cycle. Consequently, there are no accurate statistics on losses, thefts, or their locations and value.

The Federal Maritime Commission has decided against a uniform loss reporting system for its waterborne cargo. My amendment would require such a reporting system in order that the Congress, the executive branch, the shipping public, and even the Maritime Commission itself could know the true extent of maritime cargo theft and pilferage at the Nation's waterfront facilities, estimated at approximately $170 million last year.

The Federal Maritime Commission believes that certain modified data-reporting forms of the U.S. Customs Bureau will handle theft-loss statistics sufficiently for incoming international cargo, and that foreign-bound export cargo and domestic offshore—coastwise—cargo would not require loss reporting of any kind.

I cannot accept this half-way, wait-and-see attitude, while American exporters, trying to develop foreign markets abroad and do their part in the balance-of-payments trade problem, are left to shift for themselves in trying to assess their cargo thefts. The same is true for businesses who use ships in our coastwise domestic trade who would also be without knowledge of their losses or information about pinpointing theft-prone areas.

I submit that the strength of our entire public carrier transport chain is no stronger than its weakest link. I would hope the Federal Maritime Commission might have a change of heart, but if not,

then I would urge that mandatory uniform loss reporting requirements be imposed. This would permit our three public carrier regulatory agencies—the ICC, CAB, and the FMC—to pull together as a team to meet the cargo crime crisis, instead of having one pulling sideways, maverick-like. The time for backing, filling, and delaying by our carried regulatory agencies is long past in the fight against business cargo crime losses and crime-inflated prices paid by the consumer in the marketplace.

Mr. President, I ask unanimous consent that correspondence between the committee and the three regulatory agencies about this matter be printed in the RECORD at the conclusion of my remarks, together with the proposed amendments and a statement I delivered before the Senate Commerce Committee this morning explaining in greater detail the subject area covered by my amendments proposed herewith.

We have guards riding shotgun today on our big passenger airliners to curb hijacking. Riding shotgun on some cargo shipments within this country is already in progress. Unless effective steps are taken, we may have the spectacle of more shotguns riding cargo transport carriers regulatory to save them from thieves and vandals.

The PRESIDING OFFICER (Mr. SAXBE). The amendments will be received and printed, and will be appropriately referred; and, without objection, the amendments, letter, and statement will be printed in the RECORD.

The amendments (Nos. 970 through 973) were referred to the Committee on Commerce, as follows:

AMENDMENT No. 970

On page 11, line 23, insert the following new section:

"(9) evaluation and recommendation on the need and desirability of developing a Federal system for the licensing and/or identification of all individuals engaged in the handling of cargo, in any mode of transportation, moving in interstate or international commerce. The report under this section shall be made to the President and to the Congress pursuant to the provisions of this Act."

Renumber the succeeding sections accordingly.

---

AMENDMENT No. 971

On page 12, line 16, delete Section 9, and in lieu thereof insert the following:

"SEC. 9. The Commission shall continue in existence for a period not to exceed two years after the appointment of its members pursuant to the provisions of this Act, at which time it shall cease to exist. Prior to such date, it shall provide the Congress with a complete report on its activities pursuant to this Act, and its final recommendations."

---

AMENDMENT No. 972

At the end of the bill insert the following:

"FREIGHT SECURITY STANDARDS

"SEC. 10. (a) Prior to the termination of the Commission established pursuant to this Act, the Secretary of Transportation, after consultation with the Commission, the Civil Aeronautics Board, the Interstate Commerce Commission and the Federal Maritime Commission, shall promulgate such regulations as may be necessary for the security and safety of freight in transportation (including at terminals) by each of the separate carrier modes including freight forwarders under the jurisdiction of each agency.

"(b) Regulations promulgated pursuant to this section shall be deemed to have been promulgated pursuant to the Interstate Commerce Act, the Federal Aviation Act of 1958, and the Shipping Act, 1916, respectively."

---

AMENDMENT No. 973

At the end of the bill insert the following:

"UNIFORM WATER CARRIER LOST AND DAMAGED CARGO REPORTING

"SEC. 11. (a) Section 21 of the Shipping Act, 1916, is amended by inserting '(a)' after 'SEC. 21' and by inserting at the end thereof a new subsection as follows:

"'(b) Each common carrier subject to this Act shall submit to the Federal Maritime Commission, for each three month period, a report listing and evaluating all cargo damaged, lost, missing, stolen or presumed stolen from such carrier or any agent thereof during such period.'

"(b) The amendment made by this section shall be effective on the first day of the first calendar month beginning after the date of enactment of this Act."

The matters presented by Mr. BIBLE are as follows:

FEDERAL MARITIME COMMISSION,
*Washington, D.C., August 20, 1970.*

Hon. ALAN BIBLE,
*Chairman, Select Committee on Small Business, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: At the time of my testimony before your Committee on June 25, 1970, I advised that our staff would endeavor to suggest a possible reporting system that would provide better statistics with respect to lost cargo. We have endeavored to find a way through existing reports or records to accomplish the desired goal and thereby not place a further paperwork and reporting burden on an industry and a government that is desperately trying to reduce such.

We concluded that U.S. Customs Discrepancy Report, Customs Form 5931, that must currently be filed with the Bureau of Customs to report shortages and overages and the reasons therefor, could be utilized for this purpose with respect to inbound cargo if data appearing thereon was correlated into an overall report and particularly if certain modifications were made.

We found that the Department of the Treasury and its Bureau of Customs had come to the same conclusion. A revised Form 5931 has already been drafted pursuant to a proposed amendment to their rules pertaining to cargo accountability. The proposed amendments are expected to be in effect later this year and, according to Treasury and Customs officials, the statistical data yielded will show the description of the merchandise, its value, and where, when and how lost. I understand that your Committee is fully cognizant of this.

An appropriate analysis of the results on a regular and timely basis should pinpoint the trouble areas allowing those charged with custody of the goods to provide adequate protection commensurate with the risks involved as well as be an aid to law enforcement if the cargo is found to be stolen.

We were unable to locate an existing report that would provide similar information with respect to export cargo or cargo in the domestic off-shore trades. It is our view, however, based on contacts with carrier, insurance and governmental sources that the outbound problem is not as great as the inbound foreign problem. One of the prime reasons for this is, of course, the fact that cargo outbound is normally held on dock for a very short time reducing the opportunity for theft. In any event, particularly with the advent of containers, a loss in the export trades will normally not be detected until after delivery to the foreign consignee. This fact complicates a reporting system. Unlike the inbound trade where the Bureau of Customs must clear the cargo, collect duty, etc., the outbound trade has no such requirement from the standpoint of this government and the value and accuracy of reports would be reduced accordingly. All things considered, it is our present suggestion that prior to imposing a reporting requirement with respect to export cargo that the results of the revised inbound reporting requirements be evaluated and implemented to cope with the pinpointed trouble areas. It is believed that the same piers and/or terminal areas are likely to be involved and if successful in reducing thefts inbound the natural consequences will be to reduce thefts outbound as well.

The hearings of your Committee have highlighted and brought into focus the inroads that crime has made into our transportation lifeline and have caused both the private and public sectors to initiate corrective action which, hopefully, will have beneficial results.

Again, I wish to express my appreciation for the opportunity to testify before your Committee on this very important matter.

Sincerely,

HELEN DELICH BENTLEY,
*Chairman.*

---

CIVIL AERONAUTICS BOARD,
*Washington, D.C., September 25, 1970.*

Hon. ALAN BIBLE,
*Chairman, Select Committee on Small Business, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Thank you for your letter of August 19, 1970, regarding the introduction of a rulemaking action to require carrier reports on air freight loss and damage.

I have now discussed the matter with other members of the Board, and am pleased to advise you that we will proceed with a proposed rulemaking notice on freight loss and damage data reporting.

In the interests of intermodal uniformity, as noted in yours of August 19, we shall review our proposed action with the Interstate Commerce Commission and Federal Maritime Commission in advance of our actual release to the public and the carriers.

Sincerely,

SECOR D. BROWNE,
*Chairman.*

---

U.S. SENATE,
SELECT COMMITTEE ON SMALL BUSINESS,
*Washington D.C., August 19, 1970.*

Hon. SECOR D. BROWNE,
*Chairman, Civil Aeronautics Board, Washington, D.C.*

DEAR MR. CHAIRMAN: Thank you for your letter of July 30, 1970, concerning the cargo loss reporting system of air carriers. My primary complaint of the system proposed by the carriers is that it would not provide a true and timely picture of air cargo losses. The proposal of the air carriers would simply provide statistics based solely on claims paid by the air carriers. You are aware, I am sure, that these claims may be ones that have been resolved only after lengthy negotiation and thus could, in fact, be very old claims. Also, this would not provide adequate information on claims filed by shippers which were disallowed by the air carriers.

The Interstate Commerce Commission in Title 49, Part 1207, of the *Code of Federal Regulations* requires surface carriers to maintain a freight claim register showing each claim received for cargo loss and damage, the date and amount of the claim, the waybill number and type of commodity, etc. I have just written to the Honorable George Stafford, Chairman of the Interstate

Commerce Commission, requesting that the ICC consider utilizing this mandatory claims register as the basis for the development of a periodic, uniform loss reporting system. A copy of my letter to Chairman Stafford is enclosed.

You are aware that air cargo theft is becoming a serious threat to the viability of the air cargo industry.

As you know, the States of New York and New Jersey have enacted legislation in the form of a bi-State compact, now pending before the U.S. Congress, in order to seek to cope with this growing problem in their respective jurisdictions. Also, the U.S. Department of the Treasury has issued new rulings with respect to curbing crime in international import air cargo traffic.

In order to have complete knowledge as to the true extent of the problem nationally, it will be necessary to have a uniform loss reporting system such as I have proposed to you on many occasions and reiterate now. I urge you as Chairman of the Civil Aeronautics Board to consider a rulemaking for each air carrier and requiring the carriers to submit to the CAB periodic, at least quarterly, compilations of statistics based on this claims register. The report should be by commodity with provision showing the actual cash value of the commodity rather than a dollar figure based on the airlines limitation of liability. I hope that you will give serious and immediate consideration to this proposal. I will be happy to assist you in any way possible to develop a program along these lines.

With all best wishes.

Cordially,

ALAN BIBLE,
*Chairman.*

---

INTERSTATE COMMERCE COMMISSION,
*Washington, D.C., September 14, 1970.*

HON. ALAN BIBLE,
*Chairman, Select Committee on Small Business, U.S. Senate, Washington, D.C.*

DEAR CHAIRMAN BIBLE: In further reference to my letter of August 26, 1970, I am pleased to advise that the Commission has considered and approved the institution of a rulemaking proceeding to require Class I and Class II motor carriers to submit to the Commission on a quarterly basis a report of cargo loss and damage claims. It is intended that for reporting purposes claims will be reported on an "as filed" basis and will be combined in dollar amounts by various types of shipments, cause of claim (theft, damage, concealed damage, fire, etc.) and as far as practical the location where known theft occurred.

Preparation of the rulemaking notice and proposed reporting form will be processed without delay. In this regard, we will be pleased to have Mr. Evans, your Chief Investigator, or any other member of your Committee review the proposed form prior to its official release for public consideration to assure that it will fulfill the needs of your Committee and other interested parties.

Sincerely yours,

GEORGE M. STAFFORD,
*Chairman.*

---

U.S. SENATE,
SELECT COMMITTEE ON SMALL BUSINESS,
*Washington, D.C., August 19, 1970.*

HON. GEORGE M. STAFFORD,
*Chairman, Interstate Commerce Commission, Washington, D.C.*

DEAR MR. CHAIRMAN: As you are aware from recent correspondence that we have exchanged, based on the investigation of truck highjacking and cargo theft that the Senate Small Business Committee has been conducting, I feel that a periodic, uniform loss reporting system is essential if we are to ever fully understand the true extent of this problem, and its impact on the transportation economy and the shipper-consumer. Periodic, uniform loss reporting by commodity would be a significant factor in the development of a law enforcement response to crime against goods moving in surface transportation. A loss reporting system would also provide a basis on which the Federal Government as well as the surface carriers might develop improved loss prevention systems and thus provide for better safety and security of cargo.

Title 49, Part 1207 of the *Code of Federal Regulations*, Section (e) requires all Class I and II carriers to maintain a freight claims register showing each cargo loss and damage claim received. This provision requires that the claim be assigned a number and that it indicate the commodity for each claim.

After reviewing this regulation and discussing it with experts in the transportation community, I feel that this claims register would provide a sound basis on which to establish a mandatory, periodic, uniform loss reporting system. I therefore urge that you as Chairman of the Interstate Commerce Commission consider a rule-making proceeding to require that Class I and Class II trucking companies submit to the ICC at least once every quarter a compilation of all claims entered on this register stating the reason for claim, i.e., loss, damage, or theft where the fact has been established, the commodity; and the actual cash value of the item(s) involved.

These reports could then be compiled and issued by the ICC and would provide the first significant data with respect to cargo loss, theft, and pilferage.

As I indicated to Commissioner Walrath, who appeared before this Committee on June 25, I would be inclined to assist you in seeking whatever means might be necessary to accomplish this program.

I urge your serious consideration of this proposal, as I am convinced that trucking theft and highjacking losses are now approaching, according to some estimates, $1 billion a year and are a clear and present danger to the economic security of the surface transportation industry. I appreciate your prompt attention to this proposal.

With all best wishes.

Cordially,

ALAN BIBLE,
*Chairman.*

---

[From the Traffic World, July 13, 1970]

CARGO THEFTS AND LAX LAW ENFORCEMENT

For several reasons the federal, state and local government departments and agencies that have duties and responsibilities pertaining to transportation should be deeply interested—and it seems now that many of them are—in finding ways to put a stop to the alarming growth of cargo thievery in this country.

For organizations of criminals, theft or privilege has become, within the last decade, a big and extremely profitable business, especially at some large deep-water ports and at some major airports. Losses suffered by shippers, carriers and receivers as results of operations of gangs of cargo thieves have grown so huge that the planning and making of vigorous efforts to halt the activities of such depredators urgently require attention and action by legislators, other government officials, carrier managements, their customers and employes, and the general public.

At least one member of the upper chamber in the Congress of the United States, Senator Alan Bible (D-Nev.), has made it evident that he recognizes the seriousness of the cargo theft problem. Senator Bible, chairman of the Senate's select committee on small business, introduced about four months ago a bill (S. 3595) that would establish a nine-member Commission on Security and Safety of Cargo. Some of the commission's duties would be: To define the causes, scope and value of cargo losses and their disposal methods; to establish a uniform, centralized loss-reporting system for all cargo, and to recommend appropriate legislation to Congress. The Senate small business committee held hearings on the Bible bill June 24 and 25 (T.W., June 27, p. 119).

Good reasons for widespread concern about losses caused by thieves and hijackers of truck freight—losses estimated to have amounted to $702 million in 1969—were stated by Earl W. Taylor, corporate security officer of Ryder Truck Lines, Inc., and president of the National Association of Transportation Security Officers, when he testified before the Senate small business committee.

". . . Too many carriers have not yet identified the problem in their record keeping," Mr. Taylor said. "Too many law enforcement bodies have thrown up their hands at the magnitude of the problem and choose to ignore it. Too many prosecutors have chosen not to pursue what they do not understand."

Before presenting the first witness in his committee's hearing on June 24 (the witness was Chairman Helen D. Bentley, of the Federal Maritime Commission), Senator Bible made these statements:

". . . Our estimates indicate that cargo thievery represents a loss to the American businessman and consumer approaching $1 billion annually. . . . As the problem accelerates there is no real effort on the part of either federal, state or local governments to seek a solution. . . . The theft problem . . . has a real and substantial impact on the economic well-being of all our transportation modes and on the country's well-being along with it. . . ."

Mr. Taylor testified that the regulated carriers of freight had organized their own police force because they had found that:

"(1) Thefts of individual shipments, thefts of complete trailers and hijacking of complete trailers have become such a complete problem that to eliminate them meant the difference between staying in business and bankruptcy; (2) inability to get law enforcement assistance to the depth needed and with the consistency needed left no other choice; (3) the total inability to secure prosecution of guilty persons, or, for that matter, even to successfully remove them from your payroll, made the decision to create their own police force a sound one."

Numerous instances of non-enforcement of law against truck line employes caught in the act of stealing were reported to the Bible committee by Mr. Taylor and others. In one of those reported cases an investigator in Philadelphia recovered "a house full of merchandise that had been stolen" from several truck lines. The merchandise was traced to an employe of one of the carriers and to the man who was the "fence" or seller of the stolen goods. Months later, after the case finally came to trial, the "fence" was convicted and placed on probation for a year, but the larcenous employe was acquitted, and he recovered eight months' pay from the trucking company that employed him and was placed back on the company's payroll.

At the recent annual membership meeting of the Common Carrier Conference—Irregular Route, in the course of which the executive director of the conference, Henry A. S. van Daalen, and Dougold McMillan, attorney-in-charge of the Miami strike force of the U.S. Department of Justice, offered advice on how to combat cargo thieves and hijackers, we heard complaints by several carrier executives to the effect that district attorneys and courts either had not acted, had been lamentably slow to act, or had taken ineffective or "slap-on-the-wrist" action on well-substantiated reports or complaints brought to them by the motor carriers about thefts of freight from vehicles in interstate commerce. The reported nonfeasance or leniency by some of the law enforcement officers or courts was shameful.

We are aware of the anti-theft and anti-

hijacking program undertaken by the trucking industry's TICOTH committee (the Trucking Industry Committee on Theft and Hijacking, formed early in 1969), and we note, as we read the testimony of the witnesses in the Bible committee hearing, that the Interstate Commerce Commission is participating in an effort, proposed not long ago by the Department of Transportation in conjunction with the Department of Justice, to establish a new program to combat crime in transportation. It's gratifying to know that the Justice Department is a partner in that undertaking, and the planning of such a cooperative effort is certainly praiseworthy. But although we are not generally enthusiastic about any proposals to create a new government agency, we believe establishment of a Commission on Security and Safety of Cargo that could exercise effective leadership in moves to apprehend and punish cargo thieves could prove to be a profitable investment for the nation's taxpayers. The idea seems to us to offer greater promise of far-reaching, effective remedial action than any other idea that has come to our attention.

---

[From Business Insurance, June 22, 1970]

HAIL NEW LEGISLATION DEALING WITH CARGO SECURITY

(By George Langworth)

WASHINGTON.—New legislation proposed by Sen. Alan Bible (D.-Nev.), chairman of the Senate Committee on Small Business, which would establish a special five-year cargo security commission to study the problem and find new, more effective solutions, has met with unanimous approval from truckers and other cargo handlers.

Even though Sen. Bible has criticized segments of the transportation industry for their high losses and seemingly lax security measures, spokesmen from all branches of the industry were quick to support the senator's new bill.

At a recent meeting of the Commerce and Industry Assn. of New York, Sen. Bible called for a "hard look" and action on this "growing problem which is the heart of the biggest multi-billion-dollar racket nationally today—stealing from business." He charged that "poor cargo transport security is endangering the whole public carrier system. The tail is almost wagging the dog," he declared.

Probably the most difficult crime to measure, cargo thefts range from daily pilferage ("nickel and diming us to death," one trucker put it) to bizarre hijackings, like a $1 million loss experienced at New York's John F. Kennedy Airport during one week last year.

Sen. Bible blamed the lack of accurate cargo crime loss estimates on "some carriers who have fought against loss-reporting" and the fact that there have never been loss-reporting systems in use for the entire transportation industry. "Too little attention has been paid by carriers to fundamental efforts to achieve security and safety of cargo," he charged.

A search by *Business Insurance* corroborated this charge and pointed up the surprising fact that no government agency (not to mention any trade or service organization) keeps comprehensive records of the total tonnage or value of freight shipped in the country. Even the figures of the Interstate Commerce Commission (and the Dept. of Transportation) were incomplete and, as a departmental staff member there admitted, of uncertain value. If it is not known how much cargo is being transported, it must be difficult if not impossible to determine how much is being stolen.

Sen. Bible's staff, however, after some research, revealed an appalling estimate that surprised some. "Upwards of $1 billion worth of goods were stolen from truck, rail, air and marine carriers in 1969," one member of the senator's staff said. He explained that the figure included over $700 million taken from truck and rail carriers, $100 million stolen from air carriers and some $200 million taken from the nation's maritime carriers.

One of the targets which Sen. Bible has chosen is the airlines. He charged that, "air carrier thefts have tripled during the past year." One of their regular customers, the American Watch Assn. had cargo losses of $2.5 million for one year. The members of the association which comprise the bulk of the U.S. watch industry realize a yearly profit of only $10 million. Said Sen. Bible: "This is comparable to General Motors losing $300 million worth of automobiles.

The senator noted that "there is every evidence that cargo thefts from airports, from waterfront piers, and from trucks serving both, have become the favorite target of organized and unorganized crime. The answer (to this) is simple. The pickings are richer and easier. Cargoes have overwhelmed facilities. Security efforts do not provide security."

The cargo carriers are by no means insensitive to these problems. Last year, the American Trucking Assn. Inc. (ATA) created a special Trucking Industry Committee on Theft and Hijacking. In its first report to the ATA of its progress last fall, the committee noted that "a widespread general apathy toward the problems and challenges of security has been found at all levels among shippers, receivers, manufacturers, carriers by all modes, and warehousemen. Indisputably, such apathy on the various other levels of the individual companies concerned stems from and is fostered by the indifference and apathy of the top echelon of management."

Paul Shuster, vice-chairman of the truckers' committee on theft problems and president of his own Shusters Express, Inc. in Colchester, Conn., concurred with the senator's estimate. "I think it's fair to say we're losing cargo worth 3% of our revenue a year now," he said. Last year the trucking industry had $13.4 billion in profits.

"Most people hear a lot about the hijackings," remarked Mr. Shuster, who clearly felt the only reason these bizarre thefts of entire trucking units made news was because of their 'romance' value. Apparently, the press' interest was caused by an added factor in some areas, however. As reported elsewhere in this issue, at the beginning of the year, hijacks in the New York-New Jersey area were averaging 10 per week.

"What really costs us the money, though, is the day-to-day pilferage. And a lot of insurance companies just won't insure this kind of a loss," he added.

Mr. Shuster explained that his committee had offered a series of recommendations that will help the trucking industry to help itself in slowing its theft problems from a gallop down to a brisk trot, at least. The foremost of these recommendations falls directly in line with Sen. Bible's cargo security commission bill.

The truckers themselves, organizing around the existing ATA national framework, had developed state committees which will coordinate the efforts of a national subcommittee network composed of groups working on industry cooperation between a myriad of trucking association, tariff bureaus and other industry groups to develop a more reputable and more comprehensive system of reporting incidents of theft, and hijacking on local, state and national levels.

Other national subcommittees include groups devoted to employe security systems, physical security systems, shipper coordination with carriers, intermodal relations between the various types of carriers, and a legislative and regulatory affairs group based here in Washington.

Representatives of the trucking industry contacted were seldom as eager to define just who the cargo thieves are, as was Cecil D. Webster, security officer for Associated Transport Inc. in Burlington, N.C., and secretary of the National Assn. of Transportation Security Officers. Mr. Webster stated flatly that most cargo crimes were perpetrated by one or two trucking employes working in concert with one another and an outside buying source—in some cases the very retailers being serviced by the victim trucking firm.

The trucking industry, trying to cope with this problem nationally, has found it rough going. Mr. Shuster pointed out that many trucking employes, after committing crimes in one area, simply disappear from there, later turning up in a completely different part of the country. Their records rarely, if ever, follow them.

The total lack of national coordination of employe investigations is being reversed in New England, however.

Mr. Shuster explained that a trucker anywhere in New England can now check on a prospective employe through a central office of the state motor carrier council located in New Haven. The subcommittee on employe security reported that "one carrier currently fingerprints all employes and run very thorough checks on the criminal record of each. This company's long-continued work along these lines results in the rejection of about 28 out of every 29 job applicants." The subcommittee is currently working on a national personnel information file.

Many carriers are also installing a two-way radio system in their trucks as a means of alerting drivers to be on the lookout for trucks that have been recently stolen. Plans are also afoot for an automatic vehicle monitoring system that will keep track of all cargo vehicles' activity from the time they leave one terminal until they arrive at another.

Most sources in the transportation industry despaired of ever really stopping cargo thefts, even though an ongoing series of security devices and other preventive measures are being used. These thefts can only be restricted, never prevented, because the thief always developes new methods to counteract your counterattack on his last tactical "improvement'." explained Carl McDowell of the American Institute of Marine Underwriters in New York.

As Mr. McDowell sees it however, the big problem is really with top management. "Techniques that can adequately curb thefts exist," said Mr. McDowell. "And if there's enough demand for them, they'll be called into play. Unfortunately, neither manufacturers nor the carriers are enough aware of the problems. Until top management in both these categories interests itself in the theft problem and appropriates enough money to adequately fight it, the theft problem this industry is plagued with will never be solved," he pointed out, apparently dissatisfied with the transportation industry's efforts to date.

An increase in the speed and in the movement of goods multiplies the number of jurisdictions through which the cargo must pass and heightens the problem, Mr. McDowell added. Long-distance movement of goods inhibits good security procedures since responsibility for security switches not only from one area of jurisdiction to another but also from one type of law enforcement organization to another, he explained. Coordination of the security problem must be handled on a larger than regional basis so that the "security-block" or jurisdictional lines can be broken, he pointed out.

Another problem the industry faces is one of indifference on the part of law enforcement agencies. Police tend to be more concerned about fixed property such as the local jewelry store than about moving trucks (sometimes carrying hundreds of thousands of dollars in goods) that may spend only a scant few minutes in their jurisdiction.

Mr. McDowell also warned of an alarming

increase of organized crime's involvement in cargo thefts. "Organized crime is what is growing in our cargo thefts," he said, contradicting what some industry sources contacted felt about pilferage being their largest source of losses. This form of loss is typically attributed to dissatisfied employes.

However, Mr. McDowell doesn't see a very active role for his industry in the problem. "The insurance industry can and is making a lot of noise about these cargo thefts. But we simply have to live with the fact that the solution to the problem is in other people's hands."

Sen. Bible is concerned about another controversy involving cargo transportation—that of cargo liability. Said the senator: "The Interstate Commerce Commission must decide the propriety of another example of a crime-induced hardship on both the carrier and the retail businesses—a pro-rate policy newly adopted by rail and truck carriers seeking to spread liability among all carriers in the transport chain on concealed loss and damage claims.

"This policy, tied to the insurance coverage problems, brought on by increasing thefts, dictates an alleged arbitrary conclusion that loss and damage do not occur at a single point, but that liability should be spread and borne one-third by the shipper, one-third by the truck or rail carrier, and one-third by the consignee."

Many truckers disagree that the full liability for the cargo should be placed on their shoulders. Two common reasons cited by executives contacted by *Business Insurance* are (1) truckers rarely know the worth of the goods they carry, and (2) cargo thefts are much closer to an "act of God" since they are harder to prevent than an accident and therefore truckers should be held only partially liable for the goods stolen.

Under current tariff regulations a number of items have a "released liability." This term refers to an agreement whereby the carrier has to pay only a portion of the worth of a stolen article. For example, garment cargo is "released" at $1 a garment. This means that in the event of theft, the reimbursement to the shipper for the goods stolen would be limited to $1 per garment.

The American Retail Federation is not exactly in agreement with this "maneuver."

"The way to reduce the thefts of cargo is to make the carriers 100% responsible for these losses," said Charles Washer, special consultant on transportation for the retailers' national trade organization. "As things are now, when thefts go up the carriers will either raise premium rates or reduce the released liability value," he pointed out, adding that rather than trying to reduce thefts, carriers are really trying to reduce their liability.

"Of course there may be some collusion between the shipper and the carrier or at the other end between the carrier and the retailer in some of these thefts," Mr. Washer conceded, but he stuck to the premise that cargo thefts were primarily the carriers' problem. "There are a number of things the shipper can do to help out with the theft problem, though. For instance, the organization has recommended that all exterior identification of what a container holds be discontinued. This will make it difficult if not impossible for a potential thief to tell what's worth stealing and what's not," Mr. Washer explained.

Sen. Bible has also singled out the air carriers for their "lackadaisical and slipshod" attitude toward their public responsibilities to cargo shippers. The senator charged that the "airlines panicked in March when ground delivery service fur thefts brought on insurance cancellation threats. The airlines countered by asking the Civil Aeronautics Board to cancel all normal fur shipment pickup and delivery service for the Greater New York City area, the country's fur manufacturing center, threatening paralysis for that industry.

"The Board ruled that pickup-delivery service must be continued pending further investigation. Meanwhile, the airlines' own cargo service would not pick up or deliver fur shipments, contrary to the board's order. In late April, the airlines admitted error—error which cost fur manufacturers profit dollars. The airlines blamed it on confusion and are now back handling furs again. Meanwhile, they are working on an insurance program to permit handling fur shipments normally."

The airlines were also criticized because their admitted liability was quite low. One of Sen. Bible's staff members pointed out that the air carriers' domestic liability limitation of 50c per pound of cargo was first adopted and approved in the 1880's for the railway express. International liability (with a maximum limit of $7.50 per pound of cargo) was set by the Warsaw Pact convention in the 1930s. Cargo carrier by air is worth, on the average, about $100 per pound, he added.

However, shippers can obtain adequate excess coverage on freight he ships by air. "The shipper must pay a premium for coverage in excess of this amount the air carrier assumes as his liability," said Normal Phillian, vp of traffic of Washington's Air Transport Assn. "Besides, any rise in the air carriers' assumed liability would be passed on to the shipper in increased costs," he added.

It is clear that there are few pat answers to the problems of cargo theft in the transportation industry. Sen. Bible noted that a "broad, businesslike examination must be made of the whole cargo spectrum, with a government, carrier, labor, and businessman-shipper partnership involved."

The Senator's bill, introduced in mid-March, proposes to establish a nine member, Presidentially-appointed Federal commission to investigate and recommend steps to curb cargo crime. Its members would be chosen from the ranks of air, truck, water and rail carriers, cargo labor unions, terminal-warehouse operators, the Attorney General as well as the Secretaries of Transportation and Commerce. Exofficio members would include Federal transportation regulatory agencies and the insurance industry.

The commission's duties would include:

Defining the causes, scope and value of cargo losses and their disposal methods.

Evaluation cargo theft deterrents, including packaging, containerization, personnel security, physical security, law enforcement liaison.

Establish a uniform, centralized, loss-reporting system for all cargo.

Examine insurance liability limitations of all parties concerned.

Encourage development of crime prevention technology.

Recommend appropriate legislation to Congress.

The bill proposes to maintain the commission in existence for a period of five years, its expenses controlled by appropriations by the Congress.

---

[From U.S. News & World Report, Sept. 14, 1970]

TRUCK HIJACKINGS FASTEST-GROWING RACKET

One of the fastest-growing crimes in this country is the stealing of freight cargoes. It has become an organized racket that costs Americans more than a billion dollars a year.

Increasingly, trucks loaded with valuable merchandise are hijacked on streets and highways. Warehouses are looted systematically. So are railroad freight yards and waterfront docks. Now airports are becoming prime targets.

Most of this massive stealing is masterminded by crime cartels, according to the Federal Bureau of Investigation.

MODUS OPERANDI

This is often the way it works:

Criminals are placed in key jobs inside the transportation industry. They "finger" the cargoes to be stolen, frequently take part in the actual theft.

Then the stolen merchandise is funneled into the nation's markets through wholesale and retail outlets controlled by organized gangs—and sold to an unsuspecting public at enormous profits.

"It is alarming that much of the loot moves through channels of legitimate business," says Gilbert Meyer, in charge of cargo-theft investigation for the American Insurance Association, whose member companies bear much of the mounting loss. "Professional thieves have established footholds in many manufacturing, distributing and merchandising industries."

U.S. Attorney General John N. Mitchell has charged that organized crime has virtually taken over the air-freight industry at one of the nation's largest airports.

A determined battle against this thievery is developing. Federal, State and local governments are moving into action. The transportation industry is tightening its security.

So far, however, it is a losing battle. The racket keeps growing. The big rise began in 1967.

Here is an idea of the size of the problem: In the year ending on June 30, the FBI received reports of 20,349 cargo thefts in interstate commerce alone. In these cases, there were 1,013 convictions and goods worth 15 millions were recovered. This does not include countless cases handled by State and city police.

GETTING AWAY WITH IT

Relatively few of the cargo thieves are caught. And Mr. Meyer expresses doubt that more than 5 per cent of the stolen goods is ever recovered.

Cargo theft has spread all across the country. But it is worst along the East Coast from Boston to Washington—especially in the New York area.

On average, about 10 trucks are hijacked and some $300,000 worth of goods stolen each week in New York City and its vicinity.

The garment district in midtown Manhattan is a hotbed of piracy. Truckloads of ready-to-wear clothing are hijacked in broad daylight in heavy traffic while being transferred only a few blocks from one place of business to another. Many of the loads are valued at $100,000 or more.

Truck hijacking is done in many ways. Sometimes a driver finds himself looking into a gun muzzle when he stops at a red light. From a car which has drawn alongside, several men emerge to take over his truck. Usually the driver is released unhurt several hours later.

Often the hijacking is done without weapons. A thief may simply present forged documents to claim a load and drive it away. Frequently, trucks or trailers are driven off or towed away when they are left standing unguarded.

Well over half the hijackings, experts say, are "giveaways" or "inside jobs." Drivers, dispatchers or other employes of a trucking firm tip off the thieves to valuable cargoes and their travel routes. Often they arrange to have the loaded truck given up without resistance or left somewhere unguarded.

WATCHING THE MARKET

Many cargo thieves steal on order, and what they take may depend on market conditions.

Recently, shipments of metals have been in demand. In the last few months, hijackers in the New York and lower New England area have taken more than 1 million dollars' worth of ingots of silver, copper, tin and nickel.

When the price of coffee went up 25 per cent recently, coffee beans became a prize item along the waterfront. A truckload of stolen coffee beans might wholesale for as much as $20,000.

Hijackers even fit their operations to the season. In spring, when stores are preparing for the Easter trade, clothing is a prime target. In autumn, snow tires are favorites. As Christmas approaches, hijackers concentrate on whisky and gift items such as cameras, radios, television sets and electrical appliances.

CIGARS AND MICROSCOPES

Ready-made clothing is the biggest single category of stolen goods, the year around. But almost anything that can be sold is stolen. Recent hijackings in the New York area have included a load of typewriters worth $300,000, a shipment of cigars costing $205,000 and microscopes valued at $120,000.

A new trick of the trade is stealing containers—the huge, truck-size metal boxes designed to prevent pilferage. The hijacker simply drives off with the entire truck and container or lifts the container onto his own trailer. Fifty containers were reported stolen in the New York area in 1969. Three of them contained Scotch whisky worth $255,000. Because of such thefts, some marine-insurance companies have raised their rates on containers 50 per cent.

THE GROWTH SECTOR

Airport robberies are a recent and fast-growing development. Airports are inviting targets because high-value cargoes are continually moving in and out, the volume of air freight is rising enormously, and the air-freight industry is relatively inexperienced in coping with thievery.

Claims against insurance companies for air-cargo losses have almost tripled in the past two years.

A prime target among airports is the John F. Kennedy International Airport in New York. Losses reported there totaled 3.5 million dollars in 1969—including one load of currency and jewelry that was valued at $478,000.

Attorney General Mitchell did not name the airport he said has been virtually taken over by organized crime. But he said its entire freight industry "is trapped between a racketeer-dominated trade union on the one hand and a racketeer trade association on the other."

One large shipment of antibiotics, he said, was stolen from the airport terminal and sold on the European black market through a syndicate's connections.

The Post Office Department—a major victim of shipping thefts—suffers its biggest losses in airmail. Its losses are reported at 2 million dollars a month through thefts at major airports.

SUFFERING IN SILENCE

The exact amount of losses from cargo thievery is not known.

One reason: Congressional and insurance investigators find that most business firms do not keep complete records. Investigators surmise that some companies do not want to become known as prone to robberies, fearing rises in their insurance rates or cancellation of their insurance policies.

Others are said to fear gangland reprisals if they "put the finger" on criminal employes. Investigators say some firms simply shirk the red tape involved in reporting losses from thievery.

Still another reason the total losses are not known, according to investigators, is this: Importers often report stolen cargo as "not landed" so they won't have to pay the customs duties on the missing merchandise.

The New York Waterfront Commission estimates that only about one-fourth of sea-cargo thefts are reported to it.

As cargo thefts mount, governmental agencies, insurance companies and the transportation industry intensify their search for ways to combat the racket.

The U.S. Department of Transportation has organized a new unit on cargo protection. The Post Office Department and the Customs Bureau have tightened procedures for handling cargo at airports and on the waterfront.

The Post Office now requires such precautions as the use of covered carts for carrying mail in airport areas and the packaging of valuable items in heavy containers instead of in cloth bags that can be slit open easily. The Department also has announced plans to fine airlines as much as $1,000 for each piece of airmail lost.

Senator Alan Bible (Dem.), of Nevada has proposed a bill to set up a federal commission to assemble facts about the hijacking problem and to co-ordinate efforts to solve it.

After extensive hearings by the Small Business Committee which he heads, Senator Bible commented:

"What concerns me most about cargo thefts generally is that as the problem accelerates, there is no real, co-ordinated effort on the part of either federal, State or local governments to seek a solution."

Senator Bible has accused the airlines of being "lackadaisical and slipshod" in guarding their cargoes.

Some trucking officials have charged their own industry with a share in the guilt for security laxity.

An investigating committee set up by the American Trucking Associations last year has reported:

"A widespread general apathy toward the problems and challenges of security has been found at all levels among shippers, receivers, manufacturers, carriers by all modes, and warehousemen."

"The consumer gets hit." Edward Burban, chairman of the security council of the New York State Motor Truck Association, says:

"The feeling seems to be that the insurance companies will handle it.

"So the insurance companies take the brunt, and they pay, and the rates go up, and the cost of the rates gets passed down the line until finally the consumer gets hit again."

Insurance rates have gone up on cargo shipments of all types. Insurance companies also have begun canceling the policies of companies that appear to be theftprone. They have increased the "deductibles"—the amount of an insured loss that must be borne by the shipping company.

Law-enforcement agencies report frustration in their attempts to catch hijackers or other cargo thieves.

The FBI is limited in the scope of its authority. And local police, who already are overburdened with other types of crime, often lack the resources to deal with such well-organized and fast-moving operations.

Everywhere law-enforcement officials turn, they find organized crime at the root of the cargo-theft problem.

As many as 75 per cent of the truck hijackings are done under "contract," some officials estimate.

A gang will line up a buyer for a specified type of merchandise. It will have agents planted inside the shipping industry to spot the kind of goods that is desired. And a gunman may be paid as much as $1,000 to hijack a load and deliver it to the gang.

"Fencing" the goods. How does all the loot get into the market for sale to the public?

Prosecuting authorities express suspicions that some so-called "discount stores" are "fences" for much of the stolen goods—such as clothing, cameras, radios and appliances.

FBI reports tell of such incidents as this: Two truckloads of imported shoes were hijacked recently in an Eastern city. Then the shoes, valued at $18 a pair, were sold in stores in a residential neighborhood for 50 cents to $1.50 a pair.

FBI Director J. Edgar Hoover has appealed to the public to be alert to such "fencing" of stolen goods and to inform the FBI or other law-enforcement agencies when they are offered "bargains" that appear suspicious.

Whisky and cigarettes are cargoes that are easy to sell. They usually turn up in gang-controlled saloons and automatic vending machines.

How some hijacked cargoes are disposed of, however, is a mystery to investigators. For examples, they cite such items as copper pipe, metal ingots and animal skins. These, they point out, would have to be sold to factories or processors.

"The markets are already established and the property moves just like it is absorbed into our economic system just like a huge dry sponge. It just sucks it all up and it disappears," says Mr. Meyer of the American Insurance Association.

"No one person, investigative organization or law-enforcement agency has consistently been able to penetrate the veil of secrecy that envelops the criminal activity of receiving and fencing stolen property."

To get at the hijacking racket, Mr. Meyer suggests, law-enforcement agencies first must find the "fences" and put them out of business. This, however, is becoming increasingly difficult as organized crime expands its ownership of "legitimate" business enterprises.

Many security officials estimate that there are only a relatively few criminals employed by the trucking industry. But Earl W. Taylor, president of the National Association of Transportation Security Officers, says trucking companies have great difficulty in preventing crooks from being hired—and in getting rid of them even after they are detected.

Mr. Taylor tells of numerous instances where truck drivers are known to have been involved in thefts but prosecutors were unable to try them for lack of conclusive evidence—and under union rules a driver cannot be fired unless he is convicted. One driver who was fired had to be rehired and given $25,000 back pay.

Some trucking companies are spending large amounts on protective devices such as alarm systems, steel fences and floodlighting. They are tightening identification of employes. They even send out high-value cargoes in truck convoys, with armed guards.

Yet the robberies or cargoes continue to increase. And officials see no signs of a letup.

---

[From the Chicago Tribune, Sept. 14, 1970]

AIR CARGO THIEVERY AT O'HARE

Last year an investigation by THE TRIBUNE disclosed wholesale pilferage at Chicago harbors. Mayor Daley appointed a new port commissioner and security measures were taken.

NOW TRIBUNE reporters James Strong and Ronald Koziol have found that thieves are busy at O'Hare International Airport and that air cargo losses may amount to $3 million a year. It has been suggested that organized theft rings shifted their operations to O'Hare after a crackdown on their activi-

ties at New York's Kennedy International Airport.

THE TRIBUNE investigators learned that there is no central theft reporting system at O'Hare or at other airports, so it is impossible to obtain accurate figures on losses. So far this year only three thefts, totaling $5,660, have been reported to the Chicago police, altho during the first three months of the year 24 carriers paid claims of $2,075,308 because of losses of various kinds.

This figure understates the true value of the lost shipments because airlines are required to pay only by the pound, regardless of the value of the goods. Evidently the lines consider that it is cheaper to pay the claims than to set up expensive security measures. At the same time, shippers are unconcerned because they recover losses from their insurance companies.

As the losses mount, insurance rates are increased, and the eventual losers are the public, which must pay for the insurance in higher prices for goods shipped by air.

Gov. Ogilvie has asked for an investigation of the thefts by the Illinois Commission for Economic Development. The commission will be aided by two investigative agencies, the Illinois Bureau of Investigation and the Illinois Law Enforcement Commission. Mayor Daley has ordered an investigation by responsible city agencies.

It seems likely that not much progress will be made in checking thefts until the air carriers are required to maintain records of cargo thefts and make periodic reports to a federal government agency. Such reports would make it possible to discover criminal patterns and develop an adequate security program.

The Senate Committee on Small Business has been investigating transportation industry thefts and is scheduled to hold a hearing in Washington tomorrow on a bill introduced by Sen. Alan Bible [D., Nev.], chairman of the committee. Sen. Bible has estimated that air cargo losses in 1969 for incoming international shipments reached $6 million. He placed truck theft-hijacking losses at $600 million in the same year. Accurate figures for waterfront docks are not available because there is no loss reporting system.

Sen. Bible's proposed legislation would establish a federal commission with representatives from air, truck, water and rail carriers, cargo labor unions, terminal-warehouse operators, the attorney general, secretary of transportation and secretary of commerce. The commission would be required to establish a uniform, centralized loss reporting system and make recommendations to Congress for further crime prevention measures.

Sen. Bible sees the proposed commission as a temporary agency; he is opposed to adding another layer to the permanent federal bureaucracy. Most taxpayers will agree. If air carriers were required to report cargo losses to the Civil Aeronautics Board, and if the reports were forwarded to local police, pilferage at airports would diminish.

---

STATEMENT BY SENATOR ALAN BIBLE

Mr. Chairman, it is a pleasure for me to appear before your committee this morning in support of my bill, S. 3595, to establish a temporary Federal Commission to develop and propose solutions to the growing crisis posed by cargo theft and pilferage from air, truck, rail, and water transport industries—a crisis that is costing American business upwards of $1 billion per year and is contributing to the inflationary spiral. I wish to summarize, for the benefit of the Committee, a more comprehensive statement which you have before you for your hearing record.

Early in 1969 the Senate Small Business Committee, of which I have the honor of being Chairman, began an investigation and public hearings into the impact of crime against small business growing out of our interest in the Small Business Protection Act of 1967.

The first phase of our series of hearings centered on air cargo thefts, then maritime and truck losses, and finally the railroads, our oldest cargo transport system.

It is graphically clear that a cargo crime crisis is upon us today. Up to this point, law enforcement agencies, our Federal transportation regulatory and policy bodies, and our transport carrier industries generally have been unable to mount an effective response.

As the President of the National Association of Transport Security Officers told our Committee, "Too many carriers have not yet identified the problem in their record keeping, too many law enforcement bodies have thrown up their hands at the magnitude of the problem and choose to ignore it, and too many prosecutors have chosen not to pursue what they do not understand. . . ."

And what kind of dollar losses are we talking about? Because there are no uniform loss reporting systems in use by the government or by industry, it is impossible to determine the true extent of cargo loss. However, the Senate Small Business Committee has developed some meaningful statistics we believe are both conservative and as accurate as possible. Crime-based cargo losses nationwide for 1969 totaled approximately $1 billion, 200 million dollars. Truck thefts and hijackings led at $828 million, airline carrier losses were $50 to $100 million and probably more, maritime losses were $170 million, and railroad losses were over $100 million.

These loss figures, as I stated, are merely conservative estimates and represent only those goods stolen or pilfered. The cost to business in not having products for sale, customer goodwill, increased insurance premiums, etc., cannot be measured. But as witnesses have told us, these costs are very real.

We do have statistical evidence of one major aspect of air cargo theft. Chief Postal Inspector William J. Cotter has informed me that thefts of U.S. mails at New York's John F. Kennedy Airport between 1967 and 1969 were $65 million. If U.S. mail losses at this one facility were this great, I am confident that our estimates of air cargo losses of consumer commodities are, at the very least, conservative.

Another interesting statistic related to me is that in 1969 auto manufacturers filed claims of approximately $40 million against U.S. railroads as a result of criminal loss and damage to new automobiles moving by rail. This represents an additional $50 cost to the purchaser of each new automobile.

The cargo-theft pilferage problem is at the heart of the biggest multibillion dollar racket nationally today—stealing from business. Its worst victims are the small businessman, who can least afford it, and the general public paying crime-inflated prices. The grim fact is that, as the problem accelerates, there is no real coordinated effort on the part of the Federal, state, or local governments to seek a solution.

Today, all cargo carriers are plagued with losses never thought possible a few short years ago. One basic question is: Without some new innovative, hard-hitting, and coordinated security methods, will the transport industry have the capability of dealing with these increasingly bold and schemingly clever criminal acts as we move into the 1970s and 1980s with their record cargo loads?

There is every evidence that cargo thefts from airports, from railway cars, from waterfront piers and from trucks serving all three modes of transportation, have become the favorite target of organized and unorganized crime. The answer is simple. The pickings are richer and easier. Cargoes have overwhelmed facilities. Security efforts do not provide security. Insurance payments can no longer be substituted for good security because loss-inflated premiums have skyrocketed or policies have been cancelled out.

But, Mr. Chairman, most of all, the cargo theft problem must be attacked within the entire transport chain—truck, air, rail and water. For if security breaks down in one segment, the whole chain breaks.

This bill, S. 3595, seeks to take a hard look at this spiraling cargo theft problem, with a partnership of government, carrier, labor and shipper leaders involved. It provides an opportunity for innovative security methods to be developed that would be keyed, not as a hindrance to the free flow of commerce, but as an adjunct to it.

My bill would establish a Commission on Security and Safety of Cargo, with nine members drawn from air, truck, water, and rail carriers, cargo labor unions, terminal-warehouse operators, plus the Attorney General, the Secretary of Transportation, and the Secretary of Commerce. Ex-officio advisory members would include Federal transportation regulatory agencies, the insurance industry, and other key governmental departments. Briefly, the Commission's duties would be:

(1) To define the causes, scope, and value of cargo losses and their methods of disposal;

(2) To evaluate and devise cargo theft deterrents including packaging, containerization, personnel security, physical security, law enforcement liaison;

(3) To establish a uniform, centralized loss reporting system for all cargo;

(4) To examine carrier insurance liability limitations;

(5) To encourage development of crime prevention technology; and

(6) To recommend appropriate solutions to the Congress, the President, and other interested parties within one year after establishment of the Commission.

Mr. Chairman, the following brief points will provide the rationale for the temporary Federal Commission approach to the problem of cargo theft as proposed in my bill, S. 3595:

(1) The primary need is for adequate loss/damage reporting systems. These can be established and put into effect only by the different independent regulatory agencies.

(2) A second need is for an investigation into carrier insurance liability. This also comes under the jurisdiction of the regulatory agencies.

(3) Physical security of ports, airports, and terminals would fall within the jurisdiction of agencies of the Department of Transportation. Also, certain aspects dealing with common carrier certification are under the independent regulatory agencies.

(4) A law enforcement program would have to be coordinated among the Department of Justice, the Department of the Treasury, and local police units.

An independent commission, by an examination of loss reports from the carriers, would be able to determine what commodities were most vulnerable to theft and those factors dealing with the criminal redistribution system (fence operations). It would be in a position to work with the law enforcement community to develop a strike force to curtail these criminal acts.

(5) It is important that consideration be given to industry personnel policies having an effect on cargo security. Employment screening systems designed to weed out and to prevent new hires of active thieves must be considered. The most effective means of doing this would be by private sector and labor union cooperation, as proposed in this bill.

(6) Private sector security operations need to be evaluated and examined by an independent commission in order to determine the efficacy and interchangeability of cargo security systems among the different modes. Mass private sector input is necessary in this regard.

As the above points show, the responsibilities and authority for developing a realistic security program for cargo are vested in many executive departments, independent regulatory agencies, and the private sector. Maximum cooperation from the insurance industry, labor organizations, and shipper groups is also vital. An independent commission, such as is recommended in S. 3595, would be able to examine into the multi-agency aspects of security in a manner better than could be done by a task force reporting to one agency. Reports and proposed solutions would be disseminated to the Executive Branch, the independent regulatory commissions, the Congress, and the private sector.

Mr. Chairman, there are those who may say that the last thing the nation's cargo problems need is another layer of Federal bureaucracy. I agree wholeheartedly, and that is why I would insist this should be a purely temporary Commission. In fact, I recommend that my bill be amended to reduce its term of existence from five years to two years. It seems crystal clear to me that the growing magnitude of the cargo theft problem makes it imperative that a more expeditious, concentrated approach be taken by the proposed Commission so that its recommendations can be developed and implemented at the earliest possible time.

On another point, Mr. Chairman, I am aware that several Federal agencies are on record opposing this industry-government cargo security Commission concept because they believe the Department of Transportation has this basic authority anyway and is seeking presently to carry out the thrust of this bill.

On another point, Mr. Chairman, I am aware that several Federal agencies are on record opposing this industry-government cargo security Commission concept because they believe the Department of Transportation has this basic authority anyway and is seeking presently to carry out the thrust of this bill.

Let me respond briefly to that. I have watched our Federal departments operate through administrations of both parties over some 16 years, and I know that many times the necessity for action here and now doesn't seem to penetrate to the right places. For example, Assistant Secretary of Transportation Charles D. Baker, testifying before our Committee on cargo thefts on July 22, 1969, declared his department was "aware and concerned about the problem" and was "sponsoring a general survey of loss and damage in transportation to get a better idea of dimensions of the problem." He stressed the point that the study was "nearing completion."

One year later the Chairmen of both the Federal Maritime Commission and the Interstate Commerce Commission mentioned this Transportation-Justice Department study in testimony before our Committee. But they reversed the study's timetable, with one saying it was now in the "organizational period" and the other saying a single "day-long symposium" had been held this summer, and *perhaps* the Transportation Department's study would be undertaken by the National Research Council of the National Academy of Sciences.

Mr. Chairman, if our Executive departments are not sufficiently motivated by this $1 billion plus cargo crime problem to do no more than has presently surfaced (and I have asked all of them to keep our Committee advised), then it seems the urgency for this Federal cargo security Commission is that much greater. Whatever position our Executive agencies take on this legislation, I believe the country's best interests in our fight against crime and our fight against inflation require more affirmative action than they have heretofore provided.

Mr. Chairman, I believe strongly that evidence developed by our Committee in the past several months shows beyond a doubt that the ability of the shipper to have his cargo moved nationwide is in serious jeopardy to the detriment of thousands of businesses and millions of customers dependent upon that cargo. Therefore, I will introduce formally before the Senate this afternoon several amendments to this bill which are designed to bring about some immediate steps I believe will aid in this cargo crime fight. I will propose:

(1) That the Secretary of Transportation be granted authority immediately to establish physical security standards for transport vehicles, docks, piers and terminals of each of the transportation modes.

(2) That an immediate study be undertaken by the Commission to determine the advisability and means of establishing a Federal licensing and/or identification system for cargo handlers in all transport modes.

(3) That the Commission's term of existence be reduced from five to two years, thus requiring final recommendations at an earlier date.

(4) That the Shipping Act of 1916 be amended to require the Federal Maritime Commission to establish a uniform loss reporting system immediately to be implemented by agency regulations.

I am pleased to announce that it will not be necessary to require by statute that the Civil Aeronautics Board and the Interstate Commerce Commission establish uniform loss reporting systems for air and truck carriers, because I have received communications from both agencies within the past several days assuring me that mandatory loss reporting systems will be implemented immediately by rule-making proceedings by both agencies. This was done in response to our Committee's recommendations and my persistent personal appeals that this step be taken so we can know what the true cargo theft and loss dimensions really are. Mr. Chairman, I submit copies of correspondence on this for your hearing record.

In conclusion, I would like to provide for your record an in-depth article from *U.S. News and World Report*, of September 14, 1970, dealing with the scope of cargo thefts nationally.

Mr. Chairman, I believe this bill offers the promise of far-reaching remedial action for an increasingly critical problem that hits every American's pocketbook . . . certainly something more than has been proposed from any other sources, governmental, or industry, that has come to my attention. The problem will not wait—delay will only accentuate it.

## PROMOTION OF EQUAL EMPLOYMENT OPPORTUNITIES FOR AMERICAN WORKERS—AMENDMENTS

AMENDMENTS NOS. 975 THROUGH 978

Mr. DOMINICK submitted four amendments, intended to be proposed by him, to the bill (S. 2453) to further promote equal employment opportunities for American workers, which were ordered to lie on the table and to be printed.

(The remarks of Mr. DOMINICK when he submitted the amendments appear later in the RECORD under the appropriate heading.)

## ADDITIONAL COSPONSORS OF AMENDMENTS

AMENDMENT NO. 665 TO H.R. 17755

At the request of the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Virginia (Mr. BYRD), the Senator from Kentucky (Mr. COOK), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of Amendment No. 665 to H.R. 17755, which would strike all funds for SST development from the Department of Transportation appropriations bill.

AMENDMENT NO. 932 TO S. 4286

At the request of the Senator from New Jersey (Mr. WILLIAMS), the Senator from Ohio (Mr. YOUNG) and the Senator from New York (Mr. JAVITS) were added as cosponsors of amendment No. 932 to S. 4268 to authorize the Export-Import Bank of the United States to grant long-term low-interest loans to Israel for the purchase of defense articles and defense services.

## ADDITIONAL STATEMENTS OF SENATORS

### OLDER WORKERS MAKE CONSTRUCTIVE CONTRIBUTION TO ECONOMY—SPECIAL WEEK OF RECOGNITION APPROPRIATE

Mr. RANDOLPH. Mr. President, on September 23 the Senate passed Senate Joint Resolution 74 which would authorize the President to issue a proclamation designating the first full week in May as "National Employ the Older Worker Week."

In March of last year, I introduced this joint resolution with bipartisan support from 17 members of the Senate Committee on Aging—Senator WILLIAMS of New Jersey, chairman of the committee, and Senators BIBLE, CHURCH, FANNIN, FONG, GURNEY, HANSEN, HARTKE, KENNEDY, MILLER, MONDALE, MOSS, MURPHY, MUSKIE, PROUTY, YARBOROUGH, and YOUNG of Ohio.

This resolution resulted in large part from information obtained by the Aging Committee's Subcommittee on Employment and Retirement Incomes, of which I am chairman.

In connection with our committee's activities I should like to point out that our distinguished chairman, the gentleman from New Jersey (Mr. WILLIAMS) has been a tireless leader in developing programs for the elderly and in calling national attention to their employment problems.

I also wish to congratulate the chairman of the Judiciary Subcommittee on Federal Charters, Holidays, and Celebrations (Mr. HRUSKA) for bringing this much needed measure to the Senate floor for passage.

Mr. President, since 1959 the American Legion has designated the first full week in May as "Employ the Older Worker Week." During this week the American Legion concentrates on recognizing the benefits to be derived from the employment of older persons—for the Nation, the individuals affected, and the industries hiring these persons. The Legion presents awards to employers demon-

strating active leadership in employing older workers.

At its national convention in 1962, the American Legion adopted a resolution calling upon Congress to officially designate a "National Employ the Older Worker Week." The effect of Senate Joint Resolution 74 would make this meritorious objective a national endeavor by designating such a week to encourage public and private employers to take advantage of the skills and experience with which elderly persons are so richly endowed. I commend the American Legion for its progressive and continuing leadership in this important area.

Mr. President, the need for a "National Employ the Older Worker Week" is especially acute since our economic slowdown has had a particularly severe impact for older individuals and their families.

Today, nearly 1 million persons 45 and older are unemployed. Yet, this only represents the tip of the iceberg because the unemployment statistics do not include the labor force "dropouts"—those who have given up the active search for jobs.

Alarmingly large numbers of mature individuals are now withdrawing from the work force—too often unwillingly. During the past 20 years the number of men 55 to 64 who were not in the labor force increased from 800,000 to 1.4 million, an astounding 75 percent raise. For men 65 and older, the dropout rate was even more substantial, jumping from 2.8 million to 5.8 million.

If current labor force participation trends continue, one out of every six men in the 55–59 age category will no longer be in the work force by the time he reaches his 64th birthday. Ten years ago this ratio was only 1 to 8.

Unfortunately, there still exists false stereotypes about the effectiveness of older Americans as workers.

One of the most urgent needs in solving the unemployment problems of older workers is to educate the public as to their true capabilities.

With an officially designated "National Employ the Older Worker Week," there would be greater opportunity for employers to recognize the outstanding attributes of elderly individuals—such as experience, stability and dependability—and to promote older worker employment programs.

I urge that the House of Representatives act promptly and favorably on Senate Joint Resolution 74.

Mr. WILLIAMS of New Jersey. Mr. President, I wish to associate myself with the remarks made by the distinguished Senator from West Virginia (Mr. RANDOLPH).

Today workers of all ages are feeling the effects of our mounting unemployment problem. From January 1969 to August 1970, unemployment jumped sharply from 3.4 to 5.1 percent, adding nearly 1.6 million individuals to the joblessness rolls.

Our economic slowdown has had a severe impact for all workers. But, older persons and their families have been especially hard hit.

While the unemployment rate has increased by 50 percent for all age groups, it has risen by 55 percent for individuals 45 and older—from 596,000 to 922,000. Their long-term unemployment—15 weeks or longer—has also jumped precipitously from 115,000 to 210,000—nearly an 83-percent increase.

There has long been a need to focus attention on efforts to encourage the employment of elderly persons. This has been made abundantly clear in hearings before the Senate Committee on Aging, of which I am chairman.

However, several obstacles have prevented the implementation of such an undertaking—the lack of a national commitment, limited funding, and several myths about the capabilities of aged individuals.

A few days ago the Senate passed the Employment and Training Opportunities Act to provide an effective means to combat widespread unemployment for all age groups. As a sponsor of this bill, I strongly believe that this measure can help open the door for new employment opportunities through public service employment and a wide range of comprehensive manpower services.

In addition, the Senate adopted my far-reaching Middle-Aged and Older Workers Employment amendment. This measure will for the first time establish a national commitment to maximize employment opportunities for older persons. And it will also provide training, counseling and other supportive services directed at the special needs of individuals 45 and older.

Yet, our task is not complete. Unfortunately some false stereotypes still exist in Government and industry regarding the feasibility or desirability of hiring elderly persons.

Several studies have now conclusively demonstrated that aged workers perform their tasks as capably as their younger counterparts. In many instances, they are better qualified because of added experience and mature judgment.

Other studies have also refuted the notion about widespread deterioration of work skills with advancing age.

These studies have been certainly helpful, but much more remains to be done. Educational efforts and on-the-job evaluation are needed to eliminate false impressions and prejudices against older workers.

Such efforts can help to demonstrate the value of employing elderly persons by educating the public as to the true facts regarding their capabilities. Many older individuals already have an abundance of skills and experience needed in industry or government. They are stable, dependable and energetic workers. But, our Nation is still failing to take full advantage of this large resource of talent.

In our work-oriented society today, far too many elderly persons are relegated to lead empty and neglected lives. Too often their skills are overlooked or ignored. And too often old age produces loneliness and sadness, when it could be a time for continued self-development.

With the added focus provided by Senate Joint Resolution 74, we can hope to make more progress to provide a life of dignity and self-respect for older persons desiring to remain active during their later years.

Most older persons under 65 and many over 65 prefer work to retirement. Many need jobs to provide additional income for meeting their family and household responsibilities. And hundreds of thousands—especially for those over 65—need employment to supplement inadequate retirement benefits.

Since May is now designated as "Senior Citizens Month," it seems particularly appropriate to me to designate the first week as "National Employ the Older Worker Week."

Mr. President, I also urge prompt and favorable consideration of Senate Joint Resolution 74 by the House of Representatives.

---

## THE TAOS-BLUE LAKE LEGISLATION

Mr. GRIFFIN. Mr. President, yesterday I indicated my support for H.R. 471, which would return to the Pueblo de Taos Indians in New Mexico approximately 48,000 acres of land the United States took from the Indians in 1906 without payment of any compensation.

Last evening's Washington Star contained a comprehensive article on the proposal. I ask unanimous consent that the article, written by Roberta Hornig, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNUSUAL COALITION BACKS INDIANS' SACRED-LAND CLAIM

(By Roberta Hornig)

A peculiar political coalition is trying to return 48,000 acres in Northern New Mexico to the Taos Pueblo Indians—land they have considered their sacred worship grounds for more than 600 years.

The "coalition" includes President Nixon and Vice President Spiro T. Agnew and liberal Democratic Sens. Fred Harris, George McGovern and Edward M. Kennedy. The plight of the Indians is probably one of the few issues on which such an alliance ever could come together.

For nearly 70 years, since the U.S. Forest Service took it away, the Indians have pleaded patiently with the federal government to restore the Blue Lake lands, considered by the Indians as the source of all life. They believe the lands are a natural cathedral containing holy places of their ancient religion which remains the central force of their culture.

Always they have failed to regain the land, and they have been allowed to use the wilderness only with a Forest Service permit.

This year, it could be different.

Nixon and Agnew have been waging an unprecedented lobbying effort on the Indians' behalf. Then there are the strange political bedfellows.

The issue, which may well come to a head in the Senate in the next few weeks, is filled with these strange politics and paradoxes.

Nixon's and Agnew's chief political ally in the Senate on the issue is Sen. Harris, a recent chairman of the Democratic National Committee. Administration officials also find themselves on the same side as two other leading Democrats—Kennedy and McGovern.

Interior Secretary Walter J. Hickel, whose now-famous "leaked" letter to Nixon implied criticism of the vice president, is pushing for the Indians in almost the same words Agnew is using.

The Senate Interior Committee, which

pushes parks and wilderness bills through Congress is the stumbling block against legislation that would give the Indians back the lands.

Partially because of the form the secret Indian religious ceremonies takes the land is an untouched wilderness area and the lake is clean enough to drink from.

The reason the Taos Pueblo sacred lands dispute apparently is coming to a head is that both aides, the administration and the liberal Democrats, and the Interior Committee, want it settled.

At issue are two very different pieces of legislation.

Nixon, Agnew, Harris and the Indians are all behind a bill passed by the House last year, sponsored by a Florida Democrat, James A. Haley.

This bill would transfer the 48,000 acres to the Interior Department—the traditional trustee of Indian lands and affairs. It would hold the land for traditional and religious uses for the Taos Pueblo. The entire parcel would be preserved as a wilderness.

ANDERSON BILL

The Senate bill, written by Sen. Clinton Anderson, D-N.M., a powerful member of the Interior Committee, and backed by Chairman Henry Jackson, D-Wash., would continue the Blue Lake area as part of the Carson National Forest, administered under the Agriculture Department's Forest Service.

It would give the Indians exclusive religious use of 1,640 acres.

It also would permit the Forest Service to continue its "multiple use" concept of the land, which, the administration and the Indians contend, includes timber cutting, fencing off pasture units and "vegetative manipulation," as well as visits by tourists.

The Taos Pueblo Indians have been coming to Washington for years to plead their case. The last time was in July when the 90-year old spiritual leader of the tribe, Juan de Jesus Romero, made his first airplane trip to head a delegation appearing before the Interior Committee.

"Like Job in the Biblical story, our people have patiently endured great hardship and deprivation fighting to save the religious heritage embodied in this holy land," he told the senators.

Another delegation member told them his father had come before him to make the same appeal, and that if necessary, his son was prepared to come, if Congress once again refuses to return the land taken by the Forest Service in 1906, during Theodore Roosevelt's administration.

BILL CALLED MOCKERY

The Taos delegation called Anderson's bill "a mockery" and said its passage would destroy the tribe's religious life.

It told the committee that the entire 48,000-acre watershed "is permeated with holy places and shrines used regularly by our Indian people; there is no place that does not have religious significance to use," it said.

Romero and the delegation testified that their religion, which prohibits interference with the natural condition of the land, has been subjected to grave disturbance over the years by Forest Service activities, including construction of trails and other facilities for tourists.

They explained that their religious rituals are secret, and cannot be observed by outsiders; that on several occasions unauthorized persons and Forest Service personnel entered the sacred lands, disrupting the religious ceremonies.

The appeal did not win over Anderson, but it got to Nixon and to Vice President Agnew and other administration members, as it had years earlier the writer-anthropologist Oliver La Farge, a 1929 Pulitzer Prize winner for his novel of Navajo Indian life, "Laughing Boy."

COMMITTEE FORMED

In 1968 several persons formed a National Committee of Restoration of the Blue Lake Lands to the Taos Indians.

Because of her husband's earlier interest, the widowed Mrs. LaFarge agreed to head the committee whose members include former Interior Secretary Stewart L. Udall and John Wanamaker of the Philadelphia clothing store family.

A committee member explained in a telephone interview that the Taos will not tell even anthropologists what their religion is and said that this secrecy is the reason their ceremonies have stayed intact.

When the Spaniards came to New Mexico in the 16th century, the Taos were one of the few Indian tribes they did not consider savages. They were recognized as citizens by the Spanish, and because of this, Charles V presented the Pueblo with a gold-headed cane—a symbol of the right to self-government.

In 1863, the Taos Pueblo received another cane, this one silver-tipped, and from "A. Lincoln."

THIRD CANE RECEIVED

The Indians received their third symbolic cane this summer, when President Nixon sent Agnew's teen-aged daughter, Kim, on a trip to the Pueblo as the administration's representative.

Accompanying Miss Agnew on the trip was presidential assistant Lon Garment who told the Indians that "in the long struggle to regain title to Blue Lake the Taos Pueblo have symbolized the dream of all Indian peoples."

"In their rejection of money as a claims award they have stated to all America that a vision and a religious tradition so unique cannot be compensated for by money," he said.

In a message to Congress in July, Nixon generally outlined a new policy toward Indians, which before in American history had ranged from extermination to termination, the latter an emphasis on getting Indians into the mainstream of American life. Many Indians do not want to get into the "mainstream;" they prefer to keep their traditions.

The Nixon policy is to offer Indians the opportunity for assuming responsibility for programs, with the understanding the U.S. government will continue its trust responsibility and provide funds.

The message was general, and was specific on only one point—the return of the 48,000 acres of sacred land to the Taos Indians, which he called "a grievance" and "an issue of unique and critical importance to Indians throughout the country."

HICKEL TESTIFIES

In testifying on behalf of the Administration at the Interior Committee's July hearing, Hickel charged that the Forest Service's activities on the sacred lands have the "same meaning to the Indians as vandalizing a church would have to the Christian community.

Agnew, who is chairman of the National Council on Indians, has taken a particularly keen interest in the Taos Pueblo. This month, in an act so far unprecedented for him, administration officials report, Agnew sent personal letters to the Republican Senate leadership and members of the Senate Interior committee on the Indians' behalf.

He told The Star:

"For almost seven decades the Taos Pueblo Indians have struggled with dignity and forbearance to have their national government redress a most grievous injustice. I hope that Congress will now join with President Nixon in acknowledging the religious and cultural rights of these Americans by returning to them their sacred Blue Lake land. This would be an act of which as a nation we could be proud.

"I can think of no clearer demonstration to all American Indians that their Congress and their President understand and respect their needs and desires," he said.

The Senate Interior Committee, which meets in executive session Wednesday on the Blue Lake issue, apparently still remains a stumbling block.

PRECEDENT FEARED

Anderson's opposition rests mostly on two points, one of his aides reported. The most important is that giving the land to the Indians could set a "bad precedent," in that Indians nation-wide could ask to get their lands back.

"If you are consistent, you should follow through and turn over the rest of the country to the Indians. I think roughly 89 percent would go," he said.

Anderson rejects the position that Taos Pueblo is unique, as does Jackson. "I am afraid that Taos will trigger the biggest Indian religious revival in history," a Jackson aide said, adding that he does not doubt the Taos Pueblo's sincerity.

"If we settle this their way, in this instance," the Jackson aide asked, "will we be faced with Manhattan Island tomorrow?"

The second major Anderson argument is that the Taos Indians do not need all the land they say they do for religious purposes. "It's the old dilemma. Obviously the white man was unfair in doing what it did in the first place. But what do you do now?" his office spokesman asked.

PAYING FOR MISTAKES

Jackson's aide spoke in the same vein. "This is a question that bothers many people, but there is a principle involved: do we pay for our mistakes with money, or do we install the precedent of giving back lands?"

Meanwhile, a strategy is developing in the Senate.

McGovern, chairman of Interior's Indian affairs subcommittee, this month reported the Anderson bill to the full committee without comment. This was done, a McGovern spokesman said, "to leave it open."

Any bill coming out of the subcommittee, of which Anderson is a member, "would not be favorable to the Taos Pueblo," he said.

McGovern does not expect the full Senate Interior Committee to report a bill "favorable to the liberals" either, an aide said.

The thrust of the strategy is to get the House bill on the Senate floor. If Interior reports out the Anderson measure, which may be adjusted to give more advantage to the Taos Indians, Harris—not a committee member—will offer an amendment following the House version.

In the event the committee does not report out a bill, Harris, who testified on behalf of the Taos Pueblo Indians, plans to offer the House bill on the Senate floor.

The Democrats' moves are being observed with a great deal of interest and approval by Agnew's office—and by the National Restoration Committee.

"It really is a coalition of peculiar political bedfellows," a spokesman for the private committee observed.

---

## PROBLEMS OF DISSENT

Mr. RIBICOFF. Mr. President, Olcott D. Smith, chairman and chief executive officer of the Aetna Life & Casualty Co. discussed the problems of dissent in the July/August 1970 issue of Aetnarama.

Amidst all the rhetoric these days, it is worth while to find a thoughtful discussion of the importance of debate and disagreement in our society.

I ask unanimous consent that Mr. Smith's article be included at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DISSENT

(By Olcott D. Smith)

Authority is sustained not by force but by the power of consent. What we consent to and dissent from has become one of the critical issues of our time. It has divided our society and our families and deprived us of perspective when we need it most.

Dissent, ranging from originality of mind to heresy, has always been the instrument of progress. Galileo, Luther, Arasmus, Jefferson, Justices Holmes and Brandeis, Einstein and Pope John in their different ways share in the tradition of dissent that shaped our world.

Because it is an instrument of progress, dissent—the right of the minority to create a new majority through persuasion—is precious to all of us. Its free exercise is essential to the continuing renewal of our society and is guaranteed by the Constitution:

*Congress shall make no law . . . abridging . . . the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.*

The problem today is that some of those holding minority views seem to seek demolition of the structures that shelter dissent; and that some of those seeking to defend the foundations of our freedom seem willing to do so at the expense of our rights. The danger in this situation is not in the damage either faction can inflict by itself. The danger is in the moderate majority being frightened into believing that it must choose between one extreme or the other and thus becoming divided against itself.

The shock tactics of some dissidents seem intended to prevent persuasion from taking place. Dissenters might find the majority more easily persuaded and the authorities less readily alarmed if they used the tool of debate more and the weapon of disruption less. Flag burning, obscenity, assault and arson are ineffective ways to petition the Government or to win over public opinion. At times one wonders whether Voltaire himself could live up to E. Beatrice Hall's summary of his *Essay on Tolerance:* I disapprove what you say, but I will defend to the death your right to say it.

No one questions the sincerity of an angry mob, only its judgment. We should not, however, let the outrageous play of the irresponsible fringe prevent us from hearing what the main body of dissidents is trying to say. There is no danger in listening. If their arguments are so wise that we find ourselves persuaded we will have gained. If they are so foolish that we are unpersuaded we will have lost nothing. The danger is in refusing to listen and being unwilling to change. This gives equal value to wise and foolish arguments, and strength to the irresponsible fringe.

If we lose perspective we are unable to see our problems accurately. We see each other as archetypes and are blind to the diversity of opinion within each group. Young dissidents seem to hold their elders accountable for a world they did not create. Nondissidents seem not to realize that among those who are most critical of our country are some who expect the most of it, who love it as much as less exacting patriots.

If we lose acuity and cannot distinguish between seeming synonyms, we are guided more by slogans than by principles and indulge in rhetorical over-kill. Debate, dissent and disruption do not mean the same thing. Nor do renewal, reform and revolution. Yet the words are used interchangeably—to the point where the constitutional right to petition the Government is taken to mean a legal right to coerce the public, and the obligation of Government to protect the public is taken to be a license to still the voices of dissent.

Let us ask ourselves: is it not time for a return to rule by reason? Examples already exist to guide our path back.

One example is especially valuable because it is a form of dissent, civil disobedience. It is a symbolic act in which one man on behalf of many breaks a law as a means of forcing it to be tested against the Constitution. Mr. Elliott A. Welsh II recently did this for conscientious objectors who cannot accept military service because of deeply held ethical rather than religious convictions. The strength of his position and power of his example—and of Thoreau's, Gandhi's and King's—is willingness to accept the consequences. Such men play by the rules in breaking a rule and do not seek a guarantee of amnesty. Amnesty would rob the act of significance.

I do not mean to invite mass civil disobedience. If each of us were to elect himself to this demanding role and be guided by individual conscience, each of us would be a law unto himself. We should be cautious in what we trust to conscience alone. But the bomb-throwing radical and the patrolman who dispenses curbstone justice see themselves above the law and in accord with a higher morality. They march to the same drumbeat but wear different uniforms.

Our return must also be guided by our universities and colleges. While reason sleeps on some campuses, the right to freedom of inquiry and free exchange of ideas also slumbers. It is a sleep disturbed by nightmares.

There are signs of awakening. Faculties are beginning to assert authority against the force of internal repression and are starting to subject careless criticism to the tradition of skepticism which applies analysis and testing to criticism itself. It is advocacy based on reasoned criticism that has power to change our imperfect society, create new values and renew the lives of all. Even though the impatient find the process slow, it is more sure.

Our return to reason can be guided, as well, by the examples of the people described in this magazine. If business men and women were poor, powerless or unable to vote, perhaps they also would march in the streets. Instead they work for change, where they are, at what they can. Involved employees have been supported by the parallel efforts of their companies and by entire industries. The National Alliance of Businessmen has pledged to make 180,000 summer jobs available for disadvantaged young people. The Billion Dollar Funds of the life insurance industry have created 170,000 jobs and new housing for 118,000 families living in blighted urban areas.

Because all lasting human progress is incremental it seems to come too slowly. But we have come further and achieved more than we often recognize. The number of people living in poverty decreased from 40 to 25 million during the Sixties as the population increased. Substandard housing accounted for 25 percent of all units in 1960, or 16 percent 10 years later.

We should not, of course, equate human progress with material gains alone. The spirit also needs shelter and nurture. Only involved and caring individuals can minister to another's need for a sense of belonging. Only human beings—not their institutions—can show the regard that enables the most humble to experience their worth and perhaps dare to aspire.

If the record shows we have come far, it also shows we have far to go. We cannot reach our goal of a more open society providing growing freedom of opportunity unless we are all governed by the rule of reason. Our choice is not the illusory one between rebellion or repression. It is between tyranny or the rule of reason.

## JOHNS HOPKINS UNIVERSITY APPLIED PHYSICS LAB EVALUATES NEW URBAN MASS TRANSIT SYSTEMS

Mr. TYDINGS. Mr. President, there is a growing interest in the exploration of alternative urban transit systems to help solve our urban transportation crisis. A grant from the Department of Transportation Urban Mass Transportation Administration has enabled the Johns Hopkins University Applied Physics Lab in Silver Spring, Md., to evaluate 10 different systems aimed at improving access to and through congested urban areas.

The systems vary from a small six- to 30-passenger vehicle for mobility in dense urban areas to larger vehicles for station-to-station speeds over 100 miles per hour.

I commend the Applied Physics Lab for their excellent evaluation of urban mass transit alternatives to the existing quagmire. I ask unanimous consent that the article in the September 13 News American be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

URBAN TRANSIT SYSTEMS PROPOSED BY JHU PHYSICS LAB

The Johns Hopkins University Applied Physics Laboratory (APL) at Silver Spring has made public its reviews of proposed plans for urban transit systems.

The APL work was performed under a $500,000 grant from the government's Urban Mass Transportation Administration Department of Transportation.

The technical reviews consist of evaluations of written definitions of 10 separate systems. The 10 systems were selected from 110 different proposed systems, all aimed at improving access to and through congested urban areas.

The proposed systems range in concept from a small, 6 to 30 passenger vehicle designed for flexible operation in dense urban cores, to large vehicles designed for station-to-station speeds in excess of 100 miles per hour.

As interesting as the new concepts may be, Dr. Robert A. Hemmes, UMTA assistant administrator, warned that it could take 20 years before any of these systems are in full operation in an urban environment.

"Naturally," he said, "the time frame could be considerably shortened perhaps by as much as 10 or 15 years if some community chooses to invest the technology and money, especially the money, in a crash development-implementation program."

UMTA Administrator Carlos C. Villarreal said the next step in the New Systems Program will be engineering, development and testing.

"We are considering at least three of these systems for further development, and we shall shortly announce the first development-evaluation site for at least one personal transit vehicle," he said.

Dr. Hemmes said it will cost in excess of $3 million to get one system built and running on a test scale, and upwards of $20 million to get one operation on a full-time, small scale, basis in an urban area.

The APL reports neither compare the systems with one another nor recommend construction at particular locations, but rather assess the technological maturity of each system, identify technical problems of each and recommend paths for further development.

No consideration is given in the reports to continuous systems such as moving sidewalks and continuous loading vehicles.

Two generic types of systems are reported

on: Fast Transit Link (FTL) Systems and Circulation and Distribution (CD) systems.

The FLT's are high-speed and high-capacity vehicles designed for service between major activity centers or population concentrations. They are similar to present rail rapid transit systems in their operating modes, speed, comfort and operating flexibility.

The CD systems, however, are designed to carry passengers at shorter distances within dense somewhat lower speeds over urban areas, where individual origins and destinations may be randomly scattered.

A chief characteristic of the CD systems is their short headways, or time spacing between vehicles, making possible movement of large numbers of people with little or no waiting at stations.

The suggested FTL systems include:

Aerial Transit System, a pneumatic-tired vehicle suspended below a flexible I-beam, the beam in turn being connected to a series of pylons. This system has a speed of 120 miles per hour with a passenger capacity of 50 or possibly 80 in each vehicle.

Monobeam System, a tubular vehicle suspended from the side of an elevated box-beam, with a design speed of 75 miles per hour and a capacity of 106 persons.

Gravity Vacuum Transit System, a cylindrical train, traveling on rails powered and braked by a combination of gravity and pneumatic pressure in evacuated tubes, either underground or above, with a design speed of up to 250 miles per hour, vehicle capacity of 80 persons and minimum headways of from one to three minutes.

The CD systems proposals include:

Varo Monocab System, a six-passenger vehicle suspended from above by rubber tires riding in an inverted U-channel, with a cruise speed of 34 miles per hour, top speed of 68 and headways of from three to seven seconds.

Vehicle Distribution System, a 45-mile per hour vehicle riding on rubber tires over a concrete guideway, with a capacity of from 25 to 35 passengers and headways of 40 to 60 seconds.

Capsule Transit System, a rubber-tired vehicle operating in a tracked guideway at cruise speeds of 15 to 40 miles per hour and maximum speed of 60, capacity of 15 persons and operating headways of 1.6 seconds. At 15 miles per hour it is designed as a demand responsive system.

"Our cities are in great need of new forms of urban mass transit, especially small, personal transportation vehicles which would be competitive with the private automobile," said Villarreal.

---

## JOB LOSSES IN DEFENSE PLANTS

Mr. GOLDWATER. Mr. President, I have on previous occasions noted the interesting paradox presented by liberals who complain about economic conditions and increased unemployment while they work night and day to reduce defense expenditures in every possible category.

It strikes me that it is about time that some of our ardent slashers of the defense budget understand that they have a responsibility for economic dislocation and joblessness.

The magazine, U.S. News & World Report, estimated this week that in the past year 500,000 workers have lost their jobs at defense plants and another 500,000 will be laid off in the next 12 months. In addition to that, nearly 400,000 servicemen have left the armed services during the past year and 200,000 more are scheduled to leave the military ranks in the next year.

These figures, Mr. President, are based on official U.S. Government reports. They represent the price which must be paid by our communities and our workers when the Congress suddenly forces multibillion-dollar reductions in defense expenditures.

The article in U.S. News & World Report entitled "Where Defense Cuts Hurt Most" reflects an important result of a 2-year drive against the U.S. Defense Establishment. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

### WHERE DEFENSE CUTS HURT MOST

It's the same story over much of U.S.: Economies in arms are bringing leaner times for many involved in defense work. And still more troubles are to come.

Many American businesses, communities and workers, already suffering from huge cutbacks in military spending, now face this gloomy prospect:

Even deeper slashes in outlays for defense are coming. They bode still further economic troubles.

In the past year, about 500,000 workers have lost their jobs at defense plants—and another 500,000 are expected to be laid off in the next 12 months.

Nearly 400,000 servicemen have left the armed forces in the past year, coming on the job market at a time when unemployment is on the rise. An additional 200,000 are scheduled to leave military ranks in the coming year.

#### DOWN BILLIONS

Spending by the Pentagon for research and procurement—including such things as aircraft, munitions, electronic gear, research work—has fallen by almost 3 billion dollars, or 9 per cent, in the past year. A further decline of the same size is taking shape for the coming year.

Dollar declines in arms buying tell only part of the story. Allowing for inflation, the actual volume of goods bought is down even more—in fact, below the level just before the Vietnam build-up.

Many small-sized defense producers, as a result, are closing up shop. A number of bigger ones, too, have found their profits sagging.

Nearly every State is being affected, one way or another. Many small cities and towns that depend on defense spending or near-by military bases are in deep trouble. More than 600 bases have been or soon will be shut down or reduced in scope.

The Seattle area, southern California, Texas and New York State, especially, have been jolted.

The charts on these pages tell the broad story of what massive cutbacks in defense have done to workers, industries and States—and what may be expected in the months ahead.

#### RESULT: JOB LOSSES

It's the part of the U.S. economy involved in defense that is bearing the brunt of the business slowdown, caught in what President Nixon calls an "adjustment from a wartime to a peacetime economy."

Mr. Nixon discussing defense cutbacks, recently said, "It is not hard to see where much of the current increase in total unemployment has come from."

The number of labor areas in the U.S. officially designated as having "substantial" or "persistent" unemployment has jumped from 490 in 1968 to 575 in July, 1970. Many of the additional areas are involved in defense work.

You can see the declining role of defense in generating jobs in another way:

In 1968, 1 in every 10 jobs in this country stemmed from defense—in the armed forces, the Pentagon's civilian work force or in private defense plants. By next June, according to official estimates, only 1 in 13 jobs will be related to defense.

Behind the leaner times for defense industries are the huge slashes, year after year, in the military budget.

Defense spending hit a peak of almost 70 billion dollars in the year that ended June 30, 1969. It fell to 78 billion in the following year and is estimated at 73 billion for the current year, the one ending June 30, 1971.

What's more, a special study by the Economic Unit of "U.S. News & World Report" estimates that, with a mounting deficit in prospect for the federal budget, defense outlays in fiscal 1972 will fall below 70 billion dollars.

#### SOME CONSOLATION

Not all the impact of the defense cutbacks, by any means, has been unfavorable. At least, Administration officials point out, the reductions have turned down one burner under inflation.

George A. Christie, chief economist for McGraw-Hill Information Systems Company, welcomes defense slashes as an indirect stimulus to housing. He says:

"Whenever there is a large diversion of resources to the Pentagon, something has to give. Typically, it's construction, or more specifically, housing. We are finally in the process of reversing the course of the past five years."

Still, the problems brought on by the winding down of the Vietnam war are widespread.

#### TROUBLE FOR PLANE MAKERS

Aircraft makers, in particular, have been hard hit. Production of F-111 fighter-bombers, made near Fort Worth, Tex., by General Dynamics Corporation, has been sliced from the 1,704 planes first planned to 538. Output was to have been cut back even more, but the Air Force on September 22 announced that contracts for 24 planes had been restored. Loss of aircraft contracts has also been heavy in California, Georgia and Connecticut.

Helping to soften the blows on the aerospace industry: Spending for missiles is going up—from 2.5 billion dollars in 1969 to 3.2 billion in 1971.

Cutbacks in orders for ammunition have struck hardest at South Dakota, which has lost nearly three-fourths of its prime military contracts in two years. Nebraska, Vermont and Pennsylvania have also been hit hard by declines in ammunition needs.

Delaware has lost nearly half its defense business—mostly in construction, food and petroleum. Deep cuts in contract awards to West Virginia came mainly in orders for combat vehicles.

#### HELP FROM SHIPBUILDING

Mississippi is one State that is bucking the trend. A big contract for shipbuilding is boosting total volume of defense work in that State. North Dakota contractors are benefiting from construction of the Safeguard missile system.

Seattle is a glaring example of how defense cuts can hurt a city badly.

Unemployment in Seattle is likely to hit 20 per cent this winter. Most of the troubles can be traced to the Boeing Company, which is beset with serious cutbacks in defense, space and commercial aviation.

As one observer put it: "When Boeing runs out of gas, Seattle comes tumbling down without a parachute."

About a fifth of the area's apartments are vacant. Some desperate landlords are forgoing deposits and even offering a month's free rent. Downtown office vacancies are up to 8.3 per cent from 2 per cent a year ago.

Still, a survey by the Gallup Poll, released on September 24, indicates that a majority of voters in all major regions of the nation,

except the South, want their Congressmen to vote for even more defense cuts.

If the attitude of the American public toward defense spending carries weight, the troubles of Seattle and other areas may intensify.

HOW YOUR STATE IS WEATHERING THE SAG IN MILITARY ORDERS—PRIME MILITARY-CONTRACT AWARDS IN YEARS ENDED JUNE 30

[In millions of dollars]

| | 1968 | 1970 | Change (percent) |
|---|---|---|---|
| Alabama | $409 | $316 | Down 22.7. |

## IMPORTANCE OF A RURAL-URBAN BALANCE

Mr. TALMADGE. Mr. President, I have noted with some interest the statistics which are emerging from the 1970 census. An interesting article in the Washington Post this morning pointed out that the east coast megalopolis—the densely populated strip extending from Boston to Washington—now has one-sixth of the Nation's population, 36.2 million people. This narrow strip of land has 18 percent of all U.S. residents although it contains less than 1 percent of the Nation's land.

These statistics are illustrative of the population crisis the Nation will be facing in the coming decades. This body recently took note of the developing crisis by approving title IX of H.R. 18546, the general farm legislation. By passing the bill, the Senate, for the first time, recognized the importance of achieving rural-urban balance and made a commitment to revitalize and develop rural areas. The language of title IX made a congressional finding that the continuing movement of our population to urban areas is unacceptable. In part, title IX said:

The Congress further finds that despite a slowdown in the peak migration of approximately one million people a year in the 1950's, movement of people from rural areas still continues at a high rate. By the year 2000 or soon thereafter, one hundred million more Americans will be added to the one hundred forty million already living in our cities and suburbs. Unless this Nation makes a commitment of sufficient magnitude to reverse the present trend toward excessive concentration of population, two hundred forty million people will be crowded together in four giant strip cities.

Unless we have a sufficient commitment, not only by Congress, but by the administration and by the American people, the growth of our giant strip cities will not only continue—it will accelerate. Each successive census will bring additional evidence of unmanageable congestion in our urban areas and a gradual stagnation of our rural areas.

I am hopeful that a sufficient commitment on our part and by the House of Representatives and the administration can reverse this trend. I am optimistic that the passage of the bill containing our commitment to rural development in the Senate on September 17 was the first step in this direction.

Mr. President, I ask unanimous consent that the Washington Post article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EAST COAST MEGALOPOLIS HAS 18 PER CENT OF POPULATION

More than one-sixth of the nation's population now lives in Megalopolis, the densely populated strip extending from Boston to Washington, D.C. and covering less than 1 per cent of the nation's land.

Preliminary totals from the 1970 census indicate 36.2 million people—18 per cent of all U.S. residents—are found in this region.

Washington, D.C. and the suburban Maryland and Virginia counties surrounding it outpaced the other metropolitan areas in Megalopolis during the past decade, showing a 36.6 per cent growth in that time.

The Commerce Department reported the overall population of Megalopolis increased 11.2 per cent between 1960 and 1970.

The swathe of land from Boston to Washington, the site of most of the 17th and 18th century colonial settlements, has continued its growth in this century. Now, it is virtually one elongated metropolitan area of "strip city," the Commerce Department noted.

It stretches along 450 miles of seacoast and as much as 150 miles inland. Two metropolitan New Jersey counties and 34 contiguous standard metropolitan statistical areas are included in the region.

Except for the District and its surrounding suburbs, no other metropolitan area in Megalopolis grew more than 28 per cent in the past decade. Two New Jersey counties out-paced the Washington area, but are not considered metropolitan areas by the Commerce Department.

Seven of the metropolitan areas included in the yesterday's report have populations exceeding 1 million. The largest is New York with 11.4 million, followed by Philadelphia with 4.8 million. The others are Boston, Washington, Baltimore, Newark and Paterson-Clifton-Passaic.

## ASPECTS OF THE SST PROGRAM

Mr. PACKWOOD. Mr. President, as we near the crucial vote on the SST, I think it is essential that we all have as much information about the progarm as possible. In the September 22, 1970, edition of the Oregonian, Oregon's largest circulated daily newspaper, an excellent article by Leverett Richards tells in detail some of the various aspects of the SST program.

Leverett, who is aviation editor for the Oregonian, is very knowledgeable in his field, and I believe we can all learn from his comments.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UPCOMING SENATE VOTE TO GO AHEAD OR JUNK SST MEANS MONEY TO OREGON

(By Leverett Richards)

Shall the U.S. build a supersonic transport or leave the field to the Russians, the British and the French?

That is the $25 billion question before the Senate this week as that body debates a $290 million appropriation for the SST already passed by the House.

So what? What does it mean to Oregon?

It means a possible $300 million. That is the amount the Boeing company will spend with Oregon firms in the course of building 500 SST's, according to an estimate prepared by Edward H. Cooley, president of Precision Castparts Corp. of Portland.

Nine major subcontractors can expect to produce parts and materials costing $593,000 per SST. During the height of the production program SST subcontractors will total an estimated $27 million a year.

This will mean jobs for 1,100 workers for a period of 5 to 10 years, the study shows.

Oregon will produce about 15 per cent of the titanium required for the all-titanium fuselage of the SST, the study showed.

Nine Oregon companies are major subcontractors for Boeing and expect to participate in the SST program. They are: Carter Manufacturing Company; Electronic Speciality, Portland Division; Ford Industries, Inc.; Omark Industries; Oregon Metallurgical Corporation; Peco Manufacturing Company; Precision Castparts Corp.; Rem Metals Inc.; and Ziconium Technology Corp. Twenty-three other Oregon companies would also share in subcontracts.

A detailed study of national benefits from the SST showed that the Boeing company expects to spend $1,650,000 with Oregon vendors for the two prototype aircraft alone.

The General Electric Company, which is producing the engines for the U.S. SST, has already spent $1,130,970 with four Oregon firms, Earl E. Spencer, manager of western regional relations, told The Oregonian during a recent visit, and expects to spend about $4 million in Oregon through the prototype phase of the project.

General Electric expects to spend about $50 million with six Oregon companies in the course of producing engines for the 500 SSTs expected to be sold by 1990, Spencer said.

This is but a small fraction of the $20 billion total cost of producing 500 SSTs.

If the project is abandoned the U.S. will lose "somewhere in the range of $25 billion to $45 billion over a 15-year period," writes Paul Charrington, Harvard professor of transportation who has studied the SST since 1958.

This would represent a disastrous upset in the balance of trade, economists point out. U.S. aircraft exports average $1.25 billion

per year—the largest single factor in our favorable balance of trade, government reports show.

Sen. William Proxmire, D–Wis. argues that the SST would increase the flow of tourist dollars abroad and thus induce a negative balance of trade.

Rocco Siciliano, undersecretary of commerce, points out that giant jets like the Boeing 747 will continue to stimulate travel abroad long before the SSTs can start service.

These and a barrage of other objections to the SST will be aired in the Senate this week as the appropriations committee recommends approval of the $290 million for the development and testing of two SST prototypes.

Some opponents argue that the SST is a menace to society and should not be built at all.

The fact is that the SST era is already here. It dawned Dec. 31, 1968, the day the Russian TU144 supersonic transport took off, followed by the British-French Concorde March 2, 1969. Both have since flown twice the speed of sound and will be carrying passengers by 1972.

Sen. Proxmire and others contend that the U.S. can't afford to invest a total of $1.3 billion in two SST prototypes when money is needed to fight poverty.

William M. Magruder, head of the SST program for the Federal Aviation Administration, points out that the SST will fight poverty in the old American way—by providing some 150,000 jobs directly and indirectly.

The Air Transport Association estimates these 150,000 workers would create another 100,000 jobs in nonmanufacturing industries serving the SST workers.

From this $2.5 billion annual payroll the government will collect about $6.5 billion in taxes in 15 years, Magruder estimates enough to finance many poverty programs.

Opponents of the SST charge that the SST will generate a sonic boom that will shatter windows and nerves, destroy buildings, kill fish, scare the chickens and sour the milk in the refrigerator.

"The SST will hasten the end of the American wilderness . . . and pollute the upper atmosphere in such a way as may result in terrible alterations of global weather," The Friends of the Earth proclaimed in a recent series of full page ads in a few major newspapers.

They claim the SST's will weave permanent controls in upper atmosphere that will form a perpetual cloud, shut off the sun, and either bring on an ice age or melt the ice caps.

Some theoretical scientists have been quoted as saying the SST may destroy the ozone that protects the earth from cosmic rays. "If all the ozone were stripped away and the earth exposed to the full force of solar radiation "it would wipe out all life except in the oceans," Dr. Gordon MacDonald, a member of the Council on Environmental Quality, is quoted as saying.

There is no scientific or factual basis for any of these charges, Magruder, a former test pilot and designer of the Lockheed L1011, says.

1. There won't be any sonic booms from the SSTs. The U.S., Britain and France all have prohibited supersonic flights over land.

Experiments by Dr. John C. Calhoun, chairman of the National Academy of Sciences committee on oceanography, have shown that "attempts (by explosions) to influence fish acoustically have been trivial, if detectable."

Military aircraft have been flying at supersonic speeds off the coasts, including Oregon's coast, for more than 10 years and no complaints or damage claims have been filed by man or fish, the FAA reports.

Fear of clouds formed by contrails is absurd on the face of it.

Nearly 3,000 commercial jetliners have been weaving contrails in the sky over the U.S. for more than 10 years and there is no sign of any impending ice age—or melting of the ice caps.

And these subsonic jets operate between 25,000 and 40,000 feet where conditions are right for contrails much of the time, meteorologists point out.

The SST's will fly between 60,000 and 70,000 feet, where contrails, rarely ever form.

2. Dr. MacDonald did not say the SST's would destroy the ozone that protects the earth from radiation. He testified before Sen. Proxmire's Joint Economic Committee that "if ozone is decreased in the upper atmosphere we might have some effect at ground level.

"It is a very iffy subject," he emphasized. "It would be my judgment as one who has worked in the field that the effects probably would be minor."

He added that the two prototypes would have no adverse effects.

Dr. MacDonald testified that a fleet of 500 SST's could "over a period of years, increase the water content of the upper atmosphere) by as much as 50 to 100 per cent."

He added that the water content has already increased 50 per cent from natural causes in the past five years.

He testified that the water vapor might warm the average surface temperatures by two-tenths to three-tenths of a degree Fahrenheit, which might melt the polar icecaps.

The amount of water vapor injected into the upper atmosphere by a fleet of 500 SSTs is equal to the water vapor injected by a single thunderstorm, scientists of the National Academy of Science point out—and 3,000 to 6,000 thunderstorms occur every day around the world.

"Scientists wrote me a little paper that said the temperature of the upper atmosphere went up 9 degrees between 1880 and 1940," Magruder recalled. "Nine degrees—and no icecaps melted," Magruder cryptically concluded.

In 1883 Krakatoa blew up and poured a cubic mile of sea water into the upper atmosphere where it stayed for a year or more.

"And nothing happened," Magruder pointed out. "The world temperature didn't change. The icecaps didn't melt."

The National Academy of Sciences dismisses these predictions in a long report concluding with these words: "The best scientific judgment available to the government clearly indicates that there will be no significant adverse effect on the weather."

Dr. Richard Garwin, IBM physicist, foremost opponent of the SST, charges that the SST on takeoff would be as noisy as 50 subsonic jets.

The fact is the SST's engines, in their present state of development, would produce 124 PN d Bs (perceived Noiselevel in decibels) at a point 1,500 feet away from the side of the runway, compared to 108 decibels for present subsonic jets.

Measurement of noise is a complex and inexact science, but Magruder concedes that the sideline noise of the SST engines as now designed would be three to four times as annoying as today's jetliners.

He points out, however, that General Electric and Boeing engineers have eight years in which to reduce this noise level.

The SST is the only aircraft development program ever undertaken with noise limitations written into the contract," Magruder points out.

---

## TENNESSEE WALKING HORSE: THE HOUSE MUST ACT

Mr. TYDINGS. Mr. President, on December 18, 1969, with bipartisan support and without any objection on the part of the administration, the Senate passed my bill to outlaw the soring of Tennessee walking horses.

Soring—the practice of deliberately making the front feet of the Tennessee walking horse sore to induce a long striding step forward—is a barbaric and unnecessary practice, too often substituted for the long training period usually required to produce the magnificent prance of the Tennessee walker.

Evidence presented at Senate hearings last year indicated that Federal prohibition alone can terminate this inhumane practice.

On September 21, the House Subcommittee on Public Health and Welfare held a hearing on S. 2543. I ask unanimous consent that, following my remarks, my statement to the subcommittee and the text of the bill be printed in the RECORD.

It is my sincere hope that the subcommittee will consider S. 2543 favorably and that soring will soon be prohibited by Federal law. It is a vicious practice and illustrates how cruel man can be.

To purposefully injure a horse so it will lift its foot high due to the pain of walking just to win a blue ribbon reflects harshly on the trainers who do it, the owners who permit it, and the judges who condone it.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

S. 2543

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Horse Protection Act of 1969".

SEC. 2. (a) A horse shall be considered to be sored, if, for the purpose of affecting its gait—

(1) a blistering agent has been applied internally or externally to any of the legs, ankles, feet, or other parts of the horse;

(2) burns, cuts, or lacerations have been inflicted on the horse;

(3) a chemical agent, or tacks, nails, or wedges have been used on the horse; or

(4) any other method or device has been used on the horse, including, but not limited to, chains or boots; which may reasonably be expected (A) to result in physical pain to the horse when walking, trotting, or otherwise moving, (B) to cause extreme fear or distress to the horse, or (C) to cause inflammation.

(b) As used in this Act, the term "commerce" means commerce between a point in any State or possession of the United States (including the District of Columbia and the Commonwealth of Puerto Rico) and any point outside thereof, or between points within the same State or possession of the United States (including the District of Columbia and the Commonwealth of Puerto Rico) but through any place outside thereof, or within the District of Columbia, or from any foreign country to any point within the United States.

SEC. 3. The Congress hereby finds (1) that the practice of soring horses for the purposes of affecting their natural gait is cruel and inhumane treatment of such animals; (2) that the movement of sored horses in commerce adversely affects and burdens such commerce; and (3) that horses which are sored compete unfairly with horses moved in commerce which are not sored.

SEC. 4. (a) It shall be unlawful for any person to ship, transport, or otherwise move, or deliver or receive for movement, in commerce, for the purpose of showing or exhibition, any horse which such person has reason to believe is sored.

(b) It shall be unlawful for any person to show or exhibit, or enter for the purpose of showing or exhibiting, in any horse show or exhibition, any horse which is sored if that horse or any other horse was moved to such show or exhibition in commerce.

(c) It shall be unlawful for any person to conduct any horse show or exhibition in which there is shown or exhibited a horse which is sored, if any horse was moved to such show or exhibition in commerce, unless such person can establish that he took all reasonable precautions to prevent the showing or exhibiting of such sored horse.

SEC. 5. (a) Any representative of the Secretary of Agriculture is authorized to make such inspections of any horses which are being moved, or have been moved, in commerce and to make such inspections of any horses at any horse show or exhibition within the United States to which any horse was moved in commerce, as he deems necessary for the effective enforcement of this Act, and the owner or other person having custody of any such horse shall afford such representative access to and opportunity to so inspect such horse.

(b) The person or persons in charge of any horse show or exhibition within the United States, or such other person or persons as the Secretary of Agriculture (hereinafter referred to in this Act as the "Secretary") may by regulation designate, shall keep such records as the Secretary may by regulation prescribe. The person or persons in charge of any horse show or exhibition, or such other person or persons as the Secretary may by regulation designate, shall afford the representatives of the Secretary access to and opportunity to inspect and copy such records at all reasonable times.

SEC. 6. (a) Any person who violates any provision of this Act or any regulation issued thereunder, other than a violation the penalty for which is prescribed by subsection (b) of this section, shall be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty shall be assessed unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be compromised by the Secretary. Upon any failure to pay the penalty assessed under this subsection, the Secretary shall request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found or resides or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action.

(b) Any person who willfully violates any provision of this Act or any regulation issued thereunder shall be fined not more than $2,000 or imprisoned not more than six months, or both.

SEC. 7. Whenever the Secretary believes that a willful violation of this Act has occurred and that prosecution is needed to obtain compliance with the Act, he shall inform the Attorney General and the Attorney General shall take such action with respect to such matter as he deems appropriate.

SEC. 8. The Secretary, in carrying out the provisions of this Act, shall utilize, to the maximum extent practicable, the existing personnel and facilities of the Department of Agriculture. The Secretary is further authorized to utilize the officers and employees of any State, with its consent, and with or without reimbursement, to assist him in carrying out the provisions of this Act.

SEC. 9. The Secretary is authorized to issue such rules and regulations as he deems necessary to carry out the provisions of this Act.

SEC. 10. No provision of this Act shall be construed as indicating an intent on the part of the Congress to occupy the field in which such provision operates to the exclusion of the law of any State on the same subject matter, unless there is a direct and positive conflict between such provision and the law of the State so that the two cannot be reconciled or consistently stand together. Nor shall any provision of this Act be construed to exclude the Federal Government from enforcing the provision of this Act within any State, whether or not such State has enacted legislation on the same subject, it being the intent of the Congress to establish concurrent jurisdiction with the States over such subject matter. In no case shall any such State take any action pursuant to this section involving a violation of any such law of that State which would preclude the United States from enforcing the provisions of this Act against any person.

SEC. 11. On or before the expiration of thirty calendar months following the date of enactment of this Act, and every twenty-four calendar-month period thereafter, the Secretary shall submit to the Congress a report upon the matters covered by this Act, including enforcement and other actions taken thereunder, together with such recommendations for legislative and other actions as he deems appropriate.

SEC. 12. There are hereby authorized to be appropriated such sums, not to exceed $100,000 annually, as may be necessary to carry out the provisions of this Act.

---

[From the St. Louis (Mo.) Post-Dispatch, Jan. 17, 1970]

HALFWAY TO A HUMANE ACT

It is now up to the House of Representatives to complete a measure to protect Tennessee walking horses from the unconscionable practice of mutilating their feet to produce a distinctive gait. The Senate has passed legislation making it unlawful to ship a "sored" horse in interstate commerce, show a sored horse in a horse show, or conduct a horse show in which a sored horse participates; and establishing penalties up to $2000 and six months' imprisonment. The Secretary of Agriculture would administer the law.

For this action the Senate deserves credit for eventual response if not for celerity, having taken two years to legislate against a barbarous practice which has been going on upward of 20 years. It is a victory for Senator Tydings of Maryland, chief sponsor in the upper chamber. In the House several bills to the same effect have been introduced, with Representative Whitehurst of Virginia as chief sponsor.

Hearings already held in the Senate should make it unnecessary for extensive hearings to be held in the House as should the fact that there is nothing to be said in extenuation of the practice. Soring is a resort of lazy, avaricious and unscrupulous owners to produce a gait which properly comes about through patient training. It results in a form of fraud when champions so produced earn stud fees in excess of $100,000 although sore feet could scarcely be transmitted from sire to colt. The only remaining question is that of penalties, and considering the cruelty of the practice and the scale of the monetary returns those decided upon by the Senate appear appropriate enough.

---

[From the Charlotte (N.C.) Observer, Feb. 9, 1970]

BILL CAN HOBBLE HORSE "SORERS"

Horse lovers who would stop the inhumane practice of "soring" Tennessee walking horses have reached the half-way point of their goal.

The United States Senate has passed legislation making it unlawful to ship a "sored" horse in interstate commerce, use in a horse style of walking.

The desired gait used to come from fine breeding and meticulous training. "Soring" is a short-cut enabling owners to make profits by sacrificing the comfort of the horse.

Under provisions of the Senate bill, it would be unlawful to ship a "sored" horse in interstate commerce, use him in a show, or conduct a show in which such a horse participated.

Penalties up to six months imprisonment and fines up to $2,000 are provided. The law would be administered by the Secretary of Agriculture.

We feel this legislation should be passed—and enforced.

---

[From the San Diego (Calif.) Evening Tribune, Jan. 10, 1970]

SENATE TAKES HUMANE ACTION

The Senate, before recessing for the holidays, took time from its concern with war, taxes, foreign aid and other weighty matters to pass a bill certain to win the applause of animal lovers.

In a voice vote, the senators forwarded to the House a measure that would outlaw the practice of "soring" show horses.

Trainers have been successful in inducing the distinctive high-stepping gait in the Tennessee walking horse by causing the horse's leg to blister. As a result, the horse lifts his feet quickly, achieving the gait that could be induced naturally only through a lengthy training process.

If approved by the House and signed by the President, the law would prohibit interstate shipment of a sored horse, the show in which a sored horse participates. Violations would carry penalties of up to $2,000 fine and six months imprisonment.

The painful soring process has been condemned by reputable trainers and concerned horse fanciers as a cruel shortcut in the training process.

The sympathetic concern of the Senate should be quickly endorsed by the House. State legislatures might also be encouraged to enact similar laws covering situations not subject to interstate commerce regulations.

The painful soring process has been condemned by reputable trainers and concerned horse fanciers as a cruel shortcut in the training process.

---

[From the Bloomington (Ill.) Pantagraph, Dec. 25, 1969]

A VOTE FOR THE HORSES

With man's inhumanity to man seemingly beyond repair, progress against man's cruelty to animals may seem unimportant.

Just the same, the Senate has passed a bill aimed at ending the vicious practice of "soring" the forefeet of Tennessee walking horses to produce the desired gait.

STATEMENT OF SENATOR JOSEPH D. TYDINGS

Mr. Chairman, I appreciate this opportunity to comment briefly on the Tennessee Walking Horse legislation.

S. 2543 passed the Senate on December 18, 1969 with bipartisan support. Speaking for the Administration, the Department of Agriculture stated that it had no objection to the bill's enactment.

S. 2543 differs from H.R. 14151 and H.R. 13979 in three important respects.

1. The Senate bill contains a new section 10 clarifying the relationship of the legislation to state law. In committee, Senator Howard Baker of Tennessee amended S. 2543 to provide for concurrent jurisdiction, an amendment I fully supported. Both State and Federal laws will thus apply to instances of soring. Concurrent jurisdiction provides the flexibility to permit the states to act should they desire to do so, yet it assures Federal action against soring should the states fail to move.

2. The Senate bill exempts an individual who conducts a horse show in which a sored horse appears from the penalties imposed by the bill if such individual "can establish that he took all reasonable precautions" to prevent the participation of sored horses. The

Walking Horse legislation focuses on the horse show, and properly so. It is at an exhibition where USDA will be able to enforce an anti-soring law. And it is the exhibitors who bear a large part of the responsibility for the practice of soring. Yet S. 2543 recognizes that it would be unfair to penalize those individuals who make a conscientious effort to exclude sored horses from their shows. Hence, the exemption.

3. The Senate bill revises the enforcement section of H.R. 14151 and H.R. 13979. Subsection 6(a) of S. 2543 provides a civil penalty of not more than $1,000 to be assessed by the Secretary of Agriculture for each violation. Subsection 6(b) provides a criminal penalty of not more than $2,000 or imprisonment of not more than six months, or both for each willful violation. The two House bills provide only for a criminal penalty of not more than $500 or imprisonment of not more than six months, or both.

S. 2543's approach is, I believe, more flexible and effective. Establishing civil penalties for nonwillful violations will probably produce more frequent enforcement efforts than would imposition of a criminal penalty for a first violation. Additionally, authorizing the Secretary of Agriculture to assess civil penalties will not add to the work of already overburdened U.S. Attorney offices. Yet stiff criminal penalties are still warranted. In instances of willful violations, criminal prosecutions by U.S. Attorneys are necessary if S. 2543 is to be an effective deterrent. Rewards from soring in terms of stud fees and prizes can easily exceed $100,000. Some individuals may well be willing to accept the civil penalties of Subsection 6(a) in order to have a winning horse. Subsection 6(b) penalties, however, should cause such individuals to have second thoughts. Thus, in terms of the size of the penalty and method of enforcement, S. 2543 bears a more reasonable relationship to the nature of the violation and the need for effective enforcement than do H.R. 14151 and H.R. 13979.

Soring is a barbaric practice. That it must now at long last be terminated is incontestable.

The atrocity of soring can only be fully realized if the practice itself is clearly understood. Soring is deliberately injuring a horse's foot in order to alter its natural gait. The Tennessee Walker is known for its high skipping gait or "walk." This walk is normally the result of careful breeding and patient training. Yet by "soring" the horse's front feet, the pain of touching the ground will force the Tennessee Walker to kick his feet up and out, exactly the gait desired. A mediocre horse can thus be made to walk like a champion. That soring hurts the horse and eventually harms the breed does not seem to matter. The object is to win the blue ribbon. Soring is therefore practiced by the trainers, condoned by the owners, and ignored by the judges.

That it requires Federal law to end this cruel practice is indeed regrettable. In 1967, when I first became involved with this issue, I initially felt that soring surely was a matter for state and local jurisdictions. I asked myself, as perhaps members of the subcommittee have asked themselves, why is this a matter for the Federal government? Can't the states handle it alone? The hearings on soring that I chaired last year convinced me that the answer is no. State and local governments appear unable or unwilling to stop soring. The pressure to win is too great. Since 1967, the practice has continued, as has the assurances of its practitioners that "given a little more time" soring will stop. But soring has not stopped nor will it without Federal law.

The need for Federal legislation was illustrated by the testimony last September of Dr. Francis Mulhern, Deputy Administrator of the Agricultural Research Service before the Senate Commerce Committee. In reply to my question about the adequacy of State anti-soring laws, Dr. Mulhern stated, "Our position toward the bill in the last Congress was that this should be a State responsibility. After investigating and noting the evidence of the soring that was occurring, even in States where they had laws, we have removed our objection." Only Federal action can stop this barbaric practice.

S. 2543 would be administered by the Department of Agriculture. USDA has stated that the additional workload for conducting the necessary inspections and enforcement activities would be carried out by the existing personnel of the Agricultural Research Service and with the assistance of State officials. Section 8 of the bill specifically calls for use of existing capabilities and encourages USDA use of state assistance. Section 12 of the bill modestly authorizes $100,000 annually to cover expenses that may occur. The Tennessee Walking Horse legislation would not lead to the creation of additional Federal personnel nor would it create a great burden on our Treasury.

The purpose of this Federal legislation is to stop soring. This practice is cruel and barbaric. S. 2543 would achieve this purpose, simply and effectively, and call a halt to the systematic torture of Tennessee Walking Horses. I therefore respectfully urge the Subcommittee to act favorably on S. 2543.

Mr. Chairman, this concludes my statement. I wish to express again my appreciation for the opportunity to place my comments before the Subcommittee.

---

## COMMISSION ON TRANSPORTATION REGULATION

Mr. BAKER. Mr. President, I was somewhat gratified to note that on Tuesday, September 22, our distinguished majority leader, Mr. MANSFIELD, and others introduced S. 4371 calling for the abolishment of the Interstate Commerce Commission and the establishment of a temporary National Commission on Transportation Regulation to determine how best to reassign the functions of the Interstate Commerce Commission.

The reason why I was interested to see the introduction of this bill is that while I, myself, have reached no judgment concerning the fate of the Interstate Commerce Commission, I did introduce in April of this year a bill establishing a temporary Commission on Transportation Regulatory Agencies. However, unlike the bill introduced by the distinguished senior Senator from Montana, my bill reaches no prejudgments and goes beyond just the Interstate Commerce Commission to embrace a study and resulting recommendations with respect to the regulation of transportation by the Interstate Commerce Commission, the Federal Maritime Commission, and the Civil Aeronautics Board.

Mr. President, I introduced my bill, S. 3760, in recognition of the probable need to undertake a long overdue updating of our regulatory process with respect to all transportation modes. Again I repeat, I have no preconceived notions as to what the ultimate solution should be, and in this connection I insert for the possible interest of my colleagues a somewhat pertinent editorial which appeared in the Journal of Commerce of September 21.

Mr. President, in conclusion, let me say that I commend our distinguished majority leader for facing up to the particular facet of the problem addressed by his bill. While I had hoped that our Committee on Commerce, of which I am a member, might have undertaken consideration of my own bill, S. 3760, in this Congress, it now does not appear likely. I, therefore, fully intend to reintroduce it in the next Congress. I would hope that the distinguished Senator from Montana will join me in this effort. Early and favorable consideration of such legislation is necessary in order to effectively meet the growing concern of the effect of our present regulatory process upon the orderly development of a balanced transportation system.

I ask unanimous consent that an editorial on the subject be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE WILD BLUE YONDER

With all the discussion currently going on relative to proposals to merge the transport regulatory agencies, it never fails to astonish us that so few spokesmen for the railroads or other carriers seem at all willing to state just what sort of a regime they think would or should follow the demise of the Interstate Commerce Commission.

There are complaints that ICC is too railroad-minded, and they may have some validity. There are complaints that its procedures are glacially slow. These have even more validity and, as indicated in a news article appearing in this newspaper last Wednesday, are almost universally held among those forced by law to spend months and even years in search of rulings on trivial as well as vital points.

Where the inquiring reporter is greeted almost invariably by a ringing silence is the point at which he asks: What happens after ICC? If it is replaced by a super-agency regulating air carriers and shipping lines as well as inland rail, motor and water carriers, how is the Gordian knot of today's regulatory delays and complexities to be cut? And if it is not cut, what reason is there for any assumption that a super-agency is somehow going to make things better?

There are no grounds for such an assumption whatever unless one accepts the alternative of deregulating all freight and passenger rates and putting them under nothing more than the restraints governing industrial pricing. This, as we have said before, would mean putting them under the antitrust acts which, in turn, would mean something else.

Under the Clayton and Sherman acts any business can set its prices where it pleases, although there are a few prohibitions, such as that applied to basing-point systems on an industry-wide basis. It cannot, however, do so under arrangements with its competitors, and it is not allowed to discriminate between customers.

The ban on discrimination was spelled out most explicitly in the Robinson-Patman Act. It is not absolute. The right to grant volume discounts is recognized. But the stipulation is made that any volume discount given one customer must be available on precisely the same terms to any other customer.

Under this law, carriers would not have to seek regulatory approval on any changes in rates and services. They wouldn't have to go through the drawnout preliminary hearings before a regulatory commission. They could simply put them into effect, with proper notification of their customers. If, however, they were found to be discriminating as between customers or otherwise violating the law, the consequences could be quite serious and quite costly. At that point they would be dealing with the Department of Justice and the courts. There could be heavy fines. And there

could even be (as there have in the past) prison sentences.

Right now, of course, the carriers get a quid pro quo for the delays they suffer in regulatory proceedings. They can, in large measure, discriminate between customers, providing the appropriate regulatory agency doesn't object. They can set rates and agree on practices in concert. In these respects, they are immune from antitrust prosecution. That is quite an advantage, and many of them recognize it.

Some, however, appear bemused with the thought that the antitrust laws (as amended by the Robinson-Patman Act) apply only to goods, where matters of discriminatory pricing is concerned. They do not apply to services. And as they stand today, they would not prevent a carrier—freed from regulation—from charging one customer more for a 500-mile haul than another moving the identical shipment over the identical distance on another route.

But this is merely incidental. The fact that this section of the law is not applicable to common carrier services today, and cannot be applied to them as long as the combination of regulation and antitrust immunity exists, is no reason for assuming that it would not be made applicable to them simultaneously with an end of regulation. The very suggestion that Congress would free transportation of its regulatory restraints while also leaving it free of the restraints applicable to the rest of American business is unthinkable. It simply won't happen.

So what is the argument all about? The consolidation of existing restraints in a single agency offers in itself to promise of shortening the regulatory delays against which there are so many complaints. It might, in fact, make them worse. And from the reluctance of the railroads to discuss the matter at all, we would gather that they are less than enthusiastic over the prospects of confronting the Department of Justice rather than ICC. Better the devil you know, as the saying goes, than the devil you don't. That may explain something but it doesn't explain much.

It makes no sense at all to advocate sweeping changes in advance of any clear understanding of what would follow them. In this sense it seems to us that the burden of proof rests with those who are most anxious to see the transport regulatory structure overhauled. If they feel consolidation of three agencies into one would speed things up, they should explain how. If they are willing to surrender their immunity to antitrust prosecution and deal in the future with the Justice Department instead of ICC or CAB, they should say so. But if they expect to retain what they like in the present system while simultaneously being relieved of what they don't like, they will be running risks. They might well wind up with the worst of both worlds.

## ABSENCE OF CONSUMER NEEDS FROM WHITE HOUSE CONFERENCE ON AGING

Mr. WILLIAMS of New Jersey. Mr. President, we are approaching an important time during this "prologue year" leading up to the White House Conference on Aging in November 1971. For it is during the latter part of this month that the elderly themselves will speak out about their needs at Older Americans White House Forums in communities and neighborhoods all across the Nation.

The information gathered from the forums will provide a valuable backdrop for the recommendations to be worked out during the conference year of 1971.

The forums will stress nine areas of need, including: Income, health, nutrition, housing, transportation, employment and retirement, education, roles and activities, and spiritual well-being. All nine areas are vital to the well-being of older Americans. However, the absence of consumer needs of the elderly concerns me, as older people are faced with unique consumer problems and they are more vulnerable to consumer fraud than other age groups.

Although it is true that older people are consumers in the areas of transportation, nutrition, health or housing, the hearings of the committee on aging, subcommittee on consumer interests of the elderly, have revealed a need for special attention to consumer issues.

The chairman of the subcommittee, the Senator from Idaho (Mr. CHURCH), conducted a valuable hearing this past year in Ann Arbor, Mich., where he heard that: Of all retired couples, as many as 36 percent cannot afford what the Bureau of Labor Statistics designates as the "lower" budget of $2,671; 56 percent cannot afford the "intermediate" budget of $3,857; and 75 percent cannot afford the "higher" budget of $6,039.

Many elderly consumers find the marketplace indifferent to their needs. For example, they cannot find adequate clothing at raesonable prices because many department stores do not want to be thought of as an "old people's market" according to one witness.

The elderly consumer experiences great difficulty in obtaining assistance from providers of goods and services, such as repairmen, banks, and legal firms. These essential services are not always reliable; they are confusing to many older individuals; and they are almost always costly. According to Mrs. Virginia Knauer, Special Assistant to the President for Consumer Affairs, "Too often, a $50 loss can only be recouped through a $150 lawyer's fee."

The elderly consumer is often the special target of fraudulent practices such as retirement land deals, promises of medical "cures," make-money-at-home schemes, and home repair and improvement deals. The financial loss involved in such fraudulent schemes can cut deep into an older person's limited income. Those who fall prey to quack medical cures, useless medical devices, and health fads, may even delay seeking desperately needed legitimate medical care.

Mr. President, these are serious consumer problems—and they are separate and distinct from the consumer difficulties faced by younger persons.

At the third annual meeting of the Consumer Federation of America on August 29, the following resolution was adopted which expressed the group's dissatisfaction with the absence of the consumer issue from the subjects to be studied at the White House Conference on Aging:

Consumer Federation of America expresses appreciation to Senator Church and the Senate Subcommittee on the Consumer Interests of the Elderly in bringing to national attention the needs of this group of citizens.

CFA takes note of the failure of this Administration on Aging in planning for the 1971 White House Conference on Aging to provide opportunity for explicit recognition of the consumer interests of the elderly.

CFA urges the Administration on Aging to meet this deficiency by adding to the nine areas of need already designated for special study in pre-conference planning, a separate study on the needs of the elderly for consumer protection and education.

Mr. President, I believe that the consumer issue is so serious that it deserves special emphasis during this preconference year and at the actual White House Conference on Aging in November 1971.

## CONCEPTS OF PRESIDENCY

Mr. ALLOTT. Mr. President, today's Washington Post contains a significant and wise column by Mr. David Broder concerning "Concepts of Presidency."

Mr. Broder is disturbed by the turn of mind that led the President's Commission on Campus Unrest to declare that "only the President" can do the things which will cool the campuses and unite the Nation.

It is Mr. Broder's feeling that something has gotten out of hand in the last few decades. The thing that has gotten out of hand is the office of the Presidency—and the attention we lavish upon it, and the expectations we have for it.

It seems to me that the only thing that has exceeded the excessive accumulation of power in the Presidency is the outlandish expectations people have come to have of particular Presidents.

It is melancholy to witness a society developing the habit of turning expectantly to high officials to solve all their problems. It is melancholy—and enervating to democracy. Needless to say, that which enervates democracy is profoundly dangerous.

Mr. Broder is quite interested in a recent paper on the Presidency authored by Mr. Thomas E. Cronin of the Brookings Institution. I hope to be able to share this paper with the Senate in the near future. Pending that, I ask unanimous consent that Mr. Broder's column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 29, 1970]

CONCEPTS OF PRESIDENCY

(By David S. Broder)

"Only the President," the Scranton Commission on Campus Unrest said, "can offer the compassionate, reconciling moral leadership that can bring the country together again.

"Only the President has the platform and prestige to urge all Americans . . . Only the President, by example and by instruction, can effectively calm . . ."

Only the President. Only the President. The theme echoes as insistently as football on autumnal television. Only the President can speak for America in foreign affairs. Only the President has the knowledge to make the vital decisions for national security. Only the President can commit the nation to long-term goals to a trip to the moon, to the conquest of poverty, to the rescue of the environment.

The notion of an activist President as the protagonist of the political drama and the chief arbiter of the national destiny has dominated two generations of American thinking. Harry Truman and Richard Nixon agree on very little else, but they agree that

"the buck stops" in the Oval Office. Every President from FDR on has acted on the assumption that, whatever the practical and constitutional limits on his authority, history and his constituents would hold him responsible, during his tenure, for the welfare of the country, in its broadest terms.

As a product of the educational and political climate of the last three decades, this reporter is thoroughly imbued with that same view, as convinced a doctrinaire of the "strong presidency" as Mr. Nixon was when he discussed the office in one of the notable speeches of the last campaign.

And yet, it deserves to be set forth as a significant fact that a strongly revisionist view of the presidency—which sees it as an office of limited power and influence, easily subject to overstrain—is coming to be held by numerous scholars and citizens.

The revisionist view first surfaced in politics in the campaigns of those oddly similar Quixotes—Barry Goldwater and Eugene McCarthy, both of whom seemed to be running "against the presidency" of the activist tradition, rather than for the office. What seemed an eccentricity in the two men has now developed into a considerable body of thought.

The "textbook presidency" we have all been taught is admirably dissected by Thomas E. Cronin of the Brookings Institution in a paper delivered earlier this month at the convention of the American Political Science Association.

Today's typical student, Cronin says, "learns that the presidency is 'the great engine of democracy,' . . . that presidents must instruct the nation as national teacher and guide the nation as national preacher . . . What is needed, most texts imply, is a man of the foresight to anticipate the future and the personal strength to unite us; to steel our moral will, to move the country forward and to make the country governable. The vision, and perhaps the illusion, is that if only we can identify and elect the right man, our loftiest aspirations can and will be accomplished."

That notion, Cronin says, is powerfully reinforced by the cliches of political journalism and, of course, by the rhetoric of most presidential campaigns.

His contention is that the revisionists have made a case that the glorified concept of the presidency has done us harm as a nation by contributing: (1) to popular disillusionment with the inevitable failings of the men who serve as president; (2) to the prevailing political apathy; (3) to the penchant for personal confrontations with, or acts of aggression against, presidents: (4) to inflation of presidential egos and distortion of presidential judgments; and (5) to neglect of other officials, and institutions' capacity for significant contributions to solving national problems.

One need not swallow this bare-bones outline of his argument whole to recognize the importance of the issues being raised. And this is no academic dispute. For there is evidence that many ordinary voters have intuitively adopted the revisionists' conclusions, without hearing all their arguments.

What may be happening among the voters is not just a shift of issues and of party preferences but a shift in the popular concept of the kind of President the nation needs—a change that can powerfully alter the political future. But more of that another time.

---

## GEORGE HOOPER WOLFE—THE SAGE OF WILLIAMSPORT

Mr. TYDINGS. Mr. President, when George Hooper Wolfe was 7 years old, he began to walk the towpath along the C. & O. Canal driving a pair of mules, lugging hundreds of tons of coal from Cumberland, Md., to Georgetown. For the next 12 years, he met the people of the canal—the boat owners, the hired hands, the captains, the lock tenders, and the section crews, the wharf loaders, and the dredge crews, and the mules—the people who made the "big ditch" that was conceived by George Washington in 1780 to be the gateway to the West their way of life.

A native of Williamsport, a former canal town in Washington County, Md., George Wolfe later bought and renovated an old 30-room hotel. His great natural talent for the dying art of storytelling then began to unfold, especially when he spoke of old canal day stories. When he was 75 years old in 1969, he decided to gather his pictures, stories, maps, charts, and other memorabilia into a book entitled "I Drove Mules on the C. & O. Canal."

The fact that all proceeds from the book are being donated to the Methodist Church is testimony to his selflessness and outstanding citizenship.
